\textsuperscript{229} Planned Parenthood v. Danforth, 428 U.S. 52, 67-71 (1976) (spousal consent provision unconstitutional); id. at 72-75 (parental consent requirement for minors with medical emergency exception, but no other judicial bypass procedure, unconstitutional); Akron v. Akron Center for Reproductive Health, Inc., 462 U.S. 416, 444-45 (1983) (requiring that the physician tell the women that “the unborn child is a human life from the moment of conception” unconstitutional); id. at 445-46 (requiring that certain information must be provided in all cases regardless of whether in the physician deems it relevant unconstitutional); id. at 449-51 (mandatory 24-hour waiting period unconstitutional); Thornburgh v. American College of Obstetricians and Gynecologists, 476 U.S. 747, 760-66 (1986) (“much of the information required is designed not to inform the woman's consent but rather to persuade her to withhold it altogether” and intrudes upon the discretion of the pregnant woman's physician and thereby imposes the “undesired and uncomfortable straitjacket”); id. at 766-68 (required Pennsylvania reports, while claimed not to be “public,” are available nonetheless to the public for copying and thus raise the specter of public exposure and harassment of women who choose to exercise their personal, intensely private, right to end a pregnancy).

\textsuperscript{230} Connecticut v. Menillo, 423 U.S. 9, 11 (1975) (constitutional to require abortions to be performed by physicians); Planned Parenthood v. Danforth, 428 U.S. 65-67 (1976) (provision requiring a woman's written consent to abortion constitutional); id. at 79-81 (reporting and record keeping requirements constitutional); Harris v. McRae, 448 U.S. 297, 325 n.27 (1980) (constitutional to withhold federal funds under the Medicaid program to reimburse the costs of abortions, except where the life of the mother would be endangered if the fetus were carried to term, even though the government would fund childbirth expenses under Medicaid); Planned Parenthood Ass'n v. Ashcroft, 462 U.S. 476, 486-90 (1983) (requirement of a pathology report for each abortion performed).

\textsuperscript{231} Belloti v. Baird, 443 U.S. 622, 634 (1977) (listing these three reasons); Carey v. Population Services, Int'l, 431 U.S. 678, 693 & nn.15-16 (1977) (the law “has generally regarded minors as having a lesser capability for making important decisions” than adults, thus permitting different regulations for children with “sufficient justification”).
Under this analysis, a parental consent law was held valid as long as it assured a prompt judicial hearing where the minor could demonstrate “that she is sufficiently mature to make the abortion decision herself or that, despite her immaturity, an abortion would be in her best interests.” A state can also ban abortion on an unmarried, unemancipated minor woman unless one parent is notified or a court approves through a judicial bypass alternative. Requiring notice to both parents is equally valid, as long as a judicial bypass alternative exists.232

With respect to possible application of criminal laws to physicians performing abortions, the Court held void for vagueness a statute requiring physicians to attempt to preserve the life of an aborted fetus if there is "a sufficient reason to believe that the fetus may be viable." Physicians cannot be found criminally liable for aborting a viable fetus unless they know it is viable or in bad faith ignore facts regarding viability.233 Also too vague was a criminal statute which required physicians to dispose of fetal remains in a "humane and sanitary manner."234

§ 27.3.3.4 Disclosure Privacy versus Decisional Privacy Rights

A collateral development of the privacy doctrine was suggested in 1977 when the Court said in \textit{Whalen v. Roe}235 that the "privacy" cases have involved at least two different kinds of interests. “One is the individual interest in avoiding disclosure of personal matters, and another is the interest in independence in making certain kinds of important decisions.” The previously discussed cases in §§ 27.3.3.1-27.3.3.3 have all involved this second kind of interest – independence in making certain kinds of important decisions. \textit{Whalen} involved the first kind of interest – an interest in avoiding disclosure of personal matters. The constitutional question presented in \textit{Whalen} was whether a state could record, in a centralized computer file, the names and addresses of all persons who have obtained, pursuant to a doctor’s prescription, certain drugs for which there is both a lawful and an unlawful market. Because of safeguards in the statute protecting privacy, the Court concluded that the program did not pose “a sufficiently grievous threat” to trigger any kind of heightened scrutiny. Given this less than substantial burden, the Court then applied rational review, concluding, “There surely was nothing unreasonable in the assumption that the patient identification

\begin{itemize}
  \item[232] Planned Parenthood Ass'n v. Ashcroft, 462 U.S. 476, 490-93 (1983) (requirement that a minor secure parental consent is constitutional, as long as option provided for consent from a court if minor sufficiently mature to make the abortion decision herself or that, despite her immaturity, an abortion would be in her best interests); Belloti v. Baird, 443 U.S. 622, 639-44 (1977). On parental consent and notification laws, \textit{see generally} 77 A.L.R. 5th 1 (originally published 2000).
  \item[233] Planned Parenthood v. Danforth, 428 U.S. 52 (1976) (provision requiring the physician to exercise professional care to preserve the fetus' life and health on pain of criminal and civil liability was unconstitutional); Colautti v. Franklin, 439 U.S. 379, 388-90 (1979) (“good-faith” standard for viability determination required).
\end{itemize}
requirement might aid in the enforcement of laws designed to minimize the misuse of dangerous drugs.”

A similar case of rational review being applied in a “disclosure privacy” case occurred in C.N. v. Ridgewood Board of Education. In this case, the court was confronted a school survey on sexual activity, drug use, and participation in various kinds of extra-curricular activities, that in practice was deemed by the court to be involuntary for the students to take. Because the surveys were structured to be anonymous, any risk of disclosure of personal information was minimal. The Court thus applied a second-order rational review balancing test, noting that the factors to be considered in the balance included: "the type of record requested, the information it does or might contain, the potential for harm in any subsequent nonconsensual disclosure, the injury from disclosure to the relationship in which the record was generated, the adequacy of safeguards to prevent unauthorized disclosure, the degree of need for access, and whether there is an express statutory mandate, articulated public policy, or other recognizable public interest militating toward access." Given the safeguards to ensure the anonymous nature of the survey, and the fact the survey was an attempt to obtain information “directly related to the understanding and prevention of the social problems confronting today's youth – a laudable goal,” the court granted a summary judgment on behalf of the school district on the disclosure privacy claim.

§ 27.3.4 Modern Natural Law Era Decisions Regarding Fundamental Rights Analysis

In 1986 and thereafter, the post-instrumentalist Court has not overruled Griswold or Roe. But it has trimmed back Roe, overruled several of its progeny, and has only rarely recognized any extension of unenumerated fundamental rights. This has been based on the natural law balancing of text, context, history, legislative and executive practice, precedents, and reasoned elaboration of constitutional concepts, as discussed at § 12.3.3 nn.119-28. But some additional exceptions do exist. Most of these cases have involved some aspect of the decisional privacy line of cases.

§ 27.3.4.1 Decisional Privacy Regarding Abortion Rights

In 1989, the Court was faced with an opportunity to overrule or dramatically limit Roe v. Wade in Webster v. Reproductive Health Services. In Webster, a 3-Justice plurality opinion of Chief Justice Rehnquist, joined by Justices White and Kennedy, criticized Roe and stated that Roe’s “trimester framework has left this Court to serve as the country's 'ex officio medical board with powers to approve or disapprove medical and operative practices and standards throughout the United States.'” Justice Scalia indicated his willingness to overturn Roe in its entirety.

236 430 F.3d 159, 179-82 (3d Cir. 2005). See also Greenville Women’s Clinic v. Commissioner, South Carolina Dep’t of Health & Envir. Control, 317 F.3d 357, 367-71 (4th Cir. 2002), cert. denied, 538 U.S. 1008 (2003) (regulation authorizing state health inspectors to review and copy abortion clinic records, as part of state responsibility to monitor and investigate complaints against clinics, while requiring that patient records be kept confidential, constitutional under rational review).

237 492 U.S. 490, 518-19 (1989) (plurality opinion of Rehnquist, C.J., joined by White & Kennedy, JJ.); id. at 532 (Scalia, J., concurring in part and concurring in the judgment).
In contrast, Justice O'Connor decided that it was not necessary in Webster to consider the broader implications of Roe, even though she had previously indicated discomfort with the Roe framework. In Webster, she concluded that even under the Roe framework the substantive regulations at issue in this case – a ban on use of public employees, facilities, or funds for performance or assistance with nontherapeutic abortions (i.e., those abortions not needed for the mother's health), and physicians being required to perform reasonable viability tests on a fetus believed to be of 20 or more weeks gestational age – were constitutional. Laws banning public funds or facilities for abortions have routinely been viewed as constitutional under Roe, as noted at § 27.3.3.3 n.230. Regarding viability testing, while in 1973 the point of viability was typically viewed as around the 28th week of pregnancy, by 1989, increases in medical technology had moved viability back to typically the 24th week of pregnancy, where it remains as of 2006. Based on fetal lung capacity, that point is not likely to change much in the future, although in rare cases fetuses believed to be 20 weeks or older gestational age have survived premature births. Particularly since the parties might be confused as to the time of conception, the statute's requirement to perform a reasonable viability test on a fetus believed to be in the 20th week of pregnancy was constitutional, since such a fetus might actually be closer to the 24th week of pregnancy, and thus more likely viable. As a general matter, about half of the roughly 1.3 million abortions in the United States each year take place within the first 8 weeks of pregnancy; 9 in 10 occur within the first 12 weeks; and less than 1 percent are performed after 20 weeks. Some 300-600 abortions a year – or up to five one-hundredths of 1 percent – are performed after 26 weeks, when the fetus is likely viable. Almost inevitably, these are done in the context of substantial health risks to the mother or fetal defects not diagnosed until late in the pregnancy.

The legacy of Roe as a precedent was squarely faced three years later, in 1992, in Planned Parenthood v. Casey. There, in a 5-4 decision, the Court decided not to overrule Roe v. Wade in its entirety. Justices Scalia, with Justices Rehnquist, White, and Thomas, dissented on that matter. Justice Scalia said that the Constitution does not protect a fundamental liberty to abort an unborn child because of two facts: "(1) the Constitution says absolutely nothing about it, and (2) the longstanding traditions of American society have permitted it to be legally proscribed." The same Justices also joined in a dissent by Chief Justice Rehnquist which said that the Court in Roe read earlier opinions much too broadly. "Unlike marriage, procreation, and contraception, abortion 'involves the purposeful termination of potential life.'

In contrast, Justice Blackmun would have had the Court not disturb Roe's holding and trimester framework in any respect. Justice Stevens, also supporting Roe, said that it protected a woman's

\[240\] Id. at 980 (Scalia, J., joined by Rehnquist, C.J., and White & Thomas, JJ., dissenting).

\[241\] Id. at 952 (Rehnquist, C.J., joined by White, Scalia & Thomas, JJ., dissenting).
freedom to decide matters of the highest privacy and most personal nature.\textsuperscript{242}

The outcome of the case thus depended on the views of Justices O'Connor, Kennedy, and Souter. These three Justices joined in a rare joint opinion, parts of which were likely authored by each of the three Justices, but the opinion was not specifically authored by any one Justice. This may have been done, in part, because although \textit{Roe v. Wade} was a 7-2 opinion when decided, the fact that Justice Blackmun authored the majority opinion meant that he received more than his share of hate mail and death threats concerning the case over the years. The joint opinion opened by rejecting a formalist view that (1) the textually specific protections of the Bill of Rights and (2) the customs and traditions of states at the time of ratification of the 14\textsuperscript{th} Amendment mark the outer limits of liberty protected by due process. Ultimately, they said, it comes down to "reasoned judgment," the hallmark of the natural law style. Attempting to describe the central core of privacy doctrine, the joint opinion said:

\begin{quote}
Our law affords constitutional protection to personal decisions relating to marriage, procreation, contraception, family relationships, child rearing, and education. . . . These matters, involving the most intimate and personal choices a person may make in a lifetime, choices central to personal dignity and autonomy, are central to the liberty protected by the Fourteenth Amendment. . . . At the heart of liberty is the right to define one's own concept of existence, of meaning, of the universe, and of the mystery of human life.\textsuperscript{243}
\end{quote}

As to whether, with respect to abortion, a state can have an interest sufficient to proscribe it entirely, the joint opinion said that a woman's suffering is too intimate and personal for the state to insist, without more, upon its own vision of a woman's role. With respect to reservations about reaffirming the central holding of \textit{Roe}, the authors said they were outweighed by their analysis of individual liberty combined with the force of \textit{stare decisis}. Here, \textit{stare decisis} was not outweighed by any concern about whether \textit{Roe v. Wade} was wrongly decided because the case has not proved unworkable, people have relied on the decision, no evolution of legal principle had weakened its doctrinal footings, its factual underpinnings remain intact, it has been expressly reaffirmed several times, and overruling might be perceived as a surrender to political pressure.\textsuperscript{244} These are the factors typically used by natural law judges in deciding whether to overrule precedent, as discussed at §§ 7.3.2, 7.3.3 & 7.3.4.

Having refused to overrule the central principle that a woman has a right to terminate her pregnancy before viability, the joint opinion substituted an "undue burden" test for determining when the fundamental right had been violated – the question being whether a state regulation has “the purpose or effect of placing a substantial obstacle in the path of a woman seeking an abortion of a non-viable fetus.” The opinion then applied that test to the state law in question, striking down a requirement of spousal notification, but upholding, under rational review, requirements of written informed

\end{footnotes}
consent, providing certain information to the patient, a 24-hour waiting period, required record keeping, and a parental consent provision for women under 18, with a judicial bypass.245

Some of these provisions, like a 24-hour waiting period or informed consent requirement, had been viewed as unconstitutional under the strict scrutiny approach of Roe, as noted at § 27.3.3 n.229. Now they were upheld under the rational review approach toward less than undue burdens on abortion rights of Casey. Although the Court did not phrase the analysis in precisely this way, the best way to understand the Court’s detailed discussion of each of these provisions for their impact on abortion choice, rather than simple minimum rational review deference, is a standard second-order rational review factor balancing test. In the Court’s view, each of the provisions advanced what Roe acknowledged was a legitimate interest in informed decisionmaking regarding protecting potential life from the moment of conception, and did not impose an “undue burden,” similar to the second-order concern with the existence of a “clearly excessive” burden, as in Pike v. Bruce Church under dormant commerce clause analysis, discussed at § 20.3.2.1.D n.196; or “grossly excessive” burden, as in the punitive damages award case of BMW v. Gore, discussed at § 27.1.2.4 nn.84-85; or “unreasonable” burden, as in Turner v. Safley, discussed at § 27.3.3.1.A n.183.

The instrumentalist opinions of Justices Stevens and Blackmun in Planned Parenthood v. Casey followed Roe v. Wade in its entirety, making every burden on abortion rights subject to strict scrutiny. This constitutionalized under strict scrutiny all regulations on abortion, following Roe’s concern about specific harm if a pro-choice position were not adopted.246 This approach differed from the natural law approach of the joint opinion in Casey, where the Court did not sit as a super-legislature regarding all aspects of abortion regulation. Thus, the specific harm paragraph in Roe was not present in Justices O’Connor, Kennedy, and Souter’s joint opinion in Casey, and not every regulation of abortion was constitutionalized under a strict scrutiny approach.247

More generally, the importance of the undue burden analysis in the joint opinion in Casey was to ensure that not every abortion regulation triggered strict scrutiny, and thus the Court did not act as

245 Id. at 874-901. See also Hodgson v. Minnesota, 497 U.S. 417 (1990); Women’s Medical Professional Corp. v. Baird, 438 F.3d 595, 604-09 (6th Cir. 2006) (requiring abortion clinic to have emergency transfer agreement with local hospital, which may require clinic to close and thus force patients to travel to an alternative clinic roughly 50 miles away, not an undue burden).

246 505 U.S. 833, 917 (1992) (Stevens, J., concurring in part and dissenting in part); id. at 929-34 (Blackmun, J., concurring in part and dissenting in part). See Casey, id. at 927-28 (Blackmun, J., concurring in part and dissenting in part) (“[C]ompelled continuation of a pregnancy . . . impos[es] substantial physical intrusions and significant risks of physical harm. . . . [M]otherhood has a dramatic impact on a woman’s educational prospects, employment opportunities, and self-determination . . . .”); Roe v. Wade, 410 U.S. 113, 153 (1973) (Blackmun, J., for the Court) (“Maternity, or additional offspring, may force upon the woman a distressful life and future. Psychological harm may be imminent. Mental and physical health may be taxed by child care.”).

247 Compare 505 U.S. at 934-40 (Blackmun, J., opinion) (strict scrutiny applied to all of the legislative regulations in Casey) with id. at 879-901 (joint opinion in Casey) (rational review applied to less than undue burdens on abortion choice; strict scrutiny applied only to undue burdens).
super-legislature second-guessing every aspect of abortion regulation.Rather, strict scrutiny analysis was restricted in *Casey* to protecting the core principle of personal liberty from undue burdens. It could be argued, given the literal text in *Casey*, which stated that “[i]n our considered judgment, an undue burden is an unconstitutional burden,” that the joint opinion in *Casey* summarily concluded that the spousal notification provision was unconstitutional once it was held to be an undue burden. The better analysis of *Casey*, consistent with the general structure of fundamental rights analysis, is that when the joint opinion stated it was upholding the core holding of *Roe*, that meant a court should apply *Roe’s* strict scrutiny analysis to undue burdens on abortion rights. This would mean that where the state has a compelling interest to regulate, such as to protect maternal health from the first trimester on, or to protect pre-natal life after viability, a narrowly tailored statute directly related to advancing that interest and employing the least burdensome effective alternative would be constitutional. For example, a regulation that might, as applied to a particular woman, place a substantial obstacle in the path of that woman obtaining an abortion of a pre-viable fetus, but that could be shown under a strict scrutiny approach to be necessary to protect the compelling health interest of that mother, would likely be viewed by the Court as constitutional, even though it would be an “undue burden” under the Court’s precise language in *Casey*.

In 1998, in *Voinovich v. Women’s Medical Professional Corp.*, the Court denied certiorari to a federal court of appeals decision holding unconstitutional an Ohio law that prohibited post-viability abortions. The lower court said that the law’s exceptions for abortions necessary to prevent the death of the pregnant woman or a serious risk of impairing a major bodily function did not provide an exception for abortions based on the pregnant woman’s mental health. Chief Justice Rehnquist, and Justices Scalia and Thomas, dissented, saying that no court ruling supports the proposition that a mental health exception is required as a matter of federal constitutional law.

The Court ruled on the issue of a physical health exception in 2000. In *Stenberg v. Carhart*, a 5-4 Court ruled that a Nebraska statute banning even post-viability, partial-birth abortions, where normally states can ban abortions to advance the compelling interest of protecting the life of a viable fetus, was unconstitutional as not having a sufficient exception for the life or substantial health interests of the mother, as required in *Roe*, discussed at § 27.3.3 n.225, and modified by the “undue burden” analysis in *Casey*. In dissent, Justice Kennedy, joined by Chief Justice Rehnquist, concluded that the law’s medical emergency exception, as a less than undue burden on choice, was sufficient to meet a maternal health exception requirement. Justice Thomas, joined by Chief Justice

Taft, 444 F.3d 502, 511-14 (6th Cir. 2006) (upholding district court’s preliminary injunction, which held unconstitutional a law restricting use of the RU-486 pill to uses approved by the Food and Drug Administration, and not providing for medical emergency use to abort a fetus where surgical abortion would pose significantly greater health risks to the mother, because the law did not provide adequate medical emergency exception).
Rehnquist and Justice Scalia, wrote a dissent calling for Roe and Casey to be overruled.

Following Carhart, Congress passed its own version of a partial-birth abortion ban, with a similar limited medical emergency exception for the life of the mother, as in the Nebraska statute, but Congress took the view that no health emergencies short of life-threatening conditions could ever exist to justify a partial-birth abortion. Lower courts have predictably granted injunctions against the statute being applied, viewing it as inconsistent with Carhart. The Supreme Court has granted certiorari to hear the issues involved in one of these cases, Gonzales v. Carhart. Justice O’Connor’s critical fifth vote in the earlier Carhart decision has now been replaced by Justice Alito, but given the precedent of Carhart, Justice Kennedy’s vote is uncertain in this case.

From a natural law perspective, Justice Kennedy’s vote will likely be based on whether he views Congress’ judgment regarding the lack of a need for a health emergency exception as rational or not. Under the analysis of Casey presented here, if the lack of the emergency exception is viewed as placing a substantial obstacle in the path of the woman seeking an abortion, strict scrutiny should be triggered and the government would bear the burden of proving the accuracy of their judgment. If the ban is viewed as not placing a substantial obstacle in the path of a woman seeking an abortion, then under second-order rational review, the burden would be on the challenger to establish that Congress’ judgment was wrong. This understanding is consistent with Justice Kennedy’s dissent in Carhart, where he viewed Nebraska’s partial-birth abortion ban as not constituting a substantial obstacle, and thus he exercised second-order rational review deference toward the state’s medical judgments, although not the substantial deference of minimum rational review. Justice Kennedy phrased the question as whether “there was substantial and objective medical evidence to demonstrate the State had considerable support for its conclusion that the ban created a substantial risk to no woman's health. . . . [T]he State is entitled to make judgments where high medical authority is in disagreement.” The difference in the kind of deference given under minimum rational review and second-order rational review is referenced at § 7.2.1 text following n.42.

As Justice Kennedy’s language suggests, in an “as applied” challenge, the focus of the “substantial obstacle” test is on whether the regulation places, in the language of Casey, “a substantial obstacle in the path of a woman [the litigant]” seeking an abortion or instead places “substantial risk to no woman’s health.” In a facial challenge, the Court will consider whether the statute places a substantial obstacle in the path of a “large fraction of the cases in which [the law] is relevant.”

Enough precedent is now on the books that even those who disagree with Justice Douglas' reasoning in *Griswold* must concede, as all the Justices did in *Casey*, that the Due Process Clause offers some protection to a right of privacy. The debate between the various decisionmaking styles regards whether the extension of that right—past the well-established rights to marry, establish a home, raise children, procreate, and have access to contraception, to the right of access to abortion pre-viability held in *Roe* and *Casey*—should be maintained. Formalist and Holmesian judges tend to answer that question in the negative. Natural law and liberal instrumentalist judges tend to answer that question in the affirmative. There seems to be little support, even among formalist or Holmesian judges, for overruling *Griswold v. Connecticut*, with the possible exception of Justice Thomas, as noted at § 27.3.3.2 n.211. Given current social practices, of course, it is unlikely many states would try to limit access to contraception today, although, as discussed next at § 27.3.4.2, regulations concerning other aspects of sexual practices can still trigger litigation.

§ 27.3.4.2 Decisional Privacy Regarding Matters of Sexual Activity

At the end of the instrumentalist era, in 1986, the Court held in a 5-4 decision in *Bowers v. Hardwick*, that there is no fundamental right to engage in homosexual sodomy. Justice White's opinion said that the privacy line of precedents had connections more with reproductive rights involved with marriage, establishing a home and raising children, and decisions whether to "bear or begat" a child, in terms of access to contraception or abortion, and that those rights were not implicated by a statute regulating sodomy. Those cases did not support, he said, recognition of a fundamental right to engage in any kind of private sexual conduct between consenting adults. Against a background of legislative practice—important for a Holmesian like Justice White—in which, until 1961, all 50 states outlawed sodomy, and 24 states and the District of Columbia continued to provide penalties in 1986, it could not be claimed that a right to engage in such conduct was deeply rooted in the Nation's history or traditions. Justice White said, "Nor are we inclined to take a more expansive view of our authority to discover new fundamental rights imbedded in the Due Process Clause. The Court is most vulnerable and comes nearest to illegitimacy when it deals with judge-made constitutional law having little or no cognizable roots in the language or design of the Constitution."

Holmesian Justice White’s opinion was joined by formalist Chief Justice Burger, Holmesian Justice Rehnquist, and natural law Justices Powell and O’Connor, who both had some Holmesian deference-to-government leanings, as discussed at § 12.4.2. Indicating the difficulty of the issue for a modern natural law judge, Justice Powell, concurring, raised Eighth Amendment cruel and unusual punishment problems if the penalty for sodomy were too severe. Further, Justice Powell indicated once he had left the Court that he had originally voted in conference for the recognition of a fundamental right in *Bowers*, and that he now thought he should have stayed with his original vote. While there were not many prosecutions of homosexual sodomy, either before or after

256 *Id.* at 197-98 (Powell, J., concurring). On Justice Powell changing his mind about the proper result in *Bowers*, see Erwin Chemerinsky, *Book Review, Opening Closed Chambers*, 108 Yale L.J. 1087, 1106 (1999), and sources cited therein.
Bowers, the existence of criminal sodomy laws were used in family law, public employment law, and immigration law, among others, to the detriment of gay and lesbian individuals. 257

Justice Blackmun, dissenting with the three other instrumentalists, Justices Brennan, Marshall, and Stevens, said that the rights previously recognized as fundamental form a central part of an individual's life. What the Court had refused to recognize in its opinion, Blackmun said, is "the fundamental interest all individuals have in controlling the nature of their intimate associations with others." He added that "the right of an individual to conduct intimate relationships in the intimacy of his or her own home seems to me to be the heart of the Constitution's protection of privacy." 258

In 2003, the Court overruled Bowers in Lawrence v. Texas. 259 For a majority of instrumentalist Justices Stevens, Ginsburg, and Breyer, and natural law Justices Kennedy and Souter, Justice Kennedy wrote that a reasoned elaboration of the Court’s precedents “show an emerging awareness that liberty gives substantial protection to adult persons in deciding how to conduct their private lives in matters pertaining to sex. . . . When homosexual conduct is made criminal by the law of the State, that declaration in and of itself is an invitation to subject homosexual persons to discrimination both in the public and private spheres. . . . [T]his demeans the lives of homosexual persons.” In reaching this conclusion, Justice Kennedy did not hold that individuals have a fundamental right to engage in such consensual sexual practices, as Justice Blackmun had concluded in his Bowers dissent. Rather, the precise holding in Lawrence was that even under rational basis review, the state had no legitimate interest in regulating their consensual sexual practices, and that any state regulation reflected mere “animus” toward them. In reaching this conclusion, Justice Kennedy relied in part upon broader arguments of social practice, including the “values we share with a wider civilization” and opinions of “the European Court of Human Rights,” as well as noting that by 2003 the legislative practice had changed, with only 9 states banned sodomy generally, and 4 states, including Texas, banned only homosexual sodomy.

Adopting a greater focus on the customs and traditions, typical for a formalist or Holmesian, as discussed at § 27.1.1 nn.10, 12-14, 16-20, Justice Scalia stated in his dissent, joined by formalist Justice Thomas and Holmesian Chief Justice Rehnquist, “[A]n ‘emerging awareness’ is by definition not ‘deeply rooted in this Nation’s history and tradition[s].’ . . . Many Americans [still] do not want persons who openly engage in homosexual conduct as partners in their business, as scoutmasters for their children, as teachers in their children’s schools, or a boarders in their home. They view this as protecting themselves and their families from a lifestyle that they believe to be immoral.” 260

This disagreement between Justices Kennedy and Scalia in Lawrence v. Texas may have application far beyond the facts of this particular case. On behalf of the Court, and echoing a dissent by Justice

259 539 U.S. 558, 566-72, 575 (2003) (Kennedy, J., opinion for the Court).

260 Id. at 598, 602 (Scalia, J., joined by Rehnquist, C.J. and Thomas, J., dissenting).
Stevens in Bowers, Justice Kennedy said that “the fact that the governing majority in a State has traditionally viewed a particular practice as immoral is not a sufficient reason for upholding a law prohibiting the practice.” Justice Scalia pointed out in his dissent that this reasoning “effectively decrees the end of all morals legislation” and that this includes laws against “bigamy, same-sex marriage, adult incest, prostitution, masturbation, adultery, fornication, bestiality, and obscenity.” Justice Kennedy indicated that the case was more limited, saying, “The present case does not involve minors. It does not involve persons who might be injured or coerced or who are situated in relationships where consent might not easily be refused. It does not involve public conduct or prostitution. It does not involve whether the government must give formal recognition to any relationships that homosexual persons seek to enter.”

Kennedy’s passage is consistent with the limits on human behavior appropriate from a Stage 6 perspective, once Stage 4 formalist or Stage 4 ½ Holmesian reliance on tradition and legislative and executive practice as predominant sources of legitimate action is rejected, as discussed at § 16.2.4 nn.63-68. In addition, as noted at § 16.2.4 nn.69-70, the natural law principle concerning giving other persons equal concern and respect, and not engaging in arbitrary coercion, makes it possible to draw distinctions among Justice Scalia’s “parade of horribles.” As discussed there, bigamy, adult incest, prostitution, bestiality, and obscenity can still likely be criminalized after Lawrence; masturbation certainly, and fornication and adultery probably, cannot. As Justice Kennedy stated in Lawrence, noted at 27.3.4.2 n.259, the Court’s precedents “show an emerging awareness that liberty gives substantial protection to adult persons in deciding how to conduct their private lives in matters pertaining to sex.” The lack of prosecutions for fornication or adultery for those statutes still on the books underscores this point, although such conduct can make a difference in some divorce cases regarding custody and financial arrangements, or other civil litigation contexts, such as barring a tort case involving herpes transmission, or refusing to extend to cohabitators protection under laws prohibiting housing discrimination, if adultery or fornication has taken place. Same-
sex marriage will likely eventually become a constitutional right, but only after a period of increasing legislative acceptance in a number of states – that is, the Court balancing arguments of equal concern and respect against legislative and executive traditions – as discussed at § 26.4.6 nn.477-88.

The struggle in the courts over the full extent of Lawrence has begun. In January 2005, a district court judge dismissed in United States v. Extreme Associates Inc. a 10-count indictment in an obscenity prosecution. The judge said that, after Lawrence, the advancement of public morality is no longer a legitimate, let alone compelling, state interest. He reasoned that if there is now a constitutional right of sexual privacy that protects the sexual conduct of consenting adults in their own homes, then there is a constitutional right of privacy that protects those same adults’ ability to receive and to look at pictures. On appeal, the Third Circuit Court of Appeals noted that under Supreme Court’s approach toward precedents, as reflected in Rodriguez de Quijas v. Shearson/American Express Inc., the Supreme Court has admonished lower courts that “[i]f a precedent of this Court has direct application in a case, yet appears to rest on reasons rejected in some other line of decisions, the Court of Appeals should follow the case which directly controls, leaving to this Court the prerogative of overruling its own decisions.” Applying that principle here, the Court of Appeals noted that direct Supreme Court precedents permit the regulation of the distribution of obscene material, and thus the prosecution could go forward, leaving it up to the Supreme Court to determine if Lawrence has changed the constitutional law in this area.

Meanwhile, the Eighth Circuit Court of Appeals considered the case of a defendant who had photographed a nude minor engaged in sexual activity and sent a copy over the Internet. In United States v. Bach, the defendant argued that under Lawrence v. Texas he had a protected privacy interest in this form of expression. The court upheld defendant’s conviction for child pornography, stating that Lawrence involved private and consensual sexual conduct between same sex adults. It did not involve minors or others who might be injured or coerced. The defendant also contended that under Ashcroft v. Free Speech Coalition, discussed at § 30.1.4.1 n.11, his conviction was unconstitutional because the government did not prove that a real minor was used to produce the image, which showed a boy’s body with an inserted head shot of a rock star. The court replied that the phonograph depicted an identifiable minor, and that was sufficient to distinguish the case from Ashcroft, which involved computer-generated images and not real minors.

Although Justice Kennedy’s opinion dodged the broader issue of whether the dissent was right in Bowers to conclude that a fundamental right to sexual privacy exists, some lower federal courts have so held. For example, even before Lawrence, in 2002, a district court concluded in Williams v. Pryor that “undisputed evidence has shown that there is a historical practice and contemporary trend of legislative and societal liberalization of attitudes toward consensual, adult sexual activity, and, a concomitant avoidance of prosecutions against married and unmarried persons for violations

---

266 400 F.3d 622, 628-32 (8th Cir. 2005).

of statutes that proscribe consensual sexual activity.” Based on this conclusion, the court held unconstitutional under strict scrutiny an Alabama statute prohibiting the distribution of “any device designed or marketed as useful primarily for the stimulation of human genital organs.” The Court said that the statute was not narrowly tailored to advance any possible compelling interest, such as protecting children from being exposed to obscene devices or regulating “commerce of sexual stimulation and auto-eroticism, for its own sake.” After Lawrence, of course, a general interest in advancing the state’s view of public morality – even if expressed as a concern with the “commerce of sexual stimulation” – might well be viewed as an illegitimate interest, reflecting animus toward persons wishing to use such devices for their “orderly pursuit of happiness.” The phrase, “orderly pursuit of happiness,” was linked in Meyer, cited at §§ 27.3.2 n.141 & 27.3.2.4, to traditions “long recognized at common law,” reflecting a formalist emphasis on tradition, but would be viewed more broadly today as part of an “emerging awareness” based on “reasoned elaboration” of the law.

On appeal, in Williams v. Attorney General of Alabama, a 2-1 panel of the Eleventh Circuit rejected the district court’s strict scrutiny analysis and upheld the statute under rational basis review, noting that Lawrence did not involve a fundamental rights analysis. As the dissent pointed out, even in the absence of a fundamental right, the statute must survive minimum rational review, and after Lawrence the bare assertion of promotion of public morality is not sufficient to overcome a concern with animus. In passing, the majority responded to this concern by stating that the statute was rationally related to the legitimate police power of “restricting the sale of sex.” The court noted that the statute prohibited only the sale – but not the use, possession, or gratuitous distribution – of sexual devices. The law did not affect the distribution of a number of other sexual products such as ribbed condoms or virility drugs. Nor did it prohibit Alabama residents from purchasing sexual devices from out-of-state suppliers, either on their own or through the Internet, and bringing them back or having them mailed in-state. Moreover, the statute permitted the sale of vibrators and body massagers that, although useful as sexual aids, are not "designed or marketed . . . primarily" for that purpose. Finally, the statute exempted sales of sexual devices "for a bona fide medical, scientific, educational, legislative, judicial, or law enforcement purpose." Even given these limitations, how the statute is rationally related to restricting the “sale of sex,” rather than “sex toys,” was left unexplained, particularly since persons engaged in prostitution would be able to buy any sex toys they used in their trade in other states or through the Internet and use them in Alabama.

On the other hand, although not argued in the litigation, it is conceivable that the statute is rationally related to neighborhood planning concerns, such as decreasing the number of “adult sex stores” operating in Alabama. That interest would be similar to laws banning nude dancing establishments on grounds that they tend to serve as magnets for prostitution and increased drug trafficking, discussed at 29.4.4.1 n.125. To the extent there exists no fundamental right regarding sexual practices, the statute therefore perhaps survives minimum rational review. Under a second-order rational basis review, the minor burden imposed by this statute would probably still be “excessive” given any limited benefit regarding prostitution or neighborhood planning concerns. Thus, to the extent this case involves a less than substantial burden on a fundamental right of privacy regarding sexual practices, it would be unconstitutional.

---

268 378 F.3d 1232, 1233-26 (11th Cir. 2004); id. at 1250-52 (Barkett, J., dissenting).
This difference underscores that it does make some difference whether no fundamental right exists, and thus minimum rational review is triggered, discussed at § 27.1.2.1, or there is a less than substantial burden on a fundamental right, in which case second-order rational review appears to be triggered, discussed at §§ 21.2.3 & 27.3.3 nn.175-79. Courts in Colorado, Kansas, and Louisiana have struck down similar laws on right of privacy grounds, while courts in Georgia, Mississippi, and Texas, like Alabama, have upheld them.269

There is also a collateral issue of the extent to which the “animus” analysis in Lawrence could be extended to the “disclosure” aspect of the right of privacy, discussed at § 27.3.3.4 nn.235-36. These cases would involve issues such as the extent to which an individual may have a right against forced disclosure by the government of sexual orientation, as could occur in the context of background checks for employment or police investigations.270

§ 27.3.4.3 Decisional Privacy Regarding Rights to Refuse Medical Treatment or To Die

Another area where the Justices have struggled with the question of whether to find a fundamental right occurred in Cruzan v. Director, Missouri Department of Health.271 In Cruzan, the parents of an incompetent patient sought and were granted a court order authorizing the removal of lifesaving nutrition and hydration equipment. The state Supreme Court reversed, holding that the state had a strong policy favoring the preservation of life and that clear and convincing evidence had not been presented that the patient would wish to die under the circumstances. In 1990, the Supreme Court affirmed. Chief Justice Rehnquist wrote that prior decisions sustained the existence in a competent person of a constitutionally protected “significant” liberty interest, although not necessarily a fundamental right, to refuse unwanted medical treatment. Applying some form of rational basis review, that interest was balanced in Cruzan against state interests in protecting the personal element of choice against potential abuses and asserting its unqualified interest in preserving human life. The Court held that these state interests were permissibly advanced by applying a clear and convincing standard of proof to determine the patient's wishes. In part, this was because the state may place an increased risk of an erroneous decision on those seeking to terminate an incompetent person’s life.

Justice Scalia, concurring, said that there could be no claim that substantive due process has been denied unless the state has deprived an individual of a right historically and traditionally protected against state interference, citing Michael H., Bowers, and Moore. Historically, there has been no

recognize a right to commit suicide. Justice O’Connor, concurring, as the critical fifth vote, indicated her belief that a liberty interest did exist to refuse unwanted medical treatment. By writing a concurrence on this point, this perhaps suggested a greater willingness to call this a fundamental right, different than the majority opinion. However, Justice O’Connor predominantly focused on the holding of the case, which was that the state was permitted to require “clear and convincing evidence of Nancy Cruzan’s desire to have artificial hydration and nutrition withdrawn.”

A similar issue was raised in 2005 in the high-profile case of Terry Schiavo, with the courts ruling in that case that the legal surrogate, Ms. Schiavo’s husband, did present clear and convincing evidence that Ms. Schiavo would have wanted the artificial hydration and nutrition withdrawn.

Justice Brennan, joined by Justices Marshall and Blackmun, dissented in *Cruzan*. Brennan said the right to be free from unwanted medical treatment is fundamental. The state’s only legitimate interest where the patient is incompetent is to safeguard the accuracy of a determination of the patient’s intent. However, the clear and convincing evidentiary standard is an obstacle to the exercise of the fundamental right because no proof is required to support a finding that the incompetent person would wish to continue treatment. Justice Stevens also dissented, arguing that the state’s evidence rule interfered with the exercise of a right so rooted in traditions and conscience to be fundamental – the freedom to come to terms with the conditions of one’s own mortality.

The Court returned to the discussion of these matters in 1997 in *Washington v. Glucksberg*. There Chief Justice Rehnquist wrote for the Court that an asserted right to assistance in committing suicide is not a fundamental liberty interest. Distinguishing the *Cruzan* case, he drew a line between letting a patient die and making that patient die. He said, “Throughout the nation, Americans are engaged in an earnest and profound debate about the morality, legality and practicality of physician-assisted suicide. Our holding permits this debate to continue, as it should in a democratic society.”

In *Compassion in Dying v. State of Washington*, the Ninth Circuit Court of Appeals had held that there was a constitutional right to physician-assisted suicide, reasoning that such a right was “similar” to the fundamental rights discussed in *Planned Parenthood v. Casey*, based on *Casey*’s language that at “the heart of liberty is the right to define one’s own concept of existence, of meaning, of the universe, and of the mystery of human life.” The Supreme Court reversed, stating that any such “similarity” was not sufficient to recognize such a new constitutional right in this case.

---

272 *Id.* at 292-94 (Scalia, J., concurring); *id.* at 287-90 (O’Connor, J., concurring).

274 *Id.* at 301-02 (Brennan, J., joined by Marshall & Blackmun, JJ., dissenting); *id.* at 330-32 (Stevens, J., dissenting).

The Court noted in *Glucksberg* that no text, context, or history of the 14th Amendment supported a right to physician-assisted suicide, and that legislative and executive practice in 49 of the 50 States, with the exception of Oregon, rejected such a right. Even general social practices in other Western industrialized countries, with rare exceptions, refused to grant such a right. As Justice Stevens noted in his concurrence in the case, prudential considerations also do not clearly support such a right because the “value to others of a person’s life is far too precious to allow the individual to claim a constitutional entitlement to complete autonomy in making a decision to end that life.” With respect to *Casey’s* definition of liberty, which could be used as a springboard to expand the list of fundamental privacy rights, Chief Justice Rehnquist said of the *Casey* definition of liberty:

> By choosing this language, the Court’s opinion in *Casey* described, in a general way and in light of our prior cases, those personal activities and decisions that this Court has identified as so deeply rooted in our history and traditions, or so fundamental to our concept of constitutionally ordered liberty, that they are protected by the Fourteenth Amendment... That many of the rights and liberties protected by the Due Process Clause sound in personal autonomy does not warrant the sweeping conclusion that any and all important, intimate, and personal decisions are so protected.

Thus, in *Glucksberg*, the other sources of constitutional interpretation – text, context, history, practice, and prudential considerations, as well as the core holdings of precedent which had never supported such a right to physician-assisted suicide – were more weighty than any general reasoning about moral rights based upon the *Casey* precedent’s “heart of liberty” language. Despite this conclusion, the Chief Justice indicated in a footnote in *Glucksberg* that the decision does not foreclose the possibility that dying patients will be granted additional rights. Five Justices in the case noted in concurring opinions that physicians can relieve terminal patients' pain by providing more and more potent drugs, even if the treatment accelerates death, and Justices O'Connor and Breyer suggested that the Court might have to revisit the issue of physician-assisted suicide if a state law exposed dying patients to serious and otherwise unavoidable physical pain. The Court did not directly address the question of whether states have the right to allow physician-assisted suicide. In 1994, Oregon voters approved such an initiative. In view of Chief Justice Rehnquist's comments about debate in a democracy, it would seem the Due Process Clause would not prohibit such a law.

277 521 U.S. at 710-18.
278 *Id.* at 718 n.16, 734-35.
279 *Id.* at 741 (Stevens, J., concurring in the judgment).
280 *Id.* at 727.
281 *Id.* at 735 n.24; *id.* at 736-38 (O'Connor, J., concurring; Justice Ginsburg concurring in the Court's judgments substantially for the reasons stated in this opinion; Justice Breyer joining this opinion except insofar as it joins the opinions of the Court); *id.* at 744-50 (Stevens, J., concurring in the judgment); *id.* at 752-53 (Souter, J., concurring in the judgment); *id.* at 789 (Ginsburg, J., concurring in the judgment); *id.* at 789-92 (Breyer, J., concurring in the judgment).
Consistent with the view that due process would not prevent such a law, in 2006, in *Gonzales v. Oregon*, the Court held that the physician-assisted suicide provisions for terminally ill patients under the Oregon Death With Dignity Act were not preempted by provisions of the federal Controlled Substances Act (CSA). The CSA requires that the drugs actually used for assisted suicide be available only from a written prescription from a registered physician. A November 9, 2001 Interpretive Rule issued by the Attorney General of the United States had concluded that using these controlled substances to assist suicide is not a legitimate medical practice and that dispensing or prescribing them for this purpose is unlawful under the CSA. The Court rejected that interpretation in *Gonzales*, with Chief Justice Roberts, and Justices Scalia and Thomas, dissenting.

A difficult issue of a clash between state interests in protecting life and personal decisions regarding medical care can arise in circumstances in which a pregnant woman refuses to consent to medical treatment beneficial to her fetus. Although the Supreme Court has never addressed this issue, to the extent a woman has a fundamental right to refuse unwarranted medical treatment, this could only be overcome by compelling government interests, which exists, under *Roe* and *Casey*, only after the fetus is viable. In such cases, the Court would then have to balance the compelling interest in protecting life after viability against the necessary exception, in *Carhart* and *Voinovich*, discussed at § 27.3.4.1 nn.249-53, for the woman’s substantial physical or mental health interests.

§ 27.3.4.4 Decisional Privacy and Curfew Statutes

Another privacy issue concerns whether parents, under their fundamental right to child-rearing, discussed at § 27.3.3.1.C, or minors, as part of a fundamental “freedom from bodily restraint,” noted at § 27.2.5.2, can challenge successfully curfew statutes applied to minors. Typically, rational basis is applied, consistent with viewing such statutes as less than substantial burdens on a fundamental right. Occasionally, a court will apply strict scrutiny, or intermediate review, similar to the post-*Roe* cases involving abortion rights for minors, discussed at § 27.3.3.3 n.231, based on the vulnerability of children and their lesser ability to make informed decisions. Curfew statutes burdening adult’s “freedom from bodily restraint” would presumably trigger strict scrutiny.

§ 27.4 Procedural Due Process: Deprivations of Life, Liberty or Property Interests, and Determining What Process is Due

The Due Process Clauses of the Fifth and 14th Amendments indicate that no federal or state action may “deprive a person of life, liberty or property, without due process of law.” Based on this text, three main questions arise in procedural due process cases. The first question is whether a

---

283 See generally Julie B. Murphy, Competing Interests: When a Pregnant Woman Refuses to Consent to Medical Treatment Beneficial to Her Fetus, 35 Suffolk U.L. Rev. 189 (2001).

“deprivation” has occurred as the result of state or federal action, discussed at § 27.4.1. The second question is who counts as a “person” and what “life,” “liberty,” or “property” rights are protected under “due process,” discussed at § 27.4.2. The third question is what “due process of law” requires before the deprivation can be constitutional, discussed at § 27.4.3. A number of specific examples of procedural due process doctrine are discussed at § 27.4.4.

§ 27.4.1 Determining When a Deprivation Has Occurred

Although there was been some wavering with respect to what constitutes a “deprivation” under the Due Process Clause, the standard doctrine is that a deprivation is a loss caused by “state action,” defined at § 21.1.1 nn.1-4, that is intentional, or the product of deliberate indifference, but not merely negligent. It is the execution of a government's policy or custom, whether made by its lawmakers or by those whose edicts or acts may fairly be said to represent official policy, that inflicts the injury for which the government can be made responsible. There is no deprivation, and thus no need for due process, if an adverse impact on a liberty or property interest is merely an indirect result of action the government is otherwise entitled to make.

In 1981, toward the end of the instrumentalist era, the Court held in Parratt v. Taylor that a loss of property, negligently caused by a state official, was a deprivation within the Due Process Clause, but that the state's post-deprivation tort remedy provided all the process that was due. Five years later, in 1986, at the very end of instrumentalist era, the Court held in Daniels v. Williams that the word "deprive" in the Due Process Clause connotes more than a mere negligent act. In a case involving a prisoner injured by falling on a prison stairway due to official negligence in leaving a pillow there, the Court overruled Parratt to the extent that it said a lack of due care by a state official may "deprive" an individual of life, liberty, or property under the 14th Amendment.

Justice Rehnquist gave several reasons for overruling Parratt. First, he noted that historically the guarantee of due process was applied to deliberate decisions of government officials. No case before Parratt had held otherwise. He explained that the Due Process Clause, like the Magna Carta, was intended to secure individuals from the arbitrary power of government to oppress. Lack of due care, however, suggests only a failure to measure up to the standard of a reasonable person. Second, although the Constitution deals with large concerns of governors and governed, it does not purport

---

to supplant traditional tort law in laying down rules of conduct to regulate liability for injuries that attend to living together in society, and that includes lack of due care by prison officials. Justice Rehnquist cited two cases as analogies, i.e., *Estelle v. Gamble*, where it was said that "medical malpractice does not become a constitutional violation merely because the victim is a prisoner," and *Baker v. McCollan*, saying the same about false imprisonment due to state action.

In a companion case to *Daniels*, the Court held in *Davidson v. Cannon* that there was no deprivation when prison officials forgot a prisoner's note that reported a threat from another prisoner, who later assaulted the writer. Justice Brennan, dissenting, said he would find a deprivation if official conduct causing personal injury is due to recklessness or deliberate indifference. Justice Blackmun, dissenting with Justice Marshall, said that governmental negligence is an abuse of power and a deprivation if a state has assumed sole responsibility for physical security and then ignores a call for help. Justice Stevens, concurring, said that "deprivation" identifies victim loss, not actor's mentality, but state tort procedures here were adequate.

Consistent with *Daniels v. Williams* and *Davidson v. Cannon*, a state’s failure to protect an individual not under state custody or supervision against private violence does not constitute a violation of due process. Thus, the Court held in *DeShaney v. Winnebago County Department of Social Services* that there was no due process case against social workers and other local officials who received complaints that a young child was being beaten by his father, and had reason to believe that this was true, but did not act to remove the child from his father's custody. The Court did note in *Deshaney*, however, that “when the State takes a person into its custody and holds him there against his will, the Constitution imposes upon it a corresponding duty to assume some responsibility for his safety and general well-being,” and that where the state itself may have created the dangerous situation, such as placing the child in foster care, “several Courts of Appeals have held . . . that the State may be held liable under the Due Process Clause for failing to protect children in foster homes from mistreatment at the hands of their foster parents.” In practice, the level of protection provided in custody or in foster care is spotty at best, and suits against foster parents directly for mistreatment under 42 U.S.C. § 1983 usually fail as foster parents are not state actors.

---

294 474 U.S. 344, 346-48 (1986); *id.* at 340-43 (Stevens, J., concurring in the judgment); *id.* at 349 (Brennan, J., dissenting); *id.* 349-50 (Blackmun, J., joined by Marshall, J., dissenting).

Even more spotty are rights recognized for state-created dangers outside the custody or foster care context.\textsuperscript{297}

The Court did note in \textit{Deshaney} that by voluntarily undertaking to protect the child against a danger it played no part in creating, the state may have acquired a duty under state tort law to provide him with adequate protection against that danger. In any event, a state could create such a system by changing state tort law. The Court concluded, however, that a state “should not have it thrust upon them by this Court’s expansion of the Due Process Clause of the Fourteenth Amendment.”\textsuperscript{298}

Under current doctrine, proof of intent to harm or deliberate indifference to harm will count as a deprivation of due process. However, as held in \textit{County of Sacramento v. Lewis},\textsuperscript{299} the deliberate indifference standard is employed only when actual deliberation is practical. Questions can thus arise as to whether the government official faced an emergency situation precluding the ability to deliberate, since only the intent-to-harm standard applies “in rapidly evolving, fluid, and dangerous situations which preclude the luxury of calm and reflective deliberation.”\textsuperscript{300} Regarding when such a situation may arise, a lower federal court held that the issue may turn on whether the actors subjectively believed they were responding to an emergency,\textsuperscript{301} although an objective reasonable actor standard would be more consistent with governmental immunity law, noted at § 20.1.4.2.B.

Where the injured person is a prisoner, a deliberate indifference claim may also be made under the Eighth Amendment. To show a violation of the Eighth Amendment, the prisoner must “produce sufficient evidence of (1) a substantial risk of serious harm; (2) the defendant’s deliberate indifference to that risk; and (3) causation.”\textsuperscript{302} Liability under this standard is not limited to injury caused by blows. It also may occur if prison officials are deliberately indifferent to a prisoner’s

medical needs.\footnote{303} The protections of the Eighth Amendment do not apply to pre-trial detainees, but the Due Process Clause of the Fourteenth Amendment does provide them with a right to adequate medical treatment that is analogous to a prisoner’s rights under the Eighth Amendment.\footnote{304}

\section*{§ 27.4.2 Determining Life, Liberty, or Property Interests of Persons}

Four different issues are involved in determining life, liberty, and property interests of persons under the Due Process Clauses of the Fifth and 14th Amendments. The first issue is who counts as a “person” for purposes of due process analysis, discussed at § 27.4.2.1. The second issue is how to define “life,” discussed at § 27.4.2.2. The third issue is how to define “liberty,” discussed at § 27.4.2.3. The fourth issue is how to define “property,” discussed at § 27.4.2.4.

\subsection*{§ 27.4.2.1 Defining Persons under Due Process Analysis}

As with the term “person” in the Equal Protection Clause of the 14th Amendment, discussed at § 26.1 n.7, the explicit text of the Due Process Clauses of the Fifth and 14th Amendments apply to “any person.” Thus, due process protections are not limited to “citizens,” and aliens are protected by the clause. During the formalist era, corporations, as well as partnerships or individual proprietorships, were held to be “persons” entitled to due process of law.\footnote{305} As noted at § 30.3.4.2 n.273, in one corporate campaign finance case Justice Rehnquist took the view that even though corporations have due process rights regarding property, the liberty part of due process should be limited to natural persons. That view has not been adopted by any other Justice in modern times, although such a distinction has some support from history and early legislative and executive practice, and does reflect an aside made, as Justice Rehnquist noted, in an old 1906 case.\footnote{306}

In \textit{Roe v. Wade}, the Court concluded that the term “person” in the 14th Amendment refers only to postnatal individuals, \textit{i.e.}, only after birth. The Court noted:

\begin{quote}
The Constitution does not define “person” in so many words. Section 1 of the Fourteenth Amendment contains three references to “person.” The first, in defining “citizens,” speaks of “persons born or naturalized in the United States.” The word also appears both in the Due Process Clause and in the Equal Protection Clause. “Person” is used in other places in the
\end{quote}

\footnote{303} Toguchi v. Chung, 391 F.3d 1051 (9th Cir. 2004).

\footnote{304} City of Revere v. Mass. Gen. Hospital, 463 U.S. 239, 244 (1983); Gray v. City of Detroit, 399 F.3d 612 (6th Cir. 2005).

\footnote{305} \textit{See, e.g.}, Smyth v. Ames, 169 U.S. 466, 522 (1898); Gulf, Colorado & Santa Fe R. Co. v. Ellis, 165 U.S. 150, 154 (1897), and cases cited therein.

Constitution: in the listing of qualifications for Representatives and Senators, Art, I, § 2, cl. 2, and § 3, cl. 3; in the Apportionment Clause, Art. I, § 2, cl. 3; in the Migration and Importation provision, Art. I, § 9, cl. 1; in the Emolument Clause, Art. I, § 9, cl. 8; in the Electors provisions, Art. II, § 1, cl. 2, and the superseded cl. 3; in the provision outlining qualifications for the office of President, Art. II, § 1, cl. 5; in the Extradition provisions, Art. IV, § 2, cl. 2, and the superseded Fugitive Slave Clause 3; and in the Fifth, Twelfth, and Twenty-second Amendments, as well as in §§ 2 and 3 of the Fourteenth Amendment. But in nearly all these instances, the use of the word is such that it has application only postnatally. None indicates, with any assurance, that it has any possible prenatal application.

All this, together with our observation that throughout the major portion of the 19th century prevailing legal abortion practices were far freer than they are today, persuades us that the word “person,” as used in the Fourteenth Amendment, does not include the unborn. This is in accord with the results reached in those few cases where the issue has been squarely presented.307

Separate from this analysis under the 14th Amendment, as of 2006, about 20 states have laws that criminalize killing unborn human fetuses from conception onwards, with exceptions carved out for abortions, and seven other states have laws that criminalize killing unborn humans fetuses some time after conception, but before viability. As long as these provisions do not conflict with the right to abortion identified in Roe and Casey, or any other federal constitutional or statutory provision, these laws are constitutional, as states can grant greater rights than existing under federal law.308

§ 27.4.2.2 Life Interests Under Due Process Analysis

Under procedural due process analysis, deprivations of “life” occur in capital murder cases when the government imposes the death penalty on convicted felons. As noted at § 23.2.1.4, the Court has developed a specialized body of law dealing with what procedures are required in death penalty cases, often as a matter of the Eighth Amendment’s ban on “cruel and unusual punishment.” Even more rigidly, the Court has held that claims against the police for impermissible use of deadly force in the context of making an arrest, investigatory stop, or other “seizure” of his person cannot be brought under the Due Process Clause, but must be brought under the Fourth Amendment as impermissible seizures.309 For example, in Tennessee v. Garner,310 the Court held that apprehension by use of deadly force is a seizure subject to the Fourth Amendment’s reasonableness requirement, and that deadly force may not be used unless it is necessary to prevent the escape and the officer has probable cause to believe that the suspect poses a significant threat of death or serious physical injury to the officer or others.

310 471 U.S. 1, 9-12 (1985).
§ 27.4.2.3  Liberty Interests Under Due Process Analysis

Constitutionally protected “liberty” interests include those “fundamental” aspects of the Bill of Rights incorporated into the 14th Amendment Due Process Clause, summarized at §§ 27.2.4-27.2.5.1; the “freedom from bodily restraint” and “shock the conscience” rights, discussed at § 27.2.5.2; and those unenumerated fundamental rights “implicit in the concept of ordered liberty,” discussed at §§ 26.5 & 27.3.3. This includes the rights, as stated in Meyer v. Nebraska, discussed at § 27.3.2 nn.140-41, to “engage in any of the common occupations of life, to acquire useful knowledge, to marry, establish a home and bring up children, to worship God according to the dictates of his own conscience, and generally to enjoy those privileges long recognized at common law as essential to the orderly pursuit of happiness by free men.”

The Court has also stated that individuals have a liberty interest in their own reputation not being stigmatized by the government. This is particularly true where such stigmatization might interfere with the individual’s ability to get a job, and thus interfere with the liberty interest in engaging in the common occupations of life. In 1972, in Board of Regents v. Roth,311 the Court considered whether the refusal to rehire an employee on a one-year probationary contract resulted in an improper stigmatization. Since the employee had no expectation of employment, no stigmatization was found. Under this doctrine, something more than mere defamation is required, since defamation is a state common-law tort action, not a constitutional due process concern. Instead, what is required is: (1) the utterance of a statement sufficiently derogatory to injury the individual’s reputation, that is capable of being proved false, and (2) a state-imposed burden or state-imposed alteration of the plaintiff’s status or rights.312 Where such a deprivation can be proven, the individual would have a procedural due process complaint, which would trigger an action under 42 U.S.C. § 1983 for government deprivation of a constitutional right.

In 1976, in Paul v. Davis,313 the Court held that government action that stigmatizes an individual, but which is unconnected to other liberty interests, such as engaging in the common occupations of life, does not trigger a due process analysis. In Davis, the government circulated a flyer stating that a person was a “known shoplifter,” after the person had been arrested, but not convicted of that crime. The charge was subsequently dismissed. The Court’s decision in Paul v. Davis has been subject to much academic criticism, both for being inconsistent with existing precedent when the case was decided regarding a liberty interest in reputation, and on policy grounds, but it remains the law today.314

311 408 U.S. 564, 572-75 (1972).

312 See Sadallah v. City of Utica, 383 F.3d 34, 38 (2nd Cir. 2004).

Protected liberty interests also arise from certain expectations of freedom, e.g., freedom from unjustified intrusions on personal security. For example, as noted at § 27.4.1 nn.295-97, where a person had been deprived of liberty by being placed in jail, a mental institution, or foster care, due process rights attach to a certain level of safety and security. In contrast, in Collins v. City of Harker Heights, the Court held that the Due Process Clause does not create a right that the government must provide its workers with a safe working environment. The Court noted that the "Clause is phrased as a limitation on the State's power to act, not as a guarantee of certain minimal levels of safety and security." In United States v. Howard, the Ninth Circuit held that pretrial detainees have a liberty interest in not being automatically "shackled" during court appearances, but that the government had shown its policy of requiring leg shackles for an initial court appearance before a magistrate was "reasonably related" to "legitimate" interests in security in the courtroom and budgetary considerations in not having to make individualized assessments of dangerousness. The court noted that to “shackle” an accused before a jury requires satisfying the strict scrutiny standard of a “compelling interest” in security and “no less restrictive alternatives” are available.

In terms of constitutional liberty interests enjoyed by prisoners, inmates have a due process right to be free from restraints which extend the sentence in an unexpected manner as by transfer to a mental hospital or the involuntary administration of psychotropic drugs. Based on the liberal instrumentalist predisposition to protect the unempowered in society, the instrumentalist Court held in 1974 in Wolff v. McDonnell that a liberty interest was also created by a statute which mandated sentence reductions for good behavior. The Court said that to deprive a prisoner of this interest, without a hearing, would be to interfere with a right of “real substance.” In contrast, in Meachum v. Fano, a prisoner’s transfer to a maximum security facility was held to be within the normal range of custody which the conviction authorized the state to impose, and so no protected liberty interest was implicated. Dictum in that case mentioned that the state action, according to state law, was discretionary rather than mandatory. The Court built on this idea in 1983 in Hewitt v. Helms, where the Court expanded prisoner protections by holding that a liberty interest is created whenever prison guidelines contain mandatory language, without regard to the “real substance” test. Where this was so, prisoners are entitled to notice and a hearing on whether the guidelines have been met.

---

316 463 F.3d 999, 1005-07 (9th Cir. 2006), citing Bell v. Wolfish, 441 U.S. 520, 539 (1979) (reasonable relation standard); Jones v. Meyer, 899 F.2d 883, 884-85 (9th Cir. 1990) (strict scrutiny).
The Court has withdrawn somewhat from prison oversight during the post-instrumentalist era. In 1995, in *Sandin v. Conner*, a 5-4 Court drew back from both *Hewitt* and *Wolff*. Chief Justice Rehnquist explained that *Hewitt* had created disincentives for states to codify prison management procedures and had involved federal courts in the day-to-day management of federal prisons, and that *Wolff* involved the Court in determining what rights the Court thought were of “real substance.” Henceforth, he wrote, the Court will not recognize as creating a liberty interest those prison regulations which (1) do not exceed the sentence in such an unexpected manner as to give rise to protection by the Due Process Clause of its own force, and (2) do not impose atypical and significant hardship on the inmate in relation to the ordinary incidents of prison life. The Chief Justice, writing for himself and for Justices Kennedy, O'Connor, Scalia and Thomas, held that a 30-day disciplinary confinement of a person doing 30 years to life, under conditions not much different than administrative segregation or protective custody, was not such a deprivation as to invoke the guarantees of the Due Process Clause. Nor was there a liberty interest in freedom from intrastate prison transfers, or transfers to less amenable quarters for non-punitive reasons. In 2005, in *Wilkinson v. Austin*, a unanimous Court held that prisoners do have a liberty interest in avoiding placement in highly restrictive maximum security facilities, known as “supermax” placements, because such placements do impose an “atypical and significant hardship” under any plausible definition of that phrase.

Dissenting in *Sandin*, Justice Ginsburg, joined by Justice Stevens, said that the prisoner in that case should have been viewed as having a liberty interest because the punishment effected a severe alteration in the conditions of his incarceration. Justice Breyer, dissenting with Justice Souter, agreed that the prisoner’s punishment was a fairly major change in conditions. In addition, the state had created a liberty interest because its disciplinary rules severely cabined the authority of prison officials. Justice Breyer said the Court should not abandon the mandatory language rule because it helps the Court determine what restrictions are most likely to call for constitutional protection.

§ 27.4.2.4 Property Interests Under Due Process Analysis

Constitutionally protected property interests are not created by the Constitution or individual expectations but, rather, by rules or understandings stemming from state or federal law. Such interests can arise from federal or state statutory or constitutional provisions, or as a matter of state common law property rights. If state law creates a property interest, e.g., provides that an employee may be dismissed only for cause, the minimum procedural safeguards for the deprivation are then fixed by the Court. For this to apply, of course, the employee must have a property interest. If

325 Board of Regents of State Colleges v. Roth, 408 U.S. 564, 576-78 (1972).

the employment is at-will, no property right would be created. 327

During the formalist and Holmesian eras, the Court allowed states and the federal government to deprive persons of important interests, such as occupational licenses, “upon the conditions it imposes” under the government’s “substantially plenary power,” if the interest were classified as a "privilege" rather than a "right." 328 A substantial transformation occurred in the instrumentalist era. In Goldberg v. Kelly, 329 decided in 1970, the Court held that before a state may terminate welfare payments under the Aid to Families with Dependent Children program it must provide a pre-termination hearing. Justice Brennan explained that welfare recipients have a property interest in continuing to receive payments and a hearing would help prevent unfair or mistaken deprivations of the property interest that welfare recipients had in continuing to receive payments. He drew on the factual perspective of Charles Reich’s article on "The New Property," published in the Yale Law Journal. 330 Reich argued that government has emerged as a major source of wealth, and that it pours forth money, benefits, services, contracts, franchises, and licenses on a vast, imperial scale. Thus, an entitlement to government benefits is today an important interest, a new form of property.

A year after Goldberg v. Kelly was decided, the Court another big step in Bell v. Burson. 331 There Justice Brennan wrote for the Court that a state could not suspend the license of an uninsured motorist who failed to post security after an accident unless the motorist was first provided with notice and a hearing. Justice Brennan said the suspension involved state action which adjudicated an "important interest" of the licensee. He said that constitutional results no longer depend on the distinction between "rights" and "privileges."

The movement begun in Goldberg and Bell toward requiring a hearing when the government terminates or does not renew something important to an individual reached a limit in Board of Regents v. Roth. 332 In Roth, a college teacher claimed to have a property interest in his job with a state college. He had been employed for a year, but not re-employed. No liberty interests were created by the Constitution or by state law because the employee, not having been charged with anything and with no stigma having been imposed, was as free as before to seek new employment. Regarding possible property interests, the Court conceded that persons may develop a legitimate claim of entitlement to a specific benefit on which they rely in their daily lives. However, property interests are not created by the Constitution itself or by individual expectations. Instead, "property" is created by existing rules or understandings which stem from an independent source such as state law. Here, where a teacher was hired for one year only, and neither the terms of the contract nor any

common law of re-employment secured an interest in re-employment for the following year, the teacher had no property interest sufficient to require the state university to hold a hearing before declining to renew the teacher's contract.

In a variation of Roth facts, a teacher in Perry v. Sindermann\(^{333}\) was held entitled to notice of reasons for not being re-hired if he could show that there was an unwritten "common law" practice at a university that certain employees, including himself, who had been employed for four successive years under a series of one-year contracts, should have the equivalent of tenure. While the Court agreed in Perry that this employee did have a property interest based on an implied contractual right, courts have been reluctant to find such implied rights in many cases, although a few cases have been found based on mutual understandings, oral contracts, or a right to avoid being stigmatized by a premature firing.\(^{334}\)

Regarding other kinds of government action, the Court held in Town of Castle Rock, Colorado v. Gonzales\(^{335}\) that an individual has no property interest in having the police enforce a restraining order obtained from a state court, even on the relatively extreme facts of a domestic violence restraining order against a husband who had taken his three daughters in violation of the order. The husband subsequently murdered them. The Court said that a Colorado statute calling on police officers to use every reasonable means to enforce a restraining order was not intended either to make enforcement mandatory or to give an individual an enforceable property right under the Due Process Clause to sue if it is not properly enforced. Concurring, Justice Souter, joined by Justice Breyer, noted that property interests arise from substantive rights, and the Court had never recognized a property right in procedural obligations imposed on state officials to protection.

Dissenting, Justice Stevens, joined by Justice Ginsburg, said the Court should have deferred to the decision on the Court of Appeals that the state law had created a property interest, or, in any event, certify that question to the Colorado Supreme Court. If the Court were to make the decision, the dissent would have held a property right was created, based on a reading that Colorado statutes, like many recent statutes in states, made arrest mandatory in the domestic violence context.\(^{336}\)

In the context of tort litigation, an issue has arisen whether the individual’s “property” interest in the litigation gives rise to due process rights that would limit the ability of states through tort reform statutes to place limits on tort actions, such as capping recovery for pain and suffering or punitive damages awards. While such due process arguments have usually failed under the United States Constitution, “open courts” or “right to remedy” or “right to jury trial” provisions in a number of state Constitutions have been used to place limits on such statutory enactments, consistent with the

natural law principle that “where there is a right, there should be a remedy.”

§ 27.4.3 Determining What Process is Due

§ 27.4.3.1 Void for Vagueness Challenges

As the Supreme Court noted in Grayned v. City of Rockford, it is a basic principle of due process that an enactment is void for vagueness if its prohibitions are not clearly defined. The Court has explained the reason behind this doctrine as follows:

Vague laws offend several important values. First, because we assume that man is free to steer between lawful and unlawful conduct, we insist that laws give the person of ordinary intelligence a reasonable opportunity to know what is prohibited, so that he may act accordingly. Vague laws may trap the innocent by not providing fair warning. Second, if arbitrary and discriminatory enforcement is to be prevented, laws must provide explicit standards for those who apply them. A vague law impermissibly delegates basic policy matters to policemen, judges, and juries for resolution on an ad hoc and subjective basis, with the attendant dangers of arbitrary and discriminatory application. Third, but related, where a vague statute “abut[s] upon sensitive areas of basic First Amendment freedoms,” it “operates to inhibit the exercise of [those] freedoms.” Uncertain meanings inevitably lead citizens to “steer far wider of the unlawful zone” than if the boundaries of the forbidden areas were clearly marked.

As this quote indicates, the Court has a special concern for vagueness in the context of First Amendment cases, particularly those involving freedom of speech. Vagueness in that context is discussed at § 29.6.1.4. In other areas, while the formalist-era Court struck down some economic regulations as unconstitutionally vague, and the instrumentalist Warren Court struck down a few criminal statutes as unconstitutionally vague, the Holmesian-era and modern natural law era

339 Id. at 108-09 (citations omitted).

Courts have been relatively tolerant of the difficulties of legislative drafting, and rarely have held statutes unconstitutionally vague outside the First Amendment context. The major exception to this deference has involved statutes making “loitering” a crime, which were held unconstitutionally vague in both the Holmesian and modern natural law eras.342

§ 27.4.3.2  The Mathews v. Eldridge Test

Once a deprivation of the life, liberty, or property interest is established, deciding what procedures are required by due process depends on weighing the competing interests involved. As stated in the foundational case of Mathews v. Eldridge, this involves balancing:

(a) the private interest that will be affected;
(b) the risk of an erroneous deprivation through present procedures and the probable value, if any, of additional or substitute procedures; and
(c) the government’s interest, including the function involved and the fiscal or administrative burdens that the additional or substitute procedures would entail.343

As noted at §§ 4.2.2 nn.28-30 & 7.2.1 nn. 21-23, the Mathews test is a classic example of second-order rational review factor balancing, which weighs the government’s legitimate interests in accurate decisionmaking and fiscal and other administrative cost savings, against the risk of erroneous decisionmaking through any particular procedural means, and the individual’s interest in not being improperly burdened to determine if any set of procedures represent an unreasonable accommodation of these interests. Consistent with the second-order rational review approach to deference, noted at § 21.2.4.3 nn.110-12, the challenger has the burden to overcome deference to “good-faith judgments” of the government that “the procedures they have provided assure fair consideration” in order to establish that the government’s procedures violate due process.344

---

342  Lanzetta v. New Jersey, 306 U.S. 451 (1939) (statute punished persons “known to be a member of any gang consisting of two or more persons”; the statute was struck down on vagueness grounds); City of Chicago v. Morales, 527 U.S. 41 (1999) (statute provided “[w]henever a police officer observes a person whom he reasonably believes to be a criminal street gang member loitering in any public place with one or more other persons, he shall order all such persons to disperse and remove themselves from the area”; held unconstitutionally vague (1) in failing to provide fair notice of prohibited conduct; and (2) in failing to establish minimal guidelines for enforcement).

344  Id. at 348-49.
In applying this test, the Court has indicated that due process usually requires an opportunity for notice and some kind of hearing before the deprivation. However, the government can act without advance procedures if it is not practicable to provide a pre-deprivation hearing, as in the case of a tort,345 or there is no likelihood of serious loss and informal procedures are sufficiently reliable to minimize the risk of error.346 State tort remedies usually are adequate post-deprivation procedures for deprivations resulting from intentional torts.347 But those remedies are not sufficient for losses caused by state policy,348 such as not using involuntary confinement procedures before confining a mentally ill person who manifests consent, where the government did not take any steps to ascertain whether the individual was mentally competent to sign the admission forms.349

In making the determination of what procedures are required to satisfy due process, formalist judges, focused on traditional practices, and Holmesian judges, focused on deference to government, will typically be satisfied with fewer procedural requirements, while liberal instrumentalists will often only be satisfied with more procedural requirements. The main issues of contention involve whether the individual gets: (1) a pre-termination hearing, or only a post-termination hearing; (2) an oral hearing, or submission of written documents only; (3) the right to cross-examine witnesses, or only the right to tell one's own story; (4) a formal hearing record prepared, or only an informal record; (5) the right to court-appointed counsel if indigent (usually not granted), or only the right to have counsel present (usually granted); and (6) the standard of proof required to support the deprivation (preponderance of the evidence, clear and convincing evidence, or beyond a reasonable doubt).

With respect to the need for a pre-deprivation hearing, a 5-4 Court decided in United States v. James Daniel Good Real Property350 that unless exigent circumstances are present the Constitution requires the government to afford notice and a meaningful opportunity to be heard before seizing real property subject to civil forfeiture. Justice Kennedy wrote for himself and Justices Blackmun, Stevens, Souter, and Ginsburg, that in the case of a yacht the government could seize the property first and give the owner a hearing later, since the property at issue could sail away. However, in the usual case of a house, apartment building, or business, prosecutors have no such worry, said

350 510 U.S. 43, 52-61 (1993); id. at 72 (Rehnquist, C.J., joined by Scalia, J., and O'Connor, J., as to Parts II and III, concurring in part and dissenting in part); id. at 80-85 (Thomas, J., concurring in part and dissenting in part).
Kennedy. Chief Justice Rehnquist dissented on this point, as did Justices O'Connor, Scalia, and Thomas. In his dissent, Rehnquist said that pre-hearing real property seizure had served important government purposes in combating illegal drugs, because the seized property had often been used to facilitate the commission of a drug crime, and that giving the owners prior notice and a hearing before seizure could permit the properties to be “damaged or destroyed to prevent them from falling into the hands of the Government.” In his dissent, Justice Thomas noted that while protecting property rights of “innocent owners” is certainly a laudable goal, in this “as applied” challenge by this drug dealer, prior precedents did not give this owner the right to a pre-deprivation hearing.

The Mathews v. Eldridge balancing test is constitutionally required. Thus, although the government has great latitude in determining whether to create a property interest, once the interest is created the Court will determine whether the procedures employed for its deprivation are constitutionally sufficient. Originally, Justice Rehnquist argued for a different approach. Writing a plurality opinion in Arnett v. Kennedy, decided in 1974, Justice Rehnquist said that when an employment contract for a government job appears to grant a protected job status (e.g., discharge only for "cause"), but also provides procedures for discharge, only those procedures need be used since the employee "takes the bitter with the sweet." However, six Justices joined in opinions that suggested that the Constitution determines the process needed to deprive the employee of such a job.

Even if the Constitution determines the ultimately required procedures, Justice Stevens observed in Bishop v. Wood that the "federal court is not the appropriate forum in which to review the multitude of personnel decisions that are made daily by public agencies . . . In the absence of any claim that the public employer was motivated by a desire to curtail or to penalize the exercise of an employee's constitutionally protected rights, we must presume that official action was regular and, if erroneous, can best be corrected in other ways." In Bishop, a police officer had been hired as a "permanent employee" but under the city ordinance, as interpreted by the lower courts, to which the Court gave deference, the employee's removal was conditioned on compliance with certain procedures and he was essentially employed "at will."

Justice Brennan, dissenting with Justice Marshall, said in Bishop that being discharged for "conduct unsuited to an officer" would harm the ex-employee's job prospects, and the Court's inquiry should be whether it was objectively reasonable for the employee to believe he could rely on continued employment. Justice White, dissenting, with Justices Brennan, Marshall, and Blackmun, said that since the ordinance granted a right to the job unless there were grounds to fire, it was wrong to cut back on that assurance by alluding to associated procedures, because the Constitution determines the process to be applied in connection with any state decision to deprive an employee of a job.

---

351 416 U.S. 134, 135 (1974) (plurality opinion Rehnquist, J., joined by Burger, C.J., and Stewart, J.); id. at 166-67 (Powell, J., joined by Blackmun, J., concurring in part and dissenting in part); id. at 177-78 (White, J., concurring in part and dissenting in part); id. at 210-11 (Marshall, J., joined by Douglas & Brennan, JJ., dissenting).

353 Id. at 350-53 (Brennan, J., joined by Marshall, J., dissenting); id. at 355-61 (White, J., joined by Brennan, Marshall & Blackmun, J.J., dissenting).
In *Codd v. Velger*, Justice Stevens, dissenting, explained that the *Bishop* opinion did not depart from the majority view in *Arnett* because *Bishop* was based on a conclusion that under the state law plaintiff could be discharged at will, and "a hearing would have been pointless because nothing plaintiff could prove would entitle him to keep his job."

The view that Justice White expressed in *Bishop* clearly prevailed in 1985, when the Court decided *Cleveland Board of Education v. Loudermill*. In that case a state was required to provide at least an informal pre-deprivation opportunity for an employee to learn about and answer charges before being removed from a civil service position. Justice White wrote for the Court that the categories of substance and procedure are distinct. If a property interest in public employment is conferred by the legislature, the state may not authorize the deprivation of that interest without appropriate procedural safeguards. Justice Rehnquist, dissenting, said that the Court had ignored its duty under *Roth* to rely on state law as the source of property interests, because the state law only granted the property right subject to certain procedural limitations. But this view did not prevail. As Justice White noted, the Court has rejected a "‘bitter with the sweet’ approach. . . . Were the rule otherwise, the Clause would be reduced to a mere tautology. ‘Property’ cannot be defined by the procedures provided for its deprivation any more than can life or liberty."

§ 27.4.4 Case Examples of Procedural Due Process Analysis

As the Court noted in *Zinermon v. Burch*, under the *Mathews v. Eldridge* balancing text, discussed at § 27.4.3.2 nn.343-49, due process “is a flexible concept that varies with the particular situation.” For deprivations of liberty interests done through the criminal justice system, a whole range of procedural protections apply, from Fourth Amendment search and seizure protections, discussed at § 23.2.1.1; to Fifth Amendment due process, double jeopardy, and privilege against self-incrimination protections, discussed at § 23.2.1.2; to the Sixth Amendment right to a fair trial, to confront witnesses, and to have the assistance of counsel, including a right to counsel for indigent defendants in any felony case or misdemeanor case in which incarceration is imposed, discussed at § 23.2.1.3; to the Eighth Amendment ban on excessive bail, excessive fines, and cruel and unusual punishment, discussed at § 23.2.1.4. Prisoners also have protected liberty interests during incarceration, as discussed at § 27.4.2.3 nn.315-24, as well as rights of access to courts, discussed at § 26.5.2 nn.502-06 & 513, and rights to vote, discussed at § 26.5.3 nn.522-24.

For serious liberty deprivations outside the context of the criminal justice system, such as for involuntary commitment to a mental hospital, discussed at § 27.4.4.1, or termination of parental rights, discussed at § 27.4.4.2, courts tend to require a number of procedural protections, although not as many as in the criminal justice context. For serious property deprivations, as in some government entitlement cases, discussed at § 27.4.4.3, less procedures may be required than in the context of serious liberty deprivations, but more procedures are required than for other kinds of property deprivations. Less procedures tend to be required for deprivations of property in standard

---

355 470 U.S. 532, 540-43 (1985); *id.* at 561-63 (Rehnquist, J., dissenting).

workplace cases, discussed at § 27.4.4.4; license termination or utility service termination cases, discussed at § 27.4.4.5; or creditor-debtor cases, discussed at § 27.4.4.6. Even fewer procedures tend to be required when dealing with the due process rights of children at school, discussed at § 27.4.4.7, or for “enemy combatants” or other persons detained during military action, the “war on terrorism,” or as part of immigration enforcement, discussed at § 27.4.4.8. Minimal due process arguments apply to government delegation of public functions to private parties, discussed at § 27.4.4.9, or the government adopting rules drafted by private parties, discussed at § 27.4.4.10.

As noted at § 27.4.3.2 text following n.349, six main issues arise in procedural due process cases. For more serious liberty or property deprivations, the key issues involved in the due process cases tend to be the standard of proof required to support the deprivation (preponderance of the evidence, clear and convincing evidence, or beyond a reasonable doubt), and whether there exists a right to court-appointed counsel if indigent, or only the right to have counsel present. In these cases, pre-deprivations hearings are almost always required, and a formal record is kept. For somewhat less serious deprivations, there may be an issue whether a pre-termination hearing is required, or is a post-termination hearing sufficient, and an issue whether a formal record is required, or only an informal record must be kept. For even less serious deprivations, there will be an issue whether an oral hearing is required, or can submission be by written documents only, and whether there is a right to cross-examine witnesses, or only the right to tell one's own story. Each of these procedural requirements are discussed in the case examples which follow.

§ 27.4.4.1 Mental Hospital Commitment Cases

In *Addington v. Texas*, 357 a unanimous Court held that the involuntary commitment of an adult to a mental hospital requires “clear and convincing evidence” that the person is dangerous to himself/herself or to others. The Court noted that the high value placed on the liberty interest required the state to meet more than a mere “preponderance of the evidence” standard, but that since the case did not raise criminal concerns, the “beyond a reasonable doubt” standard, constitutionally required in criminal trials under *In re Winship*, discussed at § 27.2.5.2 n.131, did not apply to involuntary commitment proceedings.

In *Parham v. J.R.*, 358 the Court held that prior to a child being committed to a mental hospital, a neutral fact-finder, such as a staff physician, must evaluate the child's condition to determine whether a treatable mental illness exists. Only a preponderance of the evidence standard was used, and no hearing was required, in part because the issues to be determined are “medical in character,” and “we do not accept the notion that the shortcomings of specialists can always be avoided by shifting the decision from a trained specialist using the traditional tools of medical science to an untrained judge or administrative hearing officer after a judicial-type hearing.” In addition, the Court noted that “requiring a formalized, factfinding hearing” poses a risk of “significant intrusion into the parent-child relationship” by employing “an adversary contest to ascertain whether the

358 442 U.S. 584, 606-16 (1979); id. at 625-33 (Brennan, J., joined by Marshall & Stevens, JJ., concurring in part and dissenting in part).
parents' motivation is consistent with the child's interests” and possibly “exacerbat[ing] whatever tensions already exist between the child and the parents [creating] a serious risk that an adversary confrontation will adversely affect the ability of the parents to assist the child while in the hospital [and] make [the] subsequent return home more difficult.” The Court did require that the child must be interviewed and the investigation must make use of all available sources to probe the child's background. However, absent a finding of abuse or neglect, the presumption exists that the parents are acting in the best interests of the child. In dissent, instrumentalist Justices Brennan, Marshall, and Stevens would have required a pre-confinement hearing for juvenile wards of the state, a post-confinement hearing for commitments by parents of their child, and would not apply the presumption that parents are acting in the best interests of the child when recommending institutionalization.

§ 27.4.4.2 Parental Rights Termination Cases

In *Lassiter v. Department of Social Services*, a majority of the Court concluded that there was no automatic right to have counsel provided to indigent parents seeking to contest parental termination proceedings. The Court noted that an absolute right to counsel has only been recognized to exist where the litigant may lose his physical liberty if he loses the litigation, as discussed at § 23.2.1.3.C nn.187-95. Given the importance of parental rights, however, the Court indicated that whether a right to counsel exists should be determined on a case-by-case basis. Where the case is complicated, such as involving expert medical and psychiatric testimony, which few parents are equipped to understand and fewer still to confute, or the parents have little education, an uncommon difficulty in dealing with life, and who are, at the hearing, thrust into a distressing and disorienting situation, appointed counsel may well be required for such indigent parties. The Court also noted that a clear majority of states by statute provide for counsel for indigent parents in all parental termination cases. An instrumentalist dissent of Justice Blackmun, joined by Justices Brennan and Marshall, concluded that counsel should be provided in every case of parental termination under the Due Process Clause.

In *Santosky v. Kramer*, the Court concluded that termination of parental rights requires “clear and convincing evidence,” a standard consistent with the statutes in a majority of states at the time. The Court noted that like “civil commitment hearings, termination proceedings often require the factfinder to evaluate medical and psychiatric testimony, and to decide issues difficult to prove to a level of absolute certainty,” and that, as in *Addington*, an “elevated standard of proof in a parental rights termination proceeding would alleviate ‘the possible risk that a factfinder might decide to [deprive] an individual based solely on a few isolated instances of unusual conduct [or] . . . idiosyncratic behavior.’” A formalist and Holmesian dissent said that the existing “preponderance of the evidence” standard was sufficient to satisfy due process, and that the Court should be reluctant

---

360 455 U.S. 745, 764, 769-70 (1982) (citation omitted); id. at 770-73 (Rehnquist, J., joined by Burger, C.J., and White & O’Connor, JJ., dissenting). For discussion that Justice O’Connor voted more often with Holmesian Justices Rehnquist and White during her first few years on the Court, between 1981-84, before finding her natural law voice later, see § 12.4.2. n.191.
to impose federal due process standards on a matter of traditional state control. In part, the dissent viewed the case as a less serious deprivation than in Addington regarding involuntary commitment to a mental hospital, where a unanimous Court had required “clear and convincing evidence.”

§ 27.4.4.3 Government Entitlement Cases

In Goldberg v. Kelly, 361 decided in 1970, the Court held that a pre-termination evidentiary hearing was required for termination of Aid to Families with Dependent Children (AFDC) welfare benefits. Such a hearing may not be required for other kinds of governmental benefits programs (e.g., blacklisted government contractor, discharged employee, or taxpayer denied a tax exemption), but was required here because AFDC benefits may be the very means by which the individual lives. Thus, an erroneous decision denying benefits in AFDC cases would constitute a particularly burdensome mistake. Because the issues involved in AFDC termination cases often involve factual matters about whether the individual is eligible for welfare, particularly the issue whether the individual is receiving support from another individual who disappears when the social worker comes for a visit, the Court determined that there needed to be an oral hearing in such cases and the right to cross-examine witnesses, but only an informal record of the hearing need be kept. The welfare recipient must be allowed to retain an attorney if desired, but counsel need not be provided for indigent parties. Formalist Chief Justice Burger and Justice Black, and Holmesian Justice Stewart, dissented from this second-guessing procedures used to terminate AFDC benefits.

In Mathews v. Eldridge, 362 decided in 1976, the Court held that a pre-termination hearing was not required in Social Security Disability cases because the individual interest in disability benefits was not as great as the interest in Goldberg, and the risk of erroneous deprivation was smaller than in Goldberg. The Court noted that disability benefits are not based upon financial need, and thus an individual receiving disability benefit may have other sources of income on which to survive in the event the initial decision to terminate benefits was in error. The risk of making an error in the termination decision was low, since it was based upon medical evidence. Finally, the ultimate cost of a pre-termination hearing would be great. In addition, given the medical nature of the evidence used to support the decision, no oral hearing or right to cross-examine witness was required. The individual merely must be given the opportunity in a post-termination hearing to submit evidence to the individual’s file regarding continued disability. In dissent, instrumentalist Justices Brennan and Marshall concluded that a pre-termination hearing of the kind mandated in Goldberg should be required because in individual cases the financial burden on the individual could be great, as in this case. The issue of a pre-termination or post-termination hearing is often important, since the post-termination hearing often takes place 6 months, a year, or more after the initial termination decision has been made, and only rarely is such a delay itself held to violate due process. 363

---

363 On the problem of delays in social security disability cases, see generally Shu Fan Lee, Note, Administrative Delays Involving Social Security Disability Claims: Heckler v. Day Revisited,
Although the issue is not without debate, the better argument would seem to be that any attempt to condition receipt of welfare benefits on production of specific “proof of citizenship,” through ID cards or otherwise, should be viewed as an aspect of terminating welfare rights, and subject to Mathews analysis, rather than an economic or social regulation regarding receipt of welfare benefits, triggering only minimum rational review under the Due Process Clause, discussed at § 27.1.2.1.

§ 27.4.4.4 Workplace Cases

In Cleveland Board of Education v. Loudermill,\textsuperscript{364} the Court held that a classified civil servant under Ohio law who could be fired only for good cause was entitled to oral or written notice of charges, an explanation of the employer's evidence, and an opportunity to present the employee’s side of the story in an informal pre-termination hearing. The Court noted that the “need for some form of pretermination hearing . . . is evident from a balancing of the competing interests at stake,” particularly “the severity of depriving a person of the means of livelihood.” The Court also observed that the constitutionality of such a limited pre-termination hearing “rests in part on the provisions in Ohio law for a full post-termination hearing.” Instrumentalist Justices Marshall and Brennan would have required in addition the right to confront and cross-examine witness at the pre-termination hearing.

Some 11 years earlier, in Arnett v. Kennedy,\textsuperscript{365} the Court had sustained the validity of procedures by which a federal employee could be dismissed for cause without any pre-termination hearing. They included 30 days' advance written notice of the reasons for the proposed discharge and the materials on which the dismissal was based. The individual was accorded the right to respond to the charges both orally and in writing, including the submission of affidavits, and, upon request, was entitled to appear personally before the official having the authority to make or recommend the final decision. Although a pre-termination evidentiary hearing was not held, the employee could make representations relevant to the case. After removal, the employee received a full evidentiary hearing, and was awarded backpay if reinstated. As Justices Powell and Blackmun noted in their concurring opinion, which provided the crucial fifth votes for the Court's judgment, “These procedures minimize the risk of error in the initial removal decision and provide for compensation for the affected employee should that decision eventually prove wrongful.” Further, as they noted, “Prolonged retention of a disruptive or otherwise unsatisfactory employee can adversely affect discipline and morale in the workplace, foster disharmony, and ultimately impair the efficiency of an office or agency. Moreover, a requirement of a prior evidentiary hearing would impose additional administrative costs, create delay, and deter warranted discharges. Thus, the Government's interest in being able to act expeditiously to remove an unsatisfactory employee is

\textsuperscript{364} 470 U.S. 532, 542-48 (1985); \textit{id.} at 548 (Marshall, J., concurring in part and concurring in the judgment); \textit{id.} at 552-53 (Brennan, J., concurring in part and dissenting in part).

substantial.” In dissent, instrumentalist Justices Douglas, Brennan, and Marshall would have required a full evidentiary hearing to be conducted prior to termination.

§ 27.4.4.5 License Termination or Utility Termination Cases

In *Bell v. Burson*,366 a unanimous Court held that under Georgia's "fault-oriented scheme," to deprive someone of their driver's license requires, at the very least, a prior hearing to make a probable-cause determination as to the “reasonable possibility of a judgment” being rendered against the individual “as a result of the accident.” Similarly, in *In re Ruffalo*,367 the Court held in the case of revocation of a professional license, the government must grant the individual a hearing to determine fitness to be a member of the profession. As stated in *Ruffalo*, a case involving disbarment of any attorney, “Disbarment, designed to protect the public, is a punishment or penalty imposed on the lawyer. [The attorney] is accordingly entitled to procedural due process, which includes fair notice of the charge. . . . [W]hen proceedings for disbarment are ‘not taken for matters occurring in open court, in the presence of the judges, notice should be given to the attorney of the charges made and opportunity afforded [the attorney] for explanation and defence.’”

Terminations of utility service raise similar due process concerns. However, where the potential length or severity of the deprivation does not indicate a likelihood of serious loss, and where the procedures adopted by the utility are sufficiently reliable to minimize the risk of erroneous determination, a prior hearing may not be required. For example, in *Memphis Light, Gas & Water Div. v. Craft*,368 the Court required only notice informing the customer not only of the possibility of termination, but also of a procedure for challenging a disputed bill or other specified avenue of relief for customers who dispute the existence of the grounds for termination.

§ 27.4.4.6 Creditor/Debtor Cases

The Court has considered a sequence of cases dealing with the due process rights of debtors before creditors may engage in various kinds of collection practices, such as garnishment of wages or attachment of property. In these cases, some kind of pre-collection process usually must be afforded, but the nature of that process can be very minimal.

Regarding garnishment of wages, the Court held in *Sniadach v. Family Finance Corp.*369 that garnishment of even part of an individual’s wages was impermissible absent a prior hearing or an emergency situation which justified foregoing the hearing. The Court noted that “a prejudgment garnishment of the Wisconsin type may as a practical matter drive a wage-earning family to the wall.

Where the taking of one's property is so obvious, it needs no extended argument to conclude that absent notice and a prior hearing this prejudgment garnishment procedure violates the fundamental principles of due process.” Similarly, in *North Georgia Finishing, Inc. v. Di-Chem, Inc.*[^370] the Court held that garnishment of an individual’s property by a court clerk without notice or opportunity for an early hearing and without participation by a judge violated due process. However, Justice Powell noted in a concurrence, “In my view, procedural due process would be satisfied where state law requires that the garnishment be preceded by the garnishor's provision of adequate security and by his establishment before a neutral officer of a factual basis of the need to resort to the remedy as a means of preventing removal or dissipation of assets required to satisfy the claim.” Chief Justice Burger, and Justices Rehnquist and Blackmun, dissented from even this limited requirement.

Regarding attaching a debtor’s property to satisfy a debt, the Court held in *Fuentes v. Shevin*[^371] that in a replevin suit between two private parties the initial determination of whether to authorize a writ allowing repossession of property required something more than an *ex parte* proceeding before a court clerk. Chief Justice Burger, and Justices White and Blackmun, dissented, with Justices Powell and Rehnquist not participating in the case. On the other hand, in *Mitchell v. W.T. Grant Co.*,[^372] a Louisiana sequestration statute permitted the seller-creditor holding a vendor's lien to secure a writ of sequestration *ex parte* and, having filed a bond, to cause the sheriff to take possession of the property at issue. The writ, however, was issuable only by a judge upon the filing of an affidavit clearly setting out the facts entitling the creditor to sequestration. The Louisiana law also expressly entitled the debtor to an immediate hearing after seizure and to dissolution of the writ absent proof by the creditor of the grounds on which the writ was issued. Justices Douglas, Brennan, Stewart, and Marshall dissented, and would have required more than an *ex parte* hearing, as in *Fuentes v. Shevin*. In a third case, *Connecticut v. Doehr*,[^373] the Court held that a state statute violated due process when it authorized prejudgment attachment of real estate without prior notice or hearing without a showing of exigent circumstances. The Court noted that in applying the *Mathews* balancing test in these cases, the interests of all three parties – the debtor, the creditor, and the government’s interest in a fair, but effective remedy for creditors – must all be part of the cost-benefit balancing test.

Related issues of due process arise in the context of the Internal Revenue Service using various collection measures regarding individuals’ tax obligations. Under the Internal Revenue Service Restructuring and Reform Act of 1998, taxpayers are granted the right to independent administrative

and judicial review of Internal Revenue Service decisions to levy property or file a notice of a federal tax lien on property.\textsuperscript{374} In addition, sometimes the government seizes property in the context of a criminal investigation. The Court held in \textit{City of West Covina v. Perkins},\textsuperscript{375} that the Due Process Clause requires governmental entities to provide notice that property was seized, but does not require the government to provide specific instructions or advice to owners who seek the return of property that was lawfully seized, but no longer needed for police investigation or criminal prosecution, where such procedures are outlined in published, generally available state statutes and case law.

\textbf{§ 27.4.4.7} \textbf{School Cases} \hfill  \\

Students are entitled to only limited due process rights regarding disciplinary proceedings at public schools. In \textit{Goss v. Lopez},\textsuperscript{376} the majority concluded that prior to a 10-day suspension, a student is entitled to oral or written notice of the charges, an explanation of the evidence against the student, and an opportunity to present the student’s side of the case. The majority noted that the hearing can be very informal, and no delay is needed between notice and the informal hearing. In dissent, Justice Powell, joined by Chief Justice Burger, and Justices Blackmun and Rehnquist, concluded that school suspensions of 10 days or less raised no due process issues requiring a constitutional remedy\textsuperscript{376}.

Reflecting even greater deference to schools, the Court held in \textit{Ingraham v. Wright}\textsuperscript{377} that the availability of a tort action against school personnel who unreasonably inflict paddling on students was all the process due students who were paddled. Paddling has less severe consequences than suspension, where more process is due. In dissent, Justice White, joined by Justices Brennan, Marshall, and Stevens, concluded that the possibility of a tort action alone was not sufficient, and that the student should be allowed to present the student’s side of the story prior to paddling.

Of course, these decisions only apply to public schools, for which the requisite “state action” exists to trigger a due process analysis. For private schools, any rights in disciplinary hearings would have

\textsuperscript{377} 430 U.S. 651, 682-83 (1977); \textit{id.} at 693-700 (White, J., joined by Brennan, Marshall & Stevens, JJ., dissenting).
to be created by state or federal statutory law, or through contract or tort doctrine.\textsuperscript{378}

\section*{§ 27.4.4.8 Rights of Detained Persons}

Cases concerning the due process rights of persons detained outside the regular criminal justice system, such as alleged terrorists captured after 9-11 (September 11, 2001) as part of the “war on terrorism,” enemy combatants held as a result of military action, or aliens detained because of alleged violations of immigration laws, have raised issues confronted only rarely by the Supreme Court. However, certain principles seem reasonably clear. To the extent alleged terrorists, or enemy combatants, were granted rights similar to military personnel in court-martial proceedings under the Uniform Code of Military Justice, due process concerns would easily be met.\textsuperscript{379} Similarly, to the extent alleged terrorists, or enemy combatants, were treated as captured prisoners of war under the Geneva Conventions, due process would be met.\textsuperscript{380}

Regarding persons detained for violations of immigration laws, the Supreme Court has held that resident aliens charged with being deportable from the United States for various offenses may be detained “for the brief period necessary for their removal proceedings” without an individualized determination that the alien poses either a danger to society or a flight risk. In \textit{Demore v Kim},\textsuperscript{381} the Court concluded detention was “reasonable” given a general concern that such aliens who are not detained may continue to engage in crime or fail to appear for their hearings. Regarding longer detentions, the Court held in \textit{Zadvydas v. Davis}\textsuperscript{382} that legal resident aliens likely have a due process right to be free from indefinite detention based on their status as "persons within the United States." Because indefinite detention would raise “serious constitutional concerns,” the “post-removal-period detention” statute was read to contain an implicit “reasonable time” limitation on detentions after 90 days, the application of what constitutes “reasonable time” subject to federal court review.

\textsuperscript{382} 533 U.S. 678, 682-84 (2001).
\end{footnotesize}
With regard to aliens outside the United States seeking admission to the United States, the Court stated in *Shaughnessy v. United States ex rel. Mezei* "It is true that aliens who have once passed through our gates, even illegally, may be expelled only after proceedings conforming to traditional standards of fairness encompassed in due process of law. But an alien on the threshold of initial entry stands on a different footing: ‘Whatever the procedure authorized by Congress is, it is due process as far as an alien denied entry is concerned.’" It has been noted:

While it seems straightforward to distinguish between those who are "within the United States" and those who are outside its borders, the paradoxical "entry fiction" in immigration law permits the U.S. government to treat individuals physically inside the country as though they were "continuously knocking at the gate." Immigrant parolees – noncitizens to whom the Attorney General grants a temporary stay in the United States for humanitarian or public interest reasons – fall within the purview of the entry fiction. Although they are physically and lawfully within the country's territorial boundaries, they are not treated by the law as "within the United States." As such, parolees may not be entitled to the Fifth Amendment due process protections available to all "persons within the United States." Indeed, although the Supreme Court recently held in *Zadvydas v. Davis* that legal permanent residents have a due process right to be free from indefinite detention based on their status as "persons within the United States," it suggested that the right does not extend to those outside the country. Thus, *Zadvydas* implies that the government may continue to strike a "statutory bargain" with potential parolees – conditioning the benefit of physical entry into the United States on the relinquishment of the right to be free from indefinite detention that would otherwise apply once they are inside the country. Deeming parolees noncitizens who still stand outside the border, then, effectively means the government may treat them as arriving aliens with virtually no due process rights.

In 2004, the Supreme Court considered the rights of people detained in connection with the “war on terrorism” in three cases, *Rasul v. Bush*, *Hamdi v. Rumsfeld*, and *Rumsfeld v. Padilla*. Some of these detainees were United States citizens, and some were not. The decisions in these cases were influenced by cases from the Civil War and World War II eras. In *Ex parte Milligan*, *Ex parte Mitsuye Endo*, and *Duncan v. Kahanamoku*, the Court "insisted that military power to detain civilians (or those who claimed to be civilians) within the United States must remain subordinate to the Article III courts and the safeguards of the Bill of Rights." In contrast, in *Ex parte*...
Quirin, the Court held that enemy combatants could constitutionally be tried in military courts. In Johnson v. Eisentrager, the Court denied certain foreign nationals, held outside the United States, the right to petition for habeas corpus in American federal courts.

In Rasul v. Bush, the detainees were foreign nationals seized abroad and held outside United States borders. The petitioners were held at the United States Naval Base in Guantanamo Bay, Cuba, for a seemingly indefinite period. The Court framed the issue as “whether United States courts lack jurisdiction to consider challenges to the legality of the detention of foreign nationals captured abroad in connection with hostilities and incarcerated at the Guantanamo Bay Naval Base, Cuba.” By a 6-3 vote, the Court concluded that the federal courts do have such jurisdiction.

For a 5-Justice majority opinion, Justice Stevens distinguished Johnson v. Eisentrager on the grounds that Eisentrager involved consideration of whether foreign nationals have a constitutional right of habeas corpus, absent a statutory grant of jurisdiction to the federal courts. Justice Stevens then noted, “Because subsequent decisions of this Court have filled the statutory gap that had occasioned Eisentrager’s resort to ‘fundamentals,’ persons detained outside the territorial jurisdiction of any federal district court no longer need rely on the Constitution as the source of their right to federal habeas review.” Justice Stevens continued:

In Braden v. 30th Judicial Circuit Court of Ky., this Court held . . . that the prisoner's presence within the territorial jurisdiction of the district court is not “an invariable prerequisite” to the exercise of district court jurisdiction under the federal habeas statute. Rather, because “the writ of habeas corpus does not act upon the prisoner who seeks relief, but upon the person who holds him in what is alleged to be unlawful custody,” a district court acts “within [its] respective jurisdiction” within the meaning of [28 U.S.C.] § 2241 [the general habeas statute] as long as “the custodian can be reached by service of process.”

In dissent, Justice Scalia, joined by Chief Justice Rehnquist, and Justice Thomas, concluded that Braden did not clearly overrule Eisentrager. He said, “This is an irresponsible overturning of settled law in a matter of extreme importance to our forces currently in the field. I would leave it to Congress to change § 2241, and dissent from the Court's unprecedented holding.”

In a concurrence, Justice Kennedy agreed that it was not clear that Braden overruled Eisentrager. Nonetheless, he concluded that “the facts here are distinguishable from those in Eisentrager in two critical ways, leading to the conclusion that a federal court may entertain the petitions.” Kennedy stated:

387 317 U.S. 1, 20-21 (1942).
390 Id. at 478-79, citing Braden, 410 U.S. 484, 494-95 (1973).
391 Id. at 488-89 (Scalia, J., joined by Rehnquist, C.J., and Thomas, J., dissenting).
First, Guantanamo Bay is in every practical respect a United States territory, and it is one far removed from any hostilities. . . . From a practical perspective, the indefinite lease of Guantanamo Bay has produced a place that belongs to the United States, extending the “implied protection” of the United States to it. The second critical set of facts is that the detainees at Guantanamo Bay are being held indefinitely, and without benefit of any legal proceeding to determine their status. In Eisentrager, the prisoners were tried and convicted by a military commission of violating the laws of war and were sentenced to prison terms. Having already been subject to procedures establishing their status, they could not justify “a limited opening of our courts” to show that they were “of friendly personal disposition” and not enemy aliens. Indefinite detention without trial or other proceeding presents altogether different considerations. It allows friends and foes alike to remain in detention. It suggests a weaker case of military necessity and much greater alignment with the traditional function of habeas corpus. Perhaps, where detainees are taken from a zone of hostilities, detention without proceedings or trial would be justified by military necessity for a matter of weeks; but as the period of detention stretches from months to years, the case for continued detention to meet military exigencies becomes weaker.392

Once the Court has jurisdiction to hear the case, the question then arises what procedures must the government follow to vindicate a detainee’s rights. The Court addressed this issue in 2006 in Hamdan v. Rumsfeld, discussed at § 27.4.4.8 nn.409-16. The two other 2004 cases, Hamdi v. Rumsfeld and Rumsfeld v. Padilla, dealt with the rights of United States citizens held as suspected terrorists. In Hamdi v. Rumsfeld,393 a plurality of Justice O’Connor, joined by Chief Justice Rehnquist, and Justices Kennedy and Breyer, concluded that “although Congress authorized the detention of combatants in the narrow circumstances alleged here, due process demands that a citizen held in the United States as an enemy combatant be given a meaningful opportunity to contest the factual basis for that detention before a neutral decisionmaker.” In determining what procedures must be followed, the plurality noted, “Without doubt, our Constitution recognizes that core strategic matters of war making belong in the hands of those who are best positioned and most politically accountable for making them. The Government also argues [that] military officers who are engaged in the serious work of waging battle would be unnecessarily and dangerously distracted by litigation half a world away, and discovery into military operations would both intrude on the sensitive secrets of national defense and result in a futile search for evidence buried under the rubble of war. To the extent that these burdens are triggered by heightened procedures, they are properly taken into account in our due process analysis.”

Four Justices in Hamdi disagreed with the plurality’s conclusion that Congress had authorized the military detention of citizens as enemy combatants through the “Force Resolution” passed after 9-11. Justice Scalia read the Suspension Clause, Article I, § 9, cl. 2, discussed at § 23.2.2.3, to give the Congress no independent power to authorize military detentions of citizens absent suspension

392 Id. at 487 (Kennedy, J., concurring in the judgment).

of the Writ of Habeas Corpus, a position joined by Justice Stevens. 394 Adopting a less extreme position, Justices Souter and Ginsburg required a clear statement from Congress to authorize such detentions, which they said did not exist in this case. 395 Their concurrence continued:

Since this disposition does not command a majority of the Court, however, the need to give practical effect to the conclusions of eight members of the Court rejecting the Government's position calls for me to join with the plurality in ordering remand on terms closest to those I would impose. See Screws v. United States, 325 U.S. 91, 134 (Rutledge, J., concurring in result). Although I think litigation of Hamdi's status as an enemy combatant is unnecessary, the terms of the plurality's remand will allow Hamdi to offer evidence that he is not an enemy combatant, and he should at the least have the benefit of that opportunity.

It should go without saying that in joining with the plurality to produce a judgment, I do not adopt the plurality's resolution of constitutional issues that I would not reach. It is not that I could disagree with the plurality's determinations (given the plurality's view of the Force Resolution) that someone in Hamdi's position is entitled at a minimum to notice of the Government's claimed factual basis for holding him, and to a fair chance to rebut it before a neutral decision maker; nor, of course, could I disagree with the plurality's affirmation of Hamdi's right to counsel. On the other hand, I do not mean to imply agreement that the Government could claim an evidentiary presumption casting the burden of rebuttal on Hamdi, or that an opportunity to litigate before a military tribunal might obviate or truncate enquiry by a court on habeas. 396

Justice Thomas agreed in Hamdi with the plurality that Congress had authorized military detention in these circumstances. Reflecting the conservative predisposition to defer to the President, he would not have the Court impose any due process limitations on such military confinement. Justice Thomas concluded, “The Executive Branch, acting pursuant to the powers vested in the President by the Constitution and with explicit congressional approval, has determined that Yaser Hamdi is an enemy combatant and should be detained. This detention falls squarely within the Federal Government's war powers, and we lack the expertise and capacity to second-guess that decision. As such, petitioners' habeas challenge should fail . . . . Arguably, Congress could provide for additional procedural protections, but until it does, we have no right to insist upon them.” 397

Following the Hamdi case, the government choose to release Mr. Hamdi, rather than prosecute him. His release was based on an agreement that he would give up his United States citizenship, relocate in another country, Saudi Arabia, and consent not to travel to an extensive list of countries, including

394 Id. at 554 (Scalia, J., joined by Stevens, J., dissenting).
395 Id. at 540 (Souter, J., joined by Ginsburg, J., concurring in part, dissenting in part, and concurring in the judgment).
396 Id. at 553-54 (citations omitted).
397 Id. at 579 (Thomas, J., dissenting).
Afghanistan, Iran, Iraq or Syria, where he could be presumably be recruited for terrorist activity.398

The third case decided in 2004 was *Rumsfeld v. Padilla*.399 In *Padilla*, a 5-Justice majority ruled narrowly that “[w]henever a § 2241 habeas petitioner seeks to challenge his present physical custody within the United States, he should name his warden as respondent and file the petition in the district of confinement.” In the *Padilla* case, although Mr. Padilla had originally been held in the Southern District of New York as a material witness, by the time he filed his writ of habeas corpus in that district, he had been moved to South Carolina. Thus, he needed to refile his habeas petition there. Justices Stevens, joined by Justices Souter, Ginsburg, and Breyer, dissented. They stated:

All Members of this Court agree that the immediate custodian rule should control in the ordinary case and that habeas petitioners should not be permitted to engage in forum shopping. But we also all agree with Judge Bork that “special circumstances” can justify exceptions from the general rule. Demjanjuk v. Meese, 784 F.2d 1114, 1116 (C.A.D.C. 1986). More narrowly, we agree that if jurisdiction was proper when the petition was filed, it cannot be defeated by a later transfer of the prisoner to another district. Ex parte Endo, 323 U.S. 283, 306 (1944).

It is reasonable to assume that if the Government had given Newman, who was then representing [Padilla] in an adversary proceeding, notice of its intent to ask the District Court to vacate the outstanding material witness warrant and transfer custody to the Department of Defense [for transfer to South Carolina], Newman would have filed the habeas petition then and there, rather than waiting two days.400

As suggested by this passage, the dissent was likely concerned that the government had engaged in opportunistic forum shopping on its own by transferring Padilla at the last minute to a federal district, in this case South Carolina, where the district court might be more sympathetic to the government in the conduct of any later proceedings.401 Following the Supreme Court’s decision in *Padilla* in 2004, the government indicted Padilla in November 2005 for travelling “overseas to train as a terrorist with the intention of fighting a violent jihad,” although any allegations involving attacks in America, including plotting to carry out a "dirty bomb" attack in this country, for which Padilla was originally detained, were not included in the indictment. As of October, 2006, trial had not begun in the case.402

400 *Id.* at 458 (Stevens, J., joined by Souter, Ginsburg & Breyer, JJ., dissenting).

The due process issues involved in these “war on terrorism” cases are naturally arising in other countries with similar traditions of due process concerns as in America. For example, in Britain, a court ruled key provisions of the British anti-terrorism law, which allowed a form of house arrest for suspected terrorists, to be an “affront to justice” and incompatible with European and British human rights law. British courts have also ruled unlawful the indefinite detention of suspected terrorists, forcing, in the particular case, the release of eight suspects, all Muslim men, who had been detained for up to 3½ years. Similar challenges will likely be made in America to various provisions of the USA Patriot Act, among other pieces of anti-terrorist legislation.

A related issue concerns the law regarding acts of torture. Under customary international law, the prohibition of torture is *jus cogens*—a peremptory norm that is non-derogable under any circumstances, binding on all nations, on par with prohibitions against slavery and genocide. In addition, the United States ratified in 1990 the United Nations Convention Against Torture. To meet its obligations under that Convention, in 1994 Congress criminalized acts of torture committed outside the United States in 18 U.S.C. § 2340. For government acts within the United States, the Eighth Amendment ban on “cruel and unusual punishment” would apply. In cases of private individuals, regular criminal laws, such as assault and battery, would apply. The Torture Victims Protection Act of 1991 provides civil tort liability for any “individual who, under actual or apparent authority, or color of law, of any foreign nation . . . subjects an individual to torture.”

The precise definition of what constitutes torture is subject to some dispute. The issue has received greater attention since 9-11 following two Department of Justice memos adopting exceedingly narrow definitions of what constitutes torture under 18 U.S.C. § 2340. Under the first memo, the “Bybee” memo, drafted in August 2002, “The victim must experience intense pain or suffering of the kind that is equivalent to the pain that would be associated with serious physical injury so severe that death, organ failure, or permanent damage resulting in a loss of significant bodily function would likely result.” The Bybee memo also adopted a narrow view of the intent component of defining torture, requiring the torturer to act with the “precise and express objective” of inflicting severe pain.

Following intense public criticism of the Bybee memo, once it became public in June 2004, the Bush Administration submitted a new memorandum, called the “Levin” memo, in December 2004. In this memo, the definition of torture was left more vague, but the memo described the severe pain
necessary for torture as falling below the level described in the Bybee memo, but above the level of pain derived from cruel and inhuman treatment. The Levin memo also indicated that torture may involve either severe physical suffering or severe physical pain. The Levin memo also retracted the Bybee memo’s language regarding a “precise and express objective” to inflict pain, but did not provide any further clarification, other than to state that it is not enough to act with knowledge that such pain “was reasonably likely to result” from actions or “is certain to occur.”

The existence of these memos, and the belief that American practices regarding torturing suspects in detention have changed since 9-11, has caused the United States government public relations problems. For example, in holding that three British residents being held at Guantanamo Bay may take legal action to try to force the British Government to facilitate their release, a British judge observed that the United States’ current idea of what constitutes torture is “not the same as ours and doesn’t appear to coincide with that of most civilized countries.” The continued detention at Guantanamo Bay of large numbers of detainees for more than 4 years without hearings has also prompted international concern. Secretary General of the United Nations, Kofi Annan, has indicated his belief that the United States should shut the Guantanamo Bay camp "without further delay" and either try the roughly 500 detainees held there or release them.

The issue of what rights Guantanamo Bay detainees should have in their trials was the focus of Hamdan v. Rumsfeld, decided in 2006. In Hamdan, the Court decided that the initial set of procedures adopted by the Bush Administration to try detainees at Guantanamo Bay, like Hamdan, were not expressly authorized by any congressional act. Absent such congressional authorization, the procedures were held to violate existing statutory and treaty requirements: the Uniform Code of Military Justice (UCMJ) and Article 3 of the Geneva Conventions. In reaching this conclusion, both Justice Stevens’ majority opinion, and Justice Kennedy’s concurrence, joined by Justices Souter, Ginsburg and Breyer, paid considerable attention to general principles of separation of powers. As Justice Kennedy pointed out in his concurrence, Congress required in the UCMJ, and Article 3 of the Geneva Conventions requires, that military commissions be “regularly established.” Such commissions are not so established, he said, unless any differences between their structure and procedures and those used by courts-martial are required by practical reasons which the government must be prepared to explain. Justice Kennedy supported this legal requirement in part by noting that

408 CNN, Annan: Shut Guantanamo Prison Camp (February 17, 2006) (cnn.com news, search by using words in the title of the article).

409 126 S. Ct. 2749, 2759-60, 2772-75, 2795-96 (2006); id. at 2799-2708 (Kennedy, J., joined by Souter, Ginsburg & Breyer, JJ., as to Parts I & II, concurring in part).
the UCMJ provides that all rules and regulations made under the Act “shall be uniform so far as practicable.” Justice Kennedy supported this interpretation by reasoning that the separation of powers would be violated unless the commissions were more independent of the executive than was true in their present structure, which collected many functions (setting up commissions; determining how many judges will sit, with a minimum of 3, but not 5 as is typical for court-martial proceedings; selecting the presiding officer; and exercising supervisory power during the trial) in a single executive officer, the “Appointing Authority,” and created special review procedures rather than using review procedures created by Congress. Further, the procedures ordered to be used in the military commissions, such as admitting all evidence “having probative value to a reasonable person,” deviated from rules provided in the UCMJ, without the government having made a demonstration of practical need for the special rules either in this case or generally. Article 3 of the Geneva Conventions was held to apply because it regulates any “conflict not of an international character occurring in the territory of one of the High Contracting Parties.” The Court concluded that because acts by terrorists are not acts between “nations,” they are conflicts “not of an international character” as that phrase is used in the Geneva Conventions.

Given the conclusion that the military commission at issue in Hamdan was unauthorized under the UCMJ, Justice Kennedy saw “no need to consider several further issues addressed” and the subject of dispute between Justice Stevens, joined by Justices Souter, Ginsburg, and Breyer, on the one hand, and the dissent by Justice Thomas, joined by Justice Scalia, and by Justice Alito, in part, on the other hand. These issues involved whether Article 3 of the Geneva Conventions’ standard of a "regularly constituted court affording all the judicial guarantees which are recognized as indispensable by civilized peoples" necessarily requires that the accused have the right to be present at all stages of a criminal trial; whether, as the plurality seemed to conclude, Article 75 of Protocol I to the Geneva Conventions is binding law, particularly on the right to be present at trial, absent disruptive behavior, and to be privy to the evidence used against the accused, absent a compelling interest in denying access to sensitive security information, notwithstanding the decision by the United States not to accede to the Protocol, although that refusal was not because of an objection to Article 75; whether the conspiracy charge against Hamdan could be addressed in a military tribunal as part of the law of war, or only in regular civilian courts, as the plurality concluded; and other limitations on military tribunals described as elements of the common law of war in Part V of Justice Stevens’ opinion, such as any acts prosecuted must have occurred “during, not before, the relevant conflict.” Thus, Justice Kennedy concluded, “With these observations I join the Court's opinion with the exception of Parts V and VI-D-iv.”

Justice Breyer wrote a short concurring opinion, joined by Justices Kennedy, Souter, and Ginsburg. That concurrence underscored that while the Court’s decision made it clear that Congress had not given the President a “blank check” to create military tribunal procedures on his own, nothing prevents the President from going to Congress to seek the authority he believes necessary to create military commissions of the kind he thinks necessary. Because statutes and treatises stand on the same footing for purposes of domestic law, discussed at § 18.3.9 n.189, Congress could authorize

410 Id. at 2808-09 (Kennedy, J., concurring in part).

411 Id. at 2799 (Breyer, J., joined by Kennedy, Souter & Ginsburg, JJ., concurring).
military commissions with less rights than granted in the current UCMJ and Article 3 of the Geneva
Conventions, and such a statute would be valid for purposes of domestic law. Under international
law, as noted at § 18.3.9 nn.193-199, the Geneva Conventions would still be viewed as controlling
absent United States withdrawal from that treaty, a step politically unlikely for any United States
government to take.

A conservative formalist dissent by Justice Thomas, joined by Justice Scalia and joined in part by
Justice Alito, would have granted greater deference to the President’s judgment that his actions were
authorized by Congress, did comply with the UCMJ, and did satisfy the Geneva Conventions. In
part of his dissent, joined by Justice Scalia, Justice Thomas concluded that Article 3 of the Geneva
Conventions did not apply, in part because the Court should defer to the President’s judgment that
because the war on terrorism was of “international scope” it was a conflict “of an international
character” for purposes of the Geneva Conventions.412

In a separate dissent, Justice Alito noted that even if Article 3 of the Geneva Conventions applied,
it imposes only three requirements: sentences may be imposed only by (1) a “court,” (2) that is
“regularly constituted,” and (3 ) that affords “all the judicial guarantees which are recognized as
indispensable by civilized peoples.” Relying on Webster’s Dictionary, Justice Alito said that
“regularly constituted” means properly appointed, set up, or established. Whether that is so should
be determined by the domestic law of the appointing country, and under United States law there is
no basis for the majority’s conclusion that a military court cannot be regarded as “regularly
established” unless a practical need explains why it deviates from conventional court-martial
standards. Nor does Article 3 require that trials be held in military courts or courts similar in
structure and composition, as its drafters certainly could, but did not, use language to express that
thought more directly. Further, the commentary on Article 3 says that it is only “summary justice”
which it is intended to prohibit. The commissions created by the President met this standard,
concluded Justice Alito, and there is no basis for the Court to strike down the commissions because
their rules can be changed from time to time by the Secretary of Defense or that evidence may be
admitted which has probative value to a reasonable person.413 Justice Alito’s dissent, as well as
Justice Thomas’ dissent, are consistent with the conservative predisposition in separation of powers
cases to favor broader grants of executive power, discussed at § 6.2.2.4.

As a preliminary matter, the Court held that it had jurisdiction to hear the appeal from the denial of
a petition for habeas corpus by an alien detained at Guantanamo Bay, despite a recently enacted
statute purporting to deprive federal courts of jurisdiction over habeas corpus applications filed by
such persons. The Court held that the statute, properly interpreted, did not apply to actions, such
as this one, which were pending when the statute was enacted.414 This conclusion is consistent with
the Court’s predisposition, discussed at § 17.2.3.1 n.152, to read limitations on the Court’s
jurisdiction narrowly. In his dissent, Justice Scalia, joined by Justices Thomas and Alito, concluded

412 Id. at 2823-49 (Thomas, J., joined by Scalia, J., and by Alito, J., except for Parts I, II-C-1,
and III-B-2,dissenting).

Page 1319
that the statutory exception was clear, and that the Court should not have heard the case at all.\textsuperscript{415} Chief Justice Roberts did not participate in \textit{Hamdan}, having been part of the court of appeals panel that had heard the case, prior to his nomination and confirmation as Chief Justice. Justice Roberts’ views on that panel tracked the dissenting Justices in \textit{Hamdan}.\textsuperscript{416}

As of October, 2006, Congress passed, and President Bush indicated an intent to sign, a bill, the Military Commissions Act of 2006, setting out procedures to govern trial of unlawful enemy combatants. In the Act, enemy combatants were defined broadly as any individual determined by the President, or presidential designate, to have “purposefully and materially” supported anti-United States hostilities and is not part of a country’s regular armed forces – who are foreign nationals. The \textit{ad hoc} nature of the existing process before this statute was passed had naturally caused due process problems.\textsuperscript{417} In the Act, Congress expanded the evidence that could be used at trial from traditional UCMJ procedures – both expanded hearsay evidence and evidence from coerced confessions, although not from torture, as long as the evidence meets a generic test of “probative value to a reasonable person.” This change, along with the remaining procedures, which are reasonably close to the UCMJ and Geneva Conventions, particularly regarding the right of the accused to be present at trial and have access to information used to convict, will likely be held to satisfy due process concerns. United States citizens deemed unlawful enemy combatants will end up with greater rights, consistent with \textit{Hamdi} and \textit{Padilla}, discussed at § 27.4.4.8 nn.393-401. This difference between treatment of United States citizens and aliens does raise an equal protection issue, but only under minimum rationality review for federal regulation of aliens, discussed at § 26.2.2.2.

The one provision likely to raise the greatest concern with constitutionality is the ban on any habeas corpus petition being filed by a detainee. As discussed at §§ 17.2.2.1.A n.98 & 17.2.3.1 nn.150-58, prior cases have upheld Congress’ right to strip federal courts of habeas jurisdiction, but no prior statute has stripped federal court review of such a potentially large number of criminal cases, which in practice provides that foreign national unlawful enemy combatants could be indefinitely detained without any access to the judicial system for review of their status as enemy combatants. While conservative formalist and Holmesian Justices would likely defer to the government in this case, a combination of natural law and liberal instrumentalist Justices could cause the Court to strike down that part of the statute on structural separation of powers grounds,\textsuperscript{418} perhaps based on \textit{Felker v. Turpin}, discussed at § 17.2.3.1 n.158, on whether Congress “has deprived [the Court] of

\textsuperscript{415} Id. at 2810-23 (Scalia, J., joined by Thomas & Alito, JJ., dissenting).

\textsuperscript{416} Id. at 2758-59 (Roberts, C.J., took no part in the consideration or decision of the case); Hamdan v. Rumsfeld, 415 F.3d 33 (D.C. Cir. 2005).

\textsuperscript{418} 581 U.S. 651, 661-62 (1996).
jurisdiction in violation of Article III, § 2.” Of course, without regard to its constitutionality, one can question whether it is good policy, either from a domestic perspective, or in terms of standing in the world community, to remove the ancient writ of Habeas Corpus, which goes back to the Magna Carta in 1215, in this class of cases. A related issue that will have to be decided regards the right of public access, if any, to any tribunals which are ultimately created.419

Another issue that has arisen in the context of the war on terrorism involves the issue whether a United States citizen, who alleges being arrested, tortured, and detained indefinitely by agents of a foreign government at the behest of the United States, may seek habeas corpus relief in United States federal district courts because he is “in custody under or by color of the authority of the United States” or “in custody in violation of the Constitution or laws or treaties of the United States.” In Abu Ali v. Ashcroft420 a federal district court held that such an individual could seek habeas relief.

§ 27.4.4.9 Delegation of Government Functions to Private Parties

In Texas Boll Weevil Eradication Foundation v. Lewellyn,421 the Texas Supreme Court invalidated a statute that gave a private board of cotton-growers sweeping police powers to eradicate boll weevils, a crop pest. The board members, who were area farm owners, used their power against other area growers by forcing them to raze their fields to stop dubious outbreaks of the pestilence. The Texas Supreme Court found delegation to a private group to be much more troubling than delegations to state agencies or municipalities, stating, “[P]rivate delegations clearly raise even more troubling constitutional issues than their public counterparts. On a practical basis, the private delegate may have a personal or pecuniary interest which is inconsistent with or repugnant to the public interest to be served. More fundamentally, the basic concept of democratic rule under a republican form of government is compromised when public powers are abandoned to those who are neither elected by the people, appointed by a public official or entity, nor employed by the government. Thus, we believe it axiomatic that courts should subject private delegations to a more searching scrutiny than their public counterparts.” To guide this scrutiny, the court indicated that eight factors were of particular relevance. These were:

1. Are the private delegate’s actions subject to meaningful review by a state agency or other branch of the state government?
2. Are the persons affected by the private delegate’s actions adequately represented in the decisionmaking process?
3. Is the private delegate’s power limited to making rules, or does the delegate also apply the law to particular individuals?
4. Does the private delegate have a pecuniary or other personal interest that may conflict with his or her public function?
5. Is the private delegate empowered to define criminal acts or impose criminal sanctions?

419 See generally Jeffrey S. Koweek, Enemy Combatant Status Hearings: Predicting the Right of Access by the Press and the Public, 3 First Amendment L. Rev. 373 (2005).

421 952 S.W.2d 454, 469-72 (Tex. 1997).
6. Is the delegation narrow in duration, extent, and subject matter?
7. Does the private delegate possess special qualifications or training for the task delegated to it?
8. Has the Legislature provided sufficient standards to guide the private delegate in its work?

Similarly concerned with delegation of government power to private parties, the Second Circuit reviewed in *General Electric Co. v. New York Department of Labor* 422 New York's "prevailing wage" law, because it allowed private parties to dictate the government's actions toward others without the usual political or judicial process. The court observed that "the Department's procedures seem not to involve the exercise of any [state agency] discretion in setting prevailing wage and supplement rates." In *Club Misty, Inc. v. Laski*, 423 the Seventh Circuit considered a Chicago ordinance allowed a neighborhood referendum to control the granting or revocation of liquor licenses. The Court noted that while the legislature can empower voters to act legislatively, as in a normal public referendum, provided that the action "is on the legislative side of the legislative/judicial divide," transferring to private parties judicial/adjudicative type decision-making, such as applying the law to the facts of individual liquor license cases, violates due process.

A similar problem would seem to exist if an attempt were made between a government agency and a private corporation or entity to contract out the work involved with the provision of government benefits or assistance, such as welfare eligibility determinations for those in poverty. Under the *Club Misty* analysis, privatized welfare eligibility determinations would appear to be on the judicial side, assessing the past and present individuals' situation. One author has concluded, “The privatization of welfare services via contract with private organizations is inherently fraught with unavoidable due process problems and overstepping of the nondelegation doctrine.”

§ 27.4.4.10 Legislative Adoption of Rules Drafted by Private Parties

Related due process issues arise when a particularized body of law has developed around the practice of legislatures or agencies incorporating or enacting a code or set of rules borrowed in its entirety from some outside group. For example, in *American Home Products Corp. v. Homsey*, 425 the Oklahoma Supreme Court indicated that if a legislative act “does confer such power on an unnamed, unofficial group, it is within the inhibition of the Constitution. It is also apparent that the act would be invalid if the agreement referred to were approved without investigation, or even if the agreement were considered as the sole evidence of the facts which the board is authorized to find, since no agreements of individuals could make facts exist which do not exist, so far as others and

422 936 F.2d 1448, 1459 (2nd Cir. 1991).
423 208 F.3d 615, 622 (7th Cir. 2000).

Page 1322
the public are concerned.” Similarly, in *Quality Oil Company v. E.I. du Pont de Nemours & Co.*\(^{426}\) the Kansas Supreme Court held that “The legislature is powerless to clothe a private person with power to fix minimum resale prices binding upon all who acquire and sell his trade-mark commodity with whom he has no direct contractual relation. An attempt to confer such power is an attempt to delegate legislative power, which is futile.”

In practice, these limitations are not of much practical consequence, since if the legislature makes its own independent review of whatever material is presented to it by the private group, and then makes its own decision to adopt whatever standards the legislature deems fit, delegation problems disappear. In such circumstances, the statute is then a standard social or economic regulation, and merely tested under minimum rational review under an Equal Protection Clause analysis, discussed at § 26.4.1, and Due Process Clauses analysis, discussed at § 27.1.2.1.

CHAPTER 28: CONGRESSIONAL POWER UNDER THE CIVIL WAR AMENDMENTS

Seven constitutional amendments provide that “Congress shall have power to enforce” the amendment “by appropriate legislation.” These are the 13th, 14th, 15th, 19th, 23rd, 24th, and 26th Amendments. The last four of these amendments deal with voting rights for women (19th), three electoral college votes for the District of Columbia in elections for President and Vice-President (23rd), no imposition of a poll tax or any other tax to be permitted to vote in elections to federal office (24th), and voting rights for persons 18 years or older (26th). These provisions are relatively self-explanatory, and no significant issues have been raised over their meaning or congressional statutes implementing them, such as congressional statutes providing procedures for selection of the District of Columbia’s electors in presidential elections. However, a significant number of cases have addressed Congress’ power to enforce the first three of these amendments – the 13th, 14th, and 15th Amendments – collectively called the Civil War Amendments.

§ 28.1 Introduction to Congressional Power Under the Civil War Amendments

Each provision in the Civil War Amendments – the 13th, 14th, and 15th Amendments – has a section providing that “Congress shall have power to enforce” the amendment “by appropriate legislation.” The two main points of contention in interpreting this language have been what the word “enforce” means, and what the word “appropriate” means. Regarding “enforce,” the question is whether Congress has the power to define for itself what action violates the Civil War Amendments and then provide remedies for that action, or is Congress limited to providing remedial schemes for violations found by the Court. Regarding “appropriate,” the question is what should be the test to determine appropriate congressional action.

Because the Civil War Amendments were ratified between 1865 and 1870, it is not surprising that there were no decisions in the natural law era on congressional enforcement power. Of course, the Court had held in 1803 in Marbury v. Madison1 that it is a judicial function to say what the law is. This suggests that perhaps only the Court can determine violations of the Civil War Amendments, and that Congress is limited only to providing remedies for Court-determined infractions.

On the other hand, the Radical Republican Congress that spearheaded the Civil War Amendments were suspicious of a Supreme Court that, as of 1865, still included 4 Justices – Justices Wayne, Nelson, Catron, and Grier – who had voted with the majority in 1857 in Dred Scott v. Sandford, discussed at § 25.1 nn.9-16, and a fifth Justice, Justice Clifford, confirmed in 1858 after being nominated by President Buchanan, also perceived as a Southern sympathizer. This suggests that the enforcement provisions of the Civil War Amendments were an attempt by Congress to reserve some ultimate interpretive power for itself as to the meaning of the 13th, 14th, and 15th Amendments.2

---

1 5 U.S. (1 Cranch) 137, 176-80 (1803).

2 See generally Wayne D. Moore, The Fourteenth Amendment’s Initial Authority: Problems of Constitutional Coherence, 13 Temple P. & Civ. R. L. Rev. 515, 528-31 (2004); James W. Fox,
The range of civil rights legislation passed by Congress between 1866 and 1871 also suggests that Congress had this broader vision of the power granted to it under the Civil War Amendments. Between 1866 and 1871, Congress passed a number of civil rights statutes, now codified at 42 U.S.C. §§ 1981-1986. Section 1981 attempts to secure equal contracting rights without regard to race. Section 1982 attempts to secure equal rights regarding property. Section 1983 provides for a federal cause of action for any deprivation of constitutional or federal statutory rights done under color of state law, custom, or usage. The vast majority of constitutional cases in the federal courts have been brought under this statute. Section 1985(1) provides for a damage action when two or more persons conspire to impede a federal officer from discharging official duties. Section 1985(2) proscribes the intimidation of federal court witnesses and parties. Section 1985(3) provides for a federal cause of action for damages for conspiracies that have the purpose and result of depriving any person of equal protection of the laws, or of equal privileges and immunities. Section 1986 creates a damage action against persons for negligent failure to prevent a violation of Section 1985 if the person had the power to prevent a violation, as would be true for law enforcement officials. Further, Congress provided some statutory protection to enforce the 15th Amendment's provisions regarding banning the denial of voting rights on account of race in the Enforcement Act of 1870. This Act was an attempt to regulate the violence and intimidation by the Ku Klux Klan regarding voting by blacks in 1868 and 1870.

Regarding one such piece of legislation, the Civil Rights Act of 1866, it has been noted:

> In the wake of Congress' enactment of the Civil Rights Act of 1866, concern arose among congressmen over the constitutionality of such nationalized civil rights legislation. Specifically, it was thought that "the power to prohibit slavery, peonage, or any interference with strict personal liberty was one thing, while the power to regulate the domestic relations of life, liberty, and property within the states was something very different." As Senator Eli Saulsbury

---

3 On all of these civil rights statutes, see generally Harold S. Lewis, Jr. & Elizabeth J. Norman, Civil Rights Law and Practice 2-28 (2001); Alan W. Clarke, The Ku Klux Klan Act and the Civil Rights Revolution: How Civil Rights Litigation Came to Regulate Police and Correctional Officer Misconduct, 7 The Scholar: St. Mary’s L. Rev. on Minority Issues 151 (2005).

suggested in a statement directed to the proponents of the Civil Rights Bill, "[i]f you had intended to bestow upon the freed slave all the rights of a free citizen, you ought to have gone further in your constitutional amendment, and provided that . . . there should be no inequality in civil rights." Concerns such as these were precisely what led Congress to take the next, and most significant, legislative step of the Reconstruction period – the adoption of the Fourteenth Amendment.5

Regarding the meaning of term “appropriate” legislation, which appears in the 13th, 14th, and 15th Amendments, the Court had stated in 1819 in McCulloch v. Maryland,6 “Let the end be legitimate, let it be within the scope of the constitution, and all means which are appropriate, which are plainly adapted to that end, which are not prohibited, but consist with the letter and spirit of the constitution, are constitutional.” As applied to the Necessary and Proper Clause of Article I, § 8, cl. 18, this language has been read to give Congress great latitude to determine “appropriate” legislation under a minimum rational review test, as noted at §§ 18.1.2 nn.31-40 & 18.2.5 n.125. This suggests that, as with the Necessary and Proper Clause in Article I, § 8, great latitude should be given to Congress in determining “appropriate” legislation under the Civil War Amendments.

As noted at §§ 25.1 nn.20-28, 25.3 nn.59-64 & 26.2.1.1 nn.108-18, during the formalist era the Court gave a limited reading to the Civil War Amendments in the Slaughter-House Cases,7 The Civil Rights Cases,8 and Plessy v. Ferguson.9 The Court also adopted a limited view regarding Congress’ enforcement powers. For example, Congress passed the Civil Rights Act of 1875, which banned discrimination in places of public accommodation. That Act was viewed by its supporters as consistent with the Court’s decision in the Slaughter-House Cases in 1873. Nevertheless, that Act was struck down in 1883 in The Civil Right Cases as violating the Court’s understanding of the state action limits of the 14th Amendment.10 One author has remarked, “The Justices . . . pervert[ed] the plain intent of the Fourteenth Amendment – and the Fifteenth Amendment too . . . . Through the 1860's and 1870's, Congress had passed a series of laws designed to put teeth into the otherwise empty words of the post-war Amendments . . . . [T]he Court imperiously and impatiently swept aside

6 17 U.S. (4 Wheat.) 316, 421 (1819).

7 83 U.S. 16 (Wall.) 36 (1873).

8 109 U.S. 3 (1883).

9 163 U.S. 537 (1896).

almost all of these so-called Civil Rights Acts, either by flatly branding them – unconstitutional – no matter that the Constitution had been amended precisely to achieve what these laws were aimed to achieve – or by using legalistic chop-logic to ‘interpret’ them out of effective existence.”

Congressional attempts to enforce the 15th Amendment's voting provisions in the face of Ku Klux Klan activity seeking to minimize black turnout were also substantially frustrated.

The assumption during the Holmesian era also seemed to be that only the Court could determine whether a violation of the Civil War Amendments had occurred. Congress was limited to providing remedies for Court-determined infractions. Under this reasoning, when the Court held in *Lassiter v. Northampton County Board* that a literacy test for voting was fair on its face, and was not used in a racially discriminatory fashion, and thus did not violate the 15th Amendment, there could be no Civil War Amendment basis for contrary congressional action.

During the instrumentalist era, in cases such as *Katzenbach v. Morgan*, discussed at § 28.3 nn.31-35, the Court embraced the view, consistent with the practices of the Radical Republican Congresses in passing various civil rights law between 1866-1875, discussed at § 28.1 nn.2-12, that Congress had independent power to determine for itself violations of the Civil War Amendments. As has been noted, “The Framers saw Congress, and not the federal courts, as the primary protector of the rights of their citizens. Congress' rights-generating power, and not that of the federal courts, was central to the original meaning of the Fourteenth Amendment.” The Court also held in *Katzenbach* that “appropriate” legislation would be tested only by the minimal “plainly adapted to that end” standard of review of *McCulloch v. Maryland*.

Both of these conclusions have been limited by decisions during the modern natural law era. While still being faithful to the core holdings of the instrumentalist-era cases, the modern Court has moved in cases such as *City of Boerne v. Flores*, discussed at § 28.3 nn.47-59, to reinstate the view that congressional power under the Civil War Amendments is remedial only, and has created a test for determining “appropriate” legislation that focuses on the “congruence and proportionality” of the

---

congressional action given the mischief to be remedied. As discussed at § 28.3 nn.56-58, this “congruence and proportionality” test appears to be a version of “third-order” rational review, as defined at § 7.2.1 text following n.42, similar to the “rough proportionality” test of Dolan under the Takings Clause, discussed at § 22.2.5.1 nn.97-103, with the burden on Congress to justify its action, rather than the minimum rational review of McCulloch v. Maryland.

§ 28.2 Congressional Power To Enforce the 13th Amendment

As noted at § 25.1 nn.20-24, the 13th Amendment was first interpreted by the Supreme Court in the Slaughter-House Cases, decided in 1873. The Court said the obvious purpose of the 13th Amendment was to forbid "all shades and conditions of African slavery." Ten years later, a more extensive interpretation was given in The Civil Rights Cases. There the Court held that the Amendment nullified all state laws upholding slavery and gave Congress power to pass all laws necessary and proper to abolish all "badges and incidents of slavery." These badges and incidents, said the Court, are disabilities relating to fundamental rights that form the essence of civil freedom: the same rights as enjoyed by white citizens to make and enforce contracts, to sue, be a party, give evidence, and inherit, purchase, lease, sell and convey property. However, the Court held that Congress' power did not extend to adjusting "social rights," as by providing federal remedies for a refusal of service on racial grounds by the owner of an inn, a public conveyance, or a place of amusement.

The instrumentalist era saw substantial changes in 13th Amendment jurisprudence. These changes were based mostly on the instrumentalist Court's perception that the prior cases were wrongly decided from the perspective of instrumentalist social policy. For example, in 1968 the Court overruled prior doctrine to hold in Jones v. Alfred H. Mayer Co. that 42 U.S.C. § 1982 bars all race discrimination, private as well as public, in the sale or rental of property, and that it was within Congress' power to enforce the 13th Amendment. Dissenting in Jones, Justice Harlan said that the statute's words suggested a right to equal status under law and, thus, a right enforceable only against state-sanctioned discrimination. The Court in Jones also abandoned its apparently exclusive claim in The Civil Rights Cases to define the "badges and incidents of slavery." The Court said that Congress has the power rationally to determine what are the badges and incidents of slavery, limited only by the minimum rationality test of McCulloch v. Maryland, and to translate its understanding

18 Id. at 20.
19 Id. at 22-25.
21 Id. at 473-76 (Harlan, J., dissenting).
Building on *Jones*, in 1971 the Court overruled prior doctrine and held in *Griffin v. Breckenridge*\(^\text{23}\) that § 1985(3), an exercise of power under § 2 of the 13th Amendment, extended validly to private conspiratorial violence based on "racial, or perhaps otherwise class-based, invidious discriminatory animus." In 1976, the Court extended *Jones* in *Runyon v. McCrary*\(^\text{24}\) to § 1981 and the right to make and enforce contracts. As with race discrimination under the Equal Protection Clause, discussed at § 26.2.1.2, discriminatory effects are not enough to trigger violations of these statutes. Instead, in the absence of facial discrimination, proof of intent to discriminate is required.\(^\text{25}\)

The modern natural law Court has not reversed or limited this line of instrumentalist precedents. But neither has it used them to expand federal protections. For example, in *Bray v. Alexandria Women's Health Clinic*,\(^\text{26}\) the Court passed up a chance to expand the *Griffin v. Breckenridge* concept of recovery for a "class-based invidious discriminatory animus." Instead, the Court held that § 1985(3) did not provide a federal action for conspiracy to obstruct access to abortion clinics. The Court said that the opposition to abortion was not "class-based invidiously discriminatory animus" because it did not focus on women by reason of their sex. Given this conclusion, the Court did not need to address whether § 1985(3) is limited to "racial animus" or "perhaps otherwise class-based, invidious discriminatory animus," as suggested in *Breckenridge*.

In 1987, in *Saint Francis College v. Al-Khazraji*,\(^\text{27}\) the Court confined § 1981 to "racial" discrimination and did not extend that section to discrimination based on national origin or religion. The Court did hold, however, that "race" is not limited by technical scientific understanding, but rather by congressional intent regarding the meaning of "race." Given congressional understandings in the 19th century, claims for racial discrimination could thus be stated by an Arab or Jew, even though today they would be classified as part of the "Caucasian" race, given "popular understanding that there are three major human races – Caucasoid, Mongoloid, and Negroid." The Court said, "Congress intended to protect from discrimination identifiable classes of persons who are subjected to intentional discrimination because of their ancestry or ethnic characteristics," although this does not include discrimination based "solely on the place or nation of his origin." The Court applied the

\(^{22}\) Id. at 443-44.

\(^{23}\) 403 U.S. 88, 102 (1971).

\(^{27}\) 481 U.S. 604, 610 n.4, 613 (1987).
The failure of the Court to cut back on some of the instrumentalist precedents reflects the natural law predisposition to follow precedent unless some special reason calls for the precedent to be overruled, discussed at § 7.3.3. For example, in 1989, the Court unanimously reaffirmed Runyon v. McCrary in Patterson v. McLean Credit Union. Justice Kennedy's opinion stressed stare decisis, saying the case had not been undermined by subsequent decisions or legislation, had not proved unworkable, and did not frustrate the objectives of Title VII of the Civil Rights Act of 1964. Focusing on whether the case represented a substantially unjust result, Justice Kennedy stated, "Whether Runyon's interpretation of Section 1981 as prohibiting racial discrimination in the making and enforcement of private contracts is right or wrong as an original matter, it is certain that it is not inconsistent with the prevailing sense of justice in this country. To the contrary, Runyon is entirely consistent with our society's deep commitment to the eradication of discrimination based on a person's race or the color of his or her skin."

Despite following the core holding of Runyon, the Court’s opinion ultimately concluded that while § 1981’s language regarding “making and enforcing” contracts bans discrimination in hiring and in promotion if the promotion would practically speaking represent an “opportunity to enter into a new contract with the employer,” its language does not apply to acts of racial harassment committed in connection with the “performance” of an employment contract. Thus, unlike the instrumentalist Justices in Runyon, who viewed complaints about racially discriminatory “performance” either as reflecting rights to non-discrimination reserved in the “making” of the contract or “enforcing” the contract for such performance, the majority refused to expand federal remedies for discrimination.

§ 28.3 Congressional Power To Enforce the 14th Amendment

In 1966, per Justice Brennan, the Court held in Katzenbach v. Morgan that laws enacted under § 5 of the 14th Amendment would be upheld so long as they met the "Necessary and Proper Clause" test of McCulloch v. Maryland regarding legislation “appropriate” and “proper” and “plainly adapted to its end.” The Court then applied that minimum rational review approach to uphold a provision in the Voting Rights Act of 1965 that abolished state literacy tests for persons who had completed the sixth grade in a Puerto Rican school that instructed in other than English. Justice

30 Id. at 175-82, 185 (majority opinion); id. at 207-15 (Brennan, J., joined by Marshall, Blackmun & Stevens, JJ., concurring in the judgment in part and dissenting in part); id. at 219-22 (Stevens, J., concurring in the judgment in part and dissenting in part (discrimination in performance an aspect of different terms in “making” a contract); id. at 206-07 (Brennan, J., joined by Marshall & Blackmun, JJ., concurring in the judgment in part and dissenting in part) (“enforcing” a contract).
Brennan's opinion said it was enough that the Court perceive a basis on which Congress could have concluded that abolishing a literacy test in these circumstances would be helpful in gaining nondiscriminatory treatment in public services or could have found that the literacy test was an invidious discrimination against Puerto Ricans. The opinion thus gave Congress the power to address conditions that the Court might not consider to have been violations of the Constitution, as with this literacy test, given the Court's holding in *Lassiter*, discussed at § 28.1 n.13, as long as Congress had a rational basis for its conclusion that the activity did violate the Constitution.

Dissenting in *Katzenbach v. Morgan*, Justice Harlan, joined by Justice Stewart, said that there was no factual record by which Congress could have found that Spanish-speaking citizens are as capable of making informed decisions as English-speaking citizens, and there was no legislative record supporting the Court's hypothesized possibility of discrimination. Thus, the Court was improperly allowing Congress to decide what was a violation of the Equal Protection Clause. If Congress had such a power it might be used to dilute equal protection and due process.

In response, Justice Brennan replied that Congress' power was limited to adopting measures that enforce the 14th Amendment. Congress could not restrict or dilute its guarantees. On this last point, there seems to be little disagreement. As the Court stated in *Mississippi University for Women v. Hogan*, per Justice O'Connor, § 5 of the 14th Amendment gives Congress a broad power but Congress' power is "limited to adopting measures to enforce the guarantees of the Amendment; § 5 grants Congress no power to restrict, abrogate, or dilute those guarantees. . . Although we give deference to congressional decisions and classifications, neither Congress nor a State can validate a law that denies the rights guaranteed by the 14th Amendment."

The principle that Congress can determine for itself what are constitutional violations strikes at the very heart of separation of powers concepts regarding the role of the legislative and judicial branches as laid out in *Marbury v. Madison*. At issue is the "cardinal rule of constitutional law," restated in *United States v. Morrison*, that "ever since *Marbury* this Court has remained the ultimate expositor of the constitutional text." It is thus not surprising that the *Morgan* theory of congressional power has been cut back since the demise in 1969 of the Warren Court’s clear 5-Justice liberal instrumentalist majority. The demise of that 5-Justice majority after 1969 is noted at § 11.2.2.2.

34 *Id.* at 657-58.

36 529 U.S. 598, 616 n.7 (2000).
For example, in *Oregon v. Mitchell*, a 5-4 Court held in 1970 that Congress had no power to establish a minimum age of 18 for voters in state and local elections. Justice Stewart, with Justices Burger and Blackmun, said they interpreted *Katzenbach v. Morgan* as approving a remedy for past discriminatory treatment in public services or for the impermissible purpose of denying the right to vote to Puerto Ricans. Justice Stewart did not read the *Morgan* case as giving Congress the right to nullify a state law whenever Congress could rationally conclude that the law was not supported by a compelling state interest. He said that Congress has power under the 14th Amendment to "provide the means of eradicating situations that amount to a violation of [equal protection]" but not to "determine as a matter of substantive constitutional law that situations fall within the ambit of the clause." Justice Harlan repeated his view that only the Court, and not Congress, has the authority to determine when states have exceeded constitutional limits on their powers. Concerning the *stare decisis* aspect of *Morgan*, Harlan noted his "deep conviction" that it was wrongly decided, and also noted the evident malaise among the other members of the Court with those decisions. Justice Black provided the critical fifth vote in *Mitchell*. He said that the 18-year-old vote provision was not related to discrimination by race, and Congress had thus invaded an area reserved to the states.

Justice Brennan, joined by Justices White and Marshall, dissenting in part, concluded that Congress can make its own determination on questions of fact, and here could have found that excluding citizens 18-21 from voting was wholly unnecessary to promote any legitimate interest in assuring intelligent and responsible voting. Justice Douglas also dissented from the Court's conclusion that Congress could not prescribe that 18-year-olds could vote in state and local elections. The issue of voting rights by 18-year-olds was resolved by ratification of the 26th Amendment in 1971, which provides that the right of "citizens of the United States, who are eighteen years of age or older, to vote shall not be denied or abridged by the United States or by any State on account of age."

Later cases have further limited *Morgan*. In 1981, writing for the Court in *Pennhurst State School & Hospital v. Halderman*, Justice Rehnquist said that because legislation enforcing the 14th Amendment intrudes on traditional state authority, "we should not quickly attribute to Congress an unstated intent to act under its authority to enforce the Fourteenth Amendment... The case for inferring intent is at its weakest where, as here, the rights asserted impose affirmative obligations on the States to fund certain services, since we may assume that Congress will not implicitly attempt to impose massive financial obligations on the States." Because they viewed the Act as

constitutional under a Spending Clause analysis, Justices Brennan, White, and Marshall did not have to consider Justice Rehnquist’s views on interpreting Congress’ 14th Amendment enforcement power, which in any event were limited, as a matter of the core holding in Pennhurst, to cases involving obligations to fund.

In 1983, in his majority opinion in EEOC v. Wyoming, Justice Brennan sought to limit the “implied interpretation” theory of Justice Rehnquist. Justice Brennan said that to trigger its enforcement power under § 5 of the 14th Amendment, Congress need not recite explicitly the words “§ 5” or “14th Amendment” (or “Equal Protection” or “Due Process”). The question is one of discerning legislative intent. Despite this aspect of EEOC v. Wyoming, the narrower remedial theory of congressional power under the 14th Amendment picked up the vote of Justice O’Connor, who joined Chief Justice Burger, along with Justices Powell and Rehnquist, dissenting in EEOC v. Wyoming. The Chief Justice wrote that Congress can invalidate state laws by using its power to enforce the Civil War Amendments, but only if Congress considers it necessary to remedy past violations in terms of what the Court says are violations, or to guard against future violations. He said that Congress could not impose restrictions on the mandatory retirement laws of the states where Congress did not find it necessary to guard against encroachment of guaranteed rights or to rectify past discrimination. He noted that there had been no finding that a state law infringed on rights identified by the Court. And he added, "[Allowing] Congress to protect constitutional rights statutorily that it has independently defined fundamentally alters our scheme of government." In 1991, Justice Rehnquist’s remarks in Pennhurst were strengthened by Justice O’Connor’s majority opinion in Gregory v. Ashcroft. She wrote that in determining whether Congress has intended to restrict state political functions, the Court, in accord with Pennhurst, will apply a "plain statement" rule. She continued, "[We] will not attribute to Congress [without a plain statement] an intent to intrude on state governmental functions regardless of whether Congress acted pursuant to its Commerce Clause powers or Section 5 of the Fourteenth Amendment." Justices White, Marshall, Blackmun, and Stevens all dissented from this “plain statement” rule.

In 1997, six Justices adopted the narrower remedial interpretation theory of congressional power. For Chief Justice Rehnquist, and Justices O’Connor, Scalia, Thomas, and Ginsburg, Justice Kennedy

explained in *City of Boerne v. Flores* that Congress' enforcement power under the 14th Amendment is a power to correct or prevent violations of the Amendment by the states. It is not a power to define what conduct is a violation of the Amendment. Justices Stevens, Souter, and Breyer avoided this issue based on their resolution of the case, discussed below at § 28.3 n.51. For the foreseeable future, it seems likely the Court will adhere to the views expressed in *Pennhurst State School & Hospital v. Halderman, Gregory v. Ashcroft, and City of Boerne v. Flores*, since the views in all three of these cases are likely shared on the Court, at the least, by Chief Justice Roberts and Justices Scalia, Kennedy, Thomas, and Alito.

*City of Boerne v. Flores* also involved a limitation on Congress power regarding what are “appropriate” remedies for constitutional violations. In *Flores*, Justice Kennedy said that the line between congressional measures that remedy or prevent unconstitutional actions and measures that make a substantive change is not easy to discern and that Congress must have a wide latitude in determining where it lies. However, "there must be a congruence and proportionality between the injury to be prevented or remedied and the means adopted to that end. Lacking such a connection, legislation may become substantive in operation and effect."48

Applying this test, the Court held that the Religious Freedom Restoration Act of 1993 (RFRA) exceeded Congress' power. The Act had been designed to overturn the 1990 ruling of *Employment Division v. Smith*,49 discussed at § 32.2.2.5 nn.253-56, that neutral, generally applicable laws may be applied to religious practices even when not supported by a compelling government interest. RFRA provided that governments should not substantially burden religious exercise without compelling justification. This law, said Justice Kennedy, cannot be considered remedial, preventive legislation because it is so out of proportion to any supposed remedial or preventive object designed to prevent unconstitutional behavior. The compelling interest test it demands of state laws reflects a lack of proportionality or congruence between the means adopted and the end to be achieved. Justice Kennedy supported his conclusions by pointing out that RFRA's restrictions apply to every agency and official of the federal, state, and local governments and to all federal and state laws, statutory or otherwise, whether adopted before or after its enactment, and RFRA has no termination date or termination mechanism. Laws valid under *Smith* would fall under RFRA without regard to whether they had the object of stifling or punishing free exercise. Thus, RFRA is not designed to identify and counteract laws likely to be unconstitutional because of their treatment of religion.50

Without regard to any § 5 enforcement analysis, Justice Stevens concurred on the ground that RFRA provides churches with a legal weapon that no atheist or agnostic can obtain and thus is a

47 521 U.S. 507, 516-29 (1997); id. at 545-46 (O’Connor, J., dissenting on other grounds, but agreeing with the Court’s analysis of the Congress’ § 5 enforcement power).

48 Id. at 519-20.

50 521 U.S. at 529-36.
governmental preference for religion that violates the Establishment Clause. Also independent of any § 5 enforcement analysis, Justices O’Connor, Souter, and Breyer, dissenting, would have set the case for reargument on the question of whether Smith was properly decided.51

Applying the “congruence and proportionality test,” the Court has held subsequently that the Age Discrimination in Employment Act (ADEA) was not “appropriate” legislation under § 5 of the 14th Amendment because there was no evidence of a sufficient pattern of state discrimination on the basis of age to which the statute would be a “congruent and proportionate” response. Thus, Congress could not abrogate state sovereign immunity in the case, because Congress has no power to abrogate state sovereign immunity if the statute were viewed as only authorized under the Commerce Clause, as opposed to the 14th Amendment, as discussed at § 17.2.4.2 nn.209-32. Similar results have been reached in other cases involving the power of Congress to abrogate state sovereign immunity under Congress’ § 5 enforcement power, where the underlying regulatory legislation is based on the Commerce Clause power or other Article I authority.52 In each of these cases, Justices Stevens, Souter, Ginsburg, and Breyer were in dissent. On the § 5 enforcement issue, they determined whether the legislation was “appropriate” from the perspective of Katzenbach’s and McCulloch’s minimum rational review approach, discussed at § 28.3 nn.31-32, rather than the Boerne v. Flores heightened “congruence and proportionality” approach, discussed at § 28.3 nn.48-50, 56-58.53

In two cases Congress was able to establish that the remedial schemes were “congruent and proportional.” These cases dealt with the Family and Medical Leave Act, and a portion of the American with Disabilities Act regulating access of disabled persons to state courthouses. In determining whether sufficient evidence exists to establish a pattern of state constitutional violations that would justify a congressional response under § 5 of the 14th Amendment, Chief Justice Rehnquist noted in Nevada Department of Human Resources v. Hibbs,54 the Family and Medical Leave Act case, that where “the standard for demonstrating the constitutionality of [government action] is more difficult to meet than our rational-basis test,” such as the intermediate scrutiny used to test cases of gender discrimination, it is “easier for Congress to show a pattern of state constitutional violations.” Even with regard to the mentally or physically disabled under the

51 Id. at 536-37 (Stevens, J., concurring); id. at 545-46 (O’Connor, J., joined by Breyer, J., dissenting); id. at 565-66 (Souter, J., dissenting); id. at 566 (Breyer, J., dissenting).

53 See, e.g., Board of Trustees of the University of Ala. v. Garrett, 531 U.S. 356, 386-89 (2001) (Breyer, J., joined by Stevens, Souter, & Ginsburg, J., dissenting) (citing Katzenbach and McCulloch as the proper approach to determining “appropriate” legislation under § 5).

Americans with Disabilities Act, an area of rational basis scrutiny, as discussed at § 26.4.5, the Court concluded in *Tennessee v. Lane*\textsuperscript{55} that there was sufficient evidence of state lack of compliance with the equal protection rights of disabled persons to equal access to state courthouses that the Americans with Disabilities Act was a “congruent and proportionate” response to state failures to build ramps to their numerous, but often old, county courthouses or otherwise make appropriate accommodations for physically disabled persons. Because *Lane* specifically involved the right of access to courthouses, which is related to the fundamental right of access to courts, discussed at § 26.5.2, *Lane* could be read as a case also involving heightened scrutiny, as in *Hibbs*. While Justice Stevens noted this point in his majority opinion for the Court, the precise holding in *Lane* was not based squarely on this fact, but rather on the “extensive record of disability discrimination” before Congress that made the congressional statute “clear beyond peradventure” an appropriate response to state constitutional violations, no matter what the underlying standard of review would have been.

Although the Court has not definitively resolved the issue, it appears the burden is on Congress to establish the requisite “congruence and proportionality” in these cases, as discussed at § 21.2.4.3 105-12. If so, that would make the *Boerne v. Flores* test a species of third-order rational review, rather than the minimum rational basis standard of *McCulloch* used in *Katzenbach v. Morgan*. This aspect of *Flores* is constitutionally suspect, since it is unclear which of the various nine factors typically used to justify heightened scrutiny, discussed at § 26.1.2.1 nn.57-67, support imposing heightened scrutiny on Congress exercising what all Justices have always recognized as Congress’ constitutional remedial authority under its § 5 enforcement power. It is, however, consistent with the background natural law principle of proportionality, which is used, for example, in the Eighth Amendment “cruel and unusual punishment” analysis, discussed at § 23.2.1.4 nn.207-08.

Numerous commentators have criticized this aspect of *Flores*.\textsuperscript{56} One author has acknowledged that *Flores* represents a higher standard of scrutiny than minimum rational review, and has related it to the “rough proportionality” adopted in *Dolan v. Tigard*, discussed at § 22.2.5.1 nn.97-103, but has argued that this heightened rational review is consistent with *McCulloch*.\textsuperscript{57} One commentator has called the *Flores* approach a species of “strict scrutiny,”\textsuperscript{58} but this understanding is likely the product of a similar misunderstanding among those who call the *Maine v. Taylor* under dormant commerce clause review a “strict scrutiny” approach, discussed at 20.3.2.2.A nn.209-16.

\textsuperscript{58} Melissa Hart, *Conflating Scope of Right with Standard of Review: The Supreme Court’s “Strict Scrutiny” of Congressional Efforts to Enforce the Fourteenth Amendment*, 46 Vill. L. Rev. 1091 (2001).
Without regard to the unconstitutionality of the Religious Freedom Restoration Act (RFRA) as applied to states through § 5 of the 14th Amendment, courts have upheld the RFRA as applied to federal laws as a valid congressional amendment to federal statutes passed under Congress’ Article I, § 8 legislative powers, discussed at § 18.2 and §§ 18.3.1-18.3.10. For example, in Hankins v. Lyght,\(^{59}\) the Second Circuit Court of Appeals considered a suit against a church and its bishop for violating the federal Age Discrimination in Employment Act (ADEA). The suit was brought by a former clergy member who was forced to retire at age 70, pursuant to church policy. The defendants’ argument was that to apply the ADEA would impose a substantial burden on the exercise of their religion and, under the RFRA, this required a trial on whether application of the ADEA could be justified as the least restrictive means to advance a compelling governmental interest. The Second Circuit agreed, holding that since Congress had power to enact the ADEA pursuant to its Commerce Clause powers, it also had the power to amend that statute by passing the RFRA. The RFRA was authorized by the Necessary and Proper Clause because its purpose – to protect First Amendment rights – was legitimate under standard rational basis review. The court also explained that Congress has power to carve out a religious exemption from otherwise neutral, generally applicable laws, and this does not violate the Establishment Clause. This aspect of the case is discussed at § 32.1.2.4 n.79.

\(\text{§ 28.4 \ Congressional Power To Enforce the 15th Amendment}\)

Soon after the 15th Amendment was ratified, Congress provided in the Enforcement Act of 1870 some statutory protection to enforce the 15th Amendment's provisions regarding banning the denial of voting rights on account of race. This Act was an attempt to regulate the violence and intimidation by the Ku Klux Klan regarding voting by blacks in 1868 and 1870. As discussed at § 28.1 nn. 4, 12, this congressional attempt to enforce the 15th Amendment's voting provisions in the face of Ku Klux Klan activity were substantially frustrated at the time. Most of the Act’s provisions were repealed in 1894.\(^{60}\)

Following this period, Congress did little to enforce the provisions of the 15th Amendment banning race discrimination in voting until the instrumentalist era. At that time, a few, modest steps were taken with the Civil Rights Act of 1957, which authorized injunctive relief against public and private interference with the right to vote on the basis of race, and the Civil Rights Act of 1960, which allowed the joinder of states as defendants and gave the federal government more control over voting in areas of systematic discrimination. Title I of the Civil Rights Act of 1964 expedited the hearing of voting cases before three-judge courts and outlawed some of the tactics used to disqualify African-Americans from voting in federal elections, such as discriminatory use of literacy tests. Despite these steps, as the Court noted in South Carolina v. Katzenbach,\(^{61}\) litigation to correct racial discrimination in voting proved ineffective due to the amount of preparation required, and the

\(^{59}\) 441 F.3d 96, 105-07 (2nd Cir. 2006).

\(^{61}\) Id. at 310-14.
opportunities for voting officials to delay the proceedings. Even when litigation on these issues succeeded, some states would change to other discriminatory methods not covered by the federal decrees, or in the alternative, local officials would defy or evade the court orders. Other tactics included the closing of registration offices to freeze the voting rolls.

In 1965, the Voting Rights Act of 1965 created several devices to remedy race discrimination in voting and to prevent its reoccurrence, among them preclearance of changes respecting voting in states that had been found guilty of race discrimination in voting practices. In South Carolina v. Katzenbach, 62 the Court upheld this law as appropriate under § 2 of the 15th Amendment, including its ban on literacy tests and a requirement that new voting rules need preclearance and must lack both discriminatory purpose and effect. The Court did not overrule Lassiter v. Northampton County Board, discussed at § 28.1 n.13, which had held in 1959 that a literacy test fair on its face and not used in a discriminatory fashion was constitutional. Instead, the Court said that, despite Lassiter, congressional enforcement can bar state action that perpetuates the effects of past discrimination, even if that action has not been held by the Court to violate the Constitution.

At the same time the Court was also finding greater congressional power to enforce the provisions of the 13th Amendment in Jones v. Alfred H. Mayer Co., discussed at § 28.2 nn.20-25, and the 14th Amendment in Katzenbach v. Morgan, discussed at § 28.3 nn.31-35. In general, these broader views on Congress' enforcement power under the 13th, 14th & 15th Amendments are based on a desire to further policies underlying the Civil War Amendments, i.e., protection of individual rights from state deprivations. Narrower views on Congress' power, more acceptable to non-instrumentalist Justices, give greater weight to concerns regarding the separation of power (that the Court and not Congress ought to decide what the Constitution means), federalism (that local autonomy ought to be respected), and judicial restraint (remedies should be tailored to violations).

For example, in 1980 in City of Rome v. United States, 63 a 6-3 Court upheld application of preclearance provisions and denied bail-out to a city that sought to create several at-large districts although it had not, for at least 17 years, engaged in voter discrimination. Justice Marshall said that when exercising authority under § 2 of the 15th Amendment, as when acting under the Necessary and Proper Clause, Congress can do whatever tends to enforce submission to the prohibitions they contain. Thus, Congress may prohibit state action which, though not itself a violation of the 15th Amendment, perpetuates the effects of prior discrimination in voting or, in jurisdictions which have intentionally discriminated, creates a risk of purposeful discrimination in the future.

Justice Powell, dissenting, said that Congress could abridge the voting rights of citizens only if remedying violations of voting rights. Since the city of Rome had not violated any voting rights, Congress had no authority to continue preclearance requirements until the entire state satisfied bailout standards. Justice Rehnquist, dissenting with Justice Stewart, would have narrowed Morgan

62 Id. at 323-37.

63 446 U.S. 156, 174-78 (1980).
even further. Justice Rehnquist said that Congress can act remedially only to enforce judicially established substantive prohibitions. Here, however, the congressional bar to local action could not genuinely be characterized as a remedial exercise because the proposed electoral changes, unlike literacy bans, do not have a disparate effect traceable to discrimination by government bodies.  

Not surprisingly, as with the cases involving Congress’ enforcement power under the 14th Amendment, discussed at § 28.3 nn.36-59, the line of cases under the 15th Amendment giving Congress broader power to “enforce” have also been cut back in the modern natural law era. For example, recent Supreme Court cases dealing with redistricting have cut back on the instrumentalist-era interpretation of the 15th Amendment. As with the 14th Amendment, where a majority of the Justices have responded to fundamental separation of powers concerns, the Court has reasserted its primary role in determining constitutional violations. It now seems unwilling to allow Congress, through the Voting Rights Act, to determine the constitutional limits of discrimination or affirmative action with respect to voting rights. These cases, which involve whether congressionally mandated redistricting under the Voting Rights Act has violated or threatened to violate the Equal Protection Clause by being based predominantly on racial considerations, are discussed at § 26.2.1.5.

On the other hand, five Justices have been willing to conclude that where the Voting Rights Act is constitutional, as for remedying cases of race discrimination in voting rights by certain states in the past, complying with the Voting Rights Act is a compelling government interest that can be used to justify a race-based affirmation action remedy, which is tested under a strict scrutiny approach.

A new front regarding voting rights is a movement in some states to require some form of voter identification cards for all persons to be eligible to vote. While typically phrased as a concern with preventing fraud in voting, the practical application of such a requirement may be to depress voting turnout by poor or minority voters, the latter concern raising clear 14th and 15th Amendment issues.

---

64 Id. at 196-200 (Powell, J., dissenting); id. at 209-21 (Rehnquist, J., joined by Stewart, J., dissenting).

66 See Bush v. Vera, 517 U.S. 952, 990-95 (1996) (O’Connor, J., concurring); id. at 1004-05 (Stevens, J., joined by Ginsburg & Breyer, JJ., dissenting); id. at 1065 (Souter, J., joined by Ginsburg & Breyer, JJ., dissenting).

The First Amendment to the Constitution provides: “Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.” This text encompasses three basic protections.

One protection involves the “freedom of speech, or of the press.” The basic doctrine regarding free speech is discussed in Chapter 29. In these cases, the Court applies a different level of scrutiny depending upon whether the speech being regulated: (1) occurs in (a) a public forum or (b) a non-public forum; and (2) whether the regulation is (a) a content-based regulation of speech, focusing on (i) the viewpoint of the speech or (ii) the subject-matter or topic of the speech, or (b) a content-neutral regulation of speech based upon the (i) the secondary effects of the speech or (ii) a concern with only the time, place, or manner of the speech. In a public forum, content-based regulations of speech trigger strict scrutiny, while content-neutral regulations trigger intermediate review. In a non-public forum, viewpoint regulations of speech trigger strict scrutiny, while content-based regulations of subject-matter and content-neutral regulations trigger only minimum rational review.

A number of special categories of speech get their own kind of First Amendment review that is less than standard First Amendment protection. These categories are discussed in Chapter 30. In some of these cases, like for speech advocating unlawful conduct, or for fighting words, obscenity, or indecency involving children, the speech receives no First Amendment protection, except for the prescription of viewpoint discrimination that always triggers strict scrutiny review, as discussed at § 29.4.3.1. For other kinds of speech, like defamatory speech or governmental regulation of the speech of government employees on matters of public concern, a version of heightened rational review is applied. For regulations of broadcast television or radio, or regulations of commercial speech, a version of intermediate scrutiny is applied. In campaign finance cases or speech regulating the choice and election of candidates, a version of strict scrutiny is typically applied.

A second protection of the First Amendment involves the right “to assemble” and “petition the Government for a redress of grievances,” which has been held include a “freedom of association.” These cases involve application of strict scrutiny to substantial burdens on these rights, with less than substantial burdens triggering a version of rational review, as discussed in Chapter 31.

The third protection of the First Amendment involves two clauses dealing with religion: the Establishment Clause and the Free Exercise Clause. These two clauses are discussed in Chapter 32. Under the Establishment Clause, four different tests have been used to determine an “establishment of religion.” They are: (1) whether the government action has as its purpose to advance religion, or a principal or primary effect to advance religion, or creates an excessive entanglement between church and state, the so-called Lemon test; (2) whether an objective observer would think the government action was an endorsement of religion; (3) whether the government action is coercing or proselytizing religion; or (4) whether the government action is an unreasonable accommodation of religion given our Nation’s history and traditions. Under the Free Exercise Clause, government action discriminating against religion triggers strict scrutiny. Non-discriminatory, neutral government regulations burdening religious practices trigger only minimum rational review.
CHAPTER 29: FREEDOM OF SPEECH AND OF THE PRESS

As with the other constitutional doctrines discussed in this book, the First Amendment doctrine regarding “freedom of speech, or of the press,” has undergone a number of transformations in our Nation’s history. In each of these eras, however, the standards of review regarding “freedom of speech” and “of the press” have been the same. Thus, the term “freedom of speech” will be used in this book to encompass the judicial standards relating to both clauses of the First Amendment.

Some general observations about the nature of free speech doctrine prior to the modern era appear at § 29.1. An introduction to free speech doctrine as it exists today appears at § 29.2. Next, detailed discussion of modern free speech doctrine appears at §§ 29.3-29.6. At the end of this discussion, specific examples of cases involving the freedom of the press, as one kind of free speech case, appear at §§ 29.6.2.4-29.6.2.5. As noted in the introduction to Sub-Part Four, cases involving exceptions to modern free speech doctrine for categories of speech that get their own kind of First Amendment review, less than standard First Amendment protection, are discussed in Chapter 30.

§ 29.1 Observations About First Amendment Doctrine Prior to the Modern Era

§ 29.1.1 The Original Natural Law Era

In the original natural law era there were no major Supreme Court decisions granting protection to the freedom of speech. The issue regarding freedom of speech was raised, however, with the passage in 1798 of the Alien and Sedition Acts. Among other things, the Sedition Act criminalized certain forms of politically partisan speech, which the Act termed “sedition.” Compared with existing English law the Act was progressive, in that it did make “truth” a defense to the Act, which was not true of the English sedition laws of the time.1 The notion that truth should be a defense to criminal libel was reflected in colonial attitudes, such as the famous libel trial of John Peter Zenger in 1735 for publishing criticisms of the Governor of New York. In that case, Zenger’s defense counsel, Andrew Hamilton, argued to the jury that they had the power to determine both law and facts, resulting in Zenger’s acquittal based upon jury nullification of the English law where truth was not a defense.2

During the campaign of 1800, a number of Jefferson partisans were arrested under the Act, and Jefferson and his allies used the passage and enforcement of the Act to brand President Adams and his administration as hostile to the rights of free speech. After Jefferson’s election in 1800, the Alien and Sedition Acts were repealed, in part because of the understanding of Jefferson and his supporters that the Act constituted an infringement on the rights of free speech, even though truth was a defense

---

1 England did not establish a defense of truth until 1843. See Robert Nowak & Ronald Rotunda, Constitutional Law 1145 n.3 (7th ed. 2004).

2 See generally Michael J. Saks, Judicial Nullification, 68 Ind. L.J. 1281, 1284-89 (1993). The role of juries in determining law, as well as facts, in colonial and post-revolutionary America, a power lost in theory during the first half of the 19th century, but still occasionally done in practice, particularly jury nullification in criminal trials, is discussed at § 21.2.4.4.
under the Act. As the Supreme Court noted many years later in *New York Times Co. v. Sullivan*:

Although the Sedition Act was never tested in this Court, the attack upon its validity has carried the day in the court of history. Fines levied in its prosecution were repaid by Act of Congress on the ground that it was unconstitutional. . . . Calhoun, reporting to the Senate on February 4, 1836, assumed that its invalidity was a matter “which no one now doubts.” . . . Jefferson, as President, pardoned those who had been convicted and sentenced under the Act. . . . The invalidity of the Act has also been assumed by Justices of this Court. . . . These views reflect a broad consensus that the Act, because of the restraint it imposed upon criticism of government and public officials, was inconsistent with the First Amendment.3

§ 29.1.2 The Formalist Era

Despite this general understanding of the First Amendment during the original natural law era, the first “freedom of speech” cases of the formalist era downplayed this legislative and executive practice surrounding the Alien and Sedition Acts. Instead, following the formalist predisposition toward literal interpretation, the cases concluded that the First Amendment was directed primarily at the literal meaning of “free” speech, that is, the right to speak freely and not be limited by prior restraints.

For example, in *Patterson v. Colorado*,4 a 1907 case, the Court focused on literal text, as well as 18th century historical sources specifically addressing the freedom of speech, such as Blackstone, to conclude that protection against prior restraints was the full extent of the Free Speech Clause of the First Amendment. Leaving undecided whether the 14th Amendment Due Process Clause incorporated the First Amendment, thus making it applicable against the states, Justice Holmes wrote for the Court in *Patterson* that such incorporation would make no difference in the power of a state trial court to impose punishment for contempt on a publisher who had questioned the judge’s reasoning in a pending case, so long as the judge’s determination that the statements tended to obstruct the administration of justice was not an arbitrary pretense or an arbitrary punishment.5 Justifying that conclusion, Justice Holmes began by saying, “In the first place, the main purpose of such constitutional provisions is ‘to prevent all such previous restraints upon publications as had been practiced by other governments,’ and they do not prevent the subsequent punishment of such as may be deemed contrary to the public welfare.”6

Even in applying this doctrine, the initial formalist-era cases gave First Amendment protection against prior restraints a limited reading. For example, the first Supreme Court case dealing with government power to regulate speech on public grounds was *Davis v. Commonwealth of*

---

4 205 U.S. 454 (1907).

5 *Id.* at 461-62.

6 *Id.* at 462.
Massachusetts,\textsuperscript{7} decided in 1897. The Court held that forbidding speech absolutely, or on condition of obtaining a license, was no more an infringement of the rights of a member of the public “than for the owner of a private house to forbid it in his house.”\textsuperscript{8} Thus, the Davis Court refused to strike down a permit requirement for speaking on a highway or public park. Further, the Court in Davis was unconcerned that the law imposed a prior restraint in terms that gave the mayor unbounded discretion to grant or deny applications.

Between 1909 and 1917, various social groups, and most prominently unions, and in particular the International Workers of the World, the Wobblies, pressed for greater free speech rights than mere limitation on prior restraints. As noted by Professor Bradley Bobertz:

In this turbulent atmosphere, efforts to understand the meaning and function of free speech took on greater urgency. The proceedings of the U.S. Commission on Industrial Relations provide one illuminating source of discussion about free speech. . . . The hearings of the Commission, published in eleven volumes in 1916, contain tens of thousands of pages of testimony from an extraordinarily wide range of witnesses, including Clarence Darrow, Louis Brandeis, Mother Jones, Theodore Schroeder, William "Big Bill" Haywood, scores of ordinary workers, and the celebrated icons of capitalism, including Daniel Guggenheim, George Walbridge Perkins (of U.S. Steel), Henry Ford, and Andrew Carnegie. . . .

One witness above all others impressed the Commission with his approach to controlling protests. Arthur Woods, a longtime friend of Theodore Roosevelt, had taken over as New York City Police Commissioner in April 1914, following weeks of violent confrontations between police and protesters. Shortly before Woods took office, more than a thousand protesters had clashed with police after a march up Fifth Avenue, during which several innocent bystanders were injured. Woods testified that, immediately upon taking office, he "quite changed the policy, the methods, and the orders given to the police" in dealing with protesters. Anticipating another large meeting in Union Square the next Saturday, Woods ordered the police "to afford to the assemblage its full rights; [and] to interfere only if the traffic was seriously impeded, and if incitement to immediate violence was present." As a result of the new hands-off policy, the demonstration did not lead to bloodshed and the police made no arrests. . . .

In the Commission's final report to Congress, it praised Woods's methods for dealing with public dissent and criticized those of other police authorities. "One of the greatest sources of social unrest and bitterness has been the attitude of the police toward public speaking," the Commission reported. Public officials commonly reacted to radical speech by attempting to suppress it. "There could be no greater error" than using force in this manner, the Commission concluded, not only because it clashed with the principles of a democratic society, but also because it was ultimately self-defeating. As the Commission expressed this idea, "it is the lesson of history that attempts to suppress ideas [result] only in their more rapid propagation." In short, the Commission concluded that authorities could restrain radical action more easily

\begin{flushleft}
\textsuperscript{7} 167 U.S. 43 (1897).
\textsuperscript{8} Id. at 47.
\end{flushleft}
by allowing free speech.

The idea that suppression of radical speech tended to intensify popular dissent continued to receive attention in the years leading up to America's entry into the European war. As much as any other person, Arthur Woods was a national "expert" on the subject. But Woods's tolerant approach to dissent was by no means the dominant one in the mid-1910s. The specter of an increasingly fanatical left gathering strength under the banner of "free speech" prompted many to argue that a firm hand should silence radical views for the sake of domestic security. This attitude manifested itself with special force against European immigrants, who were disparagingly but commonly referred to as "hyphenated Americans." In his annual address to Congress in 1915, President Woodrow Wilson warned that there were some immigrants "born under other flags but welcomed under our generous naturalization laws to the full freedom and opportunity of America, who have poured the poison of disloyalty into the very arteries of our national life." "Such creatures of passion, disloyalty, and anarchy," Wilson declared, "must be crushed out."

America's entry into the European conflict in April 1917 further inflamed these nativistic impulses.9

By 1919, the formalist Court reflected this mix of social attitudes by granting greater protection to freedom of speech than a mere concern with prior restraints, but adopting a limited doctrine deferential to government attempts to deal with perceived threats to national security. In 1919, the formalist Court invented the clear and present danger test in *Schenck v. United States*.10 In the first of a series of cases in which defendants were prosecuted for having advocated unlawful actions, Justice Holmes wrote for a unanimous Court that upheld a federal conviction for publications intended to encourage draft evasion. Holmes admitted that in ordinary times the defendant could have said all that was said in his circular, but he added that the character of every act depends upon the circumstances. At this time, the Nation was at war. Justice Holmes said:

> The question in every case is whether the words used are used in such circumstances and are of such a nature as to create a clear and present danger that they will bring about the substantive evils that Congress has a right to prevent. It is a question of proximity and degree. When a nation is at war many things that might be said in time of peace are such a hindrance to its effort that their utterance would not be endured so long as men fight and that no Court could regard them as protected by any constitutional right.11

---

10 249 U.S. 47 (1919).

11 Id. at 52.
Justice Holmes and Brandeis first moved away from the majority later that year in Abrams v. United States,12 where the Court affirmed a conviction for publishing an attempt to defeat the war plans of the United States. Justice Holmes, dissenting, joined by Justice Brandeis, said that the expression of opinions we loath should not be checked unless there is an emergency because they imminently threaten immediate interference with the law. Turning to the facts, he added that the publication in question was intended to stop American intervention in Russia, rather than to impede a war.13 This opinion reflected an evolution in Holmes’ thinking about free speech from his more restrictive interpretation in Schenck to his broader view in Abrams, a change typically attributed to Holmes’ interactions in the intervening months with Justice Louis Brandies, Judge Learned Hand, and Harvard Law School Professor Zechariah Chafee, including Holmes’ rejection of Blackstone’s views as an authoritative account of the Framers’ intent regarding free speech.14 Turning to considering the purpose behind the free speech clause, Holmes observed:

When man have realized that time has upset many fighting faiths, they may come to believe even more than they believe the very foundations of their own conduct that the ultimate good desired is better reached by free trade in ideas – that the best test of truth is the power of the thought to get itself accepted in the competition of the market, and that truth is the only ground upon which their wishes safely can be carried out.15

The classic statements of this view appear in 17th century John Milton’s Areopagitica, wherein it is stated, “let her [truth] and falsehood grapple; whoever knew truth put to the worse in a free and open encounter,” and in 19th century philosopher John Stuart Mill’s On Liberty, wherein it is stated, “[If] any opinion is compelled to silence, that opinion for aught we can certainly know, be true. To deny this is to assume our own infallibility.” Of course, reflecting the concrete limitation of his thinking in the 17th century, like the concrete limitations of the framing and ratifying generation on issues such as slavery and women’s rights, discussed at § 15.4.1 nn.51-56, Milton was not prepared to grant free speech rights for “popery, open superstition, impiety, or evil.”16

In Gitlow v. People of New York,17 the Court “assumed” for the first time, and it has continued to hold ever since, that the rights of free speech protected by the First Amendment are part of the fundamental personal rights and liberties protected by the Due Process Clause of the 14th Amendment from impairment by the states. However, the majority applied only rational basis

scrutiny in upholding New York’s criminal anarchy statute because the legislature had reasonably
decided that there was a danger in advocating overthrow of the government by force and violence.
Justices Holmes and Brandeis dissented, saying that the clear and present danger test should be
applied in all cases and it was manifest that there was no present danger of an attempt to overthrow
the government in sixteen thousand copies of a “Manifesto” published in a magazine entitled “The
Revolutionary Age,” there being no evidence of any “present conflagration” resulting from the
publication and circulation of the Manifesto. The majority responded by saying that a single
revolutionary spark may kindle a fire that may sweep into a destructive conflagration.

The debate on the Court continued in Whitney v. California,\textsuperscript{18} decided in 1927. The majority
affirmed a conviction for organizing a group dedicated to teaching and abetting criminal
syndicalism. The majority said that the power to punish such behavior was beyond question, once
the state legislature had made a determination that it created a danger to the public peace. Justice
Brandeis, joined by Holmes, said that the Court should set a standard for determining when a danger
should be deemed clear, and added that there should be a reasonable ground to fear that a serious
evil is imminent and would occur if free speech is practiced. Although Brandeis and Holmes thus
disagreed with the reasoning of the majority, they concurred because the defendant, Charlotte Anita
Whitney, had not contended that there was no clear and present danger.\textsuperscript{19}

In his concurrence, Justice Brandeis grounded free speech doctrine even more explicitly than
Holmes in a concern with ensuring robust political debate. This reflects the Holmesian position
of deference to a well-functioning government, but Court scrutiny to ensure a well-functioning
democratic process, a position made popular later by John Hart Ely, as discussed at § 10.2.1.2 n.18.
Justice Brandeis stated in Whitney:

Those who won our independence believed that the final end of the state was to make men free
to develop their faculties, and that in its government the deliberative forces should prevail over
the arbitrary. They valued liberty both as an end and as a means. They believed liberty to be
the secret of happiness and courage to be the secret of liberty. They believed that freedom to
think as you will and to speak as you think are means indispensable to the discovery and spread
of political truth; that without free speech and assembly discussion would be futile; that with
them, discussion affords ordinarily adequate protection against the dissemination of noxious
document; that the greatest menace to freedom is an inert people; that public discussion is a
political duty; and that this should be a fundamental principle of the American government.\textsuperscript{20}

The most elaborate theory to ground free speech doctrine in this concern with political speech and
protecting the “democratic process” is that advanced by Alexander Meiklejohn.\textsuperscript{21} This theory also
supports a view that a “central value of free press, speech, and assembly lies in checking the abuse

\textsuperscript{18} 274 U.S. 357 (1927).

\textsuperscript{19} Id. at 379-80 (Brandeis, J., joined by Holmes, J., concurring).

\textsuperscript{20} Id. at 375.

\textsuperscript{21} Alexander Meiklejohn, Free Speech and Its Relation to Self-Government (1948).
of power by government officials.”

Brandeis also noted a third reason for protection of free speech. Reflecting the views of the 1916 Commission on Industrial Relations, Brandeis observed:

order cannot be secured merely through fear of punishment for its infraction; that it is hazardous to discourage thought, hope and imagination; that fear breeds repression; that repression breeds hate; that hate menaces stable government; that the path of safety lies in the opportunity to discuss freely supposed grievances and proposed remedies; and that the fitting remedy for evil counsels is good ones. . . . Compare Thomas Jefferson: “We have nothing to fear from the demoralizing reasonings of some, if others are left free to demonstrate their errors and especially when the law stands ready to punish the first criminal act produced by the false reasonings; these are safer corrections than the conscience of the judge.” Quoted by Charles A. Beard, The Nation, July 7, 1926, Vol. 123, P. 8.

The upshot of this series of cases is that a majority of the Court during the formalist era allowed both state and federal governments great freedom to rein in speech and association. At the same time, the Court was confining federal power by a narrow interpretation of the Commerce Clause, discussed at § 18.2.2, and a broad interpretation of Substantive Due Process to include liberty of contract, discussed at § 27.3.2.1. In addition, the Court was confining state regulatory power by use of the Dormant Commerce Clause doctrine, discussed at § 20.3.2, and the broad interpretation of Substantive Due Process, discussed at § 27.3.2.1. Freedom of speech was thus given far less weight by the conservative formalist Court than implementing what was thought to be fundamental economic principles, i.e., that prosperity results from freedom to contract in the market, with federal and state governments having their own independent, but limited, spheres of regulation. Of course, Holmes disagreed that this theory was hard-wired into the Constitution. Dissenting in *Lochner v. New York*, Holmes stated, “The Constitution is not intended to embody a particular economic theory, whether of paternalism and the organic relation of the citizen to the state or of *laissez faire*.”

§ 29.1.3  The Holmesian Era

When the Court in 1937 began to repudiate its previous holdings on Substantive Due Process, discussed at § 27.3.3, and the Commerce Clause, discussed at § 18.2.3, it also began to revisit its previous perspectives on the importance of free speech. For example, in 1937, a unanimous Court reversed a conviction under Oregon’s criminal syndicalism law in *DeJonge v. Oregon* where the charge was that the defendant had assisted in the conduct of a public meeting held under auspices of the Communist Party. Describing what was protected by the First Amendment, Chief Justice

23  *Whitney*, 274 U.S. at 375 & n.3.

24  198 U.S. 45, 75 (1905) (Holmes, J., dissenting).

Hughes wrote that “the right is one that cannot be denied without violating those fundamental principles of liberty and justice which lie at the base of all civil and political institutions – principles which the Fourteenth Amendment embodies in the general terms of its due process clause.”

A change in determining the power of government as property owner began in 1939 with *Hague v. Committee for Industrial Organization.*26 The Court there held that the right of individual citizens to use city streets and parks for communication of views on national questions is part of the privileges and immunities of citizens of the United States that are protected by the Privileges or Immunities Clause of the 14th Amendment. The Court held that an ordinance requiring a permit to use city streets and parks for these purposes was void on its face. The reason was that “wherever the title of streets and parks may rest, they have immemorially been held in trust for the use of the public and, time out of mind, have been used for purposes of assembly, communicating thoughts between citizens, and discussing public questions.” Justice Stone, concurring, would have placed the decision on the Due Process Clause of the 14th Amendment, so that the relevant rights would be those of all persons and not just citizens.27 Subsequent cases have adopted this viewpoint.

Shortly after *Hague*, the Court decided *Schneider v. State.*28 In *Schneider*, the Court moderated the 1897 holding in *Davis v. Commonwealth* by requiring sufficient justification for barring speech in traditional public forums, such as streets and parks. Speech regulations applicable to a non-public forum, whether content-based or content-neutral, were given a form of rational basis scrutiny, i.e., they must be reasonable, and they may not involve viewpoint discrimination. Thus, the *Davis* form of discretion was no longer allowed. Specifically, the Court held that four ordinances were invalid on their face that did not allow any person to distribute a handbill or advertisement to pedestrians on the street or on their cars, or to circulate any handbill on any sidewalk, wharf, boat landing, or dock. The courts below had held that the motive of the legislature was to prevent littering on the streets. The Court replied that "the purpose to keep the streets clean and of good appearance is insufficient to justify an ordinance which prohibits a person rightfully on a public street from handing literature to one willing to receive it." This was so even if the persons who receive the literature throw it on the street. The Court suggested that cities could punish those who actually throw papers on the street. The case suggested that whenever the government seeks to bar speech on government-owned public property it must bear the burden of justifying what it has done.

The impact on the Court of Justice Holmes and Brandeis’ ideas was most apparent in the 1941 case of *Bridges v. California.*29 Justice Black there wrote for the Court, “What finally emerges from the ‘clear and present’ danger cases is a working principle that the substantive evil must be extremely serious and the degree of imminence extremely high before utterances can be punished.” Applying this principle, the Court reversed a conviction for contempt of court where the defendants had published opinions about a pending case that arguably had a reasonable tendency to interfere with

26 307 U.S. 496, 515 (1939).

27 *Id.* at 527-29 (Stone, J., concurring in the judgment).

29 314 U.S. 252, 263, 278 (1941).
the orderly administration of justice. The facts were that the Los Angeles Times had written that
the judge in a pending case would be making a serious mistake if he granted probation to the
defendants. Harry Bridges, another defendant, had sent a telegram, while a motion for a new trial
was pending, in which Bridges said that enforcement of the judge’s decision would tie up the Pacific
Coast with strikes. Justice Black said that the judge would have already been aware of these
possibilities. If he was not intimidated by the facts themselves, the most explicit statement of them
could not have sidetracked the course of justice. Justice Black said that this was not enough to
justify a restriction of free expression, although he also said that to speak of such a “reasonable
tendency” was an exaggeration in describing the facts of this case.

In 1951, the case of Kunz v. New York\(^30\) held that a content-based law could not grant discretionary
power to withhold a permit to speak on the streets and sidewalks. The Court there invalidated on
its face a New York ordinance that made it unlawful to hold public worship proceedings on the
streets without first obtaining a permit, there being no mention in the ordinance of reasons for which
such a permit application could be refused. Chief Justice Vinson explained that an ordinance which
gives an administrative official discretionary power to control in advance the right of citizens to
speak on the streets of New York, without appropriate standards to guide his action, is
unconstitutional on its face as a prior restraint on the exercise of First Amendment rights. The Chief
Justice did not state any criteria regarding what standards in the ordinance might have made it valid.
Nor did he refer to whether the law should be considered content-based or content-neutral.

Justice Jackson, dissenting, sought to preserve part of the older perspective found in Davis. He
began by stating that the applicant was turned down for the reason that there was no assurance that
he wanted the permit for uses different from what he had done under a previous permit, \(i.e.,\) to make
scurrilous attacks on Catholics and Jews. In his second point, Jackson distinguished the situation
from one in which Kunz wanted to speak in his own pulpit or hall. On the streets, people become,
in a sense, a captive audience, and there is a genuine likelihood that someone will get hurt when
Kunz makes his insults, such as suggesting that all Jews should have been burned in Nazi
incinerasors. Third, Justice Jackson thought that the Court should have considered all the facts in
the case, as did the New York courts, which said that a permit need not be issued when the applicant
claims a constitutional right to incite riots. He added that it was hypocritical for the Court to strike
down a local law on its face for want of standards when the Court itself had no standards. He said
that "the vulnerability of various forms of communication to community control must be
proportioned to their impact upon other community interests."\(^31\)

The Court has never adopted the perspective evidenced in Justice Jackson’s dissent except insofar
as he expressed a concern about not allowing a speaker to incite a riot. The same day Kunz was
decided, the Court held in Feiner v. New York\(^32\) that a speaker had been constitutionally convicted
of disorderly conduct where his speech had created what the majority considered to be an imminence

\(^{30}\) 340 U.S. 290 (1951). A similar case decided the same day was Niemotko v. Maryland, 340
U.S. 268 (1951).

\(^{31}\) Id. at 307-08 (Jackson, J., dissenting).

of disorder, and where he had defied police officers who requested that he stop speaking in order to avoid what Chief Justice Vinson said was “incitement to riot.” To show an imminence of disorder, the Court emphasized that the crowd was restless; there was some pushing, shoving, and milling around; and at least one person threatened violence if the police did not act. Here, the Court said, the speaker had passed the bounds of argument and was undertaking an incitement to riot.

Apparently from concern that content-based regulations might be held to trigger higher than rational basis review, the city contended that there was no intent here to suppress speech because of its content. Instead, the city said that its purposes were to prevent a breach of the peace and prevent injury to pedestrians. Agreeing, the lower courts had found that the arrests were motivated solely by a proper concern for the preservation of order and the protection of the general welfare. The Chief Justice said that these findings were supported by the record and he added that there was no evidence that the police actions were a cover for suppression of petitioner's views and opinions. Petitioner had been arrested for the reaction generated by his speech. Again, the Court did not state any general standards of review for dealing with content-based regulations of speech by government, either as sovereign or as the owner of property.33

Justice Black, dissenting, said the evidence did not show any imminence of riot or uncontrollable disorder. Here there was only the normal behavior of an outdoor crowd. The man who mentioned violence was accompanied by a wife and two children and was never close enough to carry out the threat. If the police can ever interfere with a lawful public speaker to preserve order, they first must make all reasonable efforts to protect the speaker. Justice Black said it was unfortunate that the three cases being decided that day – Kunz, Niemotko, and Feiner – meant when read together that while previous restraints probably cannot be imposed on an unpopular speaker, the police have discretion to silence him as soon as the customary hostility to his views develop. Justices Douglas and Minton also dissented in Feiner on the ground that when “unpopular causes are sponsored from the public platform, there will commonly be mutterings and unrest and heckling from the crowd. When a speaker mounts a platform it is not unusual to find him resorting to exaggeration, to vilification of ideas and men, to the making of false charges. But those extravagances . . . do not justify penalizing the speaker by depriving him of the platform or by punishing him for his conduct.”34

Despite the nation-wide concern with communism that swept through the country in the early 1950s,35 Justices Black and Douglas did not retreat from the views they expressed in Bridges and Feiner. However, a majority of the Court was unwilling to give a similar unqualified endorsement to vigorous application of the “clear and present danger” test when deciding Dennis v. United States.36 In that case the Court upheld an application of the Smith Act which made it unlawful

33  Id. at 317-21.

34  Id. at 328-29 (Black, J., dissenting); id. at 331 (Douglas, J., joined by Minton, J., dissenting).

36  341 U.S. 494, 510 (1951), citing United States v. Dennis, 183 F.2d 201, 212 (2d Cir. 1950) (Hand, C.J., opinion).
knowingly or wilfully to advocate destroying any government in the United States by force or violence. The plurality opinion of Chief Justice Vinson, joined by Justices Reed, Burton, and Minton, said that the situation with which Justices Brandeis and Holmes were concerned in *Gitlow* was a comparatively isolated event. Here, however, the government was dealing with a highly organized conspiracy, with rigidly disciplined members subject to call when leaders felt the time was ripe, all in the context of world crisis after crises. For that situation the plurality accepted the interpretation of clear and present danger adopted in the court below by Chief Judge Learned Hand, namely, “In each case [courts] must ask whether the gravity of the ‘evil,’ discounted by its improbability, justifies such invasion of free speech as is necessary to avoid the danger.” It should be noted that while Judge Hand’s views on criminal libel and free speech were relatively progressive back in 1917, when he first applied this balancing test in *Masses Pub. Co. v. Patten*, they had become timid by 1950.

Although this was a watered-down version of the clear and present danger test, the plurality agreed with Holmes’ position in *Gitlow* that the test must be applied by courts in every First Amendment case. In terms of who decides if a “clear and present danger” exists, the plurality noted, “The doctrine that there must be a clear and present danger of a substantive evil that Congress has a right to prevent is a judicial rule to be applied as a matter of law by the Courts.” Justices Black and Douglas disagreed with this view in dissent, stating that the question should be one for a jury.

Concurring in *Dennis*, Justice Jackson said that he would save the clear and present danger test, unmodified, for application as a “rule of reason” in the kind of case for which it was devised, *i.e.*, street corner speech or a few incendiary pamphlets. Similarly reflecting a Holmesian deference to government view, Justice Frankfurter, concurring in the judgment, noted, “Primary responsibility for adjusting the interests which compete in the situation before us of necessity belongs to the Congress.” This issue was not revisited during the Holmesian era.

### § 29.1.4 The Instrumentalist Era

The instrumentalist Court dramatically changed the legal landscape regarding the freedom of speech. As in other areas, such as Due Process and Equal Protection, the Court from 1954 to 1986 tended to protect non-economic interests from government regulation, in this context by granting broad free speech rights, particularly to the poor and dissenters from majority orthodoxy. As phrased in 1972 in *Police Department of Chicago v. Mosley*, the instrumentalist Court went far beyond the clear and present danger test, and stated, “[A]bove all else, the First Amendment means that government has no power to restrict expression because of its message, its ideas, its subject matter, or its

40 408 U.S. 92, 95 (1972).
content.” As phrased in 1984 in Regan v. Time, Inc., 41 “Regulations which permit the Government to discriminate on the basis of content of the message cannot be tolerated under the First Amendment.”

During this era, Justice Black came to embrace a categorical view of the freedom of speech. Moving beyond a vigorous use of the Holmesian clear and present danger test that he had applied in the 1940s and 1950s, liberal formalist Justice Black came to embrace a liberal formalist view. This view is much more protective of free speech than the conservative formalist view of the formalist era, which was based on a literal reading of Blackstone, with a limited exception for speech that was not a “clear and present danger.” Justice Black concluded that the literal text of the First Amendment, which provides that “Congress shall make no law abridging the freedom of speech,” should be read as an absolute protection for freedom of speech to which no balancing of interests should be applied. As stated by Justice Black in 1961 in Konigsberg v. State Bar of California, 42 in a dissent joined by Chief Justice Warren and Justice Douglas, “[T]he First Amendment’s unequivocal command that there shall be no abridgement of the rights of free speech and assembly shows that the men who drafted our Bill of Rights did all the ‘balancing’ that was to be done in this field.”

In contrast, the position of Holmesian Justice Harlan in Konigsberg, which has commanded a majority of Holmesian, natural law, and instrumentalist Justices on the Supreme Court in the modern era, is that the First Amendment always calls for a balancing test – the differences among the Justices relating to which balancing test should be applied in different circumstances. As Justice Harlan stated for the majority in Konigsberg, “[W]e reject the view that the freedom of speech and association, as protected by the First and Fourteenth Amendments, are ‘absolute.’” 43 Among other cases, Justice Harlan cited Schenck v. United States, 44 where Justice Holmes, for the Court, had noted that “the most stringent protection of free speech would not protect a man in falsely shouting fire in a theatre and causing a panic.” Rejecting the absolutist approach of Justice Black, modern First Amendment doctrine has borrowed the Equal Protection and Substantive Due Process standards of review of strict scrutiny, intermediate scrutiny, and rational review to determine in individual cases whether or not a government regulation violates the freedom of speech.

In applying these balancing tests, instrumentalist jurists have noted three additional reasons to support a vigorous First Amendment doctrine, in addition to the Commission on Industrial Relations’ view that radical action is best restrained by granting free speech, discussed at § 29.1.2 nn.9 & 23; the “marketplace of ideas” metaphor of Holmes in Abrams, discussed at § 29.1.2 nn.15-16; and the advancement of political democracy reason of Brandeis in Whitney, discussed at § 29.1.2

43 Id. at 49-51.

§ 29.2  Introduction to the Structure of Free Speech Doctrine in the Modern Era

Reflecting the modern natural law predisposition to follow precedent, very few instrumentalist-era precedents regarding the First Amendment have been overturned or limited. The doctrine of the modern natural law era reflects the relatively robust protection of the instrumentalist era, embracing all six reasons in favor of protecting free speech, discussed at § 29.1.4, pages 1352-1353. Consistent with Court precedents, the Court continues to apply to same standards of review to free speech and free press cases. Consistent with the more analytic predisposition of natural law interpretation than under Holmesian or instrumentalist interpretation, noted at § 2.4 & Table 2.4, the Court has been more precise about the relevant standards of review applied in free speech cases in the modern era.

As with Equal Protection and Substantive Due Process doctrine, the preliminary decision that must be made in First Amendment cases today is what level of review to apply. In reaching this decision, the first question to ask is whether the case involves a governmental regulation of speech, in which case standard First Amendment doctrine applies, or involves either governmental regulation of conduct,49 discussed at § 29.3.1, or governmental spending on speech,50 discussed at § 29.3.2, in which case standard First Amendment doctrine does not apply.

If resolution of this first question indicates that standard First Amendment doctrine does apply, the next question to ask is whether the speech is regarded as fully protected (e.g., literary, artistic, political or scientific speech, or symbolic speech), or is regarded as not fully protected. Fully protected speech is naturally given full First Amendment protection. Symbolic speech exists where conduct is not “pure speech,” such as talking, writing, or wearing informative clothing, but is nevertheless intended to be expressive and conveys a message, as discussed at § 29.3.1 nn.71-74. Symbolic speech is given the same protection as regular fully-protected speech under the Court’s First Amendment free speech doctrine.

In the case of unprotected speech (e.g., fighting words51 or obscene speech52), or somewhat protected speech (e.g., speech regulations imposed upon government employees,53 or government regulation of commercial speech54), full First Amendment protection is not given. The First Amendment standards for speech that is fully protected are discussed at §§ 29.4-29.6. The doctrines for speech that receive less than full First Amendment protection are discussed in Chapter 30.

51 See, e.g., Cohen v. California, 403 U.S. 15 (1971), discussed at § 30.1.2 n.58.

52 See, e.g., Miller v. California, 413 U.S. 15 (1973), discussed at § 30.1.3 nn.84-94.

53 See, e.g., Pickering v. Board of Educ. of Will County, Illinois, 391 U.S. 563 (1968), discussed at § 30.2.2.1 nn.174-77.

54 See, e.g., Central Hudson Gas & Electric Corp. v. Public Service Comm’n, 447 U.S. 557 (1980), discussed at § 30.3.2 nn.228-30.
The third question asked under First Amendment review is whether the regulation of speech is content-based or content-neutral, and if content-based, whether the regulation involves viewpoint discrimination (i.e., the regulation is triggered depending on which side of a topic the individual supports), or subject-matter discrimination (i.e., the regulation is triggered if a topic or subject-matter is discussed without regard to the person’s views on that subject-matter). This issue is discussed at § 29.4.

The fourth question asked is whether the speech being regulated occurs on private property or in a public forum, or in a non-public forum owned by the government. Naturally, government attempts to regulate speech on individuals’ private property or on public forums are much more difficult to justify, and typically trigger a heightened standard of scrutiny, than government regulations on property owned by the government that is not generally open to the public. This issue is discussed at § 29.5.

In terms of standard First Amendment review today, regulations of fully protected speech that involve viewpoint discrimination are always given strict scrutiny review, no matter where the speech occurs. Similarly, strict scrutiny applies in a public forum or on private property for content-based, subject-matter regulations of speech which do not involve viewpoint discrimination. In contrast, regulations of speech in a public forum or on private property that are content-neutral are given only intermediate review. This intermediate standard was stated in *Ward v. Rock Against Racism*,\(^{55}\) where Justice Kennedy said for the Court, “Our cases make clear, however, that even in a public forum the government may impose reasonable restrictions on the time, place, or manner of protected speech, provided the restrictions ‘are justified without reference to the content of the regulated speech, that they are narrowly tailored to serve a significant governmental interest, and that they leave open ample alternative channels for communication of information.’” In a non-public forum, content-based, subject-matter regulations of speech, or content-neutral regulations of speech, are given only some version of rational review. The Court has not been clear whether this is minimum rationality review, such as under the Equal Protection Clause, as discussed at § 26.1.1.1, or 2nd-order reasonableness balancing, as discussed at § 7.2.1 text following n.42, and summarized in Table 7.2. As a lesser kind of burden on the fundamental right of free speech, it probably should be 2nd-order review, as suggested by the discussion at § 21.2.3 nn.64-73. Application of these standards to areas of First Amendment review appear at § 29.5.1, § 29.5.2, § 29.6.2.2, and § 30.2.1.2. This discussion indicates that the standard language in these cases refers to the regulation having to be “reasonable,” suggesting the 2nd-order level of rational review, rather than mere minimum rationality review.

As with the standard of review under the Equal Protection Clause and Substantive Due Process doctrine, the governmental regulation is presumptively unconstitutional for regulations that involve strict scrutiny or intermediate review, reflecting the fact that the government has the burden of justifying such regulations.\(^{56}\) Under minimum rational review or 2nd-order rational review, the challenger has the burden of proving that the regulation is unconstitutional.

Table 29.2 may help make these levels of review clearer:

<table>

Currently unclear whether this is minimum rationality review, or 2nd-order rational review, as discussed above at § 29.2 text following n.55.

Three cases provide good examples of this modern free speech doctrine in terms of the levels of scrutiny in Equal Protection and Substantive Due Process cases. In 1991, in *Simon & Schuster, Inc. v. Members of the New York State Crime Victims Board*, the Court adopted a strict scrutiny approach to content-based regulations of speech. As the Court stated in *Simon & Schuster*, to justify its “content-based” regulation of speech “the State must show that its regulation is necessary to serve a compelling state interest and is narrowly drawn to achieve that end.” Concurring in the case, Justice Kennedy noted that this adoption of the Equal Protection strict scrutiny approach in a First Amendment case was not required by prior precedents, and that while “the compelling interest inquiry has found its way into our First Amendment jurisprudence of late . . . the Court appears to have adopted this formulation in First Amendment cases by accident rather than as the result of a considered judgment.” In contrast to this approach, Justice Kennedy preferred Justice Black’s absolutist approach, which would prevent the state from any content-based regulation of fully-protected speech, without regard to a compelling governmental interest analysis. The majority of the Court has consistently rejected Justice Kennedy’s views, however, as indicated by the 2002 case of *Republican Party of Minnesota v. White*, where the other Justices on the Court applied a strict scrutiny analysis to a content-based regulation of speech, again over Justice Kennedy’s objection.

---

58 *Id.* at 124-25 (Kennedy, J., concurring).

59 536 U.S. 765, 774-75 (2002); *id.* at 793 (Kennedy, J., concurring) (“I adhere to my view, . . . that content-based speech restrictions that do not fall within any traditional exception should be invalidated without any inquiry into narrow tailoring or compelling governmental interests.”).
The use of intermediate scrutiny for content-neutral regulations of symbolic speech or reasonable time, place, or manner regulations of speech is best illustrated in the 1989 case of *Ward v. Rock Against Racism*.

Previously, in 1968 in *United States v. O'Brien*, the Court had upheld the conviction of a protestor who had violated federal law by burning his draft card on the steps of a courthouse as part of a demonstration against the Vietnam war. The crime defined by statute was destroying a draft certificate. Chief Justice Warren stated: “[A] government regulation is sufficiently justified if it is within the constitutional power of the Government; if it furthers an important or substantial governmental interest; if the governmental interest is unrelated to the suppression of free expression, and if the incidental restriction on alleged First Amendment freedoms is no greater than is essential to the furtherance of that interest.”

The *O'Brien* principle, although framed in the context of a regulation applied by the sovereign to a content-neutral regulation of symbolic speech, was extended in 1984 by *Members of the City Council of Los Angeles v. Taxpayers for Vincent* to time, place, or manner regulations. The Court upheld a Los Angeles ordinance that prohibited the posting of signs on public property. The challengers were supporters of a candidate for the City Council whose posters were removed from utility poles by city employees. To justify the ordinance, the city said the law protected its interests in beauty, the safety of workers who must climb poles, and eliminating traffic hazards. In determining the constitutionality of this restriction on speech, the Court first pointed out that the ordinance was a viewpoint-neutral regulation of a certain manner of communication. Thus, the relevant standard for review was set forth in *United States v. O'Brien*, and Justice Stevens quoted Chief Justice Warren’s words as set out above. In both these cases, however, the *O'Brien* test was not explicitly phrased as an intermediate standard of review between strict scrutiny and rational review.

In *Ward*, the Court defined the *O'Brien* test more explicitly in intermediate terms. The Court held in *Ward* that New York City did not deprive musicians of First Amendment rights by insisting that bandshell performers in Central Park use sound-amplification equipment and a sound technician provided by the city. For the Court, Justice Kennedy first held that the regulation was content-neutral because two of its justifications (controlling noise in the park and avoiding undue intrusion into residential areas) had nothing to do with content. Regarding the third, *i.e.*, the city's interest in ensuring the quality of sound at park events, the challengers argued that the city was seeking to assert artistic control. Justice Kennedy replied that the city requires its technician to defer to the wishes of event sponsors concerning sound mix, and the record indicates that the city's equipment and sound technician could meet all of the standards requested by the performers.

---

62 *Id.* at 377.

64 *Ward*, 491 U.S. at 791-96.
Having concluded that the regulation was indeed a content-neutral time, place, or manner regulation rather than a regulation of content, Justice Kennedy applied the O'Brien rule to the facts by concluding that (1) the city's interest was substantial in that inadequate sound application had an adverse effect on the audience, and (2) the city had a substantial interest in limiting the sound emanating from the bandshell. Next, Justice Kennedy held that the Court of Appeals erred in drawing on O'Brien for a least intrusive means requirement, which the Court uses at strict scrutiny, since the Supreme Court had already made clear that there is little, if any, difference between the O'Brien test and the usual rule for time, place, or manner regulations, which does not require the least intrusive means. To underscore the point he said, "A regulation of time, place, or manner of protected speech must be narrowly tailored to serve the government's legitimate content-neutral interests but it need not be the least-restrictive or least-intrusive means of doing so." Instead, the narrow tailoring requirement follows the intermediate standard of scrutiny that is satisfied if the regulation promotes a substantial government interest that would be achieved less effectively absent the regulation. Justice Kennedy added that a content-neutral regulation of speech cannot burden substantially more speech than necessary to further the interest nor can it place a substantial burden on speech by failing to leave open ample alternative channels of communication.65 It has become a commonplace observation, as stated in the 2002 case of City of Los Angeles v. Alameda Books, Inc.,66 that regulations of speech “require only intermediate scrutiny if they are content neutral.”

In applying strict scrutiny, intermediate scrutiny, or rational review in First Amendment cases, the Court considers both kinds of questions addressed under Equal Protection and Due Process cases. Thus, the Court examines under the relationship to benefits inquiry both the Equal Protection question of the extent to which the government action fails to regulate all individuals who are part of some problem (the underinclusiveness inquiry), discussed at § 26.1.1.1 nn.25-27, and the Due Process question of the way in which the government action serves to achieve its benefits on those whom the action does regulate (the service inquiry), discussed at § 27.1.2 nn.43, 45. Similarly, under the burden inquiry, the Court considers both the Equal Protection question of the extent to which the government action imposes burdens on individuals who are not intended to be regulated (the overinclusiveness inquiry), discussed at § 26.1.1.1 nn.28-31, and the Due Process question of the amount of the burden on individuals who are the focus of the regulation (the restrictiveness inquiry), discussed at § 27.1.2 nn.44-45. For example, regarding burdens on speech, as noted above at § 29.2 n.65, the Court stated in Ward v. Rock Against Racism that the government action cannot burden substantially more speech than necessary (the overinclusiveness inquiry), nor can it place a substantial burden on speech by failing to leave open ample alternatives channels of communication (the restrictiveness inquiry). This aspect of Ward is discussed further at § 29.4.4.3 nn.151-55.

The third case of interest in terms of contemporary levels of scrutiny in free speech doctrine is Hazelwood School District v. Kuhlmeier.67 Kuhlmeier indicates that the proper standard of scrutiny in a non-public forum case which does not involve viewpoint discrimination is some version of

65  Id. at 796-802.

rational review. In *Kuhlmeier*, the Court upheld the exercise of editorial judgment by a high school principal with respect to several articles proposed for inclusion in a school-financed student newspaper. The two main concerns were: (1) the name of a pregnant student might be identifiable from the text, and (2) references to sexual activity and birth control were inappropriate for some of the younger students in the school. Because of the pressures of time, the principal simply eliminated the two pages on which the articles appeared, resulting in several other stories being excluded.

In his majority opinion, Justice White said that the student paper was not a public forum because it was developed within the school curriculum and the evidence did not show a clear intent to create a public forum. The test for being within the curriculum was whether there is supervision by faculty members and whether the activity was designed to impart particular knowledge or skills to student participants and audiences. Since the school had reserved this forum for its purposes (all articles being submitted to the principal prior to publication), school officials were entitled to regulate the contents in a “reasonable” manner. The reasons for using this standard of review, said Justice White, are that educators are entitled to exercise control to assure that participants learn whatever lessons the activity is designed to teach, the audience is not exposed to material inappropriate for their level of maturity, and the views of speakers are not erroneously attributed to the school.68

Note that while courts normally review a lower court's factual findings for clear error and its conclusions of law *de novo*, an appellate court's review is different in the context of a First Amendment claim. As one court has noted, “Following a bench trial involving a First Amendment claim, an independent review of the facts is not necessarily *de novo* review of all the facts relevant to the ultimate judgment entered. Facts irrelevant to the free speech issue remain subject to the clear error standard, but we make a ‘fresh examination’ of those facts that are crucial to the First Amendment inquiry. In doing so, we are not bound by the district court's witness-credibility determinations, yet we remain cognizant that the district court is in the best seat to observe the demeanor of the witnesses.”69 Thus, as indicated in *Planned Parenthood of Columbia/Willamette v. American Coalition of Life Activists*,70 “historical facts” are for juries, but “core constitutional facts” critical to resolving a First Amendment free speech issue are for *de novo* review by the court.

§ 29.3 Governmental Regulations of Speech versus Regulations of Conduct or Spending on Speech to Which Standard First Amendment Doctrine Does Not Apply

§ 29.3.1 Governmental Regulations of Speech versus Regulations of Conduct

By its terms, the First Amendment proscribes only governmental regulations “abridging the freedom of speech,” not conduct. Governmental regulations of conduct, therefore, are outside of the ambit of the First Amendment. In determining whether the regulation is one of speech or conduct, the Court has noted that “symbolic speech” is protected by the First Amendment. “Symbolic speech”

---

68 *Id.* at 273-76.

70 290 F.3d 1058, 1066-70 (9th Cir. 2002).
exists where conduct is not “pure speech,” such as talking, writing, or wearing informative clothing, but is nevertheless intended to be expressive and conveys a message reasonably likely to be understood. Classic case examples of symbolic conduct include burning a cross on someone’s lawn, burning a flag, or performers dancing in the nude at an adult entertainment establishment.

For example, in *R.A.V. v. City of St. Paul*, the Court was faced with a statute that made it a hate crime to burn a cross on an individual’s lawn. While criminalizing the expression of hate in the conduct of burning a cross did trigger a First Amendment analysis, a regulation of conduct alone, such as applying a trespass statute to a person who entered on someone else’s property to burn a cross, would pose no First Amendment problems.

Similarly, in *Texas v. Johnson*, the Court majority held that a state flag desecration statute was invalid as applied to defendant who had burned a flag as part of a political protest. Justice Brennan noted that a tired person, not intending to express anything, might desecrate a flag by dragging it through the mud. He said that a different case would be posed by prosecution of a person who had not engaged in political expression. Thus, the Court was not considering defendant’s facial challenge to the statute. Similarly, had the defendant burned someone else’s flag, rather than his own, he could certainly have been prosecuted for the conduct of destruction of property.

Sometimes, whether the regulation is one of speech or conduct may not be so clear. For example, the Court held in *Dallas v. Stanglin* that “recreational dancing” by patrons of a dance hall was not expressive activity under the First Amendment freedom of association. In contrast, in *Barnes v. Glen Theatre, Inc*, the Court held that a statute barring public nudity applied to nude dancing by “performers” at an adult entertainment establishment was expressive activity because part of the purpose of the performance was erotic expression. From a formalist perspective, focused more on literal meaning than purpose, Justice Scalia said that the First Amendment did not apply even in *Barnes*, since the nude dancing by performers literally was not symbolic speech, but conduct.

**§ 29.3.2 Governmental Regulations of Speech versus Spending on Speech**

The federal and state governments subsidize a wide variety of activities. For the federal government, this fits comfortably within the General Welfare Clause as supplemented by the Necessary and Proper Clause. As the Court held in *Helvering v. Davis*, “When money is spent to promote the general welfare, the concept of welfare or the opposite is shaped by Congress, not the

---

72 491 U.S. 397, 403 n.3 (1989).
75 301 U.S. 619, 645 (1937).
states. So the concept be not arbitrary, the locality must yield.” When the government has subsidized a particular activity, the Court has typically not reviewed its effects from a heightened level of scrutiny.

For example, the Court has held that government funding of childbirth expenses, but not the cost of abortions, does not violate either the due process or equal protection rights of pregnant women who may want to have an abortion. In an opinion by Justice Stewart, the Court said in *Harris v. McRae* that the law was not predicated on a constitutionally suspect class and left pregnant women no worse off than they were before. Further, the distinction in the federal law bore a rational relationship to a legitimate interest in protecting the potential life of a fetus. Liberal instrumentalist Justices Brennan, Marshall, Blackmun, and Stevens dissented on the grounds that this selective funding served to coerce indigent pregnant women to bear children they would otherwise elect not to have.

The situation is somewhat different if the government subsidizes some speech, but not other speech. There is always the possibility that it is engaged in viewpoint discrimination, which always triggers strict scrutiny in non-funding cases, as discussed at § 29.4.3.1. The cases have all been dealt with by the post-instrumentalist Court. These decisions generally permit the government to subsidize a viewpoint if it is the government that is speaking. The government may also call for speech-related considerations to be included when making a many-factored judgment in a competitive funding process, noted at § 29.4.2 nn.101-03. However, as discussed below, due to Justice Kennedy’s critical fifth vote in a number of cases, the government cannot engage in viewpoint discrimination within a program designed to encourage a diversity of views from private speakers. And it cannot restrict lawyers in a government-funded legal services program from questioning the legality of existing law.

In general, in deciding whether particular speech is government speech or the speech of a private individual, the courts have examined: (1) the central "purpose" of the program in which the speech in question occurs; (2) the degree of "editorial control" exercised by the government or private entities over the content of the speech; (3) the identity of the "literal speaker"; and (4) whether the government or the private entity bears the "ultimate responsibility" for the content of the speech, in analyzing circumstances where both government and a private entity are claimed to be speaking.

---

77 *Id.* at 329 (Brennan, J., joined by Marshall & Blackmun, JJ., dissenting); *id.* at 349 (Stevens, J., dissenting).

78 See, e.g., *Wells v. City and County of Denver*, 257 F.3d 1132, 1140-41 (10th Cir. 2001), *cert. denied*, 534 U.S. 997 (2001) (a sign listing private sponsors of a public holiday display constituted government speech); *Knights of the Ku Klux Klan v. Curators of the Univ. of Mo.*, 203 F.3d 1085, 1093-96 (8th Cir. 2000), *cert. denied*, 531 U.S. 814 (2000) (announcements of sponsors' names and brief messages from sponsors on public radio station constituted government speech, and thus the Klan had no viewpoint discrimination complaint when they were denied sponsorship rights); *Downs v. Los Angeles Unified Sch. Dist.*, 228 F.3d 1003, 1011 (9th Cir. 2000), *cert. denied*, 532 U.S. 994 (2001) (postings to school bulletin boards were government speech, not private speech).
The starting point is *Rust v. Sullivan*,\(^7^9\) decided in 1991. *Rust* involved a facial challenge to federal regulations that barred persons working for federally funded health programs from discussing abortion as a lawful option. Chief Justice Rehnquist wrote for a 6-3 Court, “The Government can, without violating the Constitution, selectively fund a program to encourage certain activities it believes to be in the public interest, without at the same time funding an alternative program which seeks to deal with the problem in another way.” In so doing, the government had not unlawfully discriminated on the basis of viewpoint; “it has merely chosen to fund one activity to the exclusion of another.” The challenged regulation was held not to violate First Amendment rights of free speech or Fifth Amendment rights of privacy regarding abortion choice, because it left a pregnant woman with the same choices as if the government had chosen not to operate any public hospitals. Justice Blackmun, dissenting with Justices Marshall and Stevens, said that the regulation constituted a content-based regulation of speech that was also clearly viewpoint-based. Further, the challenged regulation had the practical effect of obliterating the freedom to choose, particularly for the poor, “as surely as if it had banned abortions outright.” Thus, for the dissent, strict scrutiny should have been triggered in the case, and the regulation should have been declared unconstitutional.\(^8^0\)

A result less deferential toward the government and more protective of free speech was reached in *Rosenberger v. Rector and Visitors of the University of Virginia*.\(^8^1\) In *Rosenberger*, the university was paying the printing costs for a variety of publications by certified student organizations, but on Establishment Clause grounds refused to pay for a student paper that promoted a particular belief in or about a deity or an ultimate reality. Writing for a 5-4 Court, Justice Kennedy said that this was viewpoint discrimination, since the university did not exclude religion as a subject matter, but selected for disfavored treatment those student journalistic efforts with religious editorial viewpoints. Justice Kennedy pointed out that the university was not subsidizing a message it favors, as occurred in *Rust*, but instead was spending funds to encourage a diversity of views from private speakers. Justice Souter, dissenting with Justices Stevens, Ginsburg, and Breyer, said that there was no viewpoint discrimination because the university had simply denied funding for speech that primarily promotes or manifests any view on the merits of religion. Thus, it denies funding for the entire subject matter of religious or non-religious apologetics.\(^8^2\)

A result similarly more protective of free speech emerged in *Legal Services Corp. v. Velazquez*,\(^8^3\) where Justice Kennedy wrote for a majority comprised of himself and Justices Stevens, Souter, Ginsburg, and Breyer. The Court held that the First Amendment was violated by a restriction in the

---

82 Id. at 863-64 (Souter, J., joined by Stevens, Ginsburg & Breyer, JJ., dissenting).

Legal Services Corporation Act that barred lawyers funded through that Act from engaging in an effort to amend or otherwise challenge existing welfare law in effect on the date of the initiation of the representation. Justice Kennedy said that the government can make viewpoint-based funding decisions when the government itself is the speaker or, as in Rust, where the government uses private speakers to transmit information pertaining to government programs. However, an LSC-funded attorney speaks on behalf of the client, not the government. Further, the restriction distorts the legal system by altering the traditional role of attorneys and, thus, is inconsistent with separation-of-powers principles. The Court must be vigilant, he said, when Congress imposes rules and conditions which insulate its laws from legitimate judicial challenge. Justice Scalia dissented, joined by Chief Justice Rehnquist, and Justices O’Connor and Thomas. Justice Scalia wrote that Rust was controlling. The discrimination on the basis of content should not trigger strict scrutiny because a decision not to subsidize the exercise of a fundamental right does not infringe that right. Nor does the law discriminate on the basis of viewpoint since the government funds neither challenges to, nor defenses of, existing welfare law. The LSC subsidy, said Justice Scalia, neither prevents anyone from speaking nor coerces anyone to change speech.84

§ 29.4 Content-Based versus Content-Neutral Regulations of Speech in Public Forums or on Private Property

§ 29.4.1 The Content-Based versus Content-Neutral Distinction

Cases on the power of government to control speech typically discuss both the nature of the forum involved in the regulation (public versus non-public forum), and what kind of regulation of speech is involved (content-based or content-neutral). The applicable standard of review depends on how these two elements interact. The following material concentrates first on the standards of review developed for content-based versus content-neutral regulations of speech. For ease of presentation, all of the cases discussed in this section clearly involve regulation of speech in a public forum, such as on a public street or public park, or on private property. The question of how the Court determines the nature of a forum, public or non-public, when the location of the speech being regulated raises more difficult issues, is discussed at § 29.5.

The distinction between content-based and content-neutral regulations of speech is well illustrated by the famous and leading case of United States v. O’Brien.85 In this 1968 case, the Court upheld the conviction of a protester who had violated federal law by burning his draft card on the steps of a courthouse as part of a demonstration against the Vietnam war. The crime defined by statute was destroying a draft certificate. Chief Justice Warren stated:

[A] regulation is sufficiently justified if it is within the constitutional power of the Government; if it furthers an important or substantial governmental interest; if the governmental interest is unrelated to the suppression of free expression, and if the incidental restriction on alleged First

84 Id. at 552-59 (Scalia, J., joined by Rehnquist, C.J., and O’Connor & Thomas, JJ, dissenting).

Amendment freedoms is no greater than is essential to the furtherance of that interest. 86

The government interest in O’Brien that was unrelated to the suppression of free expression was the harm that burning the draft card would have to the effective functioning of the Selective Service System. The Court concluded in O’Brien that the secondary effect of burning the draft card was what concerned the government, not the protest activity itself.

The O’Brien principle, although framed in the context of a regulation of symbolic speech that had a problematic secondary effect, was extended in Members of the City Council of Los Angeles v. Taxpayers for Vincent87 to all time, place, and manner regulations applied in a public forum. This was done with little detailed consideration, but was based on the common-sense observation that a time, place, or manner regulation also involves a case where the government is not concerned about the content of the speech, but only the time, place, or manner of the speech’s delivery. Thus, under current doctrine, either a regulation is content-based or it is content-neutral, with no distinction made between whether the regulation is content-neutral because it is based upon secondary effects or is a time, place, and manner regulation. However, as discussed at § 29.4.4.3 nn.154-59, in the 2002 case of Alameda Books, Justice Souter made an argument for four Justices that a distinction should be made between these two kinds of content-neutral regulations.

Another example of the distinction between content-based and content-neutral regulations appeared in Texas v. Johnson. 88 In this case, the majority held that a state flag desecration statute was invalid as applied to defendant, who had burned a flag as part of a political protest. The majority noted that the state’s interest in banning flag burning to prevent breaches of the peace was a content-neutral reason for the regulation. It thus triggered intermediate review. That justification failed intermediate review, however, because the statute was not substantially related to advancing the interest in preventing a breach of the peace, since no one at the demonstration was injured or threatened with injury and only several witnesses testified that they had been seriously offended by the flag-burning. The state’s second interest was an interest in preserving the flag as a symbol of nationhood and national unity. The majority said that this interest was related to the suppression of expression and, thus, was content-based. Therefore, strict scrutiny was applied to the consideration of that interest, rather than the intermediate review standard of O’Brien. As discussed below at § 29.4.3.2 nn.110-15, this reason failed the strict scrutiny approach.

As the analysis in Texas v. Johnson makes clear, sometimes the government may have both content-based and content-neutral reasons for its action. In such a case, the content-based reasons trigger strict scrutiny, while the content-neutral reasons trigger intermediate review, unless the two reasons are “inextricably intertwined,” in which case the higher content-based standards control. Consistent with those levels of review, discussed at § 26.1.3 nn.83-99, the content-based reasons must be actual government purposes to be considered by the court, while the content-neutral reasons must be actual or plausible government purposes. For restrictions on free speech in a non-public forum that trigger

86 Id. at 377.
basic rational review, discussed at § 29.5, any conceivable content-neutral reasons for the regulation can be used. Naturally, illegitimate pretexts for regulation cannot be used at strict scrutiny, intermediate review, or rational review, consistent with the analysis of illegitimate interests, discussed at § 26.1.1.1 nn.16-21, and illegitimate pretexts in *McCulloch v. Maryland*, discussed at § 18.1.2 nn.31-34. While it has been argued that the Court in “dual motive” cases should determine what is the predominant motive of the regulation considering “content, character, context, nature, and scope,” the better approach is to recognize that the discussion in “dual motive” cases regarding content-neutrality is focused on whether the content-neutral reason is an actual or plausible purpose of the government action, or merely a pretext to justify content-based discrimination. As with all constitutional cases, as noted at the beginning of Part IV, if the government has one reason to act that makes the government action constitutional – in these cases typically the content-neutral reason – the act is constitutional, even if the content-based reason cannot survive constitutional scrutiny.89

Two nude dancing cases help clarify the distinction between content-based and content-neutral regulations of speech. The first is *Barnes v. Glen Theatre, Inc.*90 There the Court, by a 5-4 vote, upheld a ban on nudity in places of public accommodation. Chief Justice Rehnquist announced the judgment and delivered an opinion joined by Justices O’Connor and Kennedy. The Chief Justice said that nude dancing is symbolic speech within the First Amendment. To this symbolic speech he applied the *O’Brien* test, and the ban satisfied that test. The Court concluded that the state’s interest in morality was substantial and unrelated to suppressing free expression, since it was nudity and not dancing that was prohibited. Further, the law was narrowly tailored as its requirement that dancers wear at least “pasties and a G-string” was the “bare minimum needed to achieve the state’s purpose.” Justice Souter, concurring, said that the purpose of the law, as in *Renton*, was combating secondary effects, such as prostitution, sexual assault, and associated crimes, which flow not from the expression inherent in nude dance but, rather, from crowds of predisposed men. Justice Scalia, also concurring, said that since this was a law not targeting expressive activity, but only conduct, the First Amendment did not apply at all, and only rational basis scrutiny under the Due Process Clause was required. Moral opposition to nudity supplied a legitimate basis for the regulation.91

Justice White dissented with Justices Marshall, Blackmun, and Stevens. Justice White said that nudity is an expressive component of nude dancing so that ban was related to expressive conduct. Indeed, the real purpose was a content-based purpose to protect viewers from what the state believed

is a harmful erotic message. Thus, strict scrutiny should be applied, and the law could not survive that level of scrutiny. The majority opinion had anticipated this argument and sought to answer it by saying that “the requirement that the dancers don pasties and a G-string does not deprive the dance of whatever erotic message it conveys; it simply makes the message slightly less graphic.”

Nine years later a similar case came before the Court and a similar result was reached in City of Erie v. Pap’s A.M. Justice O’Connor wrote an opinion joined by Chief Justice Rehnquist and Justices Kennedy and Breyer. She said the Court has now clarified that government restrictions on public nudity “should be evaluated under the framework set forth in O’Brien for content-neutral restrictions on symbolic speech.” With respect to applying the O’Brien standard, Justice O’Connor adopted the analysis used by Justice Souter in Barnes. Thus, she said that the law was not related to expression, but instead was aimed at the content-neutral reasons of “combating crime and other negative secondary effects caused by the presence of adult entertainment establishments like Kandyland and not at suppressing the erotic message conveyed by this type of nude dancing.”

Justice Scalia concurred with Justice Thomas, saying of the law, as he had in Barnes, that because “as a general law regulating conduct and not specifically directed at expression, it is not subject to First Amendment scrutiny at all.” Justice Souter concurred in the Court’s choice of a standard for review, but said that the city had not made a sufficient evidentiary showing that the incidental speech restriction was not substantially greater than essential to advance the government’s interest. He said that he had not demanded such a showing in Barnes, but added that he should have demanded it, and the failure to do so was a mistake. As discussed at § 29.4.4.3 nn.171-75, Justice Souter is correct that this additional element is part of traditional intermediate review.

Dissenting, Justice Stevens, with Justice Ginsburg, objected that never before had the Court used the “secondary effects” test to justify a total ban on expression. In response, Justice O’Connor said that the ordinance did not enact a total ban. It merely limited one means of expressing the erotic message being conveyed, and this was not a case where “banning the means of expression so interferes with the message that it essentially bans the message.” The question of whether a total ban based on secondary effects should trigger intermediate review is discussed at § 29.4.4.3 text following n.159.

§ 29.4.2 Kinds of Content-Based Regulations: Viewpoint Discrimination versus Non-Viewpoint or Subject-Matter Only Discrimination

The Court distinguishes between two kinds of content-based regulations: (1) those that discriminate on grounds of viewpoint; and (2) those that discriminate on grounds of subject-matter. Most of the time this distinction is clear, but occasionally categorizing a regulation can be problematic. For example, as noted at § 29.3.2 nn.81-82, the Court held in *Rosenberger v. Rector and Visitors of the University of Virginia* that the University of Virginia, which paid the printing costs for a wide variety of student publications, could not withhold payments for the sole reason that a student paper primarily promotes or manifests a particular belief in or about a deity or an ultimate reality. The university did not exclude religion as a subject matter, said Justice Kennedy, but engaged in viewpoint discrimination by selecting for disfavored treatment those student journalistic efforts with religious editorial viewpoints. Justice Kennedy said that when the state is the speaker or when it enlists private entities to convey its own message, it is entitled to say what it wishes. But here it spent funds to encourage a diversity of views from private speakers. When doing that, it may not silence the expression of selected viewpoints.

Justice Souter, dissenting with Justices Stevens, Ginsburg, and Breyer, agreed that viewpoint discrimination was a pernicious distinction based on content. However, he found no viewpoint discrimination as he understood the facts. Justice Souter concluded that the university’s guidelines did not skew debate but, rather, denied funding for hortatory speech that primarily promotes or manifests any view on the merits of belief in or about a deity or ultimate reality. Thus, the guidelines denied funding for the entire subject matter of religious or non-religious apologetics, and were a non-viewpoint, subject-matter regulation, not viewpoint discrimination. Justice Souter said that funding was not denied for those who discuss issues in general from a religious perspective, but only to those engaged in promoting or opposing religious conversion and religious observances as such.

Viewpoint discrimination was also the focal point in *National Endowment for the Arts v. Finley*. This case upheld a provision in the National Foundation on the Arts and Humanities Act of 1965 that requires the Chairperson of the National Endowment for the Arts to ensure that “artistic excellence and artistic merit are the criteria by which [grant] applications are judged, taking into consideration general standards of decency and respect for the diverse beliefs and values of the American public.” This provision was challenged on the ground, among others, that it constituted viewpoint discrimination. For the Court, Justice O’Connor said that the provision imposes no categorical requirement and that it seems unlikely that the provision would introduce any greater element of selectivity than the determination of “artistic excellence” itself. *Rosenberger* is distinguishable, she said, because here there is a competitive process in the allocation of grants, and the content-based “excellence” threshold is merely a subject-matter type of standard. This is not a case, she said, like *Rosenberger*, where in the context of subsidizing a diversity of viewpoints,

100 *Id.* at 863-64 (Souter, J., joined by Stevens, Ginsburg & Breyer, JJ., dissenting).

viewpoint discrimination occurred. Until the law is applied in a manner that raises concerns about disfavored viewpoints the Court will uphold the provision’s constitutionality. The criteria of “decency” in the statute merely represents a “non-obscene” or “not indecent” kind of requirement that the Court typically analyzes as a subject-matter regulation, as noted at §§ 30.1.3 (obscenity) & 30.1.4 (indecency), not viewpoint discrimination.

Justices Scalia and Thomas concurred, saying that there is a distinction between abridging speech, where viewpoint discrimination is troublesome, and funding speech, which leaves free those who wish to create indecent art. Their view is that funding speech is not literally a regulation of speech, and thus viewpoint discrimination should not trigger strict scrutiny in a funding case, even in a case like Finley or Rosenberger where the government is not promoting its own message. This view is not shared by the rest of the Court. Justice Souter dissented in Finley, contending that the statute itself makes clear that Congress’ purpose was viewpoint based, i.e., to prevent the funding of art that conveys an offensive message in Congress’ judgment, as implemented by the NEA.

Cases involving regulations that permit some groups to use public school facilities after school hours, while banning other groups from such use of public facilities, often trigger a question of whether the ban involved viewpoint discrimination. Many of these cases have involved regulations banning the use of school facilities by individuals or groups for religious purposes. Often such regulations are viewed as involving viewpoint discrimination, triggering a strict scrutiny approach. A similar finding of viewpoint discrimination was made in the context of a public law school’s clinical education program which allegedly refused to represent a particular plaintiff because of plaintiff’s past criticism of the program, its director, and its suit challenging public display of the Ten Commandments. The court concluded that if the allegations were true that would constitute viewpoint discrimination under the First Amendment. In contrast, a county policy barring use of community centers for home schooling or other private courses intended to meet state educational requirements, while allowing informal community educational activities, was held to be viewpoint neutral, and based only on a subject-matter distinction between formal private education and informal educational activities.

106 Goulart v. Meadows, 345 F.3d 239, 251-55, 257-59 (4th Cir. 2003)
§ 29.4.3 Strict Scrutiny Review for Content-Based Regulations of Speech

§ 29.4.3.1 Strict Scrutiny for Viewpoint Discrimination Cases

As noted at § 29.2 nn.60-61 & Table 29.2, strict scrutiny is used by the Court for content-based regulations of speech imposed by the government in a public forum. Given the difficulty meeting the strict scrutiny test, particularly for cases of viewpoint discrimination, the Court occasionally will phrase the doctrine in more absolutist terms. For example, in *Rosenberger v. Rector and Visitors of the University of Virginia*, Justice Kennedy wrote for the Court, “It is axiomatic that the government may not regulate speech based on its substantive content or the message it conveys.” Justice Scalia said in *R.A.V. v. City of St. Paul*, “Content-based regulations are presumptively invalid.” This more presumptive phrasing usually appears in cases like *Rosenberger* or *R.A.V.* which involve government regulations of speech that are held to constitute viewpoint discrimination. It is clear, however, from these and other cases of viewpoint discrimination, including *Boos v. Barry*, that there is no *per se* rule of unconstitutionality for viewpoint discrimination, but that strict scrutiny applies to cases of viewpoint discrimination.

§ 29.4.3.2 Strict Scrutiny for Content-Based, Non-Viewpoint Discrimination Cases

In cases involving content-based regulations of speech that involve subject-matter regulation, rather than viewpoint discrimination, the strict scrutiny inquiry typically appears more clearly on the face of the opinion. For example, in *Texas v. Johnson*, a 5-4 Court held that a state flag desecration statute was invalid as applied to defendant, who had burned a flag as part of a political protest. Justice Brennan wrote for a majority composed of himself and Justices Blackmun, Marshall, Kennedy, and Scalia. Justice Brennan wrote that the state could not justify the prosecution as a way of preventing a breach of the peace, since no one was injured or threatened with injury and only several witnesses testified that they had been seriously offended by the flag-burning. With respect to an interest in preserving the flag as a symbol of nationhood and national unity, Justice Brennan said that this interest is related to the suppression of expression and, thus, strict scrutiny should be applied rather than the more relaxed rule of *O’Brien*. Applying strict scrutiny, Justice Brennan said, “It is not the State’s ends, but its means, to which we object.”

---

111 *Id.* at 407-14.

112 *Id.* at 418.
In reaching this conclusion, Justice Brennan said that defendant’s political expression was restricted because of the content of the message he conveyed, and yet it is a bedrock general principle that the government may not prohibit the expression of an idea simply because society finds the idea itself offensive or disagreeable. With respect to application of that principle, Justice Brennan said there is nothing in the precedents suggesting that a state may remove the flag as a subject-matter of political protest by prohibiting expressive conduct relating to it. Nor was there anything in the text of the Constitution or the precedents that indicated that a separate juridical category exists for the American flag alone. The government may pursue its legitimate interest in preserving the symbolic value of flag by making suggestions concerning the proper treatment of the flag. It might attempt to persuade those who feel differently about the flag that they are wrong. But it cannot justify a criminal conviction for engaging in political expression by use of the flag.

Reflecting a Holmesian predisposition to defer to government, Chief Justice Rehnquist, with Justices White and O’Connor, said that the flag has occupied a unique position as the symbol of our Nation. In Justice Rehnquist’s view, it was the use of this symbol, and not the ideas defendant sought to convey, for which he was punished. The Chief Justice cited a number of statements by individual Justices which supported his conclusion that the government may enforce minimal public respect for the flag. Justice Stevens, also dissenting, agreed that the case did not relate to “disagreeable ideas.” Instead, defendant was prosecuted because of the method he chose to express his dissatisfaction with national policies. Stevens noted, “Had he chosen to spray-paint – or perhaps convey with a motion picture projector – his message of dissatisfaction on the facade of the Lincoln Memorial, there would be no question about the power of the Government to prohibit his means of expression. The prohibition would be supported by the legitimate interest in preserving the quality of an important national asset. Though the asset at stake in this case is intangible, given its unique value, the same interest supports a prohibition on the desecration of the American flag.”

Justice Kennedy, concurring, made clear that the decision was quite difficult for him. He said, “The hard fact is that sometimes we must make decisions we do not like. We make them because they are right, right in the sense that the law and the Constitution, as we see them, compel the result. . . . Though symbols often are what we ourselves make of them, the flag is constant in expressing beliefs Americans share, beliefs in law and peace and that freedom which sustains the human spirit. The case here today forces recognition of the costs to which those beliefs commit us. It is poignant but fundamental that the flag protects those who hold it in contempt.”

Congress reacted to *Texas v. Johnson* by enacting a statute that provided criminal penalties for “Whoever knowingly mutilates, defaces, physically defiles, burns, maintains on the floor or ground

113 *Id.* at 414.

114 *Id.* at 429-35 (Rehnquist, C.J., joined by White & O’Connor, JJ., dissenting).

116 *Id.* at 420-21 (Kennedy, J., concurring).

Page 1370
or tramples upon any flag of the United States.” 117 This law was struck down on its face in United States v. Eichman, 118 by the same 5-4 vote that was recorded in Texas v. Johnson. Writing again for the majority, Justice Brennan said that the new federal law, although wider in scope than the Texas law, “suppresses expression out of concern for its likely communicative impact.”

§ 29.4.4 Intermediate Review for Content-Neutral Regulations of Speech

§ 29.4.4.1 Content-Neutral Secondary Effects Cases

As discussed at § 29.2 nn.60-66 & Table 29.2, content-neutral regulations not related to the suppression of free expression are given a form of intermediate scrutiny, first articulated in 1968 by Chief Justice Warren, writing for the Court in United States v. O’Brien. 119 In that case the defendant was charged with knowingly destroying his draft card. Defendant had burned the card on the steps of a courthouse as part of a demonstration against the Vietnam war. The Court upheld the statute both on its face and as applied. The Chief Justice wrote that when speech and non-speech elements are combined in the same course of conduct, a government regulation is sufficiently justified if: (1) it is within the constitutional power of the government, (2) it furthers an important or substantial governmental interest; (3) the interest is unrelated to the suppression of free expression; and (4) the incidental restriction on alleged First Amendment freedoms is no greater than is essential to the furtherance of that interest.

Applying that standard to the facts, Chief Justice Warren first said that Congress has sweeping power to raise and support armies and to make all laws necessary and proper for that purpose. Second, legislation to insure the continuing availability of issued certificates serves a substantial purpose. Third, the continuing availability to each registrant of his certificate substantially furthers the smooth functioning of the system by making it easy to communicate with the local board. Fourth, the Court perceived no alternative means that would more precisely and narrowly assure the continuing availability of the card than a law which prohibits their wilful mutilation or destruction. The defendant argued that the real purpose of Congress was to suppress freedom of speech. Chief Justice Warren replied that inquiry into congressional purpose is always a hazardous matter, and that the inevitable effects of government action is usually a more appropriate way to determine whether a regulation is content-based or content-neutral. In any event, Committee Reports indicated concern that unrestrained destruction of the cards would disrupt smooth functioning of the system and this could be used to overcome inferences based on floor comments of certain Congressmen. 120

From a broader perspective, this discussion suggests that plausible governmental purposes, based upon the inevitable effects of government action or legislative reports, can be used to trigger a finding of content-neutrality that would lead to imposition of the intermediate scrutiny standard of

120 Id. at 383-86.
review. As discussed at § 26.1.3 nn.92-99, plausible governmental purposes typically can be considered under an intermediate standard of review under the Equal Protection Clause. The doctrine here is similar. There is no indication in O’Brien that the rational review “any conceivable basis” approach could be used to determine content-neutrality. Similarly, the Court did not adopt in O’Brien an “actual purpose” approach, as is used for strict scrutiny under the Equal Protection and Due Process Clauses, and for content-based regulations of speech under the First Amendment.

Several later cases in the instrumentalist era mirrored the Court’s analysis in O’Brien. In Schacht v. United States,121 the Court first cited O’Brien in upholding a federal statute making it a crime to wear a military uniform without authority. The Court then invalidated a portion of the law that allowed an actor in a theatrical production to wear the uniform “if the portrayal does not tend to discredit that armed force.” Justice Black wrote that an actor, like anyone else in our country, enjoys a constitutional right to freedom of speech, including the right openly to criticize the government during a dramatic performance. Thus, the restrictive portion of the law, obviously related to the suppression of expression, was content-based, leading to a strict scrutiny analysis of that portion of the law. That portion “clearly” was unconstitutional under such an approach.

Another example of the intermediate review level of O’Brien possibly not applying because the government regulation was content-based, not content-neutral, occurred in Spence v. State of Washington.122 There the defendant was charged with violating a prohibition against exposing to public view a flag to which is attached any word or design. The defendant had hung his own flag from a window in his apartment, upside down, with a black peace symbol having been removably attached. The main interest advanced by the state for the prosecution was a desire to preserve the national flag as an unalloyed symbol of our country. The Court noted that if this interest is valid if would be directly related to expression and, thus, O’Brien would not apply. However, the Court did not decide whether that interest was valid. Instead, it said that even if it was valid the law could not be applied to defendant because any interest the state might have in preserving the physical integrity of the privately owned flag was not significantly impaired where there was no risk that the act would mislead viewers into assuming that the government endorsed his viewpoint, the flag had not been permanently disfigured, and his message was direct and likely to be understood, and within the contours of the First Amendment.

As noted at § 29.4.1 n.90, a determination that the government’s interest was not related to the suppression of expression led to application of the four-part O’Brien test in Barnes v. Glen Theatre, Inc.123 There the Court held that a statute barring public nudity could be applied to nude dancing. Chief Justice Rehnquist wrote a plurality opinion, joined by Justices Kennedy and O’Connor. The Chief Justice began by acknowledging that nude dancing is expressive conduct. However, the government’s interest in reflecting the moral disapproval of people appearing in the nude among strangers in public places was unrelated to the suppression of free expression. “The requirement that

---

the dancers don pasties and a G-string does not deprive the dance of whatever erotic message it conveys; it simply makes the massage slightly less graphic.”124 Finally, the incidental restriction on First Amendment freedoms was no greater than essential to furthering the government’s interest. Justice Souter, concurring in the judgment, also applied the O’Brien test, because the state had a substantial interest in combating the secondary effects of adult entertainment establishments.

The Court took another look at nude dancing in City of Erie v. Pap’s A.M.125 The result was the same, to uphold a ban on public nudity as applied to nude dancing, but there was some shift in the reasoning. Justice O’Connor announced the judgment of the Court and wrote a plurality opinion joined by Chief Justice Rehnquist and Justices Kennedy and Breyer. Justice O’Connor picked up on Justice Souter’s theory in Barnes, saying that the ordinance was aimed at combating crime (particularly increased prostitution and drug trafficking) and other negative secondary effects caused by the presence of adult entertainment establishments. That interest was not related to the suppression of expression, so O’Brien applied. The Court held that O’Brien was satisfied in that the regulation furthered a substantial interest and, since dancing was allowed with pasties and a G-string, the restrictions were no greater than necessary to further the city’s interest.

Justice Souter, concurring, approved of the plurality’s analytical approach, but said that the city had not made a sufficient evidentiary showing that the incidental speech restriction was not greater than necessary. He pointed out that the city had not introduced evidence to show that secondary effects could not be countered as well by zoning the location of nude dancing.126 Justice Souter said that he should have demanded such evidence in the Barnes case. Replying to Justice Souter’s concern that there was not enough evidence that the ordinance effectively combated secondary effects, Justice O’Connor said that the O’Brien test requires only that the regulation rationally further the interest in combating secondary effects. It does not require that they be substantially reduced. As discussed at § 29.4.4.3 nn.160-70, Justice O’Connor’s conclusion on this in Pap’s A.M. is inconsistent with the Court’s analysis in O’Brien, and is inconsistent with viewing O’Brien as a form of intermediate scrutiny. On this point, Justice Souter’s observations are more faithful to the Court’s precedents.127

Another secondary effects case is Members of the City Council of Los Angeles v. Taxpayers for Vincent.127 This case involved an ordinance barring the posting of signs on public property. Applying O’Brien, Justice Stevens said that it is well settled that a city can exercise its police powers to advance esthetic values. Second, citing Metromedia v. San Diego, a case which held that cities may ban commercial off-site advertising billboards, but permit signs on-site identifying the owner and the goods sold, he said the visual assault on people presented by an accumulation of signs posted

124 Id. at 571; id. at 583-87 (Souter, J., concurring in the judgment).

126 Id. at 314-17 (Souter, J., concurring in part and dissenting in part).

on public property is a significant evil, and the restriction on expression is incidental.128 Regarding whether that incidental restriction was no greater than essential, Justice Stevens said that a law would not be greater than essential if it was "narrowly tailored" to serve the esthetic interest. By banning signs, the ordinance did no more than eliminate the exact source of the evil it sought to remedy and, thus, curtailed no more speech than necessary to accomplish its purpose.129

Justice Stevens acknowledged that in Schneider v. State the Court had held that the esthetic interest cannot support a ban on distributing leaflets on public streets and sidewalks, although the city could penalize those who litter. However, Schneider was distinguishable because here the substantive evil was not a possible byproduct of communication but, instead, was created by the medium of expression itself.130 As in Metromedia, said Justice Stevens, the validity of the esthetic interest in the elimination of signs on public property is not compromised by failing to extend the ban to private property. The private citizen's interest in controlling the use of his own property justifies the disparate treatment. Even if some visual blight remains, a partial content-neutral ban may enhance the city's appearance.131

Regarding whether the law curtailed more speech than necessary, Justice Stevens added that there is no reason to believe that the advantages of communicating by signs cannot be obtained through other means. Thus, there were ample alternative means of communication in Los Angeles. In response to an argument that the city could have curtailed less speech by a more limited ban or exceptions for certain messages, times, or locations, and that this should be constitutionally required, Justice Stevens said this argument implied that the Court would have to hold that the City's interests are not sufficiently important to justify a complete ban. However, the Court accepted the city's position that it may decide that the esthetic interest in avoiding "visual clutter" justifies a removal.132 Further, under an intermediate standard of review, the government does not have to adopt the least restrictive alternative. It is enough if the regulation is not substantially broader than necessary and leaves open ample alternative channels of communication.

Reflecting a more vigorous liberal instrumentalist application of the O'Brien test, more favorably predisposed to protect rights of free speech, particularly of the poor, Justice Brennan dissented, with Justices Marshall and Blackmun. Justice Brennan agreed that the majority had used the correct standard of review. However, Justice Brennan said the law failed because its effect was to impose a total ban on poorly financed causes of little people. He said there was no indication in the record that a sufficient number of private parties would allow posting of signs, and leafletting has a much higher cost. Also, the city's real objective may not have been to eliminate visual clutter but, instead, to eliminate the messages typically carried by such signs. The city's statement of objectives should

129 Id. at 815-17.

131 Id. at 803-06.

132 Id. at 808-10.
be accepted as substantial and unrelated to the suppression of speech only if the city demonstrates that it is pursuing an identified objective seriously and comprehensively and in ways unrelated to the restriction of speech. Here that was not true because the city was addressing visual clutter in no other way than by prohibiting the posting of signs throughout the City and without regard to the density of their presence.133 This standard of seeming to focus on “actual” governmental purposes in order to determine whether a regulation is content-based or content-neutral, rather than merely “plausible” government purposes in light of effects, has not adopted by the majority of the Court.

The struggle to settle upon a perspective for dealing with zoning regulations that attempt to deal with the secondary effects of adult business continued into the 2001 Term of the Court, in City of Los Angeles v. Alameda Books, Inc.134 There the Court held that it was error to grant a summary judgment to the operators of multiple adult businesses in a single building who had challenged a zoning ordinance which barred the operation in the same building of an adult bookstore and an adult arcade or any two such operations. The plurality opinion written by Justice O’Connor was joined by Chief Justice Rehnquist and Justices Scalia and Thomas.

Citing Renton v. Playtime Theatres, Inc., Justice O’Connor said that the ordinance was not content-based because it was aimed at the secondary effects of a concentration of adult businesses. When an ordinance is content neutral, the inquiry is whether it is designed to serve a substantial governmental interest and does not unreasonably limit alternative lines of communication. Here, the city claimed to have based the ordinance on a 1977 study by the police department which showed that crime rates grew much faster in Hollywood, which had the largest concentration of adult establishments in the city. Justice O’Connor said it was rational for the city to infer that reducing the concentration of adult operations in a neighborhood, whether within separate establishments or in one large establishment, would reduce crime rates. It is enough for the city to rely on any evidence that is reasonably believed to be relevant to demonstrate a connection between speech and the content-neutral governmental interest.135 Justice Scalia said that he joined the plurality opinion because it correctly applied the Court’s jurisprudence on secondary effects. However, as he had said in Pap’s A.M., this was an unnecessary step because the First Amendment does not prevent a city from regulating the conduct of pandering sex.136

Justice Kennedy, with his slightly more speech-protecting perspective, concurred only in the judgment. Justice Kennedy agreed that a zoning restriction designed to decrease secondary effects and not speech should be subject to intermediate rather than strict scrutiny. He agreed with Justice O’Connor on the evidence required to support the government’s theory. However, Justice Kennedy emphasized that the claim to which the evidence must relate is that the ordinance will suppress

133  Id. at 818-31 (Brennan, J., joined by Marshall & Blackmun, JJ., dissenting).

secondary effects, but not by suppressing speech. The claim must therefore be that the ordinance will cause two businesses to split rather than one to close and that the total secondary effects will be significantly reduced. Reviewing the city’s study in light of common experience, Justice Kennedy said it was sufficiently likely that dispersing two adult businesses under one roof is reasonably likely to cause a substantial reduction in secondary effects while reducing speech very little. Of course, if this could be proved unsound at trial — either that there was no substantial benefit from the ordinance (and thus a problem with the second prong of the intermediate scrutiny test), or that it did substantially burden operations of the businesses (and thus a problem with the third prong of the intermediate scrutiny test) — the ordinance might not withstand intermediate scrutiny.137

Justice Souter dissented, with Justices Stevens and Ginsburg, and with Justice Breyer as to Part II of the dissent. In Part I of the dissent, Justice Souter called for the application of a slightly higher standard of intermediate review than that suggested by Justice O’Connor. Justice Souter first noted that a restriction based on content survives only on a showing of necessity to serve a compelling governmental interest, combined with least-restrictive narrow tailoring to serve it. The softer intermediate scrutiny, he said, is reserved for regulations justified by something other than content of the message, such as a straightforward restriction going only to the time, place, or manner of speech. In such a case, the Court asks only whether the regulation is narrowly tailored to serve a significant governmental interest and leaves open ample alternative channels for communication.

There is also the O’Brien test for limits on expression through action that is otherwise subject to regulation for nonexpressive purposes. That test approves regulations that further an important or substantial governmental interest unrelated to the suppression of free expression by a restriction no greater than is essential to the furtherance of that interest. Justice Souter then suggested in a footnote that O’Brien is a closer relative of secondary-effects zoning than is a mere time, place, or manner regulation. He then suggested that the Court should give this kind of zoning a label of its own, such as “content correlated.” This would serve to remind that the more closely a law applies to speech of a particular content, the greater is the opportunity for government censorship. This analysis calls for use of what Justice Souter called a relatively simple safeguard:

If combating secondary effects of property devaluation and crime is truly the reason for the regulation, it is possible to show by empirical evidence that the effects exist, that they are caused by the expressive activity subject to the zoning, and that the zoning can be expected either to ameliorate them or to enhance the capacity of the government to combat them (say, by concentrating them in one areas), without suppressing the expressive activity itself.138

Applying that test to the facts, Justice Souter concluded Part I by saying that the government had not shown that bookstores containing viewing booths isolated from other adult establishments increase crime or produce other negative secondary effects in surrounding neighborhoods. Thus, the ordinance had not been shown to be content correlated rather than simply content based, which would call for strict scrutiny. Thus he gave more concrete expression to the concern for evidentiary

137 Id. at 449-53 (Kennedy, J., concurring in the judgment).

138 Id. at 457 (Souter, J., joined by Stevens & Ginsburg, JJ., dissenting).
proof that he first raised in City of Erie v. Pap’s A.M.\textsuperscript{139}

In Part II of his dissenting opinion in Alameda Books, Justice Souter contended that even under the assumptions of the plurality opinion, the city had not met its burden of showing that the restriction on speech was no greater than essential to realizing an important objective, in this case policing crime. He pointed out that no study conducted by the city has reported that this type of traditional business, combining a bookstore and adult video booths, any more than any other adult business, has a correlation with secondary effects in the absence of concentration with other adult establishments in the neighborhood. He said that the reasonable supposition is that splitting some of these businesses up will have no consequence for secondary effects whatever. Justice O’Connor replied to Justice Souter’s dissent by saying that it would be unwise to depart from the Renton framework because none of the parties had requested it, the courts have not had difficulty working with it, it would be inappropriate for the Court to reach the question of content neutrality or content-based before permitting the lower court to pass on it, and because it is unclear what kind of evidence cities could rely upon to meet the evidentiary burden he would impose.\textsuperscript{140}

\textbf{§ 29.4.4.2 Content-Neutral Time, Place, or Manner Cases}

The use of intermediate scrutiny for time, place, or manner regulations of speech is illustrated in the 1989 case of Ward v. Rock Against Racism.\textsuperscript{141} The Court held in Ward that New York City did not deprive musicians of First Amendment rights by insisting that bandshell performers in Central Park use sound-amplification equipment and a sound technician provided by the city. Justice Kennedy noted that the regulation was content-neutral because its justifications, such as controlling noise in the park and avoiding undue intrusion into residential areas, had nothing to do with content. Regarding the city’s interest in ensuring the quality of sound at park events, the challengers argued that the city was seeking to assert artistic control. Justice Kennedy replied that the city requires its technician to defer to the wishes of event sponsors concerning sound mix, and the record indicates that the city's equipment and sound technician could meet the standards requested by the performers.

The challengers also argued that by placing control in the hands of the city's technician the law swept more broadly than necessary. Justice Kennedy replied that this argument would have considerable force if the city's scheme had a substantial deleterious effect on performers' ability to achieve the quality of sound they desired. However, the technician does all he can to accommodate to the sponsor's wishes and the district court found that the technician was able properly to implement a sponsor's instructions as to sound quality or mix, with no evidence offered at trial to

\textsuperscript{139} 529 U.S. 277, 316 (2000) (Souter, J., concurring in part and dissenting in part).

\textsuperscript{140} 491 U.S. 781, 790-803 (1980).
the contrary. Finally, said Justice Kennedy, applying the last element of the O’Brien test, there are ample alternative channels because the city’s rule does not attempt to ban any particular manner or type of expression. It had no effect on quality or content beyond regulating amplification.

Justice Marshall dissented with Justices Brennan and Stevens. Justice Marshall conceded that the majority had adopted the correct standard of review. However, reflecting the more vigorous application of the test often done by liberal instrumentalist judges, Marshall concluded that the law was not narrowly tailored because the government's goals could be pursued effectively and less intrusively by punishing persons responsible for excessive sounds.142 Under intermediate scrutiny, of course, the third prong of the test is not whether there are any less restrictive alternatives that could be adopted, the strict scrutiny approach, but only whether the choice adopted by the government is not substantially more burdensome than necessary or creates a substantial burden on free speech by not leaving open ample alternative channels of communication. The majority opinion in Ward seemed to be sensitive to these issues.

The O’Brien intermediate standard of scrutiny was also applied in Clark v. Community for Creative Non-Violence143 to allow application of a rule of the National Park Service barring overnight sleeping in Lafayette Park and the Mall. The Court said that the rule was content-neutral, was within government power, plainly served a substantial interest in conserving park property, and left open ample alternatives for communicating concern with the plight of the homeless. Justice Marshall, dissenting with Justice Brennan, agreed with the standard enunciated by the majority but said that in finding that ample alternatives existed the majority had failed to take into account the difficulties of the relatively disadvantaged to convey their political ideas. Here, by using sleep as an integral part of the protest, respondents could express with their bodies the poignancy of their plight.

An early case to apply the intermediate scrutiny “narrowly tailored” requirement was Grayned v. City of Rockford.144 There the Court declared that an anti-noise ordinance was not invalid on its face which provided that persons adjacent to a school with classes in session “shall not willfully make or assist in the making of any noise or diversion which disturbs or tends to disturb the peace or good order of such school session.” Justice Marshall delivered the Court’s opinion which recited that reasonable time, place, or manner regulations may prohibit expressive activities if, as in Tinker v. Des Moines Independent Community School District, discussed § 29.6.2.2 nn.28-68, they materially disrupt class work or involve a substantial disorder or invasion of the rights of others. Justice Marshall said the ordinance went no further than Tinker permits, since the ordinance was narrowly

tailored to further an important or substantial interest in not having a substantial disruption of school sessions.

A case where the Court found no ample alternative channels of communication, as thus a failure of the third prong of the intermediate standard of review, occurred in *City of Ladue v. Gileo*.145 There, the Court held unconstitutional on its face an ordinance which prohibited all signs within the city except those that fell into one of 10 exemptions, but which did not contain an exemption for signs on private property (other than "For Sale" or "Sold" signs). The challenger wanted to put a 24" by 36" sign on her lawn with the words, "Say No to War in the Persian Gulf, Call Congress Now." For the Court, Justice Stevens wrote that the interest in minimizing visual clutter was valid, but the ordinance did not leave open ample alternative channels for communication. The Court was not convinced that adequate substitutes existed for the important medium of speech being closed off. Justice Stevens gave four reasons why no adequate substitute exists:

a. Displaying a sign from one's own residence often carries a message distinct from what can be conveyed by other means;
b. Residential signs are unusually cheap and convenient forms of communication, especially for persons of modern means and limited mobility;
c. A special respect for individual liberty in the home has long been part of our culture and our law; and
d. The need to regulate temperate speech from the home is less pressing than the need to mediate among various competing uses for streets and other public facilities.146

A similar case of an ordinance that was not narrowly tailored occurred in *Deegan v. Ithaca*.147 In this case, the Second Circuit held that a municipal ordinance prohibiting any noise audible from 25 feet away was not sufficiently narrowly drawn when applied to a street evangelist to quiet him in a public forum. The court noted that the regulation was substantially broader than necessary, particularly since it would ban the sound of a person stepping in high heel boots, the opening and closing of a door, or the ringing of a cell phone. In *Bowman v. White*,148 a case involving a public university’s 5-day cap per semester on non-university persons speaking on a designated public forum on campus, the Eighth Circuit held that the 5-day cap was substantially more burdensome than necessary to advance the university’s content-neutral interests in protecting the students’ educational experience, ensuring public safety, and encouraging diverse use of resources. The court noted that a more narrowly drawn policy might permit the plaintiff extra days when the space was not being used by others, but grant preference to individuals who have not already been granted 5 days of use.149

§ 29.4.4.3 Recent Controversy Over How to Apply The Intermediate Scrutiny Test in Cases Involving Secondary Effects and Time, Place, or Manner Cases

The case of City of Los Angeles v. Alameda Books, Inc. 149 is useful in raising a number of points about levels of scrutiny in these First Amendment cases. As noted at § 27.1.2 nn.43-45, there are four kinds of questions regarding benefits and burdens that can be asked about any statute. Two relate to Equal Protection (underinclusiveness and overinclusiveness) and two relate to Due Process (service and oppressiveness/restrictiveness). Because First Amendment scrutiny does the jobs of both Equal Protection and Due Process kinds of concerns when applied to free speech issues, both questions of benefits (underinclusiveness and service) and both questions of burdens (overinclusiveness and restrictiveness) are necessary for a complete First Amendment analysis.

For example, as the Court noted in City of Ladue v. Gilleo, 150 “[T]he notion that a regulation of speech may be impermissibly underinclusive is firmly grounded in basic First Amendment principles.” As Justice Kennedy noted in Ward v. Rock Against Racism, 151 a content-neutral regulation of speech cannot burden substantially more speech than necessary to further the interest (the overinclusiveness inquiry), nor can it place a substantial burden on speech (the restrictiveness inquiry involved with leaving open ample alternative channels for communication) that does not serve to advance its goals (the service inquiry). Thus, in Alameda Books, 152 Justice Kennedy was correct that a full First Amendment analysis must consider both benefits and burdens on the speech. As Justice Kennedy observed, “[T]he necessary rationale for applying intermediate scrutiny is the promise that zoning ordinances like this one may reduce the costs of secondary effects [the service inquiry] without substantially reducing speech [the restrictiveness inquiry].”

Justice Souter’s dissent in Alameda Books was thus in error when it stated, “Although the goal of intermediate scrutiny is to filter out laws that unduly burden speech, this is achieved by examining the asserted government interest, not the burden on speech, which must simply be no greater than necessary to further that interest.” 153 Justice Souter’s “asserted government interest” is the intermediate requirement of a substantial government interest, and Justice Souter’s “no greater than necessary” analysis is the overinclusiveness inquiry, which must be done. Justice Kennedy’s restrictiveness inquiry, however, must also be done to do a complete First Amendment intermediate review analysis of burdens. And, as always under standard intermediate scrutiny, this third prong restrictiveness inquiry is a separate inquiry from the prong one requirement of a substantial government interest.

Justice Souter’s dissent correctly noted, however, that there are in fact two different versions of

---

151 491 U.S. at 798-99.
152 535 U.S. at 450 (Kennedy, J., concurring).
153 Id. at 464 n.8 (Souter, J., joined by Stevens, J., Ginsburg, J., & Breyer, J., dissenting).
intermediate scrutiny used in the Court’s First Amendment cases. One version, which Justice Souter termed the “comparatively softer intermediate scrutiny,” is appropriately used for “restrictions going only to time, place, and manner or speech,” since in those cases “[n]o one has to disagree with any message to find something wrong with a loudspeaker at three in the morning.”154 In other cases, however, where the government proffers a content-neutral justification, but there is a greater reason to “ensure that an asserted rationale does not cloak an illegitimate governmental motive,” as in cases involving the “[r]egulation of commercial speech,” the Court uses the higher intermediate review standard of Central Hudson Gas & Elec. Corp. v. Public. Serv. Comm’n.155

As discussed at § 30.3.2 nn.228-30, the intermediate review with bite standard of Central Hudson is more stringent than basic intermediate scrutiny on the second prong of the test – that is, it requires that the governmental statute satisfy the strict scrutiny requirement of both directly and substantially advancing the government’s interest, not mere indirect, substantial advancement. However, the Central Hudson test adopts the intermediate scrutiny test for the third prong of the analysis, by not requiring a least restrictive alternative analysis, but only that the statute not substantially burden more speech than necessary.

Having made these points, Justice Souter is correct that regulations of speech that are content-neutral because the government’s focus is on secondary effects are logically different than regulations of speech that are content-neutral because they are merely reasonable time, place, or manner regulations. Historically, such secondary effects regulations, or, in Justice Souter’s words, “content-correlated” regulations, have been given the same kind of “basic” or “softer” intermediate scrutiny as time, place, or manner regulations. Justice Souter, however, does make an argument that such content-correlated regulations should perhaps be given higher scrutiny.156 If so, the better approach would be to adopt the Central Hudson test for these cases.

The intermediate review with bite used in Central Hudson actually tracks Justice Souter’s concerns in Alameda Books, and thus would seem to be appropriate to use. As Justice Souter indicated, the real extra concern in these “content-correlated” cases is a risk of viewpoint discrimination. He noted that this risk of viewpoint discrimination “is subject to a relatively simple safeguard, however. If combating secondary effects of property devaluation and crime is truly the reason for the regulation, it is possible to show by empirical evidence that the effects exist, that they are caused by the expressive activity subject to the zoning, and that the zoning can be expected either to ameliorate them or to enhance the capacity of the government to combat them (say, by concentrating them in one area), without suppressing the expressive activity itself.”157 Or to phrase it more simply, it should be possible to show that the regulation is “directly” related to dealing with the property devaluation and crime problem without resorting to an indirect chain of causation beginning with “suppressing the expressive activity itself.” As discussed at § 30.3.2 nn.228-30, such a showing of

154 Id. at 455 (Souter, J., joined by Stevens & Ginsburg, JJ., dissenting).
155 Id. at 458 n.3, citing Central Hudson, 447 U.S. 557, 569 (1980).
156 Id. at 455-58 & n.2.
157 Id. at 457.
a direct relationship between means and ends is what distinguishes the intermediate review with bite standard of *Central Hudson* from basic intermediate review.

If this understanding were adopted, then all secondary effects cases, like *United States v. O'Brien*, would use this “higher” intermediate review with bite kind of intermediate review, while time, place, or manner cases would use the “softer” basic intermediate review. Once this issue is addressed, there likely will be debate on the Court whether the current understanding of *O'Brien* adopts this higher standard of scrutiny. In *Alameda Books*, Justice Souter, joined by Justices Stevens and Ginsburg, indicated his belief that the *O'Brien* test does represent this more stringent kind of intermediate scrutiny consistent with *Central Hudson*. For example, while the precise language in *O'Brien* speaks only of “substantially furthering” the government’s interest, not “direct” furtherance, it is true on the facts in *O'Brien* that the government’s ban on burning a draft card did “directly” advance the government’s interest in preserving the card for use in the Selective Service System, so the government in *O'Brien* could have met the *Central Hudson* test. Historically, as indicated in Justice Kennedy’s majority opinion in *Ward v. Rock Against Racism*, *O'Brien* has been viewed as a basic intermediate scrutiny case, similar to time, place, or manner regulations. Whether the additional level of rigor supported by Justice Souter’s analysis of “content-correlated” regulations is worth adopting a separate level of scrutiny for these cases, higher than the scrutiny for “time, place, or manner” regulations, rather than just having all content-neutral regulations, whether “content-correlated” secondary effects cases or “time, place, or manner” cases subjected to one intermediate standard of review, is open to some doubt.

This issue does raise the question, however, what to do about secondary effects cases that involve complete bans on speech, rather than secondary effects cases that involve only partial bans of a time, place, or manner variety. As discussed at § 29.4.1 n.98, in *City of Erie v. Pap’s A.M.* Justices Stevens and Ginsburg noted that prior to *Pap’s A.M.* all the Court’s secondary effects cases had not involved complete bans on certain kinds of speech. This fact suggests the difficult line-drawing that might have to be done under Justice Souter’s proposed approach, if different standards for “secondary effects” and “time, place, or manner” regulations were adopted. What of a regulation based on a secondary effects rationale that involves a time, place, or manner ban, as most of them do? If only complete bans based on secondary effects trigger the higher *Central Hudson* test, then Justice Souter’s proposed approach would have little practical effect. Further, it would call for line-drawing on whether a ban, like that in *Pap’s A.M.*, on complete nudity is a complete ban on totally nude dancing, as it was viewed by Justices Stevens and Ginsburg, or is merely a manner regulation of permitting erotic dancing but only with a G-string, as viewed by Justice O’Connor in her opinion for the Court. Instead, if every secondary effects case triggers the *Central Hudson* test, even time, place, or manner regulations based on secondary effects, a principled justification would need to be developed, presumably based on “content-correlated” concerns, for those time, place, or manner cases having a higher standard of review than other time, place, or manner cases.

---

158 *Id.* at 456 n.2 & 458 n.3 (Souter, J., joined by Stevens & Ginsburg, JJ., dissenting).

The Court can avoid all these difficult category questions by just continuing the current approach that any content-neutral secondary effects case, and any content-neutral time, place, or manner regulation, triggers the same basic intermediate standard of review. Any heightened intermediate scrutiny, such as proposed by Justice Souter, does not seem to be worth the candle. Further, any truly complete ban on speech based on a secondary effects rationale would seem to have trouble even under current doctrine meeting the intermediate prong three restrictiveness requirement that it not be a “substantial burden” on speech, but instead leave open “ample alternative channels for communication.”

Of course, these cases should all involve a full application of the basic intermediate standard of scrutiny. In Justice O’Connor’s plurality opinion in Alameda Books,160 based upon her similar use of language in Erie v. Pap’s A.M., the O’Brien intermediate test seemed to be “watered-down” into some version of a hybrid kind of rational relationship to a substantial government interest test. That would be inconsistent with O’Brien, as well as represent an unnecessary and unwise proliferation in standards of review. In Pap’s, as well as prior cases, the Supreme Court viewed the O’Brien test as a version of intermediate review.161 Under basic intermediate review, the government has the burden to demonstrate that the statute advances substantial or important governmental interests, the statute is substantially related to advancing those interests, and the statute is not substantially more burdensome than necessary. In the First Amendment context, the Court usually requires that for a statute not to be substantially too burdensome the statute must “leave open ample alternative channels of communication.”162 The Court’s opinion in O’Brien required each of these elements.

At to the first element, the Court concluded in O’Brien that the government’s interest “in having a system for raising armies that functions with maximum efficiency and is capable of easily and quickly responding to continually changing circumstances” was a “vital interest,” thus satisfying the requirement that the government’s interest be important or substantial.163 Second, the Court required the government to establish “that the continuing availability to each registrant of his Selective Service certificates substantially furthers the smooth and proper functioning of the system that Congress has established to raise armies.”164 Indeed, the Court spent a number of pages discussing how the requirement of a certificate substantially furthers the government’s interest, thus giving the

163 O’Brien, 391 U.S. at 381 (emphasis added).

164 Id. (emphasis added).
government a “substantial interest in preventing their wanton and unrestrained destruction.”165 Finally, the Court noted that the statute was “an appropriately narrow means of protecting [the government’s] interest and condemns only the independent noncommunicative impact of conduct within its reach.”166

When summing up this approach in O’Brien, however, the O’Brien Court conflated the inquiry of government ends and the inquiry into statutory means. Thus, the Court concluded that because the statute involved “vital” government ends, and “substantially furthers” the government’s ends, that meant the government had a “substantial interest” in assuring the continued existence of Selective Service certificates.167 The Court then phrased the O’Brien test as whether the government regulation “furthers an important or substantial governmental interest.”168

Devoid of the context and the rest of the Court’s opinion in O’Brien, this phrasing of the test may suggest that the government in O’Brien only needed to show some rational reason to believe the government’s interest is furthered to some extent, a rational review kind of relationship to benefits inquiry. This is how Justice O’Connor’s plurality opinion in Pap’s A.M. read the O’Brien test, accusing Justice Souter, in dissent, of “conflating” two distinct concepts under O’Brien: whether there is a substantial governmental interest and whether the regulation furthers that interest.169 However, when O’Brien is read in context, the O’Brien Court clearly required the statute to “substantially further” the government’s interest. As noted above, the Court’s use of the phrase “substantial government interest” in O’Brien included both a requirement that the government’s interest be “substantial” and that the statute “substantially further” those ends.

To be consistent with O’Brien, one should phrase the O’Brien test as the standard phrasing under intermediate scrutiny that the statute substantially further important or substantial governmental interests, and not be substantially more burdensome than necessary. Justice O’Connor’s language in her plurality opinion in Alameda Books that the city only needs to show that “it is rational for the city to infer that reducing the concentration of adult operations in a neighborhood . . . will reduce crime”170 is thus a “watered-down” version of O’Brien. A similar “watered-down version” of the Central Hudson test for commercial speech in Posadas was later recognized by a majority of the Court as a “watered-down” version and thus overruled in Liquormart, as discussed at § 30.3.2 nn.246-48.

167 Id. at 381.
168 Id. at 377.

Page 1384
Additionally, as an intermediate scrutiny test, the government does have the burden in *O'Brien* to make the showing of a substantial governmental interest and a substantial relationship, which is what Justice Souter required in his dissent in *Pap's A.M.* In applying this test, however, Justice O'Conner is right in stating in her plurality opinion in *Pap’s A.M.* that the government need not always conduct its own studies, “so long as whatever evidence the city relies upon is reasonably believed to be relevant to the problem that the city addresses.” But the ultimate burden of proof should remain on the government, as it was in both *O'Brien* and *Renton*. As stated in *O'Brien*, “In conclusion, we find that because of the Government’s substantial interest . . ., a sufficient government interest has been shown to justify O’Brien’s conviction.” In *Renton*, the Court noted that while the “Court of Appeals imposed on the city an unnecessarily rigid burden of proof,” the burden still remained on Renton, which was “entitled to rely on the experiences of Seattle and other cities, and in particular on the ‘detailed findings’ summarized in the Washington Supreme Court’s *Northern Cinema* opinion, in enacting its adult theater zoning ordinance.” It appears in *Alameda Books* that the ultimate burden does remain on the government even in Justice O’Connor’s opinion. Justice O’Connor stated, “If plaintiff succeed in casting doubt on the municipality’s rationale . . . either by demonstrating that the municipality’s evidence does not support its rationale or by furnishing evidence that disputes the municipality’s factual findings, the burden shifts back to the municipality to supplement the record with evidence renewing support for a theory that justifies the ordinance.  

Despite these various disagreements, some real and some only potential, among Justices O’Connor, Kennedy, and Souter regarding the details of the proper tests in First Amendment cases, it is likely that over time the Court will clarify First Amendment doctrine in a manner faithful to Court precedents. After all, natural law Justices are committed to a reasoned elaboration of the law in light of the Court’s precedents. As noted at §§ 12.4.1-12.4.3, Justice Kennedy may have an occasional affinity for a formalist approach that, like Justice Black, would prefer an absolutist First Amendment position in cases of content-based regulation, as in Justice Kennedy’s concurrences in *Simon & Schuster* and *Republican Party of Minnesota v. White*, discussed at § 29.2 nn.58-59. Justice O’Connor may have had an occasional affinity for the Holmesian deference to government style of interpretation that may explain a predisposition to “water-down” the intermediate scrutiny test in *Pap’s A.M.*, discussed at § 29.4.4.3 nn.160-70. Justice Souter may have an occasional affinity for the instrumentalist position that will cause him to propose a slighter higher standard of review more protective of free speech in *Alameda Books*, discussed at § 29.4.4.3 nn.154-59. At the end of the day, however, the modern natural law approach is likely to come together around a reasoned

elaboration of the Court’s precedents regarding the standards of review in First Amendment cases as they have elaborated in the modern era, clarifying that as the majority approach on the Court.

§ 29.5  The Public versus Non-Public Forum Distinction

§ 29.5.1  Classic Statement of the Public/Non-Public Forum Distinction

As noted at § 29.2 nn.67-68 & Table 29.2, the Court applies a different standard of scrutiny to government regulations of speech in non-public forums owned by the government. The leading case on what standard of review to apply in such non-public forums remains Perry Education Association v. Perry Local Educators’ Association.176 Decided in 1983, Perry held that a school could reserve access to an interschool mail system and to teacher mailboxes for the union certified as the exclusive representative of the teachers. Summarizing and organizing precedents, Justice White first pointed out that strict scrutiny applied to content-based exclusions from a public forum, from public property which the state has opened for use by the public as a place for expressive activity, or for government attempts to regulate individual speech on an individual’s own “non-public” private property. However, with regard to non-public forum property owned by the government, the state can impose time, place, or manner restrictions, and also may reserve the forum for its intended purposes, as long as the regulation on speech is reasonable and not an effort to suppress expression merely because public officials oppose the speaker’s view, i.e., viewpoint discrimination.

The facilities at issue in Perry were a non-public forum, Justice White said, as there was no indication in the record that the system had been opened for use by the general public. A few instances of access by organizations such as the YMCA or the cub scouts had not transformed the government property into a public forum. The fact that the challengers at one time could use the system had no legal effect because at that time there was no exclusive union representation for the teachers to which the restrictions on access were related.

Applying a reasonableness test, the Court said that use of school mail facilities enabled the certified union to perform its obligations effectively. The Court also noted that substantial alternative channels remain open to the challengers, such as bulletin boards, meetings, and the mail. Nor was there viewpoint discrimination because access was based on the status of the respective unions, rather than on their views. Thus, the Court concluded that there was no violation because the policy reasonably furthered a legitimate state purpose, i.e., facilitating the carrying out of the special responsibilities of an exclusive bargaining agent.

In reaching this decision, Justice White distinguished Police Department of Chicago v. Mosley,177 and Carey v. Brown,178 where the Court struck down prohibitions on peaceful picketing in a public forum which exempted labor picketing. Justice White explained, “The key to those decisions, however, was the presence of a public forum. In a public forum, by definition, all parties have a

177  408 U.S. 92, 95-99 (1972).
constitutional right of access and the State must demonstrate compelling reasons for restriction of access to a single class of speakers, a single viewpoint, or a single subject.”179

Justice Brennan dissented in Perry with Justices Marshall, Powell, and Stevens. Justice Brennan said that the exclusive-access provision in the collective-bargaining agreement amounted to viewpoint discrimination, which should always trigger strict scrutiny, even in a non-public forum. He said the access policy favors a particular viewpoint on labor relations in the Perry schools. Under a strict scrutiny analysis, the policy was overinclusive because it did not strictly limit the petitioner’s use of the mail system to performance of its special legal duties, and was underinclusive because the Board permitted other organizations with no special duties to teachers or students to use the system. Finally, there was no showing that an interest in preserving labor peace was advanced by the policy.180

The decision in Perry was based on earlier decisions in the instrumentalist era which had implicitly recognized that governments own property that had not been dedicated to expressive activity. For example, in Adderley v. Florida,181 a case upholding a criminal trespass conviction of demonstrators on grounds of a jail, Justice Black wrote for the Court, “The State, no less than a private owner of property, has power to preserve the property under its control for the use to which it is lawfully dedicated.” Similarly, with the exception of viewpoint discrimination, which always triggers strict scrutiny, as noted at § 29.4.3.1, a prison can regulate the speech of prisoners for reasons reasonably related to penological objectives under a rational review approach, as in Thornburgh v. Abbott.182 A similar result was reached in Greer v. Spock183 with regard to handbill distribution on a military base, and well as in Brown v. Glines184 concerning reasonable safeguards regarding military security and morale.

Where government owned property has been open to the public, standard First Amendment public forum doctrine applies. For example, in Southeastern Promotions, Ltd. v. Conrad,185 the promoters of the musical “Hair,” requested to use the municipal auditorium in Chattanooga, Tennessee. The auditorium managers denied the request on the ground that the production would not be in the best interest of the community. The promoters sought an injunction, which was denied on the ground that the production was obscene and not entitled to First Amendment protection.

179 460 U.S. at 55.
180 Id. at 55-57, 66-69 (Brennan, J., joined by Marshall, Powell & Stevens, JJ., dissenting).
Reversing that judgment, the Court held that the auditorium, having been designed for and dedicated to expressive activities, was a public forum. Since the theater could accommodate the production, the denial of a request constituted the imposition of a prior restraint. This could not be done by a content-based regulation unless the minimal procedural safeguards specified in Freedman v. Maryland were complied with. Those safeguards were:

1. a burden on the city to seek judicial proceedings and prove the material is unprotected;
2. insurance that any restraint prior to judicial review could be imposed only for specified brief period and only for the purpose of preserving the status quo; and
3. assurance of a prompt and final judicial determination.

Justice White, joined by Chief Justice Burger, and Justice Rehnquist filed dissents. Reflecting more of a Holmesian deference-to-government predisposition, the dissents concluded that where a theater is owned by the city, the court should apply non-public forum standards requiring only rational review. Here, it was not unreasonable for the city to limit attractions in its theater to those which would not offend any substantial number of potential theatergoers and where there were no allegations that the city was discriminating because of any expressions of political or social belief.

Of course, if the government had a content-neutral reason for regulating, only an intermediate standard of scrutiny would apply. As the Court noted in Thomas v. Chicago Park District, “We have never held that a content-neutral permit scheme regulating speech in a public forum must adhere to the procedural requirements set forth in Freedman.”

The 1983 Perry case put Southeastern Promotions into a larger framework by recognizing three kinds of forums owned by the government. The first was the traditional public forum in which content-based regulations must be justified by strict scrutiny and content-neutral regulations by a form of intermediate scrutiny. The second kind was a designated public forum, opened by the state as a place for expressive activity. Although the state is not required indefinitely to retain the open character of the facility, as long as it does so it is bound by the same standards that apply in a traditional public forum. Then there are non-public forums. As to those forums, Justice White said, “In addition to time, place, and manner regulation, the State may reserve the forum for its intended purposes, communicative or otherwise, as long as the regulation on speech is reasonable and not an effort to suppress expression merely because public officials oppose the speaker’s

190 Perry, 460 U.S. 37, 45 (1983).
Although this opinion was very helpful in developing a set of forum categories, it did not clarify the extent to which, in classifying the nature of a forum, the government’s intent or the objective nature of a facility is determinative. In general, formalist Justices focus more on the government’s intent, and whether the government has expressly, or literally, opened the forum for public use. Holmesian Justices also tend to focus on governmental intent, deferring to the government’s contention in litigation that the forum is a non-public forum unless the opposite conclusion is clear. In contrast, instrumentalist and natural law Justices focus more on whether the objective nature of the forum is compatible with free speech uses. Based on their predisposition to protect free speech rights, particularly of the poor and dissenters, instrumentalist Justices tend to resolve close questions more in the direction of finding that the forum is a public forum than do natural law Justices.

For example, in 1985, in *Cornelius v. NAACP Legal Defense and Educational Fund*, the Court upheld a federal rule limiting its annual workplace charitable fundraising drive (CFC) to organizations that provide or support direct health and welfare services to individuals or their families, thus excluding advocacy, lobbying, and litigating organizations. Justice O'Connor first said that charitable solicitation of funds is protected speech, even in the brief statements allowed in CFC literature, since those statements directly advance the speaker's interest in informing readers about its existence and goals. As to whether the CFC was a public or non-public forum, Justice O'Connor adopted an approach reflective of her occasional affinity for a Holmesian approach, discussed at § 12.4.2, making the government’s intent the critical issue in determining the nature of a forum that it had opened. However, she also indicated that in resolving that matter the Court should consider not only the government’s policy and historical practice of the government, but also the objective nature of the property and its compatibility with expressive activity. In this case, Justice O’Connor said the historical background indicated that CFC was designed to minimize disruption from ad hoc solicitation by lessening the amount of expressive activity occurring on federal property, and thus the forum had not been open to the public.

Because it was a non-public forum, rational review applied. Justice O'Connor said that the reasonableness of government action is judged in light of the purpose served by the forum and all the surrounding circumstances. Applying this test, Justice O’Connor concluded that the purpose of CFC was to minimize disruption, assure fundraising success, and avoid the appearance of political favoritism. The limits on who might participate were reasonable because limiting participation to widely accepted groups likely will avoid controversy and contribute to ultimate success. Further, the President could reasonably conclude that a dollar directly spent is more beneficial than a dollar spent in litigation that might not be successful. Remanded to lower courts was the issue of whether the exclusion was motivated by a desire to suppress a particular point of view. The lower courts had not considered this issue, and the Court did not want to decide the matter in the first instance. If viewpoint discrimination were involved, strict scrutiny would apply even in a non-public forum.

---

191  *Id.* at 46.

Justice Blackmun dissented, with Justice Brennan. Justice Blackmun said that the compatibility part of Justice O’Connor’s test was critical to him, so that if speech is found compatible with the normal uses of government property, he would find that the government had opened a limited public forum and would apply strict scrutiny to exclusion policies. Further, he thought the exclusion was viewpoint-based discrimination, triggering strict scrutiny even if it were a non-public forum. Applying that level of scrutiny, Justice Blackmun did not find that the interests identified by Justice O’Connor were necessary for a compelling interest. Increasing contributions may be compelling, but that does not justify the exclusion of groups who work to enforce the rights of minorities through litigation. A simple disclaimer would suffice to achieve the government's interest in avoiding the appearance of support. As to avoiding controversy, the government should have to show that the excluded speech would disrupt other activities. In fact, however, the evidence showed increased contributions during years the respondents were allowed to participate. Justice Stevens also dissented, based on a view that, without regard to public or non-public forum analysis, the government’s exclusion of the designated charities could not survive rational review.

§ 29.5.2 Modern Development of the Public/Non-Public Forum Distinction

The instrumentalist Court never classified any public property like parks or streets as other than a traditional public forum. However, in 1988 it was argued by challengers in *Frisby v. Schultz* that a street should lose its status as a traditional public forum when it runs through a residential neighborhood. This argument was rejected by the Court in an opinion by Justice O’Connor, which noted that since 1939 in *Hague v. Committee for Industrial Organization*, discussed at § 29.1.3 nn.26-27, the Court had uniformly held that public streets and parks are public forums held in “trust” for the public. Applying intermediate scrutiny to a content-neutral regulation in a public forum, the Court upheld a content-neutral ban on picketing directed at a single residence in order to protect residential privacy. Describing residents as a captive audience, Justice O’Connor wrote, “The First Amendment permits the government to prohibit offensive speech as intrusive when the ‘captive’ audience cannot avoid the objectionable speech.”

Justice Brennan, joined by Justice Marshall, dissented and said that the ordinance was not narrowly tailored because it might be applied to a lone, silent individual, walking back and forth with a sign. Justice Stevens, also dissented, viewing the ordinance as “substantially overbroad” and thus in violation of the overbreadth doctrine, discussed at § 29.6.1.5.

Page 1390
In 1990, a sidewalk question came again before the Court in United States v. Kokinda. The Court upheld a postal regulation which forbade soliciting charitable contributions on postal premises, as applied to solicitors for the National Democratic Policy Committee who had set up a table for in-person solicitation on a sidewalk outside the postoffice. Justice O'Connor's plurality opinion, joined by Holmesians Chief Justice Rehnquist and Justices White, and formalist Justice Scalia, reasoned that because the sidewalk leading to and from the post office was constructed for the purpose of entering and leaving the post office, not for general use of the public, the sidewalk was a non-public forum. The regulation barring solicitation on postal premises was constitutional as viewpoint neutral and reasonable in view of the fact that solicitation was inherently disruptive of the Postal Service's business. Justice Kennedy concurred only in the judgment, noting that “the public’s use of postal property for communicative purposes means the surrounding sidewalks” may be a public forum. However, he said it was unnecessary here to decide whether the sidewalk was a public or a non-public forum because the postal regulations met the traditional intermediate review standards for a content-neutral time, place, and manner regulation of protected expression in a public forum.

Justice Brennan dissented, with Justices Marshall, Blackmun, and Stevens. Justice Brennan said that a sidewalk adjacent to a public building to which citizens are freely admitted is a natural location for speech to occur and, thus, is a traditional public forum or a limited public forum. Brennan added that even if strict scrutiny were not required, the regulation was not reasonable under rational review because the government did not subject to the same categorical prohibition many other types of speech presenting the same risk of disruption as solicitation, such as soapbox oratory, pamphleteering, distributing literature for free, or even flag burning.

Another case involving how to determine what kind of forum has been opened by the government is International Society for Krishna Consciousness v. Lee. Chief Justice Rehnquist wrote for a majority that a public airport terminal was not a public forum and reasonably could ban the repetitive solicitation of money within its terminals. With respect to the nature of the forum, the Chief Justice’s opinion was joined unreservedly by Justices White, Scalia, and Thomas, and, in a concurrence, by Justice O’Connor. Adapting the formalist and Holmesian focus on government intent, Rehnquist said that the decision to create a public forum is made by intentionally opening a non-traditional forum for public discourse. The tradition of airport activity does not demonstrate that airports have historically been opened for speech activity, and the operators have frequently objected in litigation to such activity. It is not persuasive that speech activity has occurred at various "transportation nodes," such as rail stations, because they traditionally have had private ownership and here the relevant unit is the airport, not "nodes" generally. Airports are commercial enterprises, whose management considers their purpose to be the facilitation of passenger air travel. Therefore, only a reasonableness standard need be applied. Viewing the case against a background of

---

198 Id. at 737-38 (Kennedy, J., concurring in the judgment).

199 Id. at 740-60 (Brennan, J., joined by Marshall, Blackmun & Stevens, JJ., dissenting).

substantial congestion, Chief Justice Rehnquist, with Justices White, Scalia, and Thomas, upheld both a ban on solicitation and a ban on literature distribution, including leafleting. Rehnquist noted that allowing solicitation on outside sidewalks, as provided by the airport managers, gives sufficient access to an area universally traveled.

Justice O'Connor agreed that the airport was not a public forum because no intent had been expressed to open airports to the types of expression here involved. She said, however, that the reasonableness inquiry is whether the restrictions are consistent with the multipurpose environment deliberately created. Solicitation of money impedes the normal flow of travel and risks confrontation with a person asking for money. Thus that ban was reasonable. However, the ban on leafleting was not reasonable given the minimal disruption caused by a person giving out information.201

Justice Kennedy, joined by Justices Blackmun, Stevens, and Souter, said that an airport is a public forum. Focusing more on the objective characteristics of the property, Justice Kennedy concluded that public forum status should be given to property if its physical characteristics and actual public uses permitted by the government indicate that expressive activity would be appropriate and compatible with those uses. Under this test, airport terminals are a public forum because their public spaces are broad, they have public thoroughfares full of people, and they are lined with stores and other commercial activities. And there had been no showing that any real impediments could not be cured with reasonable time, place, or manner regulations.202 Given the current membership on the Court, this approach would likely be adopted by a majority of Justices, composed of Justices Stevens, Kennedy, Souter, Ginsburg, and Breyer.

Applying intermediate scrutiny appropriate for content-neutral regulations in a public forum, Justice Kennedy concluded that the ban on solicitation for the receipt of money was valid as a time, place or manner restriction. This behavior creates a risk of fraud and duress, and there are ample alternatives because the solicitor can give a pre-addressed envelope. However, the ban on distributing or selling literature was invalid. The government has less interest and the danger of fraud is more limited. Justices Souter, Blackmun, and Stevens thought that both bans were invalid. The claim for duress was weak and there was no evidence of coercive conduct. There was almost no evidence of fraud. Ample alternative channels for solicitation did not exist because the distribution of pre-addressed envelopes is unlikely to be much of an alternative.203

Reflecting more the “objective” characteristics of the property approach of the Kennedy concurrence in Lee, lower federal courts since Lee have held that a private sidewalk encircling a privately owned sports arena complex, which appears like any public sidewalk and is used as a public thoroughfare, is a public forum, and that a mass transit agency’s acceptance of advertisements on a wide range of

topics under contracts for display in its stations and vehicles, for the purpose of raising revenue, made such areas designated public fora, triggering public forum First Amendment review.204

§ 29.6 Specialized First Amendment Topics under Current Legal Standards

§ 29.6.1 Process-Based First Amendment Topics

§ 29.6.1.1 Prior Restraints on Speech

A prior restraint is a legal sanction that has the effect of suppressing future speech before there is a judicial finding, after appropriate proceedings, that such speech is not constitutionally protected from restraint. The Court has often emphasized that any prior restraint has a “‘heavy’ presumption against its constitutional validity.”205 This is particularly true because of the collateral bar rule. While a person accused of violating a law can defend on the grounds that the law is unconstitutional, in the case of a prior restraint “a court order must be obeyed until it is set aside” and “persons subject to the order who disobey it may not defend against the ensuing charge of criminal contempt on the ground that the order was erroneous or even unconstitutional.”206

This “heavy” presumption can be seen as far back as the formalist era. In 1931, in 

Near v. Minnesota,207 the Court was confronted with a state statute that permitted courts to enjoin as a nuisance any “malicious, scandalous and defamatory newspaper, magazine, or other periodical.” For the Court, Chief Justice Hughes noted that under the statute an injunction could issue that would make further publication punishable as contempt unless the publisher could prove in an initial hearing that the material was true and published with good motives for justifiable ends. Hughes concluded that an injunction imposed on these grounds would be unconstitutional, as injunctions can be imposed only in exceptional cases, such as the threatened publication of military secrets, or incitements to violence or government overthrow. Such was not the case in Near.

A case that raised directly the issue of publication of military secrets was 

New York Times Co. v. United States (The Pentagon Papers Case).208 This case involved the desire of The New York Times, Washington Post, and other newspapers to publish leaked government documents relating to the ongoing Vietnam war. On an expedited basis, a fragmented Court decided the case 6-3, in nine

207 283 U.S. 697, 701-02 (1931).

208 403 U.S. 713, 718-20 (1971) (Black, J., joined by Douglas, J., concurring); id. at 753-59 (Harlan, J., joined by Burger, C.J., and Blackmun, J., dissenting).
separate opinions. At one extreme, Justices Douglas and Black took an absolutist view that prior restraints are never permissible under the First Amendment. At the other extreme, Chief Justice Burger, and Justices Harlan and Blackmun, concluded that, given the record presented on the expedited review, the prior restraint was justified.

In the middle of the Court, Justices Brennan, White, Stewart, and Marshall held that the prior restraint could not be justified under prior Court precedents. Although the language in each of four opinions which served as the controlling votes was slightly different, each indicated the difficulty in justifying a prior restraint in language tracking a strict scrutiny approach. Justice Brennan wrote that to justify a prior restraint the government must allege and prove that publication of the information would “inevitably, directly, and immediately” cause the happening of an event such as a nuclear holocaust.\textsuperscript{209} Justice Stewart concluded that the government must show that disclosure of the information would result in “direct, immediate, and irreparable damage to our Nation or its people.”\textsuperscript{210} While acknowledging that disclosure in this case might well result in substantial damage to the public interest, Justice White nevertheless concluded that the government had not met its “very heavy burden” in this case.\textsuperscript{211} Justice Marshall based his decision on the fact that Congress had not authorized a prior restraint in this case, and that “[w]hen Congress specifically declines to make conduct unlawful it is not for this Court to redecide those issues – to overrule Congress.”\textsuperscript{212}

For this strict scrutiny analysis to apply, a prior restraint must be involved. In \textit{Alexander v. United States},\textsuperscript{213} the Court rejected an argument that a forfeiture of a bookstore under the RICO statute was a prior restraint. Chief Justice Rehnquist noted that the forfeiture did not forbid any future expressive activities or require prior approval for actions. It merely punished the defendant by depriving him of assets derived from prior racketeering activities. Justice Kennedy dissented, with Justices Blackmun and Stevens, saying that the forfeiture was a prior restraint because it served not only an interest in purging a criminal taint, but also an interest in deterring the activities of his speech-related business.

A prior restraint was upheld in \textit{Snepp v. United States}.\textsuperscript{214} In \textit{Snepp}, a former agent of the Central Intelligence Agency breached his employment contract when he failed to submit for pre-publication review a book concerning the CIA. The Court concluded that, in light of his employment agreement, Snepp should have submitted the proposed book to the CIA, and then if Snepp and the

CIA disagreed on any disclosures, the CIA would have the burden to seek an injunction against publication. Because Snepp failed to follow this procedure, the Court put all the profits from his book into a constructive trust for the benefit of the government. Justice Stevens, joined by Justices Brennan and Marshall, dissented, stating that the Court’s “drastic new remedy [of a constructive trust] has been fashioned to enforce a species of prior restraint on a citizen’s right to criticize his government.”

Reflecting the rigor of the strict scrutiny “least restrictive alternative” test, the Court indicated in *Freedman v. Maryland*215 that for even a temporary prior restraint to be valid the restraint must: (1) put the burden on the government to go to court and bear the burden of proving the speech unprotected; (2) merely preserve the status quo for the shortest fixed period compatible with sound judicial resolution; and (3) provide for a prompt, final judicial disposition of the case. Further, due to the concern expressed by the Court about the repressive character of a prior restraint, strict scrutiny will apply to any injunction that has such a prior restraint impact on speech.216 As an example, in *Tory v. Cochran*,217 the trial court had enjoined the defendant, who had engaged in a pattern of defamatory statements about famous trial attorney Johnnie Cochran, to stop picketing or uttering oral statements about Cochran or his law firm in any public forum. While the case was on appeal, Mr. Cochran died. After concluding the case was not moot, because the injunction remained in force even after Cochran’s death, the Court held that since picketing Cochran and his law office could no longer achieve its objective of forcing Cochran to pay “a tribute” to stop the activity, the injunction was now an overly broad prior restraint upon speech that lack plausible justification.

Of course, as part of management of a trial, a trial court judge may impose a “gag order” on parties not to reveal certain information about the on-going proceedings if such an order can satisfy strict scrutiny by being necessary to advance the compelling government interest of ensuring a fair trial. However, that order rarely could be justified if applied to non-parties to the case. For example, in *Multimedia Holdings v. Circuit Court of Florida*,218 a lower court initially had issued an order seeming to tell both the parties to the case and news media outlets that they would be guilty of a misdemeanor and criminal contempt of court if they published the contents of transcripts of grand jury proceedings. However, the court then entered a second order indicating that the court was only enjoining the parties from publication, and that the first order merely pointed out to news media outlets they might be prosecuted by the district attorney’s office if they revealed secret grand jury proceedings. Thus, although “informal procedures undertaken by officials and designed to chill expression can constitute a prior restraint,” citing *Bantam Books, Inc. v. Sullivan*, and “[w]arnings from a court have added weight,” in this case “any threat once implicit in the court’s first order is much diminished,” and thus no stay of the order pending petition for certiorari was warranted.

216 See *Pittsburgh Press Co. v. Pittsburgh Comm’n on Human Relations*, 413 U.S. 376, 390 (1973); *Carroll v. President and Commissioners of Princess Anne*, 393 U.S. 175, 183-84 (1968).

§ 29.6.1.2  Content-Neutral Injunctions on Speech

A refinement in the standard of review for content-neutral injunctions on speech, rather than content-neutral regulations of speech, was announced by the Supreme Court in *Madsen v. Women's Health Center.*219 There the Court dealt with a challenge to an injunction regarding what actions could be taken by protesters at an abortion clinic. Chief Justice Rehnquist stated that the differences between an injunction and a generally applicable ordinance required somewhat more stringent application of First Amendment principles regarding content-neutral injunctions than the usual time, place, or manner rule, which requires that the law must be "narrowly tailored to serve a significant public interest." The reason closer attention should be paid flows from the general rule that injunctive relief should be no more burdensome than necessary. Thus, the Court said the relevant inquiry is whether a challenged provision "burdens no more speech than necessary to serve a significant government interest." Thus, "no more speech than necessary" was substituted for the “narrow tailoring” or “not burdening substantially more speech than necessary” third prong of intermediate scrutiny.

Applying this heightened test to the facts, the Chief Justice reached the following conclusions, which shed light on the current meaning of burdening “no more speech than necessary”:

1. A 36-foot buffer zone around clinic entrances burdens no more speech than necessary to accomplish the government interests at stake: protecting unfettered ingress and egress.
2. A 36-foot buffer zone to the private property north and west, which staff and patients do not have to cross, burdens more speech than necessary.
3. The noise restrictions were permissible to ensure the health and well-being of patients.
4. A blanket ban on all "images observable" by persons in the clinic burdens more speech than necessary since the clinic can simply pull its curtains.
5. It burdens more speech than necessary to ban all approaches to persons seeking services of the clinic, unless such person indicates a desire to communicate, because in public debate our citizens must tolerate insulting and even outrageous speech in order to provide adequate breathing space to First Amendment freedoms.
6. A ban on picketing, demonstrating, or using sound amplification equipment within 300 feet of the residences of clinic staff is not sufficiently supported in the record as necessary since it appears that a limitation on the time, duration of picketing, and number of pickets outside a smaller zone could have accomplished the same result.220

Justice Scalia, with Justices Kennedy and Thomas, did not think the injunction justified. Justice Scalia first pointed out that the public sidewalk is a public forum and that a restriction on speech imposed by injunction is at least as deserving of strict scrutiny as a content-based restriction because:

---

220 Id. at 768-75.
1. An injunction lends itself as readily to the targeted suppression of particular ideas;
2. The right to free speech should not lightly be placed under control of one person; and
3. The injunction is a more powerful weapon than a statute because the collateral bar rule requires an injunction must be obeyed until reversed by a court on appeal.\textsuperscript{221}

Justice Scalia’s second main point was that even by the standard stated by the Court its performance was inadequate. With respect to the 36-foot buffer zone, Justice Scalia noted that there are many ways to protect interests in ingress and egress. The trial court could have ordered demonstrators to stay out of the street and limited the number of demonstrators on the clinic side, and could have forbidden pickets to walk on the driveways. Of course, under intermediate scrutiny, the government does not have to adopt the least restrictive alternative, as Justice Scalia implicitly suggested here. Justice Scalia also concluded that the Court rendered its new test less stringent than plain old intermediate scrutiny by saying the need for a complete buffer zone may be debatable, but some deference must be given to the trial court. The Court was thus saying that the test is whether the means “arguably burden no more speech than is necessary.” As to noise, there was nothing in the original injunction about noise and there is no indication in the record that there is a Florida law on the matter which had been violated. Thus, these interests cannot qualify as “significant interests.”\textsuperscript{222}

One aspect of the majority’s decision in this case is unquestionably unfortunate. The Court adopted in \textit{Madsen v. Woman’s Health Center, Inc.} an analysis under prong three of heightened scrutiny that was described as being somewhere between the intermediate “not substantially more burdensome” test and the strict scrutiny “least restrictive alternative” test.\textsuperscript{223} From the opinion, it is not clear exactly how much more stringent this test is than traditional intermediate scrutiny, nor are other precedents of any help, since the standard is not used in any other case. As the dissent noted in \textit{Madsen}, “The Court creates, brand-new . . . an additional standard. . . . The difference between it and [intermediate scrutiny] is frankly too subtle for me to describe.”\textsuperscript{224}

In fact, this additional version of the narrowly drawn analysis is unnecessary under the “base plus six” model of scrutiny discussed at § 7.2.1 text following n.42. It is understandable the Court might wish to adopt in \textit{Madsen} a standard of review higher than traditional intermediate scrutiny, which applies to a content-neutral regulation of speech, because \textit{Madsen} involves review of a court injunction rather than a generally applicable ordinance.\textsuperscript{225} The majority opinion in \textit{Madsen} discussed the differences between ordinances and injunctions, and concluded that “these differences require a somewhat more stringent application of general First Amendment principles in this

context.*226 The “base plus six” model gives the Court three well-formed options from which to choose – intermediate with bite, loose strict scrutiny, or strict scrutiny.

The dissent in Madsen opted for strict scrutiny.227 The majority could have achieved basically the same result it reached in the case by adopting the intermediate review with bite standard of Central Hudson, discussed at § 30.3.2 nn.228-30. As the majority’s analysis reveals, where the injunction at issue in Madsen was constitutional, it was because it was “directly related” to the perceived harms and was a close enough fit to satisfy the intermediate “not substantially more burdensome than necessary” test. The Court found that a 36-foot buffer zone in front of an abortion clinic was directly related to protecting unfettered ingress and egress from the clinic, and a close enough fit given the deference due to the state court’s familiarity with the factual background, and the Court concluded that the regulation of noise levels was directly related to the need for noise control around hospitals and medical facilities.228 Where the injunction was unconstitutional, it was because it was not directly related to perceived harms, or not a close enough fit, and thus substantially overbroad. The Court concluded that inclusion of 36-foot buffer zone at the back and side of the clinic was not directly related to ingress and egress from clinic, nor was the prohibition on all uninvited approaches to persons seeking to enter the clinic directly related to preventing clinic patients from being stalked or shadowed.229 The Court concluded that banning all images observable from the clinic was not narrowly drawn given the substantially less burdensome option for the clinic to pull its curtains, and the 300-foot ban on picketing around the clinic was “much larger” than necessary and substantially overbroad.230

§ 29.6.1.3 Government Fees or Permits to Speak

Where the government has a content-neutral justification for imposing a fee prior to permitting speech, such as ensuring two groups are not trying to speak at the same time in the same place, or ensuring that the costs are covered of cleaning up any littering that might occur following an event, the court applies an intermediate standard of review. As typically phrased,231 such laws are only allowed if the government has: (1) an important, content-neutral reason for the regulation (the prong one requirement of an intermediate standard of review requiring an important or substantial interest); (2) there are clear criteria leaving no overly broad discretion to the licensing authority (the prong two requirement of ensuring the regulation is substantially related to advancing the important

Page 1398
content-neutral interest and is not a cover for content-based discrimination; and (3) procedural safeguards, such as requiring prompt determinations as to license requests and judicial review of license standards (the prong three requirement of the regulation not being substantially more burdensome than necessary and not imposing substantial burdens on free speech).

A case where a permit fee was held constitutional is *Cox v. New Hampshire*.232 In this case, the Court confronted a state statute that required payment of a license fee up to $300 to local governments for the right to parade in the public streets. The fee could be adjusted based on the size of the parade, as the fee "for a circus parade or a celebration procession of length, each drawing crowds of observers, would take into account the greater public expense of policing the spectacle, compared with the slight expense of a less expansive and attractive parade or procession." The Court stated, "There is nothing contrary to the Constitution in the charge of a fee limited to the purpose stated. The suggestion that a flat fee should have been charged fails to take account of the difficulty of framing a fair schedule to meet all circumstances, and we perceive no constitutional ground for denying to local governments that flexibility of adjustment of fees which in the light of varying conditions would tend to conserve rather than impair the liberty sought.” Because collecting a modest fee to reimburse for public expense in policing events is an important government interest that is not a substantial burden on free speech, and the permit system substantially limited the discretion of the licensing board in determining the amount of the fee, and required the permit to be granted as long as the area was not already committed to the use by another group, the Court indicated that the fee system was constitutional.

Where the fee provision is drafted in a way that could permit viewpoint discrimination, the Court applies a strict scrutiny approach. For example, in *Forsyth County, Georgia v. Nationalist Movement*,233 the Court considered fee provisions for assembling or parading on public property where, other than imposing a $1,000 maximum, they vested an official with discretion that could permit viewpoint discrimination in setting the fee. That could occur if the fee was made to depend on the content of the speech, as by estimating the cost needed to protect participants from audience hostility to the content. The Court said that the fee requirement was a prior restraint, but could be upheld if it did not delegate overly broad licensing discretion to a government official and, as a time, place, or manner restriction, was not based on the content of the message, was narrowly tailored to serve a significant government interest, and left open ample alternatives for communication. In the particular case, the Court noted that there were no standards in the ordinance to guide a decision on the amount of the fee, and the evidence indicated that the administrator was not required to rely, and did not always rely, on objective factors. Thus, there was nothing to prevent the official “from encouraging some views and discouraging others through the arbitrary application of the fees.” The maximum cap did not save the law because a tax based on the content of speech does not become more constitutional because it is a small tax. A dissent would have remanded the case to determine whether the phrase "maintenance of public order" would support the imposition of fees based on the size of opposition crowds.234

232 312 U.S. 569, 576-78 (1941).

234 Id. at 140-42 (Rehnquist, C.J., joined by Justices White, Scalia & Thomas, JJ., dissenting).
Despite *Cox* suggesting an intermediate scrutiny kind of approach, and *Forsyth Country* suggesting strict scrutiny, it was unclear prior to 2002 what was the exact standard of review in these cases. The Court appeared to use in *Forsyth County* the strict scrutiny approach of *Freedman v. Maryland*, noted at § 29.6.1.1 nn.215-16, which was developed in the context of a licensing system that concerned the content-based decision of whether a movie was obscene. On the other hand, the cite to *Freedman* in *Forsyth County* supported a sentence that required only that the permit system “not delegate overly broad licensing discretion to a government official,” which reflects an intermediate approach, rather than strict scrutiny.

In *Thomas v. Chicago Park District,* a unanimous Court clarified in 2002 that the procedural standards required are different in content-based versus content-neutral cases, with content-based licensing, permit, or fee systems having to meet the *Freedman* strict scrutiny test, while content-neutral regulations only have to meet the less stringent test of “adequate standards to guide the official's decision and render it subject to effective judicial review.” This test was supported by a cite to the 1951 case, *Niemotko v. Maryland.* Reflecting an intermediate standard of scrutiny, focused on narrowly drawn regulations to advance a substantial governmental interest, *Niemotko* phrased the relevant test as indicating a permit system would fail where “[n]o standards appear anywhere; no narrowly drawn limitations; no circumscribing of this absolute power; no substantial interest of the community [is] to be served.” Justifying this lower level of scrutiny, Justice Frankfurter stated in a concurrence in *Niemotko,* “A licensing standard which gives an official authority to censor the content of a speech differs *toto coelo* from one limited by its terms, or by nondiscriminatory practice, to considerations of public safety and the like.”

In *Watchtower Bible and Tract Society of New York, Inc. v. Village of Stratton,* the Court used the intermediate approach of *Thomas* to strike down an ordinance requiring individuals to obtain a permit prior to engaging in door-to-door advocacy and to display the permit upon demand. Although the Court acknowledged that the prevention of fraud, the protection of residents' privacy,

---

236 *Forsyth County*, 505 U.S. at 130.

239 *Id.* at 282 (Frankfurter, J., concurring in the result). *See also* Burk v. Augusta-Richmond County, Georgia, 365 F.3d 1247 (11th Cir. 2004) (ordinance, adopted in advance of expected protests by women’s groups at the Masters Golf Tournament, which requires a permit for political demonstrations and submission of indemnification suitable to city attorney, discriminates on the basis of content, and gives city attorney unbridled discretion to deny indemnification pacts).

and crime prevention were important interests, the statute was not narrowly tailored, either because it was not substantially related to advancing the interests, as for fraud or crime prevention, or was substantially more burdensome than necessary, as for protection of residential privacy. The Court noted:

Even if the interest in preventing fraud could adequately support the ordinance insofar as it applies to commercial transactions and the solicitation of funds, that interest provides no support for its application to petitioners, to political campaigns, or to enlisting support for unpopular causes. . . . With respect to [residential privacy], it seems clear that § 107 of the ordinance, which provides for the posting of "No Solicitation" signs and which is not challenged in this case, coupled with the resident's unquestioned right to refuse to engage in conversation with unwelcome visitors, provides ample protection for the unwilling listener. With respect to [prevention of crime], it seems unlikely that the absence of a permit would preclude criminals from knocking on doors and engaging in conversations not covered by the ordinance. They might, for example, ask for directions or permission to use the telephone, or pose as surveyors or census takers. Or they might register under a false name with impunity because the ordinance contains no provision for verifying an applicant's identity or organizational credentials.

Reflecting the fact that at intermediate scrutiny the government bears the burden to justify its statute, and cannot justify it “on any conceivable basis,” but must use “actual or plausible” governmental interests, discussed at § 26.1.3 nn.92-99, Justice Breyer noted that here the interest in crime prevention was not alleged to be an “actual” interest and was also “intuitively implausible.”

§ 29.6.1.4 Vagueness Challenges

As discussed at § 27.4.3.1, a law is unconstitutionally vague under the Due Process Clauses of the Fifth and 14th Amendments if the law does not define with “sufficient definiteness” what conduct is permitted and what conduct is prohibited and “in a manner that does not encourage arbitrary and discriminatory enforcement.” While any law can be unconstitutionally vague, the Court has expressed the greatest concern regarding vagueness in the context of criminal statutes and in the context of the First Amendment.

Regarding vagueness in the First Amendment context, Professor Erwin Chemerinsky has noted, “[C]ourts are particularly troubled about vague laws restricting speech out of concern that they will chill constitutionally protected speech.” In NAACP v. Button, the Court stated that “standards of permissible statutory vagueness are strict in the area of free expression. . . . Because First Amendment freedoms need breathing space to survive, government may regulate in the area only

241 Id. at 168-69. S

242 Id. at 170 (Breyer, J., joined by Souter & Ginsburg, JJ., concurring).

243 Chemerinsky, supra note 231, at 911.

with narrow specificity. . . . [The freedom of speech is] delicate and vulnerable, as well as supremely precious in our society. . . . [and] the threat of sanctions may deter their exercise almost as potently as the actual application of sanctions.”

Based on concerns such as these, the Court has declared unconstitutional a state statute preventing any “subversive person” from being employed by the state and requiring persons to swear they are not members of a “subversive organization.” The Court concluded that the term “subversive” was “unduly vague” and “uncertain.” The Court has also struck down on vagueness grounds a statute that prohibited treating the flag of the United States “contemptuously.” The Court also ruled unconstitutional a statute making it unlawful to “interrupt” police officers in the performance of their duties. The Court noted that the law was not clearly limited to “disorderly conduct or fighting words” and the law effectively grants police “the discretion to make arrests selectively on the basis of the content of the speech.”

A lower federal court has ruled that the provisions of the USA Patriot Act that include within the definition of “knowingly provides material support or resources” to a terrorist group the activities of providing “training,” “expert advice or assistance,” or “service” are unconstitutionally vague. The Court noted that such terms could be construed to ban pure speech or advocacy activities that presumably would be protected under the First Amendment, such as teaching international law for peacemaking resolutions or how to petition the United Nations to seek redress for human rights violations.

The Court has noted that the concern with vagueness is less in cases involving government funding of speech, as opposed to government regulation of speech. Thus, in National Endowment for the Arts v. Finley, discussed at § 29.4.2 nn.101-03, the Court said that “when the Government is acting as patron rather than as sovereign, the consequences of imprecision are not constitutionally severe.” And, of course, in every case some ambiguity is inherent in language. But the void-for-vagueness doctrine is an important aspect of First Amendment doctrine because of the more stringent application of the doctrine in the free speech context, and the fact that statutes, which otherwise might be constitutional under the First Amendment, can be challenged as being void for vagueness.

In general, liberal instrumentalist Justices, more strongly predisposed to protect free speech rights, have been more willing to use the vagueness doctrine to protect free speech rights. Conservative formalists, with their predisposition to defer to states, and conservative Holmesians, with their predisposition to defer to government in general, and states specifically, are typically less willing

---

to use vagueness doctrine as vigorously. Liberal Holmesians, such as Justice White, tend to be pulled in one direction by their liberal predisposition to protect free speech rights, but in the other direction by basic Holmesian deference-to-government principles. Liberal formalists and natural law Justices, based upon their analytic approach to law, are similarly concerned with truly vague statutes, but do not have the instrumentalist strong predisposition toward finding vagueness.

§ 29.6.1.5 \hspace{1em} Substantial Overbreadth Challenges

As noted at § 17.3.1.4. E n.471, one exception to the normal rule that parties cannot bring cases to vindicate the rights of third parties involves the application of the substantial overbreadth doctrine, which is only applicable to free speech cases. As explained by the Court in Members of the City Council of Los Angeles v. Taxpayers for Vincent:

"[T]he transcendent value to all society of constitutionally protected expression is deemed to justify allowing 'attacks on overly broad statutes with no requirement that the person making the attack demonstrate that his own conduct could not be regulated by a statute drawn with the requisite narrow specificity.' This is deemed necessary because persons whose expression is constitutionally protected may well refrain from exercising their rights for fear of criminal sanctions provided by a statute susceptible of application to protected expression."

In the development of the overbreadth doctrine the Court has been sensitive to the risk that the doctrine itself might sweep so broadly that the exception to ordinary standing requirements would swallow the general rule. In order to decide whether the overbreadth exception is

---

applicable in a particular case, we have weighed the likelihood that the statute's very existence will inhibit free expression. "[T]here comes a point where that effect – at best a prediction – cannot, with confidence, justify invalidating a statute on its face and so prohibiting a State from enforcing the statute against conduct that is admitted within its power to proscribe.

"Simply put, the doctrine asserts that an overbroad regulation of speech or publication may be subject to facial review and invalidation, even though its application in the instant case is constitutionally unobjectionable. Thus, a person whose activity could validly be suppressed under a more narrowly drawn law is allowed to challenge an overbroad law because of its application to others. The bare possibility of unconstitutional application is not enough; the law is unconstitutionally overbroad only if it reaches substantially beyond the permissible scope of legislative regulation. Thus, the issue under the overbreadth doctrine is whether a government restriction of speech that is arguably valid as applied to the case at hand should nevertheless be invalidated to avoid the substantial prospect of unconstitutional application elsewhere."

"The requirement of substantial overbreadth is directly derived from the purpose and nature of the doctrine. While a sweeping statute, or one incapable of limitation, has the potential to repeatedly chill the exercise of expressive activity by many individuals, the extent of deterrence of protected speech can be expected to decrease with the declining reach of the regulation." In short, there must be a realistic danger that the statute itself will significantly compromise recognized First Amendment protections of parties not before the Court for it to be facially challenged on overbreadth grounds.250

Given the purpose behind the substantial overbreadth doctrine, the Court has held that the doctrine does not apply in every free speech context. For example, because the incentive to engage in advertising is sufficiently strong to avoid worries that such speech will be chilled, the Court ruled in Village of Hoffman Estates v. Flipside, Hoffman Estates, Inc.251 that “the overbreadth doctrine does not apply to commercial speech.” Further, particularly in cases of less protected speech, such as speech raising concerns of obscenity, the Court has been quite willing to allow courts wide latitude to construe a statute narrowly to limit any potential overbreadth problems. For example, in Osborne v. Ohio,252 the United States Supreme Court accepted a narrowing construction by the Ohio Supreme Court of an Ohio statute that literally made the possession of any photo of nude children unlawful, even “innocuous photographs” of babies. The Ohio Supreme Court adopted a narrowing construction that applied the statute only to “lewd exhibition” or “a graphic focus on the genitals” and “where the person depicted is neither the child nor the ward of the person charged.” Given this narrowing, the statute was not unconstitutionally overbroad.

The Court can avoid striking down a whole statute as unconstitutional by “severing” the substantially overbroad part of the statute, and then enforcing the rest of the statute. An example

---

is *Brockett v. Spokane Arcades, Inc.*,\(^{253}\) where the Court upheld the rest of an obscenity law by severing out part of the statute that defined “lust,” which was “unduly broad.” As the Court observed in *Virginia v. Hicks*,\(^ {254}\) a law that punishes a substantial amount of protected free speech “suffices to invalidate all enforcement of that law until and unless a limiting construction or partial invalidation so narrows it as to remove the seeming threat or deterrence to constitutionally protected expression.”

In determining whether a statute, administrative rule, municipal ordinance, or other governmental regulatory program or policy is substantially overbroad, a court must consider any overbreadth judged in relation to the law’s plainly legitimate sweep. The Court has stated:

> [T]here comes a point at which the chilling effect of an overbroad law, significant though it may be, cannot justify prohibiting all enforcement of that law – particularly a law that reflects "legitimate state interests in maintaining comprehensive controls over harmful, constitutionally unprotected conduct." For there are substantial social costs created by the overbreadth doctrine when it blocks application of a law to constitutionally unprotected speech, or especially to constitutionally unprotected conduct. To ensure that these costs do not swallow the social benefits of declaring a law "overbroad," we have insisted that a law's application to protected speech be "substantial," not only in an absolute sense, but also relative to the scope of the law's plainly legitimate applications, before applying the "strong medicine" of overbreadth invalidation.\(^ {255}\)

Reflecting that the doctrine of overbreadth is an exception, *i.e.*, a defense, to application of standard First Amendment analysis, the challenger bears the burden of establishing overbreadth, as is standard for most defenses. This is true even for cases where the underlying First Amendment claim would be analyzed under an intermediate or strict scrutiny standard of review, where the burden is on the government.\(^ {256}\) In determining overbreadth, the court must consider not merely whether the part of the law involved in the instant case is overbroad, but whether the law, *taken as a whole*, is substantially overbroad judged in relation to its plainly legitimate sweep.\(^ {257}\)

As with the vagueness doctrine, liberal instrumentalist Justices, more strongly predisposed to protect free speech rights, have been more willing to use the substantial overbreadth doctrines to protect free speech rights. Conservative formalists, with their predisposition to defer to states, and conservative

\(^ {255}\) *Id.* at 119-20 (citations omitted).

\(^ {256}\) *Id.* at 122.

\(^ {257}\) *Id.*
Holmesian, with their predisposition to defer to government, and states specifically, are typically less willing to use this doctrine as vigorously. Liberal formalists, liberal Holmesians, and natural law Justices, although concerned about overbreadth in statutes, do not always have the same strong predisposition toward finding overbreadth sometimes found in liberal instrumentalist opinions.

For cases involving support for finding substantial overbreadth among this group of Justices, see, e.g. Schad v. Borough of Mt. Ephraim, 452 U.S. 61 (1981) (finding of substantial overbreadth by instrumentalists Justices Brennan, Marshall, Stevens, Blackmun, supported by liberal Holmesian Justice White and natural law Justice Powell); Ashcroft v. Free Speech Coalition, 535 U.S. 234 (2002) (Child Pornography Protection Act of 1996 is unconstitutionally overbroad as it criminalizes the production or possession of images that appear to depict minors engaged in sexual activities, even though those images may have been computer generated; Chief Justice Rehnquist, Justice Scalia, and Justice O’Connor dissenting in part; Justice Thomas concurring in the judgment only), discussed at § 30.1.4.1 n.116; Ashcroft v. ACLU, 535 U.S. 564 (2002) (Child On-line Protection Act not substantially overbroad on its face, with plurality opinion of conservative formalists Justices Scalia and Thomas, and conservative Holmesian Chief Justice Rehnquist, limited by concurrences of natural law Justice O’Connor; of natural law Justice Kennedy, joined by natural law Justice Souter and moderate liberal instrumentalist Justice Ginsburg; and with a dissent by moderate liberal instrumentalist Justice Breyer, joined by moderate liberal instrumentalist Justice Stevens), discussed at § 30.1.4.2 nn.134-40.
§ 29.6.2 Specialized Subject Areas Under the First Amendment

§ 29.6.2.1 Coerced Expression or Membership in a Group

Government employees may need to restrain their speech when the matter is not of public concern or when they are in policy-making positions, under the Supreme Court’s doctrine in Connick v. Myers, discussed at § 30.2.2.2 nn.185-86. Property owners may sometimes be obligated to provide a third party with access to engage in free speech activity if their activities are sufficiently connected with the state to create state action, as in Marsh v. Alabama, discussed at § 21.1.2.3 n.11. Where the regulated individuals have not related to the government in such a manner, however, the ability of the government, as sovereign, to require individuals to engage in expressive activity or to admit one or more persons to membership in a group is limited. In such cases, strict scrutiny has usually been applied.

The cases involving requiring groups to admit individuals to membership in a group are discussed at § 31.2.2, as part of analyzing the First Amendment Freedom of Association. In these cases, while the government must meet a strict scrutiny test, the government has been able to satisfy that demanding requirement in a few cases where the government was combating racial or gender discrimination. Cases involving requirements that individuals take oaths that they are not members of disfavored organizations have also proven difficult for the government to justify, as discussed at § 31.2.3, although occasionally such oaths have been upheld. In cases involving more direct forms of coerced expression, the government has had an even more difficult time satisfying the strict scrutiny test.

The foundation for all modern cases on coerced expression was laid in the 1943 case of West Virginia State Board of Education v. Barnette. There the Court held it unconstitutional to require teachers and pupils, as a regular part of a public school program, to participate in a salute to the flag of the United States. In an oft-quoted paragraph, Justice Jackson said, “If there is any fixed star in our constitutional constellation, it is that no official, high or petty, can prescribe what shall be orthodox in politics, nationalism, religion, or other matters of opinion or force citizens to confess by word or act their faith therein. If there are any circumstances which permit an exception, they do not now occur to us.” Justice Jackson added that while government has a power to educate the young for citizenship by strengthening national unity, history teaches the futility of attempting to compel patriotism. Our government was set up by the consent of the governed, and the Bill of Rights denies the power to coerce the consent of the governed. Three deference-to-government

---

Page 1407
Holmesian Justices dissented in the case.265

In 1977, in Wooley v. Maynard,266 the Court was confronted with a First Amendment challenge to a New Hampshire law that required all passenger vehicle license plates to carry the motto, "Live Free or Die." This slogan was at odds with plaintiff's religion and his politics since he believed that life is more precious than freedom. The Court was thus faced with the question of whether a state may constitutionally require an individual to participate in the dissemination of an ideological message by displaying it on his private property in a manner and for the express purpose that it be observed and read by the public. Chief Justice Burger applied strict scrutiny to the state's requirement that the license plates on all passenger vehicles bear the motto. He concluded that the state did not have a compelling interest in this mode of facilitating passenger vehicle identification, or in promoting the appreciation of history, individuals, and state pride. To support those conclusions, the Chief Justice said the record showed that New Hampshire passenger license plates have a special configuration of letters and numbers which makes them readily distinguishable without reference to the motto. Regarding the second interest, where a state seeks to disseminate an ideology, such interest cannot outweigh the individual's First Amendment right to avoid becoming the courier of the state’s message.

Reflecting his Holmesian deference-to-government predisposition, Justice Rehnquist dissented, joined, somewhat surprisingly, by Justice Blackmun. Justice Rehnquist said that the plaintiff was not required to say anything. Plaintiffs have simply been required to carry a state auto license tag for identification and registration purposes. They would not be considered to be advocating political or ideological views simply because the tag is on their car. They can easily display their disagreement with the state motto as long as they do not obscure the plate. By analogy, the fact than an atheist carries and uses United States currency does not convey any affirmation of belief on his part in the motto, "In God We Trust."267

Another way that persons may be compelled to participate actively in speech with which they may disagree is to be forced to contribute money that will pay for speech. In Abood v. Detroit Board of Education,268 the Court held that government employees, who were non-union employees included in an "agency shop" contract, had a constitutional right that the union not spend part of their required service fee toward the advancement of ideological causes not germane to the union’s duties as collective-bargaining representative. The Abood Court reaffirmed its prior holdings in Railway

265 Id. at 642-43 (Roberts, J., joined by Reed, J., dissenting); id. at 646 (Frankfurter, J., dissenting).

267 Id. at 710-20 (Rehnquist, J., joined by Blackmun, J., dissenting). Justice White, joined in part by Justices Blackmun and Rehnquist, also dissented in the case, but on the grounds that while declaratory relief against the statute may have been appropriate, the “stronger medicine” of injunctive relief was not appropriate on the facts. Id. at 717-19 (White, J., joined in part by Blackmun & Rehnquist, JJ., dissenting in part).

Employees’ Department v. Hanson and International Association of Machinists v. Street that employees may be required to pay dues under a union shop contract because such interference with their rights of free speech is justified by the legislative assessment of the compelling contribution by the union shop to the system of labor relations established by Congress, as long as the union does not use this power, over an employee's objection, to use his exacted funds to support political causes which the employee opposes. The Abood Court reaffirmed that the Constitution requires that expenditures for causes not germane to duties as collective-bargaining representative must be financed from charges paid by employees who do not object to advancing those ideas and who are not coerced into doing so against their will by the threat of loss of government employment.

The post-instrumentalist Court has generally followed these instrumentalist-era precedents, but has typically avoided extending those cases to new situations. In contrast, instrumentalist Justices have been more willing to adopt added exceptions to standard First Amendment analysis for regulations that support what they perceive as valid business or educational objectives. For example, Abood was followed in Keller v. State Bar of California. There, in 1990, the Court held that although an attorney could be required to join and financially support a state bar association, the attorney’s rights were violated if, without his consent, the State Bar funded activities not germane to regulating the legal process and improving the quality of legal services. However, in 1997, in Glickman v. Wileman Bros., Abood was distinguished by a majority composed of instrumentalist Justices Stevens, Ginsburg, and Breyer, joined by natural law Justices O’Connor and Kennedy.

In Glickman, the Court upheld California legislation which required growers of certain crops to pay assessments which were used by the state for generic advertising of California nectarines, plums, and peaches. The Court said this was an economic regulation and did not abridge anyone's right to speak. For the Court, Justice Stevens pointed out that the marketing orders did not restrain anyone from communicating any message. Nor did they compel any person to engage in any actual or symbolic speech. Further, they did not require the producers to endorse or to finance any political or ideological views. And for the most part, none of the generic advertising conveyed any message with which the challengers disagreed. They complained of having less money for their own advertising. But that is equally true, said Justice Stevens, of assessments to cover employee benefits, inspection fees, or any other activity authorized by a marketing order. The Court noted:

The use of assessments to pay for advertising does not require respondents to repeat an objectionable message out of their own mouths, require them to use their own property to convey an antagonistic ideological message, force them to respond to a hostile message when they "would prefer to remain silent," or require them to be publicly identified or associated with another's message. Respondents are not required themselves to speak, but are merely required

to make contributions for advertising. With trivial exceptions on which the court did not rely, none of the generic advertising conveys any message with which respondents disagree. Furthermore, the advertising is attributed not to them, but to the California Tree Fruit Agreement or "California Summer Fruits."

.... Abbood, and the cases that follow it, did not announce a broad First Amendment right not to be compelled to provide financial support for any organization that conducts expressive activities. Rather, Abbood merely recognized a First Amendment interest in not being compelled to contribute to an organization whose expressive activities conflict with one's "freedom of belief." . . . Here, however, requiring respondents to pay the assessments cannot be said to engender any crisis of conscience. . . . The mere fact that objectors believe their money is not being well spent "does not mean [that] they have a First Amendment complaint."

Moreover, rather than suggesting that mandatory funding of expressive activities always constitutes compelled speech in violation of the First Amendment, our cases provide affirmative support for the proposition that assessments to fund a lawful collective program may sometimes be used to pay for speech over the objection of some members of the group. Thus, in Lehnert v. Ferris Faculty Assn., while we held that the cost of certain publications that were not germane to collective-bargaining activities could not be assessed against dissenting union members, we squarely held that it was permissible to charge them for those portions of "the Teachers' Voice that concern teaching and education generally, professional development, unemployment, job opportunities, award programs . . . , and other miscellaneous matters."

. . . . While the First Amendment unquestionably protects the individual producer's right to advertise its own brands, the statute is designed to further the economic interests of the producers as a group. The basic policy decision that underlies the entire statute rests on an assumption that in the volatile markets for agricultural commodities the public will be best served by compelling cooperation among producers in making economic decisions that would be made independently in a free market. . . . Doubts concerning th[is] policy judgments . . . do not . . . justify reliance on the First Amendment as a basis for reviewing economic regulations. Appropriate respect for the power of Congress to regulate commerce among the States provides abundant support for the constitutionality of these marketing orders.273

A dissent by Justice Souter, joined by Chief Justice Rehnquist and Justices Scalia and Thomas, concluded that compelling speech officially is just as suspect as suppressing it, and should typically be given the same level of scrutiny.274 Since this involved commercial speech, Justice Souter and Chief Justice Rehnquist called for the intermediate scrutiny used in Central Hudson, discussed at § 30.3.2 nn.228-30. Justice Scalia and Thomas have disagreed with the Central Hudson balancing test and would apply strict scrutiny to all content-based regulations of commercial speech.275

275 Id. at 491-92 (Souter, J., joined by Rehnquist, C.J., dissenting), citing Central Hudson, 447 U.S. 557, 566 (1980); id. at 504-05 (Thomas, J., joined by Scalia, J., dissenting).
The *Glickman* case was narrowly interpreted and distinguished in *United States v. United Foods, Inc.* 276 In this case, the Court struck down a federal program that mandated assessments on handlers of fresh mushrooms to fund, for the most part, generic advertising to promote mushroom sales. The majority opinion by Justice Kennedy and the dissenting opinion by Justice Breyer both agreed that the case was similar to *Glickman* in that: (1) the program did not impose restraints on the freedom of any producer to communicate any message to any audience; (2) no person was compelled to engage in any actual or symbolic speech; and (3) producers were not compelled to endorse or finance any political or ideological views. However, for Justice Kennedy and Justice Stevens, who switched sides from their votes in *Glickman*, that case was distinguishable on the ground that the tree fruits involved in that case were marketed pursuant to detailed marketing orders that had displaced many aspects of independent business activity. The mandated participation in an advertising program was part of a valid scheme of economic regulation. Here, in contrast, almost all of the funds collected were for one purpose: generic advertising. Because it had not been raised below, the Court did not consider an alternative argument by the government that its advertising was government speech that could be upheld under *Rust v. Sullivan*, discussed at § 29.3.2 nn.79-80.

According to Justice Breyer, dissenting with Justices Ginsburg and O’Connor, this case was similar enough to *Glickman* that it should be upheld as an economic regulation. Based not merely on faithfulness to precedent, which supported Justice O’Connor joining the dissent, 277 Justice Breyer and Ginsburg also indicated strong support for the *Glickman* approach. They noted:

> Nearly every human action that the law affects, and virtually all governmental activity, involves speech. For First Amendment purposes this Court has distinguished among contexts in which speech activity might arise, applying special speech-protective rules and presumptions in some of those areas, but not in others. Were the Court not to do so – were it to apply the strictest level of scrutiny in every area of speech touched by law – it would, at a minimum, create through its First Amendment analysis a serious obstacle to the operation of well-established, legislatively created, regulatory programs, thereby seriously hindering the operation of that democratic self-government that the Constitution seeks to create and to protect. That, I believe, is why it is important to understand that the regulatory program before us is a "species of economic regulation," which does not "warrant special First Amendment scrutiny." 278

Reliance on the speech being government speech was the basis of the decision in 2005 in *Johanns v. Livestock Marketing Association*. 279 In *Johanns*, the government imposed an assessment on cattle

---

277 *Id.* at 419 (Breyer, J., joined by Ginsburg, J., and joined as to Parts I & III by O’Connor, J., dissenting).

278 *Id.* at 424-25 (Breyer, J., joined by Ginsburg, J., dissenting).

sales and used the money to fund generic ads which usually said, “Beef. It’s What’s for Dinner.” The ads usually bore the attribution, “Funded by America’s Beef Producers.” In an opinion by Justice Scalia, a majority of the Court upheld the law on the ground that the message set out in the beef promotions was from beginning to end a message established by the federal government, although some ideas for ads were submitted by a private advisory board. Justice Scalia noted that citizens have no First Amendment right not to fund government speech through general taxes or targeted assessments, and that when “the government sets the overall message to be communicated and approves every word that is disseminated, it is not precluded from relying on the government speech doctrine merely because it solicits assistance from nongovernmental sources in developing specific messages.” Justices Breyer and Ginsburg concurred in the result, voting, as they did in United Foods, to view this as a standard economic regulation not warranting First Amendment scrutiny.280

Justice Souter dissented in the case, joined by Justices Stevens and Kennedy. In their view, a compelled subsidy should not be justified as a government speech program similar to Rust v. Sullivan unless the government clearly put the speech forward as its own. This was not true here on the face of the statute, which did not require the ads to show any sign of speech by the government, or as applied, because the ads did not in fact show any such sign and were misleading as to their origin.281

Justice Souter’s approach reflects a sound natural law approach to the issue of compelled speech versus government speech. However, the current majority approach of the Court in cases like Johanns resonates from the combination of conservative formalist Justices, such as Justices Scalia and Thomas, along with Holmesian or Holmesian-leaning deference-to-government Justices, i.e., Chief Justice Rehnquist and Justice O’Connor, combined with the liberal instrumentalist Justices Ginsburg and Breyer, who are predisposed to support government economic regulation.

A related case in this series was Board of Regents of University of Wisconsin System v. Southworth.282 There, the Court upheld a mandatory student activity fee which was used in part to support student organizations engaging in political or ideological speech, so long as there was viewpoint neutrality. Justice Kennedy said for the Court, “When a university requires its students to pay fees to support the extracurricular speech of other students, all in the interest of open

advertising constitutional based on Johanns); Pelts & Skins LLC v. Landreneau, 365 F.3d 423 (5th Cir. 2004) (mandatory assessment on harvested alligator skins to finance generic advertising of alligator products unconstitutional), cert. granted and judgment vacated, 544 U.S. 1058 (2005) (reconsider in light of Johanns), on remand, 448 F.3d 743 (5th Cir. 2006) (remanded to the district court to develop evidence regarding the extent of government control over the speech].

280 Id. at 569 (Breyer, J., concurring); id. at 569-70 (Ginsburg, J, concurring in the judgment).

281 Id. at 570-80 (Souter, J., joined by Stevens & Kennedy, J.J., dissenting).

discussion, it may not prefer some viewpoints to others." Justice Kennedy said that the standard of viewpoint neutrality was being used, rather than the standard of being germane to the organization’s purposes, which was used in *Aboid*, because the germane standard would be unmanageable in a university setting, “particularly where the State undertakes to stimulate the whole universe of speech and ideas.” The Court remanded a referendum aspect of the university’s program, explaining it was not clear how allowing a vote of the student body to control the funding of particular grants could protect viewpoint neutrality.

Justice Souter concurred in the judgment, with Justices Stevens and Breyer. Reflecting an instrumentalist willingness to create exceptions to standard First Amendment doctrine where valid governmental objectives are involved, Justice Souter cautioned against imposing a cast-iron viewpoint neutrality requirement on the university because protecting a university’s discretion to shape its educational mission is an important consideration regarding objections to student fees.

**§ 29.6.2.2 The Government as Educator**

Although the initial set of cases involving the government as educator did not use precise strict scrutiny, intermediate review, or rational review terminology, the cases were decided consistent with standard First Amendment doctrine. Thus, where the regulation involves an aspect of school life viewed as occurring in a non-public forum, such as government control over school classrooms or school auditoriums, some form of rational review has been applied. Where the regulation involves an aspect of school life on playgrounds or in a school lunchroom, which are viewed more as places designated for free speech, and thus public forums, content-neutral regulations have been subjected to intermediate scrutiny, and content-based regulations have triggered strict scrutiny.

The foundational case in the modern era regarding the constitutional rights of students in school is *Tinker v. Des Moines Independent Community School District*, decided in 1969. In that case, several students had been disciplined for wearing black armbands in violation of a school policy against wearing such bands. The Court said that wearing black bands in protest of the Vietnam war was a symbolic act, *i.e.*, “symbolic speech,” akin to “pure speech,” and thus was protected by the First Amendment. The Court then concluded that the school could not sanction the behavior unless it materially disrupted class work, involved substantial disorder, or invaded the rights of others, or unless school authorities could reasonably forecast substantial disruption or material interference with school activities. The Court said that to justify prohibition of a particular expression having no relation to school work, school officials must show more than a desire to avoid the discomfort and unpleasantness that may accompany an unpopular viewpoint. Applying its material disruption test, the Court noted that only a few of 18,000 students in the school wore armbands, and there was no indication that work of any class was substantially disrupted. Outside classes only a few students

283 *Id.* at 233.

284 *Id.* at 232.

285 *Id.* at 236 (Souter, J., joined by Stevens & Breyer, JJ., concurring in the judgment).

made hostile remarks to children who wore the armbands, and there was no evidence of any threats or acts of violence on school premises.

Although *Tinker* did not use precise intermediate scrutiny language, its requirement that the threat of disruption be “substantial” or “material” to justify school regulation follows the requirement of intermediate scrutiny that the government have an “important or substantial” government interest to regulate and the government action be “substantially related” to advancing that interest. That standard of review is appropriate in *Tinker* because *Tinker* involved an attempt to regulate wearing armbands even on the playground or the lunchroom, typically viewed as public forums, based on a content-neutral, secondary effects concern with disruption of the school’s educational mission.

Justice Black, dissenting, said the record showed that the armbands did divert students' minds from their regular lessons and diverted them to thoughts about the highly emotional subject of the Vietnam war. Also, he seemed to view *Tinker* as applying its approach even to aspects of regulation in the classroom, and thus was concerned that the Court might apply the heightened *Tinker* standard, and not a rational review “reasonableness” standard, to those kinds of regulations. Thus, Black stated that he thought that if pupils of state-supported schools can defy orders of school officials to keep their minds on their schoolwork, it is the beginning of a new revolutionary sort of permissiveness in this country, fostered by the judiciary. Soon, students would believe that it is their right to control the schools, rather than the right of the states that collect taxes to hire teachers for the benefit of the pupils. In Justice Black’s view, this case could subject all public schools to “the whims and caprices of their loudest-mouthed, but maybe not their brightest, students.”287 As noted in the cases discussed below, Justice Black’s fears on this score have not materialized, and rational review is applied to school regulations of matters in the curriculum and, typically, to matters of school dress codes or school uniforms to be worn in school classrooms.

Justice Harlan, also dissenting, would have cast on the challengers the burden of showing that a particular school measure was motivated by other than legitimate school concerns, e.g., a desire to prohibit the expression of a particular point of view, while allowing a dominant view to be expressed, *i.e.*, viewpoint discrimination.288 While this view is consistent with the Holmesian predisposition to defer to government, it is inconsistent with the general rule that for cases at intermediate scrutiny the government bears the burden of defending its action, rather than the challenger bearing the burden of establishing that the action is unconstitutional.

Four years later, in 1973, the views of the majority in *Tinker* were reinforced in a case involving the distribution of a newspaper at a state university. In *Papish v. Board of Curators of the University of Missouri*,289 a university student had been disciplined for distributing on the campus a newspaper containing indecent language. In a *per curiam* opinion, the Court set aside the discipline as a violation of the First Amendment, saying that “the mere dissemination of ideas – no matter how offensive to good taste – on a state university campus may not be shut off in the name alone of

287 *Id.* at 515-25 (Black, J., dissenting).

288 *Id.* at 526 (Harlan, J., dissenting).

‘conventions of decency.’” The majority cited cases where criminal prosecutions had not been allowed to punish indecency. Chief among them was Cohen v. California,290 where it was held that the state could not convict for disturbing the peace where the defendant, in a courthouse corridor, wore a jacket on which an indecent word was inscribed.

Applying more of a rational review standard, Justice Rehnquist, joined by Chief Justice Burger, dissented. Justice Rehnquist said that educational sanctions should be distinguished from criminal prosecutions, basically viewing the entire campus as a non-public forum for which only rational review should apply. Rehnquist explained, “A state university is an establishment for the purpose of educating the State’s young people, supported by tax revenues of the State’s citizens. The notion that the officials lawfully charged with the governance of the university have so little control over the environment for which they are responsible that they may not prevent the public distribution of a newspaper on campus which contains the language described in the Court’s opinion is quite unacceptable to me and I would suspect would have been equally unacceptable to the Framers.”291

The perspective evidenced by the majority in Tinker and Papish continued in place, although just barely, in the 1982 case of Board of Education v. Pico.292 There the Court considered: (1) the extent to which the First Amendment limits a school board's power at elementary or secondary schools to remove books from a library used for supplemental reading; and (2) whether the evidence raised a genuine issue of material fact regarding whether the board exceeded those limits in the case.

On the first issue, a four-Justice instrumentalist plurality, led by Justice Brennan, and joined by Justices Marshall, Blackmun, and Stevens, said that in their view Pico did not involve aspects of control over the curriculum, as the books concerned were not required reading, nor did the case involve government funding, since the issue was not the acquisition of books. Rather, the case only involved the removal of books already in the library and available for general student use. Viewed in this way, the Brennan opinion considered the case from the perspective of standard public forum First Amendment law. From this perspective, Justice Brennan indicated that the books could have been removed for the content-neutral reason that they were "pervasively vulgar" or lacked "educational suitability." On the other hand, the school board could not claim unfettered discretion to make content-based decisions to remove the books because "our Constitution does not permit the official suppression of ideas." If the board intended to deny access to ideas with which it disagreed, and thus attempted to prescribe what is orthodox, and this intent was the decisive factor in its decision, the Constitution was violated. On the procedural issue, Justice Brennan said that the district court erred in entering a summary judgment for the board because the evidence, construed most favorably to the challenging students, does not foreclose the possibility that the board's decision rested decisively on disagreement with constitutionally protected ideas in the books.293

291 410 U.S. at 677 (Rehnquist, J., joined by Burger, C.J., dissenting).

293 Id. at 861-63, 869-75 (plurality opinion of Brennan, J., joined by Marshall, Blackmun & Stevens, JJ.).
In addition to these points, Justice Brennan indicated that for him, and for Justices Marshall and Stevens, there is a constitutional right to receive ideas. This right exists as a logical corollary to the explicit rights of free speech and press, and is a necessary predicate to the recipient's meaningful exercise of his own rights of speech, press, and political freedom. Although he joined the rest of Justice Brennan’s plurality opinion, Justice Blackmun disagreed that there is a right to receive ideas, and a majority of the Court has never agreed with Justice Brennan on this view. In contrast, for Justice Blackmun, this case was based on Justice Brennan’s analysis that state officials may not act to deny access to an idea simply because they disapprove of the idea for partisan or political reasons. School officials may not remove books to restrict access to the political ideas or social perspectives in them. The purpose of the Bill of Rights was to withdraw certain subjects from the vicissitudes of political controversy, and to place those subjects beyond the reach of majorities and officials.

Justice White concurred in the judgment because determining the reasons underlying the removal was fact-bound, and he was not inclined to disagree with the Court of Appeals’ view that there was a material issue on why the books were removed. If at trial the books were determined to have been removed for the content-neutral reason of being vulgar, then even under the plurality opinion there would be no valid constitutional challenge to their removal. Reflecting a Holmesian deference-to-government predisposition, Justice White preferred to avoid discussing any further First Amendment aspect of the case until after the trial court had a chance to make a decision on that issue.

Chief Justice Burger dissented with Justices Powell, Rehnquist, and O’Connor. These Justices viewed the case through the lens of rational review, viewing the case a routine matter of government control over the non-public forum aspects of the school curriculum. In this view, the fact that schools can legitimately be used to inculcate values is what was critical. Vulgarity need not be "pervasive" since a board might reasonably decide that random vulgarity is inappropriate for teenage students. In their view, the “vulgarity” of the books was sufficiently well-established that the district court’s summary judgment on that matter was appropriate, and no trial was needed.

The Chief Justice also noted that there is not a hint in the First Amendment or any prior decision of a "right" to have the government continue providing access to certain books. In separate dissents, Justice Rehnquist and Justice Powell also noted that the "right to receive ideas" is not supported by

---

294 Id. at 863-69 (plurality opinion of Brennan, J., joined by Marshall & Stevens, JJ.). On such a right, see generally Marc Johnathan Blitz, Constitutional Safeguards for Silent Experiments in Living: Libraries, the Right to Read, and a First Amendment Theory for an Unaccompanied Right to Receive Information, 74 UMKC L. Rev. 799 (2006).

295 Id. at 878-79 (Blackmun, J., concurring in part and concurring in the judgment).

297 Id. at 883-84 (White, J., concurring in the judgment).

298 Id. at 889-93 (Burger, C.J., joined by Rehnquist, Powell & O’Connor, J.J., dissenting).
prior decisions, nor by the necessarily selective process of elementary and secondary education. Later cases have reflected this view, and the First Amendment today does not include any “right to receive” ideas. For this reason, although sometimes phrased in First Amendment terms, any right of the public or press to certain government-held information is dependent on statutory grounds only, like the Freedom of Information Act, and is not, properly speaking, a constitutional issue.

A majority of post-instrumentalist cases have involved regulations relating to activities more clearly within the core of what the Court views as non-public forum curricular matters or school-sponsored events. Tinker and Pico have also been hemmed in, to an extent, by an expanding concept of what is within the curriculum, and the power of school authorities to implement the curriculum.

In 1986, in Bethel School District No. 403 v. Fraser, the Court held that the First Amendment does not prohibit a school district from disciplining a high school student for a “lewd” speech at a high school assembly. As part of supporting a candidate for a student government office, the speaker used phrases like, “he is firm in his pants, firm in his shirt, and firm in his beliefs,” and he “doesn’t attack things in spurts – he drives hard, pushing and pushing until finally – he succeeds.” Chief Justice Burger wrote that the freedom of students to advocate unpopular and controversial views must be balanced against society’s interest in teaching students the boundaries of socially appropriate behavior. It was appropriate and reasonable for the school to prohibit the use of vulgar terms in public discourse, particularly in an assembly where students as young as 14 were in attendance.

None of the four instrumentalist Justices on the Court in 1986 joined in the Fraser majority opinion. Justice Marshall dissented on the ground that the Court should have applied the Tinker standard of review, and the school had failed to demonstrate that the student’s remarks were disruptive. Justice Stevens doubted that the student could have known from the school’s rule that his speech was punishable, and thus to punish him absent such notice violated his due process rights. Justice Brennan concurred only in the judgment, saying that the speech may well have been protected were it delivered elsewhere than the assembly hall, but that the speech could be viewed as disruptive under the Tinker standard of review given the school’s educational mission on how to conduct civil and effective public discourse. Justice Blackmun concurred only in the result without explanation.

301 478 U.S. 675, 678 (1986); id. at 687 (Brennan, J., concurring in the judgment).

302 Id. at 690 (Marshall, J., dissenting); id. at 691 (Stevens, J., dissenting); id. at 687-88 (Brennan, J., concurring in the judgment); id. at 678 (Blackmun, J., concurring in the result).
A general test for determining what behavior is encompassed by the curriculum was stated in *Hazelwood School District v. Kuhlmeier*.

There the Court upheld the exercise of editorial judgment by a high school principal concerning several articles proposed for inclusion in a school-financed student newspaper. The two main concerns in light of which the censorship was exercised were: (1) the name of a pregnant student might be identifiable from the text, and (2) references to sexual activity and birth control were inappropriate for some of the younger students in the school. The principal believed that there was no time to make other changes. Thus, he eliminated the two pages on which the articles appeared, resulting in several other stories being excluded.

Justice White said that the student paper was not a public forum because it was developed within the school curriculum and the evidence did not show a clear intent to create a public forum. The test for being within the curriculum was whether there is supervision by faculty members and whether the activity is designed to impart particular knowledge or skills to student participants and audiences. Since the school had reserved this forum for its purposes, and, consistent with this, all articles were submitted to the principal prior to publication, school officials were entitled to regulate the contents in any reasonable manner. The Court stated that educators are entitled to exercise control to assure that participants learn whatever lessons the activity is designed to teach, that the audience is not exposed to material inappropriate for their level of maturity, and that the views of speakers are not erroneously attributed to the school. Summing up, Justice White said that "educators do not offend the First Amendment by exercising editorial control over the style and content of student speech in school-sponsored expressive activities so long as their actions are reasonably related to legitimate pedagogical concerns."

Applying that rule to the facts, Justice White said that the principal had acted reasonably because of (1) respect for student anonymity, since there were so few pregnant students, and (2) the publication was distributed to 14-year-olds, and might be taken home to be read by even younger siblings. Accordingly, the principal might reasonably have concluded that the students had not sufficiently mastered principles of journalism pertaining to the treatment of controversial issues, personal attacks, and the restrictions imposed on journalists within a school community. Finally, in view of time constraints, the principal acted reasonably in deleting the two pages.

In accord with the liberal instrumentalist predisposition to protect free speech, Justice Brennan dissented, with Justices Marshall and Blackmun. Justice Brennan began by asserting that public educators might accommodate some student expression even if it contradicts views or values that the school wishes to inculcate. He would apply the standard of *Tinker* to the facts, rejecting any distinction between school-sponsored speech versus incidental student speech separate from the school’s curriculum. For Justice Brennan, the mere fact of school sponsorship does not license thought control and interference with the students' right to receive information and ideas. Regarding concerns about school sponsorship, a published disclaimer would have been sufficient. Nor did the publication interfere with other students' rights that are protected by law. In addition, even if

---

304 *Id.* at 270-73.

305 *Id.* at 274-76.
different standards apply to school curricular decisions, Justice Brennan characterized what was done by the principal as viewpoint discrimination, camouflaged as protecting students from sensitive topics, which would trigger strict scrutiny anyway. Finally, even under a rational review standard, Justice Brennan concluded that it was unreasonable simply to withdraw the pages rather than make deletions or additions, rearrange the layout, or delay publication.306

These cases make clear that indecency by students in the school environment can be sanctioned in order to advance curricular goals, such as teaching students the boundaries of socially appropriate behavior,307 and a student newspaper supervised by faculty members can be censored by the school to insure that the audience is not exposed to material inappropriate for their level of maturity, the test being whether the actions of educators are reasonably related to legitimate pedagogical concerns.308 Reflecting a view widely shared among the lower federal courts, the Ninth Circuit Court of Appeals held in Chandler v. McMinnville School District 309 that the goal of teaching students the boundaries of appropriate behavior applies throughout the school grounds to any “vulgar, lewd, obscene, or plainly offensive speech,” and thus Fraser applies to any such speech anywhere in the school.

With respect to non-vulgar speech, courts have struggled with the question of when speech is sufficiently connected with on-campus activities that it can be regulated under Hazelwood versus when the speech is sufficiently unconnected to the school that Tinker applies. The easy cases involve off-campus student speech later brought on-campus by persons other than the speaker. These cases have dealt with such things as "underground" student newspapers distributed off-campus, student-run websites created on off-campus computers, and various writings brought on-campus by students other than their original author. In these cases, Tinker usually applies.310

In harder cases of on-campus speech by students, a number of courts have suggested, consistent with the Ninth Circuit’s opinion in Chandler, that Hazelwood only applies to speech or speech-related activities that "students, parents, and members of the public might reasonably perceive to bear the imprimatur of the school."311 While this was true of the student newspaper in Hazelwood, the better reasoning is that the Court’s opinion in Hazelwood focused on any activity “supervised by faculty members and designed to impart particular knowledge or skills to student participants and audiences.”312 It is this context to which the non-public forum analysis of Hazelwood should apply.

306 Id. at 279-90 (Brennan, J., joined by Marshall & Blackmun, JJ., dissenting).
309 978 F.2d 524, 528-29 (9th Cir. 1992).
309 Chandler, 978 F.2d at 529, citing Hazelwood, 484 U.S. at 271.
311 Chandler, 978 F.2d at 529, citing Hazelwood, 484 U.S. at 271.
312 Hazelwood, 484 U.S. at 271.
Faced with a possible limitation on Hazelwood as in Chandler, some lower courts have suggested that for on-campus speech Tinker should be limited to “political” speech of the students, and that other forms of student speech should never be entitled to the Tinker intermediate standard of review, even if the speech is not being regulated under Hazelwood as school sponsored or school generated, or otherwise part of the school’s curriculum or educational mission.\(^{313}\) While such an approach may reflect the Miekeljohn view that the First Amendment is principally about political speech, discussed at § 29.2.2 n.21, it is inconsistent with modern doctrine where “literary, artistic, political, or scientific” speech are all entitled to the same level of First Amendment scrutiny, even in the school context.\(^{314}\) The better approach would be to have an analysis faithful to Hazelwood, where rational review applies to speech not merely school sponsored or school generated, and thus bearing the imprimatur of the school, but also to speech connected to the school’s curriculum or educational mission.

For such cases of school-sponsored or school-generated speech, under standard non-public forum analysis, noted at § 29.2 nn.67-68 & Table 29.2, content-neutral or content-based subject-matter regulations would trigger rational review,\(^{315}\) while regulations involving viewpoint discrimination would trigger strict scrutiny.\(^{316}\) This would allow Tinker’s intermediate standard of review to apply for literary, artistic, political, or scientific speech that is clearly student generated and not supervised by faculty members as part of the school’s general educational mission, as long as the school has a content-neutral reason for the regulation, such as safety or avoiding disruption of the educational environment.\(^{317}\) For content-based regulations of such student speech, strict scrutiny would apply.

---

\(^{314}\) See, e.g., LaVine v. Blaine Sch. Dist., 257 F.3d 981, 988-89 (9th Cir. 2001).

\(^{315}\) See, e.g., Bannon v. School Dist. of Palm Beach County, 387 F.3d 1208, 1212-17 (11th Cir. 2004), cert. denied, 126 S. Ct. 330 (2005) (prohibition of student’s religious messages on hallway murals opened to non-profane, non-offensive student artwork as part of supervised beautification project is content-based, subject matter restriction of school-sponsored expression that is reasonably related to legitimate pedagogical purpose of avoiding disruption of the learning environment).

\(^{316}\) See, e.g., Peck v. Baldwinsville Central Sch. Dist., 426 F.3d 617, 629-33 (2nd Cir. 2005), cert. denied, 126 S. Ct. 1880 (2006) (evidence that kindergarten teacher and public school principal censored religious image from student poster prepared in response to assignment on protecting the environment because the poster offered religious viewpoint precludes summary judgment, as issue exists whether the action constituted viewpoint discrimination triggering strict scrutiny review).

\(^{317}\) See, e.g., Walker-Serrano v. Leonard, 325 F.3d 412 (3rd Cir. 2003) (public elementary school officials who interrupted third grader’s effort on icy playground, and in silent reading class period, to gather fellow student’s signatures on petition objecting to field trip to circus because of perceived cruelty to animals, satisfied Tinker based on safety and disruption concerns).
Although the Supreme Court has not ruled on the issue, many lower courts have upheld various school dress codes or uniform policies at the elementary and secondary school level on rational review grounds of exercising control over student appearance in the classroom as it is related to the school’s educational mission.\(^\text{318}\) This would appear to be a sound approach. In contrast, in Canady v. Bossier Parish School Board,\(^\text{319}\) the Fifth Circuit upheld a school dress code by viewing the dress code as a content-neutral time, place, or manner restriction, but concluded that this form of intermediate scrutiny, which the court associated with the draft-card burning case of O’Brien, discussed at § 29.4.4.1 nn.119-20, is less vigorous than the Tinker form of intermediate scrutiny.

This view tracks the view proposed by Justice Souter, discussed at § 29.4.4.3 nn.154-59, that a “content-correlated” regulation of speech, justified in Tinker on content-neutral, secondary effects grounds of concern with school disruption, should be analyzed under a higher form of scrutiny than standard content-neutral time, place, or manner regulations. The Fifth Circuit’s view differs from Justice Souter, however, in concluding that O’Brien represents the less stringent form of intermediate review associated with time, place, or manner regulations, rather than Justice Souter’s view that O’Brien represents the higher “content-correlated” kind of case. In Guiles v. Marineau,\(^\text{320}\) a Second Circuit panel applied the regular Tinker analysis to the case of a seventh-grader’s T-shirt that depicted President Bush as a drug and alcohol abuser. The Second Circuit found that the student had a constitutional right to wear the T-shirt absent a showing of disruption or confrontation in the school.

As suggested at § 29.4.4.3 text following n.159, the better analysis would be to recognize that the same level of basic intermediate review is represented in content-neutral time, place, or manner regulations, the O’Brien test for content-neutral secondary effects cases, and Tinker. However, without regard to this aspect of intermediate scrutiny, school uniform cases should be analyzed under the Hazelwood/Fraser line of rational review cases, as involving regulation of student appearance as part of the non-public forum aspect of school control over the school’s educational program, at least for elementary and secondary school cases. Naturally, cases involving students over 18 in the college or university setting raise different considerations regarding the school’s educational mission, particularly for dress on campus grounds outside the classroom.

An additional issue regarding the First Amendment and schools is the recent practice at some colleges and universities to designate official “free speech zones” dedicated to the advocacy of ideas, but then to limit the handing out of leaflets, or making speeches, on other parts of the university campus. The university typically justifies such zones on content-neutral grounds, such as limiting littering that might result from unrestricted leafletting, and administrative control to help prevent organizations with different viewpoints possibly clashing anywhere on campus. Since applicable to the entire campus, such regulations typically are viewed as content-neutral regulations in a public forum, triggering intermediate review, and requiring that the regulations ensure that

meaningful communication with intended audiences can take place, as part of ensuring under the last prong of *O’Brien* that ample alternative channels of communication exist.\footnote{\textsuperscript{321}}

Another issue regarding the First Amendment and schools is a growing number of school districts that have expanded their curriculum to include "service learning" initiatives. Also known as “mandatory community service programs,” such “service learning” initiatives require that students devote a specified number of hours over their high school careers to preparing for placement at a community service organization, performing the various types of labor required at such organizations, and discussing and reflecting upon their experiences. These programs are alleged to develop teamwork, communication, and problem-solving skills by placing the student in a "real-world" setting; instill a sense of civic obligation; advance an understanding of the student's links to his or her community; and generate lasting pro-social behavioral inclinations. Either as an aspect of rational review under *Hazelwood* as part of the school’s curriculum, or even if viewed as regulating “off-campus” activities for the content-neutral reasons alleged to support such programs, such “service learning” initiatives would appear to be constitutional under the First Amendment, although arguments have been made reaching the opposite conclusion.\footnote{\textsuperscript{322}}

\section*{§ 29.6.2.3 Invasion of Privacy}

The government has power to protect persons from intolerable intrusions into their privacy, particularly in the home. The matter was well expressed by Justice Harlan, writing for the Court in *Cohen v. California*.\footnote{\textsuperscript{323}} Justice Harlan said:

While this Court has recognized that government may properly act in many situations to prohibit intrusion into the privacy of the home or unwelcome views and ideas which cannot be totally banned from the public dialogue, . . . we have at the same time consistently stressed that “we are often ‘captives’ outside the sanctuary of the home and subject to objectionable speech.” The ability of the government, consonant with the Constitution, to shut off discouragement solely to protect others from hearing it is . . . dependent upon a showing that substantial privacy interests are being invaded in an essentially intolerable manner.\footnote{\textsuperscript{324}}
In the post-instrumentalist era, the Justices have disagreed on what is an essentially intolerable intrusion. Conservative formalist and Holmesian Justices tend to be more deferential to privacy rights, while liberal instrumentalist Justices tend to be more deferential to rights of free speech. Natural law Justices tend to strike a middle ground, balancing privacy concerns of the audience against the free speech rights of demonstrators or the press.

For example, in *Frisby v. Schultz*, the Court dealt with an ordinance interpreted to prevent picketing directed at a single residence. For the Court, Justice O’Connor said, “The First Amendment permits the government to prohibit offensive speech as intrusive when the ‘captive’ audience cannot avoid the objectionable speech. . . . The target of the focused picketing banned by the Brookfield ordinance is just such a ‘captive.’” Justice O’Connor also referred to cases holding that individuals are not required to welcome uninvited speakers into their houses and that the government may protect this freedom, whether arising from offensive radio broadcasts, offensive mail, or sound trucks.

Justice Brennan dissented with Justice Marshall on the ground that the ordinance was not narrowly tailored. He explained, “Once size, time, volume, and the like have been controlled to ensure that the picket is no longer intrusive or coercive, only the speech itself remains, conveyed perhaps by a lone, silent individual, walking back and forth with a sign . . . . Such speech, which no longer implicates the heightened governmental interest in residential privacy, is nevertheless banned by the Brookfield law.”

In contrast, in *Bartnicki v. Vopper*, the Court concluded that a broadcaster could not be held liable for broadcasting an illegally intercepted communication when the broadcaster did not participate in the interception and the matter was of public concern. The Court held that the privacy interest had to give way to the interest in publishing matters of public importance. Regarding the level of scrutiny applicable to the case, the majority opinion of Justice Stevens, joined unreservedly by Justices Kennedy, Souter, and Ginsburg, seemed to adopt a strict scrutiny kind of analysis. However, the concurring opinion of Justices Breyer and O’Connor, two Justices with an occasional affinity for the Holmesian approach, as noted at §§ 11.4 nn.107-09 & 12.4.2, said that “strict scrutiny – with its strong presumption against constitutionality – is normally out of place where, as

situation the right of a householder to bar solicitors, hawkers, and peddlers from his property.

327 *Id.* at 494.

329 *Id.* at 532, 535 ("need . . . of the highest order" and “overriding importance of that commitment” needed to “remove the First Amendment shield”).
here, important competing constitutional interests are implicated.\(^{330}\) The dissenting opinion of Chief Justice Rehnquist and Justices Scalia and Thomas also indicated that given the content-neutral privacy interests involved, the proper standard of scrutiny should be intermediate review.\(^{331}\)

Applying a slightly higher than ordinary intermediate review to an injunction rather than a criminal prosecution, the Court struck down in Madsen v. Women’s Health Center, Inc.\(^{332}\) portions of an injunction intended to protect the privacy of patients in an abortion clinic, as discussed at § 29.6.1.2 nn.219-30. In part, the injunction had ordered the defendants, from 7:30 a.m. through noon, on Mondays through Saturdays, not to display images observable to patients inside the clinic. Chief Justice Rehnquist wrote, “The only plausible reason a patient would be bothered by ‘images observable’ inside the clinic would be if the patient found the expression contained in such images disagreeable. But it is much easier for the clinic to pull its curtains than for a patient to stop up her ears, and no more is required to avoid seeing placards through the windows of the clinic. This provision of the injunction violates the First Amendment.”\(^{333}\)

The result of these cases seems to be that invasions of privacy by speech are protected today unless the Court finds them intolerable, and that finding depends on the extent to which the audience is captive and the nature of the sanction that is sought to be applied. Other cases that could be viewed as invasions of privacy, such as in Hustler Magazine v. Falwell,\(^{334}\) where a public figure sued for intentional infliction of emotional distress caused by publication of a satirical cartoon, have been handled under standard defamation law principles, discussed at § 30.2.1.1.B.

§ 29.6.2.4  Balancing Free Speech and Fair Trial Rights

In 1907, in Patterson v. Colorado,\(^{335}\) the author of editorials thought by a trial judge to have a tendency to interfere with the administration of justice in a pending case was held entitled to protection against a contempt citation only if the proceedings were arbitrary. However, in the 1941 case of Bridges v. California,\(^{336}\) the publishers of materials relating to a pending case were protected from a contempt citation by a version of the clear and present danger test which required the threat of an serious evil and an extremely high degree of imminence.

330 Id. at 536-37 (Breyer, J., joined by O’Connor, J., concurring).
331 Id. at 544-46 (Rehnquist, C.J., joined by Scalia and Thomas, JJ, dissenting).
333 Id. at 773.
335 205 U.S. 454, 458-63 (1907).
The modern series of cases begin in 1966 with *Sheppard v. Maxwell*.\(^{337}\) Prejudicial publicity about the defendant had saturated the community in which he was tried. The Court said that the press must have a free hand if there is no threat to the integrity of a trial. However, where the accused might be prejudiced, the court can and should take appropriate steps to protect the accused’s Sixth Amendment right to a fair trial, noted at § 23.2.1.3.A nn.163-65. The court can limit the presence of the press at judicial proceedings. The judge can also continue the case until publicity subsides, transfer it to another county, or sequester the jury. Failure to protect the defendant from inherently prejudicial publicity, as in this case, will result in reversal of the conviction.

In contrast, direct efforts to stop pretrial publicity have been treated rather harshly by the Court. In *Nebraska Press Association v. Stuart*,\(^{338}\) the trial judge had restrained a news service from publishing or broadcasting accounts of confessions or admissions made by the accused or facts “strongly implicative” of the accused’s guilt. Reversing, the Court said that prior restraints are the most serious and least tolerable infringement of First Amendment rights and “it is nonetheless clear that the barriers to prior restraint remain high unless we are to abandon what the Court has said for nearly a quarter of our national existence and implied throughout all of it.” Here there had been no finding that alternative measures, such as those mentioned in *Sheppard*, would not have protected defendant’s rights. Also, to the extent the order reached evidence adduced at an open hearing, it plainly violated settled principles, and was too vague and too broad to survive scrutiny.

Despite these statements, protective orders that would enhance the litigation process have been approved. For example, in *Seattle Times Co. v. Rhinehart*,\(^{339}\) the Court allowed a protective order restraining the parties to civil litigation from publishing material obtained through the discovery process. The Court said this furthered a substantial interest unrelated to the suppression of expression, *i.e.*, a purpose to assist in the preparation of trial or settlement. By use of this language, the Court approved use of an intermediate standard of review for a protective order justified by a content-neutral reason. The Court noted that this cases did not involve the classic kind of prior restraint, to which strict scrutiny would be applied, because the protective order “prevents a party from disseminating only that information obtained through use of the discovery process. Thus, a party may disseminate the identical information covered by the protective order as long as the information is gained through means independent of the court’s processes.”

Cases involving complete bans on persons, including the media, from criminal courtrooms have triggered strict scrutiny review. As the Court noted in *Globe Newspaper Co. v. Superior Court*,\(^{340}\) the Court’s precedents have “firmly established” that “the press and general public have a constitutional right of access to criminal trials.” Closing court proceedings will only be allowed if it were “necessitated by a compelling government interest, and is narrowly tailored to serve that

interest.” In *Globe Newspaper*, the Court concluded that a law allowing trial courts to exclude the press and the public from hearing the testimony of witnesses under 18 who were allegedly were the victims of sex crimes was supported by the compelling government interest of protecting such victims from public exposure, but that the law requiring closure in all cases was not the “least restrictive alternative” and that a case-by-case approach would adequately serve the state’s interests.

The Court has also held under a strict scrutiny approach that it is unconstitutional to exclude the public or the press from *voir dire* proceedings, since such proceedings are a key phase of a trial. The Court acknowledged in *Press-Enterprise Co. v. Superior Court*[^341] that closure might be justified to advance the compelling government interest of protecting prospective jurors from answering “deeply personal matters” in open court, but that “the presumption of openness may be overcome only by an overriding interest based on findings the closure is essential to preserve higher values and is narrowly tailored to serve that interest.” Under this standard, the Court said, closure should be regarded as the last resort, *i.e.*, a “least restrictive alternative” approach.

In each of these cases the Court has treated the rights of the press and the rights of the public equally, confirming that for purposes of First Amendment law there is no difference in the standards of review applicable in “freedom of speech” and “freedom of the press” cases. Similarly, in *Branzburg v. Hayes*,[^342] the Court concluded that members of the press have no special protection to resist subpoenas requiring the disclosure of confidential sources, although the Court did note that for any person the relevant test to justify a subpoena in these circumstances was a strict scrutiny “compelling state interest” test, and that this was met in the case. In *Zurcher v. Stanford Daily*,[^343] the Court held that the press have no special right to resist searches and seizures of material in press rooms which are otherwise constitutional under the Fourth Amendment.

Reflecting a special solicitude for the press, Justice Stewart dissented in both *Branzburg* and *Zurcher*, as did a number of liberal instrumentalist Justices in each.[^344] Despite this view, the majority of the Court has not adopted doctrines granting the press special First Amendment protection. The press also have no special right of access to gather information, or exemption from antitrust laws, or exemption from the application of any general law.[^345] As a matter of state law, a

[^345]: See *Branzburg*, 408 U.S. at 682-86. See also *Baltimore Sun Co. v. Ehrlich*, 437 F.3d 410 (4th Cir. 2006) (Governor’s directive forbidding all state executive employees to speak with two specific news reporters because of their perceived bias in reporting had only *de minimis* impact on reporters’ exercise of their First Amendment rights to speak and therefore did not give rise to retaliation claim based upon activity “sufficient to chill the exercise of First Amendment rights” actionable under 42}
large number of states have adopted shield laws to protect reporters from having to reveal their sources, but this is a matter of state law, not constitutional right. No such federal statute exists regarding prosecutions in the federal courts.\textsuperscript{346}

There is no evidence that the Court has changed its position with respect to the above matters in the post-instrumentalist era. However, there has been a slight retreat by the Court with respect to standards protecting the speech rights of defense attorneys. In \textit{Gentile v. State Bar of Nevada},\textsuperscript{347} a 1991 case, a defense attorney had said some six months before trial that the state had indicted his client as a scapegoat for crooked cops. For this speech he was discipline by the State Bar of Nevada. In an opinion by Chief Justice Rehnquist, a majority of the Court said that because lawyers are officers of the court, their speech, when representing clients in pending cases, may be regulated under a less demanding standard than that established for regulation of the press in \textit{Nebraska Press}. The Chief Justice said the Court should ask only whether the speech created “a substantial likelihood that his statements would materially prejudice the trial of his client,” an intermediate level of review, rather than a strict scrutiny level of review of “actual prejudice” or “an imminent threat to fair trial,” reflected in cases like \textit{Nebraska Press}, discussed at § 29.6.2.4 n.338, and its cite to \textit{New York Times Co. v. United States} (The Pentagon Papers Case), discussed at § 29.6.1.1 nn.208-12.

Justice Kennedy dissented on this point, joined by the instrumentalist Justices Marshall, Blackmun, and Stevens. He would have applied “normal First Amendment principles” to the case, which would have required a strict scrutiny approach for this content-based regulation of speech. Justice Kennedy noted that the state has many avenues for disseminating information adverse to a criminal defendant, whereas defendants cannot speak without risking incrimination and their only means of countering prosecution statements is likely to be their defense counsel.\textsuperscript{348} These four Justices were joined by Justice O’Connor, however, regarding whether the State Bar’s rule under which the attorney was disciplined were unconstitutionally vague. Announcing the judgment of the Court which set aside disciplinary sanctions for making that statement, Justice Kennedy wrote that the rule on which the sanctions were based was unconstitutionally vague since it was not clear whether the attorney knew or reasonably should have known that his remarks created “a substantial likelihood of material prejudice” in a trial for which a jury was not to be empaneled for six months and at which no juror indicated any recollection of the lawyer or his press conference.\textsuperscript{349}

\textsuperscript{349} \textit{Id.} at 1048-51; \textit{id.} at 1082 (O’Connor, J., concurring).
A separate issue arises when the press requests, and courts permit, either on their own motion or pursuant to statutory authorization, cameras to be placed in the courtroom to television court proceedings live. As discussed at § 23.2.1.3.A nn.164-68, while in extreme circumstances such coverage can be viewed as interfering with the defendant’s Sixth Amendment right to a fair trial, all 50 states have some provision for televised access in their state courts in some circumstances, although that access may be limited in certain cases.

In contrast to this more receptive attitude regarding cameras in the courtroom in state courts, the federal courts, and United States Supreme Court, have continued their historic reluctance to permit cameras in the courtroom. As of October, 2006, only a couple of federal Circuit Courts of Appeals, the Second Circuit and the Ninth Circuit, have rules providing for televising appellate proceedings in some limited circumstances, pursuant to authority granted them by the Judicial Conference in 1996.350 As discussed at § 23.2.1.3.A n.169, beginning with the 2006 Term, the Supreme Court will make same-day written transcripts available of all oral arguments.

§ 29.6.2.5 Protecting the Press from Taxation That Threatens to Suppress Ideas

In the original natural law period, Chief Justice Marshall observed, “The Power to tax involves the power to destroy.”351 In the formalist era, Justice Holmes rebutted Marshall by saying, “The Power to tax is not the power to destroy while this Court sits.”352 Even so, during the Holmesian era, the Court tended to uphold taxes that seriously interfered with an activity, so long as that activity was entitled to no special constitutional protection.353 Of course, the press is entitled to protection as a matter of routine free speech protections. From an historical perspective this is appropriate because in England, after licensing prior restraints were abandoned, taxes soon were passed whose principal objective was the control of “licentious, schismatical, and scandalous” publications.354

The first Supreme Court case involving a challenge to a tax specially applicable to the press was Grosjean v. American Press Co.,355 decided in 1936, on the borderline between the formalist and Holmesian eras. In Grosjean, the Court struck down a tax on the gross receipts of newspapers

---

having a circulation of more than 20,000 copies per week. The Court said that in light of its history and setting, the tax was “a deliberate and calculated device in the guise of a tax to limit the circulation of information to which the public is entitled in virtue of the constitutional guarantee.” Many of the papers being taxed had been critical of the most powerful political figure in the state, Senator Huey Long.356

First Amendment protection from taxation was broadened during the instrumentalist era in *Minneapolis Star and Tribune Company v. Minnesota Commission of Revenue*.357 Justice O’Connor said that government can subject newspapers to generally applicable economic regulations without creating constitutional problems, but a use tax on the cost of paper and ink products, with the first $100,000 being exempt, singled out the press for special treatment. Such singling out cannot stand unless under strict scrutiny necessary to achieve a compelling government interest. The state had not shown such an interest since it had not explained why it chose to use a substitute for the state’s general sales tax.

In the modern post-instrumentalist era, the protection traditionally given the press from being singled out in taxes was extended by requiring strict scrutiny whenever incidence of a tax was based on content. Thus, in *Arkansas Writers’ Project v. Ragland*,358 decided in 1987, the Court held that the First Amendment was violated by a state sales tax scheme that taxed general interest magazines but exempted newspapers and religious, professional, trade, and sports journals. For the Court, Justice Marshall pointed out that this made incidence of the tax depend entirely on the content of the magazine, and yet the state did not show that this was justified by a compelling state interest necessary to achieve that end.

In 1991 there was a slight retreat from the protection given the press by this series of cases. By a 7-2 vote, the Court held in *Leathers v. Medlock*359 that Arkansas could impose a sales tax on cable television, but exempt newspapers, magazines, and satellite broadcast services. On behalf of the majority, Justice O’Connor pointed out that the record did not show an impermissible motive to discriminate against the press, the law did not single out a small group of publishers, since there were approximately 100 cable systems operating in the state, and the law did not discriminate on the basis of content. She added that there is no rule that intermedia or intramedia discrimination violates the First Amendment in the absence of any evidence of intent to suppress speech or of any effect on the expression of particular ideas.

Justice Marshall, dissenting with Justice Blackmun, said that the state’s only expressed interest, that of raising revenue, was not sufficiently compelling to overcome the presumption of unconstitutionality that should apply where the state discriminates between elements of the media, thus creating the risk of covert censorship. He added that it was not necessary for the Court to find
evidence of an improper censorial motive. It was up to the state to justify its discrimination because the government has an obligation of evenhandedness.  

360  

Id. at 454 (Marshall, J., joined by Blackmun, J., dissenting).
CHAPTER 30: EXCEPTIONS TO STANDARD FREE SPEECH DOCTRINE

The Supreme Court has created a number of exceptions to standard free speech doctrine for certain categories of speech that do not receive full First Amendment protection. In some of these cases, such as fighting words, obscenity, indecency involving children, or certain advocacy of illegal conduct, discussed at § 30.1.1-30.1.4, the speech receives no First Amendment protection, except for the prescription against viewpoint discrimination that triggers strict scrutiny review, as discussed at § 30.1. For other kinds of speech, like defamatory speech or governmental regulation of the speech of government employees on matters of public concern, discussed at § 30.2, a version of rational review is applied. For regulations of broadcast radio or television, or regulations of commercial speech, discussed at § 30.3, a version of intermediate scrutiny is applied. In campaign finance cases, or speech regulating the choice and election of candidates, discussed at § 30.4, a version of strict scrutiny is applied.

Not surprisingly, these versions of rational review, intermediate scrutiny, and strict scrutiny track the different levels of scrutiny used in other cases involving individual rights. As discussed at § 7.2.1 text following n.42, there are basically seven different levels of scrutiny. These seven levels are minimum rational review, second-order rational review, third-order rational review, basic intermediate review, intermediate review with bite, loose strict scrutiny, and strict scrutiny.

§ 30.1 Content-Based Regulations of “Unprotected” Speech That Trigger No Further First Amendment Review, Except for the Prescription Against Viewpoint Discrimination

The Court has identified certain categories of speech that, as traditionally defined, are not protected by the First Amendment. The four basic categories of such speech involve some advocacy of illegal conduct, discussed at § 30.1.1; fighting words, discussed at § 30.1.2; obscenity, discussed at § 30.1.3; and indecency involving children, discussed at § 30.1.4. While libel was also historically viewed as an additional category of “unprotected” speech, libelous speech has been entitled to some First Amendment protection since New York Times Co. v. Sullivan in 1964, discussed at § 30.2.1.1. In addition, false or unlawful statements made in the context of commercial speech are entitled to no First Amendment protection. Only truthful, lawful representations are provided First Amendment protection under the Central Hudson test for commercial speech, discussed at § 30.3.2.

The Court has sometimes stated that these categories of “unprotected” speech are not protected at all by the First Amendment. For example, in 1942, in Chaplinsky v. New Hampshire,¹ a case involving fighting words, the Court noted, “There are certain well-defined and narrowly limited classes of speech, the prevention and punishment of which has never been thought to raise any Constitutional problem. These include the lewd and obscene, the profane, the libelous, and the insulting or ‘fighting’ words – those which by their very utterance inflict injury or tend to incite an immediate breach of the peace. It has been well observed that such utterances are no essential part of any exposition of ideas, and are of such slight social value as a step to truth that any benefit that may be derived from them is clearly outweighed by the social interest in order and morality.”

¹ 315 U.S. 568, 571-72 (1942).
However, in 1992, that perspective was clarified in *R.A.V. v. City of St. Paul.* Speaking for a 6-3 Court, Justice Scalia said that such statements are not literally true:

> What they mean is that these areas of speech can, consistently with the First Amendment, be regulated *because of their constitutionally proscribable content* . . . – not that they are categories of speech entirely invisible to the Constitution, so that they may be made the vehicles for content discrimination unrelated to their distinctively proscribable content.

Noting that content-based regulations are presumptively invalid, Justice Scalia said that this principle applied to impose upon even these kinds of proscribable speech a viewpoint discrimination limit. For example, he noted, “We recently acknowledged this distinction in [*New York v. Ferber*], where, in upholding New York's child pornography law, we expressly recognized that there was no ‘question here of censoring a particular literary theme.’” Similarly, Scalia noted, if this were not the rule “a city council could enact an ordinance prohibiting only those legally obscene works that contain criticism of the city government or, indeed, that do not include endorsement of the city government. Such a simplistic, all-or-nothing-at-all approach to First Amendment protection is at odds with common sense and with our jurisprudence as well.” Thus, even for these categories of speech, viewpoint discrimination triggers strict scrutiny review, as discussed at § 29.4.3.1.

Under this doctrine, there are three situations in which content discriminations can be made. The first is where the discrimination is based entirely on the same reason that the category of speech is proscribable, that is, the regulation would be a subject-matter regulation, not an example of viewpoint discrimination. For example, the law could bar the most lascivious displays of sexual activity, but could not prohibit only obscenity which includes offensive political messages. The second exception is where the defined subclass of proscribable speech is associated with particular “secondary effects” of the speech so that the regulation is justified on a content-neutral basis without reference to the content of the speech. Justice Scalia noted that a case of this kind is *Renton v. Playtime Theatres, Inc,* discussed at § 29.4.4.1 n.135, where adult movie theaters could be zoned because of their secondary effects on the surrounding neighborhood. The third exception occurs where the nature of the content discrimination is such that there is no realistic possibility that official suppression of ideas is afoot. As an example, Justice Scalia said, “We could not think of any First Amendment interest that would stand in the way of a State’s prohibiting only those obscene motion pictures with blue-eyed actresses.” Of course, such a law, if not rationally related to any legitimate interest, would probably violate the Equal Protection Clause or Due Process Clause as being “irrational,” “arbitrary,” or “capricious” under standard minimum rational review.

---

4 *Id.* at 388-89.

6 *Id.* at 390.
In short, these three situations all involve non-viewpoint based discrimination. The Court made clear in *R.A.V.* that viewpoint discrimination will trigger strict scrutiny even with respect to “unprotected” speech, as it did in *R.A.V.*, where the law, discussed at § 30.1.1.3 n.41, was a version of “hate crimes” legislation proscribing only fighting words that involved messages of racial, gender, or religious intolerance, but did not ban fighting words against racial, gender, or religious intolerance. In the vast majority of cases involving proscribable speech, no such viewpoint discrimination has appeared, and *R.A.V.* currently stands as a rather lonely beacon.

§ 30.1.1 Advocacy of Illegal Conduct

There are four kinds of cases that fall generally under the category of speech involving the advocacy of illegal conduct. The classic case involves advocacy by a speaker to a group at a demonstration, or the distribution of leaflets or other literature, advocating lawless action, discussed at § 30.1.1.1. A second kind of case involves advocacy where the speaker indicates a possible intent for the speaker to commit violence. The Court has defined these cases as involving whether the speaker’s statement indicates a “true threat” to commit violence, discussed at § 30.1.1.2. A third kind of case involves speech concerning violence done in the context of on-going illegal actions. These cases involve application of special “hate crimes” statutes that make the related speech a crime independent of the on-going illegal action, discussed at § 30.1.1.3. Finally, sometimes statutes or government regulations have attempted to regulate or ban certain kinds of “hate speech” where no other illegal or violent conduct was taking place, discussed at § 30.1.1.4.

§ 30.1.1.1 Classic Cases of Advocacy of Illegal Conduct

The earliest and most historic line of cases dealing with content-based governmental restrictions on speech involved the advocacy of illegal conduct. The classic case involves advocacy by a speaker to a group at a demonstration, or the distribution of leaflets or other literature, advocating lawless action, discussed at § 29.1. The ultimate outcome of this series of cases, as discussed at § 29.2, was that the Supreme Court applies strict scrutiny to content-based restrictions on speech in a public forum, whether imposed by the federal government or the states, unless the speech is determined to be “unprotected” speech. As discussed below, at § 30.1.1.1 nn.16-24, the test today to be “unprotected” speech regarding advocating illegal conduct under *Brandenburg v. Ohio* is whether the speech is “directed to inciting or producing imminent lawless action and is likely to incite or produce such action.” If the speech meets this test, the speech is “unprotected” and there is no further First Amendment review, unless viewpoint discrimination is involved, which always triggers strict scrutiny, as noted at § 30.1 nn.2-6.

There were no First Amendment decisions regarding the advocacy of illegal conduct during the original natural law era, as noted at § 29.1.1. During the formalist era, in *Schenck v. United States*, discussed at § 29.1.2 nn.10-11, the Court upheld punishment for distributing circulars urging conscripts not to submit to intimidation and saying the United States had no power to send citizens abroad to fight. In oft-quoted language, Holmes said that "the question in every case is whether the words used are used in such circumstances and are of such a nature as to create a clear and present
danger that they will bring about the substantive evils that Congress has a right to prevent."

In 1941, the Court took a step toward firmly accepting the clear and present danger test when in *Bridges v. California*, discussed § 29.1.3 n.29, the Court set aside a contempt fine imposed on Harry Bridges and a newspaper for publications that tended to interfere with the fair and orderly administration of justice. Justice Black said that the Holmes test amounted to a working principle that, at a minimum, "the substantive evil must be extremely serious and the degree of imminence extremely high before utterances can be punished." In fact, this phrasing was a step beyond the language adopted by Holmes and Brandeis in *Whitney v. California* for regulation to be a clear and present danger under the Schenck test, which only required that the threat be "relatively serious" and "imminent."

A step backwards was taken in 1951, in *Dennis v. United States*, discussed at § 29.1.3 nn.36-39, when a plurality of the Court characterized the situation as one involving a party designed and dedicated to the overthrow of the Government, the Communist Party, in the context of a world crisis. So saying, the plurality adopted a watered-down version of the clear and present danger test written by Judge Learned Hand in *Masses Pub. Co. v. Patten*, discussed at § 29.1.3 n.37. The Smith Act was held validly applicable to convict the leaders of the Communist Party for advocating violent overthrow with intent to cause it as soon as circumstances permit because "the gravity of the evil, discounted by its improbability, justified such invasion of free speech as was necessary to avoid the danger." The creation of an organized, disciplined conspiracy, viewed in light of world conditions, created the requisite danger. The plurality opinion said that neither Holmes nor Brandeis ever envisioned that their test should be an absolute, applied without regard to its reasons. Justice Frankfurter agreed, where the type of speech ranks low in the scale of values. Adopting even a more extreme limitation on the clear and present danger test, Justice Jackson wrote that he would use a clear and present danger test only for street corner cases, leaving the problem to the executive and legislative branches for larger, organized conspiracies. Justices Black and Douglas, dissenting, would require, as did Holmes, that some immediate injury to society be imminent.

Reflecting the liberal instrumentalist predisposition in favor of free speech, discussed at § 29.1.4, the Court adopted tests after 1954 that provided greater protection for speech than either the majorities in *Schenck* or *Dennis*, or that advocated by Holmes and Brandeis, as reflected in *Whitney* or *Bridges*. In 1957, the Court cautioned in *Yates v. United States* that advocacy of overthrow as a doctrine, divorced from efforts to instigate action, is protected by the Constitution, even if there

9   *Id.* at 52.

10  314 U.S. 252, 263 (1941) (emphasis added).

11  274 U.S. 357, 376-77 (1927) (emphasis added).

12  341 U.S. 494, 510 (1951) (plurality opinion of Vinson, C.J., joined by Reed, Burton & Minton, JJ.); *id.* at 544-45 (Frankfurter, J., concurring in the judgment); *id.* at 567-69 (Jackson, J., concurring); *id.* at 580 (Black, J., dissenting); *id.* at 584-86 (Douglas, J., dissenting). Justice Clark took no part in the consideration or decision of the case. *Id.* at 517.

is evil intent. Thus, the Smith Act was read to apply only where there is incitement to illegal action and a sufficient orientation toward action that it likely will occur. The Court read Dennis as holding that even incitement is protected unless the group being indoctrinated is of sufficient size and cohesiveness, is sufficiently oriented towards action, and other circumstances reasonably justify apprehension that action will occur.

In 1961, as the perception of any imminent threat by the Communist Party receded, the Court imposed in Scales v. United States rigorous proof requirements for punishing membership in the Communist Party. The member must be active, know of the party's illegal advocacy, and have a specific intent to bring about overthrow as speedily as circumstances permit. On the question of constitutionality as applied, the Court said there must be evidence of teaching forcible overthrow, accompanied by directions as to the type of illegal action which must be taken when the time for the revolution is reached, or teaching conduct to render effective the later illegal activity which is advocated. This requirement was so difficult to meet that the prosecution of Communists shortly came to an end.

In 1964, addressing itself to the value of political speech, the Court said in New York Times Co. v. Sullivan that the First Amendment reflects a "profound national commitment" to the principle that "debate on public issues should be uninhibited, robust, and wide-open." Consistent with such a commitment, the Court formulated in 1969 a new test for regulating the advocacy of illegal action. In Brandenburg v. Ohio, the Court held that a state may not proscribe advocacy of force or law violation except where such advocacy is "directed to inciting or producing imminent lawless action and is likely to incite or produce such action."

Interpreted in terms of the Court's currently used levels of review, this test is consistent with strict scrutiny because avoiding lawless action would be a compelling governmental interest and banning only the advocacy of imminent lawless action likely to be incited is the least restrictive alternative necessary to advance that compelling interest. In practice, the same result is achieved under current doctrine by holding that for speech which meets the Brandenburg definition of illegal advocacy there is no further First Amendment review and the statute survives a First Amendment challenge.

The Court applied the Brandenburg test in Hess v. Indiana. In Hess, the Court set aside a conviction for disorderly conduct based upon the fact that defendant, an antiwar demonstrator who with his companions had been moved off a street by the sheriff, said in a loud voice, "We'll take the fucking street later." The Indiana Supreme Court had affirmed the trial court's finding that defendant's statement was intended to incite further lawless action on the part of the crowd in the vicinity of appellant and was likely to produce such action. In a 6-3 per curiam opinion, the Court replied, "At best, however, the statement could be taken as counsel for present moderation; at worst,

it amounted to nothing more than advocacy of illegal action at some indefinite future time.” Thus, although the words might tend toward violence, this did not satisfy the requirement that advocacy be directed to inciting or producing imminent lawless action that is likely to be produced. Justice Rehnquist, dissenting with Chief Justice Burger and Justice Blackmun, said that the Court had exceeded the proper scope of judicial review in not considering the evidence in the light most favorable to the appellee state.18

No imminence was also found in Cohen v. California.19 In Cohen, the Court reversed a conviction for disorderly conduct. In a corridor outside a courtroom the defendant had worn a jacket which bore the words “Fuck the Draft.” The Court said that at least so long as there is no showing of an intent to incite disobedience to or disruption of the draft, defendant could not, consistently with the First Amendment, be punished for asserting his opposition to the draft. The word was not an obscenity since it was in no sense erotic. It could not be regarded as fighting words, since no individual could have found it to be a personal insult. Nor was there an intent to provoke a group to hostile action. Since the speech was not “unprotected speech” in any sense, the Court applied normal First Amendment doctrine. The case was held not to involve a content-neutral justification of privacy, because there was no captive audience whose privacy interests were being invaded in an intolerable manner. As guardian of public morality, the state could not justify punishment of a single word since this would be an inherently boundless power and there would be a substantial risk of suppressing ideas in the process. To make the simple public display of this single four-letter word a criminal offense, the state would need a more particularized and compelling reason.

Since 1986, the Court has not had a major case on advocacy of illegal conduct. Most of the post-1986 cases on political speech have involved the question of whether a standard lower than strict scrutiny should be applied because the speech was possibly uttered in a non-public forum, an issue addressed in Frisby v. Schultz, discussed at § 29.5.2 nn.195-96, or because of audience reactions, e.g., where the audience was hostile, and thus the case might involve fighting words, discussed at § 30.1.2. The Court has said a number of times, as in Boos v. Barry,20 that if the Brandenburg test for what speech constitutes “advocacy of illegal conduct” is not met, then content-based restrictions on political speech in a public forum are given strict scrutiny, i.e., the government must show that the regulation is necessary to serve a compelling state interest and narrowly drawn to achieve that end. In passing, Justice Thomas noted in Lorillard Tobacco Co. v. Reilly21 that regulations banning tobacco ads within 1,000 feet of schools or playgrounds, as part of an effort to proscribe solicitation for unlawful conduct, the sale of cigarettes to minors, “clearly fail the Brandenburg test” as not involving speech likely to incite imminent lawless action of cigarette purchases by minors.

Because the Court has not had a recent major case on the advocacy of illegal conduct, possible limits on a Brandenburg analysis for larger, organized conspiracies, rather than street corner cases, as

18 Id. at 111-12 (Rehnquist, J., joined by Burger, C.J., and Blackmun, J., dissenting).
21 533 U.S. 525, 579-80 (Thomas, J., concurring in part and concurring in the judgment).
suggested by Justice Jackson in his concurrence in Dennis, discussed at §§ 29.1.3 n.39 & 30.1.1.1 n.12, have not been tested. However, it seems likely that if a political speech advocated overthrow, the Court would find that the government could establish a compelling interest and that its law was narrowly tailored only if the Brandenburg test were satisfied. It seems not far fetched to predict that conservative formalists and Holmesians, who tend to be more deferential to the government than other Justices, might be willing to follow Justice Jackson and use a standard lower than Brandenburg if the defendant advocate was a large, well organized conspiracy and a legislature had found that its variety of speech was a danger. Liberal instrumentalists would predictably disagree, leaving the matter in the hands of the natural law Justices. Based upon their respect for precedent, as well as the traditional natural law respect for freedom of speech, it is likely that these Justices would support application of Brandenburg in every case.

For this reason, the Brandenburg rule is likely to be applied in a situation involving a group as large and well organized as was the Communist Party in the 1950s. However, it is unresolved whether the Brandenburg rule would be applied to groups, including terrorist groups, better organized and more effective than the Communist Party, whose members in retrospect posed not as great an internal threat to the stability and security of the United States during the 1950s as was feared at the time. Similarly, although the Brandenburg rule would likely apply, it is unresolved whether Brandenburg would be used in a prosecution involving religious speech advocating the violent overthrow of government, such as a cleric's speech or sermons regarding jihad and calling for the overthrow of infidels – where that would mean the United States or its allies – that went beyond mere metaphor or abstract doctrine and was directed to advocacy of action.22

Even more so than in cases of speech by terrorists, it is likely that Brandenburg supplies the relevant precedent for cases of “media-inspired violence,” whether based on a movie or a violent video game. In a suit alleging that the producers of the film Natural Born Killers were liable to the victims for distributing a film "which they knew or should have known would cause and inspire people" to acts of violence by, among other things, "glorifying" such violence and "treating individuals who commit such violence as celebrities and heroes," a lower court applied the Brandenburg test.23 Similarly, the Eighth Circuit concluded that a municipal ordinance making it unlawful to distribute a graphically violent video game to minors without parental consent violated the First Amendment. Since such games did not involve any "imminent" incitement to violence, Brandenburg did not apply, and under standard First Amendment doctrine the state did not establish on the record that its compelling interest in protecting the psychological well-being of minors was “real, not merely conjectural.”24

24 Interactive Digital Software Ass’n v. St. Louis Cty., Missouri, 329 F.3d 954, 958-60 (8th Cir. 2003).
§ 30.1.1.2 Cases Involving True Threats

A second kind of case involving advocacy of illegal conduct occurs where the speaker indicates an intent for the speaker to commit violence. The Court has defined these cases as involving whether the speaker’s statement indicates a “true threat” to commit violence. As stated in Virginia v. Black:

“True threats" encompass those statements where the speaker means to communicate a serious expression of an intent to commit an act of unlawful violence to a particular individual or group of individuals. The speaker need not actually intend to carry out the threat. Rather, a prohibition on true threats "protect[s] individuals from the fear of violence" and "from the disruption that fear engenders," in addition to protecting people "from the possibility that the threatened violence will occur." Intimidation in the constitutionally proscribable sense of the word is a type of true threat, where a speaker directs a threat to a person or group of persons with the intent of placing the victim in fear of bodily harm or death.25

The Court noted in Virginia v. Black26 that respondents “do not contest that some cross burnings fit within this meaning of intimidating speech, and rightly so. . . . [T]he history of cross burning in this country shows that cross burning is often intimidating, intended to create a pervasive fear in victims that they are a target of violence.” Thus a statute banning cross-burning was not facially invalid. Concerning whether this “unprotected speech” nonetheless involved viewpoint discrimination, and thus should be subjected to strict scrutiny review, the Court noted that the statute was merely a subject-matter regulation of a “particularly virulent form of intimidation. . . . Virginia may choose to regulate this subset of intimidating messages in light of cross burning's long and pernicious history as a signal of impending violence. Thus, just as a State may regulate only that obscenity which is the most obscene due to its prurient content, so too may a State choose to prohibit only those forms of intimidation that are most likely to inspire fear of bodily harm. A ban on cross burning carried out with the intent to intimidate is fully consistent with our holding in R.A.V.”

A case where a “true threat” was not found is Watts v. United States.27 This case involved a demonstrator in Washington, D.C. protesting the draft in 1966, who yelled out, “And now I have already received my draft classification as 1A – and I have got to report for my physical this Monday coming. I am not going. If they ever make me carry a rifle the first man I want to get in my sights is L.B.J.” Interpreting a statute that embodied the constitutional requirement of a “true threat” for the government to regulate, the Court stated, “But whatever the ‘willfullness’ requirement implies, the statute initially requires the Government to prove a true ‘threat.’ We do not believe that the kind of political hyperbole indulged in by petitioner fits within that statutory term. For we must interpret the language Congress chose ‘against the background of a profound national commitment to the principle that debate on public issues should be uninhibited, robust, and wide open, and that it may well include vehement, caustic, and sometimes unpleasantly sharp attacks on government and public officials.’ The language of the political arena, like the language used in labor disputes, is

26 Id. at 360, 363.
often vituperative, abusive, and inexact. We agree with petitioner that his only offense here was ‘a kind of very crude offensive method of stating a political opposition to the President.’”

In applying the “true threat” test, the courts have adopted an objective test that focuses on whether a reasonable person would interpret the purported threat as a serious expression of an intent to cause a present or future harm. However, there is a split among the courts in determining from whose viewpoint the statement should be interpreted. Some courts ask whether a reasonable person standing in the shoes of the speaker would foresee that the recipient would perceive the statement as a threat, whereas others ask how a reasonable person standing in the recipient's shoes would view the threat.

Those courts who adopt the speaker’s viewpoint have noted that this “standard not only takes into account the factual context in which the statement was made, but also better avoids the perils that inhere in the ‘reasonable-recipient standard,’ namely that the jury will consider the unique sensitivity of the recipient. We find it particularly untenable that, were we to apply a standard guided from the perspective of the recipient, a defendant may be convicted for making an ambiguous statement that the recipient may find threatening because of events not within the knowledge of the defendant.”

On the other hand, if the concern is to "protect individuals from the fear of violence" and "from the disruption that fear engenders,” as stated by the Supreme Court in Virginia v. Black, the perspective of recipients seems the better perspective. Under that perspective, courts have set forth “a nonexhaustive list of factors relevant to how a reasonable recipient would view the purported threat. Those factors include: 1) the reaction of those who heard the alleged threat; 2) whether the threat was conditional; 3) whether the person who made the alleged threat communicated it directly to the object of the threat; 4) whether the speaker had a history of making threats against the person purportedly threatened; and 5) whether the recipient had a reason to believe that the speaker had a propensity to engage in violence.” Such factors should diminish the threat that the analysis will focus on a “uniquely sensitive” recipient, but rather on a reasonable recipient of the speech.

In most circumstances, of course, either test will yield the same result in practice, since both focus on objective evidence regarding the individuals’ speech. As the Eighth Circuit Court of Appeals noted, “the result will differ only in the extremely rare case when a recipient suffers from some unique sensitivity and that sensitivity is unknown to the speaker.” In addition, the Ninth Circuit has noted that even under the speaker’s viewpoint standard “‘[a]lleged threats should be considered in light of their entire factual context, including the surrounding events and the reaction of the listeners.’ (‘So long as the threat on its face and in the circumstances in which it is made is so unequivocal, unconditional, immediate and specific ... as to convey a gravity of purpose and

29 Doe v. Pulaski County Special Sch. Dist., 306 F.3d 616, 622-23 (8th Cir. 2002) (citations omitted).

imminent prospect of execution, the statute may properly be applied.’)\(^{31}\)

A number of cases involving “true threats” have occurred in the context of schools. Under this doctrine, a number of statements or violent images have been held to create “true threats.”\(^{32}\) In other cases, without regard to “true threat” analysis, courts have regulated such speech under the *Tinker* standard, discussed at § 29.6.2.2 nn.286-88, of a “substantial and material disruption” to the school environment.\(^{33}\) In cases outside the school context, such as threats to injure or kidnap, or speech targeting pro-choice individuals on abortion, courts have had to face whether speech represents a “true threat.”\(^{34}\)

While the issue is not without dispute, the better argument is that to constitute a “true threat” the speaker must threaten that the speaker will cause the harm, or someone with whom the speaker controls, directs, or otherwise is involved in a conspiracy. If the speaker merely advocates violence by others, that speech is governed by the *Brandenburg* test regarding the advocacy of illegal conduct, discussed § 30.1.1.1 nn.16-24. For example, in *Virginia v. Black*,\(^{35}\) the Supreme Court applied “true threat” analysis because the relevant statute made it a crime “for any person or persons, with the intent of intimidating any person or group of persons, to burn, or cause to be burned, a cross on the property of another, a highway or other public place.” This is consistent with the test for a “true threat” in *Black*, cited at § 30.1.1.2 n.25, that “the speaker means to communicate a serious expression of an intent to commit an act of unlawful violence to a particular individual or group of individuals.” This requires that the “speaker . . . commit an act,” not some third party.

Despite this analysis, it has been suggested that as long as a reasonable person would perceive a threat has been made, a true threat exists no matter who would carry out the threat. This has been

Hanna, 293 F.3d 1080 (9th Cir. 2002) (case remanded for new trial on true threat issue); United States v. Landham, 251 F.3d 1072 (6th Cir. 2001) (no true threat found). See also Planned Parenthood of Columbia/Willamette v. American Coalition of Life Activists, 244 F.3d 1007 (2001) (no true threat found), rev’d en banc, 290 F.3d 1058 (9th Cir. 2002) (true threat found).

particular suggested for threats made on the Internet because “the unique characteristics of the Internet blur the distinction between threats and incitement by allowing speakers to threaten by incitement – that is, creating fear by increasing the likelihood of ensuing violence without actually threatening to carry out the violence themselves.”

While no Supreme Court case supports this theory, a case used to support the theory is the Ninth Circuit’s *en banc* opinion in *Planned Parenthood v. American Coalition of Life Activists (ACLA)*. This case involved the posting on an Internet website the names and addresses of doctors performing abortions, with a context suggesting harm be done. While superficially this case may suggest that advocating that third persons do harm to these doctors could constitute a ‘true threat,’ in fact the Ninth Circuit did find a direct connection between the website and harm to doctors sufficient to satisfy a “harm, or caused to be harmed” analysis, as in *Black*. The *en banc* Ninth Circuit 6-5 majority opinion noted:

After a "WANTED" poster on Dr. David Gunn appeared, he was shot and killed. After a "WANTED" poster on Dr. George Patterson appeared, he was shot and killed. After a "WANTED" poster on Dr. John Britton appeared, he was shot and killed. None of these "WANTED" posters contained threatening language, either. Neither did they identify who would pull the trigger. But knowing this pattern, knowing that unlawful action had followed "WANTED" posters on Gunn, Patterson and Britton, and knowing that "wanted"-type posters were intimidating and caused fear of serious harm to those named on them, ACLA published a "GUILTY" poster in essentially the same format on Dr. Crist and a Deadly Dozen "GUILTY" poster in similar format naming Dr. Hern, Dr. Elizabeth Newhall and Dr. James Newhall because they perform abortions. Physicians could well believe that ACLA would make good on the threat.

The Justices in dissent in *Planned Parenthood* similarly noted, “Although the majority’s definition does not specify who is to inflict the threatened harm, use of the active verb ‘inflict’ rather than a passive phrase, such as ‘will be harmed,’ strongly suggests that the speaker must indicate he will take an active role in the inflicting. Recent academic commentary supports the view that this requirement is an integral component of a ‘true threat’ analysis.” Further, the Supreme Court has

L.Rev. 541, 590 (2000) (part of what "separates constitutionally unprotected true threats from constitutionally protected . . . political intimidation is [that] the speaker communicates the intent to carry out the threat personally or to cause it to be carried out"); Jennifer E. Rothman, *Freedom of Speech and True Threats*, 25 Harv. J.L. & Pub. Pol'y 283, 289 (2001) ("determining what is a true threat [should] require[ ] proof that the speaker explicitly or implicitly suggest that he
squarely rejected in the context of child pornography the view that different First Amendment standards should apply for speech on the Internet. After an extensive review of the Internet, the Court stated, without dissent, in *Reno v. American Civil Liberties Union*, 40 “[O]ur cases provide no basis for qualifying the level of First Amendment scrutiny that should be applied to this medium.”

§ 30.1.1.3 **Hate Crimes Legislation**

In addition to cases involving the advocacy of illegal conduct, or cases involving true threats, another category of speech raising similar concerns involves “hate speech” made in the context of on-going illegal activity. While on-going conduct can be regulated without regard to the First Amendment, since it involves conduct, not speech, as discussed at § 29.3.1, if the government attempts to make the related “hate speech” an independent crime, that raises First Amendment concerns.

Such a law was involved in the 1992 decision in *R.A.V. v. City of St. Paul, Minnesota*. 41 An ordinance in St. Paul provided, “Whoever places on public or private property a symbol, object, appellation, characterization or graffiti, including, but not limited to, a burning cross or Nazi swastika, which one knows or has reasonable grounds to know arouses anger, alarm or resentment in others on the basis of race, color, creed, religion or gender commits disorderly conduct and shall be guilty of a misdemeanor.” The Minnesota Supreme Court said that the law reached only fighting words and, thus, triggered that exception to “unprotected speech,” discussed at § 30.1.2. The only question then for Court review was whether the statute was nonetheless viewpoint discrimination, which would trigger strict scrutiny in any event. As discussed at § 30.1 nn.2-5, the Court did find the statute was viewpoint discriminatory and was unconstitutional on that basis.

In other cases, “hate crimes” statutes have gone beyond regulating mere fighting words, and thus have triggered a more extended First Amendment analysis. In many of these cases, however, courts have interpreted the statutes so that the “hate crimes” aspect of the statute only applied to “true threats,” and thus met that test for “unprotected speech.” For example, in *Lovell By and Through Lovell v. Poway United School District*, 42 the Ninth Circuit observed:

California courts have also considered the issue of First Amendment protection for threats. See, e.g., *In re M.S.*, 10 Cal.4th 698, 42 Cal. Rptr.2d 355, 896 P.2d 1365 (1995) (upholding the constitutionality of state hate crimes statutes that punish threats if the speaker has the apparent ability to carry out the threat and has reasonably induced fear of violence in the victim); *People v. Fisher*, 12 Cal. App.4th 1556, 15 Cal. Rptr.2d 889 (1993) (upholding a conviction . . . "as long as the circumstances are such that the threats are so unambiguous and have such immediacy that they convincingly express an intention of being carried out."). In these cases, the California

42 90 F.3d 367, 372 (9th Cir. 1996).
courts relied on both Orozco-Santillan and Kelner to determine whether a threat is a "true threat" and therefore may be criminalized. Thus, federal law and California state law substantially agree with respect to First Amendment protection of threats.

The Supreme Court has made it clear that if the relevant statute merely enhances the penalty for a crime based on bias-inspired conduct, rather than making that bias an independent crime, that does not trigger a First Amendment analysis. In Wisconsin v. Mitchell,43 the Court unanimously upheld a statute enhancing the penalty for an offense whenever the defendant selects the victim because of that person's race, religion, color, disability, sexual orientation, national origin or ancestry. This statute, said Chief Justice Rehnquist, is aimed at conduct unprotected by the First Amendment, whereas the ordinance struck down in R.A.V. was explicitly directed at expression. Using normal minimum rational review under the Equal Protection and Due Process Clauses, the Court held that the law satisfied rational basis review because the state may reasonably conclude that bias-inspired conduct inflicts greater individual and social harm – such as provoking retaliatory crimes, inflicting distinct emotional harm, and inciting community unrest.

The Court has never held that any “hate crimes” statute is constitutional unless it was narrowly defined to reach only other categories of “unprotected speech,” such as advocacy of illegal conduct, true threats, or fighting words. The best chance for such a statute would probably be to relate the “hate speech” to certain “secondary effects” to trigger intermediate review under standard First Amendment doctrine, as the University of Michigan attempted in Doe v. University of Michigan, discussed in the next section at § 30.1.1.4 nn.46-47.

A related issue involves the enforcement of laws, such as banning racially or sexually hostile work environments, where the hostile work environment is caused by speech. Without much extended analysis, the Court has permitted such hostile work environment cases to go forward, implicitly viewing the underlying hostile work environment as caused by discriminatory conduct, not speech.44 Regarding other kinds of issues that can arise in the employment context, alternatives to

44 See, e.g., Harris v. Forklift Systems, Inc., 510 U.S. 17, 21-22 (1993) (holding that a company president's repeated comments to an employee were sufficient under Title VII: (1) to be viewed subjectively as harassment by the victim and (2) were severe or pervasive enough that an objective reasonable person would agree that it is harassment); R.A.V. v. St. Paul, 505 U.S. 377, 389 (1992) (noting that "sexually derogatory 'fighting words,' . . . may produce a violation of Title VII's general prohibition against sexual discrimination in employment practices"); Jennie Randall, “Don’t You Say That!”: Injunctions Against Speech Found to Violate Title VII Are Not Prior Restraints, 3 U. Pa. J. Const. L. 990 (2001) (similar analysis applied to cases of racially hostile work environments under Title VII). Reflecting a Stage 6 approach toward equal concern and respect, discussed at §§ 16.2.1-16.2.3, many European countries ban any workplace speech or conduct that constitutes an insult to human dignity, or “mobbing,” in addition to the American model of workplace harassment based only on the “status” of race, gender, religion, or national origin. See generally Vicki Schultz, Gabrielle S. Friedman, Abigail C. Saguy, Tanya K Hernandez & David Yamada, Global Perspectives on Workplace Harassment Law, 8 Employee Rts. & Emp. Pol’y J. 151 (2004).
direct regulation of offensive speech might involve counter-speech promoting the opposite viewpoint; economic boycotts of companies or individuals supporting controversial causes; or adverse employment decisions, particularly for spokesperson-entertainers or radio/television commentators. Without regard to any statutory ban on employment discrimination based on race, sex, religion, or other such grounds, existing social norms pressure most employers to tolerate a wide-range of viewpoints among their workforce, even if the employer disagrees with those viewpoints, as long as the employees do their jobs well.45

§ 30.1.4 Hate Speech Legislation

In some cases, statutes or government regulations have attempted to regulate or ban certain kinds of “hate speech” where no illegal or other violent conduct was taking place. In many of these cases, courts have viewed such “hate speech” statutes as unconstitutionally vague. For example, in Doe v. University of Michigan,46 a district court concluded that words in a university policy that required the language must "stigmatize" or "victimize" are “general and elude precise definition.” Further, the "secondary effects" clause of the law required that the language in order to be sanctionable had to "involve an express or implied threat” affecting “an individual's academic efforts, employment, participation in University sponsored extra-curricular activities or personal safety.” As the court noted, “It is not clear what kind of conduct would constitute a ‘threat’ to an individual's academic efforts. It might refer to an unspecified threat of future retaliation by the speaker. Or it might equally plausibly refer to the threat to a victim's academic success because the stigmatizing and victimizing speech is so inherently distracting. Certainly the former would be unprotected speech. However, it is not clear whether the latter would.” Further, under the policy it was not clear what conduct would be held to "interfere" with an individual's academic efforts. The court noted, “The language of the policy alone gives no inherent guidance. The one interpretive resource the University provided was withdrawn as ‘inaccurate,' an implicit admission that even the University itself was unsure of the precise scope and meaning of the Policy.” Thus, the court concluded that the terms of the policy were so vague that its enforcement would violate due process.

The court also concluded in Doe v. University of Michigan that independent of the vagueness problem, the policy was substantially overbroad in reaching protected speech, such as not exempting statements made in the course of classroom discussions from the sanctions of the policy.47 A similar conclusion was reached by the Third Circuit in Saxe v. State College Area School District48 regarding a school’s anti-harassment policy that prohibited a substantial amount of non-vulgar, non-sponsored student speech that would not cause a substantial disruption of the work of the

47 Id. at 865-66.

48 240 F.3d 200, 214-17 (3rd Cir. 2001). On such hate speech statutes generally, see, e.g., Catherine B. Johnson, Note, Stopping Hate Without Stifling Speech: Re-Examining the Merits of Hate Speech Codes on University Campuses, 27 Fordham Urb. L.J. 1821 (2000).
school. As discussed at § 29.6.2.2 nn.286-88, 301-09, vulgar or school-sponsored speech could be regulated under Fraser, while speech causing a substantial disruption could be regulated under Tinker.

As with “hate crimes” statutes, discussed at § 30.1.1.3 text following n.43, the Court has never held that any “hate speech” statute is constitutional unless it was narrowly defined to reach only other categories of “unprotected speech,” such as advocacy of illegal conduct, true threats, or fighting words. The best chance for such a statute would be to relate the “hate speech” to certain “secondary effects” to trigger an intermediate scrutiny analysis, as the University of Michigan attempted in Doe. Even in that case, the government would have a difficult burden to meet. As a general matter, non-instrumentalist Justices are likely to approach “hate speech” cases from the perspective of standard First Amendment doctrine, which makes such statutes difficult to defend. Even from an instrumentalist perspective, perhaps more receptive on policy grounds to supporting certain “hate speech” statutes as part of advancing an agenda of “politically correct” speech, Justice Douglas cautioned, writing for the Court in Terminiello v. Chicago, that free speech may "best serve its high purpose when it induces a condition of unrest, creates dissatisfaction with conditions as they are, or even stirs people to anger." Even for “politically incorrect” speech, such as displays of the Confederate Flag given the history of the Confederacy in supporting slavery, the First Amendment would likely protect such display if attempts were made to make such displays unlawful, absent the particular context suggesting an advocacy of illegal conduct, true threat, or fighting words analysis.

§ 30.1.2 Fighting Words

No free speech cases involving fighting words came before the Supreme Court during the original natural law era. Further, no fighting words cases were decided during the formalist era, although the Court did state in Near v. Minnesota that "[t]he security of the community life may be protected against incitements to acts of violence," which presumably would include a regulation of fighting words. During the first part of the Holmesian era, the Court held in Cantwell v. Connecticut that the principle of freedom of speech does not sanction incitement to riot where there is a clear and present danger of riot or other immediate threat to public safety. However, a state may not unduly suppress free communication of views, religious or other, under the guise of conserving desirable conditions. Thus, a state could not convict a person of breach of the peace where there was only an

52 310 U.S. 296, 308-11 (1940).
effort to persuade a listener to buy a book or contribute money to a religion, and there was no assault or threatening bodily harm, no truculent bearing, no intentional discourtesy, and no personal abuse.

In 1942, the Court unanimously sustained a conviction in Chaplinsky v. New Hampshire\(^{53}\) for calling a police officer a "damned Fascist," where a statute banning annoying words was construed to ban only such words as ordinary men know are likely to cause a fight – a breach of the peace. Justice Murphy said, “[I]t is well understood that the right of free speech is not absolute at all times and under all circumstances. There are certain well-defined and narrowly limited classes of speech, the prevention and punishment of which have never been thought to raise any Constitutional problem. These include the lewd and obscene, the profane, the libelous, and the insulting or ‘fighting’ words – those which by their very utterance inflict injury or tend to incite an immediate breach of the peace.”

In 1949, in Terminiello v. Chicago,\(^{54}\) the Court declared unconstitutional an ordinance that defined disorderly conduct to include conduct which, as put by the trial judge in his instructions to the jury, “stirs the public to anger, invites dispute, brings about a condition of unrest, or creates a disturbance, or if it molests the inhabitants in the enjoyment of peace and quiet by arousing alarm.” This language had been approved by the Illinois Supreme Court. For the United States Supreme Court, Justice Douglas said that one function of free speech is to stir people to anger. Thus, speech is protected unless it is “likely to produce a clear and present danger of a serious substantive evil that rises far above public inconvenience, annoyance, or unrest.”\(^{55}\) Accordingly, the ordinance, as interpreted by the Illinois courts, was unconstitutional.

Two years later, in Feiner v. New York,\(^{56}\) the Court upheld a disorderly conduct conviction where the speaker, describing President Truman as a "bum" and urging blacks to "rise up in arms and fight for equal rights," refused a police request to stop speaking after the crowd became stirred up and one person threatened to stop the speaker if the police did not. The Court's opinion said the police were not censoring content, but merely preventing a breach of the peace where a speaker was undertaking incitement to riot. Justices Black, Douglas, and Minton dissented. They concluded that there was only a minimal threat of violence, and the police’s duty was to dissuade those threatening violence, not to arrest the speaker.

Reflecting their greater predisposition in favor of free speech rights, the instrumentalist Court refused to expand the doctrine regarding punishing remarks not directed at an individual which stirred the public to anger. Indeed, in 1963, the instrumentalist Court began to back away from

In Edwards v. South Carolina,\textsuperscript{57} the Court held that civil rights demonstrators on State House grounds, who were singing, but being urged by some in the audience to go to segregated lunch counters, could not be prosecuted because there were no fighting words directed at an individual and the hostile audience doctrine of Feiner did not apply. Several other cases during the instrumentalist era reached similar conclusions.\textsuperscript{58}

In 1964, Justice Brennan moved away from Chaplinsky with respect to libel, and prefaced greater constitutional protection for speakers by referring in New York Times Co. v. Sullivan\textsuperscript{59} to "a profound national commitment to the principle that debate on public issues should be uninhibited, robust, and wide-open, and that it may well include vehement, caustic, and sometimes unpleasantly sharp attacks on government and public officials."

During the years of the Burger Court, 1969-1986, the Court avoided considering whether the Chaplinsky phrasing of what constitutes fighting words should be overruled, in part by using the vagueness and overbreadth doctrines to overturn several convictions.\textsuperscript{60} This is similar to use of the vagueness and overbreadth doctrines for hate speech, discussed at § 30.1.1.4 nn.46-48, or for other aspects of free speech cases more generally, discussed at §§ 29.6.1.4-29.6.1.5. In addition, even under the Chaplinsky phrasing, the Court found in several cases that fighting words were not used.

For example, in 1971, in Cohen v. California,\textsuperscript{61} the Court held that defendant could not be convicted of disturbing the peace by offensive conduct where he wore in a courthouse corridor a jacket bearing the plainly visible words, "Fuck the Draft," but where there was no evidence that any person had objected or that defendant intended such a result. For the Court, Justice Harlan distinguished Chaplinsky. Here, the words did not communicate a direct personal insult. And, unlike Feiner v. New York, there was no evidence that the speaker was intentionally provoking a group to hostile reaction. Harlan said that forbidding particular words ran the risk of suppressing ideas in the process. Words could be banned to protect others from hearing them only by a particularized law that protected substantial privacy interests from invasion in an essentially intolerable manner. Offended persons could simply avert their eyes.

\textsuperscript{57} 372 U.S. 229, 231-38 (1963).

\textsuperscript{59} 376 U.S. 254, 270 (1964).

\textsuperscript{60} Gooding v. Wilson, 405 U.S. 518, 524 (1972) (state law was not limited to punishing words that have a direct tendency to cause acts of violence by the person to whom, individually, the remark is addressed); Lewis v. City of New Orleans, 415 U.S. 130, 133-34 (1974) (words conveying or intended to convey disgrace are not fighting words).

Two similar cases were decided in 1973. In *Norwell v. City of Cincinnati*, the Court held that one who verbally protested his arrest by saying “I don’t tell you people anything” did not utter fighting words. In *Hess v. Indiana*, the Court said that a statement during an antiwar protest that "[w]e'll take the fucking street later" was constitutionally protected where the words were not aimed at anyone in particular. Indeed, not since *Chaplinsky* has the Court sustained a conviction on the basis of fighting words alone. In 1987, the Court noted in *City of Houston v. Hill* that an ordinance that made it unlawful to "oppose, molest, abuse or interrupt any policeman in the execution of his duty" was not limited to fighting words or obscene language, and held that the Constitution does not allow such speech to be made a crime. Such a law, the Court said, is substantially overbroad.

Despite this limited use of *Chaplinsky*, a few lower federal courts and state courts have upheld convictions, or otherwise failed to protect speech by denying actions for wrongful arrest for speech or imposing civil fines, based upon a “fighting words” rationale, particularly for derogatory comments addressed to police officers, with many of those reported cases involving comments by racial minorities. Even when the defendant prevailed, time, money, and energy had to be expended on the defense. For these reasons, some commentators have argued that *Chaplinsky* continues to represent a threat to free speech values and should be overruled.

§ 30.1.3 Obscene Speech

Originally, Congress was not very active in dealing with obscenity, and did not bar the import of obscene pictorial matter until 1842. In response to publishers sending material to Union soldiers during the Civil War, that statute was extended in 1865 to barring obscene material from the mails. As recounted by the Court in *Roth v. United States*, some colonies regulated obscenity, such as Massachusetts, which had passed a statute banning obscene speech in 1712. More general regulation of obscenity in the states began in 1821. After 1868, a few states adopted the English test, found in *Regina v. Hicklin*, which involved asking whether even isolated passages in a publication had a tendency to corrupt minds open to immoral influences. However, no obscenity case came before the Supreme Court during the original natural law period.

---

At the beginning of the formalist era in 1873, Congress passed the Comstock Act. It barred from the mails any “obscene, lewd, or lascivious book, pamphlet, picture, paper, print, or other publication of an indecent character, or any article or thing designed or intended for the prevention of conception or procuring of abortion, nor any article or thing intended or adapted for any indecent or immoral use or nature.” In *Ex parte Jackson*, a case involving use of the mail to support an illegal lottery, the Court noted, referring to the Comstock Act, that “the object of Congress has not been to interfere with the freedom of the press, or with any other rights of the people; but to refuse its facilities for the distribution of matter deemed injurious to the public morals.”

In 1925, the Court did assume in *Gitlow v. New York* that freedom of speech and the press, protected in the First Amendment from abridgement by Congress, were among the fundamental personal liberties protected from state action by the Due Process Clause of the Fourteenth Amendment. However, in 1931, reflecting the limited view of the First Amendment in this context, the Court indicated in *Near v. Minnesota* that protections from prior restraint do not apply to obscenity, saying that "the primary requirements of decency may be enforced even against obscene publications."

Toward the end of the formalist era in 1934, the Second Circuit rejected *Regina v. Hicklin* and, in an opinion widely followed thereafter, suggested concentrating on how the dominant theme of the work “taken as a whole” affects the “objective” reader, rather than a focus on mere “isolated passages” on particularly sensitive readers “open to immoral influences.” During the Holmesian era, the Court did not define "obscenity" any further by any specific test. In 1942, the Court did state in *Chaplinsky* that the "lewd and obscene" are among "certain well-defined and narrowly limited classes of speech, the prevention and punishment of which have never been thought to raise any Constitutional problem." In 1948, a divided 4-4 Court affirmed in a *per curiam* decision a New York conviction for obscenity. Justice Frankfurter, a friend of the author, did not participate in the consideration or decision of the case. In 1952, Justice Frankfurter reaffirmed that obscenity, like

libel, is not protected speech.\textsuperscript{75}

During the instrumentalist era, the Court gave potentially obscene speech much greater protection by limiting the amount of speech that could be defined as constitutionally obscene. The Court's first effort to define obscenity for both state and federal statutes was made in 1957 by Justice Brennan, writing for the Court in \textit{Roth v. United States}.\textsuperscript{76} \textit{Roth} held that obscene material is “utterly without redeeming social importance,” and that material is obscene and without constitutional protection if "to the average person, applying contemporary community standards, the dominant theme of the material taken as a whole appeals to prurient interest."\textsuperscript{77} Under \textit{Roth}, obscenity was clearly different than immorality, because New York could not refuse under \textit{Roth} to license a film on the ground that it presented adultery as a desirable, acceptable, and proper pattern of behavior.\textsuperscript{78} However, applying the \textit{Roth} standard, the petitioner’s convictions were upheld in \textit{Roth} for distributing material that would not likely be viewed as patently offensive obscene material under the current \textit{Miller} test, discussed below, at § 30.1.3 nn.88-91.

In 1959, in an opinion by Justice Brennan, the Court required in \textit{Smith v. California}\textsuperscript{79} that \textit{scienter}, \textit{i.e.}, intent or recklessness, be found before a bookseller could be convicted of possessing obscenity. In 1964, the Court created an added check in \textit{Jacobellis v. Ohio}\textsuperscript{80} by holding that appellate courts must make an independent judgment on whether materials are protected, and not defer to jury judgment on that issue. On the other hand, the Court said in \textit{Ginzburg v. United States}\textsuperscript{81} in 1966 that it may be decisive in proving material is obscene that "the purveyor's sole emphasis [is] on the sexually provocative aspects of his publications." In addition, the Court pointed out in 1974 in \textit{Hamling v. United States}\textsuperscript{82} regarding the \textit{scienter} requirement, “It is constitutionally sufficient that the prosecution show that a defendant had knowledge of the contents of the materials he distributed, and that he knew the character and nature of the materials. To require proof of a defendant's knowledge of the legal status of the materials [that is, he knew the materials were obscene] would permit the defendant to avoid prosecution by simply claiming that he had not brushed up on the law.”

\item \textsuperscript{82} 418 U.S. 94, 123 (1974).
\end{itemize}
By 1966, there was no longer majority support for the definition of obscenity given in Roth. In the Memoirs case, Justice Douglas and Justice Black continued with their view that there could be no censorship of expression not intertwined with illegal conduct. Justices Brennan, joined by Chief Justice Warren and Justice Fortas, transformed a reason given in Roth for regulating obscenity into part of its definition, by saying that material could not be found obscene under Roth unless it was "utterly without redeeming social value." Justice Stewart, concurring, also seemed to go beyond Roth based upon his dissent in Ginzburg v. United States, which had spoken in terms of "hard core" pornography. He had said two years earlier in Jacobellis v. State of Ohio that he could not define obscenity, but "I know it when I see it." Giving some greater content to that test, Justice Stewart noted in Ginzburg that problematic materials include "photographs, both still and motion picture, with no pretense of artistic value, graphically depicting acts of sexual intercourse, including various acts of sodomy and sadism, and sometimes involving several participants in scenes of orgy-like character. They also include strips of drawings in comic-book format grossly depicting similar activities in an exaggerated fashion. There are, in addition, pamphlets and booklets, sometimes with photographic illustrations, verbally describing such activities in a bizarre manner with no attempt whatsoever to afford portrayals of character or situation and with no pretense to literary value."

Three Holmesian dissents in Memoirs indicated that each wanted continued adherence to the views they had expressed in Roth. Thereafter, in 31 cases, the Court reversed obscenity convictions when five members of the Court, applying their own tests, deemed the material not to be obscene. This was said to be the Redrup approach, after Redrup v. New York, decided in 1967.

The awkward Redrup practice finally came to an end during the years of the Burger Court, 1969-1986. Once the 5-Justice majority of extreme liberal instrumentalists on the Court came to an end with the retirements of Chief Justice Warren and Justice Fortas in 1969, discussed at § 11.2.2.2, the Court pulled back on the definition of obscenity. In 1973, a majority of the Court agreed in Miller v. California on a revised version that is more protective of free speech than Roth, but less protective than Justice Brennan’s variation of Roth in Memoirs. The Miller definition of obscenity requires the trier of fact to decide: (a) whether the average person, applying contemporary community standards would find that the work, taken as a whole, appeals to prurient interest,
whether the work depicts or describes, in a patently offensive way, sexual conduct specifically defined by the applicable state law, and (c) whether the work, taken as a whole, lacks serious literary, artistic, political, or scientific value. Under *Miller*, the "contemporary community standards" need not be national; a jury can be instructed to apply standards of their state – but the impact of the materials will be judged by their effect on an average person, rather than one particularly susceptible or sensitive. The Court has said that prurient material is that which tends to excite lustful thoughts, including "having itching, morbid or lascivious longings; of desire, curiosity, or propensity, lewd."  

This new test differs from *Roth*, as interpreted by Brennan, in that it shifts away from requiring that the work be "utterly" without social value to requiring only that it "lack serious" value; it returns the decision on obscenity more to juries applying the majority’s definition of obscenity, rather than *ad hoc* court review as under the *Redrup* approach; and it adds the requirement that statutes regulating obscenity “specifically define” the regulated conduct to minimize possible vagueness or overbreadth problems with the statute. Soon after *Miller* was decided, the Court clarified *Miller* in *Jenkins v. Georgia* by refusing to find obscene a movie, “Carnal Knowledge,” starring Jack Nicholson, Ann Margaret, Candice Bergen, and Art Garfunkel, that did not fall within either of the two illustrations given in *Miller* of what is obscene: (a) patently offensive representations or descriptions of ultimate sexual acts, normal or perverted, actual or simulated, and (b) patently offensive representations of masturbation, excretory functions, and lewd exhibitions of the genitals. The Court said that no one can be subjected to prosecution for the sale or exposure of obscene materials unless they depict or describe patently offensive, *i.e.*, "hard core" sexual conduct, such as conduct described in the *Miller* examples.

In 1973, the Court reaffirmed in *Paris Adult Theatre I v. Slaton* that states could ban obscenity even if distributed only to consenting adults. The majority held that state legislators can sanction obscenity because they may reasonably find a link between obscenity and the quality of community life; privacy interests do not prevail where there is commercial exhibition, as distinguished from private viewing at home; and not all conduct involving consenting adults is beyond state regulation. Joined by Justices Marshall and Stewart, Justice Brennan said in dissent in *Slaton* that because of problems of fair notice, chilling protected speech, and institutional stress in drawing lines, he would limit states to barring distribution to juveniles and offensive exposure to unconsenting adults. Justice Douglas continued his view not to allow the suppression of expression to consenting adults because of its sexual nature. Today's post-instrumentalist Court does not include any extreme instrumentalists who, like Justices Brennan, Marshall, and Douglas, came to believe that the First

93 *Id.* at 112-13 (1973) (Brennan, J., joined by Marshall, J., & Stewart, J, dissenting); *id* at 114 (Douglas, J., dissenting).
and 14th Amendments prohibit the state and federal governments from suppressing obscene materials except in the interest of protecting children or unwilling viewers. Nor does the current Court include any liberal formalists, like Justice Black, whose absolutist views would prevent any government regulation of obscenity.94

The post-instrumentalist Court has clarified Miller by holding that the community standard applies only to the first branch of the test, which relates to prurient interest. Whether the work is “patently offensive” under the second branch must be determined by reference to the examples given in Miller of patently offensive conduct, not “unbridled” jury discretion; whether the work “lacks serious value” is determined from a reasonable person perspective, not community standards.95 In 1989, the Court made clear that material which is "indecent" but not "obscene" cannot be barred from an adult audience.96 A city may require dispersal of adult theaters, as in Young v. American Mini Theatres, Inc.,97 or a city may concentrate adult theaters in one area, as in City of Renton v. Playtime Theatres, Inc.98 Such ordinances, treated as content-neutral regulations concerned with the secondary affects of adult theaters, are justified under an intermediate standard of review if they serve a substantial state interest in preserving the quality of life, provided that they are narrowly tailored and allow reasonable alternative avenues of communication, as discussed at § 29.4.4.1 nn.134-40.

In 1990, in FW/PBS v. City of Dallas,99 the Court relaxed application of the Freedman procedural tests where a city licensing official reviewed the qualifications of each license applicant to engage in a sexually oriented business, but did not pass judgment on the content of any particular speech. Under Freedman, as discussed at § 29.6.1.1 nn.215-16, the government has the burden of initiating court proceedings and the burden of proof during those proceedings. Under FW/PBS, the burdens remain with the challenger, despite the case being one of heightened scrutiny. A better approach, applied in 2002 to content-neutral government licensing and fee permit cases in Thomas v. Chicago Park District and Watchtower Bible and Tract Society of New York, Inc. v. Village of Statton, discussed at § 29.6.1.3 nn.237-42, provides that the burden remains on the government, but review should be at the intermediate level, rather than the strict scrutiny approach of Freedman.

In recent years, the number of Supreme Court cases on obscenity has declined. Perhaps not as many prosecutions are being brought. Local communities may be dealing with adult movies by zoning, as in Young and Renton, rather than by bans. Perhaps the Court feels that it has little to add to what it has already said about movies, books, and magazines, and cases on the Internet are only beginning

to be generated. In those few cases decided by the current Court, it has followed Miller. Thus, the
law regarding obscenity seems to have become stabilized. Despite this current stabilization,
Professor Tribe has predicted that over the long run the definition of obscenity will not be at a state
of rest until the Court allows regulation only in the interest of unwilling viewers, captive audiences,
young children, and beleaguered neighborhoods, but not in the interest of a uniform vision of how
human sexuality should be regarded and portrayed. 100

While Professor Tribe’s vision has not been formally adopted by the Court, as a practical matter the
amount of sexually explicit material available to consenting adults today mirrors his standard.
Whether through VHS, DVD, or Internet access, the adult pornography industry is a multi-billion
dollar industry, and even “hard-core” pornography, although officially banned, as a practical matter
is available to most who wish to acquire it, in the same manner as many illegal drugs as a practical
matter are available to those who wish to purchase them. This fact is important because, as the
Court held in Stanley v. Georgia, 101 an individual has a right under the First Amendment to possess
obscene material in the privacy of one's home, and such possession cannot be made the subject of
a criminal prosecution. For this reason, despite an occasional prosecution for obscenity involving
the sale of adult pornography to a consenting adult, the focus of constitutional law in this area has
turned principally to the issue of child pornography and keeping obscene, indecent, or patently
offensive images away from children. 102 Those topics are discussed at § 30.1.4.

Despite some arguments made to the contrary, the courts apply the same “obscenity” doctrine for
pornography depicting women in subordinate sexually explicit imagery. In American Booksellers
v. Hudnut, 103 the Seventh Circuit declared invalid an ordinance that sanctioned pornography, defined
as the subordination of women in sexually explicit ways, including various kinds of sadomasochistic
imagery in pictures or words. The statute also provided that “use of men, children, or transsexuals
in the place of women” shall constitute pornography under this section. There was no effort to fit
pornography, so defined, into the Miller definition of obscenity, because the ordinance did not refer
to prurient interests, community standards, or whether the work, as a whole, had any value. Given

that the law was not limited to regulating “obscenity” as defined in Miller, the court applied standard First Amendment doctrine. Characterizing the ordinance as viewpoint discrimination, the Seventh Circuit stated that it could not find that the state had justified its ordinance under strict scrutiny. The court held that the government does not have a compelling interest in barring opinions it thinks wrong or harmful. The court noted that this is so even if the depictions of subordination of women tend to perpetuate subordination, and, like racial bigotry, anti-Semitism, or violence on television, “influence the culture and shape our socialization.” It is also true even if the speech is not directly answerable by more speech. The court said that any other approach would leave the government “in control of all of the institutions of culture, the great censor and director of which thoughts are good for us.” Of course, the government could punish the causing of injury during the course of producing such pornography. The Supreme Court summarily affirmed, with Chief Justice Burger, and Justices Rehnquist and O'Connor, saying the case should have been set for argument.

Similar issues have arisen regarding art work pushing the boundaries of societal conventions, such as Robert Mapplethorpe’s famous images of sadomasochistic sex, Andres Serrano’s “Piss Christ” (a photograph of a crucifix submerged in urine), or Karen Finley’s nude performances, where Finley "places, dabs, smears, pours and sprinkles food on her body to symbolize the violation of the female characters whose tales she shrieks” on stage. While such works are typically granted First Amendment protection, as discussed at § 29.4.2 nn.101-03, one author has noted the “potential consequences of a continued failure to afford Postmodern and Contemporary art sufficient protection, namely arbitrary law enforcement, self-censorship, and regulation based on secondary effects.”104

§ 30.1.4 Indecent Material Involving Children

Child pornography refers primarily to the use of children in the production of pornography, including live performances and depictions of children engaging in sexual acts or displays.105 Such material falls into the category of “unprotected speech” under the Court’s First Amendment doctrine, as discussed at § 30.1.4.1. A related concern involves “indecent” or “patently offensive” material that is considered harmful for children to hear or view.106 Such material is not “unprotected speech” under First Amendment doctrine, but rather is analyzed under standard First Amendment doctrine with the understanding that the state has a compelling government interest with preventing such material from being viewed by children, as discussed at § 30.1.4.2.

§ 30.1.4.1  Pornography Involving Use or Depictions of Children

Justices during both the instrumentalist era and the modern natural law era have recognized that the exploitive use of children in the production of pornographic material continues to be a serious national problem. The Court has held that child pornography is not protected speech, and although governments may not criminalize possession of obscene material depicting adult activity in the home, a state may bar the possession and viewing of child pornography even in the home. Further, the advertising or selling of child pornography can be barred to advance the state's interest in preventing sexual exploitation of children, the Court explaining that closing the channels of communication is necessary to control initial production of the material.

Given that the purpose of the ban on distribution of materials depicting sexual acts or displays of children is to protect the sexual exploitation of children, the Court held in 1982 in New York v. Ferber that the Miller test is modified so as not to require that the sexual depiction appeal to the prurient interest, or that the conduct be portrayed in a patently offensive manner, or that the material need be considered as a whole. Thus, isolated depictions of children engaging in sexual acts or displays can constitute child pornography under Ferber. Further, while under Miller, material that “does no more than arouse, ‘good, old fashioned, healthy’ interest in sex” cannot be obscene, the Court has never indicated that any form of child pornography could meet that test.

The transition to a post-instrumentalist Court has not resulted in a noticeable change in the Court’s perspective on child pornography. For example, in 1990, the Court held in Osborne v. Ohio that as long as a state's law requires proof of scienter, i.e., intent or recklessness, it may bar the possession and viewing of child pornography which involves a lewd exhibition or a graphic focus on the genitals, as long as the statute is sufficiently narrowly tailored. The statute in Osborne was narrowly tailored because it did not apply to nude photos where the person depicted is “the child or the ward of the person charged,” i.e., unobjectionable family photos, or if “the material or performance is sold, disseminated, displayed, possessed, controlled, brought or caused to be brought into this state, or presented for a bona fide artistic, medical, scientific, educational, religious, governmental, judicial, or other proper purpose, by or to a physician, psychologist, sociologist, scientist, teacher, person pursuing bona fide studies or research, librarian, clergyman, prosecutor, judge, or other person having a proper interest in the material or performance.” The Court explained

---

111 Id. at 764-66.

that states have a compelling interest in the physical and psychological well-being of minors, can
determine that using children in pornography is harmful, and can proscribe possession because it
is now difficult, if not impossible, to solve the child pornography problem by attacking only
production and distribution. The Court’s concern with a scienter requirement was evidenced in
United States v. X-Citement Video, Inc., where the Court emphasized that the term “knowingly”
in the statutes being reviewed extended both to the sexually explicit nature of the material and to the
age of the performer. This made it easier for the Court to uphold the statute’s constitutionality, since the scienter requirement applied to both the age of the performer and the nature of the material.

For this exception to First Amendment doctrine to apply, children must actually be involved. For
example, in Ashcroft v. The Free Speech Coalition, the Court considered whether the Child
Pornography Prevention Act of 1996 was unconstitutionally overbroad insofar as it criminalized the
production or possession of images that appear to depict minors engaged in sexual intercourse, even
though those images may have been computer images. Because no actual minors were involved in
the case, the Court rejected an analysis based on viewing the speech as “unprotected,” and instead
applied standard First Amendment analysis. Under that analysis, the Court held that the government
did not show such a strong enough connection between the thoughts that might be generated and
subsequent illegal actions that would justify a restriction based on a “secondary effects” rationale
of discouraging pedophiles from engaging in illegal conduct.

§ 30.1.4.2 Indecent or Patently Offensive Material with Children in the Audience: Standard First Amendment Doctrine Applied

Unlike obscenity, which eventually became reasonably well-defined in Miller, discussed at § 30.1.3
nn.88-98, “indecency” has no single authoritative definition. It is a very broad term, as it can relate
to anything contrary to “common propriety” or to “deprave the morals” in the direction of “impure
sexual relations.” Similarly, what is “patently offensive” speech is not subject to precise
definition. As the Court noted about the Communications Decency Act of 1996, at issue in Reno
v. American Civil Liberties Union, the term “patently offensive” is qualified only to the extent that
it involves "sexual or excretory activities or organs" taken "in context" and "measured by
contemporary community standards." The statute did not indicate whether the "patently offensive"
and "indecent" determinations should be made with respect to minors or the population as a whole.
As for any differences between “indecent” and “patently offensive” speech, the Court “assumed

114 Id. at 109-11.

by the words “offensive to common propriety; offending against modesty or delicacy; grossly
vulgar.” In Dunlop v. United States, 165 U.S. 486, 501 (1896), there is a reference to indecency as
calculated to “deprave the morals” in the direction of “impure sexual relations.”

arguendo” in Reno that the "patently offensive" standard was “synonymous” with the "indecency" standard.”

The government can make some indecency unlawful under an intermediate scrutiny approach based on the content-neutral reason of preventing its being viewed by unwilling listeners, such as public nudity. Further, with respect to broadcast regulation, which under Red Lion only triggers intermediate scrutiny for content-based regulations, not strict scrutiny, as discussed at § 30.3.1 nn.206-09, the Court was willing in FCC v. Pacifica Foundation to allow time restrictions on broadcasts that included “indecent” words because broadcasts are uniquely accessible to children. Under the secondary effects zoning line of cases, like City of Los Angeles v. Alameda Books, Inc. and Renton v. Playtime Theatres, Inc., discussed at § 29.4.4.1 nn.134-40, an intermediate test could also be used for zoning regulations related to exposure of children to indecent material.

In 1968, in Ginsberg v. New York, the Court noted that the test for what is “unprotected” obscene speech is slightly different for children, rather than adults. Thus, regulations that protect children from speech obscene to them would trigger no further First Amendment review, but merely rational review under the Equal Protection Clause or Due Process Clause. This Ginsburg doctrine in 1968 of a different test for obscenity as applied to children, as opposed to adults, has not been further developed since the Supreme Court agreed in 1973 in Miller on a general test for obscene material. In 1997, the Court focused in Reno on how the statute at issue in Ginsburg was narrowly tailored to meet intermediate scrutiny in any event, thus minimizing the rational review aspect of that case.

Even in the absence of reasons justifying less than strict scrutiny review, the Court has indicated that the government has a compelling government interest in protecting children from viewing indecent or patently offensive material. However, consistent with strict scrutiny, the government must adopt the “least restrictive alternative” in order to take steps to avoid infringing the free speech rights of adults, while protecting children from indecent and patently offensive material. Thus, even while protecting children from indecency, the state may not reduce the adult population to reading only what is fit for children. For example, wearing a jacket in a courthouse corridor that contained the

\[\text{119 Id. at 873.}\]
\[\text{120 See, e.g., Erznoznik v. City of Jacksonville, 422 U.S. 205, 206-07 (1995) (noting that the Court has been willing to permit banning public nudity to protect unwilling parties).}\]
\[\text{121 438 U.S. 726, 748-51 (1978) (The seven words part of George Carlin’s “Filthy Words” monologue involved in the case were: “sh!t, piss, fuck, cunt, cocksucker, motherfucker, and tits.”). Under Pacifica, after 6 a.m. and before 10 p.m., these words can be banned by FCC regulation.}\]

phrase “Fuck the Draft” could not be the basis of a conviction for disturbing the peace, when there was no evidence of any disturbance, even if some child might read the jacket.126

The post-instrumentalist Court has reviewed indecency limits with respect to live performances and electronic communications, including a number of cases involving the Internet. The earliest of these cases was Sable Communications of California, Inc. v. FCC.127 There the Court struck down a congressional ban intended to protect children from indecent dial-a-porn telephone services because the ban also affected adults and yet was not limited to Miller-defined obscenity. The Court distinguished Pacifica on the grounds that affirmative steps would have to be taken to access the service, rather than the intrusion just coming in when the radio or television station was turned on, and thus the content-neutral, unwilling listener intermediate standard could not apply. The Court suggested, however, that if a total ban were the only effective way to protect juveniles from such calls, the law might be upheld despite its invasion of adult First Amendment rights.

More recent legislative efforts to deal with child pornography at the national level have concentrated on the Internet. The problem for lawmakers has been to erect barriers that protect children and yet do not unconstitutionally interfere with the free speech rights of adults.128 The post-instrumentalist Court has divided on the constitutionality of these efforts in five recent cases.

The first of these cases was Reno v. American Civil Liberties Union.129 There the Court struck down portions of the Telecommunications Act of 1996 that prohibited (1) the knowing transmission to a person under 18 years of age any obscene or indecent message or any patently offensive depiction of sexual or excretory activities or organs, or (2) knowingly permitting any telecommunications facility under a person’s control to be used for such activity. Justice Stevens wrote for the Court that the Act was a content-based blanket restriction on speech and, thus, could not be analyzed under an intermediate standard of review, as in Pacifica and Renton. The Act could not pass the strict scrutiny because it lacked the necessary precision and, thus, was not narrowly tailored. In support of this conclusion, Justice Stevens provided several examples. He pointed out, for example, that knowledge that one or more members of a 100-person group will be minor would burden communication among adults. And he added that the district court had found that at the time of trial existing technology did not include any effective method for a sender to prevent minors from obtaining access to its communications on the Internet without also denying access to adults. Justice Stevens explained, “In order to deny minors access to potentially harmful speech, the CDA effectively suppresses a large amount of speech that adults have a constitutional right to receive and to address to one another.”130 Justice O’Connor, with Chief Justice Rehnquist, agreed that the Act violated the First Amendment because with current technology a speaker could not be reasonably

---

130 Id. at 874.
assured that his or her speech could be confined in an “adult zone.” However, she would uphold the Act insofar as it applied to indecent speech in communications between an adult and one or more minors.131

The second case was *United States v. Playboy Entertainment Group, Inc.*132 The Court invalidated Section 505 of the Telecommunications Act of 1996, which required cable TV operators who provide channels primarily dedicated to sexually-oriented programming either to fully scramble or otherwise block those channels or limit transmission to hours when children are unlikely to be viewing, typically defined as between 10 p.m. to 6 a.m. Because of signal bleed, cable operators had no practical choice but to curtail the targeted programming during 16 hours a day. Justice Kennedy said for the 5-4 Court that strict scrutiny applied to this content-based speech restriction. The law failed that test because a less restrictive alternative was available, *i.e.*, allow cable systems to block unwanted channels on a household-by-household basis on request of parents.

The Justices most likely to defer to the government dissented: Holmesian Chief Justice Rehnquist, and those Justices with an occasional affinity for the Holmesian approach, Justice O’Connor, as discussed at § 12.4.2, and Justice Breyer, as discussed at § 11.4 nn.107-09. Justice Breyer’s dissent was also joined by Justice Scalia. Justice Breyer said that the record shows no similarly effective, less restrictive alternative to what is provided in the Act. Thus, the Act restricted speech no more than necessary to further the compelling interest in helping parents prevent minors from accessing sexually explicit materials in the absence of parental supervision. Justice Scalia added that the Act could be upheld because it applies only when materials are marketed by emphasizing their sexually provocative aspects. He said, “[Since] the Government is entirely free to block these transmissions, it may certainly take the less drastic step of dictating how, and during what times, they may occur.”133

The third case in this series is *Ashcroft v. American Civil Liberties Union (Ashcroft I).*134 The

131 Id. at 886-87 (O’Connor, J., joined by Rehnquist, C.J., concurring in the judgment in part and dissenting in part).

133 Id. at 836-47 (Breyer, J., joined by Rehnquist, C.J., and O’Connor & Scalia, JJ., dissenting); id. at 835 (Scalia, J., dissenting). Justice Stevens, concurring, replied to Justice Scalia’s opinion by saying that the fact that programs marketed by Playboy are offensive to some viewers provides a justification for protecting, not penalizing, truthful statements about their content. Id. at 829 (Stevens, J., concurring).

134 535 U.S. 564, 566-73 (2002). The Act made illegal as harmful to minors “any communication, picture, image, graphic image, file, article, recording, writing or other matter of any kind that is obscene or that (A) the average person, applying contemporary community standards, would find, taking the material as a whole and with respect to minors, is designed to appear to, or is designed to pander to, the prurient interest; (B) depicts, describes, or represents in a manner patently offensive with respect to minors, an actual or simulated sexual act or sexual contact, an actual or simulated normal or perverted sexual act, or a lewd exhibition of the genitals or post-
narrow holding of the Court was that in defining material that is harmful to minors and displayed on the Internet for commercial purposes, Congress could refer to the prurient interest with respect to minors in view of “contemporary community standards” without thereby violating the First Amendment. As discussed below, a variety of reasons were given by different Justices in support of that conclusion. As might be expected, views most supportive of the government were taken by Chief Justice Rehnquist and Justices Scalia and Thomas. Justices O’Connor and Breyer lent close support to their views. Justice Kennedy was more protective of free speech, in company with Justices Souter and Ginsburg. Most speech protective of all was Justice Stevens, who dissented from a judgment supported by all other members of the Court.

In his opinion, Justice Thomas, with Chief Justice Rehnquist and Justice Scalia, relied primarily on an analogy to Hamling v. United States and Sable Communications of California, Inc. v. FCC.\(^\text{135}\) In these cases the Court had held that the First Amendment is not violated by requiring a speaker to observe varying community standards when disseminating material to a national audience. In response to the argument of the court below, and of Justices Kennedy and Stevens, that these cases were distinguishable because they involved use of the mails (Hamling) and the telephone (Sable), Justice Thomas replied that the opinions in those cases took no account of ability to target the release of material, and he saw no reason to believe that the practical effect of varying community standards would be greater here than under the federal obscenity statutes. In short, a publisher’s burden does not change simply because it decides to distribute its material to every community in the nation. Finally, the challengers had failed at this stage in the litigation to prove that any overbreadth in the statute was not only real but, also, substantial as well. However, the injunction against enforcement of the statute entered by the court below should remain in effect while further action is considered by the lower courts.

Justice O’Connor agreed with the plurality that the challengers had not shown that the law is overbroad on its face simply because the Act defined what was harmful to minors in terms of local community standards. However, she foresaw future problems in evaluating the effect of using community standards, and she called for adoption of a national standard as a constitutionally permissible and reasonable basis for regulation of the Internet.\(^\text{136}\) Justice Breyer also concurred in the judgment, saying that he believed Congress intended the statutory word “community” to refer to the Nation’s adult community, taken as a whole, and that would not violate the First Amendment. He relied on a report filed in the House of Representatives.\(^\text{137}\)

Justice Kennedy concurred in the judgment, with Justices Souter and Ginsburg. He agreed that in its current state the record did not require holding the statute overbroad merely because community standards may vary across the country. However, he disagreed with Justice Thomas that the effect

---

\(^{135}\) Id. at 575-78, citing Hamling, 418 U.S. 87 (1974); Sable, 492 U.S. 115 (1989).

\(^{136}\) Id. at 586-88 (O’Connor, J., concurring in the judgment and concurring in part).

\(^{137}\) Id. at 589-90 (Breyer, J., concurring in the judgment).
of using community standards should be resolved by analogy to *Hamling* and *Sable* because, said Justice Kennedy, each medium has distinctive attributes. In order to determine whether a law governing the Internet restricts substantially more speech than is justified, a number of questions must first be determined. They included how to judge material on the Internet “as a whole,” the venues in which prosecution can be brought, and the extent of speech covered, e.g., what is communication for commercial purposes, and must the material be offered for sale. Justice Kennedy was concerned with laws that have the practical effect of foreclosing an entire medium of expression, as might be true here for some speech. However, in view of Congress’ reasoned effort to comply with the *Reno* case, the judiciary should proceed with caution and identify any overbreadth with care before invalidating the Act.138

Justice Stevens, dissenting, found the Act invalid because even the narrowest version of the statute abridged a substantial amount of protected speech that many communities would not find harmful to minors. Because internet speakers cannot limit access to those specific communities, the statute is substantially overbroad regardless of how its other provisions are construed. Explaining, Justice Stevens said that the Act extends to a wide range of prurient appeals in advertisements, online magazines, internet-based bulletin boards and chat rooms, stock photo galleries, internet diaries, and a variety of illustrations encompassing a vast number of messages that are unobjectionable in most of the country and yet provide no “serious value” to minors. Concluding, Justice Stevens said, “It is quite wrong to allow the standards of a minority consisting of the least tolerant communities to regulate access to relatively harmless messages in this burgeoning market.”139

In the fourth case in this series of cases, *United States v. American Library Association, Inc.*,140 the Court rejected a facial attack on the Children’s Internet Protection Act insofar as it denied federal funds to a public library unless it installed software to block images that constitute obscenity or child pornography, and prevented minors from obtaining access to material that is harmful to them. A plurality of four Justices, Chief Justice Rehnquist, and Justices O’Connor, Scalia, and Thomas, who have typically taken a more limited view of what is a public forum versus a non-public forum, as discussed at § 29.5.2 nn.200-04, concluded that Internet access in public libraries is neither a traditional nor a designated public forum because government creates a public forum only by intentionally opening a non-traditional forum for public discourse. However, libraries are more restricted. They provide Internet access to facilitate research, learning, and recreational pursuits by furnishing materials of requisite and appropriate quality. As a non-public forum, only rational review applied since the regulations did not involve viewpoint discrimination. Insofar as adults may be concerned, an adult patron need only ask a librarian to unblock it or disable the filter.

Justice Kennedy concurred on the grounds that a patron need only ask a librarian to unblock it or disable the filter, but did not agree that the library is a non-public forum, or that only a rational review standard applied. Justice Breyer, concurring, indicated his view that intermediate scrutiny

---

138 *Id.* at 591-602 (Kennedy, J., joined by Souter & Ginsburg, JJ., concurring in the judgment).

139 *Id.* at 611-12 (Stevens, J., dissenting).

should be applied based on the content-neutral reason of not interfering with “the discretion necessary to create, maintain, or select a library's 'collection.'” Justice Souter and Ginsburg dissented, applying strict scrutiny, viewing libraries as a public forum and the regulation as content-based. Justice Stevens also dissented, viewing the statute as an unconstitutional condition on users of public libraries. The unconstitutional conditions doctrine is discussed at § 27.1.2.3.

In 2004, in Ashcroft v. American Civil Liberties Union (Ashcroft II), the Court held, 5-4, that the district court did not abuse its discretion in entering a preliminary injunction against enforcement of the Child Online Protection Act. The Act imposed criminal penalties for knowingly posting on the Internet, for commercial purposes, material that is harmful to minors. Justice Kennedy wrote that when plaintiffs challenge a content-based speech restriction, strict scrutiny applies and the government must show not only a compelling interest but, also, that the challenged regulation is the least restrictive means among available, effective alternatives. In view of the existence of filters, which impose selective restrictions on speech at the receiving end, and not universal restrictions at the source, filters may well be more effective in protecting children than the criminal penalties in the statute, especially since filters can protect even against material posted in other countries, verification systems can be subject to evasion, and filters can be applied to all forms of Internet communication, including e-mail. Thus, there were factual issues for trial that the government had not established, and so it was not an abuse of discretion to issue the preliminary injunction.

Once again, Holmesian Chief Justice Rehnquist, along with Justices O’Connor and Breyer, dissented in the case. They acknowledged that strict scrutiny applied to the case, but concluded that the government had met that burden in this case. As Justice Breyer wrote in his dissent, “Nonetheless, my examination of (1) the burdens the Act imposes on protected expression, (2) the Act's ability to further a compelling interest, and (3) the proposed 'less restrictive alternatives' convinces me that the Court is wrong. I cannot accept its conclusion that Congress could have accomplished its statutory objective – protecting children from commercial pornography on the Internet – in other, less restrictive ways.” Justice Scalia also dissented in the case, arguing that strict scrutiny should not be applied. Relying on Ginzburg v. United States, a 1966 case, discussed at § 30.1.3 n.81, which predated both the Miller test for obscenity in 1973, discussed at § 30.1.3 nn.88-94, and the protection given to commercial speech after 1975, discussed at § 30.3.2, he reiterated a position he had held in other cases, stating, "[C]ommercial entities which engage in 'the sordid business of pandering' by 'deliberately emphasis[ing] the sexually provocative aspects of [their nonobscene products], in order to catch the salaciously disposed,' engage in constitutionally unprotected

behavior."\textsuperscript{145}

An issue related to protecting children from viewing “indecent” material concerns the process of editing motion pictures to remove various kinds of objectionable content in terms of images or words, and then selling or renting such “sanitized” versions of the original work. A constitutional issue involved in the background of such cases could involve whether individuals have a constitutional liberty right to edit, sell, and view such material in its “sanitized” format, even if copyright protection is given to authors and producers of such work limiting such editing rights on grounds of protecting the “moral right” of authors and producers to their initial unedited work. As long as disclosure is made that the original work has been edited, thus removing concerns with misrepresentation or fraud, it seems likely that such a right to edit will be protected. Attempts by authors or producers to control the “downstream” use of their material by others is likely to be rejected, as was Alaska’s attempt to control the “downstream” activities related to timber under the dormant commerce clause market participant exception in \textit{South Central Timber Development, Inc. v. Wunnicke}, discussed at 20.3.2.2.B. nn.222-23.\textsuperscript{146}

\textbf{§ 30.2} \textbf{Content-Based Regulations That Trigger Versions of Rational Basis Review, Rather Than Strict Scrutiny}

\textbf{§ 30.2.1} \textbf{Second-Order Rational Review}

\textbf{§ 30.2.1.1} \textbf{Defamation and Related Torts}

Cases of defamation and related torts involve laws that regulate on the basis of the content of the individual’s speech. Nonetheless, these cases do not involve application of a strict scrutiny approach normally applicable to content-based regulations of speech. Instead, in cases involving defamation and related torts, the Court has developed a number of tests that balance the state’s interest in an effective tort law against the individual’s constitutional interest in the freedom of speech.

Although the Court does not make reference to this fact, the balancing done in these cases tracks in rigor the balancing done in dormant commerce clause review, discussed at § 20.3.2.2.A, where the Court similarly balances the state’s interests, in those cases the state’s interest in various kinds of economic regulations, against the constitutional interests at stake, in those cases an interest in free trade implicit in the Commerce Clause. For certain kinds of protectionist commercial regulations that greatly infringe on the constitutional interest in free trade, as under the \textit{Maine v. Taylor} test, discussed at § 20.3.2.1.D nn.194-200, sometimes there is virtual \textit{per se} rule of unconstitutionality.

\textsuperscript{145} \textit{Id.} at 676 (Scalia, J., dissenting), \textit{quoting} Ginzburg v. United States, 383 U.S. 463, 467, 472 (1966).

Similarly, under *New York Times Co. v. Sullivan*, discussed at § 30.2.1.1 nn.149-52, where the defamatory act concerns speech about a public official and the constitutional interest in freedom of speech is at its highest, there is a very difficult “actual malice” test to meet. In other cases, where the governmental interest is stronger and the constitutional interest is less strong, as in cases that do not involve public officials or matters of public concern, such as *Dun & Bradstreet*, discussed at § 30.2.1.1 nn.155-56, the constitutional test is easier for the government to meet, as is true under the *Pike v. Bruce Church* test in dormant commerce clause review, discussed at § 20.3.2.1.D nn.196, 204-08. In all defamation cases, the challenger retains the burden of establishing that the tort law is unconstitutional. Thus, under the “base plus six” model of review, discussed at § 7.2.1 text following n.42, each of these defamation cases reflects a second-order kind of rational review.

**A. Classic Defamation Cases**

There were no First Amendment decisions in the original natural law era. In 1806, a common law prosecution of newspaper editors for libel of President Jefferson and Congress was filed in a federal court. The Court avoided the First Amendment issues when it held that federal courts have no common law criminal jurisdiction. Indeed, before 1964, a speaker’s only protection as defendant in an action for defamation was provided by the common law. As with obscenity or fighting words, once the case involved defamatory speech, there was no further First Amendment review.

That changed dramatically in 1964 when the Court decided *New York Times Co. v. Sullivan*. Reflecting a liberal instrumentalist view that is very protective of free speech rights, Justice Brennan wrote for the Court that the First Amendment bars liability for defaming a public official or public figure unless there is clear and convincing proof that: (1) defamatory material was published of and concerning the plaintiff, and (2) it was published with “actual malice,” *i.e.*, it was known to be false or there was reckless disregard of whether it was false or not. This new rule had two justifications. First, Justice Brennan said, “[W]e consider this case against the background of a profound national commitment to the principle that debate on public issues should be uninhibited, robust, and wide-open, and that it may well include vehement, caustic and sometimes unpleasantly sharp attacks on government and public officials.” Second, Justice Brennan said that even error needs protection to avoid deterring speech from fear of the expense or difficulty of proving the truth.

It has been noted that to prove actual malice, the Supreme Court has enumerated:

> several kinds of evidence that may be utilized by plaintiffs, including proof that the defendant entertained serious doubts as to the truth of his or her publication, proof that the statement was fabricated by the defendant, proof that the statement was the product of the defendant's

---

148 See, e.g., Chaplinsky v. New Hampshire, 315 U.S. 568, 571-72 (1942) (“There are certain well-defined and narrowly limited classes of speech, the prevention and punishment of which has never been thought to raise any Constitutional problem. These include the lewd and obscene, the profane, the libelous, and the insulting or ‘fighting' words . . . .”).

imagination, or proof that there exist obvious reasons to doubt the veracity of the informant upon whom the statement is based or the accuracy of the statement being relied upon. The courts have conceded that where proof of actual malice is at issue, information and facts that would tend to shed light on the reporter's state of mind are discoverable. To balance the defamation plaintiff's necessity to prove this element with society's interest in protecting the marketplace, the U.S. Supreme Court requires that proof of actual malice be made by clear and convincing evidence.\(^{150}\)

In practice, it has been very difficult for plaintiffs to prove that defendants acted with the “actual malice” required under the *Sullivan* precedent, particularly as the decision on “actual malice,” as an “ultimate” constitutional fact, discussed at § 26.1.4 nn.101-02, is for the court to determine as a matter of law, not the jury as a trier of fact.\(^{151}\) Indeed, it has been noted that, given *Sullivan*, the law of libel “poses little serious threat to the First Amendment rights of the media.” On the other hand, “fear of the relentless deep-pocket plaintiff, who pursues a libel claim despite having only a small chance of winning; the thinly-capitalized defendant, who is only one big judgment away from bankruptcy; and the high cost of discovery” remain “threats.”\(^{152}\)

Although Justice Brennan would have preferred to adhere to the “actual malice” rule in all defamation cases, he could not long hold a majority to that view, even during the instrumentalist era. As discussed at § 11.2.2.2, between 1963-69, there was always a working 5-Justice majority on the Court that permitted the instrumentalist view to prevail in almost every case. However, with the retirement from the Court in 1969 of Chief Justice Warren and his replacement by Chief Justice Burger, that core instrumentalist period of 1963-69 came to an end.

Reflecting this change, in 1974, a 5-4 Court held in *Gertz v. Robert Welch*\(^{153}\) that where the plaintiff is a private person and the substance of a defamatory statement makes substantial danger to reputation apparent, the state need not require more than proof of fault, *i.e.*, negligence, to find liability, even though the case involves a matter of public concern. However, in recognition of danger from excessive damage awards, a state could permit recovery of presumed or punitive damages only on proof of actual malice. Justice Brennan, dissenting, said that the *Sullivan* rule should apply in all civil actions concerning media reports on the involvement of private individuals

in events of public or general interest. Justice Douglas continued his absolutist view stating that any libel law was unconstitutional. At the other extreme, Chief Justice Burger and Justice White disagreed that a negligence requirement should be imposed for cases involving private figures. However, the majority supported Justice Powell’s reasoning that private individuals need more protection than do public figures because they have less opportunity to correct a lie or error and they have not thrust themselves into the public eye, and thus they have not voluntarily exposed themselves to the increased risk of injury assumed by public figures.154

In 1985, the Court once again limited *New York Times Co. v. Sullivan*. In *Dun & Bradstreet, Inc. v. Greenmoss Builders, Inc.*,155 the Court addressed the protection given private individuals in a defamation action where the matter in question was not of public concern. The Court held that states can impose liability if fault is shown, and there can be recovery of presumed or punitive damages without showing actual malice. The Court explained that the First Amendment interest is less important than in *Gertz* since speech on matters of public concern is at the heart of the First Amendment. Further, defamation recovery on private matters does not pose a threat to robust debate of public issues.

This reasoning was a middle-ground between extreme positions. At one end, once again, Holmesian Justice White and formalist Chief Justice Burger thought that the negligence requirement of *Gertz* was not needed and that *Gertz* should be overruled. Justice White said that First Amendment values are not at all served by circulating false statements of fact even about public figures. The necessary “breathing room” for speakers could be insured by limitations on recoverable damages. At the other end, liberal instrumentalists Justices Brennan, Marshall, Blackmun, and Stevens thought that a plaintiff even in a case not involving a public concern should be required to show actual malice to receive presumed or punitive damages. Justice Brennan wrote that the state’s interest in protecting the reputation of private persons and deterring falsehood is insured by allowing recovery if the speaker has been at fault. Any further interest in deterring potential defamation through case-by-case judicial imposition of presumed and punitive damages awards on showing less than actual malice exacts too high a toll of First Amendment values.156

No important defamation cases have subsequently been before the Court. Thus, it remains uncertain what rule should be applied if plaintiff is a public official or public figure, but the defamation did not relate to a matter of public concern. Professor Tribe, who has criticized the Court for its retreat from the actual malice rule, has stated that the actual malice rule should be applied whenever the plaintiff is a public official or public figure.157 However, it can be argued that the *Dun & Bradstreet* rule should apply to all defamation cases involving private conduct not a matter of public concern.

---

154 Id. at 354-55 (Burger, C.J., dissenting); id. at 356 (Douglas, J., dissenting); id. at 361 (Brennan, J., dissenting); id. at 369-71 (White, J., dissenting).

156 Id. at 763-64 (Burger, C.J., concurring); id. at 767 (White, J., concurring in the judgment); id. at 774-76 (Brennan, J., joined by Marshall, Blackmun & Stevens, JJ., dissenting).

since even a public person should be able to protect private matters from false public comment without having to meet the difficult “actual malice” standard.

In practice, it would be unlikely for any matter involving a public official or public figure to be viewed as not a matter of public concern, since the conduct of public persons tends to be viewed as triggering matters of public concern. More broadly, it has been noted:

The cases suggest that generally the following will be considered matters of public concern in terms of the *Dun & Bradstreet* definition: politics and campaigns; operations of financial institutions; conduct of government and public officials; illegal or questionable business practices with ramifications for the general public; public health and safety; criminality and criminal justice; recruitment methods of a religious cult; pornography; and athletics. The following matters have been held not to be of public concern: employers' allegations of wrongdoing by employees or customers without ramifications for the general public; personal disputes between businesses and disgruntled customers; job recommendations; intra-professional disputes; intra- or inter-organizational business without ramifications for the general public; a paternity claim; a recommendation on tenure at a state university; inaccurate credit reports; and aspersions made in commercial advertising.\(^{158}\)

**B. False Light Cases**

Three years after *New York Times Co. v. Sullivan*, the Supreme Court decided *Time, Inc. v. Hill*.\(^{159}\) This was an action to redress invasion of privacy based on false reports regarding matters of public interest. The Court held that truth is a complete defense and that the First Amendment bars recovery in the absence of proof that the defendant published the report with “actual malice,” the *Sullivan* standard of knowledge of its falsity or in reckless disregard of the truth. Justice Brennan explained that erroneous statements are no less inevitable in entertaining the public as in informing the public and, if innocent and merely negligent, such speech must be protected if the freedoms of expression are to have the breathing space they need to survive.

Although the Supreme Court has never ruled on the issue, lower courts have split on whether the actual malice standard must be met even if the case does not involve a public official or public figure.\(^{160}\) It can be argued that *Gertz* impliedly overruled *Time, Inc. v. Hill* for false light cases involving non-public figures, just as *Gertz* limited the *Sullivan* actual malice doctrine for cases of

\(^{159}\) 385 U.S. 374, 387-91 (1967).

\(^{160}\) See Victor A. Kovner, Suzanne L. Telsey & Camille Calman, *Newsgathering, Invasion of Privacy and Related Torts*, 810 Practicing Law Institute, Patents, Copyrights, Trademarks, and Literary Property Course Handbook Series, PLI Order Number 2981, 499, 787-88 (2004) (“Courts applying the law of ten states have held that *Gertz* limits the actual malice standard to false light claims asserted by a public figure. . . . But courts applying the law of thirteen other states have followed *Hill* or have required an actual malice standard as a matter of state tort law.”).
defamation. Similarly, there has been no Supreme Court case on the proper standard where the false light relates to a matter of only private concern. However, using Dun & Bradstreet as an analogy suggests that a showing of fault would be sufficient for liability and that courts could permit recovery of presumed or punitive damages without a showing of actual malice. With regard to public official or public figure cases, application of the actual malice rule of Hill is clear. For example, in 1988, the Court ruled in Hustler Magazine v. Falwell\(^1\) that the First Amendment bars recovery for intentionally inflicting emotional distress by a parody cartoon on a plaintiff who is a public official or a public figure unless the cartoon contains a false statement of fact made with actual malice.

Proof of actual malice is difficult enough in ordinary circumstances. In false light cases, proof of actual malice was made more difficult by Masson v. New Yorker Magazine.\(^2\) In Masson, the Court ruled that a deliberate alteration of words in a quote does not equate with the actual malice rule unless the alteration results in a material change in the meaning conveyed by the statement.

**C. Invasion of Privacy by Truth**

The instrumentalist Court held in Cox Broadcasting Corp. v. Cohn\(^3\) that civil liability for invasion of privacy by a true publication may not be imposed on a broadcaster for accurately publishing information released to the public in official court records. This ruling was carried forward into the post-instrumentalist era when the Court protected in Florida Star v. B.J.F.\(^4\) a newspaper from liability for publishing the name of a rape victim obtained from a police report made available in the press room. Reflecting their greater predisposition toward the Holmesian deference to government approach, Justice White dissented, with Chief Justice Rehnquist and Justice O’Connor, saying that privacy was being unduly sacrificed and that Cox should be limited to judicial records.

If private information is illegally intercepted and then delivered to a broadcaster who publishes it, can the federal government sanction that broadcast? In Bartnicki v. Vopper,\(^5\) decided in 2001, the Court held that the privacy interests protected by the federal statute were not sufficient to justify its application to a broadcaster of an illegally intercepted communication containing information of public concern where the broadcaster did not illegally intercept the private communication or arrange for its interception. The Court noted that the constitutional interests at stake in Bartnicki

\(^3\) 420 U.S. 469, 490-92 (1975).

\(^4\) 491 U.S. 524, 532-42 (1989); id. at 542-46 (White, J., joined by Rehnquist, C.J., and O’Connor, J., dissenting).

concerning making public information about a public concern were similar to the interests at stake in Sullivan. The Court noted, however, that is was not deciding whether privacy interests would be strong enough to justify the application of the statute to “disclosures of trade secrets or domestic gossip or other information of purely private concern.”

In a concurrence, Justices Breyer and O’Connor underscored that this kind of case does not involve “strict scrutiny,” but rather a rational review kind of balancing of interests, asking whether “the statutes strike a reasonable balance between their speech-restricting and speech-enhancing consequences.” In determining this “reasonable” balance, Justice Breyer indicated that a court should ask whether the relevant statutes “impose restrictions on speech that are disproportionate when measured against their corresponding privacy and speech-related benefits, taking into account the kind, the importance, and the extent of these benefits, as well as the need for the restrictions in order to secure those benefits?” Reflecting that this form of review is really a form of second-order rational review, the focus on “disproportionate” burdens in Bartnicki is similar to the kind of balancing done under the Pike v. Bruce Church test in dormant commerce clause analysis, discussed at § 20.3.2.1.D nn.196, 204-08, to determine whether a burden on interstate commerce is “clearly excessive.” As with that doctrine, for Justices Breyer and O’Connor, with their occasionally affinity for the Holmesian deference-to-government approach (for Justice O’Connor, discussed at § 12.4.2; for Justice Breyer, discussed at § 11.4 nn.107-09), the Court “should avoid adopting overly broad or rigid constitutional rules, which would unnecessarily restrict legislative flexibility.”

In dissent, Chief Justice Rehnquist, joined by Justices Scalia and Thomas, accused the majority of “tacit application of strict scrutiny.” They argued that even under standard First Amendment doctrine this was a content-neutral regulation concerned with protecting privacy that should be granted intermediate review. Contrary to this view, the majority did not adopt strict scrutiny, as noted by Justices Breyer and O’Connor. The majority did indicate, however, that to prevent a newspaper from publishing truthful information on a matter of public concern when the media played no part in the unlawful recording of the information would require a reason “of the highest order.”

Such language is similar to that used in dormant commerce clause cases, where there is the virtual per se rule of invalidity for burdens against interstate commerce under Maine v. Taylor, discussed at § 20.3.2.1.D nn.194-200, which can be overcome by strong state interests. The scrutiny in Bartnicki is best viewed as second-order rational review, rather than the third-order rational review of Taylor, because the challenger in Bartnicki bore the burden of proving the statute unconstitutional.

---

166 Id. at 536-37, 541 (Breyer, J., joined by O’Connor, J., concurring).

167 Id. at 544-45 (Rehnquist, C.J., joined by Scalia & Thomas, JJ., dissenting).

D. Miscellaneous Other Tort or Contract Theories

Courts have had to struggle with the interplay between the First Amendment and a number of other tort causes of action. For example, in *Zacchini v. Scripps-Howard Broadcasting Co.*, the Court allowed a defendant to be found liable for videotaping 15 seconds of the plaintiff’s human cannonball act and playing it on the nightly news. The Court held this was a form of unlawful appropriation of plaintiff’s property. Justice Powell, joined by Justices Brennan and Marshall, dissenting, would have held that “the First Amendment protects the station from a ‘right of publicity’ or ‘appropriation’ suit, absent a strong showing by the plaintiff that the news broadcast was a subterfuge or cover for private or commercial exploitation.” Justice Stevens would have remanded the case to permit the lower state court to clarify whether its opinion rested on federal constitutional grounds or state common law tort grounds.

Post-instrumentalist decisions have also allowed liability to be imposed for speech under the contract doctrine of promissory estoppel and the tort doctrine of negligence. For example, in *Cohen v Cowles Media Co.*, the Court held that the First Amendment does not bar damages against a newspaper for breaching a promise of confidentiality to a source who relied on the promise in providing information to the paper, even for matters of public concern relating to a candidate in the upcoming election. A four-Justice dissent would have held “the State's interest in enforcing a newspaper's promise of confidentiality insufficient to outweigh the interest in unfettered publication of the information revealed in this case.” The Fourth Circuit held in *Rice v. Paladin Enterprises* that there can be liability for negligence if a defendant author publishes methods for doing illegal things, e.g., how to be a hit man, and that publication results in others using the methods to injure someone.

In cases where the Court has allowed liability to be imposed for speech that injured another, the facts did not suggest to a majority of the Court that allowing recovery would seriously intrude on the press’ right to make judgments regarding printing or broadcasting matters in which the public might be interested. Regarding possible constitutional protection of the press where it intruded on privacy by truthful matters obtained from sources other than official records, Justice White pointed out in *Cox Broadcasting Corp. v. Cohn* that the Court has left open the question whether the Constitution requires that truth be recognized as a defense in a defamation action brought by a private person. Also open is the question whether truthful publication of very private matters unrelated to public affairs may be proscribed by the Constitution.

\[\text{\textsuperscript{169}}\quad 433 U.S. 562, 569-78 (1977); id. at 581 (Powell, J., joined by Brennan & Marshall, JJ., dissenting); id. at 583 (Stevens, J., dissenting).\]

\[\text{\textsuperscript{171}}\quad 128 F.3d 233, 243-50 (4th Cir. 1997).\]

\[\text{\textsuperscript{172}}\quad 420 U.S. 469, 490 (1975).\]
§ 30.2.1.2 First Amendment Rights of Prisoners

In *Beard v. Banks*, a majority of the Supreme Court extended the second-order rational basis scrutiny used in *Turner v. Safley*, which involved burdening a prisoner’s fundamental right to marry, discussed at § 27.3.3.1.A n.183, to a case involving burdening a prisoner’s access to newspapers, magazines, and photographs while in the prison's long-term segregation unit. Such second-order review involved standard means/end reasoning balancing: (1) the government’s legitimate interest in effective prison management (*Turner* factor one); (2) the manner in which the regulation achieved its benefits for prison guards and other inmates, including considering less burdensome alternatives (*Turner* factors three and four), and (3) the burdens imposed on the prisoner, including alternative means of exercising First Amendment rights (*Turner* factor two), with the ultimate burden on the prisoner to establish that the government’s regulation was unreasonable. This approach is consistent with the Court’s earlier decision in *Thornburgh v. Abbott*, which involved the rights of prisoners to receive publications.

While application of *Turner v. Safley*’s second-order rational review was the appropriate standard to apply in the case, probably the better analysis would have been to recognize that prisons are “non-public” forums, and thus under standard First Amendment doctrine, discussed at § 29.5.1 nn.76-80, some version of rational review should have been applied anyway. As noted at § 29.2 text following n.55, while the Court’s precedents have not been clear on this issue, for content-neutral regulations of speech in a non-public forum, the Court typically the phrases the analysis in terms of whether or not the regulation is “reasonable,” similar to the 2nd-order rational review of *Turner v. Safley*. Under this approach, the intermediate review standard used for regulations of prisoners’ out-going mail, adopted in *Procunier v. Martinez*, is still appropriate to use, since those regulations affect mail being sent to a public forum or private property. Thus, content-neutral regulations adopted for prison management reasons in such fora should trigger intermediate review.

§ 30.2.2 Third-Order Rational Review: The Government as Employer

§ 30.2.2.1 Government Attempts to Regulate Speech of Public Employees

In the original natural law period there were no Supreme Court decisions on the extent to which the government, as employer, could regulate the speech of its employees. In 1892, during the formalist era, Justice Holmes, then on the Supreme Court of Massachusetts, explained in *McAuliffe v. Mayor of New Bedford* why a policeman had no constitutional claim after being fired for public remarks critical of his department. Holmes said, “The petitioner may have a constitutional right to talk politics, but he has no constitutional right to be a policeman. There are few employments for hire

---

175 29 N.E. 517, 518 (Mass. 1892).
in which the servant does not agree to suspend his constitutional right of free speech, as well as of idleness, by the implied terms of his contract. The servant cannot complain, as he takes the employment on the terms which are offered him.”

Holmes’ analysis was widely adopted prior to the instrumentalist era. For example, in *Scopes v. State*, the famous “Monkey Trial” case, the court said, “In dealing with its own employees engaged upon its own work, the State is not hampered by the limitations of the Fourteenth Amendment to the Constitution of the United States.” Even during the formalist era, however, statements appeared in some Supreme Court cases which foretold limits on government power to condition employment on the giving up of rights to speech or association. For example, in *Frost & Frost Trucking Co. v. Railroad Commission*, Justice Sutherland wrote for the Court, “It would be a palpable incongruity to strike down an act of state legislation which, by words of express divestment, seeks to strip the citizen of rights guaranteed by the federal Constitution, but to uphold an act by which the same result is accomplished under the guise of a surrender of a right in exchange for a valuable privilege the state threatens otherwise to withhold.”

As with the law regarding defamation, the shift on the Court during the 1960s reflected in *New York Times Co. v. Sullivan* altered the constitutional doctrine regarding speech of government employees on matters of public concern, just as it altered defamation doctrine, particularly on matters of public concern. As noted at § 30.2.1.1 n.149, the Court had stated in *Sullivan*, “[W]e consider this case against the background of a profound national commitment to the principle that debate on public issues should be uninhibited, robust, and wide-open.” That commitment was cited and relied upon in 1968, when Justice Marshall delivered the Court’s opinion in *Pickering v. Board of Education of Will County, Illinois*. There the Court held that the problem in any case involving retaliation by a government employer against a teacher is “to arrive at a balance between the interests of the teacher, as a citizen, in commenting upon matters of public concern and the interest of the State, as an employer, in promoting the efficiency of the public services it performs through its employees.” Justice Marshall continued that because of the enormous variety of fact situations it was not appropriate or feasible to lay down a general standard on when a school board could discharge a teacher for speaking out on a matter of public interest. However, Justice Marshall did note that where the fact of employment as a teacher is only tangentially and insubstantially involved in the subject matter of a public communication made by the teacher critical of the school board, the teacher must be regarded as a member of the general public and, absent proof of false statements knowingly or recklessly made by him, a teacher's exercise of his or her right to speak on issues of public importance may not furnish the basis for his dismissal from public employment. On the other hand, the result might be different if the speaker had a close kind of working relationship with the Board where personal loyalty and confidence are necessary.

The facts considered by Justice Marshall suggested categories that might be applied in a wide variety of retaliation situations. They included:

---

176 289 S.W. 363, 364-65 (Tenn. 1927).

177 271 U.S. 583, 593-94 (1926).

1. Whether the teacher made false statements knowingly or recklessly;
2. Whether the statements are so without foundation as to call into question the teacher's fitness to perform;
3. Whether the teacher's relationships with the board or the superintendent are such that personal loyalty and confidence are necessary to their proper functioning;
4. Whether the speech would interfere with discipline by immediate superiors or harmony among coworkers;
5. Whether the remarks are detrimental to the school system or whether they concern matters of public interest vital to informed decision making by the electorate; and
6. Whether the teacher has carelessly made false statements about matters so closely related to the day-to-day operations of the schools that any harmful impact on the public would be difficult to counter because of the teacher's presumed greater access to the facts.179

Justice Marshall added that the Court found the teacher's statements were not knowingly or recklessly false. And he expressly left open the question of whether the teacher could be fired if actual malice were shown. However, actual malice had not been shown, and the Court could not reasonably presume that the speech had any harmful effects.180 Reflecting his Holmesian predisposition to defer to government, Justice White, concurring, took a position that a teacher may be fired for knowingly or recklessly making false statements regardless of their harmful impact on the schools.181

As developed in cases after Pickering, to establish a claim of unlawful First Amendment retaliation a public employee must show that he or she suffered an adverse employment action that was causally connected to participation in a protected activity, i.e., speaking out on an issue of public concern. Once the employee satisfies this initial burden, the burden shifts to the government employer to show a legitimate nondiscriminatory reason for the action, e.g., that the interest of the government in the efficient delivery of its services outweighs the interest of the employee in speaking out, or that the adverse action would have been taken even without the employee’s speech having been made. If the government meets this burden, the burden shifts back to the employee to show that the employer’s actions were in fact a pretext for illegal retaliation.182

Because the government has the primary burden under Pickering of defending its decision once the plaintiff has established a prima facie case, this kind of balance reflects what the “base plus six” model of standards of review, discussed at § 7.2.1 text following n.42, describes as third-order rational review. Under third-order rational review, there is a balancing of governmental interests versus individual constitutional rights, with the burden on the government to justify the constitutionality of its action. Where there is a similar balancing of governmental interests versus

individual interests, but the burden is placed on the challenger to prove the statute is unconstitutional, the “base plus six” model describes the level of scrutiny as second-order rational review.

Cases decided since 1973 have fleshed out *Pickering* in terms of its application to wide variety of government employers and to various speech situations. For example, in *Mt. Healthy City School District Board of Education v. Doyle*, a district court judgment had reinstated a teacher with back pay on the ground that the Board's decision not to renew was based in substantial part on the teacher having communicated to a local television station the principal's memo on teacher dress and appearance. Justice Rehnquist’s opinion for the Court began by saying that since the communication did not violate an established policy of the Board it was protected by the First and 14th Amendments. This being so, the teacher was entitled to win if he showed that his expressive conduct was a motivating factor in the decision not to rehire provided, however, that the Board did not show by a preponderance of the evidence that it would have reached the same decision even in the absence of the protected conduct. Since the Court could not tell what conclusion the lower courts would have reached if they had applied these principles, the judgment was vacated and the case remanded for proceedings consistent with the Court's opinion.

The effect of speaking in private about a matter of public concern was dealt with in *Givhan v. Western Line Consolidated School District*. There the Court held that a public school teacher, dismissed for criticizing the school's employment policies as racially discriminatory in private meetings with her principal, had engaged in expression protected by the First Amendment. Thus, the teacher was entitled to be reinstated unless the Board could show, in accord with *Mt. Healthy*, that the decision not to rehire would have been made even absent consideration of her criticism.

How to determine whether speech relates to a matter of public concern was the main focus in the 1983 case of *Connick v. Myers*. Justice White wrote for the Court that a district attorney could fire an assistant district attorney without regard to the *Pickering* balance test for circulating a questionnaire to co-workers that could most accurately be characterized as an employee grievance concerning internal office policy if the district attorney reasonably believed that the questionnaire would disrupt the office, undermine his authority, or destroy close working relationships. Justice White said government officials should be given wide latitude in managing their offices without intrusive oversight, even if the reasons for dismissal are mistaken or unreasonable, if the speech was not on a matter of public concern. Whether a speech addresses a matter of public concern must be determined by the content, form, and context of a given statement. Here, the focus was to gather information for continued debate with supervisors over the employee's transfer to another section.

The Court noted, however, that with respect to one aspect of the speech First Amendment review was required. This involved determining whether the discharge was justified because one question touched on a matter of public concern, i.e., did assistant district attorneys "ever feel pressured to

---

work in political campaigns on behalf of office supported candidates.\footnote{186}{Id. at 149.} On this issue, the Court concluded that while there was no showing that the questionnaire impeded the employee's ability to perform her responsibilities, weight must be given to the supervisor's reasonable belief that the questionnaire, arising from an employment dispute, was an act of insubordination that interfered with working relationships essential to fulfilling public responsibilities.

Justice Brennan dissented with Justices Marshall, Blackmun and Stevens. Justice Brennan said that the questionnaire addressed matters of public concern because it discussed subjects that could reasonably be expected to be of interest to persons seeking to develop informed opinions about the manner in which the district attorney, an elected official, was discharging his responsibilities, especially with regard to the impact of transfer policies. With regard to the one question regarded by the majority as addressing a public concern, Justice Brennan said the Court was wrong to hold that a public employer's apprehension that speech will be disruptive justifies suppression of that speech "when all the objective evidence suggests that those fears are essentially unfounded."\footnote{187}{Id. at 166 (Brennan, J., joined by Marshall, Blackmun & Stevens, JJ., dissenting).} That was so because the employee did not violate a rule of confidentiality or office policy, most copies were distributed during lunch, and no evidence showed that the employee's work performance was adversely affected by her expression. Analogizing the case to student speech at school, Justice Brennan called for applying the \textit{Tinker} standard of allowing regulation only if the expression causes material and substantial interference with the requirements of discipline in the operation of the enterprise. He thought that an undesirable result of the Court's decision would be the public's deprivation of valuable information with which to evaluate the performance of elected officials. Had Justice Brennan's views prevailed, the intermediate scrutiny standard of \textit{Tinker} would be applied in these cases, rather than the third-order rational review standard of the existing \textit{Pickering} doctrine.

Decisions since 1986 have followed \textit{Pickering} for the speech activities of government employees and their rights to expressive association. For example, in \textit{Rankin v. McPherson},\footnote{188}{483 U.S. 378, 379-92 (1987).} the Court held that a deputy constable was not properly discharged even though she remarked, after hearing of the attempted assassination of President Reagan, "If they go for him again, I hope they get him." For the Court, Justice Marshall repeated the \textit{Pickering} test, stating: "The determination whether a public employer has properly discharged an employee for engaging in speech requires a balance between the interests of the employee, as citizen, in commenting on matters of public concern, and the interest of the state, as employer, in promoting the efficiency of the public services it performs through its employees." Here, coming on the heels of a news bulletin on a matter of heightened public attention, the statement dealt with a matter of public concern. Pertinent factors in the balance included whether the statement impaired discipline by superiors or harmony among co-workers, had a detrimental affect on close working relationships for which personal loyalty and confidence are necessary, impeded the performances of the speaker's duties, or interfered with the regular operation of the enterprise. Here, there was no evidence of interference with discipline, nor danger of discrediting the office, and the employee served no confidential, policy-making, or public contact role. She was purely clerical and worked in a room to which the public did not have access. Justice

\end{itemize}
\end{footnotesize}
Powell, concurring, said it was unnecessary to engage in any extensive analysis where the statement was made to a co-worker who was her boyfriend, with no intention or expectation it would be overheard or acted on by others. It “borders on the fanciful” to think that this single, offhand comment would lower morale, disrupt the work force, or otherwise undermine the mission of the office. 189

Reflecting a formalist literal viewpoint, and a Holmesian deference-to-government posture, Justice Scalia dissented with Chief Justice Rehnquist and Justices White and O’Connor. Justice Scalia first said that the statement does not literally constitute speech on a matter of “public concern.” He supported that conclusion by making a comparison with statements found to fit that description in prior cases involving public employees: Pickering (criticism of the board for financing school construction; Connick (did co-workers ever feel pressured to work in a political campaign); Mt. Healthy (memo given to radio station on teacher dress and appearance); and Givhan (complaints about school board policies and practices). Even if it was speech on a matter of public concern, the issue is whether the employer's interest in preventing the expression of such statements in his agency outweighed the employee’s First Amendment interest in making the statement. Justice Scalia said that "it boggles the mind" to think that she had a right to make such a statement, particularly working in a constable’s office devoted to law enforcement. 190

Moving into the 1990s, the Court faced in Waters v. Churchill191 a situation in which a school superintendent had fired a teacher who had sent a letter of public interest to the local newspaper, but the superintendent, relying on a mistaken report about the letter, thought it was on a private matter, i.e., alleged personal mistreatment. The teacher sued for reinstatement. The Court split on how the Pickering test should be applied. Justices Scalia, Kennedy, and Thomas approached the question of retaliation as a matter of the literal intent of the government actor. Because of the mistake, the decision here was not retaliatory from a subjective literal intent perspective. At the other extreme, Justice Stevens and Blackmun said that Pickering applies to protect the employee since, but for the exercise of First Amendment rights, the employee would not have suffered any injury. In the decisive middle-ground opinion, Justice O’Connor, joined by Chief Justice Rehnquist, and Justices Souter and Ginsburg, said that Pickering does not apply if the decision-maker acted in good faith and reasonably, but that was not done here since the decision-maker did not make a reasonable inquiry before acting. This issue of subjective versus objective approaches to the intent issue in Waters is discussed at § 7.2.4 nn.70-72.

A case involving whether speech was worked-related occurred in City of San Diego v. Roe. In this case, a police officer has been discharged for selling videos over the Internet which showed him stripping off a police uniform and masturbating. The Ninth Circuit had held that, because the tape

190 Id. at 397-400 (Scalia, J., joined by Rehnquist, C.J., and White & O’Connor, JJ., dissenting) (citations omitted).

191 511 U.S. 661, 677-79 (1994) (plurality opinion of O’Connor, J., joined by Rehnquist, C.J., and Souter & Ginsburg, JJ.); id. at 689-92 (Scalia, J., joined by Kennedy & Thomas, JJ., concurring); id. at 694-99 (Stevens, J., joined by Blackmun, J., concurring).
was not an internal workplace grievance and took place while he was off-duty, away from his employer’s premises, it was unrelated to employment. The Ninth Circuit analogized the case to *United States v. National Treasury Employees Union*, a case where the Supreme Court struck down a ban on honoraria being received by lower-level federal employees, even as to speeches not related to their work responsibilities.\(^{192}\)

The Supreme Court reversed.\(^{193}\) The Court held in *San Diego* that the speech was linked to his official status as a police officer and designed to exploit his employer’s image. Thus, the speech was viewed as work-related, and therefore different than *Treasury Employees*. Because the video was widely distributed, it was harmful to the proper functioning of the police department. The Court then held that because the speech was not on a matter of public concern the *Pickering* balance test did not apply. Thus, the officer had no First Amendment protection from being fired. In defining what is a matter of public concern, the Court noted: “Public concern is something that is a subject of legitimate news interest; that is, a subject of general interest of value and concern to the public at the time of publication.”

In 2006, the Court considered whether the First Amendment protects a government employee from discipline based upon speech made pursuant to the employee’s official duties. In *Garcetti v. Ceballos*,\(^{194}\) a 5-4 Court held that when public employees make statements pursuant to their official duties, the employees are not speaking as citizens for First Amendment purposes, and the Constitution does not insulate their communication from employer discipline. The case involved a deputy district attorney who received adverse job consequences after complaining to his superiors that an affidavit used to obtain a critical search warrant contained serious misrepresentations. In an opinion joined by Chief Justice Roberts, and Justices Scalia, Thomas, and Alito, Justice Kennedy said the employee was acting as a prosecutor fulfilling a responsibility to advise his superiors about how best to proceed with a pending case. Justice Kennedy noted that various whistle-blower statutes, labor codes, and other codes of professional conduct provide individuals with various kinds of statutory protection, but that to constitutionalize this kind of protection would be to demand permanent judicial intervention in the conduct of governmental operations to a degree inconsistent with sound principles of federalism and the separation of powers.

Reflecting a more instrumentalist policy perspective, Justice Stevens said in dissent that it was perverse to fashion a new rule that provides employees with an incentive to voice their concerns publicly before talking frankly to their superiors. Justice Souter, joined by Justices Stevens and Ginsburg, noted that private and public interests in addressing official wrongdoing and threats to health and safety can outweigh the government’s stake in the efficient implementation of policy, and

\(^{193}\) City of San Diego v. Roe, 543 U.S. 77, 80-84 (2005). See also Communications Workers of America v. Ector County Hosp. Dist., 2006 WL 2831142 (5th Cir. 2006) (13-4 en banc) (employee wearing “Union Yes” button assumed to be a matter of public concern, but public hospital’s interest in maintaining a tranquil and peaceful atmosphere outweighed employee’s First Amendment rights).

when they do, public employees who speak on these matters in the course of their duties should be eligible for First Amendment protection. Souter then drew an outside border on this protection, saying that an employee commenting on subjects in the course of duties should not prevail unless the comments relate to official dishonesty, deliberately unconstitutional action, other serious wrongdoing, or threats to health and safety. He feared that the majority rule would lead to excessively broad job descriptions and might interfere with academic freedom in public universities. Justice Breyer, dissenting, placed himself between the majority and Justice Souter. He said that the majority’s rule denying First Amendment protection to all “official duty” speech did not sufficiently protect employees, while Justice Souter’s approach did not sufficiently protect the government. Breyer noted that there may be circumstances with a special demand for constitutional protection where government justifications may be limited, as here, because the deputy prosecutor’s speech was subject to both professional and special constitutional obligations, such as to communicate with the defense about exculpatory and impeachment evidence in the government’s possession.195

Responding to criticisms in Justice Souter’s dissent, Justice Kennedy said that the Court rejected the view that employers can restrict employees’ rights by creating excessively broad job descriptions, and he said that the Court was not deciding whether its analysis would apply in the same manner to a case involving speech related to scholarship or teaching. On balance, Justice Kennedy’s approach in Garcetti to all “official duty” speech is consistent not only with a formalist desire for categorical “bright-line” rules, Holmesian deference-to-government considerations, and conservative deference to the executive, but also with a Stage 6 natural law approach to protecting core constitutional rights, but not constitutionalizing every aspect of regulation where democratic balancing of competing interests – “play in the joints” – might be more appropriate, as discussed at § 16.4 nn.97-105).

§ 30.2.2.2 Government Attempts to Regulate Political Activities of Government Employees

Prior to the 1960s, the government was given wide latitude to regulate the political activities of government employees under a minimum rational review kind of approach. For example, in 1947, in United Public Workers of American (C.I.O.) v. Mitchell,196 the Court upheld the Hatch Act which bars federal employees from active participation in political management and political campaigns. The Act was upheld on its face and as applied to a federal employee who wanted to engage in political activity when not at work. Justice Reed said, “[T]his Court must balance the extent of the guarantees of freedom against a congressional enactment to protect a democratic society against the supposed evil of political partisanship by classified employees of government. . . . [I]t is not necessary that the act regulated be anything more than an act reasonably deemed by Congress to interfere with the efficiency of the public service.”

195 Id. at 1963 (Stevens, J., dissenting); id. at 1963-68 (Souter, J., joined by Stevens & Ginsburg, JJ., dissenting); id. at 1973-75 (Breyer, J., dissenting). On First Amendment rights and academic freedom in universities, see Damon L. Kreiger, Comment, May Public Universities Restrict Faculty From Receiving or Transmitting Information Via University Computer Resources? Academic Freedom, the First Amendment, and the Internet, 59 Maryland L. Rev. 1398, 1412-30 (2000).

196 330 U.S. 75, 96 (1947); id. at 115 (Black, J., dissenting); id. at 126 (Douglas, J., dissenting in part).
Justice Black, dissenting, said that the First Amendment leaves people at liberty to speak their own thoughts about government and to work for their own candidates and parties. Justice Douglas, also dissenting, said that free speech rights are “too basic and fundamental in our democratic political society to be sacrificed or qualified for anything short of a clear and present danger to the civil service system.” These dissenting views have not found their way into majority status.

After *Pickering* in 1968, legislative barriers to participation in partisan political campaigns by lower-level government employees have been analyzed under *Pickering*. In some cases, the Court has decided that the restrictions met the *Pickering* test. For example, in 1973, in *United States Civil Service v. National Association of Letter Carriers*, the Court upheld against facial attack a provision of the Hatch Act that prohibits federal employees from taking an "active part in political campaigns." Each plaintiff claimed standing on the ground that they wished to engage in activity that would violate the Act, and the Civil Service Commission was enforcing or threatening to enforce the Act regarding the activity in which they wished to engage. For a 6-3 Court, Justice White wrote that Congress has power, in seeking the goal of effecting an efficient public service, to forbid partisan activity of federal personnel deemed offensive to efficiency, and he listed examples of such activity: holding a party office; organizing a political party, managing a partisan campaign, and the like. Responding to allegations that the law was vague and overbroad, Justice White said that the power of the Commission was limited to the acts of political management or campaigning prohibited by Commission rules in effect before July 19, 1940. Further, there was a procedure by which an employee in doubt could obtain advice from the Commission and thereby remove doubt as to its views. Nor is the law made overbroad by Commission constructions in 1970 of terms in the earlier rules that made them apply to endorsements in advertising, broadcasts, and literature, and speaking at political party meetings in support of partisan candidates for public or party office. These are political acts normally performed only in the context of partisan campaigns.

Reflecting greater instrumentalist protection for free speech, Justice Douglas dissented, with Justices Brennan and Marshall. Justice Douglas said the vague provisions of the Act had a chilling effect. He saw as pregnant with ambiguity a provision allowing federal employees to "participate fully in public affairs, except as prohibited by law, in a manner which does not materially compromise his efficiency or integrity as an employee or the neutrality, efficiency, or integrity of his agency."198

In other cases, the government regulations have not met the *Pickering* test. In 1976, the Court held in *Elrod v. Burns* that public employees may not be discharged or threatened with discharge solely because of their partisan political affiliation or nonaffiliation. Justice Brennan delivered an opinion in which Justices White and Marshall joined. Justice Brennan said the individual's ability to act according to his beliefs and to associate with others of his political persuasion is constrained by the patronage system. Yet the First Amendment protects political association as well as expression, as noted at § 31.2.1. Infringing First Amendment rights by a threat of retaliation triggers strict scrutiny, said Justice Brennan, so the government must show that a compelling interest is served by a means

---

198 *Id.* at 596 (Douglas, J., joined by Brennan & Marshall, JJ., dissenting).

that is the least restrictive of freedom of belief and association. He then considered three different goals suggested for preserving the spoils system and explained why reference to those goals did not justify the spoils system:

1. The need to insure effective government and the efficiency of public employees: The alleged lack of incentive of persons not members of the party in control is offset by the inefficiency of wholesale replacement; there’s no assurance that replacements will be more qualified; it’s doubtful that difference of political persuasion motivates poor performance; and means less intrusive than patronage are available: discharge for cause and the availability of merit systems.

2. The need for political loyalty of employees: Limiting patronage dismissals to policymaking positions is sufficient to achieve this goal.

3. Preserve democratic process: Patronage may hamper the democratic process and parties can be nurtured by less intrusive and equally effective means.

Justices Stewart and Blackmun concurred in the judgment, but limited themselves to one question: whether a non-policymaking, nonconfidential government employee can be discharged or threatened with discharge from a job he is satisfactorily performing on the sole ground of his political beliefs. They did not join in the strict scrutiny review of the Brennan plurality opinion.

Justice Powell dissented with Chief Justice Burger and Justice Rehnquist. Beneficiaries of a patronage system should not be heard to challenge the system when it comes their turn to be replaced. Justice Powell agreed that the constitutional issue is determined by balancing, i.e., whether the hiring practices sufficiently advance important state interests to justify the consequent burdening of First Amendment interests. But he said that patronage hiring promotes important state interests in stimulating political activity and strengthening parties, particularly in obscure elective offices.

During the last part of the instrumentalist era, the result in Elrod was followed and extended. In 1980, in Branti v. Finkel, the Court held that the First Amendment protects an assistant public defender who is satisfactorily performing his job from discharge solely because of his political beliefs. The public defender sought to defend the discharge on the grounds that: (1) Elrod v. Burns is limited to situations where employees are coerced into pledging allegiance to a party they would not voluntarily support and does not apply where, as here, the employee is only required to be sponsored by the party in power, and (2) even if party sponsorship is an unconstitutional condition for employment of clerks, deputies, and janitors, it is acceptable for an assistant public defender.

Writing for the Court in response to the first contention, Justice Stevens first sought to establish that the second of Justice Brennan's two reasons for finding discharges prohibited in Elrod v. Burns did not require that employees have been coerced into changing their political allegiance. He noted that

---

200 Id. at 374-75 (Stewart, J., joined by Blackmun, J., concurring in the judgment).

201 Id. at 376 (Powell, J., joined by Burger, C.J., and Rehnquist, J., dissenting).

Justice Brennan said that a patronage system has an inevitable tendency to coerce employees into compromising their true beliefs, and Stevens added that even requiring sponsorship would have that tendency. Second, the First Amendment protects a person from the denial of a benefit because of that person's beliefs. Analogizing the case to the unconstitutional conditions doctrine, discussed at § 27.1.2.3, Justice Stevens wrote that unless the government can demonstrate a “vital interest” such as “maintaining government effectiveness and efficiency” requiring that a person's private beliefs conform to those of the hiring authority, the individual cannot be fired for those beliefs. It might be true for “the Governor of a State” who might “appropriately believe that the official duties of various assistants who help him write speeches, explain his view to the press, or communicate with the legislator.” In such a case, the an employee could be discharged if his or her private beliefs would interfere with the discharge of official duties. Justice Stevens noted it was a fact-sensitive inquiry and might be true even though the position was neither confidential nor policymaking in character.

Applying his test to the facts, Justice Stevens concluded that the continued employment of an assistant public defender cannot be conditioned upon allegiance to the political party in control of the county government. He said that it would undermine rather than promote the effective performance of an assistant public defender to make tenure depend on allegiance to the dominant political party. The assistant public defender's primary responsibility is to the client and so any policymaking must relate to the needs of clients and not political concerns, and confidential information arising from representing clients has no bearing on partisan political concerns.

Justice Stewart, dissenting, said that Elrod v. Burns does not apply since the respondents are confidential employees because of the necessity of mutual confidence and trust in the kind of professional association that occurs in the public defender's office – analogous to a firm of lawyers in the private sector. Justice Powell, dissenting with Justices Rehnquist and Stewart, said that the Court had largely ignored the substantial interests served by patronage, and that the Court's standard would create uncertainty. Regarding patronage interests, Justice Powell added that the implementation of policy often depends on the cooperation of public employees who do not hold policymaking posts. Further, the decision may impair the right of local voters to structure their government because here they had delegated to the public defender the power to choose his assistants. The decision to place certain governmental positions within a civil service system is a sensitive political judgment that should be left to the voters and to elected representatives of the people.203

The Stewart and Powell dissents in Branti v. Finkel have not been transformed into majority views during the post-instrumentalist years. Instead, in 1990, in Rutan v. Republican Party of Illinois,204 the modern Court extended Elrod to hirings, promotions, and transfers of government employees. In 1996, in Board of County Commissioners v. Umbehr and O'Hare Truck Service, Inc. v. City of

203    Id. at 520-21 (Stewart, J., dissenting); id. at 521-26 (Powell, J., joined by Rehnquist, J., and Stewart, J., as to Part I, dissenting).

Northlake, independent contractors were protected under the First Amendment from retaliatory
government action. In the independent contractor decisions, the natural law Justices O’Connor,
Kennedy, and Souter, joined instrumentalist Justices Stevens, Ginsburg, and Breyer, to create a solid
majority on the Court for applying Pickering-style balancing to these cases. Although he had
typically dissented in earlier cases, Chief Justice Rehnquist joined the majority in the independent
contractor cases, perhaps viewing this line of cases as now “settled law.”

§ 30.3 Content-Based Regulations That Trigger Versions of Intermediate
Scrutiny, Rather Than Strict Scrutiny

§ 30.3.1 Basic Intermediate Scrutiny: The Government as Trustee of the Airwaves
Regarding Radio and Television Regulation

In the beginning of broadcast regulation, the Court distinguished sharply between the freedom
guaranteed to newspapers and the need for government regulation of the airwaves, based on the
rationales of scarcity of broadcast stations and public ownership of the airwaves. Over time, scarcity
has become less of an issue, and the Court has tended to treat broadcasters more like newspapers.

The Court’s concern about scarcity in the public airwaves was used to justify a standard of review
less than strict scrutiny for a content-based regulations of speech. For example, in Red Lion
Broadcasting Company v. FCC, decided in 1969, the Court held that under the then-existing
“fairness doctrine” broadcasters could be required to allow free reply time to persons who have been
personally attacked on their station. The Court said that because of limited frequencies, the persons
licensed to broadcast have no constitutional right to monopolize a radio frequency. The government
could require sharing by all who wish to use the public airwaves. To the argument that allowing free
reply time would force broadcasters into self-censorship and limited coverage of public issues, the
Court pointed to the FCC’s opinion that this was at best speculative. In 1987, the FCC repealed the
fairness doctrine (both the right of reply provisions at issue in Red Lion and the provision requiring
“balanced coverage” of issues) on grounds they “chilled” the free speech rights of broadcasters.

The Red Lion decision can be contrasted with access regulation applied to newspapers. In 1974, in
Miami Herald Publishing Co. v. Tornillo, the Court held that a law requiring newspapers to grant
political candidates equal space in which to reply to criticism or to attacks on their personal
character or official record was an invalid content-based restriction on editorial judgment. The

Court); id. at 686 n.* (Scalia, J., joined by Thomas, J., dissenting).

207 See generally Radio-Television News Directors Ass’n v. FCC, 229 F.3d 269 (D.C. Cir. 2000)
discussing history of the “fairness doctrine” and its demise.

reasoning in the two cases was different, since in *Tornillo* the Court applied standard First Amendment doctrine adopting strict scrutiny for a content-based regulation of speech.

In 1984, the Court clarified that the lower standard of review for content-based regulations of speech on radio and television in *Red Lion* involved intermediate scrutiny. In *FCC v. League of Women Voters*, the Court was faced with a statute that forbade any noncommercial educational broadcasting station that received a grant from the Corporation for Public Broadcasting to engage in editorializing. Faced with this content-based regulation, the district court in the case had applied strict scrutiny review. However, relying upon *Red Lion* and other cases which had held that a different standard applied to radio and television, the Court held that the correct standard was whether the regulation was “narrowly tailored to further a substantial governmental interest, such as ensuring adequate and balanced coverage of public issues.” Applying this intermediate scrutiny test resulted in the government’s ban on editorializing still being declared unconstitutional because “the specific interests sought to be advanced by [the ban] are either not sufficiently substantial or are not served in a sufficiently limited manner to justify the substantial abridgement of important journalistic freedoms which the First Amendment jealously protects.”

In considering the regulation of cable television, the rationales about scarcity of channels and ownership of the medium by which the communication is delivered is less compelling. Thus, cases involving regulation of cable television have posed difficult problems for the Court in determining whether standard First Amendment doctrine or *Red Lion* doctrine should apply. A majority of the Court has avoided a fixed decision on this issue, typically by finding that the government regulation was content-neutral based either on secondary effects grounds, or that it was a time, place, or manner regulation, and thus, under standard First Amendment doctrine, intermediate scrutiny applied anyway. Justices in dissent, however, who have viewed some cable regulations before the Court as content-based, have indicated their view that normal strict scrutiny should apply.

For example, in *Turner Broadcasting System, Inc. v. FCC* (*Turner I*), the Court considered the constitutional validity of a federal statute that required cable systems with more than 12 active channels to set aside up to one-third of their channels for commercial broadcast stations that request carriage. For the Court, Justice Kennedy said that the radio and television cases do not apply because cable does not have the limits of the broadcast medium. On the other hand, a cable operator can silence the voice of competing speakers with a flick of the switch, raising some access concerns. Nevertheless, some degree of heightened scrutiny is required, although strict scrutiny need not apply because the must-carry provisions do not impose burdens or benefits with reference to the content of speech. Instead, they are based on the manner in which the speakers transmit their messages, and the purpose was to preserve access to free television programming for the 40 percent of Americans without cable. Thus, even under standard First Amendment doctrine, a content-neutral regulation would only trigger intermediate scrutiny. Applying intermediate scrutiny, Justice Kennedy noted the lack of evidence that local stations had fallen into bankruptcy, turned in licenses, curtailed broadcasting, or suffered a reduction in operating revenues. Nor was there evidence on the

---

availability of less restrictive means. Thus, there were factual issues to be resolved and it was error to enter summary judgment for the defendant FCC.

Justice O'Connor, concurring in the judgment, joined by Justices Scalia, Thomas, and Ginsburg, said that Congress' reasons for preferring broadcasters over cable programmers rest in part on the content of the broadcaster's speech and, thus, strict scrutiny should be applied. The interest in localism is not compelling, and the Act is not sufficiently tailored to protect an interest in public affairs programming or educational programming. Further, the rules impose an impermissible restraint on cable operator's editorial discretion. The provisions fail content-neutral scrutiny as well because they restrict speech that does not implicate interests in fair competition and the preservation of free television. She continued that the cable operator and not Congress should have control over who gets to speak over cable, though Congress could take steps to foster competition and encourage the creation of new media. In a separate concurrence, Justice Ginsburg agreed with Justice O'Connor that the regulations were content-based and, thus, they triggered strict scrutiny, which they failed because the government had not established that broadcast television was in jeopardy.

In *Turner Broadcasting System, Inc. v. FCC (Turner II)*,212 the Court again rejected the comparison of a cable television company with a newspaper and, applying an intermediate scrutiny, upheld requiring cable broadcasters to set aside up to one-third of their channels for use by local, over-the-air commercial broadcasters. By a similar 5-4 vote as in *Turner I*, with Justice Breyer, who had replaced Justice Blackmun on the Court, taking Blackmun's place in the majority, the Court held that the record showed that the government had an important interest unrelated to the suppression of free speech – the preservation of free, over-the-air broadcasting. The majority said that Congress' judgment was supported by substantial evidence in the record before Congress. Justice O'Connor's dissent concluded that even under intermediate scrutiny the regulations should fail. Her dissent underscored the fact that, unlike the substantial deference given to government at minimum rational review, at intermediate scrutiny the Court has “an independent duty to identify with care the Government’s interests supporting the scheme, to inquire into the reasonableness of congressional findings regarding its necessity, and to examine the fit between its goals and its consequences.”213

When Congress has stepped in to regulate indecent material being distributed over cable networks, the Court has found it difficult to reach consensus or even to cobble together a majority view. This was nowhere more clear than in *Denver Area Educational Telecommunications Consortium v. FCC*.214 There, the Court considered three provisions in federal law seeking to regulate the

211 *Id.* at 674-75 (O'Connor, J., joined by Ginsburg & Scalia, JJ., and Thomas, J., as to Parts I and III, concurring in part and dissenting in part); *id.* at 685-86 (Ginsburg, J., concurring in part and dissenting in part).

213 *Id.* at 229 (O'Connor, J., joined by Scalia, Thomas & Ginsburg, JJ., dissenting).

broadcast of "patently offensive" sex-related material on cable television. All three restrictions were considered valid by Chief Justice Rehnquist and Justices Scalia and Thomas. All three were invalid according to Justices Kennedy and Ginsburg. All these five Justices agreed, however, that standard First Amendment doctrine should apply to cable stations, and that the lesser Red Lion standard for radio and television should not apply. Since these five Justices split on the result in the case, however, that left the result in the hands of Justices Stevens, O’Connor, Souter, and Breyer. In an opinion by Justice Breyer, these Justices refused to articulate any fixed standard of review in the case as between intermediate scrutiny or strict scrutiny. The votes were distributed as follows:

1. 10(a) (which gave cable system operators the power to bar the transmission of patently offensive sex-related material on leased channels, i.e., channels reserved for commercial lease by unaffiliated third parties – about 10-15 percent of the total).
   
   Valid, as a way to protect children: Breyer, Stevens, O’Connor, Souter.
   
   Valid, since these channels are not “government-owned” fora, and challengers have no First Amendment rights to challenge private cable operator choices on what to transmit: Rehnquist, Scalia, Thomas.
   
   Invalid, since cable is a public forum, and strict scrutiny should apply: Kennedy and Ginsburg.

2. 10(b) (which required cable operators to place "patently offensive" leased channel programming on a separate channel blocked except on subscribers' written request).
   
   Invalid, as overly restrictive in light of present and forthcoming technical developments: Stevens, O’Connor, Souter, Breyer.
   
   Invalid, as cable is a public forum: Kennedy and Ginsburg
   
   Valid, as narrowly tailored regulation advancing compelling government interest of protecting children, thus satisfying strict scrutiny applicable to regulating private speech: Rehnquist, Scalia, and Thomas.

3. 10(c) (which allowed cable operators to bar "patently offensive" material from public access channels).
   
   Invalid, as not necessary in view of local supervisory controls: Stevens, Souter, Breyer.
   
   Invalid, as cable is a public forum: Kennedy and Ginsburg
   
   Valid, as a way to protect children and not overly restrictive: O’Connor
   
   Valid, since these channels are not “government-owned” fora, and challengers have no First Amendment rights to challenge private cable operator choices on what to transmit: Rehnquist, Scalia, Thomas.

__215__ Id. at 732, 740-53 (Justice Breyer announced the judgment of the Court and delivered the opinion of the Court with respect to Part III, an opinion with respect to Parts I, II, and V, in which Justice Stevens, Justice O’Connor, and Justice Souter join, and an opinion with respect to Parts IV and VI, in which Justice Stevens and Justice Souter join); id. at 779 (O’Connor, J., concurring in part and dissenting in part); id. at 780 (Kennedy, J., joined by Ginsburg, J., concurring in part, concurring in judgment in part, and dissenting in part); id. at 812-31 (Thomas, J., joined by Rehnquist, C.J., and Scalia, J., concurring in judgment in part and dissenting in part).
In light of the viewpoints represented in the case, it is likely that eventually the Court will state more clearly that cable television providers, like newspapers, are entitled to full standard First Amendment protection. The arguments regarding scarcity and distribution through the public airways, which justified the lower standard of review in Red Lion and League of Women Voters, do not apply in any meaningful way to cable television as it has evolved. This is true even for satellite cable systems that technically do use the public airways, or even cable television whose cable access is regulated by the government. Arguments regarding the ability of cable television to intrude into the privacy of one’s home, like radio and television intruding as in FCC v. Pacifica, discussed at § 30.1.4.2 n.121, can be dealt with under standard First Amendment doctrine viewing the privacy rationale as a content-neutral justification for regulation, triggering the intermediate scrutiny standard of Pacifica.

In some cases, the Court has made it relatively easy for a state to create a communications forum that will be characterized as a non-public forum, in which case under standard First Amendment doctrine non-viewpoint discriminatory regulations will be given only rational basis review. For example, in Arkansas Educational Television Commission v. Forbes,216 the Court held that a state agency that operated TV stations had opened a non-public forum rather than a designated public forum when it sponsored a political debate among candidates for Congress. Justice Kennedy said that the public forum doctrine should not be extended in a mechanical way to the very different context of public television. He added that the government does not create a designated public forum when it does no more than reserve eligibility for access to a particular class of speakers, whose members must then, as individuals, obtain permission. Accordingly, it was valid to exclude candidate Forbes for lack of public interest because this was not based on the speaker's viewpoint and was otherwise reasonable in light of the purpose to which the property was being put. Justice Stevens, dissenting with Justices Souter and Ginsburg, said that the importance of avoiding viewpoint-based decisions relating to political debates indicates that the state agency should be required to use and adhere to pre-established, objective criteria for determining who among qualified candidates may participate.

§ 30.3.2 Intermediate Scrutiny with Bite: Regulations of Commercial Speech

Commercial speech relates to economic transactions, including promotional ads as well as offers.217 It is not converted into noncommercial speech by occurring in educational, political, or religious contexts (e.g., an ad for a church), but educational, political, or religious speech is analyzed under standard First Amendment doctrine, as discussed at § 30.3.2 nn.231-32. Until 1975, commercial speech received no First Amendment protection. Thus, under Equal Protection and Due Process Clause analysis, only rational basis scrutiny was given to the regulation of ads, as they involved economic regulation of business triggering rational review, as in 1942 in Valentine v. Chrestensen.218 Similar treatment was given to offers made by door-to-door magazine sellers, and a ban on ads for

---

216 523 U.S. 666, 677-83 (1998); id. at 983-84 (Stevens, J., joined by Souter & Ginsburg, JJ., dissenting).

optical appliances.\textsuperscript{219} The result was that barriers to commercial speech were easily erected.

At first, the change in perspective came in small increments. In 1972, health concerns allowed a ban on the broadcast of cigarette ads in \textit{Capital Broadcasting Co. v. Acting Attorney General}.\textsuperscript{220} In 1973, in \textit{Pittsburgh Press Co. v. Pittsburgh Commission on Human Relations},\textsuperscript{221} a state was allowed to ban gender discrimination in help-wanted newspapers ads based on \textit{Valentine v. Chrestensen}, but four Justices dissented from that result. However, the cases indicated some First Amendment concerns might be applicable. The transitional case was \textit{Bigelow v. Virginia},\textsuperscript{222} decided in 1975. The Court said \textit{Chrestensen} did not hold that all ads are unprotected \textit{per se}. Justice Blackmun wrote that even commercial ads deserve some First Amendment protection when, unlike the ads in \textit{Chrestensen} and \textit{Pittsburgh Press}, they contain factual information with a clear public interest. Only Justices White and Rehnquist, two deference-to-government Holmesians, were in dissent.

The decisive case was \textit{Virginia State Board of Pharmacy v. Virginia Citizens Consumer Council},\textsuperscript{223} decided in 1976. There the Court held that a state cannot bar licensed pharmacists from publishing truthful information on drug prices. Justice Blackmun said there is a public interest in the flow of truthful information concerning lawful activities, including speech that merely proposes a commercial transaction. If information is not in itself harmful, the best means for persons to perceive their own best interests is to open the channels of communication. Less than strict review can be applied to commercial speech, however, because truth may be more easily verified by the disseminator and there is little likelihood of chill because ads lead to commercial profits. Thus, under \textit{Virginia State Board}, content regulation of commercial speech that is not misleading or related to unlawful activity must directly advance a substantial governmental interest and not be more extensive than necessary. Only Justice Rehnquist dissented.

\textit{Virginia State Board} was soon extended to permit price advertising for routine legal services in \textit{Bates v. State Bar of Arizona}, and a letter from a civil rights group to potential class action plaintiffs in \textit{In re Primus},\textsuperscript{224} although in-person solicitation by a lawyer at a hospital bedside could still be

\textsuperscript{220} 405 U.S. 1000 (1972) (holding that Congress may ban cigarette ads in any medium because of its power to regulate commerce).

\textsuperscript{222} 421 U.S. 809, 818-26 (1975); \textit{id.} at 831-36 (Rehnquist, J., joined by White, J., dissenting).

sanctioned in *Ohralik v. Ohio State Bar Association.* In other decisions on commercial speech by lawyers, the instrumentalist Court held in *In re R.M.J.* that it was an invalid time, place, and manner restraint to bar attorneys from advertising their areas of practice in unapproved words, or to bar mailing cards to others than lawyers, clients, former clients, personal friends, and relatives. The Court said that the law at issue in the case was a more extensive restriction on commercial speech than reasonably necessary to further a substantial governmental interest in preventing deception. In 1977, *Virginia State Board* was extended to real estate sales; however, this did not bar a state from preventing misleading commercial speech.

More important, perhaps, than such results was the creation of an analytical methodology for dealing with regulation of commercial speech. That approach was summarized in 1980 by Justice Powell in *Central Hudson Gas & Electric Corp. v. Public Service Comm’n,* when he wrote:

> In commercial speech cases, then, a four-part analysis has developed. At the outset, we must determine whether the expression is protected by the First Amendment. For commercial speech to come within the provision, it at least must concern lawful activity and not be misleading. Next, we ask whether the asserted governmental interest is substantial. If both inquires yield positive answers, we must determine whether the regulation directly advances the governmental interest asserted, and whether it is not more extensive than is necessary to serve that interest.

Four aspects of the *Central Hudson* test are important. First, under this approach, minimum rational review would be given to regulations of unlawful, false, or misleading ads, since, without any special First Amendment protection, they would be viewed as standard economic regulations subject to rational review under the Equal Protection and Due Process Clauses. Second, as phrased, the test for commercial speech is more stringent than regular intermediate scrutiny, since the test requires that the regulation directly advance the government’s interest, rather than merely substantially advance the government’s interest. This increase in review is what makes the *Central Hudson* test an example of intermediate review with bite as described in the “base plus six” model of review, discussed at §§ 7.2.1 nn.36-37. Third, commercial speech cases do involve a less rigorous form of scrutiny than traditional First Amendment doctrine for content-based regulations of speech, which ordinarily trigger strict scrutiny. Fourth, the *Central Hudson* test lowers First Amendment

---

227 Linmark Associates, Inc. v. Township of Willingboro, 431 U.S. 85 (1977) (states cannot bar "For Sale" or "Sold" signs on real estate to reduce panic selling by white owners in a racially integrated neighborhood because the state cannot suppress facts to keep people from acting in ways the government thinks irrational); Friedman v. Rogers, 440 U.S. 1 (1979) (upholding a state ban on the use of trade names by optometrists).

228 447 U.S. 557, 566 (1980).

protection only for content-based regulations of commercial speech. Content-neutral time, place, and manner restrictions of commercial speech, like content-neutral regulations of fully protected speech, are still tested under basic intermediate scrutiny, which requires only that they substantially serve a significant public interest, and that they leave open ample alternative channels for communication, with no requirement of direct advancement.

Applying the *Central Hudson* standard of review, Justice Powell held that a state violated the First and 14th Amendments when, to conserve energy, it completely banned promotional advertising by electrical utilities. Such communications might include ads for electric devices that produce overall energy conservation. Thus, the regulation was more extensive than necessary. Disagreeing with the standard of review applicable to the case, Justices Brennan and Blackmun wanted strict scrutiny of restrictions on commercial speech that is accurate and concerns lawful activity.\(^\text{230}\) Today, however, the majority still applies the test of *Central Hudson*.

In applying *Central Hudson*, care must be taken to distinguish commercial from non-commercial speech. For example, it was held in *Consolidated Edison Co. of New York, Inc. v. Public Service Commission of New York*\(^\text{231}\) that a state may not bar a utility from including a political message with its bills. Justice Powell distinguished *Central Hudson* because the speech here involved a political message, rather than commercial speech. Thus, under standard First Amendment doctrine, a restriction on the content of noncommercial speech, i.e., a content-based restriction, triggered strict scrutiny. In *Board of Trustees of the State University of New York v. Fox*,\(^\text{232}\) the Court concluded that those aspects of university regulations that banned corporations from doing product demonstrations in campus dormitory rooms, such as “tupperware parties,” were targeting commercial speech. Both the majority and the dissent noted, however, that to the extent the regulation also prohibited a wide range of fully protected speech, e.g., speech in a dormitory room, such as consultation with a lawyer or doctor, even though it was speech for which the speaker received a profit, standard First Amendment doctrine would apply to that part of the regulation. The majority remanded the case for determination of whether the statute could be held constitutional as applied to non-commercial speech, while the dissent concluded that the statute was unconstitutional on that ground.

Unlike use of the “substantial overbreadth” doctrine in other areas of First Amendment law, discussed at § 29.6.1.5, a statute whose overbreadth consists of unlawful restriction of commercial speech will not be facially invalidated on that ground. As the Court noted in *Bates v. State Bar of Arizona*,\(^\text{233}\) if a person has standing to challenge the application of a commercial speech regulation to himself or herself, that person can naturally also challenge the facial validity of the regulation

---

\(^{230}\) *Central Hudson*, 447 U.S. at 566-72; *id.* at 574-79 (Blackmun, J., joined by Brennan, J., concurring in the judgment).

\(^{232}\) 492 U.S. 469, 482-86 (1989); *id.* at 487-88 (Blackmun, J., joined by Brennan & Marshall, JJ., dissenting).

insofar as it might apply to noncommercial speech in which that person is also engaged. But an individual cannot use the overbreadth doctrine to challenge overbreadth as to other individuals engaging in other kinds of speech. The Court explained that because commercial speech is “hardy,” since individuals have an economic incentive to engage in such speech, the overbreadth doctrine is not needed to ensure such speech is not chilled.

The post-instrumentalist Court has given commercial speech at least as much protection as did the instrumentalist Court. And several Justices continue to insist that commercial speech deserves the same high level of protection given to non-commercial speech. The recent cases illustrate that the current Court has been increasingly vigilant in applying the *Central Hudson* test.

With respect to professionals, a state cannot ban all certification claims. However, as in *Peel v. Attorney Registration & Disciplinary Commission of Illinois*, a state may ban a letterhead as misleading, such as "Certified specialist by National Board of Trial Advocacy." Although a ban on in-person solicitation by attorneys can be valid, as in *Ohrlik v. Ohio State Bar Association*, discussed at § 30.3.2 n.225, a ban on in-person solicitation by accountants was declared unconstitutional in *Edenfield v. Fane*. The Court distinguished *Ohrlik* on the ground that lawyers are trained in persuasion so there is a danger of overreaching, whereas the typical client of an accountant is a person experienced in business and so solicitation by a CPA is not inherently conducive to overreaching. In another case dealing with lawyer advertising, *Florida Bar v. Went For It, Inc.*, Justice O'Connor wrote for a 5-4 Court that a rule forbidding solicitation of accident victims during a 30-day period after the accident was valid under the *Central Hudson* test. Justice Kennedy's dissent, with Justices Stevens, Souter, and Ginsburg, said the rule prejudiced victims to vindicate a desire for more dignity in the legal profession. Distinguishing *Florida Bar* on grounds that the need for immediate counsel is more pressing for criminal defendants than for accident victims, courts have ruled that a 30-day ban on direct-mail solicitation of criminal defendants is unconstitutional.

In some cases the Court has upheld a government regulation as meeting the *Central Hudson* test. For example, in 1986, in *Posadas de Puerto Rico Associates v. Tourism Company of Puerto Rico*, the Court held that Puerto Rico may restrict ads for casino gambling aimed at residents. Justice Rehnquist said the law related to commercial speech that concerned a lawful activity in Puerto Rico and was not misleading or fraudulent. However, he rejected the idea that the legislature had to

237 See, e.g., Ficker v. Curran, 119 F.3d 1150, 1151-56 (4th Cir. 1997).

promulgate additional speech which discourages gambling rather than suppress speech designed to encourage it. If gambling could be prohibited, said Justice Rehnquist, the government could allow the conduct, but reduce the demand through restrictions on ads. As Rehnquist stated, “In our view, the greater power to completely ban casino gambling necessarily includes the lesser power to ban advertising of casino gambling.”

This aspect of Posadas is inconsistent with standard doctrine under the First Amendment, Equal Protection Clause, Due Process Clause, and other clauses in the Constitution. Under standard doctrine, even if the government can completely ban some conduct, if the means chosen to regulate the conduct violate free speech rights, or equal protection rights, or other constitutional prohibitions, the government action is unconstitutional. For example, as discussed at 26.3.1.2 nn.363-67, in Craig v. Boren, the government could engage in the “greater power” of banning all persons less than 21 years old from buying alcohol, but could not engage in the “lesser power” of banning only males below 21 from buying alcohol, but permit women 18-21 years old to buy low-alcohol beer, as that constituted gender discrimination. Following Posadas, commentators almost uniformly criticized this aspect of the decision. The Supreme Court followed suit, rejecting this aspect of Posados ten years later in 44 Liquormart, Inc. v. Rhode Island, discussed at § 30.3.2 nn.246-48.

While the doctrine as phrased in Posadas is inconsistent with standard constitutional principles, one author has argued that it may reflect an insight useful to keep in mind when applying the Central Hudson test. Where (1) the state could ban the sale of some product, like cigarettes, but (2) the state has reasons to allow the sale, but with misgivings, and if (3) speech by the seller could exacerbate those legitimate governmental concerns, then (4) the state might reasonably think to offer permission to sell the product on condition that the seller not engage in the damaging speech. The author noted, “This is the core insight behind the Court's assertion in Posadas that ‘the greater power to completely ban casino gambling necessarily includes the lesser power to ban advertising of casino gambling.’ . . . It might be truer . . . to say that a power to withhold legal authority to engage in a particular sort of commercial transaction entails the power to permit such transactions on the condition that the participants not promote the transaction in specified ways, so long as the purpose for imposing the speech-restrictive condition is the same as the purpose the state would have for barring the transaction entirely, and so long as imposing the speech-restrictive condition does not unduly harm interests of the speech's audience.”

Dissenting in Posadas, Justice Brennan, with Justices Marshall and Blackmun, said that when Central Hudson is applied, the state should be required to prove each element, e.g., that substantial harmful effects will result if residents engage in gambling, that the ban on ads will directly advance an interest in controlling those effects, and that alternative measures would inadequately serve the state's interests in controlling the harmful effects allegedly associated with casino gambling. Justice Brennan did not believe that the government had met its burden in this case. Since Central Hudson

240 Id. at 795-96.
is a version of an intermediate scrutiny approach, the government does have the burden on making each of these showings, as Justice Brennan indicated. In his dissent, Justice Stevens, joined by Justices Marshall and Blackmun, concluded the regulation on speech was a prior restraint, and unconstitutional for that reason. The majority opinion did not consider the prior restraint issue since it was not raised in the courts below or in arguments to the Supreme Court.241

One year after Posadas, in 1987 in San Francisco Arts & Athletics v. Olympic Committee,242 the Court upheld a congressional grant to the United States Olympic Committee of the right to prohibit commercial and promotional uses of the word "Olympic" because the commercial value of the word was the product of the Committee's talents and energy. Justice Brennan, in dissent, said the statute was overbroad in creating exclusive rights that limited non-commercial speech, such as using the term to promote non-profit events.

A third case upholding bans on commercial speech was decided in 1993. In United States v. Edge Broadcasting Co.,243 the Court sustained a congressional ban on the broadcast of lottery advertisements, except as to ads for their own state's lottery, as applied to a station in North Carolina, which had no lottery, but over 90% of whose listening audience was located in Virginia, which did have a lottery. One majority – Justices White, joined by Chief Justice Rehnquist, and Justices O'Connor, Scalia, and Thomas – said that the government's interest was directly served when the entire broadcast industry in North Carolina was considered. A different majority – Justice White, joined by Chief Justice Rehnquist, and Justices Kennedy, Souter, and Thomas – said that the government’s interest was directly served even when only Edge Broadcasting was considered because its audience accounted for 11% of all radio listening among a potential audience of 127,000. Justice Stevens, dissenting with Justice Blackmun, said that the change in public attitudes toward state-run lotteries undermined any claim that the state's interest in discouraging citizen participation outweighed the station's First Amendment right to play the advertisement, and the public’s right to receive truthful, non-misleading information about a perfectly legal activity conducted in a neighboring state.

In 1993, however, the Court began a string of cases in which it struck down regulations of commercial speech. In City of Cincinnati v. Discovery Network,244 the Court held that a city violated the First Amendment when it refused for reasons of safety and aesthetics to allow the distribution of commercial publications through free-standing newsracks on public property, although it allowed

241 Posadas, 478 U.S. at 351-58 (Brennan, J., joined by Blackmun & Marshall, JJ., dissenting); id. at 359-60 (Stevens, J., joined by Marshall & Blackmun, JJ., dissenting); id. at 348 n.11 (prior restraint issue not raised by appellant in courts below or to the Supreme Court).

244 507 U.S. 410, 418-31 (1993); id. at 431-38 (Blackmun, J., concurring); id. at 438-46 (Rehnquist, C.J., joined by White & Thomas, JJ., dissenting).
newspapers to be distributed in that manner. Applying *Central Hudson*, Justice Stevens wrote that the city failed to establish a reasonable fit between its legitimate interests in eliminating clutter and its choice of a limited and selective prohibition of newsracks as the means chosen to serve those interests. Justice Stevens said the distinction between commercial and non-commercial speech bears no relationship whatsoever to the particular interests of the city. Nor can the regulation be upheld as a content-neutral time, place, or manner restriction because the basis for the regulation was the difference in content between ordinary newspapers and commercial speech. Justice Blackmun, concurring, would give full First Amendment protection to commercial speech. Chief Justice Rehnquist, dissenting with Justices White and Thomas, said that a city may stop short of fully accomplishing its objectives in relation to commercial speech, and this law directly advanced the city's interests because it would decrease the number of newsracks on city corners.

In 1995, the Court held in *Rubin v. Coors Brewing Co.*\(^{245}\) that the federal government's ban on beer labels that display alcohol content violates the First Amendment because the government failed to meet its burden of showing under *Central Hudson* that the ban advanced the government's interest in a direct and material way. The government's interest was in preventing strength wars. However, the ban was limited so that brewers remained free to disclose alcohol content in ads, and though they had to disclose content for wines and spirits, brewers could signal high alcohol content by using the term "malt liquor." Thus, there was little chance that the ban could directly and materially advance its aim, while other provisions of the same act directly undermined and counteracted its effects. Indeed, said the Court, there was an overall irrationality in the government's regulatory scheme. Justice Stevens, concurring, said the First Amendment bars the government from restricting the flow of accurate information because of a perceived danger of that knowledge. Congress could directly limit the alcoholic content of malt beverages, but Congress may not accomplish that purpose through a policy of consumer ignorance, at the expense of the free-speech rights of both sellers and purchasers.

In 1996, an even more significant case occurred. In *44 Liquormart, Inc. v. Rhode Island*\(^{246}\), the Court clarified the interpretation and application of *Central Hudson*, and by doing so repudiated one aspect of the *Posadas* case. The Liquormart had challenged a Rhode Island law that barred advertising the price of alcoholic beverages offered for sale in the state. The state sought to justify its law on the ground that it directly advanced the state's interest in promoting temperance, and was no more extensive than necessary. The judgment of the Court was first that the 21st Amendment does not allow states to ignore their obligations under other provisions, such as the First Amendment. Part IV of the opinion of Justice Stevens, joined by Justices Kennedy and Ginsburg, stated that to sustain a blanket ban on commercial speech, the state must show that its restrictions advance a substantial interest to a material degree – here, that a price-ad ban would significantly reduce alcohol consumption – and that its restriction on speech is no more extensive than necessary. Of course, in this context "necessary" does not mean the least restrictive means. It requires only that the state must justify its restrictions as reasonable in the intermediate scrutiny sense of "narrowly

\(^{245}\) 514 U.S. 476, 483-91 (1995); id. at 491-92 (Stevens, J., concurring in the judgment).

\(^{246}\) 517 U.S. 484, 501-16 (1996) (Stevens, J., announcing the judgment of the Court, in Part IV of which was joined by Kennedy & Ginsburg, JJ.).
tailored to achieve the desired objective." The Court also noted that the doctrine of overbreadth does not apply to commercial regulations because commercial speech is regarded as a hardy plant.

In the case at bar, there was no fact finding or evidentiary support to show that the ban on price-ads would significantly advance the state's interest in promoting temperance, and impermissible speculation or conjecture would be required to reach that conclusion. Justice Stevens said that even under the less than strict standard usually applied in commercial speech cases, the state had failed to establish a "reasonable fit" between its speech ban and its temperance goal. Justice Stevens noted that a state legislature does not have the broad discretion to suppress truthful, non-misleading information for paternalistic purposes that the Posadas majority was willing to tolerate. Speech restrictions cannot be treated as simply another means that the government may use to achieve its ends. Rejecting Posadas on this point, he concluded that a power to ban alcoholic beverages does not include a lesser power to burden the freedom of speech by restricting ads offering them for sale.

Justice Thomas expressed an even more speech-protective view. He said that an attempt to keep the legal users of a product or service ignorant in order to manipulate their choices in the marketplace is per se illegitimate and there is no need to apply the balancing test of Central Hudson.247

Justice O'Connor, concurring in the judgment with Chief Justice Rehnquist and Justices Souter and Breyer, took a more moderate position. She said that the law failed the final prong of Central Hudson in that it was more extensive than necessary to serve the state's interest. She said that if the target is higher prices to reduce consumption, the regulation imposed an unnecessary bar on speech to achieve it because the fit between ends and means is not narrowly tailored since other means are available, such as minimum prices and/or increased taxes. She observed that subsequent to Posadas, the Court has taken a closer look at the fit between a state's professed goal and the speech restriction put into place to further it, requiring, as is appropriate at intermediate scrutiny, a substantial relationship between means and ends, not merely a rational relationship, as suggested by the Court's opinion in Posadas.248

In Greater New Orleans Broadcasting Association, Inc. v. United States,249 the Court held that Congress could not bar the broadcast advertising of lotteries and casino gambling in Louisiana, where such gambling is legal. Justice Stevens wrote for the Court that the federal law contained so many exceptions, such as for gambling by Indian casinos, lotteries run by government or non-profit organizations, and "occasional and ancillary" commercial casinos, that the regulation failed the third and fourth part of the Central Hudson test. Specifically, the speech restriction was not shown directly and materially to advance the government's interest in reducing the social cost of gambling or assist states in restricting gambling within their borders.

247 Id. at 518 (Thomas, J., concurring in part and concurring in the judgment).

248 Id. at 529-32 (O'Connor, J., joined by Rehnquist, C.J., and Souter & Breyer, JJ., concurring in the judgment).

In *Thompson v. Western States Medical Center*, a 5-4 Court held that a ban on advertising or promoting particular compounded drugs (drugs tailored to the needs of an individual patient) failed the *Central Hudson* test because it was more extensive than necessary to service the government’s interests. The government said it was trying to prevent large-scale manufacturing of compound drugs and that advertising was serving as a proxy. The Court replied that there were non-speech-related means of drawing that line, including a ban on commercial scale manufacturing, capping the amount of compounded drugs druggists may sell in a given period of time, barring offering the drugs at wholesale, or requiring a prescription or a history of receiving a prescription. The dissent concluded that the government had met their burden, and was composed of deference-to-government Holmesian Chief Justice Rehnquist, and Justices Stevens, Ginsburg, and Breyer, liberal instrumentalists who might support on policy grounds this kind of government drug regulation.

§ 30.4 Content-Based Regulations That Trigger Their Own Kind of Strict Scrutiny

§ 30.4.1 Loose Strict Scrutiny Standards: The Racial Redistricting Cases and Possibly Cable/Satellite Television Regulation

As discussed at § 7.2 nn.38-42 & Table 7.2, under the “base plus six” model, there is a version of strict scrutiny that adopts the strict scrutiny requirement of a compelling government interest and a direct relationship between means and ends, but rejects the strict scrutiny requirement of a least restrictive alternative in favor of the intermediate requirement of the regulation merely having to be not substantially more burdensome than necessary. Because this level adopts two of the three levels of strict scrutiny, but waters down element three to an intermediate level of inquiry, this additional level can be called "loose" strict scrutiny. As discussed at § 26.2.1.5 nn.278-81, a recent use of this standard of review by the Supreme Court occurred in the Equal Protection case of *Bush v. Vera*. In that case, though generally applying a strict scrutiny compelling governmental interest analysis, the majority, per Justice O’Connor, “reject[ed], as impossibly stringent, the District Court’s view of the narrow tailoring requirement, that ‘a district must have the least possible amount of irregularity in shape, making allowances for traditional districting criteria.’” Instead, the Court adopted the intermediate prong three requirement that racial redistricting not be "substantially more [burdensome] than is ‘reasonably necessary.’”

The Court has never applied this standard directly in any First Amendment case. However, as noted at § 30.3.1 nn.210-15, the Court’s recent opinions regarding the proper standard of review to apply to regulations of cable television are problematic. The Court’s recent cases have failed to produce

---

252 Id. at 977, 979.
any clear standard of review in cable television cases.\textsuperscript{253} Part of the problem may lie in the Court’s focus upon basic intermediate review or strict scrutiny as the only two heightened scrutiny choices. Some members of the Court perhaps think that strict scrutiny, applicable to newspapers and books,\textsuperscript{254} is too rigorous,\textsuperscript{255} while other members of the Court may feel that intermediate review, applicable to over-the-air radio and television,\textsuperscript{256} is simply not rigorous enough.\textsuperscript{257}

Under the “base plus six” model of levels of review, perhaps this impasse can be resolved. Like regulations of commercial speech, cable television regulation may be an appropriate area for intermediate review with bite. Alternatively, it might be an area appropriate for loose strict scrutiny, following the model of Justice O’Connor’s opinion in \textit{Bush v. Vera}. For example, Justices Kennedy and Ginsburg might be able to reach a compromise with the plurality in \textit{Denver Area}, including Justices Breyer, Stevens, and Souter, discussed at § 30.3.1 nn.214-15, to command a majority for loose strict scrutiny review. Or perhaps Justices Kennedy and Ginsburg will unite with Justices Scalia and Thomas, and perhaps either new Chief Justice Roberts or Justice Alito, to command a majority for traditional strict scrutiny. In either event, a majority of the Court adopting some level of scrutiny for cable television regulation would aid predictability and certainty in the law.

\section*{§ 30.4.2 \hspace{1em} Basic Strict Scrutiny: Campaign Finance and Speech Regarding Elections}

In the realm of speech regarding elections, the Court has focused on three situations: regulations of contributions and expenditures, disclosure requirements, and regulating the process of nominating and electing candidates. Fundamental First Amendment interests are implicated in each area, and the government thus has the burden of justifying its restrictions, which typically are reviewed by applying strict scrutiny. These cases have their own special “feel,” however, and, beginning with the foundational modern case in 1976 of \textit{Buckley v. Valeo},\textsuperscript{258} resort to explicit strict scrutiny

\begin{multicols}{3}

\textsuperscript{255} See Denver Area, 518 U.S. 727, 739-41 (1996) (Breyer, J., joined by Stevens, J., O’Connor, J., & Souter, J., plurality opinion); \textit{id}. at 777-78 (Souter, J., concurring).

\textsuperscript{257} See Denver Area, 518 U.S. at 820-23 (1996) (Thomas, J., joined by Rehnquist, C.J., & Scalia, J., concurring in the judgment in part and dissenting in part) (criticizing adoption of an intermediate standard of review for cable television regulation, rather than strict scrutiny.); \textit{id}. at 784-87 (Kennedy, J., joined by Ginsburg, J., concurring in part and dissenting in part) (suggesting strict scrutiny is the proper standard to use, at least in the context of “public and leased access programmers whose speech is put at risk nationwide by these laws.”).

\end{multicols}
language has not been a priority in the Court’s opinions. Further, as the cases have developed, the Court has drawn a distinction between limitations on expenditures versus limitations on contributions in terms of the level of scrutiny to be applied. As discussed at § 30.4.2.1 nn.294-303, this development reached a climax in 2003, with a 5-Justice majority of the Court in *McConnell v. Federal Election Commission*\(^{259}\) clearly holding that a lower level of scrutiny, some version of intermediate scrutiny, should be used for limitations on contributions, while strict scrutiny was still appropriate for limitations on expenditures.

Cases involving disclosure requirements were dealt with in *Buckley* under a strict scrutiny, direct relationship, least restrictive alternative approach, as discussed at § 30.4.2.2. Even under this standard, however, the disclosure requirements were viewed as constitutional. Thus, the level of review for disclosure requirements has not been a matter of much debate, as disclosure requirements tend to survive strict scrutiny anyway. Under the reasoning of the 5-Justice majority in *McConnell*, however, since disclosure requirements are only minimal burdens on free speech rights, an argument can be made that they should also trigger the intermediate scrutiny used for contribution limitations.

Cases involving speech relating to nominating and electing candidates reflect standard strict scrutiny language. However, as discussed at § 30.4.2.3 (electing members of the legislative and executive branches) and § 30.4.2.4 (electing state court judges), the Court has tended to defer in these cases more to legislative predictions of potential future consequences than is typical under a strict scrutiny approach. For this reason, these elections cases, as well as the contribution, expenditure, and disclosure cases, are included here as a special category of First Amendment doctrine, rather than included at § 29.6 as merely another specific substantive area of standard First Amendment review. These cases all involve in practice something less rigorous than a traditional strict scrutiny approach.

As the cases have been decided, there have been substantial differences among the Justices in terms of what they think is going on in the political process. Overall, liberal Justices have been more willing to find that regulations in these areas are narrowly tailored to advance compelling interests, such as preventing fraud and corruption. Further, the more liberal Justices have been the ones more willing to apply intermediate review to certain regulations in this area. More conservative Justices have typically ruled in favor of free speech interests held by the people, candidates, political parties, and other political groups. Usually they have identified less speech-infringing ways for dealing with the concerns that have led to the government restrictions. For example, while *Buckley v. Valeo* upheld limits on contributions to candidates, a call for overruling that case was made in 2000 by Justices Scalia, Kennedy, and Thomas in *Nixon v. Shrink Missouri Government PAC*\(^{260}\). In 2003, in *McConnell v. Federal Election Commission*,\(^{261}\) Chief Justice Rehnquist joined Justice Kennedy’s dissent, joined also in part by Justices Scalia and Thomas, again rejecting the *Buckley* framework.

\(^{259}\) 540 U.S. 93 (2003).

§ 30.4.2.1 Speech Relating To Campaign Financing: Contributions and Expenditures

Most constitutional law relating to limits on campaign contributions and expenditures grows directly from *Buckley v. Valeo.*262 The Court’s *per curiam* opinion in that case began by pointing out that the federal statutory limits on contributions have not been shown to prevent candidates and political committees from amassing the resources needed for effective advocacy. Thus, the limitation on contributions could be regarded as a less severe restriction on freedom of expression than limits on expenditures. The Court then noted:

This sentence has been the source of much confusion ever since. Each of the freedom of association cases cited by the Court as an example of the kind of scrutiny appropriate for a “significant interference” with protected rights is typically regarded as a strict scrutiny case. *Cousins* involved a burden on the freedom of association rights of the Democratic Party, with the Court stating that the “interest of the State must be compelling” to justify the regulation.264 *Button* involved a case burdening the freedom of association of the NAACP, with the Court stating that the government must regulate with “narrow specificity” and “precision of regulation.”265 *Shelton* involved the associational rights of teachers, with the Court applying a least restrictive alternative approach to hold the regulation unconstitutional because “the end can be more narrowly achieved.”266 Yet, because each case was decided before the Court’s more careful attention to precise language regarding the standards of review, which began in 1976 with clear adoption of the intermediate scrutiny standard for cases of gender discrimination in *Craig v. Boren,* discussed at § 26.3.1 nn.363-67, some loose language in the opinions, on the pages cited in the *Buckley* quote above, occasionally talked of “significant” government interests, not “compelling interests,” and of “closely drawn” statutes, not “narrow tailoring,” *i.e.*, intermediate scrutiny language, not strict scrutiny.

In *Buckley,* the contribution limit of $1,000 to any single candidate per election, which has since been amended to $2,000, and the various other limits, such as an overall annual limit of $25,000 by any contributor, were justified by the government’s compelling interest in limiting the actuality and appearance of corruption resulting from large individual financial contributions. Regarding the narrowly tailoring requirement, the Court decided that Congress was entitled to conclude that

---

263 *Id.* at 25.

disclosure of contributions was only a partial measure and that contribution ceilings were a "necessary" concomitant, focused "precisely" on the problem of corruption, thus satisfying the strict scrutiny overinclusiveness test of having no unnecessary overinclusiveness, and did not undermine to "any material degree" the ability for "robust" political debate, satisfying the restrictiveness aspect of strict scrutiny review. The "overinclusiveness" and "restrictiveness" aspects of First Amendment review are discussed at § 29.4.4.3 nn.149-53. Thus, in Buckley, the contribution limits were actually upheld not because a lower standard of scrutiny was applied, but because the burdens on the rights of contributions could survive "the rigorous standard of review established by our prior decisions."267

The expenditures limits were not upheld under strict scrutiny. Interpreting the Act to bar more than $1,000 spent annually for communications in express terms that advocate the election or defeat of a clearly identified candidate for federal office, the opinion concluded that the government’s compelling interests in preventing corruption and the appearance of corruption were not adequately advanced by the statute’s means. The Act was not narrowly tailored because there was no limit on persons and groups spending as much as they wished to promote a candidate and the candidate’s views, so long as they did not in express terms advocate his or her election. Further, the law limited expenditures for express advocacy of candidates made totally independently of the candidate and his or her campaign. This was a problem because, as the Court noted, “Advocacy of the election or defeat of candidates for federal office is no less entitled to protection under the First Amendment than the discussion of political policy generally or advocacy of the passage or defeat of legislation.”268

The federal Act also sought to limit expenditures by a candidate from his or her own funds. The Court said that the government’s primary interest in the prevention of actual and apparent corruption of the political process did not support this limitation. Further, the Court rejected the proposition that the government may restrict the speech of some elements in our society in order to enhance the relative voice of others.269 Thus, general limits on campaign expenditures must also fall.

The opinion continued by upholding required public disclosure of contributions to candidates, even as to minor parties and independents, where the record did not reflect the kind of focused and insistent harassment that existed in NAACP v. Alabama.270 This aspect of Buckley regarding disclosure requirements is discussed at § 30.4.2.2 nn.307-12. The opinion concluded by upholding the public financing of presidential election campaigns, including provisions that require candidates who accept public financing not to incur expenses in excess of a specified amount and not to accept private contributions except to the extent that the fund produced by income tax returns is insufficient to provide the full financial entitlement. The Act created a Presidential Election Campaign Fund, financed from individual taxpayers who on their income tax returns may authorize payment to the

267 424 U.S. at 25-29.
268 Id. at 48.
269 Id. at 48-49.
fund of one dollar of their tax liability in the case of an individual return or two dollars in the case of a joint return, which was subsequently amended to three dollars for each individual.

Justice White dissented from striking down expenditure limitations, saying they were necessary to prevent evasion of the contribution limits and, with respect to individual expenditures, help assure that only individuals with a modicum of support from others will be viable candidates. Justice Marshall would allow the government to pursue an interest in promoting both the reality and the appearance of equal access to the political arena by placing a limit on the amount a candidate may contribute to his or her own campaign. Justice Blackmun was not persuaded that the Court made a principled distinction between the contribution limitations and the expenditure limitations. Chief Justice Burger dissented from sustaining provisions for the disclosure of small contributions, for limitations on contributions, and for public financing of President campaigns, which he called an impermissible intrusion into the traditionally political process. Justice Rehnquist said the eligibility requirements for minor parties to participate in public financing of presidential elections discriminate so favorably to the two major parties that they violate both the First and Fifth Amendments.271

Given five Justices questioning aspects of *Buckley*, the stage was set for further decisions on government restrictions relating to campaign contributions and expenditures. The first such case was *First National Bank of Boston v. Bellotti*.272 There the Court struck down a Massachusetts statute that forbade banks and business corporations from making contributions or expenditures for the purpose of influencing the vote on any question submitted to the voters, other than one materially affecting the property, business, or assets of the corporation. Applying strict scrutiny, Justice Powell noted that there had been no showing that the voice of corporations had been overwhelming or even significant in influencing referenda in Massachusetts. With respect to protecting shareholders from the use of corporate resources with which they disagree, the law was underinclusive in reaching only referenda and not legislation or expression of views, and it was overinclusive in prohibiting expenditures even if the shareholders unanimously authorized the contribution or expenditure.

Justice White dissented, with Justices Brennan and Marshall. He said the law substantially advances an overriding interest in preventing corporate domination of the referendum process and it helps assure that shareholders are not compelled to support and financially further beliefs with which they disagree where the issue does not materially affect the business, property, or other affairs of the corporation. Justice Rehnquist dissented on the grounds that while corporations have due process rights regarding their property, the liberty part of due process should be limited to natural persons, not corporations, and thus there is “no basis for concluding that the liberty of a corporation to engage in political activity with regard to matters having no material effect on its business is necessarily incidental to the purposes for which the Commonwealth permitted these corporations to be

\[271\] *Id.* at 235 (Burger, C.J., concurring in part and dissenting in part); *id.* at 257 (White, J., concurring in part and dissenting in part); *id.* at 286 (Marshall, J., concurring in part and dissenting in part); *id.* at 760 (Blackmun, J., concurring in part and dissenting in part); *id.* at 760 (Rehnquist, J., concurring in part and dissenting in part)

organized or admitted within its boundaries.” This analysis that corporations have only limited First Amendment rights against states, because of this liberty limitation on what rights are incorporated through the Due Process Clause, has not been adopted by any other Justice on the Court in modern times, although it does reflect an aside made, as Justice Rehnquist noted, in an old 1906 case,273 and the view has some historical support, and legislative and executive practice support, as noted at § 27.4.2.1 n.306.

Two cases on contribution limits were decided in 1981. In California Medical Association v. Federal Election Commission,274 the Court upheld the federal Act’s $5000 limitation on contributions by a political committee, as applied to a contribution by the medical association to its multi-candidate political action committee. Four Justices said that the Act’s limitations on contributions were constitutional under Buckley. Justice Blackmun said the Act was constitutional applying a clear strict scrutiny approach. Four Justices dissented on grounds that under the Act Congress had not authorized plaintiffs to sue in a declaratory judgment action where such an action would delay or disrupt on-going enforcement proceedings and impose extra burdens on the court system, and thus the case should have been dismissed on jurisdictional grounds.

In Citizens Against Rent Control v. Berkeley,275 the Court struck down an ordinance that limited to $250 the contribution that a person could make to a committee in support of, or in opposition to, a ballot measure. The Court said that placing this limit on individuals wishing to band together to advance their views on a ballot measure, while placing no limit on individuals acting alone, was a clear restraint on the right of association. It was not supported by the Buckley case, said Chief Justice Burger on behalf of the Court, because Buckley applies only to the perception of undue influence of large contributions to a candidate. He said there is no significant state or public interest in curtailing debate and discussion of a ballot measure.

In 1982, returning to election-related actions by corporations and labor unions, the Court held in Federal Election Commission v. National Right to Work Committee,276 that Congress could forbid corporations and labor unions from making contributions and expenditures in connection with federal elections unless they established separate segregated funds for political purposes to which shareholders or labor union members could make contributions. Even regarding the limitation on contribution, the opinion referred to the standard of review as involving “the closest scrutiny.” In applying the test, however, the Court noted that the statute was “sufficient tailored” under Buckley to be constitutional, rather than clearly applying a strict scrutiny, narrowly tailored analysis. The

274  453 U.S. 182, 193-201 (1981); id. at 201-04 (Blackmun, J., concurring in part and concurring in the judgment); id. at 208-09 (Stewart, J., joined by Burger, C.J., and Powell & Rehnquist, JJ., dissenting).

opinion also spoke of deference given to Congress’ judgment regarding the need to regulate corporate and union activity. As the Court noted, this bar could be applied even to solicitation by corporations and labor unions that did not have great financial resources because the court would not second guess the legislative determination on a need for prophylactic measures where corruption is the evil feared. This deference to the government is unusual for the Court to give at strict scrutiny, suggesting that some looser form of strict scrutiny was being applied in the case.

The Court considered regulations that limited political action committees in Federal Election Commission v. National Conservative Political Action Committee,277 decided in 1985. The Court held that Section 9012(f) of the Presidential Election Campaign Fund Act was invalid in barring independent political action committees from spending more than $1,000 to further the election of a candidate who decided to receive federal funding. Speaking for the Court, Justice Rehnquist said that in contrast to California Medical Ass’n, discussed above, at § 30.4.2.1 n.274, the present case involved limits on expenditures by PACs, and thus strict scrutiny clearly applied. He said that in Buckley and Citizens Against Rent Control the only compelling interests recognized by the Court were preventing corruption and the appearance of corruption. Here there was no clear indication of what any “corruption” might consist. The fact that candidates and elected officials may alter or reaffirm their own position on issues in response to political messages paid for by PACs cannot be called corruption. Further, this law was overbroad in response to any evil regarding corruption because it was not limited to large war chests; its terms applied equally to informal discussion groups that solicit neighborhood contributions.

Justice White, dissenting, continued his assault on Buckley insofar as it refused to uphold expenditure limits. He said it was pointless to limit contributions to a candidate without also limiting the amounts that can be spent on behalf of the candidate. In any event, the transformation of contributions into political debate involves speech by someone other than the contributor, and the limit involved here is a necessary, narrowly drawn means to make public financing workable. Justice Marshall, also dissenting, said that he now believed the distinction between contributions and independent expenditures has no constitutional significance. His view was that it “simply belies reality to say that a campaign will not reward massive financial assistance provided in the only way that is legally available. And the possibility of such a reward provides a powerful incentive to channel an independent expenditure into an area that a candidate will appreciate.”278

In 1986, in Federal Election Commission v. Massachusetts Citizens for Life, Inc.,279 the Court struck down a federal statute that required corporations to make independent political expenditures only through special segregated funds, as applied to a small nonprofit corporation that would face organizational and financial hurdles in establishing a segregated political fund. However, in 1990, a 6-3 Court in Austin v. Michigan Chamber of Commerce280 distinguished Citizens and upheld a state

---

278 Id. at 507-12 (White, J., dissenting); id. at 519-20 (Marshall, J., dissenting).

279 479 U.S. 238, 251-65 (1986).

bar on corporations using corporate treasury funds for independent expenditures in support of or in opposition to any candidate for election to state office.

Delivering the opinion of the Court, Justice Marshall said that strict scrutiny clearly should be applied since the regulation involved expenditures. He noted, however, that the state had a compelling interest in preventing expenditures that may not reflect actual public support for the political ideas espoused, and the law was sufficiently narrowly tailored because it permitted corporations to make independent political expenditures through separate segregated funds. Justice Marshall explained, “Because persons contributing to such funds understand that their money will be used solely for political purposes, the speech generated accurately reflects contributors’ support for the corporation’s political views.” 281 Justice Marshall distinguished Citizens on the ground that there the organization was formed for the express purpose of promoting political ideas, it had no persons with a claim on its assets or earnings, and it was independent from the influence of business corporations. That is not true of the Chamber of Commerce because more than three-quarters of its members are business corporations. Justice Marshall continued that the law was not underinclusive for not regulating unions because they lack the significant state-conferred advantages of the corporate structure. Nor was the Equal Protection Clause violated by exempting media corporations because of their unique societal role. 282

Dissenting were Justices Scalia, O’Connor, and Kennedy. Justice Scalia said that Buckley, which was entirely correct on the point, held that independent expenditures to express the political views of individuals and associations do not raise a sufficient threat of corruption to justify prohibition. Further, the government cannot be trusted to establish restrictions on speech for the purpose of assuring fair political debate. Justice Scalia said, “The premise of our system is that there is no such thing as too much speech – that the people are not foolish but intelligent, and will separate the wheat from the chaff.” 283 Justice Kennedy, dissenting with Justices O’Connor and Scalia, added that the majority’s attempt to distinguish Citizens rested on the fallacy that the source of a speaker’s funds is somehow relevant to the speaker’s right of expression or society’s interest in hearing what the speaker has to say. The state’s interest in protecting members from the use of funds to support candidates whom they may oppose is not here a compelling interest, just as it was not in Buckley. Finally, the First Amendment provides no basis for excluding media corporations from the ban, considering the tangled ownership links between media and nonmedia corporations. 284

In another case, decided in 2000, a divided Court upheld in Nixon v. Shrink Missouri Government PAC 285 a Missouri campaign contribution law which, like the federal law, included a per election contribution limit ($1,000). The Court held that a public perception of potential harm was sufficient

---

281 Id. at 660-61.
282 Id. at 666-69.
283 Id. at 679-80 (Scalia, J., dissenting).
284 Id. at 695-96 (Kennedy, J., joined by Scalia & O’Connor, JJ., dissenting).
to justify a contribution limit under *Buckley*, although the majority acknowledged that *Buckley* review was not as flexible as the *O’Brien* test or time, place, or manner tests of intermediate scrutiny. Justices Scalia, Kennedy, and Thomas dissented. They again urged that *Buckley* be overruled. Justice Kennedy was especially concerned that *Buckley* had led to the unintended consequence of “soft money” and “issue advocacy” campaigns that escape contribution limits through subterfuge. He said that overruling *Buckley* would allow legislatures to look at new options and would allow courts to consider other constitutional tests.286

The above cases involved contributions and expenditures by individuals, candidates, and political action committees. Two cases considered the application of *Buckley* to political parties. The first of the two cases was *Colorado Republican Federal Campaign Committee v. Federal Election Commission (Colorado I).*287 There, in 1996, the Court struck down federal limits on expenditures by a political party that were made independently, without coordination with any candidate. Announcing the judgment of the Court, and joined by Justices O’Connor and Souter, Justice Breyer said that the independent expression of a political party’s views is “core” First Amendment activity no less than the independent expression of individuals, candidates, or other political committees. It is protected in the absence of record evidence or legislative findings suggesting a special corruption problem.

Justice Thomas concurred in the judgment, but said that *Buckley* should be overruled because contribution limits infringe as directly and seriously upon free of political expression and association as do expenditure limits. In remarks also joined by Chief Justice Rehnquist and Justice Scalia, Justice Thomas added that there is only a minimal threat of corruption from party spending because parties and candidates have traditionally worked together.288 Justice Kennedy, with Chief Justice Rehnquist and Justice Scalia, also concurred in the judgment, but went further to express the opinion that even coordinated spending should be protected because, as said in *New York Times Co. v. Sullivan*, the First Amendment embodies “a profound national commitment to the principle that debate on public issues should be uninhibited, robust, and wide open.”289

In dissent, Justice Stevens, joined by Justice Ginsburg, said that all money spent by a political party to secure the election of its candidate for Senator should be considered a “contribution” to his or her campaign. Justice Stevens pointed to three interests which he said provide a sufficient constitutional predicate for the challenged federal spending limits: (1) such limits help avoid both the appearance and the reality of corrupt political process via abuse by the party of its influence over candidates,

286 Id. at 405-10 (Kennedy, J., dissenting); id. at 410 (Thomas, J., joined by Scalia, J., dissenting).

288 Id. at 631 (Thomas, J., joined by Rehnquist, C.J., and Scalia, J., as to Parts I and III, concurring in the judgment and dissenting in part).

(2) the limits supplement other spending limitations, and (3) the government has an important interest in leveling the electoral playing field by constraining the cost of federal campaigns. 290

The case was remanded to the Court of Appeals, which held that even closely coordinated party expenditures could not be limited by Congress. The case reached the Court again in 2001 in *Federal Election Commission v. Colorado Republican Federal Campaign Committee (Colorado II).* 291 A majority, comprised of Justices Stevens, O'Connor, Souter, Ginsburg, and Breyer, reversed. Writing for the Court, Justice Souter rejected a facial challenge to congressional limits on coordinated spending by a political party. Noting that the Act treats such expenditures as contributions, Justice Souter said that in this regard political parties are no different from other political speakers and, thus, have no claim that a generally higher standard of scrutiny be applied to limits on coordinated spending. Although the majority did not define with any precision what this lower level of scrutiny was, the Court noted that the different results between contributions and expenditures meant that a different standard of scrutiny was being applied to contribution cases, less than strict scrutiny. Since spending above the limits, even of independent amounts, was not permitted until the 1996 decision in *Colorado I,* political parties cannot claim that coordinated spending beyond statutory limits is essential to their functions. Further, parties receive money from people who seek to produce obligated officeholders. Applying the scrutiny appropriate to a contribution limit, the Court found a serious threat of abuse by candidates diverting contributions to the party in order to avoid the limits on individual contributions to candidates.

Justice Thomas dissented. He was joined by Justices Scalia and Kennedy and, in Part II, by Chief Justice Rehnquist. In Part I, Justice Thomas again called for overruling *Buckley.* In Part II, assuming that *Buckley* survived, Justice Thomas said that party expenditures are not the equal of contributions. But even if they were, a restriction on contributions by a party does not entail only the “marginal restriction” that is said to be suffered by individuals and political committees. The reason is that political parties and their candidates are inextricably intertwined in the conduct of an election. The restrictions have a stifling effect on the ability of the party to do what it exists to do. Breaking the connection between parties and their candidates inhibits promotion of the party’s message. Finally, even if the government had presented evidence of corruption, there are better tailored alternatives such as bribery law, disclosure laws, treating earmarked contributions as contributions to the candidate, and lowering the cap on total contributions that an individual can make to a party. 292

In 2003, a majority of the Court more clearly applied intermediate scrutiny to contributions in *Federal Election Commission v. Beaumont.* 293 The Court majority once again stated that different

---

290 *Id.* at 648-49 (Stevens, J., joined by Ginsburg, J, dissenting). This third interest was expressly rejected as a compelling government interest in *Buckley,* 424 U.S. 1, 48-49 (1976).

292 *Id.* at 465-66 (Thomas, J., joined by Scalia & Kennedy, JJ., and as to Part II by Rehnquist, C.J., dissenting).

results in contribution versus expenditure cases since Buckley meant that a different standard of review was implicit ever since Buckley. The Court noted, "[T]he basic premise we have followed in setting First Amendment standards for reviewing political financial restrictions [is that] the level of scrutiny is based on the importance of the 'political activity at issue' to effective speech or political association."

The most significant campaign finance case since Buckley was decided in the Fall of 2003. In McConnell v. Federal Election Commission, in a series of opinions written by different Justices, with shifting majorities for the various issues decided, the Court upheld the major provisions of the Bipartisan Campaign Reform Act of 2002 (BCRA). Specifically, the Court upheld a ban on political parties using “soft money,” that is, money not subject to the reporting requirements and limits specified in BCRA. The Court noted, “We are also mindful of the fact that in its lengthy deliberations leading to the enactment of BCRA, Congress properly relied on the recognition of its authority contained in Buckley and its progeny. Considerations of stare decisis, buttressed by the respect that the Legislative and Judicial Branches owe to one another, provide additional powerful reasons for adhering to the analysis of contribution limits that the Court has consistently followed since Buckley was decided.” Although the Court’s statement that “we have consistently applied less rigorous scrutiny to contribution restrictions aimed at the prevention of corruption and the appearance of corruption” is of questionably accuracy for the cases before 2000, it is true that the case results have been different, and the standard was clearly different in Colorado II and Beaumont.

As for what the difference in scrutiny was in Buckley until McConnell, Justice Kennedy noted in his dissent in McConnell that it was not standard intermediate scrutiny, but maybe what is referred to in this book as either loose strict scrutiny, or intermediate scrutiny with bite. Justice Kennedy noted that in Buckley the Court required the government to support regulation even of contributions by the compelling government interest of preventing corruption. As Kennedy noted, “Thus, though Buckley subjected expenditure limits to strict scrutiny and contribution limits to less exacting review, it held neither could withstand constitutional challenge unless it was shown to advance the anticorruption interest. In these consolidated cases, unless Buckley is to be repudiated, we must conclude that the regulations further that interest before considering whether they are closely drawn or narrowly tailored. If the interest is not advanced, the regulations cannot comport with the Constitution, quite apart from the standard of review.”

Further, as Kennedy noted, the Court required in Buckley that the regulations regarding contributions had to be directly related to advancing the interest in preventing corruption. As Kennedy noted, it had to prevent direct quid pro quo concerns. As Kennedy stated, “To ignore the fact that in Buckley the money at issue was given to candidates, creating an obvious quid pro quo danger as much as it led to the candidates also providing access to the donors, is to ignore the Court's comments in

296 Id. at 138 n.40.
297 Id. at 291-92 (Kennedy, J., dissenting).
Buckley that show quid pro quo was of central importance to the analysis. . . . And it ignores that in Colorado II, the party spending was that which was coordinated with a particular candidate, thereby implicating quid pro quo dangers. In all of these ways the majority breaks the necessary tether between quid and access and assumes that access, all by itself, demonstrates corruption and so can support regulation.298

Even from the majority’s perspective, a direct relationship requirement is apparent from the cases between Buckley and McConnell. A majority of the Court since Buckley has acknowledged that preventing the appearance of corruption is also a compelling government interest. Thus, regulations directly related to dealing with the appearance of corruption can also survive that aspect of a strict scrutiny approach. Thus, the Court noted in Shrink Missouri, "[W]e spoke in Buckley of the perception of corruption 'inherent in a regime of large individual financial contributions' to candidates for public office . . . as a source of concern 'almost equal' to quid pro quo impropriety."299

To the extent that Buckley has a lower standard of scrutiny for contributions, this analysis would suggest that Buckley adopted the level of scrutiny called in this book loose strict scrutiny, which involves a compelling government interest, direct relationship analysis, but not the “least restrictive alternative” test of strict scrutiny. As a matter of terminology, however, the majorities in Colorado II, Beaumont, and McConnell have rejected this understanding of Buckley, by only requiring “significantly important” government interests to regulate contributions – the intermediate standard of review – not compelling government interests, although the usual interests used by the government to regulate, corruption and the appearance of corruption, are viewed as compelling government interests anyway.

Alternatively, based on an analogy between regulations of financial contributions and regulations of commercial speech, both “hardy” kinds of speech, in the language of the commercial speech cases, discussed at § 30.3.2 n.233, one could argue that the best way to consider the standard for scrutiny used for contributions in Buckley is intermediate scrutiny with bite, like Central Hudson. As discussed at § 30.3.2 nn.228-30, this is a higher standard of scrutiny than standard intermediate scrutiny used in O’Brien for content-neutral regulations of speech in a public forum, or for time, place, or manner regulations. This understanding would be consistent with Shrink Missouri, which stated that the Buckley test is more vigorous than O’Brien.300

Such a view is also consistent with the actual analysis applied in McConnell. In McConnell, the Court noted that “there was substantial evidence to support Congress’ determination that large soft-money contributions to national political parties give rise to corruption and the appearance of corruption.” Thus, banning such contributions would be “directly related” to dealing with the government interest in preventing corruption and the appearance of corruption, the standard required under Central Hudson. Of course, a “least restrictive alternative” test would not be used. Rather, the intermediate standard of “not substantially more burdensome than necessary,” which requires

298 Id. at 295-96, citing, Buckley, 424 U.S. at 26-27.

299 Shrink Missouri, 528 U.S. at 390 (citations omitted).

300 Id. at 386.
“ample alternative channels of communication” would be applied. This is the approach adopted by the majority’s focus in McConnell, citing Shrink Missouri, on whether any regulation was “so radical in its effect as to . . . drive the sound of [the recipient’s] voice below the level of notice.”

The majority also approved in McConnell a ban on corporations and unions using funds in their treasuries to finance ads expressly advocating the election or defeat of candidates in federal elections made within 60 days before a general election or 30 days before a primary. Because this involved a regulation of expenditures, it triggered strict scrutiny. The Court did strike down as overbroad a provision that prohibited persons 17 years old or younger from making contributions to candidates or political parties. The regulation was unconstitutional because there was no showing of significant fraud by parents using their children as conduits for evading contribution limitations, and thus no important government interest to advance under intermediate scrutiny applicable to contribution limitations. Also, the regulation was substantially more burdensome than necessary in any event. Rather than an absolute ban, the government could have adopted counting the contributions given by a minor against the limitations on the family unit in order to prevent fraud by the adult.

In 2006, in Randall v. Sorrell, the Court struck down Vermont’s contribution limits on the amount any single individual can contribute to the campaign of a candidate for state office during a "two-year general election cycle." Those limits were: “governor, lieutenant governor, and other statewide offices, $400; state senator, $300; and state representative, $200.” Applying the intermediate scrutiny approach adopted in McConnell, a plurality, composed of Chief Justice Roberts, and Justices Breyer and Alito, said such limitations failed the third prong of intermediate scrutiny by being substantially too burdensome, and not leaving individuals ample alternative ways to exercise their First Amendment right to fund candidates of their choice. The plurality noted that the Vermont limitations were “substantially lower than both the limits we have previously upheld and comparable limits in other States.” Justices Scalia, Kennedy, and Thomas concurred only in the judgment, with each indicating a continuing willingness to depart from McConnell’s less than strict scrutiny approach for contribution limitations, and apply strict scrutiny instead.

Justice Souter, joined by Justices Stevens and Ginsburg, would have upheld the contribution limitations under McConnell’s intermediate review. Justice Souter stated, “Low though they are, one cannot say that ‘the contribution limitation[s are] so radical in effect as to render political association ineffective, drive the sound of a candidate's voice below the level of notice, and render contributions pointless.’” In a separate dissent, Justice Stevens indicated that he would now depart from Buckley’s strict scrutiny approach to expenditure limitations, and apply intermediate scrutiny instead.

to both expenditure and contribution limitations, like Justice White’s approach in \textit{Buckley}.  

A case involving a contribution ban by candidates occurred in \textit{Minnesota Citizens Concerned for Life, Inc. v. Kelley}.\footnote{\textit{Id.} at 2508 (Stevens, J., dissenting), citing \textit{Buckley}, 424 U.S. at 264 (White, J., concurring in part and dissenting in part), discussed at \S\ 30.4.2.1 n.261; \textit{id.} at 2512-13 (Souter, J., joined by Stevens & Ginsburg, JJ., dissenting), citing \textit{Shrink Missouri}, 528 U.S. at 377.} In this case, the Eighth Circuit considered the constitutionality of a state statute than banned religious, charitable, and educational organizations from soliciting contributions from candidates or their committees, except for business advertisements, regular payments by candidates who were members of an organization for more than six months before becoming a candidate, or ordinary contributions at church services. The court concluded that the statute was not narrowly drawn because the statute “bans such requests for any amount even when the organization has no knowledge that the prospective donor is a candidate or committee, or the solicitation otherwise has no potential to affect voting behavior.”

\textbf{\S\ 30.4.2.2 Disclosure Requirements in Contributions, Expenditures, and the Choice and Election of Candidates}

Cases involving disclosure requirements were dealt with in \textit{Buckley} under a strict scrutiny, direct relationship, least restrictive alternative approach. As the Court noted in \textit{Buckley}, even those who challenge aspects of contribution and expenditure limitations agree that “narrowly drawn disclosure requirements are the proper solution to virtually all the evils Congress sought to remedy” concerning corruption and the appearance of corruption.\footnote{\textit{Id.} at 60.} The main issues regarding disclosure have thus tended to involve application of disclosure requirements to very small amounts of contributions, and to minor or independent party candidates, where concerns of power corruption by the entrenched two major parties is not a factor.

As with respect to contributions, the \textit{Buckley} test for disclosures was not stated with much care. Each of the cases relied upon by the Court for the proper standard of review, such as \textit{NAACP v. Alabama} and \textit{Gibson v. Florida Legislative Investigation Committee}, involved a compelling government interest test.\footnote{\textit{Id.} at 64-65, citing \textit{NAACP v. Alabama}, 357 U.S. 449, 463 (1958); \textit{Gibson v. Florida Legislative Investigation Commission}, 372 U.S. 539, 546 (1963).} In applying the test in \textit{Buckley}, the Court concluded that the disclosure requirements did “directly serve” the government interests in preventing corruption and the appearance of corruption, and were “an essential means of gathering data necessary to detect violations of the contribution limitations,” a least restrictive alternative approach.\footnote{\textit{Id.} at 67-68.} A blanket exemption for minor parties was not needed, even though their associational interests were more at risk, since they would be entitled to an exemption on evidence showing a reasonable probability that
compelled disclosure of contributor names would subject them to threats, harassment, or reprisals from either Government officials or private parties. In 1982, this principle had been applied to excuse enforcement of disclosure requirements for candidates of the Socialist Workers Party, which had been subjected to harassment by both government officials and private parties.310 Nevertheless, based upon the same kind of loose language used in cases prior to 1976 regarding the standard of review as occurred with respect to the contribution limitations, discussed at § 30.4.2.1 nn.263-66, the Court also talked in Buckley about the disclosure requirements serving “substantial government interests” and there being a “substantial relation[ship]” between means and ends.311

The Court in Buckley also upheld the requirement of disclosure by persons who make contributions or expenditures aggregating over $100 in a calendar year for communications that expressly advocate the election or defeat of a clearly identified candidate. The Court stated this disclosure requirement also triggered the “same strict standard of scrutiny” as applied to groups. The Court admitted that this low limit might discourage participation by some citizens, but said that where to draw the line is a judgmental decision, best left to congressional discretion, and was not “wholly without rationality.”312 Why the Court chose to use such rational basis kind of language at this point in the opinion was left unexplained. That line has since been amended to $200.

A different kind of required disclosure was struck down in 1995 in McIntyre v Ohio Elections Commission.313 In that case a 7-2 Court invalidated an Ohio statute that prohibited the distribution of anonymous campaign literature dealing with a proposed school tax levy. Relying on Talley v. California,314 which had held that the First Amendment protects the distribution of unsigned handbills urging a boycott, Justice Stevens said that the reasoning in that case was broad enough to cover a respected tradition of anonymity in the advocacy of political issues. Where a law burdens core political speech, the Court applies “exacting” scrutiny, presumably strict scrutiny. The Court noted that Ohio’s interest in providing the electorate with relevant information is no stronger here than with respect to other components of content that an author is free to include or exclude. Ohio’s interest in preventing fraudulent and libelous statements carries special weight during election campaigns and might justify a limited identification requirement. However, this prohibition is not Ohio’s principal weapon against fraud, and it is not narrowly tailored since the prohibition encompasses documents not arguably false or misleading and not closely connected to an election.

Justice Thomas concurred only in the judgment because he believed that freedom of speech or the press, as originally understood, protected anonymous political leafletting, as evidenced by the Framers universal practice of publishing anonymous articles and pamphlets. Justice Thomas recognized that there was a recent tradition of barring anonymous publications, but said that the

311 424 U.S. at 64, 68.
312 Id. at 74-76, 83-84.
historical evidence from the framing outweighs that recent tradition.\footnote{514 U.S. at 358-59 (Thomas, J., concurring in the judgment).} Justice Ginsburg, concurring, said that Court had not held that a state, “in other, larger circumstances,” may not require the speaker to disclose its interest by disclosing its identity.\footnote{Id. at 358 (Ginsburg, J., concurring).}

Justice Scalia dissented, with Chief Justice Rehnquist. Justice Scalia said that frequent use of anonymous electioneering did not establish that it was a constitutional right. Instead, the Court should respect the universal and long established American legislative practice of barring anonymous electioneering, begun in 1890, and since adopted by all states except California, a practice that does not go to the heart of free speech. Even if he were to forget practice and reason deductively from case law, Justice Scalia said he would reach the same result because the Court has not established a clear rule of law. Expressing concern about “large circumstances” leaves unclear whether states could ban anonymity with respect to parade permits, theater presentations, letters to the editor, or municipal public-access cable performers.\footnote{Id. at 317-78 (Scalia, J., joined by Rehnquist, C.J., dissenting).}

A later case in this series is \textit{Buckley v. American Constitutional Law Foundation},\footnote{525 U.S. 182, 201-05 (1999). See also ACLU of Nevada v. Heller, 378 F.3d 979, 987-1002 (9th Cir. 2004) (Nevada statute requiring groups publishing “material or information relating to an election, candidate or any question on the ballot” to disclose on publication names and addresses of its financial sponsors is not narrowly tailored to state’s interests in helping voters evaluate information, combating fraud, or enforcing election disclosure and contribution laws).} decided in 1999. There the Court invalidated a number of Colorado laws regulating the process of soliciting signatures to quality initiatives for the ballot, chief among them a requirement that petitioner circulators wear identification badges and be registered voters. The laws also required the names and addresses of circulators to be reported, along with the amount paid to each circulator. The Court said the restrictions significantly inhibited communication and were not justified by state interests in fraud detection, informing voters, and administrative efficiency. Justice O’Connor, joined by Justice Breyer, concurring in the judgment and dissenting in part, said that requiring circulators to be registered voters only indirectly and incidently burdens communication, and that the reporting requirements were incremental and insubstantial. Justice Rehnquist, also dissenting, was concerned that striking down the requirement that circulators be registered voters threatened a host of historically established regulations.\footnote{525 U.S. at 215-16 (O’Connor, J., joined by Breyer, J., concurring in the judgment in part, and dissenting in part); \textit{id.} at 226 (Rehnquist, C.J., dissenting).}

Where the issue involves anonymity in the context of candidates for office, many lower courts have distinguished \textit{McIntyre} and \textit{American Constitutional Law Foundation} and upheld the state
regulations. For example, in Majors v. Abell, per Judge Posner, the Seventh Circuit upheld an Indiana statute requiring political advertising that "expressly advocate[s] the election or defeat of a clearly identified candidate" contain "a disclaimer that appears and is presented in a clear and conspicuous manner to give the reader or observer adequate notice of the identity of persons who paid for . . . the communication." The court noted that when dealing with elections for office, rather than referenda or other ballot initiatives, "‘disclosure protects the integrity of the electoral process by ensuring that the words of an independent group are not mistakenly understood as having come from the mouth of a candidate’ [and it] also deters corruption by identifying large contributors who may be seeking a quid pro quo and – a related point – it provides information helpful to the enforcement of the provisions of election campaign law, both also being purposes that had been emphasized in Buckley.” In an unusual opinion dubitante (neither concurrence nor dissent), Judge Easterbrook noted that given the lack of clarity in the law based on Buckley, McConnell, McIntyre, and American Constitutional Law Foundation, he could not “be confident that my colleagues are wrong in thinking that five Justices will go along” with upholding this statute. However, since “Indiana contends that it is entitled to regulate all electioneering by every speaker in order to avoid drawing lines,” he did not understand “how that position can be reconciled with established principles of constitutional law” applying narrow tailoring analysis.

§ 30.4.2.3 Speech Regulating the Choice and Election of Candidates for Legislative and Executive Offices

Most cases involving the choice and election of candidates have involved some aspect of primary elections. The White Primary cases, begun during the formalist era, and continuing during the Holmesian era, established that a private political group involved in primary elections is a state actor for purposes of the 14th and 15th Amendments, as discussed at §§ 21.1.2.2-21.1.2.3. Thus, the party could not engage in racial discrimination in violation of the 14th and 15th Amendments. At some point, however, state regulation of the process of selecting candidates violates a party’s rights to free speech and political association. The problem has been to find the lines.

320 361 F.3d 349, 351-55 (7th Cir. 2004), citing, inter alia, Federal Election Comm’n v. Public Citizen, 268 F.3d 1283, 1287-91 (11th Cir. 2001) (per curiam); Gable v. Patton, 142 F.3d 940, 944-45 (6th Cir. 1998); Kentucky Right to Life, Inc. v. Terry, 108 F.3d 637, 646-48 (6th Cir. 1997); Majors, 361 F.3d at 355-58 (Easterbrook, J., dubitante).

321 See, e.g., Nixon v. Herndon, 273 U.S. 536 (1927) (statute excluding blacks from primaries was invalid racial discrimination under the 14th Amendment); Nixon v. Condon, 286 U.S. 73 (1932) (same result where the state delegated selection power to a party’s central committee, making it a state agent); Grovey v. Townsend, 295 U.S. 45 (1935) (exclusion of blacks from a political party, by its own action, was private action). In 1944, Grovey was overruled in Smith v. Allwright, 321 U.S. 649 (1944) (state delegation to party to fix the qualifications for primary election is a delegation of state functions that makes the party’s action that of the state under the 15th Amendment). Where the party sought to avoid Smith by holding a non-binding “Jaybird” primary, the Court held that such exclusion of blacks also violated the 15th Amendment. Terry v. Adams, 345 U.S. 461 (1953).
In 1975, in *Cousins v. Wigoda*, the instrumentalist Court upheld the right of a party to identify the people who comprise the party and to determine seating at its convention. The case involved application of a strict scrutiny approach, with the Court stating that the “interest of the State must be compelling” to justify state regulation of how a political party selects its delegates.

In 1981, also using a “compelling government interest” analysis, the Court held in *Democratic Party of United States v. Wisconsin* that a state could not compel a national party to seat a delegation that was bound under state law to vote for candidates according to the results of an open primary where that would violate rules of the party, which here limited participation in the delegate selection process to voters who publicly declare their party preference. Justice Powell’s dissent, joined by Justices Blackmun and Rehnquist, said that the state’s interest in open participation in primary elections outweighed the minimal interest of the party in requiring voters to identify formally with the party before voting and justified the infringement involved in requiring delegates to vote according to the results of the open primary.

The post-instrumentalist Court has returned to this issue. In *Tashjian v. Republican Party of Connecticut*, the Republican party had adopted a rule that permitted independent voters to vote in Republican primaries for federal and statewide offices. The purpose of the rule was to broaden the base of the party. However, state law required voters in any party primary to be registered members of that party. The Court held that the state law impermissibly burdened the First Amendment rights of the party and its members. For the Court, Justice Marshall noted that the Constitution in Art. I, § 4, cl. 1 grants states a broad power to prescribe the “Times, Places and Manner of holding Elections for Senators and Representatives.” However, this must be exercised within the limits established by the First Amendment. The state law did not pass strict scrutiny because the four state interests asserted in its defense were insubstantial. First, concern about possible future increases in administrative costs have never been held to constitute a compelling government interest. Second, the state interest in preventing a party from being raided by persons in sympathy with another party is not implicated. Third, party nominees will not be selected by an “amorphous” group because a statute not challenged in the case required that primary candidates have obtained at least 20% of the vote at a party convention. Finally, a state cannot very well by law protect the integrity of a party when the party itself does not want that protection. Justice Scalia, dissenting with Chief Justice Rehnquist and Justice O’Connor, said that a voter who casts a vote in a Republican primary, but refuses to register as a Republican, forms no more meaningful association with a party than a person who responds to a pollster. Nor need a state permit its primary system to be used as a way of identifying the relative popularity of potential candidates among independents.

---

325 *Id.* at 234-37 (Scalia, J., joined by Rehnquist, C.J., and O’Connor, J., dissenting).
In *Tashjian* the state had sought to impose an closed primary. In 2000, however, the reverse situation came before the Court in *California Democratic Party v. Jones*. There, California’s Proposition 198 sought to impose a “blanket primary,” wherein any person entitled to vote could vote for any candidate regardless of the candidate’s political affiliation. By 7-2 vote the Court struck down Proposition 198. Justice Scalia wrote that in no area is a political association’s right to exclude more important than in selecting its nominee. Yet California’s blanket primary forces political parties to associate with those who refuse to affiliate with the party and who may be affiliated with a rival. Thus, the prospect of having a party’s nominee determined by adherents of an opposing party is a clear and present danger. Further, it is likely that candidates will be forced into taking different positions than the party – an intended outcome, as Proposition 198 was promoted largely as a measure that would ease the way for moderate problem-solvers.

Applying strict scrutiny, Justice Scalia found that none of the seven interests forwarded by the state were compelling, and that in any event the law was not narrowly tailored. He brushed aside alleged interests in electing officials who better represent the electorate, expanding debate beyond partisan concerns, and protecting interests of minorities in “safe” districts. As for fairness, he said it is less unfair not to permit nonparty members in safe districts to determine a party nominee than permitting nonparty members to hijack the party. Affording voters greater choice is a nonstarter because the avowed purpose of Proposition 198 was to produce more centrist candidates. An interest in increasing voter participation is a variation of the same theme. And, finally, any state interest in preserving the privacy of one’s party affiliation is not compelling. With respect to tailoring, all of the alleged interests could better be protected by resorting to a nonpartisan blanket primary.

Justice Kennedy, concurring, observed that the law had the improper purpose of forcing a political party to accept a candidate it may not want. He noted that if the case were decided otherwise, and the Court continued to allow legislative control of expenditures that are coordinated with candidates, the states could control political parties at two vital points in the election process.

Justice Stevens, dissenting with Justice Ginsburg, said that states have the power to require parties to use the primary format in selecting their nominees because the general election and the primary are quintessential forms of state action. The First Amendment affords protection to the internal processes of a political party, but that does not include a right to exclude nonmembers from voting in a state-required state-financed primary election. There is not much practical content to the Court’s reliance on a political party’s “right not to associate” if a registered Democrat or an independent can vote in a Republican primary merely by asking for a Republican ballot. Justice Scalia’s opinion attempted to answer this point by observing that such a voter must at least formally become a member of the party, and at that point the voter is then limited to voting for candidates of that party.

326 530 U.S. 567, 572-86 (2000). *See also* Washington State Republican Party v. Washington, 460 F.3d 1108 (9th Cir. 2006) (primary system whereby candidates’ self-identify their party status, whether or not approved by the party, violates associational rights of political parties).

327 Id. at 586-90 (Kennedy, J., concurring).

328 Id. at 590-601 (Stevens, J., joined by Ginsburg, J., dissenting).
These cases all involved serious burdens on free speech and association rights. As discussed at § 31.2.1, lesser burdens on associational rights trigger less exacting review, and a state's "important regulatory interests' will usually be enough to justify 'reasonable, nondiscriminatory restrictions.'"  

§ 30.4.2.4 Speech Regulating the Choice and Election of Judges

Speech made during the course of election campaigns by judges raise special First Amendment problems. As Justice Ginsburg has noted, this is because judges perform a function:

fundamentally different from that of the people's elected representatives. . . . Unlike their counterparts in the political branches, judges are expected to refrain from catering to particular constituencies or committing themselves on controversial issues in advance of adversarial presentation. Their mission is to decide "individual cases and controversies" on individual records, neutrally applying legal principles, and, when necessary, "stand[ing] up to what is generally supreme in a democracy: the popular will." A judiciary capable of performing this function, owing fidelity to no person or party, is a "longstanding Anglo-American tradition," an essential bulwark of constitutional government, a constant guardian of the rule of law. The guarantee of an independent, impartial judiciary enables society to "withdraw certain subjects from the vicissitudes of political controversy, to place them beyond the reach of majorities and officials and to establish them as legal principles to be applied by the courts." "Without this, all the reservations of particular rights or privileges would amount to nothing." The Federalist No. 78, p. 466 (C. Rossiter ed.1961).  

The ability of the judiciary to discharge its unique role rests to a large degree on the manner in which judges are selected. The Framers sought to advance the judicial function in the federal courts through the protections of Article III, which provide for the selection of judges by the President on the advice and consent of the Senate. In many states, however, citizens choose judges directly in elections, and this poses special problems of electoral accountability versus judicial independence. As of 2005, "fourteen states [Alaska, Colorado, Connecticut, Delaware, Hawaii, Iowa, Maryland, Massachusetts, Nebraska, New Mexico, Rhode Island, Utah, Vermont, and Wyoming] and the District of Columbia use a merit selection process [where the Governor selects from a slate of judges (typically 3-5) recommended by an independent commission, with a retention election some years after service on the bench]. Another six states have opted to appoint their state judiciaries directly [with four (California, Maine, New Jersey, and New Hampshire) appointed by the Governor, while two (Virginia and South Carolina) appointed by the state legislature]. Eight states [Alabama, Illinois, Louisiana, Michigan, Ohio, Pennsylvania, Texas, and West Virginia] use partisan elections and thirteen [Arkansas, Georgia, Idaho, Kentucky, Minnesota, Mississippi, Montana, Nevada, North Carolina, North Dakota, Oregon, Washington, and Wisconsin] use nonpartisan elections. The other nine states [Arizona, Florida, Indiana, Kansas, Missouri, New York, Oklahoma, South Dakota, and

Recognizing that the election of judges poses special problems, many states have sought to preserve the integrity of its judiciary by either making judicial elections nonpartisan, or by preventing candidates for judicial office from publicly making known how they would decide issues likely to come before them as judges. In Republican Party of Minnesota v. White, the Supreme Court considered such a regulation and declared it unconstitutional. In White, the Court decided that an “announce” clause in the Minnesota Code of Judicial Conduct, as interpreted by the Minnesota Supreme Court, “prohibits a judicial candidate from stating [i.e., announcing] his views on any specific nonfanciful legal question within the province of the court for which he is running, except in the context of discussing past decisions – and in the latter context as well, if he expresses the view that he is not bound by stare decisis.” Because the clause prohibited speech on the basis of its content and burdened a category of speech that is “at the core” of First Amendment freedoms, speech about the qualifications of candidates for public office, strict scrutiny applied to the regulation.

The government argued that the announce clause served the compelling governmental interest in ensuring the impartiality, or at least the appearance of impartiality, of judges. The Court responded:

One meaning of "impartiality" in the judicial context – and of course its root meaning – is the lack of bias for or against either party to the proceeding. Impartiality in this sense assures equal application of the law. That is, it guarantees a party that the judge who hears his case will apply the law to him in the same way he applies it to any other party. This is the traditional sense in which the term is used. . . .

We think it plain that the announce clause is not narrowly tailored to serve impartiality (or the appearance of impartiality) in this sense. Indeed, the clause is barely tailored to serve that interest at all, inasmuch as it does not restrict speech for or against particular parties, but rather speech for or against particular issues. To be sure, when a case arises that turns on a legal issue on which the judge (as a candidate) had taken a particular stand, the party taking the opposite stand is likely to lose. But not because of any bias against that party, or favoritism toward the other party. Any party taking that position is just as likely to lose.

In dissent, Justice Stevens noted that the announce clause "serves the State's interest in maintaining both the appearance of this form of impartiality and its actuality." The majority acknowledged that some of the speech prohibited by the clause “may well exhibit a bias against parties – including

---

333 Id. at 775-76 (citations omitted).
Justice Stevens’ example of an election speech stressing the candidate's unbroken record of affirming convictions for rape.” However, the Court noted that the question under strict scrutiny is not whether the announce clause serves this interest at all, but whether it is narrowly tailored to serve this interest as the least burdensome effective alternative, which it was not.\footnote{Id. at 777 n.7; \textit{id.} at 800-01 (Stevens, J., joined by Souter, Ginsburg & Breyer, JJ., dissenting).}

The Court then noted a second possible meaning of impartiality. The Court stated:

It is perhaps possible to use the term "impartiality" in the judicial context (though this is certainly not a common usage) to mean lack of preconception in favor of or against a particular legal view. This sort of impartiality would be concerned, not with guaranteeing litigants equal application of the law, but rather with guaranteeing them an equal chance to persuade the court on the legal points in their case. Impartiality in this sense may well be an interest served by the announce clause, but it is not a compelling state interest, as strict scrutiny requires. A judge's lack of predisposition regarding the relevant legal issues in a case has never been thought a necessary component of equal justice, and with good reason. For one thing, it is virtually impossible to find a judge who does not have preconceptions about the law. As then-Justice Rehnquist observed of our own Court: "Since most Justices come to this bench no earlier than their middle years, it would be unusual if they had not by that time formulated at least some tentative notions that would influence them in their interpretation of the sweeping clauses of the Constitution and their interaction with one another. . . . Indeed, even if it were possible to select judges who did not have preconceived views on legal issues, it would hardly be desirable to do so. "Proof that a Justice's mind at the time he joined the Court was a complete tabula rasa in the area of constitutional adjudication would be evidence of lack of qualification, not lack of bias."\footnote{Id. at 700.}

The Court then noted a third possible meaning of impartiality. The Court stated:

This quality in a judge demands, not that he have no preconceptions on legal issues, but that he be willing to consider views that oppose his preconceptions, and remain open to persuasion, when the issues arise in a pending case. This sort of impartiality seeks to guarantee each litigant, not an equal chance to win the legal points in the case, but at least some chance . . . .

Respondents argue that the announce clause serves the interest in open-mindedness, or at least in the appearance of openmindedness, because it relieves a judge from pressure to rule a certain way in order to maintain consistency with statements the judge has previously made. The problem is, however, that statements in election campaigns are such an infinitesimal portion of the public commitments to legal positions that judges (or judges-to-be) undertake, that this object of the prohibition is implausible. Before they arrive on the bench (whether by election or otherwise) judges have often committed themselves on legal issues that they must later rule upon. . . . More common still is a judge's confronting a legal issue on which he has expressed
an opinion while on the bench. Most frequently, of course, that prior expression will have
occurred in ruling on an earlier case. But judges often state their views on disputed legal issues
outside the context of adjudication – in classes that they conduct, and in books and speeches.
Like the ABA Codes of Judicial Conduct, the Minnesota Code not only permits but encourages
this. See Minn. Code of Judicial Conduct, Canon 4(B) (2002) ("A judge may write, lecture,
teach, speak and participate in other extra-judicial activities concerning the law . . ."). 336

In contrast to this analysis, some commentators have argued that statements made in campaigns for
judicial office may have a greater tendency to pressure judges to decide later cases consistent with
those comments, and that would undermine judicial independence. Such comments thus cause
special problems that do not exist in campaigns for legislative and executive branch offices, since
those office-holders are expected to act in political ways consistent with their campaign promises.
Further, the amount of money flowing to judicial elections is likely to increase given reduced
limitations on the kinds of advertisements that can be run for candidates for judicial office. Indeed,
after White, spending on judicial campaign ads more than doubled between 2002 and 2006. 337

Reflecting this difference between the two kinds of positions, Justice Stevens, joined by Justices
Souter, Ginsburg and Breyer, stated in dissent in White, “I do not agree with the unilocular, ‘an
election is an election,’ approach.” Instead, consistent with an instrumentalist focus on policy
considerations playing a meaningful role in constitutional decisionmaking, Justice Stevens stated,
“I would differentiate elections for political offices, in which the First Amendment holds full sway,
from elections designed to select those whose office it is to administer justice without respect to
persons. Minnesota's choice to elect its judges, I am persuaded, does not preclude the State from
installing an election process geared to the judicial office.” 338

Based on the natural law refusal to embrace policy considerations, and respect for precedent, this
instrumentalist approach will not likely command the support of a majority of natural law Justices
in the future, just as it did not attract a majority of natural law Justices in White. 339 Lower court
cases since White are consistent with this view. After White, a number of states amended their
Codes of Judicial Conduct to forbid judicial candidates only from making “pledges or promises” or
“committing to issues” likely to come before the court. Many states, like Minnesota, already had
such provisions in place. Such limitations have typically been ruled unconstitutional under White.

336 Id. at 778-80.

338 536 U.S. at 805-06 (Ginsburg, J., joined by Stevens, Souter & Breyer, JJ., dissenting).

339 On the issue of free speech rights for judges after White, see generally David Schultz,
985 (2006); Howland W. Abramson & Gary Lee, The ABA Model Code Revisions and Judicial
For example, in *Kansas Judicial Watch v. Stout,* a district court held as overbroad a “pledges or promises” clause in the context of chilling free speech rights of candidates who feared discipline for answering candidate questionnaires distributed by political action committees asking the candidate for views on a range of “hot-button” social issues which might come before the court for review. The court noted, however, that if the clause were narrowly drawn to ban only pledges, promises, or commitments to decide an issue in a particular way, rather than limiting any pledge or promise regarding conduct in office other than the faithful and impartial performance of duties, it would likely be constitutional as directly related to advancing the compelling interest identified in *White* of ensuring judges are impartial in the third sense of “open-mindedness” in the performance of judicial duties. As the court noted, "A campaign promise to rule a certain way on a legal issue likely to come before the court is so uniquely destructive of open-mindedness and confidence in the judiciary that recusal might not satisfactorily protect the state's interest in maintaining judicial open-mindedness." As example of the difference, the court noted that it would be legitimate for a candidate to say "I promise to be tough on crime," or "I promise to uphold the First Amendment." It would violate “open-mindedness” to say, "I promise to never invalidate a search on Fourth Amendment grounds." Only the latter statement could be proscribed by a Code of Judicial Conduct.

In contrast, some state courts after *White* have upheld generic “pledges or promises” clauses against First Amendment attack to discipline judicial candidates for statements such as I pledge “to assist our law enforcement officers as they aggressively work towards cleaning up our city streets" or I promise “to help law enforcement by putting criminals where they belong – behind bars." 

Free speech rights also apply to the issue of judicial statements that can lead to recusal from the bench. As has been noted:

> Pursuant to Canon 3 (E)(1) of the ABA Model Code of Judicial Conduct, a judge must disqualify himself when his impartiality might reasonably be questioned. Thus, the question is "[w]ould a person of ordinary prudence in the judge's position knowing all of the facts known to the judge find that there is a reasonable basis for questioning the judge's impartiality?" Under this test, proof of actual bias is not required. The test can be satisfied if a reasonable person might reasonably surmise the existence of bias or prejudice under the particular circumstances of the case. Accordingly, in some instances, a judge who would, in fact, try a case fairly could be barred under the test if a reasonable person might reasonably question his ability to do so.

Although the reasonable person standard of review appears to favor litigants insofar as proof of actual judicial bias is not required, in practice, a variety of evidentiary factors tend to sustain the presumption of impartiality. Facts presented as evidence of judicial bias must be "substantial." Prejudice cannot be asserted on the basis of unsupported facts; nor do adverse

---

341 In re Watson, 794 N.E.2d 1, 4-8 (N.Y. 2003); In re Kinsey, 842 So.2d 77, 85-87 (Fla. 2003).
rulings alone establish bias. Absent bad faith, erroneous rulings do not call for discipline.342

An additional evidentiary hurdle is created by the so-called “extra-judicial source” doctrine. Under this doctrine:

"[r]ulings on issues of law or attitudes concerning legal issues' do not establish bias or prejudice requiring recusal unless those rulings or attitudes are the product of bias and prejudice of an extra-judicial source." This doctrine generally limits evidence of judicial bias to external factors standing apart from the judge's participation in the case. Judicial bias, therefore, cannot typically be pled based on facts the judge learned while handling the case. Nor does judicial bias encompass the judge's views in relation to the nature of the crime for which the defendant stands charged. Judicial speech reflecting the community's views of the crime also falls beyond the parameters of bias delineated by the extra-judicial source doctrine. Accordingly, to demonstrate judicial prejudice, the litigant generally must show the bias is "personal in nature," directed toward the litigant himself, and the product of factors arising outside the judicial function.

The extra-judicial source doctrine is not, however, absolute. An exception to it is made when otherwise protected conduct or speech becomes so markedly impartial that the ability to judge fairly is demonstrably impossible. The exception will apply only in those rare instances when objection to the conduct is made at trial or the conduct was so "grossly improper" as to affect the outcome.343

In Liteky v. United States,344 the Court held that the extrajudicial source doctrine applies to 28 U.S.C. § 455(a) of the United States Code governing trials in federal courts. It has been noted, “The Court's twin assertions – that judicial rulings alone will almost never provide a sufficient basis for partiality motions, and that opinions formed on the basis of past or present courtroom events will also be insufficient unless a deep-seated antagonism or favoritism could be shown that would render fair judgement impossible – provide judges with powerful weapons with which to defend themselves from meritless attacks upon their integrity.”345 Further, even when the litigant is able to present admissible evidence of judicial impropriety, such evidence still must be strong enough to overthrow the presumption of the judge's integrity. It has been noted:

As might be expected, given the prevailing reasonable person standard, the point at which judicial conduct is deemed to have overstepped that line is extremely subjective and remarkably

343 Id. at 276-77 (citations omitted).

fluid from case to case. In addition, the presumption of integrity is so strong that, typically, a
single remark made during the course of proceedings, although acknowledged to be improper,
will not, in itself, be sufficient to require recusal. Time and again, reviewing courts note that,
while a judge's comments "would have been better left unsaid," those comments fail to make
the showing necessary to undermine the presumption of impartiality. The burden of proof in
judicial bias actions is difficult for any litigant to surmount.\textsuperscript{346}

\textsuperscript{346} Sparling, \textit{supra} note 342, at 277-78
CHAPTER 31: FREEDOM OF ASSEMBLY AND ASSOCIATION

The text of the First Amendment provides, in part, “Congress shall make no law . . . abridging . . . the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.” From this text, the Court has inferred a related First Amendment right of freedom of association. As stated in NAACP v. Alabama ex rel. Patterson:

Effective advocacy of both public and private points of view, particularly controversial ones, is undeniably enhanced by group association, as this Court has more than once recognized by remarking upon the close nexus between the freedoms of speech and assembly. . . . [F]reedom to engage in association for the advancement of beliefs and ideas is an inseparable aspect of the “liberty” assured by the Due Process Clause of the Fourteenth Amendment.¹

Thus, under both a First Amendment analysis against the federal government, and a 14th Amendment analysis against state or local action, there is a right to freedom of assembly and a right to petition the government for grievances, discussed at § 31.1, and a freedom of association, discussed at § 31.2.

§ 31.1 Freedom to Assemble and Petition the Government for Grievances

Particularly beginning in the 1830s, many Southern states before the Civil War limited the rights of anti-slavery Southerners to freedom of speech and the right to petition the federal government on matters related to slavery.² Because the Supreme Court held in 1833 in Barron v. Baltimore that the Bill of Rights applied only to the federal government, as discussed at § 27.2.1 n.95, these limitations did not violate the First Amendment. As discussed at § 25.3 nn.55-58, part of the purpose behind the 14th Amendment’s Privileges or Immunities Clause was to make unconstitutional any such future limitation on free speech and the right to petition the federal government. That result is in force today as part of the First Amendment’s incorporation into the 14th Amendment Due Process Clause.

Except for the pre-Civil War actions in the South, rarely have federal, state, or local governments tried to limit the right of individuals “peaceably to assemble” or petition for “a redress of grievances.” Thus, the Court has had few opportunities to consider this right. In 1867, in Crandall v. Nevada,³ the Court did note that the Constitution protects the right of a person “to come to the seat of government to assert any claim he may have upon that government, to transact any business he may have with it, to seek its protection, to share its offices, to engage in administering its functions. He has the right to free access to its seaports, through which all operations of foreign commerce are conducted, to the subtreasuries, land offices, and courts of justice in the several States.”

¹ 357 U.S. 449, 460-61 (1958).
³ 73 U.S. (6 Wall.) 35, 44 (1867).
Following up on *Crandell* in 1873, the Court included in the *Slaughter-House Cases* this set of rights, along with others, such as the right “to demand the care and protection of the Federal government over his life, liberty, and property when on the high seas or within the jurisdiction of a foreign government,” as among the rights of United States citizenship protected by the Privileges or Immunities Clause of the 14th Amendment, discussed at § 25.3 nn.59-60. This “right to petition” is also applicable against the states as an aspect of the incorporation of the First Amendment under 14th Amendment substantive due process analysis, discussed at § 27.2.2 nn.111-12.

§ 31.2  Freedom of Association

§ 31.2.1  General Considerations

As the Court noted in *NAACP v. Alabama ex rel. Patterson*, “Effective advocacy of both public and private points of view, particularly controversial ones, is undeniably enhanced by group association.” Thus, persons have a right to express themselves not only by what they say, the freedom of speech, but also by what groups they join, a freedom of association. As this right is fundamental, cases involving “severe” or “substantial” or “undue” burdens on associational rights trigger strict scrutiny review, as the Court noted in *Timmons v. Twin Cities Area New Party*. However, the “freedom of association” is an unenumerated right, merely related to the textually specific right of “freedom to assemble,” discussed at § 31.1. Thus, as is true for an increasing number of unenumerated fundamental rights in the modern, post-instrumentalist era, discussed at § 27.3.3 nn.175-79, less severe burdens trigger a form of rational basis review.

As discussed at § 21.2.3 nn.64-73, this lesser form of scrutiny is best understood as a second-order rational review analysis, which adopts an overall balancing of benefits versus burdens without giving substantial deference to the government’s judgment concerning means and ends. Although the Court has used the intermediate level requirement of an “important” government interest in some of these freedom of association cases, such as *Burdick v. Takushi* and *Timmons v. Twin Cities Area New Party*, discussed at § 21.2.4.2 nn.88-93, the majority’s language in cases like *Timmons* about the government needing “important” regulatory interests, rather than merely “legitimate” interests, appeared to be completely unnecessary to the case, and to serve no useful purpose. When cataloguing the state’s interests, the majority noted in *Timmons* that “[s]tates certainly have an interest in protecting integrity, fairness, and efficiency of their ballots and election processes,” without any further finding that those interests were important or substantial. The language in the *Timmons* opinion about the state’s interests needing to be “correspondingly weighty” given the statute’s burdens underscores that the *Timmons* analysis is really a second-order rational review.

---

4 83 U.S. (16 Wall.) 36 (1873).

7 *Id.* at 364.
factor balancing test focusing on the “reasonableness” of the regulation, and attempting to ensure that burdens are not “clearly excessive.” Thus, the Timmons analysis is not an intermediate scrutiny element balancing test. In particular, the Court refused in Timmons to adopt an intermediate level of scrutiny for these less than severe burdens on associational rights, leaving Justices Stevens, Souter, and Ginsburg in dissent to press for standard intermediate scrutiny in this kind of case.\(^8\)

Similarly, the Court noted in Burdick v. Takushi\(^9\) that lesser burdens on associational rights trigger less exacting review, and a state's "important regulatory interests" will usually be enough to justify "reasonable, nondiscriminatory restrictions." In Burdick, the Court weighed the "character and magnitude" of the burden the State's rule imposes on those rights against the interests the State contends justify that burden, and considers the extent to which the State's concerns make the burden necessary.” Further, the Court “rejected the petitioner’s argument” in Burdick, thus suggesting that the challenger had the burden of proof. As in Timmons, this language also mirrors a second-order rational review balance, as in the Contracts Clause case of United States Trust Co. v. New Jersey,\(^10\) discussed at § 22.1.4 nn.29-30.

Cases involving government limitations on individuals’ freedom of association can arise in numerous contexts. In a number of such cases, the freedom of association right will be paired with another constitutional right, such as the Equal Protection Clause and the freedom of association in the ballot access cases, discussed at § 26.5.3, or the freedom of speech versus compelled association, as in using union fees or fees on businesses to promote certain kinds of speech, discussed at § 29.6.2.1, or freedom of speech and association regarding campaign finance, discussed at § 30.4.2. In addition, the freedom of association can come into conflict with other government policies, such as eliminating discrimination against certain groups of people, discussed at § 31.2.2, or regulating groups that may pose a threat of violent action or other harmful conduct, discussed at § 31.2.3, or regulating political parties to help ensure free and fair elections, discussed at § 31.2.4.\(^11\)

§ 31.2.2 Policies Aimed at Eliminating Discrimination

The basic principles regarding limits on government power to pursue an anti-discrimination policy by imposing membership requirements on private groups were developed during the instrumentalist era. In 1984, in Roberts v. United States Jaycees,\(^12\) the plaintiffs contended that the exclusion of

---

\(^8\) Id. at 383 n.2 (Souter, J., dissenting); id. at 377-78 (Stevens, J., joined by Souter & Ginsburg, JJ., dissenting).

\(^12\) 468 U.S. 609, 612-17 (1984).
women from the Jaycees violated the Minnesota Human Rights Act. That Act prohibited discrimination on the basis of gender by a business offering goods or services to the public. The Court held that the Constitution was not violated by application of the Act to the Jaycees.

In deciding the case, the Court recognized that the freedom of association is a fundamental right. Justice Brennan said that two forms of association were protected by the First Amendment: “intimate association,” a phase of personal liberty, and “expressive association,” a meeting together for First Amendment activities such as speech, assembly, petition for redress of grievances, and the exercise of religion. In Roberts, there had been no burden on the freedom of intimate association, since the Jaycees were neither small nor selective. However, there was a burden on the freedom of expressive association that required application of a strict scrutiny approach.\(^\text{13}\)

In applying strict scrutiny, Justice Brennan noted that Minnesota had a “compelling interest in eradicating discrimination against its female citizens.” The Act banning exclusion of women from the Jaycees was directly related to advancing that interest. Regarding narrow tailoring, Justice Brennan stated that the record did not demonstrate any serious burdens on the male members’ freedom of expression. He said there was no basis in the record “for concluding that admission of women as full voting members will impede the organization’s ability to engage in these protected activities or to disseminate its preferred views.” Thus, the statute was not unconstitutionally oppressive. Further, the statute was not unconstitutionally overinclusive since there were no less burdensome alternatives that would effectively advance the state’s compelling interest in eradicating discrimination against women. This justified “the impact that application of the statute to the Jaycees may have on the male members’ associational freedom.”\(^\text{14}\) The requirement under First Amendment review to engage in both oppressiveness/restrictiveness analysis and analysis for overinclusiveness is discussed at § 29.4.4.3 nn.149-53.

Similar cases have yielded similar results in the post-instrumentalist era. For example, in 1987, the Court held in Board of Directors of Rotary International v. Rotary Club of Duarte\(^\text{15}\) that requiring the admission of women in local rotary clubs did not interfere with “intimate association” because of the organization’s size, purpose, limited selectivity in choosing members, and the fact that many of their activities, including service activities, take place in the presence of strangers. Regarding the freedom of “expressive association,” rotary clubs do not take positions on public questions as a matter of policy. Even if some infringement resulted, it was justified by the compelling interest of eliminating discrimination against women.

The post-instrumentalist Court has faced cases where the individuals’ interest in association was greater, and thus strict scrutiny was harder for the state to meet. This difference was highlighted in

\(^{13}\) Id. at 617-23.

\(^{14}\) Id. at 623-29.

\(^{15}\) 481 U.S. 537, 544-49 (1987).
Hurley v. Irish-American Gay, Lesbian and Bisexual Group of Boston.\textsuperscript{16} In this 1995 case, the Court held that private citizens who organized a parade could not be required to include among the marchers a gay, lesbian, and bi-sexual group imparting a message that the organizers did not wish to convey. The Supreme Judicial Court of Massachusetts had held that the parade was a public accommodation within the meaning of the state's anti-discrimination statute, that the plaintiffs were excluded in violation of the statute because of their sexual orientation, and that the First Amendment did not protect the defendants because it was not possible to discern any specific expressive purpose in the parade. The Supreme Court disagreed with this last conclusion and held that the First Amendment freedom of association did protect the defendants.

For a unanimous Court, Justice Souter said that not many parades are beyond the realm of expressive activity. A “narrow, succinctly articulable message” is not a condition of constitutional protection. It is enough to constitute expressive activity if the marchers “are making some sort of collective point.” Further, one who is speaking privately, through a parade, is entitled to select components much as do newspaper editors. Here, there was no intent or effect to exclude homosexuals as such. Thus, the compelling interest in eradicating discrimination in membership, critical to the decisions in \textit{Roberts} and \textit{Rotary Club}, was not involved here. Instead, the disagreement went to the admission of a separate gay, lesbian, and bisexual parade unit marching under its own banner. The Massachusetts court, in effect, had declared the sponsor's speech to be a public accommodation. However, that violated the parade organizer's autonomy to choose the content of its own message, as it chose to do by excluding the homosexual parade unit.\textsuperscript{17} The Court distinguished \textit{Turner Broadcasting}, discussed at § 30.3.1 nn.210-11, in which cable operators were required to set aside some channels for designated broadcast signals. In that case, there was little risk that viewers would assume that messages carried on the system were endorsed by the cable operator, and the government's interest was not in altering speech, but in the content-neutral reason of survival of speakers. For this reason, the Court applied intermediate scrutiny in \textit{Turner Broadcasting}, and not strict scrutiny review.

Similar protection for a private organization to control its message was given in \textit{Boy Scouts of America v. Dale}.\textsuperscript{18} The Boy Scouts had revoked the membership of James Dale upon learning that he was an avowed homosexual and gay rights activist. The New Jersey Supreme Court held that the state’s public accommodations law required the Scouts to admit Dale. The Court held 5-4 that this violated the Boy Scout’s First Amendment right of expressive association. A dissent by three Justices indicated that they too would have protected the Scouts had the Scouts shown an expressive message that would be burdened by applying to them the state’s public accommodations law.

For the majority, Chief Justice Rehnquist said that forcing a group to accept certain members infringes the group’s freedom of expressive association if “the presence of that person affects in a

\textsuperscript{17}  \textit{Id.} at 568-81.

significant way the group’s ability to advocate public or private viewpoints.” Applying that test, he accepted the Boy Scout’s assertion that its mission is to serve others by helping to instill values in young people and that it teaches that homosexual conduct is not morally straight. The Chief Justice said it was not necessary that every member of a group agree on every issue in order for the group’s policy to be expressive association. “The Boy Scouts takes an official position with respect to homosexual conduct, and that is sufficient for First Amendment purposes.” Finally, the Chief Justice drew by analogy on *Hurley*, saying that the interests embodied in the public accommodations law do not justify a severe intrusion on the right to freedom of expressive association.

A dissent by Justice Souter, joined by Justices Ginsburg and Breyer, indicated that in their view the Scouts had not made out an expressive association claim because the Scouts had failed to make sexual orientation the subject of unequivocal advocacy. These three Justices admitted that applying an anti-discrimination statute to require a group to accept an individual might in some cases so modify, muddle, or frustrate the group’s advocacy as to violate its expressive association rights. And Justice Souter added, “While it is not our business here to rule on any such hypothetical, it is at least clear that our estimate of the progressive character of the group’s position will be irrelevant to the First Amendment analysis if such a case comes to us for decision.”

Justice Stevens’ dissent, joined by Justices Souter, Ginsburg, and Breyer, tracked in part Justice Souter’s dissent. Justice Stevens concluded that the state law did not impose any serious burdens on the Scouts and did not force the Scouts to communicate any message that the Scouts do not wish to endorse. He did not find in Scout policy statements any clear, consistent, and unequivocal position on homosexuality. The case is different than *Hurley*, he said, because Dale’s inclusion in the Scouts sends no cognizable message to the Scouts or to the world. In addition, Justice Stevens went beyond Justice Souter’s dissent by saying that unfavorable opinions about homosexuals have ancient roots and have caused serious and tangible harm that can only be aggravated by the creation of a constitutional shield for a policy that is itself the product of an habitual way of thinking about strangers. This more instrumentalist, policy-oriented position was a departure from the statement in Justice Souter’s dissent that in terms of associational rights “the progressive character of the group’s position will be irrelevant to the First Amendment analysis.”

Following *Dale*, a number of state and municipal governments responded to the Boy Scout’s clearer position on homosexuality by refusing the Boy Scouts access to public facilities, rescinding

outstanding contractual relations, revoking privileges, or barring the Boy Scouts from participating in state-sponsored charitable programs. Numerous private organizations also retracted existing funding or have refused to contribute to the Scouts, including at least 50 United Way chapters that stopped making financial contributions. As a matter of constitutional law, public entities, such as local public schools, would need to satisfy a strict scrutiny approach to justify excluding the Scouts from equal access to public facilities if the reason for denying the Scouts’ access was viewpoint discrimination based on the Scouts’ position regarding homosexuality. An interest in ensuring compliance with local or state anti-discrimination laws would be a compelling interest for purposes of strict scrutiny. Under the underinclusiveness aspect of strict scrutiny, however, discussed at § 26.1.1.2 n.56, the government would have to show that all groups engaging in discriminatory practices in violation of government policy were being banned from access, not just the Scouts, or else the special burden placed on the Scouts would be the result of unnecessary underinclusiveness, and thus not be the least discriminatory alternative. In some cases, the Scouts have successfully challenged restrictions on access to public facilities on this ground.

In contrast, where school administrators provide practical support for Boy Scout recruitment activities during school time for which student attendance and attention are mandatory, some courts have concluded that local schools boards have engaged in unlawful discrimination based on state or local anti-discrimination policies. In other cases, courts have held that denial of access was to discourage the harmful discriminatory conduct of the Boy Scouts, and not to suppress expressive association, and therefore have concluded that such action was viewpoint neutral. Where the conduct took place in a government-owned non-public forum, such as a government sponsored charitable subscription program, only rational review was triggered, as is typically for non-viewpoint discrimination in a non-public forum, discussed at § 29.2 n.67 & Table 29.2. Rational

25 See, e.g., Boy Scouts of America, South Florida Council v. Till, 136 F. Supp. 2d 1295, 1303-04, 1311 (S.D. Fla., 2001). Cf. Christian Legal Society v. Walker, 453 F.3d 853, 861-67 (7th Cir. 2006) (applying strict scrutiny based on viewpoint discrimination, preliminary injunction granted against public law school that revoked Christian Legal Society’s official student organizational status for refusing membership to practicing homosexuals in violation of school’s anti-discrimination policy banning discrimination on grounds of sexual orientation, in part because the Muslim Students’ Association and Adventist Campus Ministries were recognized as official student organizations despite their restricted memberships); Jana-Rock Construction, Inc. v. New York State Dep’t of Economic Develop., 438 F.3d 195, 207-09, 211-14 (2nd Cir. 2006) (“unnecessarily underinclusive” analysis needing to be done regarding whether it is constitutional to exclude persons of Portuguese and Spanish descent in affirmative action program for Hispanics, defined as Latin American Hispanics), discussed at § 26.2.1.4.C n.235.

27 See, e.g., Boy Scouts of America v. Wyman, 335 F.3d 80, 93-98 (2nd Cir. 2003).
review has also been applied when the government denied funding or subsidies to Boy Scout groups,28 based on Rust v. Sullivan, discussed at § 29.3.2 nn.79-80.  

In areas outside the specific context of the Boy Scouts and homosexuality, the doctrine of Boy Scouts of America v. Dale may have wider applicability. One author has noted, “The media has treated Dale mainly as a battle in the ongoing Kulturkampf between gay rights activists and their conservative opponents. However, the underlying moral rectitude of the [Scouts’] exclusion of homosexuals was not legally relevant in Dale. Rather, Dale was about the right of non-profit, private, expressive organizations of all ideological stripes – including church schools . . . – to set their membership and employment rules free from government interference.”29 This author then concluded that district court precedents that a Christian school may not fire an unmarried teacher for becoming pregnant, contrary to Christian doctrine on sexual activity outside of marriage, should be decided differently after Dale.30

§ 31.2.3 Policies Concerning Membership in Groups Alleged to Pose a Threat of Violent Action or Other Harmful Conduct

The Court has considered a number of cases involving government regulations that sanction individuals for membership in groups alleged to pose a threat of violent action. Where the group engages in activity that involves “unprotected speech,” such as advocacy of imminent lawless action, discussed at § 30.1.1.1, membership in such a group is “unprotected” under a freedom of association analysis. As the Court stated in Scales v. United States,31 “[T]he advocacy with which we are here concerned is not constitutionally protected speech, and . . . to promote such advocacy, albeit under the aegis of what purports to be a political party, is not such association as is protected by the First Amendment. We can discern no reason why membership, when it constitutes a purposeful form of complicity in a group engaging in this same forbidden advocacy, should receive any greater degree of protection from the guarantees of that Amendment.”

Where a threat of lawless action is not imminent, the First Amendment applies. During the Cold War, a number of these cases involved membership in the Communist Party. During the Holmesian era, inquiry into membership by the government tended to be upheld. For example, in 1951, in

---

28 Evans v. City of Berkeley, 40 Cal. Rptr. 3d 205, 211-17 (Cal. 2006).
Garner v. Board of Public Works of the City of Los Angeles, the Court held that a city could require its employees by affidavit to disclose their past or present membership in the Communist Party.

The outcome of these cases changed during the instrumentalist era. The instrumentalist-era Court required a finding that the individual shared in the illegal intent for the government to be able to regulate. For example, in 1967, in Keyishian v. Board of Regents, the Court struck down as unconstitutional a conviction for membership in the Communist Party because there was no proof that the individual knew of any illegal objectives of the Party or intended to further them. Relying on Garner, four Holmesian Justices dissented in Keyishian: Justices Clark, joined by Justices Harlan, Stewart, and White. In United States v. Robel, the Court made it clear that mere “membership” in such a group was not enough to satisfy a strict scrutiny approach. The government would have to show that the individual actively affiliated with the group, knowing of its illegal activities, and had a specific intent to promote those ends. By this time, Justice Clark had been replaced on the Court by Justice Marshall, and Justice Stewart joined the majority opinion, likely based on his great respect for precedent, noted at § 10.4 n.90. That left only Justices White and Harlan in dissent.

More recently, lower federal courts have upheld federal statutes passed after 9-11 making it a crime to provide “material support or resources to a foreign terrorist organization” so designated by the federal government, despite the lack of a specific intent element regarding the terrorist group’s goals. The courts have held that these statutes do not directly ban “expressive association,” but rather the “conduct of providing material support,” and thus should be analyzed as content-neutral regulations based on the harmful secondary effects of such conduct under O’Brien’s intermediate scrutiny approach, discussed at § 29.4.4.1 nn.119-20. Under such intermediate scrutiny, the statutes have been upheld as constitutional as substantially related to curbing the spread of international terrorism, and not substantially more burdensome than necessary.

34 389 U.S. 258, 264-68 (1967); id. at 268 (Marshall, J., took no part in the consideration or decision of this case); id. at 282-88 (White, J., joined by Harlan, J., dissenting).
35 See, e.g., United States v. Afshari, 426 F.3d 1150, 1159-62 (9th Cir. 2005), rehearing en banc denied, 446 F.3d 915, 915 (2006); United States v. Hammoud, 381 F.3d 316, 328-31 (4th Cir. 2004). But see Afshari, 446 F.3d at 915-22 (Kozinski, J., joined by Pregerson, Reinhardt, Thomas & Paez, J.J., dissenting from denial of rehearing en banc) (ban on giving money should be viewed as a prior restraint on speech, and analyzed under the strict scrutiny standard of Freedman v. Maryland for prior restraints, discussed at § 29.6.1.1 nn.215-17).
Where no such plausible content-neutral reason is apparent from the facts, a strict scrutiny approach is used to determine the validity of the government regulation. For example, in *Shelton v. Tucker*, the question was whether the state of Arkansas could ask its teachers to disclose every single organization with which the teacher had been associated over a five-year period. The Court noted that the “breadth of legislative abridgment must be viewed in the light of less drastic means for achieving the same basic purpose,” and, applying a least restrictive alternative approach, held the regulation unconstitutional because the state’s end in terms of “fitness and competency of its teachers” could “be more narrowly achieved.” In *NAACP v. Button*, the Court considered a Virginia statute that made it a crime for a person to advise another that his legal rights have been infringed and to refer him for assistance to a particular attorney or group of attorneys, such as the legal staff of the Virginia conference of the NAACP. Under a “compelling government interest” strict scrutiny approach, the Court held that such a statute violated the freedom of association of the NAACP, with the Court stating that despite Virginia's interest “in regulating the traditionally illegal practices of barratry, maintenance and champerty,” the government must regulate with “narrow specificity” and “precision of regulation,” which this statute did not.

An example of a regulation that might survive strict scrutiny would be a regulation merely requiring faculty at private universities to affirm allegiance to the Constitution. For example, in *Knight v. Board of Regents*, a three-judge district court held that a state does not violate the First Amendment by requiring teachers at private schools to support the governmental systems which shelter and nourish the institutions in which they teach. One author has noted that, as of 2003, 14 states required loyalty oaths of teachers to uphold the Constitution, with 7 of those oaths applying to teachers at private schools in addition to public schools. From that author’s perspective, such oaths applied to teachers at private schools should be viewed as unconstitutional under strict scrutiny as not being directly related to controlling illegal conduct. For oaths taken by public school teachers, the *Pickering* third-order rational review test would apply for speech by government employees, discussed § 30.2.2.1, giving the government a better chance of success, as in *Ohlson v. Phillips*.

Where the burden on a right of association is viewed as slight, as for a rule limiting the rights of prisoners to receive visitors, the Supreme Court indicated in *Overton v. Bazzetta* that the proper standard of review is the second-order rational review approach used in *Turner v. Safley*. In an unusual case, the Second Circuit held in *Church of American Knights of the Ku Klux Klan v. Kerik* that a ban on persons wearing masks at public gatherings, based on a concern with public safety and reducing criminal or violent activity, with an exception for masquerades, did not implicate the First Amendment at all. The court viewed the wearing of a mask as adding nothing to the expressive conduct of wearing a hood and robe. Probably the better analysis would be to view the regulation as either a minimal burden on associational rights triggering second-order rational review, or as a burden on speech in a public forum based on content-neutral concerns of reducing criminal activity, triggering an intermediate scrutiny approach, as analyzed by the district court in the case.

§ 31.2.4 Policies Concerning Elections

Cases involving burdens on associational rights also take place in the context of regulations of political parties and elections. Where the burden is great, strict scrutiny applies. For example, in *California Democratic Party v. Jones*, the Court was confronted with a referendum provision that converted the state's primary election from a closed primary to a blanket primary in which voters could vote for any candidate regardless of voter's or candidate's party affiliation. The Court stated, “We can think of no heavier burden on a political party's associational freedom. Proposition 198 is therefore unconstitutional unless it is narrowly tailored to serve a compelling state interest.”

On the other hand, lesser burdens on associational rights trigger less exacting review. As the Court noted in *Burdick v. Takushi*, a state's "important regulatory interests" will usually be enough to justify “reasonable, nondiscriminatory restrictions." As noted at § 31.2.1 nn.7-9, this involves application of a second-order kind of rational review. The regulation at issue in *Burdick* involved a challenge to the state of Hawaii’s absolute ban on write-in voting. The Court concluded that “in light of the adequate ballot access afforded under Hawaii's election code, the State's ban on write-in voting imposes only a limited burden on voters' rights to make free choices and to associate politically through the vote.” Thus, the Court applied this lower level of scrutiny.

On the merits, the Court then concluded that the state's legitimate interests in banning write-in voting at both the primary and the general election outweighed the petitioner's limited interest to choose...
his preferred candidate through a write-in ballot. The Court noted, "Hawaii's interest in "avoid[ing] the possibility of unrestrained factionalism at the general election" provides adequate justification for its ban on write-in voting in November. . . . The prohibition on write-in voting is a legitimate means of averting divisive sore-loser candidacies." In addition to this interest, Hawaii also supported its ban on write-in voting as a means of enforcing nominating requirements, combating fraud, and "fostering informed and educated expressions of the popular will." Hawaii also asserted that its ban on write-in voting at the primary stage is necessary to guard against "party raiding," which involved "the organized switching of blocs of voters from one party to another in order to manipulate the outcome of the other party's primary election." The Court noted, "Hawaii's system could easily be circumvented in a party primary election by mounting a write-in campaign for a person who had not filed in time or who had never intended to run for election. . . . The State has a legitimate interest in preventing [this], and the write-in voting ban is a reasonable way of accomplishing this goal."45

A less than undue burden was also found in Clingman v. Beaver.46 The Oklahoma state law here prevented a political party form inviting registered voters of other parties to vote in its primary, but permitted voters registered as independents to vote in the primary. Because of the “independent” option, the law was viewed as a less than undue burden on political associational rights, and upheld, consistent with Burdick, as being supported by legitimate interests in preserving political parties as viable and identifiable groups, retaining the importance of party affiliation, and minimizing the effects of party-splintering. In dissent, Justice Stevens, joined by Justices Souter and Ginsburg, viewed the state law as having a substantial burden both on the individual’s right to vote for the candidate of the voter’s choice and on the political party’s right to open its primary to registered voters of other others, as the Libertarian Party wished to do in this case. For them, the state law was unconstitutional under strict scrutiny.47

Additional election and ballot access cases are discussed at § 26.2.1.5 (racial discrimination and redistricting of election districts under the Equal Protection Clause); § 26.5.3 (right to vote and ballot access cases under the Equal Protection Clause); § 30.4.2.2 (freedom of speech cases involving disclosure requirements and anonymous advocacy in the context of election campaigns); and § 30.4.2.3 (freedom of speech cases involving regulation of political parties).

45 Id. at 439-42.

46 544 U.S. 581, 590-97 (2005); id. at 598-99 (O'Connor, J., joined by Breyer, J., concurring in part and concurring in the judgment) (“Oklahoma's semiclosed primary law” imposes “only a modest, nondiscriminatory burden on respondents' associational rights,”and “this burden is justified by the State's legitimate regulatory interests”); id. at 608-10, 617-18 (Stevens, J., joined by Souter & Ginsburg, JJ., dissenting) (Oklahoma’s law “diminishes the value of two important rights protected by the First Amendment: the individual citizen's right to vote for the candidate of her choice and a political party's right to define its own mission”; “it is not a mere ‘burden’; it is a prohibition,” which should trigger a strict scrutiny, “compelling government interest” analysis).
CHAPTER 32: THE RELIGION CLAUSES OF THE FIRST AMENDMENT

The First Amendment includes two clauses dealing with religion: the Establishment Clause and the Free Exercise Clause. As discussed at § 32.1, the Establishment Clause requires some level of separation of church and state. The amount of separation required varies according to the Justices’ decisionmaking style. As discussed at § 32.2, under the Free Exercise Clause, government actions discriminating against sincerely held religious beliefs trigger strict scrutiny. Non-discriminatory government regulations burdening religious practices trigger only minimum rational review.

§ 32.1 The Establishment Clause

§ 32.1.1 Introduction

The Establishment Clause of the First Amendment provides that “Congress shall make no law respecting an establishment of religion.” Although this literally creates only a congressional barrier, the Establishment Clause has been incorporated into the 14th Amendment’s Due Process Clause, like every other provision of the First Amendment, and thus imposes the same limits on states as on the federal government. As with the freedom of speech and the press, discussed at § 27.2.2 nn.111-12, this incorporation occurred for the Establishment and Free Exercise Clauses during the 1920s.¹

Under the Establishment Clause, four different tests have been used to find an “establishment of religion.” They are: (1) whether the government action has a sole purpose to advance religion, or a principal or primary effect to advance religion, or creates an excessive entanglement between church and state, the so-called Lemon test; (2) whether an objective observer would think the government action was an endorsement of religion; (3) whether the government action is coercing or proselytizing religion; and (4) whether the government action is an unreasonable accommodation of religion given our Nation’s history and traditions. While not a perfect match for the Justices’ views, in general the Lemon test reflects a liberal instrumentalist approach, the “endorsement” test reflects a natural law approach, the “coercion or proselytizing” test reflects a Holmesian approach, and the “history and traditions” test reflects a formalist approach.

As will be seen below, the Lemon test is still supported by the liberal instrumentalist Justices currently on the Court, Justices Stevens, Ginsburg, and Breyer, as the precedents decided under the Lemon test predominantly reflect the liberal policy of a strong separation of church and state. Justice O’Connor advocated replacing the Lemon test with an “endorsement” test, which Justice Souter is willing to follow. Justice Kennedy has focused more on the “coercion” or “proselytizing” of religion. Chief Justice Rehnquist, and Justices Scalia and Thomas, have wanted the analysis to focus more on specific historical examples of accommodation between church and state at the time the Constitution was ratified, as well as specific legislative and executive traditions since ratification. That will likely be the approach of Chief Justice Roberts and Justice Alito.

§ 32.1.2 The Development of Establishment Clause Doctrine

§ 32.1.2.1 The Natural Law Approach

In his treatise, Commentaries on the Constitution of the United States,² published in 1833, Joseph Story wrote of the First Amendment: "Probably at the time of the adoption of the constitution, and of the amendment to it, now under consideration, the general, if not the universal sentiment in America was, that Christianity ought to receive encouragement from the state, so far as was not incompatible with the private rights of conscience, and the freedom of religious worship. An attempt to level all religions, and to make it a matter of state policy to hold all in utter indifference, would have created universal disapprobation, if not universal indignation." Story continued: "The real object of the amendment was, not to countenance, much less to advance, Mahometanism, or Judaism, or infidelity, by prostrating Christianity; but to exclude all rivalry among Christian sects, and to prevent any national ecclesiastical establishment, which should give to a hierarchy the exclusive patronage of the national government. It thus cut off the means of religious persecution, (the vice and pest of former ages), and of the subversion of the rights of conscience in matters of religion, which had been trampled upon almost from the days of the Apostles to the present age."

This view of religious freedom reflects a Stage 3 concrete customs and traditions approach. Such a Stage 3 vision is limited to the concrete prevailing attitudes of the times, as discussed at § 15.4.1 nn.50-58. However, even Justice Story understood that the Establishment Clause went far beyond responding to this limited vision. He noted in his treatise, "It was under a solemn consciousness of the dangers from ecclesiastical ambition, the bigotry of spiritual pride, and the intolerance of sects, thus exemplified in our domestic as well as in foreign annals, that it was deemed advisable to exclude from the national government all power to act upon the subject . . . . Thus, the whole power over the subject of religion is left exclusively to the State governments, to be acted upon according to their own sense of justice and the State constitutions; and the Catholic and the Protestant, the Calvinist and the Arminian, the Jew and the Infidel, may sit down at the common table of the national councils without any inquisition into their faith or mode of worship." Justice Story added, "But this alone would have been an imperfect security, if it had not been followed up by a declaration of the right of the free exercise of religion, and a prohibition . . . of all religious tests."³

He could also have noted that the official presidential oath of office provides, in Article II, §1, cl. 8, “I do solemnly swear (or affirm) that I will faithfully execute the Office of President of the United States, and will to the best of my Ability, preserve, protect and defend the Constitution of the United States.” Underscoring an intent to exclude religion from the national government’s life, there is no “so help me God” final clause to the oath, despite the wide-spread use of that phrase then, as now, to swear in witnesses at trials and in other oaths of the time. In a later edition of Story’s Commentaries, the editor added the following remark, viewed as consistent with Story’s beliefs:

______________________________
³ Id. § 1873. For matters of state constitutional law, Justice Story did think states could be permitted to engage in various kinds of aid to religion, as long as that was permitted under their state Constitutions, as indicated in Terrett v. Taylor, 13 U.S. (9 Cranch) 43, 48-55 (1815) (Virginia law).
“[M]any regard it as a matter of serious concern that the Constitution does not expressly recognize the Supreme Being, or the fact that the nation is Christian, and are in favor of an amendment which shall embrace such recognition. The subject, however, appears as yet but slightly to influence the public mind.”\(^4\) Whether or not one regards this as a matter of serious concern, it is clear that even strong supporters of Christianity believed that to be consistent with Story’s views a constitutional amendment would be needed to commit the United States to the existence of a Supreme Being or to the country being a Christian nation. Even Justice Douglas’ famous dictum in Zorach v. Clauson\(^5\) that “we are a religious people whose institutions presuppose a Supreme Being” was stated in the context of applying a “strict neutrality” approach toward religion, and was used only to indicate that government did not have to be “hostile” toward religion to comply with the Establishment Clause.

This vision of strict government neutrality toward religion is reflective of a Stage 6 approach to religious freedom. As Justice Stevens noted in Wallace v. Jaffree,\(^6\) “Just as the right to speak and the right to refrain from speaking are complementary components of a broader concept of individual freedom of mind, so also the individual’s freedom to choose his own creed is the counterpart of his right to refrain from accepting the creed established by the majority. At one time it was thought that this right merely proscribed the preference of one Christian sect over another, but would not require equal respect for the conscience of the infidel, the atheist, or the adherent of a non-Christian faith such as Islam or Judaism. But when the underlying principle has been examined in the crucible of litigation, the Court has unambiguously concluded that the individual freedom of conscience protected by the First Amendment embraces the right to select any religious faith or none at all. This conclusion derives support not only from the interest in respecting the individual’s freedom of conscience, but also from the conviction that religious beliefs worthy of respect are the product of free and voluntary choice by the faithful, and from recognition of the fact that the political interest in forestalling intolerance extends beyond intolerance among Christian sects – or even intolerance among ‘religions’ – to encompass intolerance of the disbeliever and the uncertain.”

At the time of its ratification, the Establishment Clause prevented the federal government from interfering with the established churches in many states, typically Anglican or Congregationalist, as that would have been a law “respecting” the establishment of religion. Those state establishments all disappeared by the 1830s on freedom of religion grounds.\(^7\) When the Establishment Clause became applicable against the states through incorporation into the 14\(^{th}\) Amendment, the same vision of strict neutrality of government toward religion became applicable against the states. The Court noted in Everson v. Board of Education\(^8\) that the Establishment Clause "requires the state to be a neutral in its relations with groups of religious believers and non-believers." In School District of

\(^4\) Story, supra note 2, at §§ 1879 n.(a) (5\(^{th}\) ed. 1891) (Melville M. Bigelow, ed.).

\(^8\) 330 U.S. 1, 18 (1947).
Abington Township v. Schempp, the Court stated, "The place of religion in our society is an exalted one, achieved through a long tradition of reliance on the home, the church and the inviolable citadel of the individual heart and mind. We have come to recognize through bitter experience that it is not within the power of the government to invade that citadel, whether its purpose or effect be to aid or oppose, to advance or retard. In the relationship between man and religion, the State is firmly committed to a position of neutrality."

A similarly broad principle of neutrality toward religion was expressed by James Madison, the principal drafter of the Establishment Clause. As the Court noted in Wallace v. Jaffree, in his "Memorial and Remonstrance Against Religious Assessments, 1785," James Madison wrote, in part:

1. Because we hold it for a fundamental and undeniable truth, “that Religion or the duty which we owe to our Creator and the [Manner of discharging it, can be directed only by reason and] conviction, not by force or violence.” The Religion then of every man must be left to the conviction and conscience of every man; and it is the right of every man to exercise it as these may dictate. This right is in its nature an unalienable right. It is unalienable; because the opinions of men, depending only on the evidence contemplated by their own minds, cannot follow the dictates of other men: It is unalienable also; because what is here a right towards men, is a duty towards the Creator. It is the duty of every man to render to the Creator such homage, and such only, as he believes to be acceptable to him. . . . We maintain therefore that in matters of Religion, no man's right is abridged by the institution of Civil Society, and that Religion is wholly exempt from its cognizance. . . .

3. Because, it is proper to take alarm at the first experiment on our liberties. We hold this prudent jealousy to be the first duty of citizens, and one of [the] noblest characteristics of the late Revolution. . . . We revere this lesson too much, soon to forget it. Who does not see that the same authority which can establish Christianity, in exclusion of all other Religions, may establish with the same ease any particular sect of Christians, in exclusion of all other Sects?

Madison held these views his whole life. Quoting from letters of Madison, a court noted in 1872:

“Religion is not within the purview of human government.” And again [Madison] says, “Religion is essentially distinct from human government, and exempt from its cognizance. A connection between them is injurious to both. There are causes in the human breast which insure the perpetuity of religion without the aid of law.”

The history surrounding the drafting of the Establishment Clause supports this vision of strict neutrality. As Justice Souter noted in *Lee v. Weisman*, joined by Justices Stevens and O’Connor:

What is remarkable is that, unlike the earliest House drafts or the final Senate proposal, the prevailing language is not limited to laws respecting an establishment of "a religion," "a national religion," "one religious sect," or specific "articles of faith." The Framers repeatedly considered and deliberately rejected such narrow language and instead extended their prohibition to state support for "religion" in general.

Implicit in their choice is the distinction between preferential and nonpreferential establishments, . . . . [T]he Framers were vividly familiar with efforts in the colonies and, later, the States to impose general, nondenominational assessments and other incidents of ostensibly ecumenical establishments. . . . . The Virginia Statute for Religious Freedom, written by Jefferson and sponsored by Madison, captured the separationist response to such measures. Condemning all establishments, however nonpreferentialist, the Statute broadly guaranteed that "no man shall be compelled to frequent or support any religious worship, place, or ministry whatsoever," including his own . . . .

What we thus know of the Framers’ experience underscores the observation of one prominent commentator, that confining the Establishment Clause to a prohibition on preferential aid "requires a premise that the Framers were extraordinarily bad drafters – that they believed one thing but adopted language that said something substantially different, and that they did so after repeatedly attending to the choice of language." We must presume, since there is no conclusive evidence to the contrary, that the Framers embraced the significance of their textual judgment.12

Similarly, Professor Nadine Strossen has observed:

Justice Souter reviewed the substantial evidence that the framers did consider language that would have barred only government aid to specific sects, but then deliberately rejected these narrower formulations, in favor of the open-ended, broad prohibition in the Establishment Clause. Justice Souter's opinion in *Lee v. Weisman* also pointed to another problem with the nonpreferentialist version of the Establishment Clause . . . . As Justice Souter observed: “[N]onpreferentialism requires some distinction between ‘sectarian’ religious practices and those that would be, by some measure, ecumenical enough to pass Establishment Clause muster. [B]y requiring the enquiry, nonpreferentialists invite the courts to engage in comparative theology. I can hardly imagine a subject less amenable to the competence of the federal judiciary, or more deliberately to be avoided where possible.”13

---

Such a view requiring strict neutrality regarding religion by government does not mean that all expressions by government officials of their belief in a Supreme Being are unconstitutional, or that all statements directed to them in their public capacities are unconstitutional. Such individuals, after all, have their own free exercise rights. Thus, statements addressed to government officials to aid them in the performance of their public duties, such as beginning each day’s legislative session with a prayer, as in *Marsh v. Chambers*, discussed at § 32.1.2.3 n.49, or beginning Supreme Court sessions with the phrase “God Save this Honorable Court,” are not unconstitutional. Personal statements by the President, such as “God Bless America” at the end of presidential speeches, also do not create an Establishment Clause problem.

By the same token, the oath most persons take at trial to “tell the truth, the whole truth, and nothing but the truth, so help me God” does not create an Establishment Clause problem, since the government does not require the individual to add the phrase “so help me God” if the individual objects. Similarly, as Justice O’Connor noted, concurring in *Elk Grove Unified School District v. Newdow*,14 “the oaths of judicial office, citizenship, and military and civil service all end with the (optional) phrase ‘[S]o help me God.’ See 28 U.S.C. § 453; 5 U.S.C. § 3331; 10 U.S.C. § 502; 8 CFR § 337.1.” The phrase mentioning God must be optional, however. In *Torcaso v. Watkins*,15 a case involving a Maryland statute that required an individual to profess a belief in God to become a notary public, a unanimous Supreme Court held, “We repeat and again reaffirm that neither a State nor the Federal Government can constitutionally force a person ‘to profess a belief or disbelief in any religion.’ Neither [a State nor the Federal Government] can constitutionally pass laws or impose requirements which aid all religions as against non-believers, and neither can aid those religions based on a belief in the existence of God as against those religions founded on different beliefs.”

In contrast to permissible expressions regarding personal faith, government statements addressed to the public, such as posting the Ten Commandments in public schools or public courtrooms, do implicate the principle of strict neutrality toward religion by raising the specter of government endorsement of religion. This requirement of “strict neutrality” is reflective of the Lockean concept of “liberty of conscience” in religious matters. Consistent with the views of Justice Story and James Madison regarding the dangers of mixing government and religion, cited at § 32.1.2.1 nn.2-11, it has been noted that there was wide-spread agreement in 18th-century America among Puritans, Baptists, Enlightened Deists, and Civic Republicans for the Lockean concept of “liberty of conscience.”16 Under this conception:

> the commonwealth is composed by its members solely for the civil interests of life, liberty, and property and therefore has no jurisdiction over matters falling outside these interests. Once this view is accepted, it follows that civil government cannot interfere with matters of religion except to the extent necessary to preserve civil interests. . . .

---

[Locke] maintains that it would make no sense for a person to grant to another the power to compel him to act against conscience because (1) it is impossible to grant another the power to change one's mind, and (2) it is sinful to act against conscience. If one were to reject [this] view that it is wrong to act against conscience, then there would be no particular reason to deny that the individual could grant to the commonwealth power to exercise authority over affairs of religion. The connection between liberty of conscience and the [natural law concern with the] exercise of rationality was implicit in Locke's argument that liberty of conscience related to the "care . . . of every man's soul," which "belongs unto himself; and is to be left unto himself." The care of one's soul entailed the exercise of human reason, even though that reason must be directed towards forming true beliefs.

The familiar dichotomy of reason and faith did not seem to Locke a contradiction. In his Essay Concerning Human Understanding, he argued that "Reason leads us to the Knowledge of this certain and evident Truth, That there is an eternal, most powerful, and most knowing Being; which whether any one will please to call God, it matters not." Armed with this proposition, Locke further explained in a chapter on "Faith and Reason" that faith had to do only with matters of revelation, and that in such matters, revelation might confirm the dictates of reason, "yet cannot in such Cases, invalidate its Decrees." This led to the conclusion that one could never be obliged to abandon reason for something contrary to it "under a Pretence that it is [a] Matter of Faith." Thus, for Locke, it was entirely logical to connect liberty of conscience to rational activity. His argument for liberty of conscience was at once religious and rationalist.17

This Lockean view of liberty of conscience subsumed those who believed government should be kept separate from religion: (1) in order to protect religion, as evangelicals tended to hold; (2) in order to protect the secular interests of government, as Jefferson and other Deists tended to hold; or (3) in order to protect both, as Madison held. In his treatise, Professor Tribe noted:

[A]t least three distinct schools of thought . . . influenced the drafters of the [Religion Clauses]: first, the evangelical view (associated primarily with Roger Williams) that “worldly corruptions . . . might consume the churches if sturdy fences against the wilderness were not maintained”; second, the Jeffersonian view that the church should be walled off from the state in order to safeguard secular interests (public and private) “against ecclesiastical depredations and incursions”; and, third, the Madisonian view that religious and secular interests alike would be advanced best by diffusing and decentralizing power so as to assure competition among sects rather than dominance by any one.18

Although differing in their starting points, as Professor Tribe noted, each of these three views ended up supporting the Lockean vision, as noted above at § 32.1.2.1 n.16. As part of this Lockean vision, as quoted at § 32.1.2.1 n.17, “civil government cannot interfere with matters of religion except to the extent necessary to preserve civil interests.” This qualification was also part of the views of the Framing generation. As Madison phrased it in a letter to Edward Livingston on July 10, 1822, “I

17 Id. at 370-72 (citations omitted).

18 Laurence Tribe, American Constitutional Law 1158-59 (2d ed. 1988) (citations omitted).
observe with particular pleasure the view you have taken of the immunity of religion from civil government, in every case where it does not trespass on private rights or the public peace. This has always been a favorite doctrine with me.”19 This view regarding regulation to advance the public peace is reflected in modern Free Exercise Clause doctrine, discussed at § 32.2.2.5 nn.253-64, which permits neutral governmental regulations incidentally to burden religious beliefs as long as they advance legitimate public interests under a rational review test, and permits regulation discriminating against religious beliefs to be constitutional if the government can satisfy a strict scrutiny test.20

While arguments of practice are relevant in a natural law constitutional analysis, the fact that the traditional practices of many states following ratification did not live up to the Lockean and Madisonian vision of strict neutrality and liberty of conscience is not determinative from a natural law perspective. An analogous example involves the Equal Protection Clause as interpreted in *Plessy v. Ferguson*, *Sweatt v. Painter*, and *Brown v. Board of Education*. As discussed at § 26.2.1.1.B-26.2.1.1.E, despite ratification of the Equal Protection Clause after the Civil War, during the formalist era the Court tolerated whites treating non-whites as second-class citizens based on traditional practices, as permitted by *Plessy* and its progeny. During the Holmesian era, in cases like *Sweatt*, the Court banned the most extreme forms of such second-class treatment. However, it was not until *Brown*, and the cases which followed, that the Court rejected root-and-branch such second-class treatment. Every member of the Court today recognizes that *Plessy* from its inception violated the central mandate of equal protection and permitted decades of unconstitutional behavior.

Similarly, state treatment of non-Christians – whether Moslems, Jews, Buddhists, Hindus, agnostics, atheists, or others– as second-class citizens by state endorsement of Christianity, or state preference for Protestantism, such as posting the Protestant version of the Ten Commandments in classrooms or courthouses, not the Catholic version, as discussed at § 32.1.4 nn.215-18, violates the central mandate of the Establishment Clause protecting liberty of conscience. The fact that such practices occurred over many decades does not make them constitutional, just as many decades of Jim Crow laws did not make those laws constitutional. More recently, as discussed at §§ 32.1.3.1.B & 32.1.3.2.B, the Court has struck down more extreme forms of government violation of strict neutrality through the “endorsement” test as applied by Justices O’Connor and Souter, among others. But, as discussed at § 32.1.4, the Court has not yet has its *Brown* moment to reject forcefully second-class treatment by government of non-believers in service of the dominant majority’s faith.

§ 32.1.2.2 The Formalist Approach

As with other constitutional doctrines, the formalist approach to the Establishment Clause focuses on literal interpretation and specific historical intent, buttressed, as in substantive due process

19 Letter from James Madison to Edward Livingston (July 10, 1822), in 9 The Writings of James Madison 98, 100 (Gaillard Hunt ed., 1910).

analysis, discussed at § 27.1.1 nn.10-14, by specific legislative and executive practice. While such use of legislative and executive practice after ratification is inconsistent with a formalist preference for “static” interpretation, it is likely adopted here, as in the substantive due process area, discussed at § 9.2.2.1 nn.37-47, for pragmatic reasons or as a matter of “settled law” regarding constitutional interpretation. As noted at § 32.1.2.1 nn.2-18, aspects of literalness and specific historical intent could be used to support the concept of strict neutrality, given the views expressed by Madison and Justice Story; the history surrounding the drafting of the Establishment Clause; the wide-spread agreement in 18th-century America for the Lockean concept of “liberty of conscience”; and the text of the Constitution stating that “Congress shall make no law respecting an establishment of religion.” However, the result of most formalist analysis is more accommodating toward religion.

This is true even for those formalists who begin their analysis, based on text and specific intent, from a strict neutrality perspective. An example is formalist Justice Black’s 1947 opinion for the Court in *Everson v. Board of Education.*21 In *Everson,* Justice Black discussed the history of religious persecution among various sects in Europe and the American colonies before the Constitution was adopted. In light of this history, he noted that the Establishment Clause meant that neither the federal government nor a state could set up a church, aid one religion or all, or prefer one over another, influence or punish a person with respect to attending church or professing belief or disbelief in any religion, levy a tax to support religious activities or institutions, or participate in the affairs of religious organizations or groups and vice versa. On the other hand, he noted, the Establishment Clause only requires neutrality, not hostility, toward religion. A state may extend its general state law benefits, including fire and police protection, to all its citizens and to all its businesses and charitable organizations, including churches, without regard to religious faith.

In applying this test for neutrality in *Everson,* Justice Black adopted an accommodative approach to determining what were general state law benefits. *Everson* involved a New Jersey statute that authorized the reimbursement for parents of money expended by them on transportation of their children to school on buses operated by a public transportation system, including parents whose children attended parochial schools. In upholding the law, Justice Black stated that the reimbursements were part of a general program under which the state helped parents get their children safely to and from accredited schools, secular or religious. Any other decision would represent hostility toward religion.22 However, as noted by Justice Jackson in dissent, “[U]nder the Act and resolution brought to us by this case children are classified according to the schools they attend and are to be aided if they attend the public schools or private Catholic schools, and they are not allowed to be aided if they attend private secular schools or private religious schools of other faiths.”23 The Act was thus not neutral among religions, but favored Catholic schools over other private schools. It thus violated strict neutrality, as the dissenting opinions held in the case.24

22 *Id.* at 16-18.
23 *Id.* at 20-21 (Jackson, J., joined by Frankfurter, J. dissenting).
24 *Id.* at 18-19 (Jackson, J., joined by Frankfurter, J. dissenting); *id.* at 28-33 (Rutledge, J., joined by Frankfurter, Jackson & Burton, JJ., dissenting).
A similar case is *Wallace v. Jaffree*.25 *Wallace* involved an Alabama statute which provided that at the beginning of each school day “a period of silence not to exceed one minute in duration shall be observed for meditation or voluntary prayer, and during any such period no other activities shall be engaged in.” The majority held that given its legislative history this statute, by authorizing prayer, endorsed prayer in violation of neutrality between church and state. Although also applying a neutrality analysis, formalist Chief Justice Burger rejected that conclusion. He stated that it makes no sense to say that Alabama has "endorsed prayer" by merely enacting a new statute "to specify expressly that voluntary prayer is one of the authorized activities during a moment of silence," and that to “suggest that a moment-of-silence statute that includes the word ‘prayer’ unconstitutionally endorses religion, while one that simply provides for a moment of silence does not, manifests not neutrality but hostility toward religion. . . . Today's decision recalls the observations of Justice Goldberg: '[U]ntutored devotion to the concept of neutrality can lead to invocation or approval of results which partake not simply of that noninterference and noninvolvement with the religious which the Constitution commands, but of a brooding and pervasive dedication to the secular and a passive, or even active, hostility to the religious. Such results are not only not compelled by the Constitution, but, it seems to me, are prohibited by it.”26

In addition to applying any neutrality test in a manner more favorable toward accommodation, the formalist approach is also willing to analyze history from a more accommodationist perspective. For example, in *Wallace v Jaffree*, Justice Rehnquist, whose Holmesian predisposition of deference to government has led him to adopt a very accommodationist approach to Establishment Clause jurisprudence, noted:

James Madison was undoubtedly the most important architect among the Members of the House of the Amendments which became the Bill of Rights, but it was James Madison speaking as an advocate of sensible legislative compromise, not as an advocate of incorporating the Virginia Statute of Religious Liberty into the United States Constitution. During the ratification debate in the Virginia Convention, Madison had actually opposed the idea of any Bill of Rights. His sponsorship of the Amendments in the House was obviously not that of a zealous believer in the necessity of the Religion Clauses, but of one who felt it might do some good, could do no harm, and would satisfy those who had ratified the Constitution on the condition that Congress propose a Bill of Rights. His original language "nor shall any national religion be established" obviously does not conform to the "wall of separation" between church and State idea which latter-day commentators have ascribed to him. His explanation on the floor of the meaning of his language – “that Congress should not establish a religion, and enforce the legal observation of it by law" is of the same ilk. When he replied to Huntington in the debate over the proposal which came from the Select Committee of the House, he urged that the language "no religion shall be established by law" should be amended by inserting the word "national" in front of the word "religion."

It seems indisputable from these glimpses of Madison's thinking, as reflected by actions on the floor of the House in 1789, that he saw the Amendment as designed to prohibit the establishment of a national religion, and perhaps to prevent discrimination among sects. He did not see it as requiring neutrality on the part of government between religion and irreligion.\footnote{Id. at 97-99 (Rehnquist, J., dissenting).}

There are two main problems with use of this history to support a view that the Establishment Clause does not require neutrality toward religion, but only no discrimination among sects. First, Madison’s belief that no Bill of Rights provision was necessary was held precisely because of the belief, similar to Justice Story’s understanding of the Establishment Clause, that the national government was granted no affirmative power over religion in the first instance. For Madison, that principle was reflected in the fact that Article I, § 8 contained no power over religion. Second, as noted in Justice Souter’s passage from \textit{Lee v. Weisman}, cited at § 32.2.1.1 n.12, the framers rejected Madison’s more limited proposal regarding “national religion” in favor of the broader language of the Establishment Clause.

In his opinion in \textit{Wallace},\footnote{Id. at 104-06.} Justice Rehnquist also referred to passages by Justice Story concerning the general sense of the American people, cited at the beginning of § 32.1.2.1 n.2, to support the view that the Establishment Clause only banned preferentialist statements in favor of one religious sect over another. Conspicuous by its absent in Justice Rehnquist’s opinion, however, was citation to Justice Story’s ultimate conclusion that the Establishment Clause was drafted as a prophylactic ban on any national governmental power over religion, discussed at § 32.1.2.1 n.3.

Even under Justice Rehnquist’s view, which would permit nonpreferentialist statements of religion, just not discrimination among religious sects, the typical formalist analysis is to view the facts in an accommodationist manner. For example, Professor Strossen has noted about Justice Scalia:

\begin{quote}
A woman in the audience asked Justice Scalia why the rabbi's prayer in \textit{Lee v. Weisman}, which closely paraphrased a traditional Jewish prayer of thanksgiving – the "Shehecheyanu" – did not violate even Justice Scalia's limited view of the Establishment Clause. . . . He said that, despite its traditional Jewish nature, the prayer at issue in \textit{Weisman} was nonetheless not sufficiently "sectarian" to trigger his limited version of the Establishment Clause because it was "not uncongenial to any other religion." I fully share the questioner's flabbergasted response, which she expressed in these understated terms: "That's a very interesting view of sectarianism." One has to wonder, if Justice Scalia does not deem this government-sponsored prayer sufficiently sectarian to violate his nonpreferentialist conception of the Establishment Clause, what government-sponsored prayer, if any, would satisfy that limited conception.\footnote{Strossen, \textit{supra} note 13, at 462.}
\end{quote}

In 2005, in \textit{Van Orden v. Perry},\footnote{125 S. Ct. 2854, 2864 (2005) (Scalia, J., concurring).} discussed at § 32.1.3.2.B nn.200-02, a case permitting a plaque

Justice Scalia phrased his preferred approach to the Establishment Clause as follows: “I would prefer [doctrine] that is in accord with our Nation's past and present practices, and that can be consistently applied – the central relevant feature of which is that there is nothing unconstitutional in a State's favoring religion generally, honoring God through public prayer and acknowledgment, or, in a nonproselytizing manner, venerating the Ten Commandments.” In support of such an approach, one commentator has noted, “Some of the earliest American colonies began as havens for religious believers. Religious institutions operated nearly the entire educational system in eighteenth-century America. . . . During the eighteenth century, Congress consistently permitted the performance of invocations and religious services in the United States Capitol.”

Justice Thomas has argued for an even more accommodationist approach toward religion. In his view, the Establishment Clause should be viewed as not having been incorporated against the states, while also supporting the view that “establishment of religion” should be read “necessarily [to] involve actual legal coercion,” based in part on Justice Scalia’s observation that the “coercion that was a hallmark of historical establishments of religion was coercion of religious orthodoxy and of financial support by force of law and threat of penalty.”

Both of Justice Thomas’ conclusions are not consistent with a principled formalist analysis, but reflect conservative instrumentalism. With respect to the doctrine of incorporation, every other Justice since 1937 has viewed the Establishment Clause as protecting a right as least as fundamental as the other Bill of Rights which are incorporated. From a formalist perspective, that view should be “settled law.” Further, there is no specific historical intent evidence supporting Thomas’ position that the Establishment Clause was viewed differently by the framers and ratifiers of the 14th Amendment than the other Bill of Rights provisions. Only a conservative instrumentalist, with little respect for precedent, and greater emphasis on reaching a result consistent with a particular policy perspective, could take Justice Thomas’ position on incorporation.

Regarding the meaning of the Establishment Clause, the framers and ratifiers did not prohibit only “establishment” of “a religion,” but any law “respecting establishment of religion,” as noted at § 32.1.2.1 nn.12-13. Indeed, an unenacted version of the Clause, proposed in the House of Representatives by Representative Samuel Livermore, provided that “Congress shall make no laws touching religion, or infringing the rights of conscience.” Representative Livermore's motion passed by a vote of 31 for and 20 against. The following week, without any apparent debate, the House voted to alter the language of the Religion Clauses to read “Congress shall make no law establishing

religion, or to prevent the free exercise thereof, or to infringe the rights of conscience.” The fact there was no debate suggests that change was viewed as predominantly stylistic in nature. Broadening of the language to provide “Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof” became the final version.34

Nothing in the history suggests that this final change was intended to dilute the “right of conscience.” Rather, the Lockean concept of a “right of conscience,” noted at § 32.1.2.1 n.16-18, was now part of “no law respecting an establishment of religion, or prohibiting the free exercise thereof.” In addition, as Justice Story noted, cited at § 32.1.2.1 nn.2-3, even if the “real object of the amendment was . . . to prevent any national ecclesiastical establishment,” that object was achieved by banning “the whole power over the subject of religion.” Thus, Justice Thomas’ attempt to minimize these aspects of Establishment Clause history35 is not faithful to literal text or specific historical intent.

The final aspect of a formalist approach to the Establishment Clause involves noting the various customary and traditional governmental practices that have supported religion throughout our Nation’s history that would violate a strict neutrality conception of the Establishment Clause.36 Great reliance on such concrete customary and traditional practices is not surprising for a formalist approach, grounded as it is, as discussed at § 15.3 nn.41-43 & 15.4.1 nn.60-66, on Kohlberg’s Stage 4 concrete operational thought. However, just as the customs and traditions regarding Jim Crow did not make Plessy a valid interpretation of the Equal Protection Clause, such customs and traditions should not make the nonpreferentialist conception a valid interpretation of the Establishment Clause, given the text, purpose, and history arguments in favor of a strict neutrality approach, discussed at § 32.1.2.1. From any moral perspective more cognitively advanced than Stage 4, and thus a moral perspective transcending mere customs and traditions, as discussed at §§ 15.4.1 nn.67-81 & 16.1, such customs and traditions are not entitled to determinative weight.

In addition, it is perhaps not surprising that such “non-preferentialist” expressions of religion, particularly those tolerated in 19th-century and 20th-century America during the formalist era between 1873 and 1937, came against a backdrop of pervasive anti-Semitism37 and pervasive anti-

36 See, e.g., McCreary County, Kentucky v. ACLU of Kentucky 125 S. Ct. 2722, 2748, 2750 (2005) (Scalia, J., joined by Rehnquist, C.J., and Thomas, J., dissenting), discussed at § 32.1.4 n.207; Wallace, 472 U.S. at 100-04 (Rehnquist, J., dissenting).
Catholicism.\textsuperscript{38} That history of discrimination cautions of the dangers of embracing a “customs and traditions” formalist approach, and underscores the Framing generation’s concerns, as expressed by Madison, cited at § 32.1.2.1 n.10, that “in matters of Religion, no man's right is abridged by the institution of Civil Society, and that Religion is wholly exempt from its cognizance.”

\section*{§ 32.1.2.3 The Holmesian Approach}

Like the natural law approach, the Holmesian approach to the Establishment Clause is based on the text, purpose, and history behind the clause, which, as noted at § 32.1.2.1, supports a view of government neutrality toward religion. However, reflecting the Holmesian deference-to-government mentality, the Holmesian application of neutrality is more deferential toward government than the natural law approach. For most Holmesians, this has meant that government must “coerce” or “proselytize” religion, not merely “endorse” religion, for the governmental practice to be unconstitutional. On the other hand, based on great deference to legislative and executive practice, some Holmesians have embraced the formalist approach toward the Establishment Clause which is based more on concrete legislative and executive customs and traditions, as discussed at § 32.1.2.2 nn.36-38. This has been true especially for conservative Holmesians, such as Justice Reed in the 1940s,\textsuperscript{39} or Justice Stewart in the 1960s,\textsuperscript{40} or Chief Justice Rehnquist in the 1980s through 2000s.\textsuperscript{41} Centrist and liberal Holmesians, however, such as Justices Frankfurter and Jackson in the 1940s through 1960s, have focused more on “proselytizing” or “coercion” as the appropriate inquiry.

For example, Justice Jackson noted in \textit{West Virginia State Board of Education v. Barnette},\textsuperscript{42} “If there is any fixed star in our constitutional constellation, it is that no official, high or petty, can prescribe what shall be orthodox in politics, nationalism, religion, or other matters of opinion or force citizens

\textsuperscript{39} See, e.g., Illinois ex rel. McCollum v. Board of Educ., 333 U.S. 203, 250-56 (1948) (Reed, J., dissenting) (customs and traditions support a public school during school hours having students attend voluntarily a class in religious education).

\textsuperscript{40} See, e.g., Engel v. Vitale, 370 U.S. 421, 444-50 (1962) (Stewart, J., dissenting) (customs and traditions support a moment of voluntary prayer at the beginning of the public school day).

\textsuperscript{41} See, e.g., Wallace v. Jaffree, 472 U.S. 38, 100-03 (1985) (Rehnquist, J., dissenting) (customs and traditions support a moment of silence at the beginning of the public school day where the state statute provided that the moment of silence was for “meditation or prayer”); Lee v. Weisman, 505 U.S. 577, 632-36 (1992) (Scalia, J., joined by Rehnquist, C.J., and White \& Thomas, JJ., dissenting) (customs and traditions support a school-sponsored benediction at a high school graduation ceremony).

\textsuperscript{42} 319 U.S. 624, 642 (1943).
to confess by word or act their faith therein." In *Everson v. Board of Education*, Justices Jackson and Frankfurter, among others, in dissent, concluded that the Court was permitting aid to private religious schools, and was thus necessarily engaged in a form of proselytizing religion. In a dissent joined by Justices Frankfurter, Jackson, and Burton, Justice Rutledge said that the object of the Establishment Clause was to prevent any such form of aid to proselytize religion: “It was to create a complete and permanent separation of the spheres of religious activity and civil authority by comprehensively forbidding every form of public aid or support for religion.”

In 1948, the Court invalidated an Illinois “released time” program in *Illinois ex rel. McCollum v. Board of Education*. In this program, religious teachers, employed by private religious groups, were permitted to come weekly into public school buildings during regular hours and, for children of parents who consented, substitute their religious teaching for the secular education in which other children continued to participate. The Court said that the state was helping to provide pupils with religious instruction through the state's machinery in violation of the separation of church and state. The only dissenter was Justice Reed, who pointed out that Thomas Jefferson approved such a program at the University of Virginia. Adopting the formalist focus on customs and tradition, as conservative Holmesian Chief Justice Rehnquist has often done, conservative Holmesian Justice Reed allowed this history of past practice to be determinative of constitutional meaning.

In *Zorach v. Clauson*, decided in 1952, the Court upheld a "released time" program in which students, whose parents had authorized their participation, could leave the school building and go to religious centers for religious instruction or devotional exercises. Other students remained in their classrooms. In dissent, Justice Jackson noted that there was still an element of coercion present, since the school “serves as a temporary jail for a pupil who will not go to church.” Jackson said, “This released time program is founded upon a use of the State's power of coercion, which, for me, determines its unconstitutionality. Stripped to its essentials, the plan has two stages, first, that the State compel each student to yield a large part of his time for public secular education and, second, that some of it be 'released' to him on condition that he devote it to sectarian religious purposes.”

Justice Frankfurter also dissented in *Zorach*. He stated, “When constitutional issues turn on facts, it is a strange procedure indeed not to permit the facts to be established. When such is the case, there are weighty considerations for us to require the State court to make its determination only after a thorough canvass of all the circumstances and not to bar them from consideration. If we are to decide this case on the present record, however, a strict adherence to the usage of courts in ruling on the sufficiency of pleadings would require us to take as admitted the facts pleaded in the appellants' complaint, including the fact of coercion, actual and inherent. Even on a more latitudinarian view, I cannot see how a finding that coercion was absent, deemed critical by this Court in sustaining the practice, can be made here, when appellants were prevented from making

a timely showing of coercion because the courts below thought it irrelevant.\footnote{Id. at 322-23 (Frankfurter, J., dissenting).}

This Holmesian approach focusing on “coercion” or “proselytizing” of religion also turned out to be the controlling vote in \textit{Lee v. Weisman},\footnote{505 U.S. 577, 590-99 (1992).} during the first part of the modern natural law era in 1992, because of its adoption by Justice Kennedy, who usually follows a natural law approach. In \textit{Weisman}, the Court held that a public school could not offer an invocation or benediction in a graduation exercise because this exerted a subtle coercive pressure on students to participate in, or appear to participate in, a religious exercise, given the fact that presence at graduation is, in a practical sense, obligatory. Justice Kennedy explained that a “state-created orthodoxy puts at grave risk the freedom of belief and conscience which are the sole assurance that religious faith is real, not imposed.”\footnote{Id. at 592.} Reflecting a pragmatic approach, eschewing formalist literalism, Kennedy indicated that literal legal coercion was not required, if in-fact coercive pressure existed.

For Justice Kennedy, the case was distinguishable from \textit{Marsh v. Chambers},\footnote{463 U.S. 783, 792-95 (1983).} which allowed prayers at legislative sessions, because any influence is much less in that setting. In that setting, as noted at § 32.1.2.1 text following n.13, any benediction is directed to individuals as part of discharging their public jobs. Those individuals already have well-formed views. It was not a part of state-sponsored educational program, as in \textit{Weisman}, with the state coercing or proselytizing on behalf of religion. This focus on “coercion” as the touchstone of Establishment Clause analysis is consistent with a Holmesian emphasis on legislative and executive practice, which, during the first 150 years of the Nation’s history, was predominantly concerned with: “(1) institutional mingling between government and religion, (2) direct governmental support for a particular religion, (3) special privileges for a particular religion, or (4) coercion of religious belief, including the punishing of non-adherents.”\footnote{Stuart Buck, \textit{The Nineteenth-Century Understanding of the Establishment Clause}, 6 Tex. Rev. L. & Pol. 399, 400 (2002). See generally id. at 400-09; Michael W. McConnell, \textit{The Origins of the Religion Clauses of the Constitution: Coercion: The Lost Element of Establishment}, 27 Wm. & Mary L. Rev. 933, 939-41 (1986).}

While Justice Kennedy was the critical fifth vote in \textit{Weisman}, and thus his adoption of the “coercion” test was determinative in that case, given the change in Court membership since 1992, a 5-Justice majority of Justices Stevens, O’Connor, Souter, Ginsburg, and Breyer analyzed Establishment Clause cases from 1994-2005, at a minimum, from the more vigorous natural law requirement of “strict neutrality,” which requires no government “endorsement” of religion. During this period, the instrumentalist or instrumentalist-leaning among these Justices also still relied occasionally on the instrumentalist \textit{Lemon} test, discussed next, at § 32.1.2.4.
§ 32.1.2.4  The Instrumentalist Approach

In 1971, in *Lemon v. Kurtzman*, the Court invalidated statutes of Rhode Island and Pennsylvania that provided financial aid to non-public schools or their teachers, the schools being primarily Roman Catholic schools. The Rhode Island statute paid a bonus of up to 15% of the regular salary for teachers of secular subjects, provided the teacher used only teaching materials used in the public schools and agreed not to teach a course in religion while receiving the supplement. The Pennsylvania law reimbursed schools for expenditures on secular educational services involving salaries, textbooks, and instructional materials. Chief Justice Burger developed a test that reflected the precedents of the instrumentalist era. He said that three concerns may be gleaned from the cases:

1. The law must have a secular legislative purpose;
2. Its principal or primary effect must be one that neither advances nor inhibits religion;
3. The law must not foster an excessive government entanglement with religion.

This test reflects a categorical doctrine approach, with a three-part means/end element analysis – that kind of doctrine discussed generally at § 21.2.2.4 – with the three elements being a focus on ends (purposes); the benefit derived from the law’s means (incidental effect, or principal or primary effect); and burdens (whether or not excessive entanglement is fostered). Applying this test, the Chief Justice said there was no reason to believe the legislatures meant to do anything other than what the statutes declared, *i.e.*, to enhance the quality of the secular education in all schools covered by compulsory attendance laws. As to the second prong, the Court did not need to decide whether certain legislative precautions restricted the principal or primary effect of the programs, because the cumulative impact of the relationship arising under the statutes involved excessive entanglement.

Explaining his entanglement conclusion, the Chief Justice said that the determination of whether there was a principal or primary effect to advance religion would require examining (1) the character and purposes of the institutions benefitted, (2) the nature of the aid, and (3) the resulting relationship. Looking to the nature of the aid, the Chief Justice said that the Court could not ignore the likelihood that teachers in parochial schools would experience great difficulty in remaining religiously neutral. A comprehensive and continuing state surveillance will be required to ensure that restrictions on teachers will be obeyed. Further, it seemed likely that these plans would entail considerable political activity with respect to which, unlike tax exemptions, there is not two hundred years of history. Thus, there would be entanglement with respect to both (1) government intrusion into religious instruction and (2) church intrusion into affairs of government.

Justice Douglas concurred, with Justice Black. Justice Douglas said that the principal “raison d’être” for the existence and growth of Catholic schools in this country was that Protestant groups were perverting the public schools by using them to propagate their faith. After much conflict during the 19th century, religious instruction was eliminated from public schools and the use of public funds to support religious schools was banned. The situation now has changed and public funds are supplied to sectarian schools in various ways. But this may result in two kinds of forbidden entanglement: government through grants or otherwise may (1) punish a sect for

propagation of its faith or (2) deprive a teacher, under threats of reprisal, of the right to give a sectarian construction to matters of history or literature, or to use the teaching of those subjects to inculcate a religious creed or dogma.\textsuperscript{52}

Justice White, dissenting in part, said that the states were helping to finance the important secular function of education. That religion may incidentally benefit does not convert the laws into impermissible establishments of religion. In his view, the Rhode Island Act clearly augmented the salaries of teachers in nonpublic schools teaching only secular subjects, and thus was constitutional, while a trial should have been held on whether the Pennsylvania Act, which on its face only reimbursed for secular educational services, in fact financed religious instruction by the state.\textsuperscript{53}

In applying the \textit{Lemon} test, the Court has noted that the state's motive, benign or not, is not relevant. As early as 1943, the Court had noted in \textit{West Virginia State Board of Education v. Barnette}:

\begin{quote}
Struggles to coerce uniformity of sentiment in support of some end thought essential to their time and country have been waged by many good as well as by evil men. Nationalism is a relatively recent phenomenon but at other times and places the ends have been racial or territorial security, support of a dynasty or regime, and particular plans for saving souls. As first and moderate methods to attain unity have failed, those bent on its accomplishment must resort to an ever-increasing severity. As governmental pressure toward unity becomes greater, so strife becomes more bitter as to whose unity it shall be. . . . Those who begin coercive elimination of dissent soon find themselves exterminating dissenters. Compulsory unification of opinion achieves only the unanimity of the graveyard.\textsuperscript{54}
\end{quote}

Reflecting these concerns, the \textit{Lemon} test, particularly as applied by liberal instrumentalist Justices, has been used to support sensitivity to religious diversity and the inclusion of all persons of different faiths or non-believers as equal citizens in American society.\textsuperscript{55} More broadly, it supports a Stage 5 pluralistic democracy, which is associated with instrumentalism, as discussed at § 15.4.1 nn.72-76, by serving as “a prophylactic measure that (1) protects religious liberty and autonomy, including the protection of taxpayers from being forced to support religious ideologies to which they are opposed; (2) stands for equal citizenship without regard to religion, . . . ; (3) protects against the destabilizing influence of having the polity divided along religious lines; (4) promotes political community; (5) safeguards the autonomy of the state to protect the public interest; (6) shelters churches from the corrupting influences of the state; and (7) promotes religion in the private sphere.”\textsuperscript{56}

\begin{flushright}
\textsuperscript{52} \textit{Id.} at 626-42 (Douglas, J., joined by Black, J., concurring).
\textsuperscript{53} \textit{Id.} at 665-71 (White, J., concurring in part and dissenting in part).
\textsuperscript{54} 319 U.S. 624, 640-41 (1943).
\end{flushright}
As the Court has applied the *Lemon* test, it has come under attack by dissenters as not reflecting, in practice, principled or predictable doctrine. For example, when considering the issue of legislative “purpose,” the Court concluded in *Engel v. Vitale*\(^57\) that beginning each public school day with a prayer had no secular purpose. The Court noted, "It is neither sacrilegious nor antireligious to say that each separate government in this country should stay out of the business of writing or sanctioning official prayers and leave that purely religious function to the people themselves and to those the people choose to look for religious guidance." Similarly, in *Stone v. Graham*,\(^58\) the Court held that a statute requiring the posting of the Ten Commandments on the walls of every public school classroom had only a religious purpose. In *Edwards v. Aguillard*,\(^59\) the Court held that Louisiana's Creationism Act, which forbid the teaching of the theory of evolution in public elementary and secondary schools unless accompanied by instruction in the theory of “creation science,” was unconstitutional because, despite Louisiana’s argument they were merely supporting a diversity of viewpoints, “the primary purpose of the Creationism Act is to endorse a particular religious doctrine.”

On the other hand, the Court held in *McGowan v. Maryland*\(^60\) that a state law requiring businesses to be closed on Sunday, while having “strongly religious origin[s],” and thus being accommodating to religion, was nonetheless permissible because it had a secular purpose of providing “a uniform day of rest for all citizens.” In *Gillette v. United States*,\(^61\) the Court held that creating an exception to draft laws for conscientious objectors did not violate the Establishment Clause because, despite such an exemption having a purpose of accommodating to the views of religious conscientious objectors, the law was supported by the secular, pragmatic consideration of the difficulty of converting a sincere conscientious objector into an effective fighting man. In *Rosenberger v. Rector and Visitors of the University of Virginia*,\(^62\) the Court permitted a university to impose on students a fee to support a diversity of viewpoints, including religious viewpoints, because excluding religious viewpoints would be “hostile” to religion and would deny individuals rights under the Free Speech Clause of the First Amendment, as discussed at § 29.3.2. nn.81-82. In addition, in a number of cases involving the Free Exercise Clause, discussed at § 32.2.2.4 nn.241-46, the Court has held that states must accommodate the beliefs of religious citizens by exempting them from generally applicable regulations, and this is not an unconstitutional legislative purpose.\(^63\)

In *Edwards v. Aguillard*, Justice Scalia, joined by Chief Justice Rehnquist, observed that given these cases, and others:

Our cases interpreting and applying the purpose test have made such a maze of the Establishment Clause that even the most conscientious governmental officials can only guess what motives will be held unconstitutional. We have said essentially the following: Government may not act with the purpose of advancing religion, except when forced to do so by the Free Exercise Clause (which is now and then); or when eliminating existing governmental hostility to religion (which exists sometimes); or even when merely accommodating governmentally uninhibited religious practices, except that at some point (it is unclear where) intentional accommodation results in the fostering of religion, which is of course unconstitutional.  

Justice Scalia continued:

But the difficulty of knowing what vitiating purpose one is looking for is as nothing compared with the difficulty of knowing how or where to find it. . . . [D]iscerning the subjective motivation of those enacting the statute is, to be honest, almost always an impossible task. The number of possible motivations, to begin with, is not binary, or indeed even finite. In the present case, for example [Louisiana’s “Creationism Act” which forbid the teaching of the theory of evolution in public elementary and secondary schools unless accompanied by instruction in the theory of “creation science”], a particular legislator need not have voted for the Act either because he wanted to foster religion or because he wanted to improve education. He may have thought the bill would provide jobs for his district, or may have wanted to make amends with a faction of his party he had alienated on another vote, or he may have been a close friend of the bill’s sponsor, or he may have been repaying a favor he owed the majority leader, or he may have hoped the Governor would appreciate his vote and make a fundraising appearance for him, or he may have been pressured to vote for a bill he disliked by a wealthy contributor or by a flood of constituent mail, or he may have been seeking favorable publicity, . . . or, of course, he may have had (and very likely did have) a combination of some of the above and many other motivations. To look for the sole purpose of even a single legislator is probably to look for something that does not exist.  

406 U.S. 205, 213-19 (1972) (unconstitutional to apply Wisconsin's compulsory education law to Amish parents who amply supported their claim that enforcement of the compulsory formal education requirement after the eighth grade would gravely endanger, if not destroy, the free exercise of their religious belief); Sherbert v. Verner, 374 U.S. 398, 403-09 (1963) (unconstitutional to apply eligibility provisions of unemployment compensation statute to deny benefits to a Seventh-Day Adventist, who had refused employment based on her religious beliefs, since that employment would have required her to work on Saturday, her sabbath).

*Id.* at 636-37.
Regarding the second “principal or primary effect” prong of Lemon, inconsistencies can also be noted in the Court’s decisions. For example, the Court has found a primary effect to advance religion in providing funds to repair “physical facilities” at a private religious school,66 but only an incidental effect where funds were provided to build “secular buildings” on a religious campus67; a primary effect to advance religion by providing loans of “instructional equipment and materials” to private schools,68 but only an incidental effect to provide “secular textbooks” to students69; and a primary effect to advance religion to provide tuition grants to parents of children attending private schools,70 but only an incidental effect where tax benefits for textbooks, tuition, and transportation were granted to parents for children in public or private schools, despite the fact that parents of children in private schools would get most of the benefit, since private tuition is the main part of the expense, and 96% of children attending private schools attended religious schools.71

Regarding the third “excessive entanglement” prong of Lemon, an attempt to police the risk that religious messages will be conveyed in a school program funded by public funds has constituted excessive entanglement of religion. At the same time, no excessive entanglement existed in annual state grants to private colleges, including religiously affiliated institutions, although four judges dissenting would have found excessive entanglement from dependency on grant money.72 Recordkeeping and disclosure requirements associated with routine collection of sales taxes on sale of religious materials was held to create no excessive entanglement, while recordkeeping and disclosure requirements on charities soliciting funds in a city, where disclosure included names, salaries, and criminal histories of solicitors, and reports of funds collected, was held to constitute excessive entanglement when applied to religious organizations.73

---

72 Aguilar v. Felton, 473 U.S. 402, 404-14 (1985) (entanglement found); Roemer v. Board of Public Works of Maryland, 426 U.S. 736, 761-67 (1976) (no entanglement found); id. at 770-73 (Brennan, J., joined by Marshall, J., dissenting); id. at 773-75 (Stewart, J., dissenting); id. at 775 (Stevens, J., dissenting) (entanglement found).

While Justice Scalia’s concern with determining legislative motive is perhaps overstated in many cases, as indicated by a quote from Justice Breyer, cited at § 6.2.1.1 n.5, concerns with predictability and consistency of application, in part, led Justice O’Connor to suggest in Lynch v. Donnelly\(^{74}\) that the Court should depart from the separate inquiries in Lemon into the subjective purpose of the government action and its principal or primary effect, and should substitute instead an objective inquiry into whether the government activity would be seen by a reasonable objective observer as an endorsement of religion. While in Lynch Justice O’Connor called for the endorsement inquiry merely to replace the first two prongs of Lemon, Justice O’Connor’s majority opinion in Agostini v. Felton,\(^{75}\) discussed at § 32.1.3.1.B n.118, subsumed Lemon’s third prong concern with excessive entanglement under Lemon’s second prong concern with effect. This would unite all three prongs of Lemon under the endorsement inquiry were that approach adopted by a majority of the Court.

Even under Lemon’s strong view of separation of church and state, Congress may be permitted to carve out a religious exemption from otherwise neutral, generally applicable laws, and this will not always violate the Establishment Clause. For example, as noted above at § 32.1.2.4 n.61, the Court held in Gillette v. United States\(^{76}\) that the exemption from the military draft for religious conscientious objectors did not violate Establishment Clause. Similarly, the Court held in Corporation of the Presiding Bishop of Church of Jesus Christ of Latter-Day Saints v. Amos\(^{77}\) that exempting religious organizations from compliance with certain federal antidiscrimination laws did not violate the Constitution. The Court held in Walz v. Tax Commission of the City of New York\(^{78}\) that granting religious organizations an exemption from state property taxes was constitutional.

Consistent with this approach, a lower court has held that the Religious Freedom Restoration Act (RFRA), which requires federal laws that substantially burden religious beliefs to satisfy a strict scrutiny approach, rather than minimum rational review, as under current Free Exercise Clause doctrine, discussed at § 32.2.2.5 nn.253-56, does not violate the Establishment Clause. In Hankins v. Lyght,\(^{79}\) the Second Circuit concluded that the RFRA had a secular legislative purpose within the meaning of Lemon – namely, to protect individual First Amendment Free Exercise Clause rights as understood by Congress. The court then held that the RFRA also satisfies the other two prongs of Lemon. Its principal effect neither advances nor inhibits religion within the meaning of Lemon, for the law simply grants an exemption to religious organizations, similar to the exemptions the Supreme Court has approved, noted above at § 32.1.2.4 nn.76-78, unless the government can satisfy a strict scrutiny approach. Finally, the RFRA decreases rather than fosters government entanglement with religion, since an exemption effectuates a more complete separation of church and state and

\(^{76}\) 401 U.S. 437, 460 (1971).

\(^{79}\) 441 F.3d 96, 107-09 (2nd Cir. 2006).
avoids any intrusive inquiry into religious belief. Thus, it satisfies the third prong of Lemon. For these reasons, the Second Circuit held that the RFRA, as applicable to federal law, does not violate the Establishment Clause of the Constitution.

§ 32.1.3 Specific Examples of Establishment Clause Analysis

Most recent cases under the Establishment Clause have either involved government regulation of matters involving schools, or cases involving religious displays on public property. Cases involving the regulation of schools are discussed at § 32.1.3.1. Cases involving religious displays on public property are discussed at § 32.1.3.2. Following these sections, general comments on the current state of Establishment Clause doctrine, and its predicted future development, are addressed at § 32.1.4.

§ 32.1.3.1 The School Cases

A. The Instrumentalist Era

The matter of prayer in school was first considered during the instrumentalist era in Engel v. Vitale, decided in 1962. In Engel, the Court struck down a policy of having teachers, at the beginning of each school day, say a non-denominational prayer. Students were not compelled to join in the prayer over their parents’ objection. The Court noted that, because of the Establishment Clause’s ban on any law “respecting an establishment of religion,” a state is without power to prescribe by law any particular form of prayer which is to be used as an official prayer in carrying on any program of governmentally sponsored religious activity – even if observance by students is voluntary. Here, there was an indirect coercive pressure on religious minorities to conform to the prevailing officially approved religion. Moving beyond this Holmesian focus on “coercion” as the touchstone of the analysis, the Court then noted, “But the purposes underlying the Establishment Clause go much further than that. Its first and most immediate purpose rested on the belief that a union of government and religion tends to destroy government and to degrade religion.”

Justice Douglas, concurring in Engel, said that the state cannot finance a religious exercise, such as this prayer, even if the dollar amounts are minuscule. For Justice Douglas, “no matter how briefly the prayer is said, . . . the person praying is a public official on the public payroll, performing a religious exercise in a governmental institution.” Justice Douglas acknowledged that under this view it is also unconstitutional to open each legislative session with a prayer given by a chaplain paid by Congress, or for the Supreme Court’s Crier to open each Court session with the phrase, “God save the United States and this Honorable Court.”

The only dissenter was Holmesian Justice Stewart, who said that an official religion was not being established by letting those who want to say a prayer say it. While ostensibly adopting a Holmesian approach focused on whether the recitation of the prayer could legitimately be termed “coercive,”

---

81 Id. at 439-44 (Douglas, J., concurring).
Justice Stewart’s opinion was driven more by a formalist focus on customs and traditions. Justice Stewart concluded that the state had merely recognized and followed “deeply entrenched and highly cherished spiritual traditions of our Nation.” Justices Frankfurter and White took no part in the decision of the case.82

One year later, in *School District of Abington Township v. Schempp*,83 the Court struck down a Pennsylvania law that required that at least 10 verses from the Holy Bible shall be read, without comment, at the opening of public school on each school day, with children to be excused upon the written request of their parents or guardian. The Court reviewed the law in light of the general principle that to withstand the Establishment Clause there must be a secular legislative purpose and a primary effect that neither advances nor inhibits religion. Explaining the purpose behind this rule, the Court said that the "neutrality" of which the precedents speak stems from a recognition of the teachings of history that otherwise there might come to be an official government support for one or all orthodoxies. A further reason for neutrality is found in the Free Exercise Clause, which protects the right of every person to choose his own course with reference to religion.

Applying these principles to the facts, Justice Clark said that here the state law required a religious exercise conducted by the state, and this violated the Establishment Clause. In one of the cases under review, the trial court had found that the state intended to conduct a religious exercise, and the Court agreed with that finding. In another of the cases, the trial court made no such finding and the state argued that the law had secular purposes such as promoting moral values, contradicting the materialistic trend of our times, perpetuating our institutions, and teaching literature. Pointing to “alternative use” of the King James version of the Bible or the Catholic Douay version, Justice Clark wrote of the “pervading religious character” of the readings, and that the Bible was not here being used as an instrument for moral inspiration or a reference for the teaching of secular subjects. The Court rejected as defenses that individual students may be excused on parental request or that the encroachment on the First Amendment might be relatively minor, or that unless these religious exercises were permitted there will be a "religion of secularism" hostile to religion. Justice Clark did acknowledge, however, that the Bible is worthy of study for its literary and historic qualities when presented objectively as part of a secular program of education.84

Justice Douglas, concurring, said the Establishment Clause was being violated in two ways: (1) the state is conducting a religious exercise, and (2) public funds, even though small in amount, are being used to promote a religious exercise. Justice Brennan, also concurring, said that the states may not prefer, discriminate against, or oppress, a particular sect of religion and may not: (1) serve the essentially religious activities of religious institutions; (2) employ the organs of government for essentially religious purposes; or (3) use essentially religious means to serve governmental ends, where secular means would suffice. Reflecting a more accommodating approach toward religion, Justice Goldberg, concurring with Justice Harlan, said, “Neither government nor this Court can or

---

82 Id. at 436 (Frankfurter, J., took no part in the decision of the case; White, J., took no part in the consideration or decision of the case); id. at 444-50 (Stewart, J., dissenting).

84 Id. at 223-27.
should ignore the significance of the fact that a vast portion of our people believe in and worship God and that many of our legal, political and personal values derive historically from religious teachings. . . . And it seems clear to me from the opinions in the present and past cases that the Court would recognize the propriety of providing military chaplains and of the teaching about religion, as distinguished from the teaching of religion, in the public schools. . . . [However, the] practices here involved do not fall within any sensible or acceptable concept of . . . accommodation and involve the state so significantly and directly in the realm of the sectarian as to give rise to those very divisive influences and inhibitions of freedom which both religion clauses of the First Amendment preclude.**

As in Engel, Justice Stewart dissented in this case. In this case, he grounded his analysis more clearly in a Holmesian concern with “coercion,” rather than a formalist concern with “customs and traditions.” He stated, “[I]t seems to me clear that certain types of exercises would present situations in which no possibility of coercion on the part of secular officials could be claimed to exist. Thus, if such exercises were held either before or after the official school day, or if the school schedule were such that participation were merely one among a number of desirable alternatives, it could hardly be contended that the exercises did anything more than to provide an opportunity for the voluntary expression of religious belief. On the other hand, a law which provided for religious exercises during the school day and which contained no excusal provision would obviously be unconstitutionally coercive upon those who did not wish to participate. And even under a law containing an excusal provision, if the exercises where held during the school day, and no equally desirable alternative were provided by the school authorities, the likelihood that children might be under at least some psychological compulsion to participate would be great. In a case such as the latter, however, I think we would err if we assumed such coercion in the absence of any evidence.”**

Based on the limited factual background in the cases before the Court, Justice Stewart stated he would remand both cases for further hearing.

In 1968, in Board of Educators of Central School District No. 1 v. Allen, the instrumentalist Court upheld against an Establishment Clause challenge a law that required local public school authorities to lend textbooks to all students in grades 7 through 12 who attended public or private schools, including parochial schools. For the Court, Justice White emphasized that although the books loaned would be those required by a parochial school, each book had to be approved by public school board authorities and only secular books could receive approval. Recognizing that parochial schools play a valuable role in secular education, Justice White said that nothing in the slight record supported the proposition that the textbooks are used by the parochial schools to teach religion. Thus, on the record, this aid was no more a law respecting the establishment of religion than the transportation of children to parochial schools approved in 1947 in Everson, discussed at § 32.1.2.2 nn.21-24.

** Id. at 229-30 (Douglas, J., concurring); id. at 231-32, 294-95 (Brennan, J., concurring); id. at 306-07 (Goldberg, J., joined by Harlan, J., concurring).

** Id. at 318-19 (Stewart, J., dissenting)

Justice Harlan, concurring, emphasized, “The attitude of government toward religion must, as this Court has frequently observed, be one of neutrality.” Relying on Justice Goldberg’s concurrence in *Schempp*, which he had joined, Justice Harlan stated, “Neutrality requires that ‘government neither engage in nor compel religious practices, that it effect no favoritism among sects or between religion and nonreligion, and that it work deterrence of no religious belief.’ I would hold that where the contested governmental activity is calculated to achieve nonreligious purposes otherwise within the competence of the State, and where the activity does not involve the State ‘so significantly and directly in the realm of the sectarian as to give rise to . . . divisive influences and inhibitions of freedom,’ it is not forbidden by the religious clauses of the First Amendment.”

Three Justices dissented in *Allen*. For Justice Black, books used by sectarian schools will in some way inevitably tend to propagate the religious views of the favored sect. Books, the heart of any school, could easily be distinguished from the bus fares in *Everson* that merely provide a convenient and helpful general public transportation service. Justice Black concluded that not a penny of tax-raised funds should be used to support religious schools, buy their books, erect their buildings, pay their teachers, or pay any other of their maintenance expenses because the Establishment Clause was written on the assumption that “state aid to religion and religious schools generates discord, disharmony, hatred, and strife.” Justice Douglas, also dissenting, said there was not “the slightest doubt” that the head of the parochial school will select books that best promote the sectarian creed. If the board submits, the struggle to keep church and state separate will have been lost. If the board resists, then the result of tying parochial school textbooks to public funds will be to put nonsectarian books into religious schools and in the long view that would tend towards state domination of the church. So either way the principle of separation of church and state would be violated. Justice Fortas, the third dissenter, emphasized that the promise of the law was that the books will be secular, but the fact remains that the books are chosen by and for the sectarian schools. This could be called a "general" program only if the school books made available to all children were the same.

In 1971, the case of *Lemon v. Kurtzman* was decided, discussed at § 32.1.2.4 nn.51-56. Although Justices Harlan and Stewart had adopted different approaches toward the Establishment Clause in *Engel*, *Schempp*, and *Allen*, as noted above, their great respect for precedent, discussed at § 10.4 n.90, led them to join Chief Justice Burger’s opinion in *Lemon*, which was consistent with instrumentalist-era precedents. *Lemon* had immediate and continuing application in many situations. For example, in *Tilton v. Richardson*, decided the same day as *Lemon*, a 5-4 Court upheld the application to a church-related institution of federal construction grants for buildings and facilities used exclusively for secular educational purposes. In a plurality opinion joined by Justices Harlan, Stewart, and Blackmun, Chief Justice Burger noted that with respect to secular purpose, the Act was

---

89 *Id.* at 232-34 (Black, J., dissenting); *id.* at 256-57 (Douglas, J., dissenting); *id.* at 270-72 (Fortas, J., dissenting).

90 403 U.S. 672, 678-89 (1971); *Lemon*, 403 at 667-71 (White, J., concurring in the judgment in *Tilton* and dissenting in *Lemon*).
drafted to ensure that federally subsidized facilities would be used only for secular purposes. If not, the government would recover its money, based on an amount equal to the proportion of the facilities’ present value that the federal grant bore to its original cost. Regarding effect, the record showed that there had been no religious services, symbols, or plaques in the buildings and they had been used solely for nonreligious purposes. There was no evidence that religion was being taught in the facilities, the evidence showed that the schools were characterized more by academic freedom than religious indoctrination, and the case should not be decided based on a hypothetical concern that sectarian institutions do everything they can to propagate a particular religion. With respect to entanglement, Chief Justice Burger said that the necessity for intensive governmental surveillance of the program was diminished because the institutions had secular education rather than indoctrination as their primary mission, and the opportunities for subverting congressional objectives and limitations is less in postgraduate courses because of their disciplines and because the students are less impressionable and less susceptible to religious instruction. Other factors which lessened entanglement were the non-ideological nature of the aid, and that the government supplied a one-time, single-purpose construction grant. Justice White concurred in the judgment, consistent with his dissent in Lemon, discussed at § 32.2.1.4 n.53, supporting secular aid to religious institutions.

Justice Douglas dissented in Tilton, joined by Justices Black and Marshall. He said that sectarian purposes are aided by making the parochial school system more viable. Further, religious teaching and secular teaching are so enmeshed in parochial schools that only the strictest supervision would insure compliance with the condition, creating excessive entanglement. Justice Douglas also continued to voice his view, from Engel and Schempp, that not even the slightest amount from taxpayers should go into the coffers of a church. Justice Brennan also dissented in Tilton, consistent with concurring with the majority in Lemon. For Justice Brennan, however, it was not clear whether the institutions involved in Tilton were sectarian. Thus, he stated, “[T]he Act is unconstitutional insofar as it authorizes grants of federal tax monies to sectarian institutions, but is unconstitutional only to that extent. I therefore think that our remand of the case should be limited to the direction of a hearing to determine whether the four institutional appellees here are sectarian institutions.”

The Court was unanimous on one aspect of the statute in Tilton. One part of the statute provided that, after 20 years, government supervision would end to ensure the facilities were being used for secular purposes. The Court unanimously held that this provision violated the Establishment Clause, since the facilities could then be used for religious indoctrination, and government cannot provide direct aid for such religious education, even with a 20-year delay.

Two years after Lemon, in Committee for Public Education & Religious Liberty v. Nyquist, the Court struck down a state law giving “tax credits” for each child attending a nonpublic school, and providing for state funds to be used for “maintenance and repair” of such schools. While the provisions had a secular purpose of “preserving a healthy and safe educational environment for all

---

91 Id. at 692-97 (Douglas, J., joined by Black & Marshall, JJ., dissenting); Lemon, 403 U.S. at 642, 659-61 (Brennan, J., dissenting in Tilton and concurring in Lemon).

92 Id. at 682-84.

of its schoolchildren” and “promoting pluralism and diversity among its public and nonpublic schools,” each provision had a principal or primary effect of advancing religion by providing direct financial support to the religious institutions. Unlike *Tilton*, there was no “effective means of guaranteeing that the state aid derived from public funds will be used exclusively for secular, neutral, and nonideological purposes.”

Justice Rehnquist, joined by Chief Justice Burger and Justice White, dissented as to the provision regarding “tax credits.” They viewed that provision as similar to property tax exemptions granted to religious organizations in *Walz*, cited at § 32.1.2.4 n.78, which the Court had previously upheld. They also viewed the provision as consistent with *Lemon*, in that any aid to religion was incidental, not principal or primary, since parents sending their children to nonpublic schools “are rendering the State a service by decreasing the costs of public education and by physically relieving an already overburdened public school system” and “New York is effectuating the secular purpose of the equalization of the costs of educating New York children that are borne by parents who send their children to nonpublic schools.” As in *Everson* and *Allen*, the impact, if any, on religious education from the aid granted is “significantly diminished” by the fact that the benefits – transportation, books loaned, or tax credits – technically “go to the parents rather than to the institutions.” Such an application of *Lemon* reflects both a formalist predisposition for literalism (technically to whom the aid is initially given) and a Holmesian predisposition for deference to government.

Six years after *Lemon*, in 1977, the Court upheld in *Wolman v. Walter* state provision to nonpublic school pupils, including those in parochial schools, of books, standardized testing and scoring, diagnostic services, and therapeutic and counseling services. Applying the *Lemon* test, Justice Blackmun, joined by Chief Justice Burger, and Justices Stewart and Powell, said that the purpose of the statute was to protect the health of the young and provide a fertile educational environment of all schoolchildren in the state. Regarding effect and entanglement, the loan of textbooks had been upheld in previous cases; testing and scoring did not involve teaching personnel, and the non-public school does not control the content of the tests; and diagnostic and therapeutic and counseling services had little or no educational content and were not closely associated with the educational missions of the schools. Reflecting their deference-to-government views, and their dissent in *Nyquist* regarding “effectuating the secular purpose of the equalization of the costs of educating” children in public and nonpublic schools, Justices White and Rehnquist concurred in this result.

Justices Brennan dissented, viewing each of these provisions as impermissible government aid toward religion. Justice Marshall also dissented, with the exception of the provision of diagnostic services, such as for speech and hearing diagnosis, psychological diagnosis, and psychological and speech and hearing therapy, which he viewed as neutral, medical provisions. For Justice Marshall, the counseling services were different, because they included educational counseling, and thus they involved government aid supporting the educational mission of the school. Justice Stevens dissented as to the provision of books, and the standardized testing and scoring, but indicated that he was not

94 Id. at 806-08, 812-13 (Rehnquist, J., joined by Burger, C.J., and White, J., dissenting).

95 433 U.S. 229, 235-48 (1977); id. at 255 (Rehnquist, J., joined by White, J., concurring in the judgment in part and dissenting in part).
prepared to hold unconstitutional any of the diagnostic or therapeutic or counseling provisions of the statute on a facial challenge.\footnote{Id. at 255-56 (Brennan, J., concurring in part and dissenting in part); id. at 256-62 (Marshall, J., concurring in part and dissenting in part); id. at 255-56 (Stevens, J., concurring in part and dissenting in part).}

For a different majority, the Court struck down in \textit{Wolman} supplying instructional materials and equipment, and money for field trips. Justice Blackmun concluded that the instructional equipment could be used for sectarian as well as secular education, and thus that aid inevitably flowed in part to support the religious role of the schools. In addition, field trips presented the same problem because the destination was chosen by a teacher, who makes the trip meaningful. An unacceptable risk of fostering religion was an inevitable byproduct. These provisions thus violated the second prong of \textit{Lemon} as having a principal or primary effect to advance religion. Any meaningful attempt by the public school authorities to ensure secular use of the instructional equipment or field trip funds to solve this problem would involve close supervision of the nonpublic teachers, and this would create excessive entanglement in violation of the third prong of the \textit{Lemon} test. Justice Blackmun was joined in this view by Justices Brennan, Stewart, Marshall, and Stevens.\footnote{\textit{Id.} at 248-55 (Blackmun, J., opinion, joined by Stewart, J.); \textit{id.} at 255-56 (Brennan, J., concurring in part and dissenting in part); \textit{id.} at 256 (Marshall, J., concurring in part and dissenting in part); \textit{id.} at 265-66 (Stevens, J., concurring in part and dissenting in part).} This conclusion on instructional materials tracked the Court’s decision two years earlier in \textit{Meek v. Pittenger}, which also struck down provision of instructional materials to nonpublic schools. Chief Justice Burger, and Justices White and Rehnquist, dissented in \textit{Meek}, reflecting their dissent in \textit{Nyquist}, that such aid merely equalizes costs and does not impermissibly advance religion. With respect to instructional materials and field trips in \textit{Wolman}, Justice Powell joined only in the judgment as to the instructional materials that were involved in this case. He noted that some of the materials, such as “wall maps, charts, and other classroom paraphernalia” involved items “for which the concept of a loan to individuals is a transparent fiction. A loan of these items is indistinguishable from forbidden ‘direct aid’ to the sectarian institution.” He continued, “But I would find no constitutional defect in a properly limited provision lending to the individuals themselves only appropriate instructional materials and equipment similar to that customarily used in public schools.” Justice Powell dissented as to the field trips, noting, “The Court writes as though the statute funded the salary of the teacher who takes the students on the outing. In fact only the bus and driver are provided for the limited purpose of physical movement between the school and the secular destination of the field trip. . . . I find this aid indistinguishable in principle from that upheld in \textit{Everson}.” Consistent with their dissents in \textit{Nyquist} and \textit{Meek}, Chief Justice Burger, and Justices White and Rehnquist, dissented from each of Justice Blackmun’s conclusions on instructional
materials and field trips.\footnote{99}

As the instrumentalist era drew to a close, the \textit{Lemon} test continued to be applied in a variety of situations. In the 1983 case of \textit{Mueller v. Allen},\footnote{100} the Court, per Justice Rehnquist, upheld a Minnesota income tax deduction – $500 per dependent in grades K through six and $700 per dependent in grades seven through 12 – for expenses involved in tuition, textbooks, and transportation for each dependent attending an elementary or secondary school in Minnesota. Most of the tuition deductions went to parents of children in parochial schools, since 96% of children attending private schools attended religious private schools.

Applying the \textit{Lemon} test, the Court held that the plan had the secular purpose of ensuring that the state's citizenry is well educated. By having many students in private schools, the public schools were relieved of a great burden. The Court next concluded that the statute did not have a principal or primary effect of advancing the sectarian aims of the nonpublic schools. Several features were deemed particularly significant. First, this was only one of many deductions, and legislatures have traditionally been allowed especially broad latitude in creating classifications in tax statutes. Second, the deduction is available to all parents. Third, public funds become available to parochial schools only through the private choices of individual parents of school-age children. Fourth, although it may be true that the greatest benefit of the tax credit involves the tuition for students attending private religious schools, the Court “would be loath” to consider the extent to which various classes of private citizens claim benefits because such an approach “would scarcely provide the certainty” that is needed, nor “principled standards by which such statistical evidence might be evaluated.” Fifth, whatever unequal effect was created by the classification, it can be regarded as a rough return for the benefits provided to the state by parents who send their children to parochial schools. Regarding entanglement, the only place where surveillance might be entanglement is in judging whether the deduction is for "instructional books and materials used in the teaching of religion tenets, doctrines or worship, the purpose of which is to inculcate such tenets, doctrines, or worship." This is not more intrusive than what the Court had already approved with respect to the loaning of textbooks in \textit{Allen}, discussed at § 32.1.3.1.An.87-89.

Justice Marshall dissented, joined by fellow liberal instrumentalists Justices Brennan, Blackmun, and Stevens. Applying a stronger concept of separation of church and state, which is typical for liberal instrumentalists, Justice Marshall said that the Establishment Clause forbids a state from subsidizing religious education directly or indirectly. The tax exemption involved here subsidizes tuition payments to sectarian schools, and that is unconstitutional. Justice Marshall said that the majority had unpersuasively attempted to distinguish \textit{Nyquist}, discussed at § 32.1.3.1.A nn.93-94, where the Court struck down a state law giving tax credits for each child attending a nonpublic school. First, \textit{Nyquist} cannot be distinguished merely because the tax exemption involved there was only for parents whose children attended non-public schools. Here, the fact that a small benefit is

\footnote{99} 433 U.S. at 262-64 (Powell, J., concurring in part, concurring in the judgment in part, and dissenting in part); \textit{id.} at 255 (Burger, C.J., dissenting in part); \textit{id.} at 255 (Rehnquist, J., joined by White, J., concurring in the judgment in part and dissenting in part).

\footnote{100} 463 U.S. 388, 394-403 (1983).
granted to all parents does not change the fact that the most substantial benefit relates to tuition, and that benefit, in practice, is predominantly a subsidy of parochial school tuition masquerading as a subsidy of general educational expense. Second, *Nyquist* cannot be distinguished merely because the amount in *Nyquist* was predetermined by the tax bracket of the taxpayer, whereas the Minnesota deduction varied with the amount of the expenditure. In terms of whether a subsidy is created, that is a distinction without a difference. Justice Marshall said that the tax deduction for books and instructional materials is also unconstitutional. Both can be used to inculcate religious values and belief because here, as distinguished from *Allen*, the deduction is permitted for books that are chosen by the parochial schools themselves, violating the principle that no tax can be levied to support religion.\(^{101}\)

The dissent could also have noted, responding to the majority’s view concerning the benefits provided to the state by parents who send their children to parochial schools (e.g., decreasing the costs of public education and physically relieving an already overburdened public school system) that there is also a serious cost to the state of such flight from the public schools, particularly where a majority of such flight is by middle and upper-middle class white families. This creates a more difficult educational environment in which the public schools must operate, particularly in terms of active community involvement based on parental support and attempting to ensure integrated, diverse educational opportunities for the students.

Despite the more accommodating approach toward the *Lemon* test adopted in *Mueller v. Allen*, the instrumentalist Justices were in the majority two years later in *School District of Grand Rapids v. Ball*.\(^{102}\) In *Ball*, the Court held that a school district's Shared Time and Community Education programs, which provided classes to nonpublic school students at public expense in classrooms located in and leased from the nonpublic schools, had a principal or primary effect of advancing religion. Of the 41 nonpublic schools who participated in the program, 40 were religious schools: twenty-eight of the schools were Roman Catholic, seven were Christian Reformed, three were Lutheran, one was Seventh Day Adventist, and one was Baptist.

The Community Education program classes were taught in the nonpublic elementary schools and commenced at the conclusion of the regular school day. Among the courses offered were “Arts and Crafts, Home Economics, Spanish, Gymnastics, Yearbook Production, Christmas Arts and Crafts, Drama, Newspaper, Humanities, Chess, Model Building, and Nature Appreciation.” Community Education teachers were hired as part-time public school employees. The Community Education courses were completely voluntary and were offered only if 12 or more students enrolled. The Court noted, “Because a well-known teacher is necessary to attract the requisite number of students, the School District accords a preference in hiring to instructors already teaching within the school. Thus, ‘virtually every Community Education course conducted on facilities leased from nonpublic schools has an instructor otherwise employed full time by the same nonpublic school.’”

\(^{101}\) 463 U.S. at 404-16 (Marshall, J., joined by Brennan, Blackmun & Stevens, JJ., dissenting).

The Shared Time teachers were full-time employees of the public schools, who often moved from classroom to classroom during the course of the school day. A “significant portion” of the teachers (approximately 10%) “previously taught in nonpublic schools, and many of those had been assigned to the same nonpublic school where they were previously employed.” Among the subjects offered in the Shared Time program were “remedial” and “enrichment” mathematics, “remedial” and “enrichment” reading, art, music, and physical education. The Court noted that since a typical nonpublic school student attends these classes for one or two class periods per week, approximately “ten percent of any given nonpublic school student's time during the academic year would consist of Shared Time instruction.”

Based on these facts, the Court, per Justice Brennan, stated, “We conclude that the challenged programs have the effect of promoting religion in three ways. [1] The state-paid instructors, influenced by the pervasively sectarian nature of the religious schools in which they work, may subtly or overtly indoctrinate the students in particular religious tenets at public expense. [2] The symbolic union of church and state inherent in the provision of secular, state-provided instruction in the religious school buildings threatens to convey a message of state support for religion to students and to the general public. Finally, [3] the programs in effect subsidize the religious functions of the parochial schools by taking over a substantial portion of their responsibility for teaching secular subjects. For these reasons, the conclusion is inescapable that the Community Education and Shared Time programs have the ‘primary or principal’ effect of advancing religion, and therefore violate the dictates of the Establishment Clause of the First Amendment.”103

Chief Justice Burger and Justice O’Connor agreed that the Community Education program, with virtually all the teachers also being employed full-time by the non-public schools, violated the Establishment Clause. However, as in Aguilar v. Felton, discussed next, they viewed the impact of the Shared Time program, providing remedial and enrichment education, for at most approximately 10% of class-time during the day, as only an incidental effect to advance religion. Justice Rehnquist would have upheld both programs, stating that “[n]ot one instance of attempted religious inculcation exists in the records” even though the “programs have been in operation for a number of years.” Justice White also dissented, following the same accommodationist approach to the Lemon test, upholding provision of secular aid to religious schools, in his dissents in Lemon and Nyquist.104

On the same day Ball was decided, the Court also decided Aguilar v. Felton.105 In Aguilar, the Court held that the Establishment Clause barred New York City from sending public school teachers into parochial schools to provide remedial education to disadvantaged children pursuant to a congressionally mandated program. Such programs were held to be inconsistent with the “primary effect” and “no entanglement” requirements of Lemon. The Court said teachers would inevitably feel pressure to teach religion. Close supervision would thus be required, and there would be a

104 Id. at 398 (Burger, C.J., concurring in the judgment in part and dissenting in part); id. at 398-99, 429-30 (O’Connor, J., concurring in the judgment in part and dissenting in part); id. at 400 (White, J, dissenting); id. at 400-01 (Rehnquist, J., dissenting).

105 473 U.S. 402, 404-14 (1985); id. at 416, 418 (Powell, J., concurring).
reasonable perception that the state was endorsing religion. The Court’s opinion, authored by Justice Brennan, was joined in full by Justices Marshall, Blackmun, Powell, and Stevens. Justice Powell also wrote a concurring opinion, which noted that in addition to the “direct financial subsidy to be administered in significant part by public school teachers within parochial schools” there also remains a “considerable risk of continuing political strife over the propriety of direct aid to religious schools” and “a likelihood whenever direct governmental aid is extended to some groups that there will be competition and strife among them and others to gain, maintain, or increase the financial support of government.” This creates entanglement by church intrusion into affairs of government.

Chief Justice Burger, and Justices White, Rehnquist, and O’Connor, all dissented in Aguilar. Justice O’Connor noted, “The Court greatly exaggerates the degree of supervision necessary to prevent public school teachers from inculcating religion.” In Part II of her dissent, joined by Justice Rehnquist, she also noted, “Pervasive institutional involvement of church and state may remain relevant in deciding the effect of a statute [under the effects prong of Lemon], but state efforts to ensure that public resources are used only for nonsectarian ends should not in themselves serve to invalidate an otherwise valid statute [under Lemon’s entanglement prong].” In addition, “political divisiveness as evidence of undue entanglement is also unpersuasive. There is little record support for the proposition that New York City’s admirable Title I program has ignited any controversy other than this litigation.” Chief Justice Burger, and Justices White and Rehnquist, raised greater concerns about the entire Lemon framework as it had been applied in cases like Nyquist, Ball, and Aguilar.106

In the final Establishment Clause case of the instrumentalist era, Witters v. Washington Department of Services for the Blind,107 a unanimous Supreme Court held in 1986 that a vocational tuition grant to a blind person who wished to use the grant to attend a Christian college was constitutional. The Court, per Justice Marshall, said that this aid did not have a principal or primary effect of advancing religion because the aid went directly to the blind student, that student could use the aid at any institution he wished, and, as the aid was for vocational assistance, “nothing in the record indicates that . . . any significant portion of the aid expended under the Washington program as a whole will end up flowing to religious education.” Although the case could be interpreted in a narrow fashion as limited to vocational aid to a handicapped individual, Justice O’Connor later said in Agostini v. Felton, discussed at § 32.1.2.1.B nn.117, that Witters departed from the third justification used to find a principal or primary effect to advance religion relied upon in Ball, discussed at § 32.1.3.1.A n.103, that (3) otherwise neutral or secular aid to nonpublic schools “in effect subsidize[s] the religious functions of the parochial schools.”

B. The Modern Natural Law Era

Since 1986, in the post-instrumentalist era, there has been a decline in the percentage of cases where government action challenged under the Establishment Clause has been struck down. However, the

106 Id. at 419-20 (Burger, C.J., dissenting); id. at 420-21 (Rehnquist, J., dissenting); id. at 421 (O’Connor, J., joined by Rehnquist, J., as to Parts II and III, dissenting) (citations omitted); Ball, 473 U.S. at 400 (White, J., dissenting in both Ball and Aguilar).

pattern has not been entirely fixed. Between 1986-2005, Justice O’Connor’s use of an “endorsement” test tended to place her with instrumentalist Justices in the school prayer and the public display cases, even though she suggested that no single test should be employed. Justice Kennedy’s concern about possible “coercion” or “proselytizing” also tended to place him with instrumentalist Justices in the school prayer cases, although not as much in the public display cases. In the school aid cases, both Justices O’Connor and Kennedy tended to join Chief Justice Rehnquist and Justices Scalia and Thomas in supporting various forms of government aid toward religious schools on grounds that the aid merely reflected neutrality toward religion. Of course, under the “endorsement” approach, Justice O’Connor was more cautious about this than Justice Kennedy under the “coercion” or “proselytizing” test. During this time, Chief Justice Rehnquist and Justices Scalia and Thomas made it clear that they thought the Lemon test should be overruled as incompatible in many of its applications with American traditions and history.

(1) School Aid Cases

During the first part of the modern natural law era, the Court did not consider any major Establishment Clause cases involving school aid. The first such case was in 1993. In Zobrest v. Catalina, the Court allowed public resources to be used in parochial schools when it held that the Establishment Clause does not bar a public school district from providing, under the Individuals with Disabilities Education Act (IDEA), a sign-language interpreter for a deaf student who attended classes at a Roman Catholic high school. The Court said that government programs which neutrally provide benefits to a broad class of citizens, defined without reference to religion, are not readily subject to Establishment Clause challenge just because sectarian institutions may receive an attenuated financial benefit. Here, no government funds found their way into the sectarian school’s coffers. The interpreter would not function as a teacher, and so would not intentionally or accidentally engage in religious instruction. Although the case could be interpreted narrowly, since the interpreter did no teaching, Justice O’Connor later said in Agostini v. Felton, discussed at § 32.1.2.1.B nn.116, that Zobrest had rejected the first two notions relied on in Ball, discussed at § 32.1.3.1.A n.103, that (1) public employees will be presumed to inculcate religion and (2) the presence of public employees on private school property creates an impermissible symbolic link between government and religion.

Four Justices dissented in Zobrest on the question of whether the constitutional issue needed to be addressed. Justice Blackmun, joined by Justices Stevens, O’Connor, and Souter, concluded that the constitutional question did not have to be reached, as the IDEA itself, and implementing regulations, did not require a sign-language interpreter to be provided to a deaf student wishing to attend a sectarian school. Deciding to address the merits, Justices Blackmun and Souter concluded that the public resources were capable of advancing religion since the interpreter might serve as a conduit for religious education, and impressionable youngsters might view the government as

\[108\] 509 U.S. 1, 8-14 (1993).

\[109\] Id. at 14-17 (Blackmun, J., joined by Souter, J., and joined in Part I by Stevens & O’Connor, JJ.).
supporting the religious denomination of the school. This conclusion is more faithful to Justice Brennan’s application of the Lemon test in Ball than the majority opinion in Zobrest.

In 1994, in Board of Education of Kiryas Joel Village School District v. Grumet, the Court, per Justice Souter, struck down the establishment of the Kiryas Joel Village School District. Justice Souter noted, “The village of Kiryas Joel in Orange County, New York, is a religious enclave of Satmar Hasidim, practitioners of a strict form of Judaism,” and its incorporators intentionally drew its boundaries under the state’s general village incorporation law to exclude all but Satmars. Given this fact, there was no assurance of religious neutrality in the exercise of its school district power.

In a concurring opinion, Justice Stevens, joined by Justices Blackmun and Ginsburg, agreed that this was more establishing than accommodating religion. In a separate concurrence, Justice Blackmun noted that the Grumet decision was consistent with the Lemon test, and its 30-year progeny, even though Justice Souter’s opinion did not explicitly apply the Lemon test.

Agreeing with the result, Justice O’Connor said that the real problem here was that this was a legislatively drawn religious classification singling out a particular group for favorable religious treatment. Justice Kennedy similarly noted that the real vice was drawing political boundaries on the basis of religion. Both Justice O’Connor and Justice Kennedy indicated, however, that they would be willing to reconsider other of the Court’s school aid cases, such as Ball and Aguilar, with Justice O’Connor, who was on the Court and had dissented in those cases, indicating a willingness to overrule consistent with her dissents. Dissenting in Grumet, Justice Scalia, joined by Chief Justice Rehnquist and Justice Thomas, indicated that the Lemon test should be rejected in favor of an accommodationist approach toward religion based upon text, history, and tradition, that is, as discussed at § 32.1.2.2, a formalist approach to the Establishment Clause. The dissent also called for cases like Ball and Aguilar to be overruled.

In 1997, consistent with Justice O’Connor’s dissents in those cases, the Court did overrule Ball and Aguilar in Agostini v. Felton. Justice O’Connor opened her opinion by pointing out that in the 1985 appeal of this case, Aguilar v. Felton, discussed at § 32.1.3.1.A. nn.105-06, the Court held that the Establishment Clause barred New York City from sending public school teachers into parochial schools to provide remedial education to disadvantage children, pursuant to a federal program. This resulted in a permanent injunction reflecting the ruling. The parties bound by that injunction now sought relief, saying that because of subsequent decisions of the Court, the original holding was no longer good law. The Court agreed and ordered relief from the injunction.

111 512 U.S. 687, 690, 702-08 (1994); id. at 710-11 (Blackmun, J., concurring); id. at 711-12 (Stevens, J., joined by Blackmun & Ginsburg, JJ., concurring).

112 Id. at 716-18 (O’Connor, J., concurring in part and concurring in the judgment); id. at 722, 730-32 (Kennedy, J., concurring in the judgment).

113 Id. at 732, 743-52 (Scalia, J., joined by Rehnquist, C.J., and Thomas, J., dissenting).

In Part I of her opinion, Justice O'Connor detailed the facts of the case and its procedural history. Title I channels federal money to local agencies to provide remedial education, guidance, and job counseling to students who reside in low income areas and who are failing or at risk of failing, regardless of whether the children attend public schools. The teachers are public employees, and they are instructed not to introduce any religious matter into their teaching or become involved in the religious activities of the schools. All religious symbols are removed from classrooms used for Title I services. To assure compliance, a publicly employed field supervisor must make at least one unannounced visit to each teacher's classroom every month. After the Court originally found this to be unconstitutional under Lemon, the school system began providing the Title I instruction at public school sites, at leased sites, and in mobile instructional units – alternatives uniformly permitted by courts as not involving a "principal or primary effect" to advance religion or create “excessive entanglement.” This created added costs and reduced the number of students receiving benefits. Pointing to the fact that five Justices in Grumet suggested that Aguilar might well be overruled (Chief Justice Rehnquist, and Justices O'Connor, Scalia, Kennedy, and Thomas), the petitioners asked the district court for relief from the permanent injunction. The motion was denied and the court of appeals affirmed.

In Part II, Justice O'Connor narrowed the issue to whether later Establishment Clause cases have so undermined Aguilar that it is no longer good law. She did this by first noting that a judgment could be set aside under the Court’s Rule 60(b)(5) if prospective application is no longer equitable, as when there has been a significant change in factual conditions or law. She rejected the need for change on the factual conditions of high costs, because all were aware when Aguilar was decided that there would be added costs. Second, the fact that a majority of the Justices have said that Aguilar should be reconsidered or overruled does not effect a change in the law. So the critical issue was whether Aguilar had been so undermined by later decisions that it was no longer good law.

In Part III, Justice O'Connor overruled Aguilar. In Part III(A) she explained the rationale on which Aguilar and Ball were decided. In the Shared Time program in Ball, and in Aguilar, the state provided remedial and enrichment classes, at public expense, to students attending non-public schools during regular school hours by publicly employed teachers. The Court found that the programs impermissibly advanced religion. It did so by assuming that teachers involved in the program might become involved intentionally or inadvertently in inculcating particular religious tenets. They might conform their instruction to the sectarian environment, and there was direct aid to the schools by freeing up money for religious indoctrination that the school would otherwise have devoted to secular education. No weight was placed on the fact that the program was provided to students and that it only supplemented other courses. The assumptions leading to the conclusion of advancing religion were that: (1) public employees working on parochial premises inevitably inculcate religion, (2) their presence on the premises creates a symbolic union between church and state, (3) all public aid that directly aids the educational function of parochial schools impermissibly finances religious indoctrination, and (4) excessive entanglement is inevitable because teachers must be closely monitored.\footnote{\textit{Id.} at 218-22.}

\footnote{\textit{Id.} at 218-22.}
In Part III(B), Justice O'Connor pointed out how later cases have undermined these four assumptions by manifesting a changed understanding of the criteria by which to determine whether aid to religion has an impermissible effect. Justice O'Connor examined the first assumption that teachers on parochial premises must inevitably indoctrinate. She said that presumption was abandoned in Zobrest, where a deaf student was allowed to bring his state-employed sign-language interpreter to his Roman Catholic high school. Zobrest also repudiated the second assumption regarding a symbolic link. Replying the Justice Souter's attempt to limit Zobrest to translators, Justice O'Connor said that this was not a principled basis on which to confine Zobrest's rationale, because “the signer in Zobrest had the same opportunity to inculcate religion in the performance of her duties as do Title I employees.”

With respect to the third assumption that all direct aid to education impermissibly finances religious indoctrination, Justice O'Connor said that this assumption was abandoned in Witters, where the Court allowed a state to issue a vocational tuition grant to a blind person who wished to become a pastor, and where the aid reached the parochial school as a result of independent and private choices of individuals. Similarly, in Zobrest, a deaf student was permitted to attend a religious school with a state-paid sign-language interpreter. These cases make clear that direct aid to education will not, as a matter of law, be deemed to have the effect of advancing religion through indoctrination.

With respect to the fourth assumption, that excessive entanglement would be necessary to ensure close monitoring, Justice O'Connor noted that Aguilar's conclusion that there was excessive entanglement was based on both concerns regarding entanglement identified in Lemon, discussed at § 32.1.2.4 n.51, that (1) government would become entangled with religion, through pervasive monitoring needed to ensure against inculcation of religion and the program’s required administrative cooperation, and (2) religion would become entangled with government, because the program might increase political divisiveness. Based on the analysis in her dissent in Aguilar, discussed at § 32.1.3.1.A n.106, she replied that the concern with entanglement should be viewed as part of the means/end inquiry done under second prong of Lemon concerned with effects. She noted that the entanglement prong concerns the same kind of considerations – (1) the character and purposes of the institutions benefitted, (2) the nature of the aid, and (3) the resulting relationship – that Chief Justice Burger identified in Lemon as appropriate for the effects prong, discussed at § 32.1.2.4 n.51. From that perspective, some administrative cooperation or the potential of political divisiveness does not automatically create a principal or primary effect to advance religion. The assumption that public employees will inevitably inculcate religion was abandoned in Zobrest, as discussed at § 32.1.3.1.B n.116, and so the Court must discard the assumption that pervasive monitoring will be required. Thus, Justice O'Connor concluded that Aguilar is no longer good law.

Justice O'Connor also replied to three differences that Justice Souter’s dissent, joined by Justices Stevens and Ginsburg, perceived from Zobart and Witters. Justice Souter said that Title I services

\[116\] Id. at 222-25, 227-28.

\[117\] Id. at 225-27.

\[118\] Id. at 232-35.
are distributed directly to religious schools. She replied, however, that the funds go to a public agency and then to eligible students. He said that Title I funds relieve a religious school of an expense it would otherwise have assumed. She replied that there is no evidence in the record that Title I services supplant services offered in the sectarian schools. He said more students are being served. She replied that this distinction is not meaningful. Justice O'Connor also replied to an argument that Title I provides aid to religion by creating incentives for persons to attend parochial schools. She replied that no such incentive exists where the aid is allocated on the basis of neutral, secular criteria that neither favor nor disfavor religion, and where it is made available to religious and secular beneficiaries on a nondiscriminatory basis.119

In Part III(C), Justice O'Connor noted that the doctrine of stare decisis is at its weakest in constitutional cases because, unlike cases of statutory interpretation, where the legislature can amend a statute, the Court's interpretation of the Constitution can be altered only by constitutional amendment or overruling prior decisions, as discussed at § 4.3.2 nn.88-89. Here, the decision to overrule Aguilar and Ball was based on more than a present doctrinal decision to come out differently, but rather on the view that the Court is convinced that its prior decisions' premises have been undermined by later decisions.120 Inconsistency with related law is one of the special grounds for overruling precedent from the natural law perspective, as discussed at § 7.3.3.2.

In Part IV, Justice O'Connor concluded that the change in constitutional law entitled the plaintiffs to relief because of the general practice to apply the rule of law announced in a new case to the parties before the court. Justice O'Connor cautioned lower courts that they should follow the latest precedent on point, even though it rests on reasons rejected in other cases, leaving to the Supreme Court the prerogative of overruling its own decisions, consistent with Rodriguez de Quijas v. Shearson/American Express Inc., discussed § 4.3.4 n.100. In addition, she advised parties not to file Rule 60(b)(5) motions to vacate injunctions premised on nothing more than the claim that various Justices have stated that the law has changed. She noted that the Court is acting here only because the propriety of continuing prospective relief is at issue. As a final matter, Justice O'Connor noted that there is no reason to wait for a better vehicle to overrule Aguilar because New York City was spending millions on mobile instructions units and leased sites, when that money could be spent on disadvantaged children under a program perfectly consistent with the Establishment Clause.121

Justice Souter dissented, with Justices Stevens and Ginsburg, and with Justice Breyer as to Part II. Justice Souter's main point in Part I was that if the Court was to draw a line short of barring all state aid to religious schools for teaching standard subjects, the Aguilar-Ball line was sensible and capable of principled adherence. That line was whether state-paid teachers were placed into the physical and social setting of religious schools, where (1) the pressures for the teacher to reflect the school’s mission and (2) the symbolic link between church and state would be greater. Responding to the third concern in Ball, discussed at § 32.1.3.1.A n.103, that (3) the program in effect subsidizes the religious functions of the parochial schools, Justice Souter noted that Title I aid is not merely

119 Id. at 228-32; id. at 241-47 (Souter, J., joined by Stevens & Ginsburg, JJ., dissenting).

120 Id. at 235-36.

121 Id. at 237-40.
supplemental when they teach subjects that the religious schools would otherwise have been obliged to teach. Justice Souter indicated that based on this concern perhaps there is an invalid subsidy to religious schools even when remedial education takes place off the religious premises, because the benefits flow directly to the schools in the form of classes and programs and these benefits make it easier for them to survive and concentrate their resources on their religious objectives.\(^\text{122}\)

In Part II of his opinion, Justice Souter argued that the Court had not abandoned the assumptions underlying *Aguilar* and much of *Ball*. *Zobrest*, as he saw it, was a narrow holding based on the fact that the signer did not have an opportunity to inject religious content into what was supposed to be secular instruction. He next said it was not true that cases after *Ball* had departed from a broad holding in *Ball* that all government aid which aids the educational function of religious school is invalid, since *Ball* only held more narrowly that a particular program in that case subsidized the religious functions of parochial schools by taking over a significant portion of the teaching of secular subjects. *Zobrest* and *Witters* involved individual students with no evidence being presented that the schools were being relieved of expenses they otherwise would have assumed. Thus, there was no government aid supplanting religious funding in those cases. Justice Souter concluded that, as here, where the government aid results in support for religious educational institutions in some substantial degree, the formal neutrality of the criteria for aid should not protect it from the Establishment Clause.\(^\text{123}\)

In concluding his dissent, Justice Souter said that if the precedents are not read for exaggerated propositions it can be seen that no subsequent case has abandoned the *Aguilar* and *Ball* assumptions. Specifically, no case has abandoned concern about public school teachers furthering religious doctrine; or the distinction between direct and substantial aid and aid that is indirect and incidental; or that fusing public and private faculties in one school may well create an impression of endorsement; or that direct subsidization of religious education is unconstitutional; or the view that the public taking over a portion of a religious school's teaching responsibility on that school's property is direct subsidization. Justice Souter admitted that the cost of complying with *Aguilar* was high – conducting such remedial or enrichment classes off-site, thus reducing any impression of endorsement of religion and making the aid indirect, rather than direct. However, he found that cost offset by the need for remaining faithful to principled constitutional lines.\(^\text{124}\)

Justice Ginsburg also dissented, and was joined by Justices Stevens, Souter, and Breyer. She contended that a proper application of the Court's rules called for deferring consideration of *Aguilar* until another case. The reason was that it was too late in *Aguilar* to ask for rehearing of the case, and the Court had used Rule 60(b)(5) regarding vacating judgments that are no longer equitable basically to achieve that end. She would await another case to preserve integrity in the interpretation of procedural rules, avoid having the Court set its own agenda, and avoid invitations to reconsider

old cases based on chance speculations from changes in Court personnel.125

The difference between the treatment of the Court’s precedents by Justice O’Connor, joined by Justice Kennedy, in Agostini, and Justice Souter, is consistent with their differences noted in other cases, as discussed at § 12.3.2. As discussed there, Justice Souter tends to follow both the core holdings and general reasoning of precedents, and thus in Agostini was faithful to the limited holding in Justice Marshall’s opinion in Witters, and the limited language in Chief Justice Rehnquist’s opinion in Zobrest. In contrast, Justices O’Connor and Kennedy, while faithful to the core holdings in Witters and Zobrest, interpreted their reasoning in light of their own views on text, context, and history, which focuses on “endorsement” or “coercion,” as discussed next in Mitchell v. Helms.

The weakening of the instrumentalist-era understanding of Lemon in the school aid context continued in 2000 in Mitchell v. Helms.126 In a plurality opinion, Justice Thomas, with Chief Justice Rehnquist and Justices Scalia and Kennedy, upheld a federal program that funded state agencies that loaned educational materials and equipment to public and private schools, with the enrollment of each participating school determining the amount of aid. Justice Thomas noted that in Agostini the Court had modified Lemon for the purpose of evaluating aid to schools by stating that entanglement is not a separate inquiry, but only one criteria for deciding if there is a primary effect of advancing religion, and by revising criteria for determining the principal or primary effect of a statute. After Agostini, Justice Thomas said, three primary criteria are used to evaluate whether government aid has the effect of impermissibly advancing religion: does the aid “result in governmental indoctrination; define its recipients by reference to religion; or create an excessive entanglement.”

In applying this test, Justice Thomas adopted a formalist, literal approach to the question of governmental indoctrination, concluding that “if the government, seeking to further some legitimate secular purpose, offers aid on the same terms, neutrally, without regard to religion, to all who adequately further that purpose, then it is fair to say that any aid going to a religious recipient only has the effect of furthering that secular purpose.” From such a perspective, the possibility that the loaned educational materials and equipment could be diverted and used in the context of religious instruction is not constitutionally relevant, since that diversion would not be done by the government, and thus could not result in government “coercion” or “proselytizing” of religion, from either Justice Kennedy’s “in-fact” coercion analysis in Lee v. Weisman, discussed at § 32.1.2.3 n.47-50, or Justices Scalia and Thomas’ literal “actual legal coercion” test, discussed at § 32.1.2.2 nn.32-33. Justice Thomas also noted that government neutrality, rather than indoctrination, is virtually assured if an aid program literally, or figuratively, passes through the hands of numerous private citizens who can direct the aid elsewhere by their choice of a school for their children. In such a case, the private citizen is making the choice, not the government.127

127 Id. at 809-14, 820-25.

Page 1574
Regarding the second criterion of how the recipients are defined, Justice Thomas noted that the aid in this case “is allocated on the basis of neutral, secular criteria that neither favor nor disfavor religion, and is made available to both religious and secular beneficiaries on a nondiscriminatory basis.” Aid is allocated based on enrollment, and under the program “for every dollar you spend for the public school student, you spend the same dollar for the non-public school student.” The allocation criteria therefore created no improper incentive for parents to chose a religious education for their children, and thus were neutral in how recipients were defined.128

Further reflecting a formalist approach, and the formalist preference for doctrine phrased as categorical elements, rather than as factors, discussed at §§ 4.2.2 text following n.48 & 4.2.4 n.68, Justice Thomas treated the three Agostini criteria as three separate elements in his analysis, not as factors to weigh, specifically criticizing the dissent for using a factor approach to resolve the issue of effect. Reflecting the formalist preference for “bright-line” rules, discussed at § 4.2.3 nn.54-56, Justice Thomas also noted that certain factors mentioned by the dissent as relevant to the overall issue of effect – the potential for political divisiveness, the pervasive sectarian character of the institution receiving the aid, and whether the aid given is direct or indirect – should no longer be considered in the constitutional analysis. In Justice Thomas’ view, these considerations are not central to the issue of whether government indoctrination is taking place, unlike the issues addressed by Justice Thomas of whether the aid is provided to secular and religious schools on a neutral basis, and whether the aid literally, or figuratively, goes to parents who make a private choice on which school to send their child. Continued focus on the other factors produces more “chaos” than principled decisionmaking.129 Finally, given the result in this case upholding state provision of instructional materials and equipment to nonpublic schools, those aspects of the earlier cases of Meek and Wolman, discussed at § 32.1.3.1.A nn.97-98, which had struck down such aid, were overruled.130

Justice O’Connor, joined by Justice Breyer, concurred in the judgment, but said the plurality was giving formal neutrality too much importance, and the plurality’s discussion of direct versus indirect aid, and the discussion of diversion, were flawed. For Justice O’Connor, the three Agostini criteria are “factors” to be weighed against an overall decision whether a reasonable observer would conclude that the government’s action constituted an “endorsement” of religion. From that perspective, as Justice O’Connor noted, “[A] government program of direct aid to religious schools based on the number of students attending each school differs meaningfully from the government distributing aid directly to individual students who, in turn, decide to use the aid at the same religious schools. In the former example, if the religious school uses the aid to inculcate religion in its students, it is reasonable to say that the government has communicated a message of endorsement. . . . In contrast, when government aid supports a school's religious mission only because of independent decisions made by numerous individuals to guide their secular aid to that school, '[n]o reasonable observer is likely to draw from the facts . . . an inference that the State itself

128 Id. at 829-32.

129 Id. at 814-20, 825-29.

130 Id. at 835-36.
is endorsing a religious practice or belief.” 131 Regarding the issue of diversion of instructional materials or equipment for religious instruction, Justice O’Connor stated that if diversion could be shown, with the government either approving or acquiescing in such use, a reasonable observer could well conclude that the government was endorsing religion, because then the plaintiff would have proven that “the aid in question actually is, or has been, used for religious purposes.” In this case, however, reflecting their occasional Holmesian deference-to-government predisposition, discussed at § 11.4 nn.107-09 (Justice Breyer) & 12.4.2 nn. 173-85 (Justice O’Connor), Justices O’Connor and Breyer concluded the record did not reflect any meaningful diversion that could give rise to a concern with endorsement. As Justice O’Connor noted, this conclusion was rejected by the other 7 Justices on the Court, who all concluded the some meaningful diversion had taken place in the case. 132

Justice Souter, dissenting with Justices Stevens and Ginsburg, agreed with Justice O’Connor that the Agostini criteria are factors to be weighed in an overall balance concerning the principal or primary effect of any aid program. In engaging in this factor analysis, Justice Souter noted that the Court’s precedents under Lemon has considered “whether the government is acting neutrally in distributing its money, and about the form of the aid itself, its path from government to religious institution, its divertibility to religious nurture, its potential for reducing traditional expenditures of religious institutions, and its relative importance to the recipient, among other things.” Justice Souter continued, “At least three main lines of enquiry addressed particularly to school aid have emerged to complement [formal] neutrality. First, we have noted that two types of aid recipients heighten Establishment Clause concern: pervasively religious schools and primary and secondary religious schools. Second, we have identified two important characteristics of the method of distributing aid: directness or indirectness of distribution and distribution by genuinely independent choice. Third, we have found relevance in at least five characteristics of the aid itself: its religious content; its cash form; its divertibility or actually diversion to religious support; its supplantation of traditional items of religious school expense; and its substantiality.” In addition, reflecting concerns with entanglement between church and state, Justice Souter noted that the Court’s precedents had expressed concern with whether state aid would “ violate a taxpayer's liberty of conscience, threaten to corrupt religion, [or] generate disputes over aid.” 133 In this case, Justice Souter said, the plurality was rejecting the fundamental principle that had emerged from applying these factors in earlier cases of no taxpayer funded aid to a school’s religious mission. Here there was aid to the schools themselves which could be used, and was being used, to advance the religious inculcative functions of the recipient religious schools. This made the government aid clearly unconstitutional, since prior cases had indicated, unlike Justice O’Connor’s view, that a “substantial risk of diversion” is all that is required for the Establishment Clause to be violated, not “actual” diversion. 134

134 Id. at 908-13.
The more accommodating approach toward school aid issues adopted in *Mitchell* continued in 2002 in *Zelman v. Simmons-Harris*.135 *Zelman* involved a pilot program adopted by the state of Ohio in 1996 to provide educational choices to families with children who reside in a “covered district,” defined to apply only to Cleveland. Under the program, tuition aid of up to $2,250 per year was provided to parents who chose to send their child to a school other than a Cleveland public school. Any private school, whether religious or nonreligious, could participate in the program and accept program students so long as the school was located within the boundaries of a covered district and met statewide educational standards. Participating private schools had to agree not to discriminate on the basis of race, religion, or ethnic background, or to “advocate or foster unlawful behavior or teach hatred of any person or group on the basis of race, ethnicity, national origin, or religion.” Any public school located in a school district adjacent to the covered district could also participate in the program. Adjacent public schools were eligible to receive the same $2,250 tuition grant for each program student accepted, in addition to the full amount of per-pupil state funding attributable to each additional student, although none of the public schools chose to participate in the program.

Given these details, the governmental aid program on its face was neutral with respect to religion, provided voucher assistance for educational expenses to a broad class of citizens, who made independent judgments whether to use the voucher to fund educational expenses at religious or secular private schools. For the four Justices in the plurality opinion in *Mitchell*, this made the program clearly constitutional. Justice Thomas also noted in a separate concurrence that the main beneficiaries of this program would be low-income minorities living in Cleveland who wished educational alternatives to the Cleveland public schools, which were “[b]esieged by escalating financial problems and declining academic achievement.”136

Concurring as the critical fifth vote, Justice O’Connor emphasized the limited nature of the program; that it did not provide “substantial” aid to the religious schools; the nonpublic schools, both religious and secular, had to accept students without regard to “race, religion, or ethnic background”; and the parents had a range of non-religious private school options from which to choose. Given these facts, the program could not be viewed by an objective reasonable observer as government endorsement of religious education.137

136 *Id.* at 652-54; *id.* at 676-67 (Thomas, J., concurring).

137 *Id.* at 668-76 (O’Connor, J., concurring). *See also* American Jewish Congress v. Corporation for National and Community Service, 399 F.3d 351, 354-59 (D.C. Cir. 2005) (federally chartered corporation's AmeriCorps Education Awards Program, a nationwide community service program which allowed participants to be placed as teachers in both secular and religious schools, did not violate Establishment Clause, even though some participating individuals at religious schools elected to teach religion in addition to secular subjects; participants were chosen without regard to religion, participants’ choice to teach religion in addition to secular subjects did not have imprimatur of government endorsement, and participants who chose to teach in religious schools did so only as a result of their own genuine and private choice).
In his dissent, Justice Souter, joined by Justices Stevens, Ginsburg, and Breyer, noted that under this voucher program up to $2,250 in tuition vouchers could be used by parents sending their children to religious schools. He noted, “The money will thus pay for eligible students’ instruction not only in secular subjects but in religion as well, in schools that can fairly be characterized as founded to teach religious doctrine and to imbue teaching in all subjects with a religious dimension. Public tax money will pay at a systemic level for teaching the covenant with Israel and Mosaic law in Jewish schools, the primacy of the Apostle Peter and the Papacy in Catholic schools, the truth of reformed Christianity in Protestant schools, and the revelation to the Prophet in Muslim schools, to speak only of major religious groupings in the Republic.” Under the instrumentalist-era precedents of Allen, Tilton, and Nyquist, discussed at § 32.1.3.1.A nn.87-94, among others, this aid to religious schools, not limited to secular materials, secular instruction, or secular construction, would have been held to violate the Establishment Clause, as Justice Souter noted.138

A principled natural law approach, focused on “strict neutrality” as measured by no government “endorsement” of religion, would likely adopt an approach between the greater deference-to-government application of the endorsement test by Justice O’Connor, and the greater separation of church and state instrumentalist approach of Justice Souter. Justice O’Connor is right that to the extent the decision to use the vouchers is made by parents, there is no governmental aid going to religion per se. Because the governmental aid is focused on education, not religion, such programs do not violate a strict mandate, as stated by Madison, noted at § 32.1.1 n.10, that religion be “wholly exempt from [the] cognizance” of government. To the extent any school covered by the program cannot discriminate in its admittance policies on grounds of religion, or teach doctrines of religious hatred, there is even less of a chance of the perception of government endorsement of religion.

On the other hand, there are aspects of Justice Souter’s dissents in Mitchell and Zelman that are important to keep in mind from a natural law, strict neutrality objective endorsement perspective. First, and most obviously, the test of whether an objective observer would conclude the government is behaving with strict neutrality or endorsing religion is based on a full analysis of all the facts of the government’s action. The government cannot evade the endorsement test by keeping its aid “secret” and then claim that since individuals do not know about it, no endorsement is taking place. As a doctrinal matter, the endorsement test, as phrased by Justice O’Connor, is not based on subjective knowledge, but is an objective test based on objective facts. More generally, given the concerns with entanglement of church and state expressed by Madison, Story, and others, discussed at § 32.1.1 nn.2-18, secret aid, suggesting of a church/state conspiracy, is naturally much more problematic than aid given in the open. Justice Souter’s concern in Mitchell that the endorsement test might not cover the problem of “secret aid” is inapposite.139 The endorsement test can handle this problem easily.

Second, political divisiveness brought on by lobbying pressures regarding what aid should go to religious schools does raise concerns of entangling church and state. As Justice Souter indicated in Zelman, these are precisely the kind of concerns of factional politics about which Madison, in

138 Id. at 686-93 (Souter, J., joined by Stevens, Ginsburg & Breyer, JJ., dissenting).

139 Mitchell, 530 U.S. at 900-01 (Souter, J., joined by Stevens & Ginsburg, JJ., dissenting).
particular, was quite sensitive. While Justice O’Connor is right that the mere filing of a lawsuit does not establish any real concern with political divisiveness, more intense lobbying activities, as noted by Justice Breyer in his separate dissent in Zelman, should raise real entanglement issues. The concerns are separate from, and thus not solved by, the “parental choice” aspect of the program.

On the question of whether Justice Souter’s “substantial risk” of diversion, discussed at § 32.1.3.1.B n.134, or Justice O’Connor’s “actual” diversion, discussed at § 32.1.3.1.B n.132, is the relevant inquiry from an endorsement perspective, if the “risk” is “substantial” enough, then an objective observer might well conclude that the government being willing to take that risk evidences endorsement of religion, unless compelling secular interests justify taking the risk. As one factor in the endorsement inquiry, there should be no per se rule preventing considering the risk of diversion, but only truly substantial risks should make much difference in the factor analysis in the absence of any actual diversion, particularly if the government indicates a willingness to respond to any actual diversion which might take place. Response to any diversion indicates the government’s commitment not to endorse religion.

Finally, many of the concerns regarding the dangers of more wide-spread government support for religious education raised by Justices Souter and Breyer in their dissents in Zelman are speculative. Given the religious diversity in the Nation, and the fact that most individuals educate their children in the public schools, and will likely continue to do so in the future, there is not likely to be much sustained political pressure for wide-spread voucher programs or other kinds of aid to nonpublic schools. Certainly after Zelman, no such explosion in voucher programs has taken place. Indeed, the greater threat to public schools may come from charter schools, which, though “public” schools in the sense of being completely funded by the government, are typically founded, organized, and run not by the district or the state, but by self-organizing groups of education entrepreneurs – parents, teachers, or third parties. In some states the same institutions that accredit school districts also certify charter schools, and in other states charter schools must apply for their authorizing "charter" to the local school district with which they plan to compete. Charter schools are more thoroughly regulated than voucher schools – for example, they cannot teach a sectarian curriculum – but they are still exempt from many of the regulations and policies that govern traditional public, district-run schools.

144 Id. at 881-82.
In addition, many states have provisions in their state constitutions which restrict them from directing money to religious educational institutions. In most states, such provisions were passed in the late 19th century, when most religious educational institutions were Catholic, as part of the Anti-Catholicism of that era. As one author has noted:

Blaine Amendments, as they are called, are the result of a campaign by Congressman James Blaine of Maine. While in Congress, he sponsored a constitutional amendment that would have barred the state from establishing or sponsoring a religion, but his proposal fell short of the necessary votes. The amendment was introduced on December 14, 1875, and said [in part]:

“[N]o money raised by taxation in any State for the support of public schools, or derived from any public fund therefore, nor any public lands devoted thereto, shall ever be under the control of any religious sect, nor shall any money so raised or lands so devoted be divided between religious sects or denominations.”

Although the amendment failed in Congress, many anti-Catholic proponents took up the amendment, and as many as thirty-seven states eventually enacted Blaine Amendments.145

The Ohio and Wisconsin Supreme Courts have held that vouchers programs in their states are not barred by their state’s version of a Blaine Amendment.146 The Florida and Colorado Supreme Courts have struck down vouchers programs under provisions in their state constitutions regarding providing “free public education” and ensuring “local control” of schools, independent of Blaine Amendment concerns.147 As of 2006, ten states have constitutional provisions specifically banning public funds for any private school education: Alaska, California, Hawaii, Kansas, Michigan, Mississippi, Nebraska, New Mexico, South Carolina, and Wyoming.148

Given all of these considerations, while drawing the precise federal constitutional line regarding permissible aid to nonpublic schools in cases like Agostini, Mitchell, and Zelman is important in terms of developing principled constitutional doctrine, the greater practical concern regarding the Establishment Clause and schools is political pressure for religious influences to invade public schools, where most children are educated, and where political pressure may well be greater. On these issues, Justices O’Connor, Kennedy, and Souter have tended to agree, and the recent precedents continue to represent a relatively strict form of government neutrality toward religion. These cases are discussed next, at § 32.1.3.1.B.2.

(2) Religious Influences Within the Public Schools

As noted at § 32.1.3.1.A nn.80-86, the matter of prayer in public schools was first considered during the instrumentalist era in Engel v. Vitale,149 decided in 1962, and School District of Abington Township v. Schempp,150 decided in 1963. In Engel, the Court struck down a policy of having teachers, at the beginning of each school day, say a non-denominational prayer, with students not compelled to join in the prayer over their parents’ objection. In Schempp, the Court struck down a Pennsylvania law that required that at least 10 verses from the Holy Bible shall be read, without comment, at the opening of public school on each school day, with children to be excused upon the written request of their parents or guardian. In both cases, the Court viewed the prayers as having no purpose other than to advance religion. Thus, in both cases the government action violated the liberal instrumentalist understanding of the separation of church and state, which, as restated in 1971 as the first prong of the Lemon test, discussed at § 32.1.2.4 n.51, requires government acts to have a secular purpose to survive an Establishment Clause analysis.

By the beginning of the natural law era, in 1986, the Court had concluded that statements appearing to be directly in support of religion may have a secular purpose if they reflect what the Court has called “ceremonial deism.” Under this concept, as explained by Justice O’Connor, concurring in the judgment in Elk Grove Unified School District v. Newdow:

One such purpose is to commemorate the role of religion in our history. . . . It is unsurprising that a Nation founded by religious refugees and dedicated to religious freedom should find references to divinity in its symbols, songs, mottoes, and oaths. Eradicating such references would sever ties to a history that sustains this Nation even today.

Facially religious references can serve other valuable purposes in public life as well. . . . [S]uch references “serve, in the only ways reasonably possible in our culture, the legitimate secular purposes of solemnizing public occasions, expressing confidence in the future, and encouraging the recognition of what is worthy of appreciation in society.” For centuries, we have marked important occasions or pronouncements with references to God and invocations of divine assistance. Such references can serve to solemnize an occasion instead of to invoke divine provenance.

Given this secular purpose, the question of whether a particular statement or invocation in public schools violates the Establishment Clause then turns under Lemon to the question whether the statement has a principal or primary effect to advance religion. In deciding this question, the Justices tend to reflect their general approach to the Establishment Clause. For example, in 1992,

---

the Court held in *Lee v. Weisman*\textsuperscript{152} that a public school could not offer invocations or benedictions in a high school graduation ceremony. Reflecting a liberal instrumentalist predisposition toward a strong concept of separation of church and state, Justice Blackmun noted in a concurring opinion, joined by Justices Stevens and O’Connor, that “mixing of government and religion can be a threat to free government, even if no one is forced to participate. When the government puts its imprimatur on a particular religion, it conveys a message of exclusion to all those who do not adhere to the favored beliefs. A government cannot be premised on the belief that all persons are created equal when it asserts that God prefers some.”\textsuperscript{153}

In a separate concurrence, focused more on the natural law concern with endorsement, Justice Souter, joined by Justices Stevens and O’Connor, concluded that the “ceremonial deism” rationale could not work in *Lee v. Weisman*, as it might for religious invocations on Thanksgiving. He noted that “religious invocations on Thanksgiving day addresses and the like are rarely noticed, ignored without effort, conveyed over an impersonal medium, and directed at no one in particular, and inhabit a pallid zone worlds apart from official prayers delivered to a captive audience of public school students and their families. . . . When public school officials, armed with the State's authority, convey an endorsement of religion to their students, they strike near the core of the Establishment Clause. However ‘ceremonial’ their messages may be, they are flatly unconstitutional.”\textsuperscript{154}

The critical fifth vote in *Lee v. Weisman* to hold such an invocation or benediction unconstitutional was Justice Kennedy, who authored the majority opinion for the Court. Focusing on the Holmesian concern with “coercion,” Justice Kennedy noted that opening the graduation with an invocation or benediction created a coercive pressure on students to participate in, or appear to participate in, a religious exercise, given the fact that presence at graduation is, in a practical sense, obligatory. Justice Kennedy explained that “the lesson of history that was and is the inspiration for the Establishment Clause, [is] the lesson that in the hands of government what might begin as a tolerant expression of religious views may end in a policy to indoctrinate and coerce. A state-created orthodoxy puts at grave risk the freedom of belief and conscience which are the sole assurance that religious faith is real, not imposed.”\textsuperscript{155}

Justice Scalia dissented, with Chief Justice Rehnquist, and Justices White and Thomas. Reflecting a formalist approach to the Establishment Clause, discussed at § 32.1.2.2 nn.29-30, 33 & 36, he stated that religious expression should be permissible in acknowledgment of the American cultural heritage and tradition. Further, there was no warrant for expanding the concept of coercion beyond

\textsuperscript{152} 505 U.S. 577, 598-99 (1992). See also Coles v. Cleveland Bd. of Educ., 171 F.3d 369, 376-83 (6th Cir. 1999) (prayers delivered at opening of public school board meetings in which students participate directly in discussion more like *Lee v. Weisman*, and thus impermissible, than permissible legislative prayer in *Marsh v. Chambers*, discussed at § 32.1.2.3 n.49).

\textsuperscript{155} Id. at 591-92.
acts backed by threats of a penalty. He suggested that, in any event, any coercive result could be avoided if educators provided a notice that no one is compelled to participate in the invocation or benediction, and it will not be assumed that, by rising, they have done so.156

In 2000, the Court returned to religious observance in schools, this time to a student prayer delivered before a football game. In Santa Fe Independent School District v. Doe,157 the Court held by a 6-3 vote that school involvement in the process of selecting the student speaker invited and encouraged religious messages. Reflecting the endorsement theory, the Court opinion noted, “Regardless of the listener's support for, or objection to, the message, an objective Santa Fe High School student will unquestionably perceive the inevitable pregame prayer as stamped with her school's seal of approval.” The Court also noted that the prayer was “coercive” under Justice Kennedy’s opinion in Lee v. Weisman. Attendance at a high school football game, particularly for team members and cheerleaders, was as obligatory as attendance at the high school graduation in Lee, and the fact that a student delivered the prayer did not alter the improper effect of coercing those present to participate in an act of religious worship. The Court noted, “[N]othing in the Constitution as interpreted by this Court prohibits any public school student from voluntarily praying at any time before, during, or after the school day. But the religious liberty protected by the Constitution is abridged when the State affirmatively sponsors the particular religious practice of prayer.”

Chief Justice Rehnquist, dissenting with Justices Scalia and Thomas, said the majority opinion “bristles with hostility to all things religious in public life.” The Court should not declare the policy invalid on its face because it has plausible secular purposes – to solemnize the event, to promote good sportsmanship, and thereby also to promote student safety. The dissent noted that “[i]t has not been the Court's practice, in considering facial challenges to statutes . . . to strike them down in anticipation that particular applications may result in unconstitutional [behavior].”158

Regarding the issue of a moment of silence at the beginning of the school day, the Court held in 1985 in Wallace v. Jaffree,159 discussed at § 32.1.2.2 n.25, that an Alabama statute which provided that at the beginning of each school day “a period of silence not to exceed one minute in duration shall be observed for meditation or voluntary prayer” was unconstitutional as having the purpose of advancing religion. In cases since 1986, statutes providing for “a moment of silence” at the beginning of each school day have been upheld if based on the secular purposes to solemnize the beginning of the school day; to help enable students to pause, settle down, compose themselves, and focus on the day ahead, making for a better learning environment; and to create a better atmosphere

156 Id. at 631-32, 640-45 (Scalia, J., joined by Rehnquist, C.J., and White & Thomas, JJ., dissenting).

159 472 U.S. 38, 56-60 (1985).
to deal with problems of student self-respect, discipline, and violence. As a typical example, in 2001, in Brown v. Gilmore, the Fourth Circuit upheld a Virginia “minute of silence” statute which provided for a minute of silence at the beginning of the school day so that “each pupil may, in the exercise of his or her individual choice, meditate, pray, or engage in any other silent activity which does not interfere with, distract, or impede other pupils in the like exercise of individual choice.”

Regarding the teaching of evolution in the public schools, the Court held in 1987 in Edwards v. Aguillard, discussed at § 32.1.2.4 n.59, that Louisiana’s Creationism Act, which forbid the teaching of evolution in public elementary and secondary schools unless accompanied by instruction in the theory of “creation science,” was unconstitutional because the purpose of the Creationism Act was to endorse a particular religious doctrine regarding creation. Since Aguillard, a similar issue has resurfaced regarding legislative attempts to require the theory of “Intelligent Design” (ID) to be taught in science classes along with the theory of evolution. While not explicitly based on the story of creation in Genesis, the theory of intelligent design does posit some intelligent force overseeing nature, rather than Darwin’s theory of natural selection. As of 2006, this issue had not reached the Supreme Court, but, in Kitzmiller v. Dover Area School District, a lower federal court ruled that requiring ID to be taught in public school constituted government endorsement of religion, under the endorsement test, and had a religious purpose, thus violating the first prong of the Lemon test. The court noted, “Although proponents of [ID] occasionally suggest that the designer could be a space alien or a time-traveling cell biologist, no serious alternative to God as the designer has been proposed by members.” Quoting the views of the National Academy of Sciences, the court also noted, “Creationism, intelligent design, and other claims of supernatural intervention in the origin of life or of species are not science because they are not testable by the methods of science. These claims subordinate observed data to statements based on authority, revelation, or religious belief.”

Most commentators have similarly concluded that teaching “Intelligent Design” would violate the Lemon test, Justice O’Connor’s endorsement test, or Justice Kennedy’s “coercion or proselytizing” test. However, one author has argued that “intelligent design theory [is] about the limits of

scientific explanation,” and that the real question in these cases should be whether “theories about the limits of science belong in science courses?” Other authors have been more willing to embrace ID, with one author arguing that ID has “presented an array of sophisticated and empirically grounded arguments supporting the notion that intelligent agency may do a better job of accounting for certain aspects of the natural world, or the natural world as a whole, than non-agent explanations, such as natural selection or scientific laws working on the unguided interaction of matter.”

An easier case for unconstitutionality would be any attempt to ban the teaching of evolution in the public schools, such as occurred in the famous Scopes trial in Tennessee in 1925, or was involved in a similar Arkansas statute invalidated by the Supreme Court in 1968. Both cases involved a state statute that prohibited public school teachers and public university professors from teaching the theory that humans evolved from other species, or from using textbooks that contained material on evolution. In *Epperson v. Arkansas,* a unanimous Court invalidated the Arkansas statute, with Justice Fortas’ majority opinion holding that the statute had a sole purpose to advance religion, noting, "It is clear that fundamentalist sectarian conviction was and is the law's reason for existence." Justice Stewart concurred in the result, holding that the statute violated teachers’ free speech rights.

Despite these conclusions, other aspects of religious influences in public schools do not pose the same kind of problem under *Lemon,* the endorsement test, or the coercion or proselytizing test. For example, it is reasonably well-established that public schools can teach and perform sacred choral music as an integral part of a complete and historically accurate music education, to broaden the students' understanding of musical culture, and to increase the students' awareness of diversity. Such use is permissible as long as the sacred choral music does not predominate the music selection to create a principal or primary effect to advance religion under *Lemon,* or lead an objective observer to conclude the school is endorsing religion, under the endorsement test; or involve proselytizing or coercing students to participate in a religious, rather than musical, event, under the coercion test.

---

167 393 U.S. 97, 107-08 (1968); *id.* at 116 (Stewart, J., concurring in the result).

Public schools can also teach about religion, and religious influences on society and historical events.\(^{169}\) Indeed, as far back as 1963 in *School District of Abington Township v. Schempp*,\(^ {170}\) discussed at § 32.1.3.1.A. n.84, the Court acknowledged that reading passages from religious works, such as the Bible, the Torah, or the Koran, was permissible when presented objectively as part of a secular program of education, as they are worthy of study for their literary and historic qualities.

During the instrumentalist era, concern about possible violation of the Establishment Clause was used by some public schools as a justification for refusing to allow groups with a religious perspective to use school facilities. However, since 1986, that justification has not been successfully invoked where the Court has concluded that denial of equal access to school facilities violated the free speech rights of such groups. For example, in 1993, in *Lamb’s Chapel v. Center Moriches Union Free School District*,\(^ {171}\) the Court held that a school district violated the First Amendment freedom of speech when it excluded a bible club from presenting films in a public forum opened by the school. The school had denied access because the films’ discussion of family values was from a religious perspective. For the Court, Justice White wrote that allowing use of school facilities for bible study would not have been an establishment under the three-part *Lemon* test or constitute government endorsement of religion. Justice Kennedy, concurred in the judgment, but indicated his disapproval of the endorsement test. Justice Scalia, joined by Justice Thomas, concurred in the judgment, but again rejected the *Lemon* test in favor of his formalist accommodationist approach. He said that using the *Lemon* test was like seeing “some ghoul in a late-night horror movie that repeatedly sits up in its grave and shuffles abroad, after being repeatedly killed and buried.”\(^ {172}\)

In 1995, in *Rosenberger v. Rector and Visitors of the University of Virginia*,\(^ {173}\) a 5-4 Court held that a state university would not violate the Establishment Clause if it funded the publication of a wide variety of student newspapers, including one that expressed religious viewpoints. Justice Kennedy wrote that such a program would be neutral with respect to religion. However, failing to fund a student newspaper because it had a religious perspective was a form of viewpoint discrimination, as discussed at § 29.4.2 nn.99-100. A close analogy, he said, was *Lamb’s Chapel*, where state facilities generally open to the public were held to be invalidly closed to a group that wanted to discuss family issues from a religious viewpoint. This could not be justified on the ground of avoiding a violation of the Establishment Clause. If the University scanned student publications to eliminate funding for those with a religious viewpoint that would risk fostering a pervasive bias or hostility to religion, which could undermine the very neutrality required by the Establishment Clause.

\(^{172}\) *Id.* at 397 (Kennedy, J., concurring in part and concurring in the judgment); *id.* at 398 (Scalia, J., joined by Thomas, J., concurring in the judgment).

Justice Souter dissented with Justices Stevens, Ginsburg, and Breyer. Justice Souter denied that there was viewpoint discrimination, saying that the University’s ban applied to all religions and to agnostics and atheists, since it denied funding to activities promoting or manifesting a particular belief not only “in” but “about” a “deity or ultimate reality.” Lamb’s Chapel was distinguishable because here the funding was not denied to those who discussed issues in general from a religious viewpoint, but rather to those engaged in promoting or opposing religious conversion and religious observances as such. He noted that the Court had never before upheld direct state funding of the kind of proselytizing activities published in the religious newspaper in this case, and, in fact, had categorically condemned state programs directly aiding such religious activity.174

Consistent with Lamb’s Chapel and Rosenberger, the Court held in 2001 in Good News Club v. Milford Central School175 that a public school violated the free speech rights of a religious club that was excluded from meeting after hours on school premises. Delivering the opinion of the Court, Justice Thomas said that if a public agency has opened a limited public forum, as was done here, its power to restrict speech is limited in two ways: it may not discriminate against speech on the basis of viewpoint and its restriction must be reasonable in light of the purpose served by the forum. The exclusion here, as in Lamb’s Chapel and Rosenberger, constituted viewpoint discrimination. In reaching this conclusion, Justice Thomas explained that the school permitted the use of its facilities for any group that promoted the moral and character development of children. Here, the club sought to address that subject from a religious standpoint. He said that even though the club’s activities may be decidedly religious in nature, they can also properly be characterized as the teaching of morals and character development. Allowing the club to use the school facilities, as in Lamb’s Chapel, would not violate the Establishment Clause because the activities were not sponsored by the school, would not occur during school hours, and would have been open to the public. Even small children would not perceive endorsement here but, in any event, the danger of misperceiving the endorsement of religion was no greater than the danger that they would perceive a hostility toward the religious viewpoint of the club if it were excluded from the public forum.176

Reflecting his formalist viewpoint, discussed at § 32.1.2.2 nn.30, 33, Justice Scalia, concurring, said that there was absolutely no legal coercion in this situation and that religious expression could not violate the Establishment Clause where it was purely private conduct in a traditional or designated public forum, since any speech would be literally that of the private actor, not the government. Reflecting his occasional Holmesian deference-to-government predisposition, discussed at § 11.4 nn.107-09, Justice Breyer, concurring, speculated that a child participating in the program might perceive an endorsement of religion by the school, but Justice Breyer indicated that he would not presume government endorsement. That issue could be dealt with at trial.176

Justice Stevens, dissenting, said that the district court correctly classified the religious speech involved here as aimed principally at proselytizing or inculcating belief in a particular religious faith, and a school may bar such speech, just as it may bar worship, even though it permits speech

174 Id. at 874-75, 893-99 (Souter, J., joined by Stevens, Ginsburg & Breyer, JJ., dissenting).

176 Id. at 120-21 (Scalia, J., concurring); id. at 128-30 (Breyer, J., concurring in part).
about topics from a religious point of view. Similarly, Justice Souter, joined by Justice Ginsburg, said in his dissent that the club meets for the evangelical service of worship and not merely the teaching of morals and character from a religious point of view. The forum is not anything like the sites for wide-ranging intellectual exchange that were involved in *Lamb’s Chapel*. Indeed, rather than the school location being used to foster an atmosphere of exchange of ideas, the school’s physical location appeared to be the whole point. Attendance tripled when moved to that setting.\footnote{Id. at 131-34 (Stevens, J., dissenting); \textit{id.} at 137-39, 142-45 (Souter, J., joined by Ginsburg, J., dissenting).}

Reaching a similar conclusion, the Ninth Circuit has held that a county’s library refusal to allow religious services in the library is a permissible exclusion meant to preserve the limited public forum for “educational, cultural or community interest” activities, and does not constitute viewpoint discrimination.\footnote{Faith Center Church Evangelistic Ministries v. Glover, 462 F.3d 1194 (9th Cir. 2006).}

\section*{\textbf{§ 32.1.3.2} The Display Cases}

\subsection*{A. The Instrumentalist Era}

Not surprisingly, during the instrumentalist era, the pattern of results in the display cases mirrored those in the school aid cases. Liberal instrumentalist Justices found most displays unconstitutional if they contained a religious element. Justice O’Connor focused on whether the displays constituted a government endorsement of religion. The formalist perspective focused on whether the displays were consistent with our Nation’s history and traditions.

For example, as noted at § 32.1.2.4 n.58, in 1980 the Court held in *Stone v. Graham*\footnote{449 U.S. 39, 40-43 (1980); \textit{id.} at 43 (Burger, C.J., joined by Blackmun, J., dissenting); \textit{id.} at 43 (Stewart, J., dissenting); \textit{id.} at 44-46 (Rehnquist, J., dissenting).} that the display of a copy of the Ten Commandments on the walls of public classrooms violated the Establishment Clause as its sole purpose was to advance religion. The decision in *Stone* was \textit{per curiam}, and summarily reached without full briefing and argument. Four Justices dissented in the case. Chief Justice Burger and Justice Blackmun indicated they would grant certiorari and give the case plenary consideration. Justice Stewart also dissented from the summary reversal, indicating his view that, so far as appears, the lower courts applied wholly correct constitutional criteria. Justice Rehnquist filed a full dissenting opinion, stating that the statute did have a secular purpose of acknowledging the role our religious heritage, and in particular the Ten Commandments, has played in the social, cultural, and historical development of our Nation.

Four years later, in *Lynch v. Donnelly*, a 5-4 Court allowed a creche to be included in a large Christmas display sponsored by a city and held in a private park. Reciting numerous historical examples of “official acknowledgment by all three branches of government of the role of religion in American life,” Chief Justice Burger spoke of the display as giving benefit to religion only in a
way that was “indirect, remote, and incidental.” Thus, it did not violate the Lemon test as having a principal or primary effect to advance religion.

Justice O’Connor’s concurrence in the case was critical in terms of how Establishment Clause doctrine has developed during the modern natural law era. In her concurrence, she indicated for the first time that, for her, the controlling question in applying the first two prongs of the Lemon test (purpose and effect) was whether a reasonable observer would understand that the government was “endorsing” religion through its display. Applying that test, Justice O’Connor did not find an endorsement in Lynch, because a creche is a traditional symbol of Christmas, and was accompanied here by many secular elements, such as a banner proclaiming “Season’s Greetings” and, as the dissent acknowledged, a miniature village, including “Santa Claus’ house, a talking wishing well, and cut-out clowns and bears.”

Justice Brennan dis sented, joined by Justices Marshall, Blackmun, and Stevens. For them, the other elements in the display did not negate the endorsement of Christianity caused by the creche. Justice Brennan noted, “The inclusion of a distinctively religious element like the crèche . . . demonstrates that a narrower sectarian purpose lay behind the decision to include a nativity scene. . . . [T]he Mayor's testimony at trial [was] that for him, as well as others in the City, the effort to eliminate the nativity scene from Pawtucket's Christmas celebration ‘is a step towards establishing another religion, non-religion that it may be.’ Plainly, the City and its leaders understood that the inclusion of the crèche in its display would serve the wholly religious purpose of ‘keep[ing] “Christ in Christmas.”’ Referring to the fact-specific, limited nature of the holding in Lynch, Justice Brennan also noted that “nothing in the Court's opinion suggests that the [Third Circuit] erred when it found that a city-financed platform and cross used by Pope John Paul II to celebrate mass and deliver a sermon during his 1979 visit to Philadelphia was an unconstitutional expenditure of city funds.” He continued, “Nor does the Court provide any basis for disputing the holding of the [Eleventh Circuit] that the erection and maintenance of an illuminated Latin cross on state park property violates the Establishment Clause.”

**B. The Modern Natural Law Era**

Since 1986, the endorsement theory of Justice O’Connor has gained adherents and has been the key factor in several display cases. Liberal instrumentalist Justices, along with Justice Souter, have joined opinions applying the endorsement test to resolve issue of religious displays on public property. As with the school cases, Justice Kennedy has tended to focus on whether the displays involve coercion or proselytizing of religion, and the formalist perspective has focused on whether

183 Id. at 695 n.1, citing Gilfillan v. City of Philadelphia, 637 F.2d 924 (3d Cir. 1980).

184 Id., citing ACLU of Georgia v. Rabun County Chamber of Commerce, Inc., 698 F.2d 1098 (11th Cir. 1983.).
the displays are consistent with our Nation’s history and traditions.

For example, in 1989, in *County of Allegheny v. American Civil Liberties Union*, a county displayed a creche in the county courthouse and a city displayed a menorah in front of the City-County Building. The creche had a banner which proclaimed, “Gloria in Excelsis Deo,” and there were no figures of Santa Clause or other decorations. The menorah was placed next to a 45-foot Christmas tree and a sign titled “Salute to Liberty.” Beneath this title, the sign stated, “During this holiday season, the city of Pittsburgh salutes liberty. Let these festive lights remind us that we are the keepers of the flame of liberty and our legacy of freedom.” Reflecting the liberal instrumentalist strong separation of church and state approach, discussed at § 32.1.2.4, Justice Brennan, joined by Justice Marshall and Stevens, would have held that both displays violated the Establishment Clause. Quoting from his dissenting opinion in *Lynch v. Donnelly*, Justice Brennan stated, “I continue to believe that the display of an object that ‘retains a specifically Christian [or other] religious meaning,’ is incompatible with the separation of church and state demanded by our Constitution.”

In contrast, Justices Blackmun and O’Connor drew distinctions between the creche display and the menorah/Christmas tree/sign (MCS) display. Both viewed the creche display as having the impermissible effect of endorsing religion, while both viewed the MCS display as not constituting government endorsement. Justice Blackmun explained his conclusion that the two displays were different by noting that “the combination of the tree and the menorah communicates, not a simultaneous endorsement of both the Christian and Jewish faiths, but instead, a secular celebration of Christmas coupled with an acknowledgment of Chanukah as a contemporaneous alternative tradition. . . . The sign states that during the holiday season the city salutes liberty. Moreover, the sign draws upon the theme of light, common to both Chanukah and Christmas as winter festivals, and links that theme with this Nation’s legacy of freedom, which allows an American to celebrate the holiday season in whatever way he wishes, religiously or otherwise.” Reflecting his view that Justice O’Connor’s endorsement test was a refinement only of the second prong of *Lemon* dealing with effects, Justice Blackmun concluded that the MCS case should be remanded to consider the “purpose” and “entanglement” prongs of the *Lemon* test.

Justice O’Connor explained her conclusion that the two displays were different by noting that the creche display conveys a message to nonadherents of Christianity that they are “not full members of the political community,” and a corresponding message to Christians that they are “favored members of the political community.” However, the MCS display sent a message of pluralism and

187 *Id.* at 598-602 (Blackmun, J., opinion for the Court) (joined by Justices Brennan, Marshall, Stevens & O’Connor).

188 *Id.* at 616-21 (Blackmun, J., opinion) (this part of Justice Blackmun’s opinion was joined by no other Justice on the Court).
freedom to choose one’s own beliefs, and not a message of endorsement of Judaism or of religion in general. This was so even though, as Justice O’Connor acknowledged more in her concurrence than did Justice Blackmun in his opinion, “Chanukah is a religious holiday with strong historical components particularly important to the Jewish people. Moreover, the menorah is the central religious symbol and ritual object of that religious holiday.”189 In Part II of her opinion, joined by Justices Brennan and Stevens, Justice O’Connor also defended her endorsement test, which she stated in Lynch should replace the first two prongs of Lemon, as: (1) consistent with Madisonian concerns, noted § 32.1.2.1 nn.10-11, 18, to protect, in her words, “the religious liberty [and] respect the religious diversity of the members of our pluralistic political community”; (2) consistent with the results in existing Court precedents; and (3) capable of principled and consistent application.190

Justice Kennedy, with Chief Justice Rehnquist and Justices White and Scalia, said that both displays were constitutional. Reflecting his coercion approach to the Establishment Clause, discussed at § 32.1.2.3. nn.47-50, Justice Kennedy noted that in his view only two limiting principles should exist on accommodating religion: (1) “the government may not coerce anyone to support or participate in any religion or its exercise,” and (2) “it may not, in the guise of avoiding hostility or callous indifference, give direct benefits to religion in such degree that it in fact ‘establishes a [state] religion or religious faith, or tends to do so.’” Consistent with a formalist “customs and tradition” approach, noted at § 32.1.2.2 n.36, and favored by Chief Justice Rehnquist, and Justices White and Scalia, Justice Kennedy also stated that to find invalid advancement of religion here reflects “an unjustified hostility toward religion, a hostility inconsistent with our history and our precedents.”191

Another leading display case came before the Court in 1995, Capitol Square Review and Advisory Board v. Pinette.192 The question in Pinette was whether a state violated the Establishment Clause when it permitted a private party (the Ku Klux Klan) to display an unattended religious symbol (a cross) in a traditional public forum (Capitol Square, located next to the statehouse). Justice Scalia announced the judgment of the Court upholding what the state had done, and he delivered an opinion joined by Chief Justice Rehnquist and Justices Kennedy and Thomas. In the crucial part IV of his opinion, Justice Scalia wrote that religious expression cannot violate the Establishment Clause where it “(1) is purely private and (2) occurs in a traditional or designated public forum, publicly announced and open to all on equal terms.” Both conditions were satisfied here and so the state could not bar the cross.193 Justice Thomas, concurring, said that erection of the cross in this case was primarily a political act, not a Christian act, so the case may not involve the Establishment Clause.

---

189  Id. at 625-27, 632-37 (O’Connor, J., concurring in part and concurring in the judgment).

190  Id. at 627-32 (O’Connor, J., joined by Brennan & Stevens, JJ., concurring in part).

191  Id. at 655, 659 (Kennedy, J., joined by Rehnquist, C.J., and White & Scalia, JJ., concurring in the judgment in part and dissenting in part) (citations omitted).

193  Id. at 769-70 (plurality opinion of Scalia, J., joined by Rehnquist, C.J., and Kennedy & Thomas, JJ.).
Justice O’Connor, concurring, joined by Justices Souter and Breyer, wrote that the Establishment Clause inquiry cannot be distilled into such a fixed, *per se* rule. For example, she noted, under her endorsement test, the presence of a sign disclaiming government sponsorship or endorsement of the Klan cross would help make clear the state’s role to the community. She said this followed from the fact that the analysis should be from the perspective of a reasonable objective observer in possession of the relevant facts. She disagreed with the dissenting views that endorsement had occurred, because a reasonable observer in possession of the facts would be aware that Capitol Square was a public space in which many groups, both secular and religious, engaged in expressive conduct.  

Justice Stevens, dissenting, said that for a religious display to violate the Establishment Clause, it is enough that some reasonable observers would attribute a religious message to the state. Endorsement does not have to be established from the perspective of Justice O’Connor’s “ideal” reasonable observer, “‘a personification of a community ideal of reasonable behavior, determined by the [collective] social judgment,’” similar to the reasonable person in tort law. Here there was a single unattended religious display, and it is unlikely that all reasonable viewers knew about the history of the square. Justice Ginsburg, also dissenting, pointed out that the cross stood alone in close proximity to the statehouse. Near the cross were the government’s flags and the government’s statutes. No other private display was in sight. No plainly visible sign informed the public that the cross belonged to the Klan and that Ohio’s government did not endorse the display’s message. 

In 2005, in *McCreary County, Kentucky v. American Civil Liberties Union of Kentucky*, a 5-Justice majority of Justices Stevens, O’Connor, Souter, Ginsburg and Breyer held that posting a version of the Ten Commandments in a courthouse was unconstitutional. Justice Souter’s majority opinion struck down the display based on the first prong of *Lemon*, that its primary purpose was to advance religion. In reaching this conclusion, Justice Souter modified the *Lemon* purpose inquiry to hold that even if some valid secular purpose can be identified which is not a “sham,” *Lemon* is not satisfied if the government’s “primary purpose” was to advance religion, and the secular purpose was only “secondary.” This revision is consistent with an endorsement approach, since if the

197 125 S. Ct. 2722, 2735-37, 2739-41, 2745 (2005); Edwards v. Aguillard, 482 U.S. 578, 586-89 (1987). *See also ACLU of Ohio Foundation, Inc. v. Ashbrook, 375 F.3d 484 (6th Cir.2004) (judge’s display of a framed poster in his courtroom of the Ten Commandments, which he created himself on his computer, unconstitutional, despite being displayed across from a similarly styled framed poster of the Bill of Rights).*
primary purpose is to advance religion, an objective observer would conclude that the government is endorsing religion, even if a secondary secular purpose also existed. While mention had been made in passing in Edwards v. Aguillard, discussed at § 32.1.2.4 n.59, of such a “primary purpose” analysis, all cases before McCreary that involved government action failing the first prong of Lemon had involved no valid secular purpose or a sham secular purpose, including Aguillard, where the Court held that the requirement to teach “creation science” along with “evolution” was motivated by solely a religious purpose, and that any proposed secular purpose was a “sham.”

Justice O’Connor, concurring, noted that the “primary purpose” behind the counties’ display was relevant because, under her endorsement test, it conveyed “an unmistakable message of endorsement to the reasonable observer.” Indeed, consistent with this view on “primary purpose,” in 1987, Justice O’Connor had joined with Justice Powell, concurring in Aguillard, with that concurrence noting that to violate the Establishment Clause the “religious purpose must predominate.”

In dissent, in Part I of his opinion, Justice Scalia, joined by Chief Justice Rehnquist and Justice Thomas, would have upheld the display of the Ten Commandments based on a “customs and traditions” formalist approach. In Part II of his dissent, Justice Scalia criticized the majority for shifting the focus in Lemon from “actual” government purposes to how government purposes would be “perceived” by an objective observer under an “endorsement” inquiry, and for modifying Lemon to hold that “primary” or “predominate” religious purposes, rather than “sole” religious purposes, can violate the first prong of the Lemon test. Even under Lemon, in Part III of his dissent, Justice Scalia concluded that the display was motivated not by a religious purpose, but by a non-coercive secular acknowledgment of the role the Ten Commandments have played in our Nation’s moral and legal history. Parts II and III of Justice Scalia’s dissent were joined by Justice Kennedy, reflecting his “coercion” approach to the Establishment Clause, and rejection of the “endorsement” test.

On the same day McCreary was decided, Justice Breyer voted in Van Orden v. Perry with Chief Justice Rehnquist, and Justices Scalia, Kennedy, and Thomas, to uphold a plaque of the Ten Commandments which was included among 16 other plaques on grounds in front of the Texas Capitol building. In this case, Justice Breyer concluded:

In certain contexts, a display of the tablets of the Ten Commandments can convey not simply a religious message but also a secular moral message (about proper standards of social conduct). And in certain contexts, a display of the tablets can also convey a historical message (about a historic relation between those standards and the law) . . . . The circumstances surrounding the display's placement on the capitol grounds and its physical setting suggest that the State itself intended the latter, nonreligious aspects of the tablets' message to predominate. And the monument's 40-year history on the Texas state grounds indicates that has been its effect.

---

199 Id. at 2748-64 (Scalia, J., joined by Rehnquist, C.J., and Thomas, J., and joined in Parts II and III by Kennedy, J., dissenting).
Those 40 years suggest that the public visiting the capitol grounds has considered the religious aspect of the tablets' message as part of what is a broader moral and historical message reflective of a cultural heritage.

The other 8 Justices on the Court decided *McCreary* and *Van Orden* the same way. Justices Stevens, O’Connor, Souter, and Ginsburg concluded that this plaque also constituted an endorsement of religion. As stated in Justice Souter’s dissent, “[A] pedestrian happening upon the monument at issue here needs no training in religious doctrine to realize that the statement of the Commandments, quoting God himself, proclaims that the will of the divine being is the source of obligation to obey the rules, including the facially secular ones.” Responding to an argument that the 16 other plaques reduced the religious message conveyed by the plaque, Justice Souter responded, “But 17 monuments with no common appearance, history, or esthetic role scattered over 22 acres is not [one display] . . . . One monument expresses admiration for pioneer women. One pays respect to the fighters of World War II. And one quotes the God of Abraham whose command is the sanction for moral law. . . . In like circumstances, we rejected an argument similar to the State’s, noting in *County of Allegheny* [discussed at § 32.1.3.2.B nn.185-91] that ‘[t]he presence of Santas or other Christmas decorations elsewhere in the [courthouse] fail to negate the [crèche’s] endorsement effect . . . . [T]he crèche . . . was its own display distinct from any other decorations . . . in the building.’”

Chief Justice Rehnquist, and Justices Scalia, Kennedy, and Thomas, found no coercion or proselytizing in the placement of the plaque, and said that the plaque was consistent with the Nation’s history and traditions. For them, whatever “may be the fate of the *Lemon* test in the larger scheme of Establishment Clause jurisprudence, we think it not useful in dealing with the sort of passive monument that Texas has erected on its Capitol grounds.”

Following *Van Orden*, the Eighth Circuit held *en banc* in *ACLU Nebraska Foundation v. City of Plattsmouth, Nebraska* that a granite monument in a city park displaying the Ten Commandments did not violate the Establishment Clause. The monument was donated to the city by a civic organization and was displayed without objection for several decades prior to commencement of lawsuit challenging the display. The monument was erected in a corner of the park, 10 blocks from city hall, and the words of the monument faced away from the park and its picnic benches and recreational equipment. The court also noted that the Ten Commandments have undeniable historic meaning in addition to their religious significance, and use of the text of the Ten Commandments to acknowledge the role of religion in our Nation’s heritage are “replete throughout our country.” The court noted, “Buildings housing the Library of Congress, the National Archives, the Department of Justice, the Court of Appeals and District Court for the District of Columbia, and the United

States House of Representatives all include depictions of the Ten Commandments. . . . Indeed, in the United States Supreme Court's own Courtroom, a frieze depicts Moses holding tablets that represent the Ten Commandments, and the Ten Commandments decorate the metal gates and doors around the Courtroom.”

A dissenting opinion in Plattsmouth noted that, unlike the display in Van Orden, the monument's religious message here stood alone with nothing to suggest a broader historical or secular context. The dissent also noted that “the oft noted image of Moses holding two tablets, depicted on the frieze in the Supreme Court's courtroom, appears in the company of seventeen other lawgivers, both religious and secular. Similarly, the depiction of Moses and the Ten Commandments on the Court's east pediment also finds him in the company of renowned secular figures.”

§ 32.1.4 Establishment Clause: General Thoughts For the Future

With the current membership of the Court as of 2006, there may now be 5 votes for some combination of formalist accommodation and Holmesian concern with coercion or proselytizing to determine results in Establishment Clause cases. This would occur if both Chief Justice Roberts and Justice Alito adopt either a formalist or Holmesian approach to the Establishment Clause, which they may, as discussed in the Addendum to this book. Those Justices would then join formalist Justices Scalia and Thomas, and Justice Kennedy, who has consistently adopted a Holmesian approach to Establishment Clause issues, as noted at §§ 32.1.2.3 nn.47-50, 32.1.3.1.B. nn.126-36 & 32.1.3.2.B nn.191-202, despite his usually adopting a natural law decisionmaking style.

In the long-run, however, and based in part on the material presented in Chapter 15 regarding cognitive, moral, and social developmental stages, the prediction of this book is that a modern natural law judicial decisionmaking style will represent the majority on the Supreme Court, as it was the controlling votes on Establishment Clause doctrine between 1994-2005, and remains the controlling votes in 2006 on most constitutional doctrines. Full development of that perspective regarding Establishment Clause issues would embrace a “strict neutrality” approach, as discussed at § 32.1.2.1, requiring that government not endorse religion. Such an approach would include the “primary purpose” analysis of McCreary; discussed at § 32.1.3.2.B nn.197-98; the “ideal” objective observer approach, discussed at § 32.1.3.2.B nn.195-96, which reflects a natural law commitment to reason, and thus rational, objective decisionmaking based on awareness of relevant facts; and sensitivity to the full dimension of the neutrality/endorsement inquiry, giving full consideration to the issues of purpose, effect, and entanglement, including the fact that true “political divisiveness,” or a “substantial risk” of diversion of government funds for religious use, can cause real concerns with government being dragged into endorsing religion, as discussed at § 32.1.3.1.B.2 nn.139-44.

Of course, reflecting the background natural law principle of “ut res magis valeat quam pereat” (so that the venture may succeed and not fail), discussed at § 10.2.1.1 & § 6.2.1.2, the Constitution is not a suicide pact. Thus, as under the Equal Protection Clause, where even race discrimination can be justified under a strict scrutiny, compelling government interest analysis, discussed at § 26.2.1.1.E nn.134-38; or Substantive Due Process doctrine, where even substantial burdens on

\[204\] Id. at 778-81 (Bye, J., joined by M.S. Arnold, J., dissenting) (citations omitted).
fundamental rights trigger a strict scrutiny approach, discussed at § 27.3.3 nn.170-79; or under the First Amendment freedom of speech, where even viewpoint discrimination is tested by strict scrutiny, discussed at § 29.4.3.1 nn.107-10; or Free Exercise Clause doctrine, where government can discriminate against religious beliefs if it can satisfy a strict scrutiny approach, discussed at §§ 32.2.2.4 nn.247-48 & 32.2.2.5 nn.251, 254, government endorsement of religion should be constitutional if it can satisfy a strict scrutiny, compelling government interest, least restrictive alternative analysis.

Subjecting such endorsement to a strict scrutiny test would be a departure from current doctrine, where endorsement is per se unconstitutional. However, applying strict scrutiny to endorsements, as applying strict scrutiny in the other doctrines mentioned above, despite their text also being stated in literal absolutist terms, makes sense as a reasoned elaboration of the law. It is also consistent with Madison’s views, who remarked in a letter in 1822, cited at § 32.1.1 n.19, on “the immunity of civil government from religion, in every case where it does not trespass upon private rights or the public peace.” While the exception for “private rights” suggests a Free Exercise concern, the exception for the “public peace” suggests that Madison did not view the Establishment Clause in absolutist terms, but was subject to a limited exception, which would be consistent with a strict scrutiny approach.

Viewing the Establishment Clause in this way would help clarify the Court’s precedents, since the Court has approved some actions which clearly constitute the government endorsement of religion. As Justice Souter stated in his majority opinion in McCrery, “In special instances we have found good reason to hold governmental action legitimate even where its manifest purpose was presumably religious.” Justice Scalia similarly acknowledged in his dissent, “Suffice it to say here that when the government relieves churches from the obligation to pay property taxes, when it allows students to absent themselves from public school to take religious classes, and when it exempts religious organizations from generally applicable prohibitions of religious discrimination, it surely means to bestow a benefit on religious practice – but we have approved it.” Rather than pretending that endorsement was not taking place in those cases, acknowledging that endorsement took place, but was justified by a compelling governmental interest, enhances reasoned, principled decisionmaking.

In one case, in 1982, the Court approached the Establishment Clause issue from a strict scrutiny perspective. In Larson v. Valente, the Court considered a Minnesota statute that imposed certain registration and reporting requirements upon those religious organizations that solicited more than

50% of their funds from nonmembers. The Court noted that such a requirement discriminated in favor of well-established churches, which could more easily meet the 50% requirement given their larger membership, versus newly-established churches, which could not. The Court then concluded, “[W]hen we are presented with a state law granting a denominational preference, our precedents demand that we treat the law as suspect and that we apply strict scrutiny in adjudging its constitutionality.” The Court then struck down the statute on Establishment Clause grounds.

Application of such an endorsement approach would require first a decision whether government endorsement was taking place, consistent with the “primary purpose, ideal observer” doctrine stated above, or was the speech or action involved merely government officials or private individuals reflecting their own free exercise or free speech rights to indicate their personal belief in God, as discussed § 32.1.2.1 nn.14-15. If government endorsement were found to be taking place, then a strict scrutiny approach would be used to determine whether that endorsement was constitutional.

Application of this approach can resolve most of the examples given by formalist Justices concerning “customs and traditions” in American history which are typically used to reject the view that the framers and ratifiers shared a strict neutrality, endorsement understanding of the Establishment Clause. For example, in his dissent in McCreary, Justice Scalia noted:

George Washington added to the form of Presidential oath prescribed by Art. II, § 1, cl. 8, of the Constitution, the concluding words “so help me God.” The Supreme Court under John Marshall opened its sessions with the prayer, “God save the United States and this Honorable Court.” The First Congress instituted the practice of beginning its legislative sessions with a prayer. The same week that Congress submitted the Establishment Clause as part of the Bill of Rights for ratification by the States, it enacted legislation providing for paid chaplains in the House and Senate. The day after the First Amendment was proposed, the same Congress that had proposed it requested the President to proclaim “a day of public thanksgiving and prayer, to be observed, by acknowledging, with grateful hearts, the many and signal favours of Almighty God.” President Washington offered the first Thanksgiving Proclamation shortly thereafter, devoting November 26, 1789 on behalf of the American people “‘to the service of that great and glorious Being who is the beneficent author of all the good that is, that was, or that will be,’” thus beginning a tradition of offering gratitude to God that continues today. The same Congress also reenacted the Northwest Territory Ordinance of 1787, . . . of which provided: “Religion, morality, and knowledge, being necessary to good government and the happiness of mankind, schools and the means of education shall forever be encouraged.” . . .

Our coinage bears the motto “In God We Trust.” And our Pledge of Allegiance contains the acknowledgment that we are a Nation “under God.” 207

The first set of these observations are covered by the principle, discussed § 32.1.2.1 nn.14-15, that speech or action by government officials reflecting their own free exercise and free speech rights to indicate their personal belief in God, or statements addressed to government officials in their

207 125 S. Ct. at 2748, 2750 (Scalia, J., joined by Rehnquist, C.J., and Thomas, J., dissenting) (citations omitted).
personal capacity, which are viewed by most of those officials as aiding them in the performance of their public duties, do not involve the government endorsement of religion. An “ideal” objective observer, viewing the opening of a legislative session with a prayer, would not attribute that opening to official government endorsement of religion, but rather to sensitivity to the religious beliefs of most legislators. Similarly, government provision of chaplains to military personnel reflects sensitivity to the religious beliefs of “a good many soldiers and sailors,” as Justice Souter’s majority opinion stated in *McCready*. Because of the concerns regarding the perception of endorsement in educational settings, where the predominant on-going activity is teaching of facts, opening public school days with a prayer has been viewed, and should be viewed, as the endorsement of religion, although a moment of silence should be permissible, as discussed at § 32.1.3.2.B.2 nn.149-60.

Regarding Thanksgiving Day proclamations, Justice Souter, joined by Justices Stevens and O’Connor, noted in their concurrence in *Lee v. Weisman*, cited at § 32.1.2.1.B.2 n.154, “religious invocations on Thanksgiving day addresses and the like are rarely noticed, ignored without effort, conveyed over an impersonal medium, and directed at no one in particular.” From this perspective, such invocations would not be viewed by a reasonable objective observer as constituting the government endorsement of religion. Even if the invocation were viewed as having greater religious meaning, an objective observer would likely conclude that the invocation represented the religious views of the President who issued the proclamation, rather than reflecting the official views of the government on religion. Government endorsement is even less likely to be found since the proclamation has no binding legal effect on anyone’s rights. By the same token, congressional proclamations that have no legal effect raise no Bicameralism and Presentment Clause issues, as discussed at § 19.4.2.1 nn.77-78.

Despite this view of endorsement, which is consistent with the practice of the first two Presidents, Washington and Adams, Jefferson refused to issue such religious Thanksgiving Day Proclamations while President. Madison, who issued such proclamations during the War of 1812, later remarked that he thought such proclamations “imply a religious agency, making no part of the trust delegated to political rulers.” Indeed, contrary to the view regarding legislative and military chaplains stated above, at § 32.1.4 n.208, Madison’s view was that paid legislative and military chaplains violated his concept of separation of church and state.

Regarding the enactment of the Northwest Territory Ordinance of 1787, that Ordinance actually supports a view of strong separation of church and state. As Justice Scalia noted in the passage cited above, that Ordinance provided, “Religion, morality, and knowledge, being necessary to good government and the happiness of mankind, schools and the means of education shall forever be encouraged.” While the background clause of this provision underscores the importance of “religion, morality, and knowledge,” the operative part of the provision states only that “schools and the means of education shall forever be encouraged.” It does not mention any government role to encourage “religion.”

---

208  *Id.* at 2742.

This drafting is consistent with Madison’s views, noted at § 32.1.1 n.11, that there are “causes in the human breast which insure the perpetuity of religion without the aid of law.” It is also consistent with other choices made by the framers and ratifiers concerning separation of church and state, such as omitting the words, “So help me God,” from the official Presidential oath. President Washington, and later Presidents, certainly have their free speech and free exercise rights to add that phrase at the end, if they so wish, but the framers and ratifiers were clear that such a phrase was not part of the official oath of office.

Of course, most of the framers and ratifiers believed that religion tended to aid individuals in behaving morally. Even someone traditionally viewed more as a religious skeptic, like Benjamin Franklin, noted that for most individuals religious beliefs aided them in not behaving in such a self-centered, or self-interested, manner.210 Phrased in terms of Kohlberg’s stages of moral development, discussed at § 15.2 nn.17-21, and Piaget’s stages of cognitive development, discussed at § 15.3 nn.26-43, for many individuals overcoming Stage 1 egocentricism and Stage 2 self-interested behavior, grounded in preoperational thought, is aided by adopting Stage 3 customs of the community or Stage 4 traditions of society, grounded in concrete operational thought. This is true as long as those customs and traditions reflect beliefs, including religious beliefs based on “love of neighbor as thyself,” which transcend the egotism of Stages 1 & 2. Of course, transcending the limitations of some of society’s Stage 3 or 4 customs and traditions, or some Stage 3 or 4 traditional religious customs and traditions, and adopting a perspective uniformly committed to “love of neighbor” and “equal concern and respect” for all individuals, as discussed at §§ 15.3 & 16.2.1, requires additional cognitive advances to formal operational thought and embracing a moral system fully reflective of reasoned thought, as noted at §§ 15.3 nn.44-46 & 15.4.1 nn.77-81. For that enterprise, education is critical, as the Northwest Territory Ordinance encouraged.

Government mottoes, like “In God We Trust” on coinage, and inclusion of the phrase, “Under God,” in the Pledge of Allegiance, raise more complex issues from the perspective of a primary purpose, ideal objective observer endorsement approach. For Justice O’Connor, reflecting her occasional Holmesian deference-to-government perspective, discussed at § 12.4.2, these cases did not raise difficult issues. As she stated, concurring in Elk Grove School District v. Newdow:

It is unsurprising that a Nation founded by religious refugees and dedicated to religious freedom should find references to divinity in its symbols, songs, mottoes, and oaths.

Note, for example, the following state mottoes: Arizona (“God Enriches”); Colorado (“Nothing without Providence”); Connecticut (“He Who Transplanted Still Sustains”); Florida (“In God We Trust”); Ohio (“With God, All Things Are Possible”); and South Dakota (“Under God the People Rule”). Arizona, Colorado, and Florida have placed their mottoes on their state seals, and the mottoes of Connecticut and South Dakota appear on the flags of those States as well. Georgia's newly-redesigned flag includes the motto “In God We Trust.” . . . Many of our patriotic songs contain overt or implicit references to the divine, among them: “America” (“Protect us by thy might, great God our King”); “America the Beautiful” (“God shed his grace on thee’); and “God bless America.”

[Concerning the phrase “Under God” in the Pledge of Allegiance,] certain ceremonial references to God and religion in our Nation are the inevitable consequence of the religious history that gave birth to our founding principles of liberty. It would be ironic indeed if this Court were to wield our constitutional commitment to religious freedom so as to sever our ties to the traditions developed to honor it.\textsuperscript{211}

The phrase “In God We Trust” on coinage and currency is relatively easy today to conclude is constitutional. An ideal reasonable objective observer today, aware of relevant facts, would certainly decide that such a phrase does not represent any government attempt to endorse religion. At the time the phrase was adopted, however, this was not so clear. The motto first appeared during the Civil War, on newly minted “greenbacks” and coins, as part of the increased religious fervor that accompanied the sacrifices made during the Civil War. Later on, as has been noted:

Attempts to legislate patriotism during times of crisis or war pervade twentieth-century U.S. history. For example, the Pledge [of Allegiance, originally drafted in 1892] was first codified in its original version—without the words "under God"—on June 22, 1942, in response to World War II. In addition to legislating patriotism, laws mandating references to God also emerged in connection to patriotic fervor in times of national stress. During the Cold War, a 1954 congressional act to add the words "under God" changed the original Pledge. Another highly visible example was the appearance during the Cold War of the national motto, "In God We Trust," on American currency. A 1955 congressional act mandated that the phrase "In God We Trust" be printed on coins and paper money, and a 1956 Act declared "In God We Trust" to be the national motto [replacing E Pluribus Unum, “From Many, One”]. Political leaders' reddefinition of the United States as a "nation under God" as well as the public confirmation that the American people trusted in God indicated an attempt – at the height of the Cold War hostilities – to distinguish this country from the "godless communists."\textsuperscript{212}

This set of actions likely would be viewed by an ideal objective observer at the time as government endorsement of religion. Rather than pretending endorsement was not taking place, under the approach suggested here, the question would then be whether the strategic advantage in terms of Cold War politics meant that such an endorsement could survive a strict scrutiny approach. Given the role of religious belief in undermining communism in Eastern European countries and the Soviet Union, including the role Polish Cardinal Karol Wojtyla played after becoming Pope John Paul II in 1978, there is a plausible argument that strict scrutiny might well have been met had the issue been faced at the time.

Absent such a continuing compelling government interest today, inclusion of the phrase “under God” in the Pledge of Allegiance, as well as various state mottoes referring to God, raise more serious concerns. If one takes seriously either an endorsement test, or court precedents under the \textit{Lemon} test, such references do appear to violate a strict neutrality command that government not

\textsuperscript{211} 542 U.S. 1, 35-36 & n.*, 44-45 (2004) (O’Connor, J., concurring in the judgment).

endorse religion. Such a conclusion would not mean that the phrase “under God” in the Pledge, or various state mottoes, would have to be changed. It would mean, however, that government must take seriously the concern with endorsement, and ensure, through age-appropriate lesson plans for the Pledge in public schools, or otherwise, in terms of state mottoes, that the government clearly communicate the historical and cultural backgrounds to those statements, and clearly indicate that the government is not endorsing any religious belief.

The fact that the government’s action should be tested by the rational “ideal” objective observer in possession of relevant facts, and not Justice Stevens’ “some” reasonable observer walking the streets, discussed at §§ 32.1.3.2.B nn.195-96 & 32.1.4 text following n.204, should make the government’s job easier in such cases. For example, the Sixth Circuit concluded that Ohio’s state motto, “With God, All Things are Possible,” was constitutional under the ideal objective observer approach. On the other hand, a public school teacher who tells a student that the phrase “Under God” in the Pledge of Allegiance means “God exists” should be viewed as having committed a constitutional violation.

A doctrine based on this notion of taking seriously an endorsement/strict neutrality doctrine would likely be rejected, of course, by numerous religious Americans who would accuse the Court of being anti-religious. Similarly, many whites, particularly in the South, accused the Court in Brown v. Board of Education of being hostile to whites. But Brown was not hostile to whites. It was hostile to the practice of some whites treating non-whites as second-class citizens through the instrumentality of government. Similarly, decisions such as removing the Ten Commandments from public courtrooms or public squares, or the phrase “under God” from the Pledge of Allegiance, unless its secular and ceremonial bases are made clear, are not hostile to religion. They are hostile to the practice of Protestant Americans treating non-Protestants, in the case of the Protestant version of the Ten Commandments, or religious individuals treating non-believers, in the case of the Pledge of Allegiance, as second-class citizens through the instrumentality of the government.

Justice Scalia has attempted to avoid some of these problems by characterizing almost any version of the Ten Commandments as consistent with Protestant, Catholic, Jewish, and Islamic beliefs, and thus congenial to all, and then concluding that under the Establishment Clause the government can favor monotheistic religions, treating agnostics, atheists, non-monotheistic believers, or believers in “unconcerned deities [e.g., Deists]” as second-class citizens by “disregard” of their views. Without regard to whether Protestants, Catholics, Jews, and Moslems would agree that any version of the Ten Commandments is equally congenial – and centuries of wars and discrimination among

---

various sects suggests it is more complicated than that – the attempt to exclude other individuals from the protection of the Establishment Clause has little textual or historical basis of support.

For example, a number of the framers and ratifiers were Deists, believing in a Creator, but one who did not intervene in day-to-day matters of public or private life, but whose impact was felt in the "machine-like perfection of the natural order." This would include Jefferson, almost certainly; Benjamin Franklin, probably; and George Washington, possibly.216 It may well be true, as one author has noted, that many New England Baptists took vigorous exception to Jefferson's religious views and believed that Jews, Muslims, deists, atheists, and infidels should not hold office.217 That view was rejected in clear constitutional text, which states in Article VI, § 3, “no religious Test shall ever be required as a Qualification to any Office or public Trust under the United States.” Even regarding non-believers, Justice Story noted, as quoted at § 32.1.1 n.3, that under the Establishment Clause, “The Catholic and the Protestant, the Calvinist and the Arminian, the Jew and the Infidel, may sit down at the common table of the national councils without any inquisition into their faith or mode of worship.” The term “Infidel” referred here broadly to non-believers in a monotheistic God, and not to the followers of Islam, as Justice Story distinguished them, followers of “Mahometanism,” from “infidelity” earlier in the same quoted passage.

In thinking about issues such as the display of the Protestant version of the Ten Commandments, it is not just a matter of non-Protestants, or non-believers, “adverting their eyes.” That doctrine applies where the individual has a right to speak, as in Cohen v. California, discussed at § 30.1.2 n.61, involving wearing a jacket in a courthouse. Thus, that doctrine does apply to churches, on their own property, proclaiming “God is Great,” or to bumper stickers, which read “Jesus is Lord,” on the back of individual cars. As noted at § 32.1.1 n.19, Madison indicated that the Religion Clauses must take into account “private rights.” But under a strict neutrality approach, the government has no generic right, as government, to speak on matters of religion. Non-believers do not have to advert their eyes; instead, the government should not speak.

This vision of strict neutrality was based on the experience of almost three centuries of post-

---

Reformation religious strife, and the deaths of hundreds of thousands of individuals based on religious persecution by governments all over Europe, and the experience of the colonies with religious persecution. As summarized by Justice Black in *Everson*:

> With the power of government supporting them, at various times and places, Catholics had persecuted Protestants, Protestants had persecuted Catholics, Protestant sects had persecuted other Protestant sects, Catholics of one shade of belief had persecuted Catholics of another shade of belief, and all of these had from time to time persecuted Jews. In efforts to force loyalty to whatever religious group happened to be on top and in league with the government of a particular time and place, men and women had been fined, cast in jail, cruelly tortured, and killed.

These practices of the old world were transplanted to and began to thrive in the soil of the new America. The very charters granted by the English Crown to the individuals and companies designated to make the laws which would control the destinies of the colonials authorized these individuals and companies to erect religious establishments which all, whether believers or non-believers, would be required to support and attend. An exercise of this authority was accompanied by a repetition of many of the old-world practices and persecutions. Catholics found themselves hounded and proscribed because of their faith; Quakers who followed their conscience went to jail; Baptists were peculiarly obnoxious to certain dominant Protestant sects; men and women of varied faiths who happened to be in a minority in a particular locality were persecuted because they steadfastly persisted in worshiping God only as their own consciences dictated. And all of these dissenters were compelled to pay tithes and taxes to support government-sponsored churches whose ministers preached inflammatory sermons designed to strengthen and consolidate the established faith by generating a burning hatred against dissenters.218

The framers and ratifiers knew that given the passion of religious zealots, as revealed by this history, any amount of government endorsement would create the potential for harmful political lobbying. That is why they adopted, as noted by Justice Story, at § 32.1.1 nn.2-3, a prophylactic rule against government power regarding religion. It would denigrate the memory of those who fought for religious freedom to read the Establishment Clause with any less vigor than they intended.

This final observation has relevance for considering the constitutionality of programs like President George W. Bush’s “Faith-Based Initiative” program. From a formalist perspective, as long as the government aid is provided on neutral criteria to religious and secular community service programs, its constitutionality would be clear. From an endorsement perspective, however, giving money directly to religious organizations, for use in programs where religious faith will play a critical part in the program, raises endorsement concerns, particularly with respect to entanglement based on future political lobbying for such aid. Perhaps the best way to view this issue would be to acknowledge that endorsement is taking place, and then apply a strict scrutiny approach. In certain cases, like for faith-based programs in prisons, where other alternatives have failed, such a strict

---

scrutiny approach could be met. \footnote{219} Similarly, one way to view the religious school voucher case, 
\textit{Zelman v. Simmons-Harris}, discussed at § 32.1.3.1.B.1 nn.135-38, is that alternatives to improving 
education in Cleveland had failed, and the limited voucher program was the least restrictive 
alternative to advance the state’s compelling interest in education. From this perspective, however, 
any broad-based voucher program, or broad “Faith-Based Initiative” program, would raise difficult 
issues of constitutional justification under a strict scrutiny approach. \footnote{220}

\textbf{§ 32.2} \quad \textbf{The Free Exercise Clause}

\textbf{§ 32.2.1} \quad \textbf{Introduction}

The Free Exercise Clause applies to protect individuals’ “sincerely held religious beliefs” from 
regulation by the government. In terms of what counts as a “religious belief,” a formalist-era Court 
stated in 1890 in \textit{Davis v. Beason}\footnote{221} that “the term 'religion' has reference to one's views of his 
relations to his Creator, and to the obligations they impose of reverence for his being and character, 
and of obedience to his will.” This definition suggested a monotheistic view of religion.

During the instrumentalist era, the Court defined the term more broadly to include a range of 
monotheistic and non-monotheistic beliefs. For example, in \textit{United States v. Seeger}\footnote{222} the Court 
interpreted the term “religious belief” in the Universal Military Training and Service Act to include 
any “given belief that is sincere and meaningful [and] occupies a place in the life of its possessor 
parallel to that filled by the orthodox belief in God.” Thus, an individual who sought a religious 
exemption from the draft, but denied any belief in a Supreme Being, was still held entitled to the 
exemption. Similarly, in \textit{Welsh v. United States}\footnote{223} the Court stated, “Most of the great religions of 
today and of the past have embodied the idea of a Supreme Being or a Supreme Reality – a God – 
who communicates to man in some way a consciousness of what is right and should be done, of 
what is wrong and therefore should be shunned. If an individual deeply and sincerely holds beliefs 
that are purely ethical or moral in source and content but that nevertheless impose upon him a duty

\footnote{219} See generally Patrick B. Cates, \textit{Comment, Faith-Based Prisons and the Establishment 
Clause: The Constitutionality of Employing Religion as an Engine of Correctional Policy}, 41 

\footnote{220} See generally Ira C. Lupu & Robert W. Tuttle, \textit{The Faith-Based Initiative and the 
Constitution}, 55 DePaul L. Rev. 1 (2005). On similar concerns for separation of church and state 
among most Western European democracies, which are moving through the Stage 5 or 6 level of 
cognitive, social, and moral development, as discussed at §§ 15.4.2 text following n.87 & 16.1 text 
following n.5, see generally Leszek Lech Garlicki, \textit{Perspectives on Freedom of Conscience and 
Religion in the Jurisprudence of Constitutional Courts}, in \textit{International Law and Religion 

\footnote{221} 133 U.S. 333, 342 (1890).

\footnote{222} 380 U.S. 163, 165-66 (1965).

of conscience to refrain from participating in any war at any time, those beliefs certainly occupy in
the life of that individual ‘a place parallel to that filled by . . . God’ in traditionally religious persons.
Because his beliefs function as a religion in his life, such an individual is as much entitled to a
‘religious’ conscientious objector exemption . . . as is someone who derives his conscientious
opposition to war from traditional religious convictions.”

Inferences from Justice Scalia’s dissent in 2005 in McCreary,224 joined by Chief Justice Rehnquist
and Justice Thomas, discussed at § 32.1.4 n.215, suggests that this dissent would disagree with these
views, and would grant Free Exercise Clause protection only to those who believe in monotheistic
religions, treating agnostics, atheists, non-monotheistic believers, or believers in “unconcerned
deities [e.g., Deists]” as outside the protection of the Free Exercise Clause. As discussed at § 32.1.4
nn.216-17, as applied to Establishment Clause concerns, such a view has little textual or historical
basis of support. Since the same term, “religion,” applies in the First Amendment to both the
Establishment Clause and the Free Exercise Clause, its reach should be the same in both.

It is certainly true that the framers and ratifiers were overwhelming monotheistic – indeed, Christian
and Protestant – in their beliefs. When they used the phrase “free exercise of religion,” they were
no doubt predominantly thinking of monotheistic, and indeed Christian, beliefs.225 However, as the
Court noted in 1970 in Welsh, cited above at § 32.2.1 n.223, an individual holding a non-
monotheistic view may confront the same tension between following those views and contrary
government laws that a traditional Christian may feel in terms of a conflict between government
laws and the will of God that the Court recognized in Davis in 1890. Any argument that the “rights
of conscience” in the two circumstances may be different, because the believer in God has to worry
about punishment in an afterlife if God is not obeyed, while the believer in a non-monotheistic moral
system may not have that concern, reduces morality to a question of punishment, a Stage 1 reason
for obedience in Kohlberg’s system.

Any attempt to limit free exercise to only monotheistic views is reminiscent of the free speech views
of John Milton, discussed at § 29.1.2 n.16, who was prepared to grant free speech to individuals, but
not for speech he disagreed with – in his case, “popery, open superstition, impiety, or evil.” Similarly,
in Locke’s A Letter on Toleration in 1689, “Locke justified placing restrictions on Catholics because of their mixed allegiance, and justified not extending tolerance to atheists because atheists do not have the moral scruples to be trusted in civil society where rights are viewed as
having derived from God, and because the atheist has no fear of a future state of punishment.”226

Such views are not consistent with a rational approach to “liberty of conscience.” A rational person
would understand that individuals basing their respect for diversity and equal concern and respect

224 McCreary, 125 S. Ct. at 1272-73 (Scalia, J., joined by Rehnquist, C.J., and Thomas, J.,
dissenting).

225 See generally Lee J. Strang, The Meaning of “Religion” in the First Amendment, 40

226 Id. at 219, citing John Locke, A Letter Concerning Toleration 46-47, in 6 The Works of John
Locke (London 1823).
for individuals on Stage 5 or Stage 6 moral reasoning premises, discussed at § 15.4.1 nn.72-81, might be even more likely to be “trusted” than an individual whose only limitation on self-interested behavior is a fear of God’s punishment, with the individual hoping for God’s grace. Further, from a Stage 3 natural law perspective, later interpreters should interpret the natural law concepts placed into the Constitution, of which the Religions Clauses would be clear examples, from the perspective of more enlightened reasoning, rather than the concrete limitations of the framers and ratifiers at the time of enactment. As discussed at §§ 12.3.3 nn.119-23 & 16.4 nn.81-83, this is a consequence of those rights being viewed as universal principles of justice, independent of any particular framer’s will, and thus the desire of the framers and ratifiers for later generations to give that concept the most enlightened interpretation of that principle’s content at later times. Both Milton and Locke would presumably agree with a modification of their views on Catholics and atheists were they alive today.

In any event, any limited view on what beliefs are protected by the Free Exercise Clause would likely be relatively futile in practice. Many Free Exercise Clause claims can be reformulated as “equal treatment” or “equal access” claims under the First Amendment freedom of speech or the Equal Protection Clause. For example, as noted at § 32.1.3.1.B nn.171-78, the access of religious groups to public school facilities and support in Lamb’s Chapel, Rosenberger, and Good News Club technically involved the First Amendment freedom of speech, not the Free Exercise Clause. Indeed, the First Amendment freedoms of speech, of the press, and the free exercise of religion all share a similar commitment to the Lockeian concept of “liberty of conscience,” discussed at § 32.1.1 nn.16-18. The Supreme Court noted as far back as 1944 in Prince v. Massachusetts,227 “If by this position appellant seeks for freedom of conscience a broader protection than for freedom of the mind, it may be doubted that any of the great liberties insured by the First Article [Amendment] can be given higher place than the others. All have preferred position in our basic scheme. All are interwoven there together.” As phrased by Justice Stevens in Wallace v. Jaffree,228 quoted § 32.1.2.1 n.6, “[T]he Court has unambiguously concluded that the individual freedom of conscience protected by the First Amendment embraces the right to select any religious faith or none at all.”

While the Court’s Free Exercise Clause doctrine officially only applies to “sincerely held” religious beliefs,229 the Court has been quite willing to assume for purposes of the litigation that indeed the person’s statement that something is a religious belief is “sincerely held.” Indeed, the belief can be “sincere” even if it is not held by most believers of that person’s religious faith, as long the individual before the court sincerely holds the view.230 Further, the relevant question is whether the

individual “sincerely holds” the belief, not whether a jury, or anyone else, would conclude that belief is true or false. As the Court stated in *United States v. Ballard*, 231 “Heresy trials are foreign to our Constitution. Men may believe what they cannot prove. They may not be put to the proof of their religious doctrines or beliefs. Religious experiences which are as real as life to some may be incomprehensible to others. Yet the fact that they may be beyond the ken of mortals does not mean that they can be made suspect before the law.”

Just as the First Amendment freedom of speech became incorporated into the 14th Amendment Due Process Clause as a fundamental right during the 1920s, the First Amendment free exercise of religion also became applicable to the states during this time. Thus, in 1923, in *Meyer v. Nebraska*, 232 the Court stated that one of the liberty rights protected by the 14th Amendment Due Process Clause was the right “to worship God according to the dictates of his own conscience.” However, during the formalist era, very little protection was given to the free exercise of religion, mirroring a rational basis kind of scrutiny, as discussed at § 32.2.2.2.

The incorporation of the Free Exercise Clause into the 14th Amendment was confirmed during the Holmesian era in *Cantwell v. Connecticut*, 233 discussed at § 32.2.2.3 n.238. As during the formalist era, little protection was granted to the free exercise of religion during the Holmesian era, mirroring a minimum rational review level of scrutiny.

The instrumentalist Court increased the level of protection to strict scrutiny if a law substantially burdened the free exercise of religion, as discussed at § 32.2.2.4. However, during the modern natural law era, under *Employment Division v. Smith*, 234 the contemporary Court has limited many instrumentalist precedents on free exercise, and gives only minimum rational review to a law of general applicability that incidentally burdens the free exercise of religion. Laws discriminating against religion continue to trigger strict scrutiny. This aspect of modern Free Exercise Clause doctrine is discussed at § 32.2.2.5 nn.253-56.

This modern doctrine has set off a political fight in which Congress has tried to require the Court to use strict scrutiny for all governmental regulations substantially burdening religious beliefs. In 1997, the Court rejected Congress’ attempt to overrule *Smith* by statute in *City of Boerne v.  

---

231 322 U.S. 78, 86-87 (1944).
232 262 U.S. 390, 399 (1923).
233 310 U.S. 296, 303-10 (1940).
However, despite Boerne, Congress has been able by statute to require a strict scrutiny test to be applied to federal laws, as a matter of Congress’ power over federal enactments, as discussed at § 32.2.2.5 n.257-64.

§ 32.2.2 Historical Development of Free Exercise Doctrine

§ 32.2.2.1 The Original Natural Law Era

During the original natural law era, the Free Exercise Clause, like the rest of the Bill of Rights, applied only to federal government action. Because regulations touching upon religion were predominantly a matter of state law concern during this time, there were no Supreme Court cases dealing with the Free Exercise of religion during the original natural law era.

The first state case to raise a free exercise issue occurred in 1813 in People v. Philips.236 The case involved whether an Irish Catholic Priest could refuse to testify in court about matters that had been confided to the Priest during confession. At the time, the New York law did not recognize such a testimonial privilege. The court held that under § 38 of the New York State Constitution, which was similar to the First Amendment Free Exercise Clause, the refusal to testify was justified, as the state had not proven that the refusal to testify was inconsistent with the peace or safety of the state.

§ 32.2.2.2 The Formalist Era

In Reynolds v. United States,237 decided in 1878, the Free Exercise Clause was interpreted to protect religious opinions from federal government interference, but the Court said that this protection does not carry over to actions the government seeks to control, such as banning bigamy. Based upon this distinction, the Court sustained the bigamy conviction of a Mormon based on a congressional statute regulating the then-territory of Utah. The Court said that the Free Exercise Clause deprived Congress of all legislative power over mere opinion, but left Congress free to reach actions that were in violation of social duties or subversive of good order, even if the defendant entertains a religious belief that the law is wrong. The Court explained that if an offense consists of a positive act knowingly done, it would be dangerous to hold that the offender might escape punishment merely because he religiously believed that the law which he had broken ought never to have been made.

237 98 U.S. 145, 162-67 (1878). For an argument, not likely to be adopted by federal courts, that Reynolds should be overturned, and polygamy constitutionally protected, on grounds that antipolygamy statutes are not based on any rational concern, such as noted at § 16.2.4 text following n.69, with protecting individuals from exploitation, and that polygamous relationships can foster women’s self-independence and children’s welfare, see Stephanie Forbes, “Why Just Have One?”: An Evaluation of the Anti-Polygamy Laws Under the Establishment Clause, 39 Houston L. Rev. 1517 (2003).
The upshot of Reynolds appeared to be that only rational basis scrutiny under the Free Exercise Clause protected the exercise of religion from the incidental effects of laws aimed at certain actions, at least if those actions were not selected because of their religious significance. Of course, as with any social or economic regulation, there would be rational basis scrutiny anyway under the Equal Protection Clause and Due Process Clause.

§ 32.2.2.3  The Holmesian Era

In 1940, in Cantwell v. Connecticut, the Court confirmed that the Free Exercise Clause was incorporated into the 14th Amendment, and thus made applicable against the states. The Court held in Cantwell that an invalid prior restraint was created by a state statute that banned the solicitation of money except where the cause had been approved in advance by a public official who had discretion to determine whether the applicant’s purpose was religious. The Court said that such a censorship of religion was a denial of liberty protected by the First Amendment as incorporated into the Due Process Clause of the 14th Amendment. The Court added in Cantwell that although a state could not unduly infringe the free exercise of religion, it could pass laws regulating its time, place, and manner by general and nondiscriminatory legislation. However, a state could not prosecute for common law breach of the peace without a clear and present menace to public peace and order. That was not shown where the defendant merely played a religious record to a consenting listener, who became irritated and felt like striking the defendant, but did not because the defendant peacefully went away.

One example of a neutral law of general applicability occurred in Cox v. New Hampshire. For a unanimous Court, Chief Justice Hughes held that an individual could be convicted for not obtaining a permit to conduct a parade or procession on a public street. The Court noted, “The argument as to freedom of worship is . . . beside the point. No interference with religious worship or the practice of religion in any proper sense is shown, but only the exercise of local control over the use of streets for parades and processions.” Another example occurred in Prince v. Massachusetts, where the Court upheld application of child labor laws to prevent a nine-year-old girl from being permitted to sell religious literature of the Jehovah’s Witnesses on the street. Four Justices dissent in the case: moderate formalist Justice Roberts, liberal Holmesian Justice Frankfurter, centrist Holmesian Justice Jackson, and liberal instrumentalist Justice Murphy.

§ 32.2.2.4  The Instrumentalist Era

A change in the level of protection given to the free exercise of religion occurred in 1963. In that year, writing for the Court in Sherbert v. Verner, Justice Brennan said that strict scrutiny should

---

238 310 U.S. 296, 303-10 (1940).
239 312 U.S. 569, 576-78 (1941).
240 321 U.S. 158, 159-61, 165-70 (1944); id. at 176-78 (Jackson, J., joined by Roberts & Frankfurter, JJ., dissenting); id. at 175-76 (Murphy, J., dissenting).
be used if application of a law burdens an individual’s free exercise of religion. A state had refused unemployment compensation to appellant, a member of the Seventh-Day Adventist Church, on the ground that the applicant had failed, without good cause, to accept available suitable work when offered, i.e., she would not work on Saturday, the sabbath day of her faith. Justice Brennan said that the effect of the law was to put pressure on appellant to forgo the practice of her religion. This was compounded by the religious discrimination in the scheme, for even in times of emergency no employee could be required to work on Sunday if he or she had conscientious objections to such work. Where a substantial burden was imposed, no showing merely of a rational relationship to some colorable state interest would suffice; the state had to show a paramount interest. None was shown in Sherbert beyond the possibility of fraudulent claims by persons claiming religious objections to Saturday work.

In reaching this conclusion, Justice Brennan distinguished the 1961 case of Braunfeld v. Brown,242 where the Court had refused to require an exception to a Sunday closing law for a Jewish merchant, who would have to close on both Saturday and Sunday. Braunfeld was said to be distinguishable because in that case there was a strong state interest in one uniform day of rest for all workers. Justice Brennan added that the Court, when it ordered compensation to be paid in Sherbert, was not fostering an “establishment” because the extending of unemployment benefits to Sabbatarians in common with Sunday worshipers reflects government neutrality and does not interrelate religions with secular institutions. No other person’s religious liberties are abridged. Nor did appellant’s religious convictions make her a nonproductive member of society.243 A similar conclusion was reached in 1981 in Thomas v. Review Board of the Indiana Employment Security Division,244 where the Court held that unemployment compensation benefits could not be denied to a claimant who terminated his job because his religious beliefs forbade participation in production of armaments.

Justice Stewart, concurring in Sherbert v. Verner, said that Braunfeld was wrongly decided and should be overruled. Justice Harlan, dissenting with Justice White, pointed out that the state law did not provide unemployment compensation for persons who are unavailable for work for personal reasons of any kind. Reflecting a Holmesian deference-to-government approach, he said the Court should not require the state to carve out an exception from that principle for those unavailable because of religious convictions. Such compulsion is particularly inappropriate in light of the indirect, remote, and insubstantial effect of the state’s decision on the exercise of appellant’s religion.245

243 374 U.S. at 409-10.
245 374 U.S. at 417-18 (Stewart, J., concurring in the result); id. at 420-23 (Harlan, J., joined by White, J., dissenting).
A strict scrutiny approach for a burden on religious beliefs was also applied in 1972 in *Wisconsin v. Yoder*. In *Yoder*, the Court held that it would violate the free exercise rights of Amish parents to require their children to attend public high school. For the Court, Chief Justice Burger said that the state did not have an interest of sufficient magnitude to overbalance the Amish claims to free exercise of religion, considering testimony that compulsory formal education after the eighth grade would gravely endanger, if not destroy, the free exercise of Amish religious beliefs. There was also evidence that additional years of formal high school for Amish children would do little to serve the state’s interests in education, especially since most Amish children plan to live in Amish society and, with respect to those who might leave, there is nothing to suggest that Amish qualities of reliability, self-reliance, and dedication to work would fail to find ready markets in today’s society.

Despite the application of strict scrutiny during the instrumentalist era, courts upheld a number of cases of government actions burdening religious beliefs as satisfying a compelling government interest, least restrictive alternative analysis. For example, in *United States v. Lee*, the Court held that Congress could require all employers, including Amish employers, to pay social security taxes, even if such payments would violate the Amish’s religious beliefs. Congress had granted self-employed Amish an exception from participation in the Social Security program, but the choice not to extend that exception to Amish employers was for Congress to make. Similarly, during the instrumentalist era, the Supreme Court, and lower federal courts, upheld against free exercise challenges other aspects of economic regulations, such as application of the Fair Labor Standards Act requirements on minimum wages and record keeping requirements to religious organizations conducting “ordinary commercial activities,” or application of other aspects of the tax code.

The Court also noted during the instrumentalist era that a strict scrutiny standard was not appropriate if the challenge was to how the government was conducting its own affairs, rather than regulating the affairs of private citizens. For example, in *Bowen v. Roy*, the challenger complained that the federal government’s requirement that his daughter have a Social Security number in order for him to collective AFDC welfare benefits violated his religious belief that assigning her a number would tend to “rob the spirit” of his daughter. The Court responded, “Absent proof of an intent to discriminate against particular religious beliefs or against religion in general, the Government meets its burden when it demonstrates that a challenged requirement for government benefits, neutral and uniform in its application, is a reasonable means of promoting a legitimate public interest.”

---

Similarly, the Court held in *Goldman v. Weinberger* 250 that the United States military could apply its uniform dress regulations to deny an Orthodox Jewish service member the right to wear a yarmulke while on duty.

§ 32.2.2.5  The Modern Natural Law Era

During the first part of the modern natural law era, the Court continued to analyze Free Exercise Clause cases consistent with instrumentalist-era precedents. For example, in *Hernandez v. Commissioner of the IRS*, 251 the Court held that requiring income taxes to be paid on what the challenger alleged was a charitable contribution to the Church of Scientology, but the government characterized as a fee for “auditing” and “training” session, was not an impermissible burden on the free exercise of religion because the government could satisfy a strict scrutiny approach, as in *United States v. Lee*. In *Lyng v. Northwest Indian Cemetery Protective Association*, 252 the Court applied the doctrine of *Bowen v. Roy* to conclude under a rational basis approach that the government could permit harvesting of timber, and construction of a road, on federal government land, despite objections from three Native American tribes that such activities interfered with a portion of that land they had traditionally used for religious purposes.

In 1990, however, a majority of the Court in *Employment Division v. Smith* 253 changed Free Exercise doctrine from the instrumentalist-era precedents. In *Smith*, the facts involved persons dismissed from their jobs because of their religious use of peyote, made illegal by state law, and the resulting denial of unemployment compensation. Justice Scalia, joined by Justices Stevens, Rehnquist, White, and Kennedy, wrote that use of strict scrutiny in Free Exercise Clause cases did not extend beyond: (1) unemployment compensation cases involving denial for refusing to work for religious reasons, such as working on one’s sabbath, as in *Sherbert v. Verner*, based on that precedent being “settled law”; (2) cases involving “hybrid” claims, *i.e.*, claims based on a conjunction of free exercise claims combined with other constitutional protections, such as freedom of speech, or, as in *Wisconsin v. Yoder*, the right of parents to direct the education of their children, where the related right would trigger strict scrutiny on its own; or (3) cases involving direct discrimination against religion.

An example of this third kind of case is *Church of the Lukumi Babalu Aye, Inc. v. City of Hialeah*. 254

250 475 U.S. 503, 505-10 (1986).

254 508 U.S. 520, 530-47 (1993). *See also* Fraternal Order of Police Newark Lodge No. 12 v. City of Newark, New Jersey, 170 F.3d 359, 364-66 (3rd Cir. 1999) (police department's decision to provide medical exemptions to its no-beard requirement, while refusing religious exemptions from same requirement, subject to heightened scrutiny based on religious discrimination), *cert. denied*, 528 U.S. 817 (1999). *But see* Valov v. Department of Motor Vehicles, 34 Cal. Rptr.3d 174, 178-83.
In this case, the city adopted a special rule regarding the ritual slaughtering of animals, which was different, and more burdensome, than the rules regarding slaughtering of animals for secular food purposes. The Court thus applied a strict scrutiny approach, and held the ordinance unconstitutional.

In the absence of these three circumstances, the Court held in *Smith* that where there is a general neutral regulation that has merely an incidental effect on the exercise of religion, the Court will not use a heightened level of review. To do so, said Justice Scalia, would be to allow a person, by virtue of his beliefs, to become a law unto himself. He said this would contradict constitutional traditions, such as found in *Reynolds v. United States*, and common sense. He distinguished the use of strict scrutiny in cases of race discrimination or content regulation of speech, where the heightened level produced equality of treatment or an unrestricted flow of speech, with what would be produced here: a private right to ignore a generally applicable law that denies unemployment compensation when dismissal results from using an illegal drug. Subsequently, the state of Oregon created a religious exemption for peyote use, but that is a matter of legislative choice, not constitutional mandate.

Justice O’Connor, concurring in the judgment, and Justice Blackmun, joined by Justices Brennan and Marshall, dissenting, said the essence of a free exercise claim is relief from a burden imposed by government on religious practices or beliefs, whether imposed directly through prohibitions or indirectly by the denial of a benefit. In either case, the government should have to satisfy a strict standard, as called for in *Sherbert* and *Yoder*.

Reacting to the *Smith* case, Congress passed the Religious Freedom Restoration Act of 1993. It called for courts to use strict scrutiny whenever any government substantially burdens a person’s exercise of religion, even if the burden results from a law of general applicability. In *City of Boerne v. Flores*, the Court declared the law invalid as applied to state laws. Congress had sought justify the law as an exercise of power under § 5 of the 14th Amendment. As discussed at § 28.3 nn.48-55, Justice Kennedy said that there must be congruence and proportionality between the injury to be prevented or modified and the means adopted to that end. Here, the legislative record lacked examples of modern instances of generally applicable laws passed because of religious bigotry. The RFRA, said Justice Kennedy, is so out of proportion to a supposed remedial or preventing object that

(Cal. App. 2nd Dist. 2005) (California statute requiring full-face photograph on driver’s licenses, with no exemption for persons whose religious beliefs bar such personal photographs, constitutional as a neutral law promoting expeditious identification of persons during traffic stops and at accident scenes, deterring identity theft, and preventing fraud, relying on *Smith* and *Bowen v. Roy*.)

256 *Id.* at 893-97, 905-07 (O’Connor, J., concurring in the judgment, joined in Parts I & II by Brennan, Marshall & Blackmun, JJ.) (strict scrutiny met on these facts); *id.* at 907-16 (Blackmun, J., joined by Brennan & Marshall, JJ., dissenting) (statute unconstitutional under strict scrutiny).

258 521 U.S. 507, 516-36 (1997); *id.* at 544 (O’Connor, J., joined by Breyer, J., except as to the first paragraph of Part I, dissenting); *id.* at 565 (Souter, J., dissenting).
it cannot be understood as responsive to, or designed to prevent, unconstitutional behavior. Justice O’Connor said that *Smith* was wrong and should be re-examined, as did Justices Breyer and Souter.

Congress did not surrender. Within three years, Congress passed the Religious Land Use and Institutionalized Persons Act of 2000 (RLUIPA). The Act requires strict scrutiny of all laws regarding any land use regulation or prison regulation that imposes a substantial burden on religion if: (1) that burden affects, or removal of that burden would itself affect, interstate commerce; or (2) the burden is imposed in a program or activity receiving federal financial aid; or (3) the burden is imposed in implementation of any regulation that permits individual assessments of the proposed property use. The Act also requires strict scrutiny in any case involving a substantial burden on the religious exercise of a person residing in or confined to an institution that received federal financial assistance or affects commerce with foreign Nations, among the several states, or with the Indian tribes. The new statute does not purport to be an exercise of § 5 power.

The validity of this legislation from the perspective of the Establishment Clause was considered in the context of a prison regulation in *Cutter v. Wilkinson*. In *Cutter*, the Court ruled unanimously that the statute was merely an attempt to respect the free exercise rights of prisoners, and did not create an Establishment Clause problem as long as the statute did not “elevate accommodation of religious observances over the institution’s need to maintain order and safety.”

Although the Court did not address the issue in *Cutter*, it seems likely the other aspects of the statute, in addition to the provisions regarding prison regulations, are valid under Congress’ Commerce Clause and Spending Clause powers. The Act as applied to prisons receiving federal financial assistance is almost certainly valid under a Spending Clause analysis, discussed at § 18.3.2, as is activity affecting interstate commerce under the Commerce Clause, discussed at § 18.2.5. The Commerce Clause also probably makes valid the Act as applied to real estate interests that form part of the housing market. Part of the law might be struck down if the law were applied to affect private individual homes not up for sale or rental, and thus perhaps not in interstate commerce, although the affect of nationwide supply and demand for homes would be affected by those homes not currently up for sale or rental, and thus an affect on interstate commerce might nonetheless be found.

As discussed at § 32.1.2.4 n.79, in *Hankins v. Lyght*, the Second Circuit upheld on Commerce Clause grounds the earlier-past Religious Freedom Restoration Act, as applied to federal laws, rather than state laws struck down in *Boerne v. Flores*. In *Gonzales v. O Centro Espirita Beneficente União do Vegetal*, the Supreme Court similarly applied the RFRA’s compelling interest test to strike down the failure under the federal Controlled Substance Act to grant an exception for sacramental use of hallucinogenic tea. The decision was unanimous, with Justice Alito not participating in the consideration or decision of the case.

---

261 441 F.3d 96, 107-09 (2nd Cir. 2006).

Meanwhile, in cases not covered by RLUIPA or the RFRA, lower courts continue to apply Smith and its holding that the court should only apply a rational relation test even when a substantial burden has been imposed on the exercise of religious behavior. As noted at § 32.1.2.1 nn.19-20, the Smith doctrine is consistent with Madison’s view that religious behavior can be regulated consistent with a concern for the “public peace,” or, as phrased by John Locke, cited at § 32.1.2.1 n.17, in the service of protecting “civil interests.”

Free Exercise and Establishment Clause issues can also arise in the context of government regulation of home-schooling with a religious perspective. Typically courts do not find such home-schooling regulations burden the fundamental right of parents to rear their children, as discussed at § 27.3.3.1.C n.192. Thus, under Smith, such regulations would trigger only minimum rational review, unless discrimination against religious home-schooling were shown. In practice, states have been relatively sensitive to parental concerns in this area.

In considering free exercise issues, the Court has been clear that while sometimes the government can grant a religious exemption, or provide for a compelling government interest analysis in statutes otherwise constitutional, that government is under no necessary obligation to do so. For example, in Locke v. Davey, the Court held that the state of Washington could deny a public scholarship to an otherwise eligible applicant solely because the applicant planned to use the monies to study for the ministry at a church-related school. Consistent with an endorsement understanding of government neutrality, such government aid to an individual, who voluntarily chooses to use the aid at a religious school, would not violate the Establishment Clause, because it would not reflect an endorsement of religion, as discussed at § 32.1.3.2.B.1 nn.108, 135-37. Similarly, the failure to give such aid does not express hostility to religion under the Free Exercise Clause. The Court explained, “‘[T]here is room for play in the joints’ between them. In other words, there are some state actions permitted by the Establishment Clause but not required by the Free Exercise Clause.” This conclusion is consistent with the general doctrine that the government can choose the spend its funds as it sees fit, as discussed in the context of the freedom of speech at § 29.3.2, and is consistent with a Stage 6 approach toward constitutional issues, protecting the core constitutional right, but permitting legislative “play in the joints,” discussed at § 16.4 nn.97-105. Only Justices Scalia and Thomas dissented, pointing out that the law violated their formalist concept of literal neutrality in terms of how the funds were granted.

---

263 See, e.g., Levitan v. Ashcroft, 281 F. 3d 1313 (D.C. Cir. 2002) (where prisoners did not raise RLUIPA, the court analyzed a prison rule allowing only the chaplain to consume wine during Communion services under a rational basis standard of review).

Reflecting this “play in the joints” perspective, a range of civil rights statutes have been held to provide for a religious “ministerial exception” out of respect for Free Exercise and Establishment Clause concerns. For example, the Seventh Circuit held in *Tomic v. Catholic Diocese of Peoria*, that the ministerial exception bars an Age Discrimination in Employment Act lawsuit by a 50-year-old church music director who was fired after a dispute with the bishop’s assistant over music to be played for Easter services. The church then hired a “much younger person” as a replacement. The court noted that “if the suit were permitted to go forward, the diocese would argue that he was dismissed for a religious reason – his opinion concerning the suitability of particular music for Easter services – and . . . Tomic would argue that the church’s criticism of his musical choices was a pretext for firing him, that the real reason was his age. . . . The court would be asked to resolve a theological dispute.” Similarly, in *Curay-Cramer v. Ursuline Academy of Wilmington, Delaware, Inc.*, the Third Circuit held that a teacher at a private Catholic school could not sue the school for retaliation for protected speech and sex discrimination in violation of Title VII of the Civil Rights Act of 1964, where she was terminated after signing a pro-choice advertisement in a local newspaper. The court held that her claims were not cognizable, since it would necessitate the court's assessment of the relative severity of violations of church doctrine. The Court noted, “Were we . . . to require Ursuline [Academy] to treat Jewish males or males who oppose the war in Iraq the same as a Catholic female who publicly advocates pro-choice positions, we would be meddling in matters related to a religious organization's ability to define the parameters of what constitutes orthodoxy.”

On the other hand, the Ninth Circuit held in *Elvig v. Calvin Presbyterian Church* that a Presbyterian minister could sue her former church under Title VII for sexual harassment and retaliation that occurred prior to her discharge that do not implicate the church’s protected employment decisions. In her complaint, she alleged that shortly after she was hired as the Associate Pastor of Calvin Presbyterian Church, the Church's Pastor engaged in sexually harassing and intimidating conduct toward her, creating a hostile working environment. The Court noted that as part of this lawsuit, the Church could “assert as an affirmative defense that they ‘exercised reasonable care to prevent and correct the harassment, and that [the plaintiff] failed to take advantage of these opportunities to avoid or limit harm.’ . . . Nothing in the character of this defense will require a jury to evaluate religious doctrine or the ‘reasonableness’ of . . . religious practices . . . . Instead, the jury must make secular judgments about the nature and severity of the harassment and what measures, if any, were taken by the [Church] to prevent or correct it. The limited nature of the inquiry, combined with the ability of the district court to control discovery, can prevent a wide-ranging intrusion into sensitive religious matters.” The court noted that while the decision to terminate her ministry was “clearly within the scope of the ministerial exception,” she may “nonetheless hold the Church vicariously liable for the sexual harassment itself.” A federal district

266 442 F.3d 1036, 1037-42 (7th Cir. 2006).

267 450 F.3d 130, 138-42 (3rd Cir. 2006).

268 375 F.3d 951,955-60 (9th Cir. 2004), rehearing en banc denied, 397 F.3d 790 (9th Cir. 2005).
court held in *Redhead v. Conference of Seventh-Day Adventists* that the "ministerial exception" did not apply to Title VII sex and pregnancy discrimination claims by a teacher who was terminated from a Seventh-day Adventist school for being pregnant and unmarried, as her teaching duties were primarily secular. Her duties that were religious in nature were limited to only one hour of Bible instruction per day and attending religious ceremonies with students only once per year.

Churches have also been held liable in cases of sex abuse of children by church personnel, including priests or ministers, although it is a matter of debate whether various laws limiting damages against charitable institutions should be invoked to limit liability in such cases.

One avenue of increased litigation touching on free exercise concerns involves suits by employees who seek to require businesses to accommodate to their religious practices. In a recent case involving a private business, an employee sued under Title VII of the 1964 Civil Rights Act claiming her civil rights were violated when the employer refused to permit her to exercise her religious beliefs by saying to each customer who was leaving, “Have a Blessed Day.” In another case involving a government employer, an employee claimed her First Amendment rights were violated by a state agency’s interests in avoiding the disruptive effect of employees’ religious proselytizing of agency clientele. Under current doctrine most of these claims fail. Under Title VII, an employer’s obligation of reasonable accommodation has been held to require that the employer only take steps which do not impose an “undue hardship” on the employer, and “undue hardship” has been defined as any accommodation which imposes “more than a *de minimis* cost” on the employer. With respect to the First Amendment, the government must only show that the government’s interest in controlling the work environment and providing effective services outweigh the employee’s right of free speech under the *Pickering* test, discussed at § 30.2.2.1.

The cases, however, suggests that some religious conservatives are not satisfied with the results of traditional doctrine. One alternative approach would be to apply the reasonable accommodation standard used under the Americans with Disabilities Act. The ADA imposes a much higher burden of reasonable accommodation on businesses than under Title VII, given the clear congressional intent that the two standards ought to be different. Additionally, analyzed objectively, the two

[^272]: Knight v. Connecticut Dep’t of Public Health, 275 F.3d 156, 163-68 (2nd Cir. 2001).

[^274]: See, e.g., Barnett v. U.S. Air, Inc., 228 F.3d 1105, 1120 n.10 (9th Cir. 2000), *cert. granted on other grounds*, 532 U.S. 970 (2001) ("We note that the 'undue hardship' standard in the ADA is substantially more demanding than the hardship standard in Title VII in the context of 'reasonable..."
situations seem different. The ADA applies only to individuals afflicted with “a physical or mental impairment that substantially limits one or more of the major life activities of such individual.” Faced with this involuntary impairment of a major life activity, the ADA requires businesses to make serious efforts to permit these workers to become, or for existing workers to continue to be, productive employees.\(^{275}\) In contrast, the Title VII religious accommodation cases involve individuals asking their employers to adjust the employers’ employment rules to fit those individuals’ desire to practice their religion with minimal consequences. Analyzed objectively, there is little connection between the burden suffered by someone whose employer refuses to adjust the employment rules to accommodate that individual’s chosen religious practice with the burden suffered by an individual who has been involuntarily afflicted with a physical or mental disability which has substantially impaired for that person a major life activity.\(^{3}\)

Adoption of a higher standard of reasonable accommodation would likely yield counterproductive results. The complexity of the issue, along with the diversity of religions, is immense. It has been estimated there are “more than 1500 religious organizations [in America], including more than 900 Christian denominations, 100 Hindu denominations, and some [seventy-five] forms of Buddhism. With [six] million to [seven] million adherents, Islam is expected to soon pass Judaism as the second-most commonly practiced religion in the U.S.” Even for larger employers, the demands of implementing a program of religious accommodation are immense. For smaller businesses, a robust, required, and reasonable accommodation policy would be even more burdensome.\(^{276}\)

Rev. 1971, 2014-15 (2003) (citations omitted) (noting key issues regarding implementing such programs, including: “Be fair and equitable . . . Don’t exclude new or nontraditional belief systems”; “Educate yourself and others. Learn about the religious beliefs and practices of employees [including those] that command adherents to fast, change diets, pray, or . . . affect their life during working hours”; “Seek individualized solutions . . . taking the time to work with employees, co-workers, and supervisors to find individualized solutions—a worthy investment considering the high costs of defending a discrimination charge”; “Don’t forget the nonreligious. Craft guidelines so they apply equally to nonreligious employees. For example, rather than granting employees time off or flexibility solely for religious holidays, offer such policies for any personal need.”).
NEW JUSTICES ADDENDUM

A. Introduction

In his lecture, *The Path of the Law*, delivered in 1897, Justice Oliver Wendell Holmes, Jr. observed, “The development of our law has gone on for nearly a thousand years, like the development of a plant, each generation taking the inevitable next step.” That development has continued for more than a century since Holmes spoke. As Holmes noted, “Far the most important and pretty nearly the whole meaning of every new effort of legal thought is to make these prophecies [of what courts will do in fact] more precise, and to generalize them into a thoroughly connected system.” As documented in Chapters 19-32, much constitutional law is settled today. However, as long as different approaches to judicial decisionmaking are held by different Justices of the United States Supreme Court, constitutional law will remain unsettled in various parts.

---

2 See generally Symposium: *The Path of the Law After One Hundred Years*, 110 Harv. L. Rev. 991-1054 (1997); Robert P. George, *One Hundred Years of Legal Philosophy*, 74 Notre Dame L. Rev. 1533 (1999) (discussing the influence in the 20th century of the analytic positivism of Bentham and Austin; Holmes’ views from 1897 in *The Path of the Law*; the Realist Movement and the instrumentalism of Karl Llewellyn during the 1930s and Post-World War II era; and various versions of modern natural law: economic (the Law and Economics Movement), political (Dworkin and Fuller), and ethical (Aquinas and others). Each of these approaches is summarized at § 13.1).

nominated Judge Merrick Garland, but the Republican majority in the Senate blocked confirmation hearings on the ground that the President elected in the November 2016 election should make the nomination. President Trump nominated Judge Neil Gorsuch and he was sworn in on April 10, 2017. Justice Kennedy retired effective July 31, 2018, and Justice Brett Kavanaugh was sworn in on October 6, 2018. As discussed in this Addendum, Chief Justice Roberts will likely adopt a Holmesian style of interpretation similar to Chief Justice Rehnquist; Justices Alito, Gorsuch, and Kavanaugh will likely adopt a formalist style, similar to Justices Scalia and Thomas; Justices Sotomayor and Kagan will likely adopt a moderate instrumentalist style, similar to Justices Ginsburg and Stevens. Based on these predictions, the placement of Chief Justice Roberts and Justices Alito, Sotomayor, Kagan, Gorsuch, and Kavanagh vis-a-vis other Justices appears at § 13.4 & Table 13.4.

**B. Chief Justice John G. Roberts, Jr.**

Chief Justice John G. Roberts replaced Chief Justice Rehnquist at the start of the 2005 Term of the Court, following confirmation in the Senate on September 29, 2005 by a 78-22 vote. His opinions as a judge on the United States Court of Appeals for the District of Columbia suggest that as a Justice he is likely to be a conservative Holmesian, in the mold of Chief Justice Rehnquist, for whom Justice Roberts served as a law clerk during the 1980 Term of the Court.

Naturally, a firm decision regarding the style that a former judge will display as a Supreme Court Justice is difficult to predict with confidence because lower court judges are supposed to follow Supreme Court precedents. For that reason, many circuit court opinions are written in substantially the same way regardless of decisionmaking style of the circuit court judge. In some cases, however, there may be clues in the way facts are characterized, in the way leeways in the precedents are perceived, and in the organization of reasoning. For example, while on the D.C. Circuit, Roberts did not reject the use of legislative history as a way to find plain meaning as would a formalist, although, like Chief Justice Rehnquist, discussed at § 6.2.3.1 nn.75-80, he had an affinity for the view, consistent with a formalist approach, that legislative history should not be used to overrule a text that is clear. Judge Roberts did not use policy analysis to help protect the unempowered, as would an instrumentalist. Nor are there examples of gauging results by background normative principles, as is often found in modern natural law opinions.

There are many suggestions in his opinions of a Holmesian approach. For example, Holmesian analysis typically begins with the objective meaning of relevant words, drawing on their underlying purpose and their context, such as related provisions. In *A.T. & T. Corp. v. FCC*, Judge Roberts held that the language of the Commission’s regulation dealing with the transfer of telephone 800

---

6 In re England, 375 F.3d 1169, 1178 (D.C. Cir. 2004) (where legislative language is clear, resort to legislative history is not necessary); United States ex rel. Totten v. Bombardier Corp., 380 F.3d 488, 494-95 (D.C. Cir. 2004) (where text is clear, literal meaning and purpose must be found in the language of the statute itself, not legislative history).

service applied to transfers of the traffic aspects of a service plan so that transferees had to assume all obligations of the former customer at the time of the transfers. He rejected an argument of the Commission that the regulation applied only to the wholesale transfer of a complete plan and not the transfer of component parts. Focusing on purpose in addition to literal plain meaning, Roberts explained that the whole purpose of the tariff provision was to ensure that the benefits of 800 service contracts could not be transferred without the concurrent obligations.

Under a Holmesian analysis, finding purpose and relevant context may be aided by broad-based historical inquiry. In a number of his opinions, Judge Roberts has set forth a detailed factual history in order to gain a full understanding of context and purpose. A Holmesian approach also has a willingness to consider legislative and executive practice and judicial precedent, in addition to the contemporaneous sources of text, context, and history. In so doing, a Holmesian analysis tends to emphasize judicial restraint embodied in deference to governmental action. Judge Roberts often reflected this deference-to-government predisposition while on the D.C. Circuit. For example, in *Graham v. Ashcroft*, the petition alleged that the FBI had failed to abide by its own procedures during a disciplinary hearing which eventuated in a letter of censure. Judge Roberts wrote that the censure letter failed to qualify as a major adverse personnel action so that judicial review was precluded under the Civil Service Reform Act. With respect to the deference owed Congress, he added that an agency cannot purport to confer rights that undermine a comprehensive congressional scheme, and the Act was such a scheme.

In *Consumers Energy Co. v. FERC*, the Federal Energy Regulatory Commission had allowed the affiliates of a Canadian utility to sell power at market-based rates in the United States because it had offered transmission service “comparable” to that required of a utility in the United States even though the Canadian utility required companies serviced from point A to point B to sell power into the system at point A and buy it back at point B. The prices in this system depended on the degree of congestion at each point. Applying an abuse of discretion standard, Judge Roberts wrote that claims of abuse through creating congestion were speculative, at best, and the FERC could apply

---

8 Sierra Club v. EPA, 353 F.3d 976 (D.C. Cir. 2004) (denial of petition for review of Environmental Protection Agency regulations concerning the emission of hazardous air pollution from primary copper smelters, the court holding that the EPA acted reasonably in that its standards accurately reflected the control achieved by the best-performing smelters); Midwest ISO Transmission Owners v. FERC, 373 F.3d 1361 (D.C. Cir. 2004) (examining the complex relationship between utilities that owned electric transmission facilities, the Federal Energy Regulatory Commission, and various state regulations with respect to the relation of costs and rates); Stewart v. Evans, 351 F.3d 1239 (D.C. Cir. 2003) (Fourth Amendment requires a constitutionally protected reasonable expectation of privacy, and there was no such expectation where a personal document of a government employee had been voluntarily delivered to a supervisor who put it in a locked safe to which the employee did not have access).

9 358 F.3d 931, 933-36 (D.C. Cir. 2004).

10 367 F.3d 915, 922-25 (D.C. Cir. 2004).
a flexible approach which required compatibility on a case-by-case basis, rather than letter-for-letter compliance, because FERC could find that its approach better promotes competitive markets.

In another case upholding the government’s position, *Taucher v. Brown-Hruska*, 11 a suit had been brought against the government by the prevailing party in an action resulting in a declaration that a portion of the Commodity Exchange Act was unconstitutional. Applying a federal statute on the payment of attorneys’ fees, the court affirmed a district court ruling that the Commission’s defense in the action was reasonable on the merits and, thus, attorneys’ fees were not to be paid. The issue on the merits was whether publishers who offered advice on trading in commodity futures were required to register under the Act or whether their actions were protected by the First Amendment. Roberts pointed out that there was no Supreme Court case on point and the only previous circuit court decision had upheld the government’s position. Judge Harry Edwards dissenting, saying that the district court had not abused its discretion in ordering the fees to be paid.

In *Amoco Production v. Watson*, 12 Judge Roberts gave judicial deference to an agency’s interpretation of its own regulations in a complex and highly technical regulatory program – the Department of the Interior regulation of royalties from the production of coalbed methane gas from federal land. The issue involved the presence of carbon dioxide in the gas which must be removed before the gas will be accepted by a mainline pipeline. The court upheld a determination by the government that the producers owed additional royalties. In rejecting the producers’ interpretation arguments, Justice Roberts said, “No canon of construction justifies construing the actual statutory language beyond what the terms can reasonably bear.”

Perhaps Judge Roberts’ most interesting constitutional opinion reflecting a deference-to-government approach is *Hedgepeth ex rel. Hedgepeth v. Washington Metropolitan Area Transit Authority*. 13 Here the court upheld on its face and as applied an ordinance which forbade eating in the Washington, D.C. subway system. Petitioner, a twelve-year-old girl, had been arrested for eating french fries while waiting on a subway platform. She was handcuffed and taken to a police station where some three hours later she was released to her parents. The key issues were whether the ordinance on its face or as applied violated the Equal Protection Clause, a liberty interest protected by the substantive Due Process Clause, or the Fourth Amendment prohibition on unreasonable seizure. The court found no violations.

Regarding equal protection, Judge Roberts wrote that under Supreme Court precedents rational basis was the proper standard of review because age is not a suspect classification and there is no fundamental right to freedom of movement when there is probable cause for arrest, as provided in the ordinance. True, he said, the ordinance calls for adults to be given a citation leading to a fine of $10-50, but children were to be arrested and held pending notification of their parents. In

11 396 F.3d 1168, 1172-78 (D.C. Cir. 2005); *id.* at 1178-83 (Edwards, J., dissenting).

12 410 F.3d 722, 734 (D.C. Cir. 2005).

13 386 F.3d 1148, 1150-52 (D.C. Cir. 2004).
Roberts’ view, this distinction was rationally related to the legitimate goal of promoting parental awareness and involvement with children who commit delinquent acts. Further, Roberts said, there is no way to insure that children will provide truthful and accurate identifying information. With respect to the claim of unreasonable seizure, the precedents say that if there is probable cause to believe that an individual has committed even a minor offense, an officer may, without violating the Fourth Amendment, arrest the offender. Roberts read the precedents also to establish that an additional inquiry into reasonableness of the arrest need not be made, given the existence of probable cause. And, finally, there is no constitutional insistence on limiting discretion in the arresting officer, and thus no plausible vagueness due process argument. Judge Roberts did not express any discomfort in applying this law to the facts in order to uphold denial of a claim that the arrest be expunged from the records, although he did note, “No one is very happy about the events that led to this litigation.”

Despite a manifested willingness to defer to the judgments of government officials, Judge Roberts has insisted that government agencies base their actions on all of the tests found in authorizing statutes. For example, in *Williams Gas Processing - Gulf Coast Co., L.P. v. FERC*, the Federal Energy Regulatory Commission was given power to regulate the transportation of natural gas but not its gathering, except for actions “in connection with” transportation that would otherwise frustrate the Commission’s effective regulation of a pipeline. The Commission had sought to regulate activities by a gathering company that had been “spun-down” from a transportation company. Roberts said that before this could be done the statute required both a finding that (1) there was concerted action between a pipeline subject to its jurisdiction and a gathering affiliate and that (2) this action frustrated the Commission’s effective regulation of the pipeline. In the case at hand, the Commission had not made such a dual finding, and the fact of affiliation here did not enhance or detract from any ability to charge high rates or impose onerous conditions. Thus the government suffered a rare loss at the hands of Judge Roberts.

Judge Roberts also indicated that unsupported governmental action is not entitled to deference. In *LeMoyne-Owen College v. NLRB*, the court held that faculty members were not entitled to be certified by the NLRB as a bargaining unit because their power to make academic policies of the college meant that they had managerial status. In its explanation of the certification, the NLRB did not discuss the cases which had decided such an issue the other way. The court remanded for the NLRB to provide an adequate explanation of its apparent disregard for precedent. Roberts said that the court defers to agency decisions, but if a party makes a strong argument that similar cases have been decided differently, the agency must do more than simply ignore the argument.

An additional aspect of Holmesian analysis is a pragmatic, sharing of powers, checks and balances approach to issues of separation of powers, with conservative Holmesians, such as Chief Justice

---

14 *Id.* at 1150, 1153-59.

15 373 F.3d 1335, 1341-45 (D.C. Cir. 2004).

16 357 F.3d 55, 60-61 (D.C. Cir. 2004).
Rehnquist, tending to favor the executive branch and the states. In *International Action Center v. United States*, Judge Roberts held that it was error to deny qualified immunity to police supervisors for torts allegedly committed by their subordinates who dealt with protesters at a Presidential Inaugural Parade. Roberts said that the court must define the constitutional right to be free from injury to such a degree that officials can reasonably anticipate when conduct may give rise to liability for damages. Mere negligence is not enough to justify recovery under § 1983. Without showing a pre-existing pattern of violations during parades, the effort to hold supervisors personally liable for inaction faded into *respondeat superior*, which is barred under § 1983. Similarly deferring to executive decisionmaking, in *Hamdan v. Rumsfeld*, Judge Roberts concluded that the President Bush’s plan for military tribunals for Guantanamo Bay detainees was impliedly authorized by Congress, did comply with the Uniform Code of Military Justice, and did satisfy the Geneva Conventions, positions echoed in dissent by Justice Thomas, joined by Justice Scalia and joined in part by Justice Alito, when the case reached the Supreme Court.

Consistent with the Holmesian predisposition to favor rational review in Equal Protection and Due Process cases, discussed at §§ 4.2.1 n.36 & 26.1.2.2 nn.73-79, Justice Roberts has most often reviewed government action at the low “rational basis” level, suggested by most precedents. He has not indicated discomfort with applying this test, and in almost all cases the result has been to approve the action of the government. For example, under rational basis review, Roberts had no difficulty in finding that a government agency has provided substantial support in the administrative record for its decision in *National Council of Resistance of Iran v. Department of State*. Judge Roberts pointed out that this was the fourth in a series of related cases concerning the biennial designations by the Secretary of State that certain groups are Foreign Terrorist Organizations. Here the petitioner organization’s designation as an FTO was based on a determination that it was an alias of another organization designated an FRO and there was substantive support of the Department’s conclusions in the administrative record.

17 365 F.3d 20, 24-28 (D.C. Cir. 2004).

18 415 F.3d 33, 35-43 (D.C. Cir. 2005), rev’d, 126 S. Ct. 2749, 2759-60, 2772-75, 2795-96 (2006); id. at 2823-49 (Thomas, J., joined by Scalia, J., and by Alito, J., except for Parts I, II-C-1, and III-B-2, dissenting).

19 American Federation of State, County & Municipal Employees Capital Area Council 26 v. Federal Labor Relations Authority, 395 F.3d 443 (D.C. Cir. 2005) (federal agency had made a reasonable determination that an agreement between the union and itself was tentative only so that the agency did not commit an unfair labor practice when it failed to approve the agreement); Sioux Valley Rural Television, Inc. v. FCC, 349 F.3d 667 (D.C. Cir. 2003) (FCC order rescinding preference in payment options by women or minority owned stations was held a reasonable exercise of authority over spectrum licenses, and adequate remedies had been provided for adjusting obligations arising from completed auctions).

20 373 F.3d 152, 153-60 (D.C. Cir. 2004).
In a number of other cases, Judge Roberts has held against a person who was challenging some aspect of criminal proceedings. For example, in United States v. Holmes, the court held that the police officer had acted reasonably in taking out a hard, square object he felt in the defendant’s parka pocket. Roberts pointed to the fact that defendant had hesitated to pull over, had several times reached under the seat, had been drinking, the jacket was huge, and the defendant had several times reached for the pocket, which ultimately turned out to be a scale. In United States v. West, the district court was held not to have abused its discretion by not allowing a defendant to withdraw his guilty plea where it was shown that the court made substantial effort to assure that defendant understood the consequences of the plea, no promises had been made, the defendant did not assert a viable defense, and the government would be prejudiced if the plea were withdrawn. In United States v. Smith, the defendant charged that it was an invalid ex post facto law to use sentencing guidelines as they existed when the crime was committed, given a later Court decision that the sentencing guidelines violated the Constitution. The court affirmed an enhanced sentence saying that it had not been shown that the old sentence guidelines had hurt the prisoner.

Even though most of Judge Roberts’ majority decisions for the Court of Appeals have favored the government, he has insisted that the government follow its rules. In United States v. Mellen, the defendant was convicted of receiving stolen goods from his wife which were found in his home. His sentence was based upon the assumption that he had used all of the goods. The sentence was vacated because there was no evidence that he had used all of the goods. Another such case is Public Service Comm’n of Kentucky v. FERC. Noting that by statute the Commission must set rates that are just, reasonable, and not unduly discriminatory, Judge Roberts held that the FERC had violated the due process rights of petitioners by creating a special incentive-based premium applying to one group of companies without placing petitioner on notice and creating that premium without considering any record evidence whatever. Other cases written by Judge Roberts reflected the same penchant for careful attention to the facts and procedural regularity, consistent with a Holmesian predisposition, noted at § 10.2.1.2. n.18, to defer to government where governmental operations are operating smoothly, but to be concerned that the political process is, in fact, operating properly.26

21 385 F.3d 786, 789-92 (D.C. Cir. 2004).
22 392 F.3d 450, 455-61 (D.C. Cir. 2004).
23 374 F.3d 1240, 1247-51 (D.C. Cir. 2004).
24 393 F.3d 175, 182-87 (D.C. Cir. 2004).
25 397 F.3d 1004, 1008-12 (D.C. Cir. 2005).
26 See, e.g., United States v. Lawson, 410 F.3d 735 (D.C. Cir. 2005) (affirming a conviction of bank robbery over challenges to the admission of an out-of-court identification, to the search of defendant’s car, and to evidence of a second, uncharged bank robbery); United States v. Toms, 396 F.3d 427 (D.C. Cir. 2005) (district court did not err in denying a motion to overrule a conviction for several drug and firearms offenses); United States v. Tucker, 386 F.3d 273 (D.C. Cir. 2004) (the district court made an insufficient statement of reasons to depart from the sentencing standards by a downward adjustment); BOPCS, Inc. v. FCC, 351 F.3d 1177 (D.C. Cir. 2003) (FCC’s denial of
Justice Samuel A. Alito

Justice Alito was confirmed to the Supreme Court by a 58-42 vote of the Senate on January 31, 2006. While predictions based on prior judicial or legal experience are somewhat speculative, Justice Alito’s judicial decisionmaking style appears to be more clearly in the mold of a formalist approach, rather than the Holmesian approach predicted for Chief Justice Roberts. The Senate’s confirmation of Justice Alito to replace natural law Justice Sandra Day O’Connor may shift the balance of the Supreme Court more in a formalist direction, fulfilling President George W. Bush’s campaign pledge to nominate Justices in the mold of formalist Justices Scalia and Thomas. In contrast to Holmesian deference-to-government, the formalist focus on literal text and specific historical intent may lead formalist Justices to strike down more legislation than would be true under Holmesian deference. As one author has noted, “Justices Scalia and Thomas have voted to strike down federal affirmative action provisions, state affirmative action plans, measures designed to promote minority ownership of media, campaign finance legislation that attempts to redress wealth inequities in the political process, portions of the Americans with Disabilities Act, part of the Family and Medical Leave Act, legislative attempts to promote minority representation, laws protecting women from violence, and laws protecting gays, the aged, and the disabled from discrimination.”

Justice Alito’s opinions on the Third Circuit are consistent with viewing him as a formalist in the mold of Justices Scalia and Thomas. Indeed, Justice Alito has been called by some "Scalito," meaning "Little Scalia." On the other hand, in one case during the 2006 Term, Day v. McDonough, Justice Alito departed from a literal textual reading of Habeas Rules 4 and 5 regarding waiver of a statute of limitations defense, in favor of a prudential deference-to-government view where considerations of “comity, finality, and the expeditious handling of habeas proceedings . . . counsel against an excessively rigid or formal approach.” During the 2006 Term, Justice Alito

---

28 Id. at 827-28 (citations omitted).

29 See, e.g., Alliance for Justice, Report on the Nomination of Samuel A. Alito to the United States Supreme Court (2006) (at www.supremecourtwatch.org) (quoting, inter alia, Professor Cass Sunstein for the proposition that “there is a good chance that Alito will be with Justices Scalia and Thomas in their attempts to move Constitutional law in some respects to what it was long ago.”)

31 126 S. Ct. 1675, 1682-84 (2006) (Ginsburg, J., opinion for the Court, joined by Roberts, C.J., and Kennedy, Souter & Alito, JJ.); id. at 1685 (Stevens, J., joined by Breyer, J., dissenting from the judgment); id. at 1685-86 (Scalia, J., joined by Thomas & Breyer, JJ., dissenting).
also indicated a greater reluctance to reach out to decide issues presented by a case, but not necessary for case resolution, on which Justices Scalia and Thomas chose to write. Given Chief Justice Roberts’ basic Holmesian style, as reflected in Table 13.4, in practice this has meant Justice Alito has voted slightly more with Chief Justice Roberts, rather than Justices Scalia or Thomas.

D. Justice Sonia Sotomayor

On May 1, 2009, Justice David Souter announced he was retiring from the Supreme Court. President Obama nominated Second Circuit Court of Appeals Judge Sonia Sotomayor to replace Souter on May 26, 2009. The Senate voted to confirm her nomination by a 68-31 vote on August 6, and Justice Sotomayor took her oath of office on August 8, 2009. Based upon her record on the Second Circuit, and President Obama’s stated criteria that the “quality of empathy, of understanding and identifying with people’s hopes and struggles, [is] an essential ingredient for arriving at just decisions and outcomes,” it is likely Justice Sotomayor will decide cases similar to Justice Ginsburg, following a liberal, moderate instrumentalist style of judicial decisionmaking.

E. Justice Elena Kagan

On April 9, 2010, Justice John Paul Stevens announced he was retiring from the Supreme Court. President Obama nominated Solicitor General of the United States, and former Harvard Law School Dean, Elena Kagan to replace Stevens on May 10, 2010. The Senate voted to confirm her nomination by a 63-37 vote on August 5, and Justice Kagan took her oath of office on August 7, 2010. Based upon her published writings, it is likely Justice Kagan will decide cases similar to Justice Stevens, following a liberal, moderate instrumentalist style of judicial decisionmaking.

F. Justice Neil M. Gorsuch

On February 13, 2016, Justice Scalia passed away. On March 16, 2016, President Obama nominated Chief Judge of the D.C. Circuit Court of Appeals, Merrick Garland, to replace him. The Republican majority in the Senate refused to give him a hearing, awaiting the outcome of the November 2016 election. Following Donald Trump’s election as President, Trump nominated 10th Circuit Court of Appeals Judge Neil Gorsuch on January 31, 2017. To overcome a Democratic filibuster, the Republican-controlled Senate voted on April 6, 2017 to adopt the “nuclear option” to change Senate rules to require only a majority to trigger voting for Supreme Court Justices. (When the Democrats controlled the Senate in November 2013, they adopted the “nuclear option” for lower federal court judges and Executive appointments, as discussed in the 2018 Supplement, § 7.4.2, page 234, end of

section). Following this change, the Senate voted to confirm Gorsuch’s nomination by a 54-45 vote on April 7, 2017, and Justice Gorsuch took his oath of office on April 10, 2017. Based upon his writings and opinions, it is likely Justice Gorsuch will decide cases similar to Justice Scalia, with a formalist style of interpretation, with a slightly affinity for Holmesianism, like Justice Alito.34

G. Justice Brett M. Kavanaugh

At the end of the 2017 Term, Justice Kennedy announced his retirement effective July 31, 2018. Despite credible allegations of perjured testimony during his confirmation hearings, including about sexual misconduct in high school and college, and access to stolen Democrat Judiciary Committee documents while working in the Bush Administration, the Senate voted 51-49, mostly on party lines (one Democrat voted yes, one Republican voted no), to move forward President Trump’s nomination of Judge Brett M. Kavanaugh of the D.C. Circuit Court of Appeals. He was sworn in October 6, 2018. Based upon his writings and opinions, he will likely decide cases in a formalist manner, but with an affinity for Holmesian deference to government, particularly on Executive Power issues.

H. Conclusion

Since 2007, there was a “positivist” Holmesian and formalist voting bloc of Chief Justice Roberts and Justices Scalia (now Gorsuch), Thomas, and Alito, and a “normative” bloc of Justices Stevens (now Kagan), Souter (now Sotomayor), Ginsburg, and Breyer. Given these two blocs, Justice Kennedy was often the key swing vote in close 5-4 cases.35 With Justice Kennedy’s retirement, and replacement by formalist Justice Kavanaugh, Chief Justice Roberts is likely the new swing vote. The “positivist” versus “normative” distinction is summarized at §§ 2.3-2.4 and at Table 2.4. For the longer-term, the natural law style of Justice Kennedy, which was shared by Justices O’Connor and Souter, will likely predominate, not the liberal instrumentalism of the Warren Court.36 Reasoned elaboration of the law will likely reflect a Stage 6 progressivist perspective, as discussed in Chapter 16. Connection to other countries’ constitutional doctrine, particularly Europe and Canada, will likely increase given a convergence in those societies also adopting Stage 6 reasoned elaboration of the law, as discussed at § 15.4.2 & 17.1.4 nn.65-72. A 2018 Supplement, included at the end of this E-Treatise, discusses constitutional developments from October 2006 - August 2018.

* Chief Justice Rutledge returned to the Court after serving previously as an Associate Justice. Chief Justice Hughes returned to the Court after serving previously as an Associate Justice.

** Chief Justice White was confirmed as Chief Justice, moving from his existing position as an Associate Justice.

*** To prevent President Johnson from filling the position left by Justice Catron’s death in 1865, or filling any other vacancies that might occur, such as Justice Wayne’s death in 1867, Congress reduced the size of the Court from 10 Justices to 7 in 1866. In 1869, once Johnson was no longer President, Congress increased the size of the Court back to 9. In these moves, Justice Catron’s position 8 is typically viewed as removed; Justice Davis’ position 9 is renumbered as position 8, and filled by Justice Harlan on Davis’ death; Justice Field’s position 10 is renumbered as position 9. Justice Bradley’s appointment is typically viewed as recreating Wayne’s seat.

**** Make-up of the Court during the Spring of 1937, during the “Court-packing Plan” and Justice Roberts’ “switch in time,” discussed at pages 229, 444, 720.

** Chief Justice Stone was confirmed as Chief Justice, moving from his existing position as an Associate Justice. Chief Justice Rehnquist was confirmed as Chief Justice, moving from his existing position as an Associate Justice.

**** Make-up of the Court during the Spring of 1937, during the “Court-packing Plan” and Justice Roberts’ “switch in time,” discussed at pages 229, 444, 720. Justice Black replaced Justice Van Devanter at the end of that Term of the Court.

***** When Chief Justice Warren announced an intention to retire from the Court in 1968, President Johnson's nomination of Associate Justice Fortas to replace him was eventually withdrawn. President Nixon successfully nominated Judge Warren Burger. After his nomination to be Chief Justice failed, Justice Fortas retired in 1969, but his position was not filled by Judge Blackmun until 1970, following the failed nominations of Judge Clement Haynesworth and Judge G. Harrold Carswell.

****** Justice Powell resigned at the end of the Court's Term in 1987, but Justice Kennedy was not confirmed until 1988, following the failed nominations of Judge Robert Bork and Judge Douglas Ginsburg.

****** Justice Scalia died on February 13, 2016. As discussed in the “New Justices Addendum,” Judge Neil Gorsuch was sworn in on April 10, 2017.

******* Justice Kennedy resigned effective July 31, 2018. As discussed in the "New Justices Addendum," Judge Brett Kavanaugh was sworn in on October 6, 2018.

The listing of “positions” of Supreme Court Justices used here is the standard account. The ordering of positions 1-6 in this Table conforms to the date when each of the initial Justices were confirmed by the Senate and thus received their commissions, consistent with the Judiciary Act of 1789, which provided that “the associate justices shall have precedence according to the date of their commissions, or when the commissions of two or more of them bear date on the same day, according to their respective ages.”

THE PATH OF CONSTITUTIONAL LAW

PART I: THE MATERIAL OF CONSTITUTIONAL LAW ................. 11

Chapter 1: The Material of Judicial Decisionmaking ................. 11

§ 1.1 Introduction to the Path of Constitutional Law Decisionmaking .... 11
§ 1.2 Understanding the Causes of Constitutional Interpretation .......... 14
  1. Aristotle’s Four Causes Used to Explain Any Thing or Situation: Material, Formal, Efficient, and Final Causes ............. 14
  2. Application of a Causal Analysis in the Four Parts of This Book ........................................ 15
§ 1.3 Use of the Four Causes in Each Part of This Book ................ 16
  1. Part I – The Materials of Constitutional Law ............... 16
  2. Part II – The Form or Shape of Constitutional Law .......... 17
  3. Part III – Decisionmaking Styles as Efficient Causes .......... 17
  4. Part IV – The Final Cause: Decisions and Opinions .......... 17
§ 1.4 Conclusion ................................................................ 18

Chapter 2: The Form or Shape of Judicial Decisionmaking ............ 19

§ 2.1 Introduction to the Form or Shape of Judicial Decisionmaking .... 19
§ 2.2 The Nature of Law ............................................ 20
  1. Analytic versus Functional Approaches to the Nature of Law . 20
  2. Discussion of Analytic versus Functional Approaches in Terms of the Four Causes ........................................ 21
    1. Material Causes and the Nature of Law .................. 21
    2. Formal Causes and the Nature of Law .................. 22
    3. Efficient Causes and the Nature of Law ............... 23
    4. Final Causes and the Nature of Law .................. 23
§ 2.3 The Nature of the Judicial Task ................................ 25
  1. Positivist versus Normative Approaches to the Judicial Task . 25
  2. Discussion of Positivist versus Normative Approaches in Terms of the Four Causes ........................................ 29
    1. The Positivist View ....................................... 29
    2. The Normative View ..................................... 29
§ 2.4 How Perspectives on the Nature of Law and the Judicial Task Combine ....................................................... 30

Chapter 3: Efficient Causes: The Four Decisionmaking Styles ........ 35

§ 3.1 Formalism: The Analytic/Positivist Approach ..................... 35
§ 3.2 Holmesian: A Functional/Positivist Approach .................... 41
§ 3.3 Instrumentalism: A Functional/Normative Approach ............ 47
§ 3.4 Natural Law: The Analytic/Normative Approach ............... 54
Chapter 4: Final Cause: Structure of Law As Determined by Judges

§ 5.3 Subsequent Events as Sources of Meaning ........................................ 118
1. Introduction .................................................................................. 118
2. The Subsequent Events of Legislative and Executive Practice .... 119
   1. Practice as Gloss on Meaning versus No Gloss on Meaning ................................................... 119
   2. Levels of Generality and Arguments of Legislative and Executive Practice ................. 121
   3. Weight to be Given Arguments of Legislative and Executive Practice .............................. 121
3. The Subsequent Events of Judicial Precedents .................................. 122
   1. Precedent as Gloss on Meaning versus No Gloss on Meaning ........................................... 122
   2. Levels of Generality and Precedent .................................................................................... 123
   3. Weight to be Given Arguments of Precedent ........................................................................ 123
4. The Subsequent Events of Social Practice ........................................ 124

§ 5.4 Prudential Considerations .............................................................. 125
1. Kinds of Prudential Considerations: Interpretive versus Non-Interpretive Review .......... 125
2. Interpretive Prudential Considerations .............................................................................. 128
3. Non-Interpretive Prudential Considerations ....................................................................... 131

Chapter 6: The Form or Shape of Constitutional Interpretation ................. 134
§ 6.1 Introduction to Defining Constitutional Interpretation ...................... 134
§ 6.2 Treatment of Contemporaneous Sources of Interpretation .............. 134
1. Treatment of Text ........................................................................ 134
   1. The Debate Between Subjective versus Objective Interpretation of Text ...................... 134
   2. The Debate Between Literal versus Purposive Interpretation of Text .............................. 140
2. Treatment of Context .................................................................... 143
   1. Treatment of Context: Restrictive versus Receptive Use ................................................. 143
   2. Treatment of Judicial Review ...................................................................................... 145
   3. Treatment of Federalism ....................................................................................... 147
   4. Treatment of Separation of Powers and Checks and Balances ...................................... 148
3. Treatment of History ....................................................................... 149
   1. Legislative History versus Other Historical Sources ............................................... 149
   2. Specific versus General Historical Intent ......................................................................... 156
§ 6.3 Treatment of Subsequent Developments ........................................ 159
1. Treatment of Legislative and Executive Practice ........................................ 159
2. Treatment of Judicial Precedents ................................................................................. 162
3. Treatment of Social Practice ............................................................................... 163
4. General Observations on Static versus Living Constitutions ..................... 165
§ 6.4 Prudential Considerations ........................................ 166
   1. Possible Instrumentalist Use of Non-Interpretive Prudential Considerations ........................................ 166
   2. Possible Natural Law Use of Non-Interpretive Prudential Considerations ........................................ 167
   3. General Use of Interpretive Prudential Considerations ........ 169
   4. Concluding Observations ....................................... 170

Chapter 7: Efficient Causes of Constitutional Interpretation ................. 173

§ 7.1 Deductive versus Inductive Reasoning ................................ 173
§ 7.2 The Form or Shape of Constitutional Law Doctrine ................. 178
   1. Balancing Tests in Constitutional Doctrine:
      The “Base Plus Six” Model of Review ................................ 179
   2. Categorical Tests in Constitutional Doctrine ....................... 189
   3. Rules versus Standards in Constitutional Doctrine .............. 192
   4. Law versus Fact in Constitutional Doctrine ....................... 194
§ 7.3 Dealing with Precedents .......................................... 196
   1. Strict versus Loose Use of Precedent ............................. 197
      1. Cases Focusing on the Core Holdings of Precedent, Not its General Reasoning .......................... 197
      2. Cases Building on Welcome Precedents ......................... 198
      3. Cases Emphasizing An Aspect of a Precedent With Which the Judge Agrees ........................... 200
      4. Cases Manipulating a Precedent to Claim it is Merely Being Followed ................................... 202
   2. Following or Overruling Precedent Without Regard to Whether There is a Gloss on Meaning: The Considerations of Settled Law and Substantial Reliance .............................. 203
   3. Following or Overruling Precedent Assuming the Precedent Has Created a Gloss on Meaning .................. 209
      1. The Precedent is Unworkable in Practice ...................... 210
      2. The Precedent Creates Inconsistency or Incoherence in the Law ........................................ 213
      3. A Changed Understanding of Facts Undermines the Precedent ........................................ 216
      4. The Precedent is Substantially Wrong or Represents a Substantial Injustice ................................ 217
   4. The Precedent Raises Concerns About the Rule of Law ........... 224
      1. The Retroactivity Concern ..................................... 224
      2. Response to Political Pressure Concern ....................... 226
      3. Decision Not Based Upon Full Briefing and Argumentation ................................................ 227
      4. Plurality versus Majority Opinions ............................. 227
§ 7.4 The Process of Supreme Court Decisionmaking ....................... 228
   1. General Judicial Predispositions That May Affect Every Case . 228
2. The Process by Which Judges are Appointed or Elected to Courts ........................................... 228
3. The Process by Which the Supreme Court Decides Cases .... 234
4. Basic Rules Regarding Judicial Speech and Recusal ........ 238

Chapter 8: The Purposes or Ends of Constitutional Interpretation ................. 241

§ 8.1 Allocating Government Power: Forming a More Perfect Union .... 243
1. Judicial Review ......................................... 243
2. Federalism ............................................. 246
3. Separation of Powers .................................... 248
4. Checks and Balances ..................................... 248

§ 8.2 Producing Well-Formed Doctrine that Treats Constitutional Text and Precedents in a Principled Manner: Establishing Justice ............ 249

§ 8.3 Reconciling Government Power and Individual Rights: Securing the Blessings of Liberty to Ourselves and our Posterity ............ 252
1. Securing the Blessings of Liberty Under the Civil War Amendments ............................................. 253
2. Securing the Blessings of Liberty Under the First Amendment 255

§ 8.4 Originalist versus Non-Originalist Approaches to Constitutional Interpretation ............................................. 258
1. An Originalist Approach: Following the Framers and Ratifiers’ Intent or Action ............................................. 259
2. A Non-Originalist Approach: Reflect Justice or Sound Social Policy ............................................. 272
1. Non-Originalist Approaches Defined ...................... 272
2. Non-Originalism versus Originalism in Individual Cases ............................................. 274

PART III: THE EFFICIENT CAUSES OF CONSTITUTIONAL LAW ................. 277

Chapter 9: Formalist Constitutional Interpretation ................................. 278

§ 9.1 Introduction to Formalist Decisionmaking ......................................... 278

§ 9.2 Defining the Formalist Style of Constitutional Interpretation ............ 278
1. Treatment of Contemporaneous Sources of Interpretation .... 278
1. Treatment of Text ............................................. 278
2. Treatment of Context ........................................... 282
3. Treatment of History ........................................... 285
2. Treatment of Subsequent Developments ............... 287
1. Legislative, Executive, and Social Practice ............... 287
2. Judicial Precedents ........................................... 290
3. Prudential Considerations ...................................... 291

§ 9.3 Variations in the Formalist Approach ........................................... 293
1. Summary of the Basic Formalist Approach .................. 293
2. Extreme versus Moderate Formalism ...................... 295
3. Conservative versus Liberal Formalism .................. 299
4. Literal Text versus Specific Historical Intent Formalism . 300

§ 9.4 The Formalist Approach, Combined with Affinity for Another Style . 301

Chapter 10: Holmesian Constitutional Interpretation .......................... 303

§ 10.1 Introduction to Holmesian Decisionmaking .................. 303
§ 10.2 Defining the Holmesian Style of Constitutional Interpretation .. 304
  1. Treatment of Contemporaneous Sources of Interpretation ..... 304
     1. Treatment of Text .................................. 304
     2. Treatment of Context .............................. 305
     3. Treatment of History ............................. 307
  2. Treatment of Subsequent Developments .................. 310
     1. Legislative, Executive, and Social Practice .......... 310
     2. Judicial Precedents ............................. 312
     3. Prudential Considerations ....................... 313
§ 10.3 Variations in the Formalist Approach ...................... 314
  1. Summary of the Basic Holmesian Approach ........... 314
  2. Extreme versus Moderate Holmestans ................. 316
  3. Conservative versus Liberal Holmestans ............ 319
§ 10.4 The Holmesian Approach, Combined with Affinity for Another
  Style ................................................. 323

Chapter 11: Instrumentalist Constitutional Interpretation ................. 325

§ 11.1 Introduction to Instrumentalist Decisionmaking .................. 325
§ 11.2 Defining the Instrumentalist Style of Constitutional Interpretation . 326
  1. Treatment of Contemporaneous Sources of Interpretation ..... 326
     1. Treatment of Text .................................. 326
     2. Treatment of Context .............................. 328
     3. Treatment of History ............................. 330
  2. Treatment of Subsequent Developments .................. 331
     1. Legislative, Executive, and Social Practice .......... 331
     2. Judicial Precedents ............................. 333
     3. Prudential Considerations ....................... 334
§ 11.3 Variations in the Instrumentalist Approach .................. 335
  1. Summary of the Basic Instrumentalist Approach .......... 335
  2. Extreme versus Moderate Instrumentalism ........... 337
  3. Conservative versus Liberal Instrumentalism .......... 341
  4. Other Variations of Instrumentalism .................. 342
     1. Non-Critical Approaches .......................... 342
        A. Pragmatism .................................... 342
        B. Utilitarianism ................................ 343
        C. Kantian Approaches ......................... 345
     2. Critical Approaches .............................. 346
        A. Critical Legal Studies ....................... 346
        B. Feminist Theory ............................. 348
Chapter 12: Natural Law Constitutional Interpretation

§ 12.1 Introduction to Natural Law Decisionmaking
§ 12.2 Defining the Natural Law Style of Constitutional Interpretation
  1. Treatment of Contemporaneous Sources of Interpretation
  1. Treatment of Text
  2. Treatment of Context
  3. Treatment of History
  2. Treatment of Subsequent Developments
    1. Legislative, Executive, and Social Practice
    2. Judicial Precedents
    3. Prudential Considerations
§ 12.3 Variations in the Natural Law Approach
  1. Summary of the Basic Natural Law Approach
  2. Extreme versus Moderate Natural Law
  3. Conservative versus Liberal Natural Law
§ 12.4 The Natural Law Approach, Combined with Affinity for Another Style
  1. Natural Law Combined with Formalist Interpretation
  2. Natural Law Combined with Holmesian Interpretation
  3. Natural Law Combined with Instrumentalist Interpretation
  4. Constitutional versus Statutory versus Common-Law Interpretation

Chapter 13: Formal Causes and the Five Eras of American Law

§ 13.2 A Similar Critical Legal Studies Version of American Legal History
§ 13.3 Results of These Decisionmaking Styles: Constitutional Law Doctrine
§ 13.4 Decisionmaking Styles of the Justices: Current and Recent Past

Chapter 14: Material Causes of the Five Eras of American Law

§ 14.1 Defining Four Approaches to Social and Political Issues
§ 14.2 Five Political Eras of American History and Supreme Court Doctrine
  1. The Original Natural Law Era: 1789-1873
  2. The Formalist Era: 1873-1937
  3. The Holmesian Era: 1937-1954
  4. The Instrumentalist Era: 1954-1986
  5. The Modern Natural Law Era: 1986-Present
Chapter 15: Efficient Causes of the Five Eras of American Law

- § 15.1 Kinds of Societies in World History
- § 15.2 Kohlberg’s Six Moral Reasoning Stages
- § 15.3 Piaget’s Theory of Individual Cognitive Development, Selman’s Social Perspectivism, and Kohlberg’s Moral Reasoning Stages
- § 15.4 Moral Reasoning and Societal Development in America and Elsewhere
  2. Moral Reasoning and the Eras of Societies in World History
  3. Modern Transitional Stages and the Eras of Societies
  4. Critiques of Kohlberg’s Theory of Moral Reasoning Stages

Chapter 16: Final Causes and the Five Eras of American Law

- § 16.1 Material Base of Moral Reasoning: Faith in Custom or Reason
- § 16.2 The Form or Shape of Emerging Stage 6 Moral Reasoning: “Equal Concern and Respect” or “Love of Neighbor as Oneself”
  1. The Philosophic Base of Stage 6 Natural Law Reasoning
  2. The Enlightenment Form or Shape of Stage 6 Natural Law Reasoning
  3. The Religious Form or Shape of Stage 6 Natural Law Reasoning
  4. The Issue of Sexual Orientation as an Example of Stage 6 Reasoning from Both an Enlightenment and Religious Natural Law Perspective
- § 16.3 Stage 6 Moral Reasoning as an Efficient Cause in Constitutional Law
- § 16.4 Stage 6 Moral Reasoning as a Final Cause for Constitutional Law

PART IV: THE FINAL CAUSE OF CONSTITUTIONAL LAW

Sub-Part One: Structural Issues in Constitutional Law

Chapter 17: Judicial Review

- § 17.1 Foundations of Judicial Review
  1. The Nature and Basis of Judicial Review
  2. Judicial Review During the Original Natural Law Era: 1789-1873
2. *Martin v. Hunter’s Lessee* and Federal Court
Supremacy ........................................... 560

3. Later Views on Judicial Review ........................................ 562
   1. Judicial Review During the Formalist Era:
      1873-1937 ........................................ 562
   2. Judicial Review During the Holmesian Era:
      1937-1954 ........................................ 563
   3. Judicial Review During the Instrumentalist Era:
      1954-1986 ........................................ 565
   4. Judicial Review During the Modern Natural Law Era:
      1986-Today ........................................ 565

4. Evaluation of Judicial Review ........................................ 566

§ 17.2 The Jurisdiction of the Federal Courts .......................... 573
   1. Federal Jurisdiction: What Article III Provides ............ 574
   2. Types of Cases for Which Federal Jurisdiction Exists ...... 575
      1. Constitutional Litigation Initiated in Federal Courts ... 575
         A. Original Jurisdiction in the Supreme Court ....... 575
         B. Original Jurisdiction in the Lower Federal
            Courts ........................................ 583
      2. Federal Court Review of State Court Decisions
         Involving Federal Law Issues .......................... 587
      3. Limited Federal Review of State Court Decisions
         on State Law Matters in Cases also Involving
         Federal Questions .................................. 588
      4. Jurisdiction Acquired by Removal of Cases from State
         Courts .............................................. 591

3. Limitations on Jurisdiction Imposed on the Courts ............ 592
   1. Congressional Control of Judicial Review by Federal
      Courts .............................................. 592
   2. Constitutional and Prudential Due Process Clause
      Restraints on Cases Heard in Federal and State Courts ... 597

4. State Sovereign Immunity Limitations Against Enforcing
   Federal Rights in Suits Against States, State Agencies, and
   State Officers ........................................ 599
   1. General History of the 11th Amendment .................. 599
   2. Limits on the 11th Amendment Doctrine .................. 602
   3. State Sovereign Immunity Considerations Generally .... 609
   4. Additional Restraints on Federal Courts Involving State
      Court Actions: Abstention Doctrine and Other
      Prudential Restraints ................................ 616

§ 17.3 Justiciability Limits on Federal Court Jurisdiction ............ 620
   1. Standing to Sue: Constitutional and Prudential Limits on
      Federal Jurisdiction .................................. 620
      1. Introduction to the General Principles of Standing ... 620
      2. Constitutional Principles of Standing Doctrine ....... 626
         A. The Original Natural Law Era: 1789-1873 ....... 626
         B. The Formalist Era: 1873-1937 .................. 628
C. The Holmesian Era: 1937-1954 .................. 632
D. The Instrumentalist Era: 1954-1986 ........... 638

A. The Injury-in-Fact Requirement ................ 642
B. Modern Causation Analysis ...................... 648
C. Current Doctrine on Redressability .............. 651
D. Congressional Authority to Create Standing .... 654
E. Standing Under the Qui Tam Statute .......... 658

4. Prudential Principles of Standing ............... 659
A. Generalized Grievances ......................... 659
B. The “Zone of Interests” Test .................... 660
C. Standing to Assert the Rights of Third Parties 665
D. Representational Standing for Organizations,  States, and Elected Representatives .......... 666
E. Equitable Discretion .............................. 669

2. The Ripeness Doctrine .................................. 669
3. The Doctrine of Mootness and the Ban on Giving Advisory Opinions ............................. 675
1. Introduction to Mootness and Advisory Opinion Doctrine ........................................... 675
2. Points of Contention in Mootness Doctrine .......... 678

4. Political Questions Doctrine ...................... 681
1. The Original Natural Law Era: 1789-1873 .... 681
2. The Formalist Era: 1873-1937 .................... 682
3. The Holmesian Era: 1937-1954 .................... 682
4. The Instrumentalist Era: 1954-1986 ............ 683
5. Modern Political Questions Doctrine: 1986-Today ... 686
6. General Principles Underlying Political Questions Doctrine ........................................... 689

§ 17.4 Consequences of Having A Valid Claim .................. 692
1. As Applied Versus Facial Challenges ............. 692
2. The Severability Issue .............................. 694
3. The Retroactivity Issue and the Standards Used to Consider a Valid Claim ................ 695
4. Remedial Issues ........................................ 696

Chapter 18: Federalism ................................................. 700

§ 18.1 National Power: Its Nature and Scope .................. 700
1. Background for Studying the Nature of Federal Power: Text, Structure of the Constitution, and History ................. 701

§ 18.2 Federal Power to Regulate Under the Commerce Clause .................. 712
1. The Natural Law Approach: Broad Power to Regulate Commercial Activity Which Concerns More States Than One . 712

Page 1641
2. The Taney Court: Areas of Exclusive Federal Commerce Power and Exclusive State Commerce Power Under the Cooley Subject-Matter Approach ... 716
2. The Formalist Era: The Diminution of Federal Power to Regulate Commerce ........................................ 718
4. The Instrumentalist Era: Further Broadening of Federal Commerce Power ........................................ 723
5. The Modern Natural Law Era and A Recent Curb on Congress’ Commerce Power ........................................ 725
6. Congress’ Commerce Clause Power With Foreign Nations and the Indian Tribes ............................ 735
   1. Congress’ Commerce Clause Power With Foreign Nations ........................................ 735
   2. Congress’ Commerce Clause Power With Indian Tribes ........................................ 736

§ 18.3 Federal Power Under Clauses Other than the Commerce Clause ........................................ 739
1. The Taxing Power ........................................ 740
2. The Spending Power ........................................ 741
   1. Basic Doctrine ........................................ 741
   2. Indirect Regulation of States by Conditions in Federal Spending Programs ........................................ 742
3. Fiscal Powers ........................................ 744
4. Naturalization and Regulation of Aliens ........................................ 745
6. Power Over the Federal Judicial Branch ........................................ 746
7. The Admiralty Power ........................................ 746
8. The War Powers ........................................ 746
9. The Treaty Power ........................................ 749
10. The Property Power ........................................ 752

§ 18.4 Tenth Amendment Limits on Congressional Power ........................................ 753
1. The Original Natural Law Era ........................................ 753
2. The Formalist Era ........................................ 754
3. The Holmesian Era ........................................ 755
4. The Instrumentalist Era ........................................ 755
5. Modern Doctrine: Ban on Federal Commandeering of State Legislative, Executive, and Administrative Agencies ........................................ 759

§ 18.5 Additional Limitations on Federal Power ........................................ 763
§ 18.6 Additional Limitations on State Power ........................................ 763
1. Article I, §10 Limitations on State Power ........................................ 764
2. Article IV Limitations on State Power ........................................ 764
   1. Admittance of New States ........................................ 764
   2. State Power over Property ........................................ 767
   3. The Guarantee Clause ........................................ 768
Chapter 19: The Separation of Powers ........................................ 771

§ 19.1 The General Nature of the Separation of Powers Doctrine ........ 771
§ 19.2 Congressional Delegation of Legislative Power .................. 773
§ 19.3 Presidential Power Over National Policy .......................... 777
1. General Observations ........................................ 777
2. International Matters ........................................ 781
3. War and National Defense .................................... 785
4. Domestic Policymaking ...................................... 789
5. The Pardon Power ........................................... 791
§ 19.4 Legislative Power over National Policy .......................... 793
1. General Observations ........................................ 793
2. Unconstitutional Attempts to Change the Veto Power ............. 793
   1. The Legislative Veto ...................................... 793
   2. Giving the President a Line-Item Veto ..................... 796
3. Limited Legislative Control over Appointment and Removal of Officers ........................................ 799
   1. Limited Legislative Control Over Appointment of Officers ........................................ 799
   2. Limited Legislative Control Over Removal of Officers ........................................ 805
4. General Separation of Powers Concerns .......................... 810

Chapter 20: Additional Checks and Balances .......................... 812

§ 20.1 Separation of Powers Checks and Balances ........................ 813
1. Having Some Constitutional Structure in Place and Operating .......... 813
   1. Ensuring the Continuity of Government ...................... 813
   2. The 1781 Articles of Confederation and Their Replacement by the 1789 Constitution .......... 817
   3. Amending the United States Constitution ..................... 821
2. Issues in the Election of Members of the Federal Government .... 825
   1. Presidential Election ..................................... 825
   2. Congressional Elections .................................. 832
3. Impeachment Power of Congress ................................ 835
4. Immunities from Suit ........................................ 836
   1. Congressional Immunities: The Arrest and Speech or Debate Clauses ........................................ 836
   2. Executive Immunities ...................................... 839
      A. The President .......................................... 839
      B. Immunity for Lower Federal Officials .................. 844
   3. Judicial Immunity and Congressional Interference with the Courts ........................................ 848
   4. Sovereign Immunity of the United States from Suit ................ 849
§ 20.2 Federalism Checks and Balances: Intergovernmental Immunities 852
1. Federal Immunity from State Taxation .......................... 852
2. State Immunity from Federal Taxation .......................... 853
3. Federal Immunity from State Regulation ........................ 854
4. State Immunity from Federal Regulation .......................... 855

§ 20.3 Federalism Checks and Balances: Federal Power Trumps States .... 855
1. The Supremacy Clause and the Preemption of State Law .... 855
   1. Historical Overview of Preemption Doctrine ................. 855
   2. Modern Preemption Doctrine ............................... 858
2. Dormant Commerce Clause Review of State Economic Regulations ........................................ 863
   1. The Evolution of Standards for Dormant Commerce Clause Review ........................................ 863
      A. The Original Natural Law Era ............................ 863
      B. The Formalist Era ................................... 865
      C. The Holmesian Era .................................. 867
      D. The Instrumentalist Era ............................... 870
   2. Modern Standards for the Dormant Commerce Clause .. 873
      A. Basic Doctrine .................................... 873
      B. The Market Participant Exception ....................... 876
      C. New Areas for Dormant Commerce Clause Review ........................................ 878
3. Analysis of Dormant Commerce Clause Cases
   Generally ................................................. 880
4. Different Subject Areas of Dormant Commerce Clause Review ........................................ 883
   A. Commerce Clause Review of State Taxation ............... 883
   B. Requiring Business Operations to be Done in the Home State ........................................ 885
   C. Preserving Resources for In-State Consumption ............. 886
   D. Limits on Business Entry ................................ 888
3. Article IV, § 2 Privileges and Immunities Clause .............. 890
   1. Background History: The Natural Law Era ................. 890
   2. Modern Privileges and Immunities Clause Doctrine .... 892
4. Federal Common Law ............................................. 895
   1. Areas of Uniquely Federal Interest ......................... 899
      A. Rights and Obligations of the United States .......... 899
      B. Interstate and International Disputes ................... 900
      C. Admiralty and Maritime Cases ........................... 902
      D. Original Natural Law Era Doctrine of *Swift v. Tyson* ........................................ 903
   2. Congressionally Granted Power to Develop Law ............ 904
      A. Antitrust Laws ...................................... 904
      B. Laws Related to Collective Bargaining ................. 904
      C. Congressional Statutes that Incorporate Non-Federal Law ........................................ 905
      D. Issues of Procedure and Remedies ....................... 905
### § 20.4 Federalism Checks and Balances: State Regulations That Trump Federal Law Under the 21st Amendment

1. Relations Between the 21st Amendment and the Dormant Commerce Clause
2. Preemption of State Liquor Laws by Federal Law

### Sub-Part Two: Individual Rights Doctrines Generally

#### Chapter 21: Individual Rights Protection Under the Constitution

### § 21.1 The State Action Requirement

1. Introduction
2. Historical Development of the State Action Doctrine
   1. The Original Natural Law Era
   2. The Formalist Era
   3. The Holmesian Era
   4. The Instrumentalist Era
   5. The Modern Natural Law Era
   6. “State Action” Based Upon Laws That Repeal Existing Laws or Restrict Future Legal Change

### § 21.2 Structure of Individual Rights Doctrine Once State Action is Established

1. General Considerations
2. Means/Ends Reasoning in Categorical and Balancing Tests
   1. Means/End Reasoning in Balancing Tests Involving Elements to Meet
   2. Means/End Reasoning in Balancing Tests Involving Factors to Weigh
3. Effect of Burdens in Triggering Levels of Review
4. A Natural Law Focus on Making the Standards of Review More Analytically Coherent
   1. The Problem of Adopting Additional Kinds of Inquiries
   2. Problems of Mixing and Matching Levels of Scrutiny
   3. Acknowledging the Six Standards of Heightened Review Under the “Base Plus Six” Model Discussed At § 7.2.1
   4. The Issue of Jury Unpredictability in Application of Legal Doctrine
Chapter 22: Economic Rights: The Contracts and Taking Clauses

§ 22.1 The Contracts Clause
1. The Original Natural Law
2. The Formalist Era
3. The Holmesian Era
4. The Instrumentalist Era
5. The Modern Natural Law Era
6. Federal Impairment of Contracts

§ 22.2 The Takings Clause
1. The Original Natural Law Era
2. The Formalist Era
3. The Holmesian Era
4. The Instrumentalist Era
5. The Modern Natural Law Era
1. Standards of Review in Modern Takings Clause Cases
2. What Burdens Trigger Takings Clause Analysis
3. Exceptions to Takings Clause Analysis
4. Cases Involving Temporary Deprivations of Property Rights
6. An Overview and Review

Chapter 23: Non-Economic Individual Rights

§ 23.1 Civil Rights Protections: The Second, Third & Seventh Amendments & the Full Faith and Credit Clause of Article IV, § 1
1. The Second Amendment: Right To Bear Arms
2. The Third Amendment: Protection Against Quartering of Soldiers in Individuals’ Homes
3. The Seventh Amendment: Right to Jury Trial in Actions At Common Law
4. The Full Faith and Credit Clause

§ 23.2 Criminal Defendants’ Rights
1. The Fourth, Fifth, Sixth, and Eighth Amendments
1. The Fourth Amendment: Protections Against Unreasonable Searches and Seizures
2. The Fifth Amendment: Grand Jury Indictment, Double Jeopardy, Privilege Against Self-Incrimination, and Due Process of Law
   A. Requirement of Grand Jury Indictment
   B. Protection Against Double Jeopardy
   C. Privilege Against Self-Incrimination
   D. Requirement of Due Process of Law
3. The Sixth Amendment: Right to a Speedy and Public Trial by an Impartial Jury, Confrontation of Witnesses, and Assistance of Counsel
   A. Right to a Speedy and Public Trial by an
Impartial Jury ........................................ 1025
B. Right to Confrontation of Witnesses ........ 1028
C. Right to Compulsory Attendance of Witnesses and Assistance of Counsel .............. 1030
4. The Eighth Amendment: Protection Against Cruel and Unusual Punishment, Excessive Fines, and Excessive Bail ............................................. 1032
2. Article I, § 9 Criminal Defendants’ Rights & the Extradition Clause ........................................ 1037
1. Prohibition of Bills of Attainder ................. 1037
2. Prohibition on Ex Post Facto Laws .............. 1039
3. Right to Habeas Corpus .......................... 1041
4. The Extradition Clause .......................... 1043

Chapter 24: Constitutional Impact of the Ninth Amendment .................................................. 1044
§ 24.1 The Natural Law Approach .............................. 1044
§ 24.2 The Formalist Approach .............................. 1052
§ 24.3 The Holmesian Approach ............................ 1053
§ 24.4 The Instrumentalist Approach ....................... 1054

Sub-Part Three: Civil War Amendments and Due Process Generally .................................... 1056
Chapter 25: The Civil War Amendments Generally ................................................................. 1056
§ 25.1 The Thirteenth Amendment ............................. 1057
§ 25.2 The Fourteenth Amendment’s Citizenship Clause ................................................. 1069
§ 25.3 The Fourteenth Amendment’s Privileges or Immunities Clause ............................ 1071
§ 25.4 The Fifteenth Amendment’s Ban on Race Discrimination in Voting .................. 1077
Chapter 26: The Equal Protection Clause ................................................................. 1083
1. Equal Protection Standards of Review .............................................. 1086
   1. The Rational Basis Test .............................................. 1086
   2. Heightened Scrutiny Tests ............................................. 1090
2. Determining Whether Heightened Scrutiny Should Apply ........ 1095
   1. The Basic Guidelines for Heightened Scrutiny Today .................. 1095
   2. The Carolene Products Decision and Historical Notes on What Level of Scrutiny to Apply .................. 1098
3. The Burden of Proof and What Governmental Interests Can Be Considered Under Different Standards of Review .............................. 1101
4. What Issues are Questions of Law versus Questions of Fact ........ 1104
§ 26.2 Classifications Involving Strict Scrutiny ............................................. 1105
1. Racial, Ethnic, or National Origin Discrimination ............................................. 1105
1. Facial Discrimination Cases ........................................ 1105
   A. The Original Natural Law Era ............................... 1105
   B. The Formalist Era ............................................ 1106
   C. The Holmesian Era ............................................. 1110
   D. The Instrumentalist Era ....................................... 1111
   E. The Modern Natural Law Era ................................. 1113

3. Constitutional Law on Desegregation of the Public Schools ............. 1118
   A. An Overview .................................................. 1118
   B. Cases From the Instrumentalist Era ......................... 1121
      1. Step One: School Segregation Declared Unconstitutional .... 1121
      2. Step Two: Principles Developed to Guide Lower Courts in Finding Violations and Developing Remedies .......... 1123
      3. Step Three: Limits Placed on Remedial Orders ............ 1125
      4. Step Four: Initial Consideration of Concluding Desegregation Litigation . 1125
   C. The Modern Natural Law Era .................................. 1126

4. The Constitutionality of Affirmative Action Programs Based on Race .......................................... 1128
   A. Initial Approaches to Affirmative Action .................. 1128
   B. Post-Bakke Developments During the Instrumentalist Era .... 1131
   C. The Modern Natural Law Era ................................. 1133
   D. Affirmative Action in the Context of School Admissions Programs ................................ 1139

5. Racial Redistricting Cases ........................................ 1146

6. Racial Discrimination in the Context of the Criminal Justice System ........................................ 1151
   A. Peremptory Challenges Based on Race ...................... 1151
   B. Race Discrimination in Prison Management and Control ........ 1154

2. Classifications Disadvantaging Aliens ................................ 1155
1. Alienage Classifications in State Law ............................ 1155
   A. Classifications Applied to Legal Resident Aliens: Strict Scrutiny, with Political Function Exception Triggering Only Rational Review . 1155
   B. Classifications Applied to Illegal Aliens: Rational Review for Adults, Intermediate Review for Children Attending School ........ 1158

3. Classifications Discriminating on the Basis of Religion ............ 1161

Page 1648
§ 26.3 Classifications Involving Intermediate Scrutiny
  1. Gender Discrimination
     2. Gender Discrimination Cases After 1970: Movement to Intermediate Review
     3. Problems in Identifying Gender Discrimination
     4. Government Affirmative Action Programs Based on Gender
  2. Discrimination Based Upon Illegitimacy

§ 26.4 Classifications Involving Rational Basis Scrutiny
  2. Classifications Involving Wealth
  3. Classifications that Disadvantage Non-Resident Corporations
  4. Classifications Involving Age: Children or the Elderly
  5. Classifications Involving Physical or Mental Disabilities
  6. Classifications Involving Sexual Orientation

§ 26.5 Classifications that Abridge Fundamental Rights
  1. Right to Travel
  2. Access to Courts
  3. Right to Vote and Access to the Ballot
  4. No Fundamental Right of Equal Funding for Public Education

Chapter 27: The Due Process Clauses of the 5th and 14th Amendments

§ 27.1 Introduction to Substantive Due Process Doctrine
  1. Introduction to Fundamental Rights Doctrine
  2. Non-Fundamental Rights Doctrine
     1. Economic and Social Legislation Under the Due Process Clause
     2. The Birth, Life, and Death of the Irrebuttable Presumption Doctrine
     3. Unconstitutional Conditions Doctrine
     4. Unconstitutionality of Excessive Punitive Damages Awards

§ 27.2 Enumerated Fundamental Rights Under Substantive Due Process
  1. The Original Natural Law Era
  2. The Formalist Era
  3. The Holmesian Era
  4. The Instrumentalist Era
  5. The Modern Natural Law Era
     1. Selective Incorporation and the Modern Natural Law Era
     2. Non-Bill of Rights “Enumerated” Fundamental Rights and the Modern Natural Law Era
§ 27.3 Unenumerated Fundamental Rights Under Substantive Due Process . 1246
1. The Original Natural Law Era ........................................ 1247
2. The Formalist Era: Substantive Due Process was Developed,
   But No Distinction Was Made Between Economic and
   Personal Rights .................................................... 1248
   1. Fundamental Right of Liberty of Contract During
      the Formalist Era .............................................. 1248
   2. Fundamental Right to Acquire Useful Knowledge .......... 1254
   3. Fundamental Right to Marry, Establish a Home, and
      Raise Children ................................................. 1254
   4. Fundamental Right to Worship God and the Orderly
      Pursuit of Happiness .......................................... 1255
3. Modern Unenumerated Fundamental Rights Doctrine:
   Distinctions Drawn Between Economic and Personal Rights . 1255
   1. Right To Marry, Establish a Home, and Raise
      Children During the Modern Era ............................ 1258
      A. Right to Marry .............................................. 1258
      B. Right to Establish a Home ................................ 1259
      C. Right to Raise Children ................................. 1260
   2. Right to Procreate and Right Not to Procreate ............ 1263
   3. Right Not to Procreate Through Access to Abortion ....... 1267
   4. Disclosure Privacy versus Decisional Privacy Rights . 1272
4. Modern Natural Law Era Decisions Regarding Fundamental
   Rights Analysis .................................................... 1273
   1. Decisional Privacy Regarding Abortion Rights .......... 1273
   2. Decisional Privacy Regarding Matters of Sexual
      Activity ............................................................ 1279
   3. Decisional Privacy Regarding Rights to Refuse
      Medical Treatment or To Die .................................. 1284
   4. Decisional Privacy and Curfew Statutes .................... 1287
§ 27.4 Procedural Due Process: Deprivations of Life, Liberty or Property
   Interests, and Determining What Process is Due ............. 1287
1. Determining When a Deprivation Has Occurred ............. 1288
2. Determining Life, Liberty, or Property Interests .......... 1291
   1. Defining Persons Under Due Process Analysis ............. 1291
   2. Life Interests Under Due Process Analysis ............... 1292
   3. Liberty Interests Under Due Process Analysis .......... 1293
   4. Property Interests Under Due Process Analysis .......... 1295
3. Determining What Process is Due ............................... 1298
   1. Void for Vagueness Challenges ............................ 1298
   2. The Mathews v. Eldridge Test ............................. 1299
4. Case Examples of Procedural Due Process Analysis ........ 1302
   1. Mental Hospital Commitment Cases ....................... 1303
   2. Parental Rights Termination Cases ....................... 1304
   3. Government Entitlement Cases ............................ 1305
   4. Workplace Cases ........................................... 1306
   5. License Termination or Utility Termination Cases ...... 1307
6. Creditor/Debtor Cases ........................................ 1307
7. School Cases ............................................. 1309
8. Rights of Detained Persons .................................. 1310
9. Delegation of Government Functions to Private Parties ........................................... 1321
10. Legislative Adoption of Rules Drafted by Private Parties ........................................ 1322

Chapter 28: Congressional Power Under the Civil War Amendments .................. 1324

§ 28.1 Introduction to Congressional Power Under the Civil War Amendments ........ 1324
§ 28.2 Congressional Power to Enforce the 13th Amendment .......................... 1328
§ 28.3 Congressional Power to Enforce the 14th Amendment .......................... 1330
§ 28.4 Congressional Power to Enforce the 15th Amendment .......................... 1337

Sub-Part Four: The First Amendment ........................................ 1340

Chapter 29: Freedom of Speech and of the Press ........................................ 1341

§ 29.1 Observations About First Amendment Doctrines Prior to the Modern Era .... 1341
1. The Original Natural Law Era .................................. 1341
2. The Formalist Era ............................................ 1342
3. The Holmesian Era ........................................... 1347
4. The Instrumentalist Era ........................................ 1351
§ 29.2 Introduction to the Structure of Free Speech Doctrine in the Modern Era . 1354
§ 29.3 Government Regulations of Speech versus Regulations of Conduct or Spending on Speech to Which Standard First Amendment Doctrine Does Not Apply ..... 1359
1. Governmental Regulations of Speech versus Regulations of Conduct .......... 1359
2. Governmental Regulations of Speech versus Spending on Speech .............. 1360
§ 29.4 Content-Based versus Content-Neutral Regulations of Speech in Public Forums or on Private Property ........................................ 1363
1. The Content-Based versus Content-Neutral Distinction ....................... 1363
2. Kinds of Content-Based Regulations: Viewpoint Discrimination versus Non-Viewpoint or Subject-Matter Only Discrimination ......................... 1367
3. Strict Scrutiny Review for Content-Based Regulations of Speech .............. 1369
1. Strict Scrutiny for Viewpoint Discrimination Cases ................................ 1369
2. Strict Scrutiny for Content-Based, Non-Viewpoint Discrimination Cases .... 1369

Page 1651
4. Intermediate Review for Content-Neutral Regulations of Speech ........................................... 1371
   1. Content-Neutral Secondary Effects Cases .................................................. 1371
   2. Content-Neutral Time, Place, or Manner Cases ....................................... 1377
   3. Recent Controversy Over How to Apply The Intermediate Scrutiny Test in Cases Involving Secondary Effects and Time, Place, or Manner Cases ........................................... 1380

§ 29.5 The Public Versus Non-Public Forum Distinction ........................................... 1386
   1. Classic Statement of the Public/Non-Public Forum Distinction .................. 1386
   2. Modern Development of the Public/Non-Public Forum Distinction .................. 1390

§ 29.6 Specialized First Amendment Topics under Current Legal Standards 1393
   1. Process-Based First Amendment Topics ................................................. 1393
      1. Prior Restraints on Speech ........................................... 1393
      2. Content-Neutral Injunctions on Speech ........................................ 1396
      3. Government Fees or Permits to Speak ........................................ 1398
      4. Vagueness Challenges ................................................. 1401
      5. Substantial Overbreadth Challenges .......................................... 1403
   2. Specialized Subject-Areas Under the First Amendment .......................... 1407
      1. Coerced Expression or Membership in a Group .................................. 1407
      2. The Government as Educator ............................................. 1413
      3. Invasion of Privacy .................................................. 1422
      4. Balancing Speech and Fair Trial Rights .................................... 1424
      5. Protecting the Press from Taxation That Threatens to Suppress Ideas ........... 1428

Chapter 30: Exceptions to Standard Free Speech Doctrine ........................................... 1431

§ 30.1 Content-Based Regulations of “Unprotected” Speech That Trigger No Further First Amendment Review Except for the Prescription on Viewpoint Discrimination ........................................... 1431
   1. Advocacy of Illegal Conduct ................................................. 1433
      1. Classic Cases of Advocacy of Illegal Conduct .................................. 1433
      2. Cases Involving True Threats ............................................. 1438
      3. Hate Crimes Legislation .................................................. 1442
      4. Hate Speech Legislation .................................................. 1444
   2. Fighting Words .................................................. 1445
   3. Obscene Speech .................................................. 1448
   4. Indecent Material Involving Children ........................................... 1455
      1. Pornography Involving Use or Depictions of Children ...................... 1456
      2. Indecent or Patently Offensive Material With Children in the Audience .......... 1457
§ 30.2 Content-Based Regulations That Trigger Versions of Rational Basis Review, Rather Than Strict Scrutiny ................................................. 1464
  1. Second-Order Rational Review ............................................. 1464
     1. Defamation and Related Torts ........................................ 1464
        A. Classic Defamation Cases .................................. 1465
        B. False Light Cases ....................................... 1468
        C. Invasion of Privacy by Truth .................................. 1469
        D. Miscellaneous Other Tort or Contract Theories .......... 1471
  2. First Amendment Rights of Prisoners .................................. 1472
  2. Third-Order Rational Review: The Government as Employer .... 1472
     1. Government Attempts to Regulate Speech of Public Employees ................................................................. 1472
     2. Government Attempts to Regulate Political Activities of Government Employees ............................................. 1479
§ 30.3 Content-Based Regulations That Trigger Versions of Intermediate Scrutiny, Rather Than Strict Scrutiny .............................. 1483
  1. Basic Intermediate Scrutiny: The Government as Trustee of the Airwaves Regarding Radio and Television Regulation ............................................. 1483
  2. Intermediate Scrutiny with Bite: Commercial Speech .......... 1487
§ 30.4 Content-Based Regulations That Trigger Their Own Kind of Strict Scrutiny ................................................................. 1496
  1. Loose Strict Scrutiny Standards: The Racial Redistricting Cases and Possibly Cable/Satellite Television Regulation ............................................. 1496
  2. Basic Strict Scrutiny: Campaign Financing and Speech Regarding Elections ................................................................. 1497
     1. Speech Relating to Campaign Financing: Contributions and Expenditures ........................................ 1499
     2. Disclosure Requirements in Contributions, Expenditures, and the Choice and Election of Candidates ........................................ 1510
     3. Speech Regulating the Choice and Election of Candidates for Legislative and Executive Offices .......... 1513
     4. Speech Regulating the Choice and Election of Judges .... 1516

Chapter 31: Freedom of Association and Assembly ..................................... 1523

§ 31.1 Freedom to Assemble and Petition the Government for Grievances . 1523
§ 31.2 Freedom of Association ...................................................... 1524
  1. General Considerations .................................................. 1524
  2. Policies Aimed at Eliminating Discrimination ................. 1525
  3. Policies Concerning Membership in Groups Alleged to Pose a Threat of Violent Action or Other Harmful Conduct .......... 1530
  4. Policies Concerning Elections ........................................... 1533
Chapter 32: The Religion Clauses of the First Amendment

§ 32.1 The Establishment Clause

1. Introduction

2. The Development of Establishment Clause Doctrine
   1. The Natural Law Approach
   2. The Formalist Approach
   3. The Holmesian Approach
   4. The Instrumentalist Approach

3. Specific Examples of Establishment Clause Analysis
   1. The School Cases
      A. The Instrumentalist Era
      B. The Modern Natural Law Era
         1) The School Aid Cases
         2) Religious Influence Within the Public Schools
   2. The Display Cases
      A. The Instrumentalist Era
      B. The Modern Natural Law Era

4. Establishment Clause: General Thoughts For the Future

§ 32.2 The Free Exercise Clause

1. Introduction

2. Historical Development of Free Exercise Doctrine
   1. The Original Natural Law Era
   2. The Formalist Era
   3. The Holmesian Era
   4. The Instrumentalist Era
   5. The Modern Natural Law Era
# TABLE OF CASES

[Grateful thanks to R.K. Van Every for preparing this table.]

The Table Contains Links to the First Name of Cited Cases

[Click on a letter to be taken to cases whose first name begins with that letter]

**A**

**ABELL, CHARLES S.**
A functional sharing of powers approach to the separation of powers, 631

**ABRAHAM, HENRY J.**
Discussion of Supreme Court nominations, 230

**ABRAM, SUZANNE L.**
Federal court determination of the meaning of a state constitutional provision, 591

**ABRAMSON, HOWLAND W.**
Judicial campaign speech and the ABA Model Code revisions after *White*, 1519

**ABRAMSON, LESLIE W.**
Discussion of problems regarding the disqualification of judges, 239
Discussion of problems regarding recusal of judges, 240
ACKERMAN, BRUCE
Arguing that the Court’s change in constitutional interpretation in 1937 was justified as a “constitutional moment”, 723
Emergence of a modern version of natural law, via liberalism, 412, 414
Listed as a supporter of a “deliberative democracy” account of public decisionmaking, 496
Noting unusual circumstances surrounding ratification of the Civil War Amendments, 1057

ACHTENBERG, DAVID
Court decisions in the 1800s frustrated congressional efforts to encourage black turnout, 1327

ADAMS, JON
Noting some state constitutions as interpreted by state supreme courts require more protections to criminal defendants than required under the United States Constitution, 1013

ADEN, STEVEN J.
A constitutional analysis of the USA Patriot Act and the Justice Departments Initiatives, 1316

ALDKIEWICZ, MAJOR JAN E.
Discussing due process rights for non-United States military personnel when tried in military courts, 1310

ALEINIKOFF, ALEXANDER
Balancing tests, always involve a cost-benefit analysis of means and ends, 72, 928
may undermine predictable development of the law, 73
challenge judges to evaluate costs and benefits in a principled way, 75
involve a head-to-head comparison of competing interests, 179
tend to be disfavored by analytic approaches to law, favored by functional approaches, 73-74
Discussing categorical rule that child pornography is not protected by the First Amendment, 73
Discussing examples of balancing tests under constitutional law, 73, 180, 932

ALEXANDER, LARRY
General discussion of interpretation issues from the perspectives of formalism/literalism, Holmesian/intentionalism, natural law, and instrumentalism/pluralism, 58
The Court has not provided coherent guidance on the unconstitutional conditions doctrine, 1228

ALFORD, ROGER P.
Discussion of cross-national citations by courts involved in international adjudication, 165, 332, 572

ALGER, JONATHAN
The need to marshal evidence that diversity is related to effective education, 1142
ALITO, JUSTICE SAMUEL A.
As replacing Justice O’Connor in 2006, 6, 11, 423, 626-28, 1626
Judicial decisionmaking style, see Name Index entry, “Justices, Formalist style”

ALLEN, RONALD J.
Burdens of proof and evidentiary devices in the criminal justice system, 1004
Examples of evidence that is testimonial or non-testimonial under the Fifth Amendment privilege against self-incrimination, 1020

ALONSO, JOSEPH BRUCE
Under international law, valid treaty obligations are superior to domestic constitutional law, 751

AMAR, AKHIL REED
Arguing for a distinction between “cases” and “controversies”, 574
Eleventh Amendment immunity is limited to diversity jurisdiction, 610
Historical evidence shows that the Privileges and Immunities Clause of the 14th Amendment was intended to protect all rights formerly protected by state citizenship, 1071, 1087
Madison’s changing views on validity of bank legislation, based on government practice, 160, 420
The prohibition and mandamus provisions of § 13 of the Judiciary Act of 1789 merely confirmed judicial power, 579
Quoting Madison regarding value of legislative and executive practice to show meaning, 120, 160
Quoting President Jackson’s “apocryphal” response to *Worcester v. Georgia*, 168
Use of legislative and executive practice to show meaning at the time of ratification, 119
Views on,
  text versus purpose in constitutional interpretation, 104
  using historical sources, 114

AMBACH, KIRSTEN LELA
Evidence gained by means of a violation of *Miranda* is not admissible in court, 1018

ANDERSON, LEANNA M.
Congressional power to limit executive orders of the President, 789

ANDERSON, ROBERT, IV
Discussing whether in implementing treaties Congress can pass a law it could not otherwise enact, 752

ANDREWS, HALEY A.
Supreme Court response to procedures improvised by the executive in the war on terror, 1320

ANDREWS, LORI B.
Discrimination against women in employment and otherwise, 1163
ANSOLABEHERE, STEPHEN
Pre-Baker v. Carr cases supported Frankfurter that reappointment is a political question, 319

ANSON, THOMAS K.
Calls for further development of dormant commerce clause theory, 878

ARAIZA, WILLIAM D.
Criticism of Boerne v. Flores for imposing on Congress a burden to show “congruence and proportionality” under § 5 of the 14th Amendment, 1336

ARISTOTLE
As natural law theorist in general, 13, 55, 58, 261, 273, 355, 379
Silver bowl example of Aristotle’s theory of causes, 14, 99, 134, 173, 241, 277
Moral reasoning as a search for “the good” which is the aim of action, 505
Theory of four causes: formal, material, efficient, and final, 14-15, 21, 29
Use of his theory in this book, 16-18
View that objects, as well as people, have purposes, 517
View that some men are by nature slaves, 263-64, 273, 506

ARMACOST, BARBARA E.
Criticism of Paul v. Davis on policy grounds, 1293

ARMOUR, JODY DAVID
Intergenerational transmission of inequality continues to shape American society, 1143

AUSNESS, RICHARD C.
Issues on preemption in the context of state tort law, 863

AUSTIN, JOHN
Adopting the positivist view that law and morals are separate, 26, 36, 260, 270, 1619
Supporting a formalist model of judicial interpretation, 173, 406, 481

AYNES, RICHARD L.
Analysis of § 3 and § 4 of the 14th Amendment, 1065
§ 2 of the 15th Amendment was intended to prevent excessive Southern political power, 1078
Why the 14th Amendment should be interpreted from a natural law perspective, 1106

B

BAADE, HANS
Discussing the Enlightenment natural law tradition, 412
Formalists focus on framers’ specific intent rather than general legal concepts, 362
Natural law style of interpretation uses both plain meaning and purpose, 358
Historical evidence of constitutional meaning can be outweighed by other sources, 711
Refusal to consider legislative history gradually eliminated during the 19th century, 150, 360
Use of *The Federalist Papers*, but not legislative history, in original constitutional interpretation, 150

**BABCOCK, CHARLES L.**
The right to trial by jury in libel cases, 995

**BABINGTON, CHARLES**
Discussion of recent confirmation of federal judges, 233

**BACH, LAURA J.**
Regulation of home schooling by the states; effect of rules based on religious belief, 1261, 1615

**BALKIN, J.M.**
Madison’s changing views on validity of bank legislation, based on government practice, 160, 420
Quoting Madison regarding value of legislative and executive practice to show meaning, 120, 160
Quoting President Jackson’s “apocryphal” response to *Worcester v. Georgia*, 168
Use of legislative and executive practice to show meaning at the time of ratification, 119
Views on,
  *Plessy* and *Lochner* being wrong the day they were decided, 217
  text versus purpose in constitutional interpretation, 104
  using historical sources, 114

**BAKER, BRUCE D.**
A fundamental right to education found by state courts leading to funding consequences, 1213

**BAKER, E. EDWIN**
Discussion and critique of Rawls’ “difference principle”, 512

**BAKER, JOHN S., Jr.**
Questions federal hate crime legislation as beyond the Commerce Clause power, 735

**BAKER, LYNN A.**
Criticizes allowing conditions on federal spending going beyond the Commerce Clause, 744
Questions giving Congress virtually unreviewable power under the *Dole* case, 744

BRAND, RONALD A.
Due Process limits on judgments reached under international law, 598

BRANDEIS, JUSTICE LOUIS
Discussing importance of precedent, but willingness to overrule precedent based on experience, 85, 205, 313
In general, 230, 440, 1162, 1343
Judicial decisionmaking style, see Name Index entry, “Justices, Holmesian style”
Views on,
   freedom of speech, 255-56, 317, 1345-48, 1351, 1353, 1434
   judicial restraint, 307, 564, 633, 637, 691

BRAUER, MATTHEW, J.
Teaching “Intelligent Design” in public school would violate the Lemon test, 1584

BREEN, JOHN M.
Noting Llewellyn’s focus on statutory purpose and overall context, 51

BRENNAN, TERRY
One natural law tradition says supplement text by outside principles if framers so intended, 371

BRENNAN, JUSTICE WILLIAM, Jr.
Acceptance of Michigan v. Long as an appropriate balance of federalism concerns, 590
Argues for a broad concept of standing so judges can give definitive interpretations, 638
Courts have a special obligation to protect the disadvantaged and unempowered, 110
Courts should focus on the Bill of Rights and other laws protecting individual freedom, 330
Discussion of state courts developing state constitutional law, 590
Discussion of the Court adding new constitutional rights between 1961-1986, 207-08
Judicial decisionmaking style, see Name Index entry, “Justices, Instrumentalist style”
No presumption should exist against resolving text ambiguities against a claim of right, 158, 331
Non-originalists may consider values that the community eventually will hold, 273
Problems beset efforts to determine subjective intent of the framers on specific questions, 326
Statement rejecting a “Platonic Guardian” model of judicial interpretation, 304
Summary of increased protection for civil liberties after 1954, 445
Support for a “living” Constitution model of interpretation, 328
Support for use of international sources to aid constitutional interpretation, 332
The Constitution envisions rights to form and express political judgments, 110
The Constitution was a bold commitment to dignity protected through law, 53, 110, 121, 158, 330, 1353
The Constitution was intended to create a new society, not to preserve one that existed, 327
Use of legislative history to support policy-focused interpretation of a statute, 51-52

BRENNER, SUSAN W.
The particularity requirement of the Fourth Amendment applied to search of materials on a computer, 1011

BREST, PAUL
Madison’s changing views on validity of bank legislation, based on government practice, 160, 420
Quoting Madison regarding value of legislative and executive practice to show meaning, 120, 160
Quoting President Jackson’s “apocryphal” response to Worcester v. Georgia, 168
Use of legislative and executive practice to show meaning at the time of ratification, 119
Views on,
text versus purpose in constitutional interpretation, 104
using historical sources, 114

BREWER, SCOTT
Discussing Professor Randall Kennedy’s view that law requires uncoerced discussion by all, 414

BREYER, JUSTICE STEPHEN G.
Approach to interpretation called a “practical objective” approach, 137, 139, 304, 326
Courts should consider the effects of government action when interpreting the Constitution, 291-92
Five kinds of cases in which legislative history is particularly useful, 154
Instrumentalist views expressed in Active Liberty: Interpreting our Democratic Constitution, 351
Judges must be sensitive to purposes and effects of government action, 129
Judicial decisionmaking style, see Name Index entry, “Justices, Instrumentalist style”
Legislative history can be useful to determine legislative intent, rejecting “New Textualism” model
of statutory interpretation, 136, 153-54
Support for using international sources to aid constitutional interpretation, 164, 332
Usually there is a discoverable intent in terms of purpose rather than motive, 135-36

BRIFFAULT, RICHARD
Discussion of manageable standards in the context of gerrymandering, 692

BRILMAYER, LEA
Evolution to, and evaluation of, a factor-weighing approach in choice of law cases, 998

BROCK, JAMES
Formalists emphasize the literal, plain meaning of words, not purposes, 39, 279, 357
BRODER, DAVID S.
Republican behavior during the campaign finance debate in 2001 was hypocritical, 461

FOX, JAMES W. JR.,
Enforcement provisions of the Civil War Amendments an attempt by Congress to reserve interpretive power for itself, 1324-25
The Civil Rights Cases on 1883 were a misreading of the 14th Amendment, 1326

FRANK, JEROME
Quip that decisions may be based on what a judge had for breakfast, 48

FRANKFURTER, JUSTICE FELIX
Avoid subjective inquiry and interpret in light of objective manifestations of purpose, 137, 304
Deference to legislative and executive practice in interpreting the Constitution, 121, 160-61, 568, 634, 691, 778-79
Explains Justice Cardozo’s moderate instrumentalist approach to statutory interpretation, 328
Holmes supported resort to statutory purposes and legislative history in addition to “pure logic”, 410
Holmes’ theory of interpretation is a search for the proliferation of purpose, 45, 141-42
Importance of reading a statute carefully in statutory interpretation, 45
Judicial decisionmaking style, see Name Index entry, “Justices, Holmesian style”
Noting that the Constitution makes no distinction between fundamental and non-fundamental rights, 1100
Rejects writing his private notions of policy into the Constitution or a statute, 314
Rules of interpretation are really axioms of experience, 305
The most important purpose is what is embedded in the statute, 45, 142, 158, 308-09
“Ultimate touchstone” of constitutionality is the Constitution itself, not court precedents, 85
Use of general concepts in constitutional interpretation, 158-59, 300, 310

FREEDMAN, ERIC M.
Discussing drafting of the Articles of Confederation, 817-18
Discussing whether the President can be indicted while in office, 844

FREEMAN, JOANNE B.
Discussion of Jefferson/Burr electoral college issues, 829

FREEMAN, JODY
Will committee oversight reflect accurately the view of Congress as a whole?, 796

FRICKEY, PHILIP P.
Citing to provisions of § 13 of the Judiciary Act of 1789, 576
Denial of citizenship rights to Native Americans by the federal government, 736-38
Early natural law opinions relied more on text than when legislative history came to be used during the 19th century, 360
Framers, having natural law beliefs, intended constitutional answers to develop over time, 368
Framers’ specific intent may not have been to provide hard-and-fast answers to all constitutional issues, 122, 156, 362
If framers made specific, detailed choices, judges should remain focused on them, 361-62
Instrumentalist approach to statutory interpretation sometimes narrows a statute’s meaning, 53
Some pragmatists achieve results at the center of American politics, 343
Views of the Legal Process school regarding statutory interpretation, 51

**FRIED, CHARLES**
British precedents, without a single majority opinion, stand for narrow results, 93
Common law tradition called for reasoned elaboration of law on narrow grounds, 224
Framers and ratifiers were grounded in traditions of the Anglo-American system, 368
How rules can be guided by broader standards, 82
Quoting Lord Coke on judicial competence and the “artificial reason” of the law, 244
Practical reasonableness is a hallmark of the common law, 188

**FRIEDMAN, BARRY**
Judicial review, for instrumentalists, should aid participatory governance, 385

**FRIENDLY, HENRY**
Notes limits on *Erie* where the United States seeks redress for federal proprietary transactions, 900

Discussing “indecency” restrictions on sales to minors of material protected in regard to adults, 1455

GREENE, HILLARY
Use of historically unenforced statutes in non-criminal litigation, 1281

GREENHOUSE, LINDA
In confirmation hearings, Justice Souter said the rule of law requires adherence to precedents, 377
Citing Justice Blackmun that use of irrebuttable presumption doctrine in a gender discrimination
cases perhaps reflected an unwillingness to apply heightened scrutiny prior to 1976, 1227
Citing Justice Scalia on rejecting the concept of the “living” Constitution, 41
Noting Justice Scalia’s recusal in Newdow after speaking on the Ninth Circuit’s ruling in the case, 239

GRESSMAN, EUGENE
Discussing aspects of the Supreme Court decisionmaking process, including certiorari, 235

GREY, THOMAS C.
Description of formalism, 36
Difference between,
   formalism, natural law, and instrumentalism, 33
   Holmesian interpretation and instrumentalism, 34
Chief Justice Marshall’s natural law style and Llewellyn’s “Grand Style”, 33
Discussing whether natural law not embedded in Constitution should affect interpretation, 370
Formalism lingered on the Supreme Court during the 1920s and 1930s, 410 Holmes, 410
as a pragmatist, 45
described as following a pragmatic instrumentalist approach, 43, 45
described as responsive to social conditions, 41
Increasing use in judicial review of citations that cross national lines, 571-72
Langdell, 571-72
as adopting an analytic approach toward law, 22
as adopting theory of common law development stressing deduction, 68-69
Lochner identified as a blend of formalism and natural law, 34

GRIFFIN, STEPHEN M.
Proposing new theory of protection individual rights without the current levels of review, 188
Reasons to be skeptical of judicial review, 568
Scrap heightened scrutiny so race-based affirmative action will not so be tested, 1143

GROSS, JARED S.
Discussing presidential power under the Taft-Hartley Act, 780

GUIRGUIS, MAX
When electronic visual surveillance constitutes a search, 1011

GUNTER, GERALD
Opposes Bickel’s “passive virtues” theory on judicial refusal to reach decisions on the merits, 634

GUTMANN, AMY
Discussing a “deliberative democracy” account of public decisionmaking, 495-96

GUTTMAN, DANIEL
Discussing government delegation of power by “contracting out”, 777

H

HACKETT, ROSALIND I.J.
Noting religious faith of President George W. Bush, 456

HALL, KERMIT L.
From ratification until the Civil War,
judges in the early 1800s fashioned doctrines that encouraged private business, 408
Hamilton’s program reflected a Federalist interest in strong pro-business government, 430
Marshall might have been impeached had Justice Chase been convicted of his impeachment, 559
more than half state constitutions were revised by 1860 to avoid too much involvement with
private industry, 432
natural law and social contract theories were behind the Constitution, 56
regulation of economic activity prior to the Civil War was primarily done by states, 714
southern states got substantially what they wanted in pre-Civil War legislation, 432
the story of *McCulloch v. Maryland*, 706
From the Civil War through the Great Depression,
between 1917 and 1945, legal culture was shaped by racism, nativism, and security hysteria, 443
Democrats elected only two Presidents between 1873 and 1937, 434
discussing Court protection of business and promoting traditional moral values during the
formalist era, 435
few federal business regulations were passed until the Interstate Commerce Act of 1887, 436
sociological jurisprudence gained adherents in the early 1900s, 409
the Great Depression was the catalyst for liberal legalism and instrumentalism, 406
the Progressive Movement of the 1880s continued into the 1920s, 442
Post-Great Depression,
from 1937-1954, the Court tended to defer to decisions reflecting dominant groups in
society, 410, 443, 445
instrumentalism affected many areas of common-law, statutory interpretation, and
constitutional law post-World War II, 410-11, 446

**HALL, W. WENDELL**
Standards for appellate review of findings of fact, 83

**HALLEY, JANET E.**
Discussion of the appropriate level of review for classifications involving sexual orientation, 1192

**HAMILTON, ALEXANDER**
As co-author of *The Federalist Papers*, 115, 549
As delegate to the Annapolis Convention in 1786, 703, 819
As member of the Federalist Party, 449, 828-29
Called a Deist, 1602
Discussing presidential recess appointments, 803
Supporting strong view of executive power, 149, 782
Supporting strong view of federal economic regulatory power, including power to incorporate a
national bank, 176-77, 430, 705-07, 1048
Supporting natural law model of interpretation, 165, 270-71, 384, 497
Views on,
commandeering of states, 221, 761
judicial review, 168, 196, 570
state sovereign immunity, 387-89, 599, 611-13, 615
HAMMACK, SCOTT
Threatening speech on the internet: the need to modify the Courts’ approach, 1441

HANAKAHI, WENDY F.
An evaluation of teaching “intelligent design” in public school classrooms, 1584-85

HAND, JUDGE LEARNED
Adoption of objective approach to contract interpretation, 42
Discussion of Hand’s balancing test to determine negligence in tort law, 72
Identified as a Holmesian, 34, 303
Interpret documents to prevent defeat of the venture at hand, 142, 304-05
Rejects formalist literalism in favor of Holmesian resort to purpose in statutory interpretation, 45, 140-41, 280
Rejects having judges in the role of Platonic Guardians, 370
View on use of legislative history in statutory interpretation, 308
Views on freedom of speech, 1345, 1351, 1434, 1449

HANDLER, CAROL E.
Use of the Preamble in constitutional interpretation, 105, 700

HANDLER, MILTON
Use of the Preamble in constitutional interpretation, 105, 700

Discussing state constitutional rights to a jury trial, 995

HOLLOWELL, KELLY J.
Arguing that a fetus containing a complete genetic set of human DNA makes it a person, 521

HOLMES, JUSTICE OLIVER WENDELL, Jr.
As author of The Common Law, 11, 261
Ask what words mean in the mouth of a normal speaker in the circumstances, 42, 137, 304
Criticizing Langdell’s rejection of the mailbox rule, 37
Difference between analytic and functional approaches to law, 21-22
General purpose is more important for interpretation than any rule of grammar or logic, 31, 44-45, 140, 171, 304
It is revolting to have no better reason for a rule than it was laid down long ago, 529
Judicial decisionmaking style, see Name Index entry, “Justices, Holmesian style”
Judicial philosophy,
as pragmatic positivist, 31, 41-46
important of deferring to legislative and executive practice, 6, 12, 43-44, 46, 160-61, 310-11
importance of objective standards in the law to promote certainty, 42
importance of stare decisis, 42, 88, 205-07, 312-13
in general, 6, 12, 41-46
Laws unconstitutional only if clearly so, given attitude of deference to government, 12, 46, 146, 307
on judges legislating “interstitially”, exercising the sovereign prerogative of choice, 48
preference for issues phrased as rules of law, 83
preference for rules over standards, 79, 81, 191
rejecting natural law, 43, 58

Page 1762
rejecting subjective theory of contract interpretation in favor of objective theory, 42
statutory interpretation based on objective meaning, not legislature’s subjective intent, 42
strict construction of constitutional provisions regarding individual rights, 12, 46
Law develops through many generations, 11, 1619
On First Amendment law permitting regulation of shouting “fire” in a crowded theater, 73
Sound law should correspond to the feelings and demands of the community, 41, 306
The life of law is experience rather than logic, 41, 44, 303
The most far reaching form of power is not money; it is ideas, 137-38
Use of statistics, economics, and science in the development of law, 24-25
Views,
on the prophecies of what the courts will do in fact is the law, 44
as consistent with the Realist Movement, 32, 409-10, 417
different from those of Llewellyn’s instrumentalism, 32, 45-46
on considering law from the perspective of the “bad man”, 44

HORNADAY, G. RANDAL
Effects of the Fugitive Slave Law of 1850, 1059
How Dred Scott reflected a progression in precedents and developments in Southern states, 1061

HORWITZ, MORTON J.
Justices in the 1900s became more sensitive to the consequences of rules, 406-07
Pre-Civil War judges resorted to economic natural law arguments, per Adam Smith, 407-08

HOWE, MARK DEWOLFE
Holmes as a skeptic in matters of faith, 43
Noting Holmes’ view of the importance of objective standards in the law to promote certainty, 42

HOY, DAVID COUZENS
Suggestion that all interpretation is non-interpretive, 126

HUHN, WILSON R.
A taxonomy of arguments used in legal reasoning, 102
Noting Kohlberg’s belief in Stage 6 rational principles of justice, 494
Discusses shift from the concrete reasoning of formalism to formal operational thought, 483
Discussing whether Kohlberg’s theories adequately reflect a feminine voice in morality, 497-98, 500
Discussing factor analysis to judge validity of laws that are content-based and content-neutral, 1365

HUME, DAVID
Discussion of dichotomy between “is” and “ought”, 515
In general, 265, 267, 269, 272, 510
 Rejects Hobbes’ rational self-interest as a basis for moral reasoning, 510
HURD, HEIDI M.
Holmes/Cardozo dispute over using rules or standards regarding duties of auto drivers, 79, 192
Noting Holmes’ view that as standards of reasonable behavior become clear, judges should decide them as questions of law, 83

HURST, J. WILLARD
Most regulation of business in the 1800s was done by the states, 432, 714
Law is functional and always enmeshed in particular contexts, 22

HYDORN, ANNE C.
Does the constitutional right to privacy prevent forced disclosure of sexual orientation?, 1284

IDEA, ALLAN
Strict separation theory challenged on structural, historical, practice, and precedent grounds, 773

IEYOUB, RICHARD P.
States may assert citizens’ rights when their interest are germane to state functions, 667

IRAOLA, ROBERTO
Discussion on the constitutionality of the federal DNA act, 1009

ISRAEL, JEROLD H.
Burdens of proof in the criminal justice system regarding defendant’s rights, 1004
Co-author of a treatise on criminal law procedure, 1002

ISSACHAROFF, SAMUEL
Pre-Baker v. Carr cases supported Frankfurter that reappointment is a political question, 319

ISSACSON, WALTER
Benjamin Franklin said that religious beliefs helped most persons avoid self-centered behavior, 1599

ISSERLES, MARC E.
Discussing two kinds of facial challenges, “overbreadth” and “valid rule”, 693

JACKSON, JEFFREY D.
History surrounding adoption of the Constitution’s provisions on war, 787
Theory on what was “war” at the time of the framing, 746-47
JACKSON, VICKI C.
The unitary model of sovereignty in the French Revolution, 112
Discussion of a global comparison perspective on framers’ choices or to find sound policy, 332

JAFFE, LOUIS
Early standing cases spoke of the common law “cause of action”, 627

JAY, STEWART
In the 1800s, the Court decided in *Swift v. Tyson* there was a general federal common law, 896-97

JAY, JOHN
As Chief Justice of the United States Supreme Court, 165, 627, 901
As co-author of *The Federalist Papers*, 115
As member of the Federalist Party, 460
Called a Deist, 1602
In general, 782, 818, 828

JEFFERSON, THOMAS
Applying a formalist model of interpretation to the constitutionality of a national bank, 175-78, 705-07, 709, 1048
As supporting a formalist, static model of interpretation, 68, 97, 138, 165-66, 174-78, 261, 270-71, 287, 497, 538
Called a Deist, 1541, 1602
Draft of the Kentucky Resolution of 1798, 553
*Marbury v. Madison* and, 558-59, 577-78, 581
On importance of,
   Bill of Rights, 986
   education to advance liberty, 492
   religious liberty, 95, 255, 300, 310, 389, 1539, 1541, 1549, 1598, 1602
On not being prepared for appointment of women to public life, 156-57, 497, 528
On need to formally amend the Constitution to deal with questionable constitutional acts, rejecting
   creative judicial interpretation, 178, 292
On the initial and final drafts of the Declaration of Independence, 487-88, 1050
Views on,
   “sophistry” of Chief Justice Marshall, 174-75
   supporting power of legislative versus executive branch, 149, 299
   supporting states’ rights, 147, 299, 431-32, 553, 611, 701-02, 705, 754
   supporting tripartite model of judicial review, 556, 558
View that “earth belongs in usufruct to the living”, 68
View that “In every country and in every age, the Priest has been hostile to liberty”, 538
JEFFREY, SHARON
Discussing what acts interfere with the Sixth Amendment right to effective counsel, 1032

JEFFRIES, JOHN C., Jr.
Discussing consequences of banning monetary damages relief against states and state agencies, in favor of prospective injunctive relief, 697
Irrebuttable presumption analysis is a dead letter in constitutional law today, 1227
Pervasive anti-Catholicism in the 19th and early 20th century, 1547-48
Presumptions and burdens of proof in the criminal justice system, 1004

JOHNSON, CATHERINE B.
Discussing hate speech codes on campus and how to stop hate without stifling speech, 1444

JOHNSON, GLEN
Discussion of candidate views on taxes during the 2000 election, 460

JOHNSON, SCOTT P.
The nature of, and public opinion and political limitations on, presidential pardon power, 792

JOHNSON, SHERI LYNN
Batson ethics for prosecutors and trial judges regarding race-based peremptory challenges, 1153

JOHNSON, TIMOTHY R.
Discussing Justices voting “passing” in Supreme Court conferences, 236

JOHNSON, VINCENT R.
Noting most ethical standards for judges are adopted by the courts themselves, 238

JOHNSTON, JAMES H.
Discussing whether rape shield laws violate the Sixth Amendment Confrontation Clause, 1029

JONAKAIT, RANDOLPH N.
Unanswered questions on the rights of detainees at Guantanamo Bay, 1320

JONES, CURTIS T.
Discussing exercise of supplemental jurisdiction where a state and federal claim are mixed, 591

JONES, HARRY W.
A summary of the American doctrine of precedent, 84
Civil law judges tend to use deductive analysis; common law judges use more induction, 64-65
Distinguishing civil law systems, based, however remotely, on Roman law, and common-law systems, based on the common-law courts in England, 64-65
Grand traditions of common law called for reasoned elaboration of law on narrow grounds, 224
Framers and ratifiers were grounded in traditions of the Anglo-American system, 168-69, 368
Interpretation requires reconstruction of the setting or context in which words were employed, 105
The common law usually builds on existing precedent in the absence of strong contrary reasons, 942

JORDAN, BARBARA
Quotes Lincoln on seeing things from another person’s perspective as well as one’s own, 509

JORDAN, DAVID ALAN
Encryption in a computer system should be held to create a reasonable expectation of privacy, 1011

JORDAN, WILLIAM S.
House of Lords now allows use in England of legislative history if text is obscure or leads to an absurd result, 151, 286

JOY, PETER
Discussing ABA Model Code of Judicial Conduct, 239

JULANDER, TREG A.
General discussion of the market participant doctrine, 878

JOONDEPH, BRADLEY W.
Justice Alito had a lengthy public record on the Third Circuit as a conservative judge, 1627

Skewed natural law view represented by majority in *Dred Scott*, 168, 433-44, 1057-58, 1061, or Justice Clifford, who was otherwise sympathetic to *Dred Scott’s* reasoning,
From Southern states,
Campbell, 1061
Catron, 1061, 1324
Clifford, 1324
Daniel, 1061
Taney, 1061
Wayne, 1061, 1324
From Northern states,
Grier, 1061, 1324
Nelson, 1061, 1324
Remaining Justices whose decisionmaking style not mentioned in the text of the book,
Natural law era Justices,
  Nominated by Federalist/Whig Presidents: Blair; Cushing, 371; Ellsworth, 93, 371; Iredell, 371, 599, 1046; Jay; see Jay, John; Johnson, Thomas; Moore; Patterson, 371; Rutledge, 231, 804; Trimble; Wilson
  Nominated by Jeffersonian/Democrat Presidents: Baldwin; Barbour; Johnson, William; Livingston; McKinley; Thompson; Todd; Woodbury
Formalist era Justices,
  Nominated by Republican Presidents: Blatchford; Hunt; Matthews; Moody; Strong; Woods
  Nominated by Democratic Presidents: Clarke, 719; Lamar, Lucius

Biographies of all Supreme Court Justices appear at “www.oyez.org/oyez/portlet/justices/”

Years of service for each Justice appear in the Table of Supreme Court Justices, 1629-30.

K

KACZOROWSKI, ROBERT J.
Discussing Black Codes and denial of rights to blacks in the South after the Civil War, 1087
Discussion of the Enforcement Act of 1870 to prevent voter intimidation by the Ku Klux Klan, 1325
The framers of the 14th Amendment intended Congress, not the courts, to be the primary protector of civil rights, 1327

KALIN, MICHAEL A.
Abraham Lincoln’s appointments to the Supreme Court, 434

KALT, BRIAN C.
Arguments against a presidential self-pardon, 792

KANNER, GIDEON
Discussion of the constitutional and policy issues involved in the Kelo case, 965

KANT, IMMANUEL
Act under a principle that could be a universal law for everyone, 511
In general, 278, 325, 342, 345-46, 356, 412, 511-13, 516, 527, 537

KAO, ANNIE TAI
Discussion of suits brought by states as parens patriae, 667
KARLAN, PAMELA S.
Estimates on the number of Florida voters wrongly denied the ability to vote by the Florida felony disenfranchisement statute, 1209-10

KARST, KENNETH L.
Discussing Justice O’Connor’s protection of individual rights in cases involving women and children, 397
Discussing the Fifth Amendment Due Process Clause as having an equal protection component, 1083

KASPARIAN, FAITH D.
Discussing when religious music can be sung in public schools, 1585

KAY, RICHARD S.
It is possible to distinguish interpretive and non-interpretive review, 126
Difficulties of aggregating subjective intent not an insurmountable barrier to original intent theory of interpretation, 136

KELLEY, PATRICK J.
Discussing Holmes’ view that positivist judges should adhere to *stare decisis*, 42
Holmes believed law was improved by making it more fixed, definite, and certain, 42, 312
Holmes had a coherent positivist theory, 45-46
Noting one commentator who thought that Holmes’ views shared premises with utilitarianism, 43

KELLEY, WILLIAM K.
Arguing that interpretation to avoid a constitutional issue may frustrate Congress’ intent, 734

KELMAN, MARK
Critical legal studies say law is indeterminate, so decisions always reflect political choices, 347
Discussion of the Critical Legal Studies movement, 413

KELSH, JOHN P.
Discussing Supreme Court practice regarding unanimous, concurring, and dissenting opinions, 236

KELSO, CHARLES D.
As co-author of this book, 1, 1911
Citing Adam Smith’s theory of the impartial spectator, 441, 510-11
Discussing aspects of the 1996 presidential election, 453
Formalism compared with instrumentalism in *Studying Law: An Introduction*, 39
Discussing Justice O’Connor’s contributions while on the Court, 395
Discussing splits on the modern Court, 393
Noting commentary on the value of resort to legislative history in statutory interpretation, 151-52
KELSO, R. RANDALL
As co-author of this book, 1, 1911
Background of separation of powers doctrine, 267
Citing Adam Smith’s theory of the impartial spectator, 441, 510-11
Comparison of Equal Protection and Due Process analysis, 1224
Discussing,
- aspects of the 1996 presidential election, 453
- aspects of the 2000 presidential election, 453-55
- aspects of the 2004 presidential election, 457-61
- how less than undue burdens trigger “second-order” rational review, 546, 936
- Justice O’Connor’s contributions while on the Court, 395
- splits on the modern Court, 393
Distinguishing natural law based on reason from natural law based on human nature, 514
Formalism compared with instrumentalism in Studying Law: An Introduction, 39
Framers and ratifiers adopted a sharing of powers approach regarding checks and balances, 148
Government interests that are needed vary with the levels of review, 181-82
Justices Breyer, Ginsburg, and Stevens form a moderately liberal block, 351
Marshall’s Enlightenment natural law approach prevailed over Chase’s classic/Christian natural law approach in the early 1800s, 452
Noting commentary on the value of resort to legislative history in statutory interpretation, 151-52
Noting Justices Stevens, Ginsburg, and Breyer form a relatively reliable liberal block, 351
Noting that many factors are used to decide what standard of review to apply, 78
Political observations with respect to accommodation of religious practices in the workplace, 1618
Rationality in an Einsteinian universe requires rejection of egotistic preferences, 513
There are seven levels of review in Supreme Court cases involving balancing tests, 184-88
Whether state action substantially advances goals should not be test under Takings Clause, 974

KENNEDY, JUSTICE ANTHONY M.
As adjunct professor at Pacific, McGeorge School of Law, 98
As natural law judge with an occasional affinity for formalism, 74, 165, 191, 393-94, 1034, 1220
Confirmed as Reagan’s third choice in 1987, 230
Judicial decisionmaking style, see Name Index entry, “Justices, Natural Law style”
Need for law to embody reason if civilization is to aspire to excellence, 157
Rejection of “static” Constitution model of interpretation, 359
Understanding of constitutional principles may change over time in response to more enlightened reasoning, 528-29, 533, 1220, 1280-81

KERNOCHAN, JOHN M.
Some statutes, by virtue of generality or otherwise, invite judicial creativity, and resort to public policy, 52
The difference between subjective and objective intent theory of interpretation is not of overriding importance, 139
KERR, ORIN S.
Encryption in a computer system should not be held to create a reasonable expectation of privacy, 1010-11

KERSHAW, JEFFREY A.
Discussing the appropriate level of review for classifications involving sexual orientation, 1192

KESAVAN, VASAN
Discussing whether a new state could ever be formed from parts of one existing state, 765-67
Discussing whether the Electoral Count Act of 1877 is constitutional, 1208
Historical discussion of when the Articles of Confederation ceased to be law, 819
Noting Lincoln’s legal formalism regarding the issue of succession, 434

KIEFER, CHRISTOPHER
Discussing the Court’s focus on economic impact on the property as a whole in takings clause analysis, 969-70

KILLENBECK, MARK R.
Backdrop to the Constitutional Convention of 1787 in the weakness of the Articles of Confederation and the meeting in Annapolis of delegates from five states in 1786, 703

KIM, IHAM
Considering race in college and university admissions against the backdrop of intergenerational effects of past racial discrimination, 1143

KING, NANCY J.
Co-author of a treatise on criminal law procedure, 1002

KIRCHMEIER, JEFFREY L.
Non-formalist judges start with text, but place less weight than formalist judges on literal, textual meaning, 282

KITCH, EDMUND W.
Emergence of a modern version of economic natural law, via law-and-economics, 412

KIZER, KATHLEEN S.
“Excessiveness” in punitive damages law in cases after Campbell, 1235

KLARMAN, MICHAEL J.
A critique of Bruce Ackerman’s theory of constitutional moments, 723
Brown v. Board was a catalyst for many changes in law and society, 1128
History does not support Brown as it does not show the framers intended school desegregation, 1122
Many states rejected black suffrage proposals in referenda between 1865 and 1867, 1078
Tradition of one majority opinion begun by Ellsworth and cemented in place by Marshall, 93
KLINE, MORRIS
Impossibility of making a square whose area is exactly equal to the area of a given circle using fractional algebra, 515

KMIEC, DOUGLAS W.
Natural law Justices Marshall and Story supported individual contract and property rights, 391
Noting differences between natural law originalism and Justice Scalia’s formalism, 355
Summary of Christian natural law tradition in 18th-century and 19th-century America, 263

KMIEC, KEENAN D.
Discussing five kinds of activism employed by instrumental judges, 335

KOBACH, KRIS W.
In the late 1800s, the Court gradually withdrew from enforcing national rights against states, 967

KOCHAN, DONALD J.
The invalidity of certain congressional limitations on appointments by the President, 803

KOHLBERG, LAWRENCE
Arguing for six stages of moral reasoning from childhood to adulthood, 464, 466-71
Connections between,
cognitive development and moral reasoning stages, 471-75
kinds of societies and attitudes on the toleration of diversity, 467
religious principles and moral reasoning stages, 517-19, 599, 1605
societal and legal development in American and moral reasoning stages, 476-88, 505-06
societal and legal development in other countries and moral reasoning stages, 488-94
Contemporary debates over morality as reflecting tensions between Kohlberg’s stages 3 & 4 and Kohlberg’s stage 6, 506-09, 528-31
Critiques of Kohlberg’s moral reasoning stages, 494-95, 497-500
Judicial decisionmaking styles,
traditional natural law and Kohlberg’s stage 3, 479-80, 503
formalism and Kohlberg’s stage 4, 480-82, 503
Holmesian style and Kohlberg’s stage 4 ½, 482-84, 503
instrumentalism and Kohlberg’s stage 5, 484-85, 503
modern natural law and Kohlberg’s stage 6, 485-88, 503
“Love of neighbor as thyself” as reflected in Kohlberg’s stage 6, 513-16, 519-20
Societies with better schools tend to produce students who reason morally at higher levels, 499
The social contract theory yields procedural principles but not universal moral oughts, in contrast to natural law universal principles of justice, 542
Summary of theory of moral reasoning, 501, 503-04
KONIG, DAVID THOMAS
Noting that states-rights’ advocate St. George Tucker, using natural law emphasis on purpose, read the Commerce Clause broadly, 713

KOPEL, DAVID B.
Discussing state laws on the right to own guns, 987
Discussing what the Supreme Court has said about the Second Amendment, 988

KOPPELMAN, ANDREW
Discussing choice of law problems in interracial marriages and same-sex marriages, 1000

KOTZ, HEIN
In England today, trial by jury has almost disappeared from civil litigation, 950

KOVACS, KATHRYN E.
Discussing waiver by the federal government of sovereign immunity, 850
Discussing statutory waiver of sovereign immunity and limited use of waiver under the doctrine of “non-statutory review”, 851

KOVNER, VICTOR A.
Lower courts split on whether actual malice is required for false light cases not involving a public official or figure, 1468

KOWEEK, JEFFREY S.
Discussing the issue of public access to enemy combatant hearings, 1321

KRANNICH, JESS M.
Discussing historical and early practice support for denying corporations full “person rights”, 1291

KRAUSS, STANTON D.
Discussing cases where free blacks were permitted to sue under federal diversity jurisdiction prior to *Dred Scott*, 1070

KREIGER, DAMON L.
Academic freedom, the First Amendment, and the Internet, 1479

KRENT, HAROLD J.
Arguing for possible constitutional limits on conditions in presidential pardons, 791
Civil service protection typically extends to judges who do not have Article III protections, 810

KRESHEK, BRADLEY H.
Discussing the constitutionality of mandatory off-campus community service programs, 1422
KRISLOV, MARVIN
The need to marshal evidence that diversity is related to effective education, 1142

KROGER, JOHN R.
Discussing views on slavery by Aristotle, the Stoics, and Romans like Cicero, 263

KUKLIN, BAILEY
Critical race theory says the current system reflects domination by a white majority, 348
Definition of pragmatism as involving step-by-step improvement of the human condition, 342
Discussion of the philosophy of Immanuel Kant, 345-46
Feminists contend that law has given short shrift to women’s experiences, 348
Shortcomings of American law that are asserted in critical legal studies, 346-47
Utilitarianism,
   typically aims for the greatest good for the greatest number, 343-44
   problems with, 344-45

KUSHNER, JAMES A.
Summary of Justice Ginsburg’s liberal instrumentalist views, 351

L

LaFAVE, WAYNE R.
Burdens of proof in the criminal justice system regarding defendant’s rights, 1004
Co-author of a treatise on criminal law procedure, 1002

LAMBERT, FRANK
Discussing framers who were Deists, believing in a Creator who does not intervene in daily affairs, 1602

LANDIS, JEROME
Defining Landis’ approach as a “practical objective” approach to interpretation, 137, 139, 304, 326
Justice Scalia questioning whether Landis would still support use of legislative history today, 308
Usually courts can discover legislative intent possessed by a majority of the legislature, 135

LANGDELL, DEAN CHRISTOPHER COLUMBUS
As adopting analytic positivist/formalist approach, 31, 36, 48, 68-69, 406, 410
Langdell’s formalist approach led him to reject the mail box rule, 37
Supporting analytic theory that law is reducible to a unitary general theory, 22, 25, 36, 48
Supporting the formalist view that law consists of relatively concise list of legal rules and principles, 36-37
LANGHAUSER, DEREK P.
Presenting statistics regarding appointments of Justices to the Supreme Court, 230-31

LAPIDUS, LORIN J.
Discussing whether the diversity rationale will justify affirmative action in the employment context, 1146

LARSON, EDWARD J.
Discussion of the Schiavo case, comparing it to Cruzan, 1285

LASH, KURT T.
Discussing the Ninth Amendment from both a federalism and libertarian perspective, 1045-48
The Ninth Amendment rebuts the idea rights derive only from positive legal enactments, 1044-45

LASSER, WILLIAM
Justice Roberts’ “switch in time” was actually made before Roosevelt’s court-packing plan was announced, 444

LAURICELLA, PETER A.
Noting that “delegated”, rather than “expressly delegated”, was used in the 10th Amendment, 708

LAVINBUK, ARIEL N.
Discussing numerous foreign relations cases in the early 1800s, 901

LAWRENCE, MICHAEL A.
Discussing standing for municipalities to assert due process claims against the state, 667-68

LAWNER, MICHELLE
Arguing that federal courts should consider state sovereign immunity *sua sponte*, 615

LAWSON, GARY
Discussing the breadth of the Necessary and Proper Clause, 709
Discussion of when the Constitution became the law, 820

LAYCOCK, DOUGLAS
Arguing that the framers did not intend to allow nonpreferential aid to religion, 1539

LEACH, J. RUSSELL
Narrow construction of statutes in derogation of common law seen as a judicial power grab, 107

LEE, ALLISON HERREN
Assignment of judges in the federal courts, 238
LEE, EDWARD
Discussing Congress’ power over copyright and patent infringement, 745

LEE, EMERY G., III
Discussion of the Senate’s role and ideology in the Supreme Court nomination process, 234

LEE, GARY
Judicial campaign speech and the ABA Model Code revisions after White, 1519

LEE, THOMAS H.
Discussing sovereign immunity in actions against a state by a foreign state, 613

LEE, SHU FAN
Discussing administrative delays in social security disability claims, 1305-06

LEE, THOMAS R.
Discussion of the manner in which the census enumeration is to be taken, 834

LEFF, ARTHUR
Impossibility of reason bridging the gap between “is” and “ought”, 515

LEHMAN, WARREN
Discussing use of purpose and equity of a statute by Aristotle, Aquinas, and Plowden, 58

LEIPOLD, ANDREW D.
Skeptical whether the requirement of a grand jury proceeding protects the accused, 1015

LEITER, BRIAN
Use of Preamble in constitutional interpretation, 105, 700

LEVI, EDWARD H.
Inductive reasoning by common law judges analyzed in common-law, statutory interpretation, and constitutional law adjudication, 66-67, 404
How rules change in the process of being applied, 91
There is much common-law type of reasoning in constitutional cases, 368

LEVINE, RALEIGH HANNAH
The history of voter eligibility, 1204

LEVINSON, DARYL J.
Irrebuttable presumption analysis is a dead letter in constitutional law today, 1227
LEVINSON, MEIRA
Discussing difficulties in educating citizens to grant others equal concern and respect, 492

LEVINSON, SANFORD
Madison’s changing views on validity of bank legislation, based on government practice, 160, 420
Natural law or justice as a seventh source for constitutional interpretation, 101-02
Slavery was sanctioned by provisions in the Constitution, 370-71
Quoting Madison regarding value of legislative and executive practice to show meaning, 120, 160
Quoting President Jackson’s “apocryphal” response to *Worcester v. Georgia*, 168
Use of legislative and executive practice to show meaning at the time of ratification, 119
Views on,
  text versus purpose in constitutional interpretation, 104
  using historical sources, 114

LEVY, LEONARD W.
Blackstone’s free speech theory protected the state through easy resort to libel, 266
Rejection by Madison of Blackstone’s theories on free speech, 266-67

LEWIS, BERNARD
Discussing the Islamic world generally, finding a need for social/political change to bring those
societies into the culture of modernity, 491

LEZIN, KATYA
The story of Justices voting in *Brown v. Board of Education*, 1123

LIEBMAN, JAMES S.
Justice Stevens’ view on constitutionality of the death penalty, 1035

LINDON, ABRAHAM
As nominating formalist Justices to the Court, 434
Authorized by Congress to declare a blockade in the event of an insurrection, 785
In general, 147-48, 229, 434, 748, 785, 830, 1060, 1063-64, 1325
Quote,
  “A house divided against itself cannot stand”, 1064
  “As I would not be a slave, so I would not be a master”, 434, 509
  “You can’t fool all of the people all of the time”, 461
Rejects view that judicial opinions bind government officials in making decisions committed to their
political discretion, 124, 559-60, 567
Unilateral repeal of habeas corpus during the Civil War ruled unconstitutional, 789, 1041
LIND, JoelLLEN
The Ninth Amendment calls for interpretation in light of background rights, even if not stated in explicit constitutional text, 1050

LINDE, HANS
Discussion of the Guarantee Clause, including similar clause in the Northwest Ordinance of 1787, 768-69
Precedents hold that state initiatives do not violate the Guarantee Clause, 769-70

LINDGREN, JAMES
Discussion of fixed terms on constitutional courts around the world, 570

LININGER, TOM
Impact of Crawford on requiring confrontation in cases involving battered spouses, 1029

LITMAN, HARRY
Congress has power to regulate use of items that have traveled in interstate commerce, 730

LIU, CHENGLIN
Discussing state of takings clause law in China, 982

LIVELY, DONALD E.
Discussing Justice Rehnquist’s effort in Posadas to water-down commercial speech rights, 202

LLEWELLYN, KARL
Adopting instrumentalist approach to statutory interpretation, 51-52, 104
Alternative ways of dealing with precedents, as discussed in The Bramble Bush, 91
Canons of construction and their limitations, 106-07, 144
Division of American legal history into three ages, 405-07
Instrumentalists likely to use narrower categories than formalists, 37
Instrumentalism’s functional approach tests the application of law by its purpose and policy, 47, 327
Llewellyn’s views consistent with pragmatic instrumentalism, and the Realist Movement, 32, 74, 325, 483, 928, 1619
Llewellyn’s functional approach supports the mail box rule, 37
Precedent that does not make sense is re-explored when courts use the “Grand Style”, 163
Read cases with reference to the particular dispute before the court, 92
Relative liberalism of, 97
The Common Law Tradition - Deciding Appeals,
   description of formalism, 36
   description of instrumentalism, 47, 325
Use of the term “Grand Style” to describe instrumentalism, 47-48, 415
Use of the term “situation-sense” as part of the “Grand Style”, 47-48, 78
LLOYD, LORD OF HAMPSTEAD
Law as guided by logic and reason, 20
Law seen by functionalists as guided by pragmatic treatment of rules, 20
Normativists view was as testable by reference to some moral norms external to law, 25
Positivists view law as derived solely from existing rules and principles, 25
Shortcomings of formalism were noticed when the 20th century produced new problems, 409

LOCKE, JOHN
As major influence on 18th-century American natural law thinking, 267, 269, 380-82
Impact on common law development during the first half of the 19th century, 62, 407
In general, 265, 267, 381-82, 496, 776, 782
Locke’s views on liberty of conscience and tolerance, 1540-43, 1547, 1605-06, 1615
Right to “life, liberty, and property”, 268-69, 379-81, 407, 428, 1236
Theory of the people’s reserved right of revolution, 168, 372, 1053
Theory of the social contract, 259, 262, 266, 537
Views on executive power over foreign affairs, 782
Views on sovereign immunity, 386-89, 391

LOFGREN, CHARLES A.
Original understanding of war-making powers in the Constitution, 787

LOGAN, DAVID A.
Arguing that libel actions can still pose a threat to the media even after Sullivan, 1466

LONG, NASH, E.
Discussing remand of cases to lower courts for further factual development, 564

LOWENBERG, DANIEL J.
Discussing cases after Morrison on “substantial affects” to interstate commerce, 732

LUBAN, DAVID
Discussion of Justice Jackson’s respect for universal principles of human dignity as Chief
Prosecutor at Nuremberg, 324

LUCERO, JUDGE CARLOS F.
Comments on recusal of judges in the federal system, 240

LUDWIKOWSKI, RETT R.
Discussing attempts to build pluralistic democracies in post-Soviet and Latin American states, 490
LUND, PAUL
States do not have a right to claim that federal common law must incorporate state law, 906

LUPU, IRA C.
Voucher programs or faith-based initiatives raise difficult issues if tested by strict scrutiny, 1604

LUSKY, LOUIS
A critical view of instrumentalism and its related judicial activism, 53, 411
Discussion of the Warren Court adding new constitutional rights between 1963-69, 207
Footnote 4 in Carolene Products was penned by Justice Stone when Lusky was his clerk, 1098
Judicial review is not confined to written text, but should have principled limits, 305
Paragraph 1 of the Carolene Products footnote rests on different premises than paragraphs 2 and 3, which focus on the dynamics of the democratic process, 1098-1100
Support for “ut res magis” (so the venture may succeed and not fail) maxim of construction, 305

LUZUM, MICHAEL J.
Discussion of finding implied property rights in employment cases, 1297

LYNCH, JOSEPH M.
Describing Jefferson’s approach to interpretation as a “strict constructionist” approach, 287

LYONS, DAVID
Even instrumentalists have a source-based view of law, 48
Legal eras in American law are divided into formalism and instrumentalism, 406

M

MacCORMICK, NEIL
Questioning the distinction between principles and policy, 60-61

MACE, M. KRISTIN
Examples of evidence that is testimonial or non-testimonial under the Fifth Amendment privilege against self-incrimination, 1020

MADISON, JAMES
Called a Deist, 1602
Civic republican tradition and, 268-69, 514
Co-author of The Federalist Papers, 115, 165, 243, 549, 771
Federalist No. 51: Government needs power but also must control itself, 243, 771
In general, 266-67, 329, 380, 449, 454-57, 558, 768-69, 782, 1060
Judges should consider only moral principles emerging from study of the Constitution itself, 55-56
Marbury v. Madison and, 575-79
McCulloch v. Maryland and, 706-07, 709-10, 731
Memorial and Remonstrance Against Religious Assessments, 1538, 1579  
Participant as framer and drafter of the Constitution, 176, 786-87, 829, 989, 1044-47, 1538  
Participant at the Annapolis Convention in 1786, 703, 819  
Religion should be immune from civil government, 1542  
Republican governments presuppose esteem and confidence in the people, 68  
Use of government practice as a source for constitutional interpretation, 120, 159-60, 164, 260, 364-67, 420  
Use of judicial precedents to fix constitutional meaning, 162, 366-67, 420  
Use of social practice to aid determining constitutional meaning, 164, 1034  
Views on,  
- constitutional and legal interpretation in general, 165-66, 270-71, 354, 384, 496-97, 583, 1045-47  
- federalism, 166, 430, 701, 704-05, 712, 1048  
- importance of religious liberty, 95, 310, 389-90, 1538-45, 1548, 1578, 1591, 1596, 1598-99, 1602, 1615  
- separation of powers, 148, 243, 329, 786-87, 812  
- sovereign immunity, 387-89, 611-13  
View that Constitutions should not be created, or amended, too often, 68, 178, 821  

MAGLIOCCA, GERALD N.  
Discussion of federal power over trademark and copyright matters, 745  

MALTESE, JOHN A.  
Senate confirmed 99% of Bill Clinton’s first-term judicial nominees without a role call vote, 231  

MALTZ, EARL M.  
Criticism of the instrumentalist approach to interpretation in United Steel Workers v. Weber, 52  
Criticism of Justice Kennedy’s federalism theory as not deferential enough to states, 359  

MANGRUM, RICHARD COLLIN  
Discussing when religious music can be sung in public schools, 1585  

MANHEIM, KARL  
Strict separation theory challenged on structural, historical, practice, and precedent grounds, 773  

MANNING, JOHN F.  
Eleventh Amendment text and history suggest a limited view that leaves Congress much power, 614  
Most modern jurists, except formalists, reject the “New Textualism” approach of Justice Scalia, 155  

MAPP, ALF J., Jr.  
Jefferson believed in a balanced budget and fiscally conservative policies, while supporting individual economic and civil liberties, 428  
Jefferson’s party was billed as one for the working man, 449
MARAVILLA, CHRISTOPHER SCOTT
Discussing Jones v. Bush, involving whether Vice-Presidential candidate Dick Cheney was a resident of Wyoming or Texas as part of the 2000 election campaign, 826

MARCIN, RAYMOND B.
Summary of Christian natural law tradition in 18th-century and 19th-century America, 263

MARCUS, MAEVA
John Marshall used history selectively in Marbury v. Madison, 581

MARKON, JERRY
The agreement under which Hamdi was released, 1314-15

MARSHALL, CHIEF JUSTICE JOHN
Judges should only consider moral principles emerging from study of the Constitution itself, 55-56
Judicial decisionmaking style, see Name Index entry, “Justices, Natural Law style”
Marybury v. Madison and, 555-56, 576-78
McCulloch v. Maryland and minimum rationality review, 8, 695, 706-12
Reasoned elaboration of the law, focusing on text; purpose; structure; history; legislative, executive, and social practice; and precedents, 12, 104, 137-38, 142-43, 355, 362, 420, 555, 713
Support for a “living” Constitution model of interpretation, 67, 165
Support for use of purpose and legislative history in statutory interpretation, 155-56, 358-61
The judiciary should answer only questions that are in a legal form for litigation by parties, 681-82
Tradition of one majority opinion cemented in place by Marshall, 93
Views on,
importance of property and contract rights, 391, 428, 951-54, 1236
sovereign immunity, 387-89, 600, 602, 611-13
“when there is a right, there should be a remedy”, 626

MARSHALL, JUSTICE THURGOOD
Courts should focus on the Bill of Rights and other laws protecting individual freedom, 110, 330
Judicial decisionmaking style, see Name Index entry, “Justices, Instrumentalist style”
The Constitution should be regarded as a living document, 110

MARSHALL, LAWRENCE C.
Justice Stevens’ view on constitutionality of the death penalty, 1035

MARSHALL, WILLIAM P.
George W. Bush pledged to nominate Justices in the mold of Justices Scalia and Thomas, 1626

MARTINEZ, JENNY S.

PENG, HAIFENG
Discussion of applying new procedural rules retroactively under *Teague v. Lane*, 226
PERCIVAL, ROBERT V.
Strict separation theory challenged on structural, historical, practice, and precedent grounds, 773

PERILLO, JOSEPH M.
Examples in contract law of,
- balancing tests, 72
- categorical rights, 71
- doctrine phrased in terms of elements, 76
- doctrine phrased in terms of factors to weigh, 77
- questions of fact, 83
- questions of law, 83

Interpretation of contracts,
- in 19th century, courts used a subjective, “meeting of the minds” approach, 138
- in 19th century, courts used a subjective theory, but often focused on objective evidence, 130
- in 20th century, courts used a practical, objective approach, 137
- in 21st century, objective theory dominates, but subjective elements are considered, 139

Separation of arguments of text and context in application of Parol Evidence Rule in contracts, 102

PERRY, MICHAEL J.
Major instrumentalist-era cases involved non-interpretive review, as framers did not adopt
determinative judgments, 325, 34

Discussing non-interpretive review by use of value judgments, 125-27
Distinguishing “originalism/non-originalism” from “interpretivism/non-interpretivism”, 127
Embrace of Thayer’s minimalist approach by Holmes and Frankfurter, 363
Judges should not articulate constitutional concepts at levels of generality beyond what relevant
materials warrant, 116-17
Originalist interpretation should be followed, even if it does not lead to the “best” result, 259
The more specific a provision, the greater its restraint on judges, 363-64

PERRY, TWILA L.
Discussing Justice O’Connor decisionmaking in cases involving women and children, 397

PETERSON, TODD DAVID
Discussing congressional attempts to limit presidential pardon power, 792

PFANDER, JAMES E.
Congress can give lower federal courts jurisdiction of cases in the Court’s original jurisdiction, 582
Congress intended in §13 of the Judiciary Act of 1789 to give the Court supervisory power over
writs of mandamus, 580
The Court held in 1807 that habeas jurisdiction must rest on congressional authorization, 581
There is no necessary broad state immunity in a confederation of independent states, 616

POLLITT, DANIEL H.
Discussing what is an impeachable offense, 836

POPE GREGORY XVI
Christian natural law tradition embraces truth and reason, 518
Offers support for Intelligent Design, 518

POPE JOHN PAUL II
Apology for traditional Christian attitudes toward Jews, 520
Embrace of traditional Christian doctrine on reproductive rights and sexual orientation, 528
Evolution is more than just a hypothesis, 518
Role in Cold War and end of communism in Eastern Europe and the Soviet Union, 1600
Ten Commandment statements on morality are an elaboration of the general principle of “love of neighbor as oneself”, 514, 519
Use of cross in mass on public grounds, 1589
Christian natural law tradition embraces truth and reason, 518-19, 528

POPE LEO XIII
Broader principles of the Bible reject slavery whose creation was by wars, 264

POPE NICHOLAS V
Support for slavery, 263-64

POPKIN, WILLIAM D.
A critique of Justice Scalia’s theory of statutory interpretation, 152

PORTEUS, LIZA
States are grappling with in-state tuition for illegal immigrants, 1160
POSNER, RICHARD A.
Defines himself a pragmatic economic libertarian, 97, 325, 342, 413
Discussion and critique of Rawls’ “difference principle”, 512
Emergence of a modern version of economic natural law, via law-and-economics, 412, 471, 494
Pragmatists consult the past to produce the best results for the future, 343

POST, ROBERT C.
Discussing how *Lochner* was applied in many circumstances, 1252
The framers of the 14th Amendment intended Congress to be the primary protector of civil rights, 1327
The pre-1937 development of the doctrine of governmental immunities, 852

POULIN, ANNE BOWEN
Arguing that multiple punishments should be analyzed only under the Eighth Amendment, not the Fifth Amendment double jeopardy clause, 1018

POUND, DEAN ROSCOE
Advocating use of social science methods to aid development of the law, 24-25
Breakdown of formalism followed Holmes’ insight that law serves particular ends, and Pound’s sociological jurisprudence 40
Classic account of formalism, 35
Discussing the “sure-footed Anglo-Saxon habit of dealing with things as they arise”, 66
Eighteenth-century natural law, behind the Bill of Rights, 55, 477, 479
embrodied in the Declaration of Independence, 55, 477, 479
law’s legitimacy was thought to be grounded in a notion of natural law, 407
took three forms: ethical, political, and economic, 408, 480
The development of American law owes much to believers in 18th-century natural law, 477

POWELL, H. JEFFERSON
Chief Justice Marshall’s reasoning on the Contract Clause extended to private contracts, 952-53
Complementary nature of the civic republican tradition and liberalism, 268-69
Discussing,
balancing arguments of literal text and purpose in interpretation, 141
opinions of Washington’s cabinet on the constitutionality of the first national bank bill enacted in 1791, 705-06
original intent of the framing and ratifying generation supported a natural law method of interpretation, 411-12
Enlightenment natural law tradition emphasized rationality of human nature, 265
Formalists focus on framers’ specific intent, rather than general legal concepts, 362
Instrumentalist era cases suggest broad presidential power over matters of foreign affairs, 784
Justice Chase stressed that constitutional argument was not limited by constitutional text, 371
Madison and Hamilton shared the Enlightenment tradition regarding judicial decisionmaking, 270-71, 384
Natural law style of interpretation uses both plain meaning and purpose, 357-58
Noting that for Madison, “usus,” defined as actual government practice and judicial precedents, could settle the meaning and intent of the framers, 159, 162, 364, 366-67
Quoting Madison that confidence in the people is highest in republican governments, 68
The intent of the Constitution is not the subjective intent of the framers, 137, 356
The subjective theory of interpretation arose in response to Kant’s writings, 138
Use of The Federalist Papers, but not legislative history, in original constitutional interpretation, 150

POWER, ROBERT C.
Criticizing certain aspects of Crosskey’s constitutional analysis, particularly regarding Crosskey’s broad theory of federal governmental power, 141

POWERS, JENNIFER GOODALL
Noting that in ancient Greece there were many instances of homosexual relationships, 523

PRAKASH, SAIKRISHNA B.
A law clearly violating the Constitution is not made “in pursuance” of the Constitution, 559
Discussing justifications for Congress not having power to remove executive officials, except by impeachment, 805
Judicial review of legislative action grew in the states after the Revolutionary War and before Marbury v. Madison, 557-58
Reference to six sources for constitutional interpretation when reviewing Fallon’s book, 103
Strict separation of powers approach supports a “unitary executive” model of government, 773
“The executive Power” carries with it some residual foreign affairs power, 782-83

PRESIDENTS
Washington, George, 175-76, 287, 449, 457, 460, 627, 705-06, 792, 815, 819, 1597-99, 1602
Adams, John, 267, 429, 430, 449-50, 452, 454, 460, 575, 577-78, 599, 818, 1061, 1341, 1598, 1602
Jefferson, Thomas, see Jefferson, Thomas
Madison, James, see Madison, James
Monroe, James, 231, 456, 457, 712, 714, 989, 1060
Adams, John Quincy, 220, 431, 454-57, 459, 714, 828
Tyler, John, 394
Polk, James, 230
Fillmore, Millard, 230
Buchanan, James, 230, 1324
Lincoln, Abraham, see Lincoln, Abraham
Johnson, Andrew, 792, 805, 1325
Grant, Ulysses, 830, 835
Hayes, Rutherford, 174, 829-31
Garfield, James, 831
Cleveland, Grover, 230, 434, 437
McKinley, William, 462, 572
Roosevelt, Theodore, 434, 1343
Taft, William,
   as Chief Justice, 299, 440, 852, 1252
   as President, 442
Wilson, Woodrow, 230-31, 434, 452, 1344
Harding, Warren, 442
Hoover, Herbert, 1039
Roosevelt, Franklin D.,
   court-packing plan, 189, 229, 405, 723
   in general, 97, 253, 427, 446, 689, 720, 755, 779, 783, 832, 1110
   the New Deal, 443-44, 719
Truman, Harry S., 320, 443, 553, 779-87, 816, 1446
Eisenhower, Dwight D.,
   in general, 804, 1123
   “military-industrial complex” speech, 460
Kennedy, John F., 320, 446, 460, 804, 1123
Johnson, Lyndon B., 230, 426, 448, 452, 1039, 1164
Nixon, Richard, 230, 320, 426, 446, 448, 452, 462, 535, 573, 785, 792, 828, 832, 835, 840
Ford, Gerald, 448, 792
Carter, Jimmy, 232, 458, 675-76, 788, 792
Bush, George H.W., 230, 363, 426, 448, 451-52, 526, 792
Clinton, Bill, 181, 232-34, 448, 451-55, 457-59, 492, 526, 786, 788, 792, 835-36, 843-44, 944
Bush, George W., 148, 232-34, 342, 418, 426, 448, 454-62, 488, 491-92, 675, 785, 789, 811, 826, 832, 1207-12, 1316-17, 1320, 1421, 1624, 1626

PRESSER, STEPHEN B.
18th-century English conservatives said sovereignty was in crown, lords, and commons, 266, 380
Discussing Justice Samuel Chase’s,
   changing approach to the classic/Christian natural law tradition, 262
   compared with Justice Thomas regarding natural law, 301
   contrasted with Chief Justice Marshall regarding natural law, 381
Meaning of the Enlightenment concept of the social contract, 266
Natural law Justices Marshall and Story supported individual contract and property rights, 391
Natural law originally protected traditional property/personal rights, not created new rights, 262-63, 380-81
Summary of,
   arguments favoring business replaced ethical natural law in the early 1900s, 408-09
   Christian natural law tradition in 18th-century and 19th-century America, 263
   Morton Horwitz’ views, 409
PRIMUS, RICHARD A.
By seating Hiram Revels in 1870, the Senate rejected the holding of *Dred Scott* that African-Americans could not be citizens under the original Constitution, 1070

PROSSER, WILLIAM L.
Examples in tort law of,
balancing tests, 72
categorical rights, 71
doctrine phrased in terms of elements, 76-77

PUPEL, DANIEL S., Jr.
Discussion of finding implied property rights in employment cases, 1297

PUSHAW, ROBERT J., Jr.
Discussion of the Constitution’s use of “case” and “controversy”, 574
Federal courts have certain inherent powers, such as managing litigation, 905

R

RADACK, JESSLYN A.
Discussion of United States strategy in its placement of terrorism suspects, 1315

RADIN, MAX
Incompatible with democratic government to ask what legislature meant rather than what legislature promulgated, 136
Noting evidentiary problems with determining subjective mental intent, 135
Objects to use of subjective interpretation because there is no single person having intent, 134
Similarity to Justice Scalia in approach to interpretation issues, 137-39, 304, 326

RAGAN, FRED D.
Discussion of the evolution of Holmes’ thinking on free speech, 1345

RAKOVE, JACK N.
Discussing many positive values of judicial review, 573
Discussing what is an impeachable offense, 836

RAMBO, LYNNE H.
History of the election recount in Florida in the Bush/Gore 2000 presidential election, 1207
If “overvotes” had been recounted, Gore would likely have won the election, 1211
On the recount of “undervotes” actually ordered by the Florida Supreme Court, Bush would likely have remained ahead, 1208-09
RAMSEY, MICHAEL D.
“The executive Power” carries with it some residual foreign affairs power, 782-83

RANDALL, JENNIE
Noting that injunctions against speech violating Title VII are not viewed as prior restraints, 1443

RANK, JESSICA E.
Discussing when a businesses can use classifications based on gender, 1174

RAO, SAIRA
Arguing that loyalty oaths of teachers at private schools are unconstitutional, 1532

RAPAPORT, ELIZABETH
Discussion of Presidente Carter’s amnesty for Vietnam draft dodgers, 792

RAPPAPORT, MICHAEL B.
The original meaning of the recess appointments clause, 803
The term “State” in the Constitution suggests broad sovereign immunity, 615-16

RASH, C. BRANDON
The need for particularity in describing a place to be searched under the Fourth Amendment, 1006

RATNER, LEONARD G.
Separation of powers doctrine should limit Congress’ power to limit the appellate jurisdiction of the Supreme Court, 595

RAWLS, JOHN
Emergence of a modern version of natural law, via neo-Kantian theory, 345-46, 412
Equality of results is the better concept of equality than equality of opportunity, 253
In general, 272
Justice derives from acting according to rules derived from an “original position” which favor no individual, 511-12

RAY, LAURA KRUGMAN
History of the Supreme Court’s use of the per curiam opinion, 237

REDISH, MARTIN H.
Discussing the extent to which Congress may limit the Court’s appellate jurisdiction by legislation, 594-95
Goldwater v. Carter was less a political question case than an accretion of executive power, 690
The First Amendment freedom of speech supports the value of “self-realization”, 1353
REES, CHARLES A.
Discussing bill of rights provisions in colonial governments, 986

REGAN, DONALD H.
Discussing state predilections to focus on parochial interests, 868

REHNQUIST, CHIEF JUSTICE WILLIAM
As a conservative Holmesian, with an occasional affinity for the formalist style, 323
Discussing,
the disputed presidential election of 1876, 829
the impeachment of Justice Chase, 835
the number of cases before the Supreme Court in its early days, 577-78
How Supreme Court conferences proceed, 236
Judicial decisionmaking style, see Name Index entry, “Justices, Holmesian style”
Support for a “living” Constitution based on sensitivity to legislative and executive practice, 311, 314

REICH, CHARLES
Entitlement to government benefits is an important new form of property, 1296

REIS, DAVID K.
Gaps and difficulties in constitutional protection for individuals in custody, 1289

REMSHAK, JONATHAN M.
Criticism of televising courtroom proceedings, 1428

RENSBERGER, JEFFREY L.
Arguing that Full Faith and Credit need not be given to out-of-state same-sex marriages, 1001

REPPY, WILLIAM A. Jr.
States have great freedom to make choice of law decisions, 998-99
The Full Faith and Credit Clause and interstate recognition of marriages and divorces, 999

RESKE, HENRY J.
Judicial conference allows cameras back in the courtroom, 1428
Limited use of audio or video televising permitted by a few Circuit Courts of Appeals, 1027

RESNICK, JUDITH
Discussion of judicial selection and use or non-use of the filibuster in recent times, 232
REUVENI, EREZ
Retraction of or refusing benefits to the Boy Scouts for its views on sexual orientation, 1529

REVENSON, TRACEY A.
Children under seven tend to see objects and people from only one point of view: their own, 472

REYNOLDS, GLENN HARLAN
Arguing that dormant commerce clause doctrine requires invalidation of many state Internet communication regulations, 879
Judge Bork’s approach to interpretation reflects a Holmesian approach, 309

REYNOLDS, WILLIAM L.
Literal interpretation peaked in the early 1900s along with judicial hostility to legislation, 280

RHODE, DEBORAH
Discussion of feminist theory, 348, 413-14

RHODES, CHARLES W., “ROCKY”
Factors in modern application of the International Shoe “minimum contacts” determination, 598

RICE, CHARLES E.
Discussing the classic/Christian natural law tradition and the Constitution, 411

RICH, WILLIAM J.
Discussing congressional power to abrogate state Eleventh Amendment immunity, 614
Discussing nullification of federal law by some Southern states prior to the Civil War, 479
Southern nullification was part of the background for the Privileges or Immunities Clause of the 14th Amendment, 1072
The framers of the Privileges and Immunities Clause of the 14th Amendment believed it reinforced rights already protected, 1073-74

RICHARDS, DAVID A.J.
Civil War Amendments reflected Enlightenment-based thinking, 434
Criticizes Finnis’ theory that homosexual acts are always wrong, 516
Enlightenment concept that government legitimacy derives from consent of the governed, 381
Enlightenment view of religion emphasized religious toleration, 266
Locke’s and Madison’s views on protection of inalienable human rights is central to originalism, 380
No great political theory is the last word on its own best interpretation, 382, 496-97
The natural law approach does not commit judges to a static Constitution, 382

RICHARDS, LEONARD L.
The extent to which slaveholders held powerful government offices 1789-1850, 1060
RICHARDS, ROBERT D.
Discussing adult entertainment and the First Amendment, with focus of prosecutions today mostly on child pornography, 1454

RIENZI, MARK L.
Techniques used to avoid a finding of overbreadth, 1405

RIGA, PETER J.
Necessity of a connection between law and morals, 57
Sound natural law position not reflected in the Constitution’s treatment of slavery, 56

RIGAMONTI, CYRILL P.
Need to protect authors and producers of initial works from downstream “sanitized” editing, 1464

RISHIKOF, HARVEY
Discussion of pragmatism in Court determinations of what is state action, 919-20

ROBBINS, IRA P.
Discussion of the Supreme Court’s decisionmaking procedures, including what happens when a Justice dies or retires after voting in conference, but before the decision is announced, 235

ROBERTS, JOHN C.
 Rejects the view that use of legislative history is unconstitutional as not giving effect to the views of Congress as a whole, 152
Discussion of the Senate cloture rule in connection with judicial appointments, 233

ROBERTS, CHIEF JUSTICE JOHN G.
As replacing Chief Justice Rehnquist, 11, 422-23, 1620
Judicial decisionmaking style, see Name Index entry, “Justices, Holmesian style”

ROBERTSON, JEFFERY E.
Discussion of proposals to restrict civil service protections, as for patent examiners, 809-10

RODELL, FRED
The Court’s use of “chop-logic” to interpret the post-Civil War Civil Rights Acts effectively out of existence, 1326-27

ROGAT, YOSAL
Dissenting from Holmesian deference to government approach in civil liberty cases, 44, 443
ROGERS, JAMES R.
Backdrop to the Constitutional Convention of 1787, 703

ROGOFF, MARTIN A.
Jefferson tended to favor the legislative branch on separation of powers issues, 149

ROOSEVELT, KERMIT, III
Evolution to and evaluation of a factor-weighing approach in choice of law cases, 998

ROPER, DONALD M.
Constitutional text required even natural law judges to uphold its constitutionality, 428
Slavery was legitimated by state law, and the Constitution, not the Marshall Court, 56
The Court should follow clear constitutional meaning until a just moral position is added to the
Constitution, using slavery as an example, 127, 167, 370

ROSEN, HUGH
Young children lack ability to see themselves from the perspective of another person, 473

ROSEN, JUDGE GERALD E.
Reflections on the importance of judicial independence, 570

ROSEN, JEFF
Framers and ratifiers of the Bill of Rights believed in natural rights, 1044
The founders’ ideas on which natural rights were alienable is less clear than what the rights were,
1049-50

ROSEN, MARK D.
Discussing whether Shelley v. Kraemer was correctly decided, 920, 2071
Formalist preference for bright-line rules, applied without regard to purposes, 40, 81

Concern that consent decrees lead to many unintended consequences, 699
SAPHIRE, RICHARD B.
Discussing the relevance of *Bush v. Gore* for other election cases, 1211

SARNER, JOSHUA
Do cameras in the courtroom jeopardize the right to trial by jury, 1026

SAX, JOSEPH L.
Differences in Protestant and Catholic natural law traditions relevant to the Takings Clause, 265
Noting that during the 17th and 18th centuries, governments could regulate most economic matters without a takings analysis, 391

SCIACCA, THOMAS
An evaluation of federal common law jurisprudence, 903

SCALIA, JUSTICE ANTONIN
A critical view of judicial activism, 167, 292-93, 411
Choices facing non-originalists, 272-73
Describing a textualist approach to interpretation, in *A Matter of Interpretation*, 39
Description of some policy maxims used in interpretation, 107
Description of some verbal maxims used in interpretation, 106-07
Embrace of the term formalism to describe his textualist approach to interpretation, 39, 287
Following precedent is not part of judicial philosophy, but a pragmatic exception to it, 85, 289-90
Incompatible with democratic government to ask what legislature meant rather than what legislature promulgated, 136
Judicial decisionmaking style, see Name Index entry, “Justices, Formalist style”
Modern use of legislative history has facilitated use of policy preferences, 308
Noting that balancing test or factor weighing approaches resemble findings of fact, 83
Noting growing convergence among Western industrialized democracies for judicial review based upon a modern version of natural law, 274
Objectified intent as the goal of interpretation, 136, 279
Predominant use should be made of contemporary sources, 118
Preference for clear, bright-line rules, not balancing tests, factors to weigh, or standards, 40, 80-81, 192-94, 279-80, 284
Questions the value of some policy maxims, e.g., remedial statutes are liberally construed, 144
strict construction in favor of reasonable construction, 111, 145-46, 284, 287
“reasoned elaboration of the law”, particularly based upon reasoned elaboration of precedents, 123, 205, 291
use of evolving standards of decency when interpreting the Constitution, 67-68
use of legislative history when interpreting statutes or the Constitution, 115, 152-56, 285-86
Support for Golden Rule of statutory interpretation, 282-83, 285-86
The need for principled use of stare decisis and for a willingness to follow “settled law”, 85-88, 203-05, 251-52, 290
Use of Federalism Papers justified as they display how the text was originally understood, 115, 150
Use of specific traditions (history and legislative and executive practice) to influence the meaning of liberty under substantive due process analysis, 170, 286, 288, 309, 1218, 1263, 1280-81
Views on,
  recusal, 239-40
  use of international sources to aid interpreting the Constitution, 164, 288, 572

SCHABAS, WILLIAM A.
Discussing the international trend to abolish the death penalty, 1035-36

SCHAPIRO, ROBERT A.
Discussing the impeachment of Grant’s Secretary of War, William W. Belknap, 836

SCHAUER, FREDERICK
Formalism as a conceptually and psychologically possible system, 35
Formalists apply plain meaning unless it is ambiguous or absurd, 280-81, 357
Formalists emphasize the literal, plain meaning of words, not purposes, 39, 279
Formalists worry that resort to purpose is not a clear process yielding unambiguous results, 39, 140
Not critical why a judge adopts an interpretation style, if it is adopted, using natural law as an example, 28
Positivist approach to judging, 25-26
The Court has not provided coherent guidance on the unconstitutional conditions doctrine, 1228

SCHERIBER, HARRY N.
Regulation of economic activity prior to the Civil War was primarily done by the states, 714

SCHENKKAN, P.M.
Calls for further development of dormant commerce clause theory, 878

SCHICKLER, ERIC
Discussing the provisions of the Electoral Count Act of 1877, 1208

SCHLAG, PIERRE
Reasons to prefer rules over standards, including making transactions more secure, 81-82

SCHLEGEL, JOHN HENRY
Discussion of the Critical Legal Studies movement, 413

SCHLESINGER, ARTHUR M. JR.
Jackson believed in a balanced budget and fiscally conservative policies, while supporting individual economic freedoms, 428
Jackson’s populism, while not resonating with the elite, was embraced by the rank and file, 455
Southerners, in Jackson’s era, wanted economic policy to be set by the states, 712
SCHNAPPER, ERIC
Discussing affirmative action programs in the post-Civil War period, 1129

SCHOENBROD, DAVID
Concern that consent decrees lead to many unintended consequences, 699

SCHONBORN, CARDINAL CHRISTOPH
Criticizes thought that denies evidence for “Intelligent Design” in biology, 518

SCHUCK, PETER H.
Discussing the nature of citizenship in a federal system, 891

SCHULHOFER, STEPHEN J.
Wartime checks and balances in America, Britain, and Israel, 1311

SCHULTZ, DAVID
Free speech rights for judges after White, 1519
Freedom of speech promotes tolerance of others and helps shape society’s character, 1353

SCHWARTZ, BERNARD
Justice Harlan usually followed precedents even if he had initially voted another way, 324
Movement by the Burger Court away from the instrumentalism of the 1960s, 208

SEBOK, ANTHONY J.
Blackstone equated common law with reason, but found reason in custom, 478
Confusion often surrounds use of “formalism”, “analytic jurisprudence”, and “positivism”, 31
Noting Langdell’s rejection of the mailbox rule, 37

SEDLER, ROBERT A.
Interest analysis as the preferred approach in choice of law cases, 998
Much of constitutional law is settled today, 1619

SEGAL, JEFFREY A.
Ideological distance between Senators’ constituents and a nominee plays a role in confirmation, 96

SEIDMAN, GUY
Discussion of when the Constitution became the law, 820

SEIDMAN, LOUIS M.
Discussing broadening of standing doctrine in the 1960s and early 1970s and its later narrowing, 638
Discussing Justice Powell as a swing vote on the Court, 398
Impossibility of reason bridging the gap between “is” and “ought”, 515
SELMAN, ROBERT
Discussion of social perspective-taking stages and responses to moral problems, 464, 471-75, 488, 498, 503, 505

SERKIN, CHRISTOPHER
Measuring just compensation in regulatory takings cases, 964

SHAMAN, JEFFREY M.
Discussion of *Lochner*, 1252

SHANTZ, CAROLYN
Piaget’s stages in cognitive development are mirrored in Selman’s stages of social perspective-taking, 473
Young children do not distinguish their own thoughts and perceptions from those of others, 472

SHAPIRO, MARTIN
Constitutional convention records show that judicial power was to include judicial review, 567
In civil law countries, annotations are often as influential as opinions, 85

SHAPIRO, STEPHEN M.
Discussing aspects of the Supreme Court decisionmaking process, including certiorari, 235

SHAPIRO, THOMAS M.
Intergenerational transmission of inequality continues to shape American society, 1143

SHARMA, H. RAJAN
Discusses limited enforcement mechanisms in international law on environmental matters, 751

SHARPF, FRITZ W.
Political question doctrine should be applied pragmatically, but not used if important individual rights are at stake, 689

SHARPTON, BLAKE
Discussing detention of illegal immigrants, 1026

SHEA, PATRICK A.
Arguing that in false light cases involving religious figures, courts should use *Gertz*, not *Sullivan*, 1469

SHERIDAN, CLARE
Limits on the kinds of cases to which the *Batson* rule on peremptory challenges applies, 1154
SHERRY, SUZANNA
Complementary nature of civic Republican tradition and liberalism, 269
Discussing pressure on Justices in the majority to try to convert a 5/4 case to a 6/3 case, 237
Emphasis on reasoned deliberation pervades the thought of the founding generation, 379
Listed as a supporter of a “deliberative democracy” account of public decisionmaking, 496
Natural law background of the Constitution, 56
Natural law background of the Ninth Amendment, 1044
One natural law tradition says supplement constitutional text by natural law principles outside the
Constitution if framers so intended, 371
Racial equality is at the base of the Equal Protection Clause, 308
Referencing feminine voice in moral development psychology, 343
Some state cases agree with Justice Chase that constitutional argument is not limited by constitutional text, 371

SHIFFRIN, STEVEN H.
The many ways in which the religion clauses protect various interests, 1552

SHUMATE, BRETT
Discussing due process rights of non-United States military personnel when tried in military courts, 1310

SIDAK, J. GREGORY
The President’s power to initiate minor military action without congressional authorization, 787

A proposal to codify executive privilege, 842
SMITH, CHRISTOPHER E.
Disappointment of conservatives that Justice Souter has used natural law interpretation, 363
The nature and limitations on presidential pardon power, 792

SMITH, DOUGLAS E.
History of established churches in early America, 1537

SMITH, DOUGLAS G.
Articles of Confederation adopted a “consociation” model of government, 479
Weaknesses in the Articles of Confederation limited federal power and retarded United States economic growth, 703

SMITH, L. SCOTT
Citing William McLoughlin on views of New England Baptists in the 18th and early 19th century, 1602

SMITH, NICHOLAS W.
Discussing the Sixth Amendment confrontation clause in the context of military commissions after Crawford, 1029

SMITH, RICK
Arguing that congressional oversight through the use of committees is not very effective, 795

SMITH, RODNEY K.
Arguing that in false light cases involving religious figures, courts should use Gertz, not Sullivan, 1469
Justice Thomas’ interpretation style most often mirrors that of Justice Scalia, 301
The framers espoused broad principles and eschewed resolution of specific issues, 362
Traditional classic/Christian natural law tradition accommodates to expressions of faith, 390

SMITH, ROGERS M.
Discussing liberalism goals of peace, prosperity, scientific progress, and rational liberty, 265-66, 380
Enlightenment philosophy prized free speech, 266

SMITH, WILL A.
Discussing civil liability for sexual assault in prison, challenging the “deliberate indifference” standard, 1289

SMOLLA, RODNEY A.
Discussing whether Brandenburg should apply to media violence cases, 1437

SOLIMINE, MICHAEL E.
Discussing use of three-judge district courts in voting rights litigation, 585
SOLOMON, ANDREW T.
Noting most current practice is “unpublished opinions” are persuasive authority, not precedent, 94

SOMMER, JOSEPH H.
The general power to incorporate lies with states, not the federal government, 711

SOUTER, JUSTICE DAVID H.
As natural law judge with an occasional affinity for instrumentalism, 400-03
Judicial decisionmaking style, see Name Index entry, “Justices, Natural Law style”
Justices should identify the general principle that was intended to be established, not specific application in the minds of the framers, 363, 384
Rejecting “New Textualism” model of statutory interpretation, 153-55
Respect for precedent, 324, 375-78

SOUTHERLAND, HAROLD P.
Discussing the balancing test often used today in choice of law cases, 898

SPEATH, HAROLD J.
Ideological distance between Senators’ constituents and a nominee plays a role in confirmation, 96

SPARLING, TOBIN A.
Discussing judicial bias claims generally, and the “extra-judicial source” doctrine, 1520-22

STAAB, JAMES B.
Jefferson said states’ rights should be considered in interpreting all constitutional provisions, 754
Jefferson’s deductive approach to interpretation was shared by a few of his contemporaries, 175

STACK, KEVIN M.
Discussing the relationship between constitutional and statutory interpretation, 403

STANLEY, JON A.
International law and regulatory takings jurisprudence, 982

STEIKER, JORDAN
The Court has allowed significant limitations on habeas corpus despite the Suspension Clause, 1041-42
Recent statutory limitations on federal court jurisdiction, 593

STEINER, MARK E.
Some pre-Civil War judges and lawyers, typically Whigs, shared Blackstone’s focus on tradition and order, 263
Some pre-Civil War judges and lawyers, including Lincoln and other Whigs, promoted stability in the law, 409, 434
STEINER, RACHEL C.
History of the phrase, “In God We Trust”, 1600

STEMPEL, JEFFREY W.
Critical race theory says the current system reflects domination by a white majority, 348
Definition of pragmatism as involving step-by-step improvement of the human condition, 342
Discussion of the philosophy of Immanuel Kant, 345-46
Feminists contend that law has given short shrift to women’s experiences, 348
Shortcomings of American law that are asserted in critical legal studies, 346-47
Utilitarianism,
  typically aims for the greatest good for the greatest number, 343-44
  problems with, 344-45

STEPHAN, PAUL, III
Presumptions and burdens of proof in the criminal justice system, 1004

STEPHENS, BETH
Discussing federal power to preempt state law regarding international affairs, 901

STEPHENSON, DONALD GRIER, Jr.
Aftermath of the Hayes/Tilden election controversy, 830-31

STEPNIAK, DANIEL
Comparative law on televising court proceedings, 1026
Rules for televising appellate proceedings in some courts, 1428

STERN, ROBERT L.
Discussing aspects of the Supreme Court decisionmaking process, including certiorari, 235

STERNLIGHT, JEAN R.
Discusses waiver of constitutional rights in mandatory arbitration agreements, 995

STEVENS, JUSTICE JOHN PAUL
Discussion of the certiorari process in the Supreme Court, 235
Judicial decisionmaking style, see Name Index entry, “Justices, Instrumentalist style”
Rejecting “New Textualism” model of statutory interpretation, 153-55
Support for the duty of the government to govern impartially, 543-44
Supporting use of international sources to help guide constitutional decisionmaking, 164-65, 331-32
Supporting use of standards, balancing tests, and multi-factored analysis, 193
STEVENSON, DRU
Concern that privatizing welfare services creates due process and delegation problems, 1322
Noting that “contracting out” government functions creates due process problems, 777

STITH, KATE
Effect in United Steelworkers v. Weber of Justice White’s strong commitment to civil rights, 97-98, 323-24

STONE, GEOFFREY R.
Discussing broadening of standing doctrine in the 1960s and early 1970s and its later narrowing, 638
Discussing free speech in the age of Senator McCarthy, 1350
Discussing Justice Powell as a swing vote on the Court, 398

STORY, JUSTICE JOSEPH
Approved the practice of drawing inferences from legislative and executive behavior, 364-65
Description of Story’s natural law approach as half-Enlightenment, half classic/Christian, 381
Discussion of need for context to be considered, 106
“Due Process” referred to settled usages in England not unsuited in the U.S., 1215
General Welfare Clause was intended as a spending power, 701-02, 707, 712, 742
Importance of contract and property rights, 391-92, 432-33
Judges should only consider moral principles emerging from study of the Constitution itself, 55-56, 371
Judicial decisionmaking style, see Name Index entry, “Justices, Natural Law style”
Natural law style described in Commentaries on the Constitution of the United States, 354, 549
Speech and debate clause not limited to speech on the floor of Congress, 837-38
States have no powers from existence of the federal government unless they are delegated, 199
Support for “living” Constitution model of interpretation, 143, 165-66
Supporting literal and purposive interpretation, consistent with the maxim “ut res magis” (so that the venture may succeed and not fail), 141-42, 305, 357
The Preamble suggests mischiefs to be remedied and objects to be accomplished, 105, 700
The purposes of the Establishment Clause to exclude sect rivalry and prevent an established church were advanced by removing the whole power over religion from the federal government, 1536-37, 1540, 1543, 1545, 1547, 1578, 1602-03
Use of,
government practice as a source for constitutional interpretation, 120
policy maxims to guide interpretation, 144
verbal maxims to guide interpretation, 107
Views on,
costitutional interpretation, giving weight to nature, objects, and structure, 104, 143-44, 358
Full Faith and Credit statute, 997
Ninth Amendment, 1044-45, 1049
separation of powers, with no branch of government to have an overriding influence in others, 359, 642, 771-72, 799, 812
Seventh Amendment right to jury trial, 993-94
STRANG, LEE J.
The classic/Christian natural law tradition commits judges to an “original intent” methodology, 382
The framers, when using “free exercise of religion”, were thinking about Christian beliefs, 1605

STRASSER, MARK
Discussing 11th Amendment sovereign immunity as based on diversity jurisdiction, 613

STRICKLAND, HENRY C.
Discussion of pragmatism in Rehnquist Court determinations of what is state action, 919

Noting Justice Scalia’s accommodationist views regarding what counts as a nonpreferentialist statement of religion, 1545
The First Amendment was intended to bar even nonpreferentialist aid to religion, 1539

STUNTZ, WILLIAM J.
Discussion of the right of criminal defendants to waive constitutional protections, 1228

STURM, SUSAN
Discussing why the glass ceiling remains a barrier for women and people of color, 1144

SUD, NITIN
Achieving fairness in punitive damages cases, 1234

SUHRHEINRICH, RICHARD F.
Discussion of the Ohio Motto, “With God, All Things are Possible”, as surviving the Establishment Clause review in the Sixth Circuit, 1601

SULLIVAN, KATHLEEN M.
Compares categorical and balancing approaches to legal decisions, 71, 76
Instrumentalists more willing than natural law, Holmesian, or formalists to use balancing tests, 74-75
Justice Scalia’s preference for rules over standards, 81, 192-93
Justice Stevens’ preference for standards over rules, 81, 193
Natural law judges limit discretion granted by standards through resort to “bedrock” moral principles, 193
Rules versus standards, arguments pro and con, 79-80
Unconstitutional conditions doctrine varies with the level of scrutiny applied in the case, 1228

SULLIVAN, KEVIN
Rulings in Britain on the procedural rights of terrorist suspects, 1316
SUMMERS, ROBERT S.
Combining Holmesian and instrumentalist approaches as “pragmatic instrumentalism”, 32, 327
Comparing functional and analytic approaches to law, tracking Aristotle’s four causes, 21
Formalism a closed system of conceptions and axioms, 35
From a functional perspective,
  law is stated in concrete and narrow generalizations, 22-23
  law’s consequences are important, 23-25
From an analytic perspective, logic, consistency, and harmony are important, 23-25
Modern period of Supreme Court decisionmaking labeled “instrumentalism”, 406
Pragmatic instrumentalism,
  is concerned with effectiveness of law in action, 50
  sees the law as aimed at some social values, 47, 50

SUNSTEIN, CASS
“Burkean minimalism” more tied to traditions than is “Enlightenment reason”, 383
Discussing theory that equality should be more about guaranteeing equal results, not merely
  equal opportunity, 253
Discussion of Justice Powell as a swing vote on the Court, 398
Instrumentalism came under attack, beginning in the 1970s, 411
“Judicial minimalism” refers to a tendency to decide on narrow fact-specific grounds, 368
Listed as a supporter of a “deliberative democracy” account of public decisionmaking, 496
“Minimalist” constitutional interpretation defended on consequentialist grounds, 259
Standing doctrine and,
  a comprehensive discussion, concluding that the Court erred in Lujan, 623-27
  broadening in the 1960s and early 1970s, and its later narrowing, 638
  early cases spoke of the common law “cause of action”, 627
  later Brandeis/Frankfurter opinions consistent with common law “cause of action”, 637
  noting framers’ views on qui tam actions, 659
  noting some rights may be so personal that Congress could not grant third-party standing, 657
The history of the impeachment clause, 835

SWAINE, EDWARD T.
Doubts that delegations of sovereign power to international tribunals are constitutional, 751
State laws on foreign commerce may violate presidential powers or federal common law, 880

SWEET, ALEE STONE
Explains how constitutional review in Europe and the U.S. have tended to merge, 570-71

SYKES, ALAN O.
Judicial reasoning on dormant clause review of state laws relating to the Internet, 878-79

SYMEONIDES, SYMEON C.
States have enacted many choice of law rules, 999
TARPLEY, JOAN
Intergenerational transmission of inequality continues to shape American society, 1143

TASLITZ, ANDREW
Noting historical arguments by Southerners used to show that the holding of slaves is established in the Bible, 1058

TELSEY, SUZANNE L.
Lower courts split on whether actual malice is required for false light cases not involving a public official or figure, 1468

THAMAN, STEPHEN C.
Discussing privilege against self-incrimination in international and comparative law, 1020-21

THAYER, JAMES BRADLEY
As a Holmesian, 12, 303, 316-17, 363, 1033
Criticized the formalist style but not that courts were engaged in judicial review, 563
Discussion of judges taking judicial notice of facts, 105
In judging constitutionality, defer to government unless invalidity is clear and it not open to rational question, 110, 146, 164, 306-07, 311-12, 329-30, 497, 658
Relationship between Thayer, Holmes, and Frankfurter, 307

THOMAS, HELEN
Origins of the abolitionist movement, 264

THOMAS, JUSTICE CLARENCE
As a favorite Justice among many white, Southern conservatives, despite being in an interracial marriage, 534-35
As formalist, with occasional affinity for natural law, 301-02
Confirmed by a 52-48 vote, 230
Idiosyncratic views on,
- Commerce Clause, 726-27
- Establishment Clause, 1546-47
- Necessary and Proper Clause, 731-32
Judicial decisionmaking style, see Name Index entry, “Justices, Formalist style”

THOMPSON, DENNIS
Discussing a “deliberative democracy” account of public decisionmaking, 495-96
THUMMA, SAMUEL A.
Non-formalist judges start with text, but place less weight than formalist judges on literal, textual meanings, 282

TOBIAS, CARL
History of the development of federal courts, 592

Discussing reporter’s shield laws in many states, but noting that no federal law exists protecting reporters in federal courts, 1427

TRANSGRUD, ROGER H.
Federal common law exists regarding state court jurisdiction over aliens, 902

TRAUTMAN, DON T.
Factors in modern application of the International Shoe “minimum contacts” determination, 598

TRAYNOR, JUDGE ROGER
Identified as an instrumentalist, 34, 47

TREANOR, WILLIAM MICHAEL
Consequential damages from government acts were not held a taking in the 19th century, 391
In early American law, just compensation was not always available for takings, 965

TRETBAR, J. MARGARET
Measuring just compensation in temporary regulatory takings cases, 964

TRIBE, LAURENCE H.
Actual malice rule should be applied whenever the plaintiff is a public official or public figure, even when the issue is matter of public concern or not, 1467
As author of a treatise on constitutional law, 549
Alienage classifications deserve strict scrutiny as they often reflect illegitimate stereotypes, 1156
Cases like Ferber can be said to use “categorical definitions”, 191
Congress can incorporate by reference some non-federal law as part of statutory criteria, 905
Constitution protects in general individual rights to autonomy, not group rights or rights to funding, 253
Difficulties in determining what is a taking, 982
Discussion of the development of intergovernmental immunities since 1937, 852
Discussion of the historical background of the Equal Rights Amendment, 1164
Each of three background views for the Establishment Clause reflected Locke, 1541
Judicial review creates opportunities for persuasion and moral education in public life, 567
Justice Rehnquist creatively interpreted precedents in *Paul v. Davis*, 202
Lack of a precise theory for the ripeness doctrine, 674
Minimum rationality review as applied creates a strong presumption of constitutionality, 1088
Obscenity law will be stabilized only when it applies to a narrow list of interests, like protecting unwilling listeners, children, or beleaguered neighborhoods, 1454
Principles regarding congressional power to abrogate state sovereign immunity, 606
Process-perfecting theories cannot banish divisive controversies from constitutional law, 485
The Court departed from its usual approach of minimum rationality review deference in *Cleburne*, 943
The level of generality used in construing contracts in use affects what is certain or uncertain in interpretation, 117
The political question doctrine does not categorically put any provisions off-limits for the Court, 690

**TRNAVCI, GENE**
Congress can incorporate international law into federal law, even in traditional state areas, 901
Grotius was influential to the framers regarding international law, 267

**TSESIS, ALEXANDER**
Arguing that banning Confederate flags is constitutional as they are a “badge or incident” of slavery, 1445
Chief Justice Taney’s views in *Dred Scott* reflected the view of many Southerners, 1060
Views on complete abolitionism became strengthened after the Civil War, 1065

**TURLEY, JONATHAN**
Discussion of executive immunity against suits by service members, 848
Impeachable offenses not limited to misconduct related to official responsibilities, 836

**TURNER, RONALD**
Discussion of the early votes on the Court in *Brown*, 1123

**TUSHNET, MARK V.**
A critique on the possibility of developing the law according to neutral principles, 369
Current practice is that the Justices are assigned a roughly equal number of cases to write each Term, 236
Discussion of,
   Alternative forms of judicial review, 111, 570-71
   Amorphous nature of standing doctrine, 625
   Broadening of standing doctrine in the 1960s and early 1970s and its later narrowing, 638
   Justice Powell as a swing vote on the Court, 398

Page 1828
Liberal and republican traditions among the framers, 268
The Critical Legal Studies movement, 413
Framers lived in a world where religious differences were very serious, 265
Listed as a supporter of a “deliberative democracy” account of public decisionmaking, 496
Non-critical theoretic positions attempt to justify imposing the values of one elite on others, 347
Political views typically have a some impact (and perhaps great impact) on how the Constitution is interpreted, 96
Reasons to be skeptical of judicial review and move away from a “court-centered” approach, 568
The story of Justices voting in *Brown v. Board of Education*, 1123
The unitary model of sovereignty in the French Revolution, 112

**TUTTLE, ROBERT W.**
Voucher programs or faith-based initiatives raised difficult issues if tested by strict scrutiny, 1604

**TWINING, WILLIAM**
Old English Golden Rule bars use of intrinsic material even if text is ambiguous or absurd, 285

**UNDERWOOD, JULIE**
Discussion of notice requirements in *Goss v. Lopez*, a school suspension case, 1309

**UNGER, ROBERTO MANGABEIRA**
Noting from a critical legal studies perspective that law is indeterminate, and so decisions always reflect political choices, 347, 413
Discussing the Critical Legal Studies movement, 413

**VALEaurI, JOHN T.**
Arguing that a heightened level of review in cases involving § 5 of the 14th Amendment is consistent with *McCulloch v. Maryland*, 1336

**VALENCIA-CWEBER, GLORIA**
Criticizing the argument that states have inherent power to regulate Native American affairs, 739

**VANCE, LAURENCE M.**
Statistics on the extent of land owned by the federal government, 753
VELASCO, JULIAN
Under formalist view, Congress should have an unfettered role over Court jurisdiction, 595

VERKUIL, PAUL R.
Concern that privatizing welfare services creates due process and delegation problems, 1322

VIATOR, GABRIELLE
Validity of laws recognizing adultery as a crime after Lawrence v. Texas, 1281

VOLOKH, EUGENE
Discussing when speech in the workplace environment can be deterred, 1444

von MEHREN, ARTHUR T.
Factors in modern application of the International Shoe “minimum contacts” determination, 598

von OVERBECK, ALFRED E.
Swiss code authorizes some use of customary law and a judge’s own views as a legislator, 70

W

WAGGONER, COURTNEY A.
Noting it is an open question whether Batson applies to religious discrimination, 1154

WALEN, ALEC
The constitutionality of states extending personhood to the unborn, 1292

WALKER, GRAHAM
The Augustinian variant of the classic/Christian tradition calls for restraint in decisionmaking, 382
Under an Augustinian perspective, the immediate preferences of the framers and ratifiers do not exhaust their aspirations, 382-83

WALKER, JEFFREY K.
Discussing privilege against self-incrimination in international and comparative law, 1020-21

WALKER, SHERRINE M.
Discussing the different percentages of men and women at Kohlberg’s stage 3 and 4 of moral reasoning, 500
WALL, CHRISTOPHER D.
The different percentages of men and women at stage 3 and 4 may be due to culture, 500

WALZER, MICHAEL
Discussion of connections between Walzer’s five kinds of societal arrangements and Kohlberg’s stages 1-5 of moral reasoning, 466-69, 476, 479, 482, 485, 505
In On Tolerance, he identified five kinds of societal arrangements and attitudes toward diversity in world history, 464-66, 488, 501-02

WALLENSTEIN, PETER
Discussion of Black Codes in Virginia, 1087

WANG, XI
Court decisions in the late 1800s frustrated congressional efforts to encourage black turnout after the Civil War, 1327

WANGERIN, PAUL
Noting the view among some moral developmental psychologists that truth is relative to each community, but that this view was rejected by Kohlberg, 494-95
Standardized tests of moral development show most college students between Kohlberg’s stages 3 and 4, 499

WARD, DANIEL V.
Discussing the Foreign Intelligence Surveillance Court (FISA), 1011

WARE, STEPHEN J.
Discussing contractual waivers of constitutional rights, 995

WARREN, CHARLES
Noting letter from Justice Johnson to President Monroe on power of Congress and the President to authorize building of national roads and canals, 712

WARREN, CHIEF JUSTICE EARL
Judicial decisionmaking style, see Name Index entry, “Justices, Instrumentalist style”
Role in Brown v. Board of Education, 1121-23

WARREN, L. VAN
Describes the anthropomorphistic fallacy, 517

WASSERMAN, HOWARD
Discussing continuity in Congress and the executive, 813-15
Discussion of Jefferson/Burr electoral college issues, 829
WATSON, COREY C.
Roots of the political question doctrine in a speech by John Marshall, 681

WATTS, CAROLINA D.
Discussing accountability of social service agencies when a child under their care is injured or killed, 1290

WECHSLER, HERBERT
Has no doubt about the legitimacy of judicial review, 566-67
Neutral principles are not evident in Shelley on state action, 919-20
Discussing the importance of deciding cases according to neutral principles, 58, 369
The political question doctrine should be applied according to normal rules of construction, 689

WEILER, PAUL
Discussing individual versus group rights under the Equal Protection Clause, 253

WEINBERG, LOUISE
Discussion of federal common law, 895

WEINRIB, ERNEST J.
Contra use in this book, defining formalism as any analytic, non-functional approach to law, whether natural law or analytic positivism, 32
Difference between analytic and functional approaches to the nature of law, 20
Difference between natural law and analytic positivism, 31-32, 54

WEINSTEIN, JACK B.
Erie left it to states to develop tort and contract law, in part because federal courts are not as well qualified to develop substantive common-law rules, 903

WEISBERG, RICHARD
A critique of Justice Rehnquist’s opinion in Paul v. Davis, 202, 1293

WELLINGTON, HARRY H.
Explains differences between principles and policy, 60-61, 132
Non-originalist judges may find values in community consensus of social tradition, 273
Noting connections between common-law and constitutional adjudication, 122
Value judgments of the majority may not always be reflected by legislatures beholden to special interests, 335

WELLS, CATHARINE PIERCE
Discussion of making churches pay for the sins of their clergy, 1617
WEST, ROBIN
Arguing that theory that the judiciary’s duty “to say what the law is” extends only to statutory or common law, not constitutional provisions, 555
Listed as a supporter of a “deliberative democracy” account of public decisionmaking, 496

WESTEN, PETER
Substantive theory is needed to decide what kinds of unequal treatment are permissible, 1085
The level of generality used in construing concepts affects what is certain or uncertain in interpretation, 117

WHITE, G. EDWARD
Holmes’ theory of deference to legislative action as an accommodation to what the dominant group in society wants, 43-44, 307
Justice Gibson’s views on whether the framers adopted a tripartite theory of judicial review, 556
The rise and fall of Justice Holmes, 410
Who were the “Four Horsemen”, 297

WHITEBREAD, CHARLES H.
Co-author of a treatise on criminal law procedure, 1002

WHITEHEAD, JOHN W.
A constitutional analysis of the USA Patriot Act and the Justice Departments Initiatives, 1316

WHITMAN, JAMES Q.
Discussing why 18th-century lawyers confused custom and reason, 271, 478

WHITNEY, DAVID C.
Discussing,
the Madison and Monroe presidencies, 457
votes in the election of 1824, 456
votes in the election of 1828, 456-57

WHITTEN, RALPH U.
Arguing that Full Faith and Credit need not be given to out-of-state same-sex marriages, 1001

WHITTINGTON, KEITH E.
Comparing the presidential impeachments of Andrew Johnson and Bill Clinton, 835

WIGMORE, JOHN H.
Discussion of judges taking judicial notice of facts, 105

WILDENTHAL, BRYAN H.
Arguing that the Bill of Rights should be considered a privilege or immunity under the 14th Amendment Privileges or Immunities Clause, 1073
WILKINS, DAVID
Analysis of affirmative action in American law schools, 1145

WILKINS, ROGER
Views of the founding fathers on slavery, 1060

WILLIAMS, M. MATTHEW
Arguing that the Seventh Amendment should be held incorporated into the 14th Amendment, 995

WILLIAMS, NORMAN R.
Arguing that the dormant commerce clause should not be viewed as implied congressional intent, but a constitutional rule, 876

WILLIAMS, STEPHEN F.
Discussing balancing arguments of literal text and purpose in interpretation, 141

WILLIE, CHARLES V.
Brown v. Board was a catalyst for many changes in civil rights laws and society, 1128

WILLS, GARRY
Declaration of Independence reflected moral sense of Hutcheson, Hume, and Adam Smith, 269
Enlightenment philosophers rejected Hobbes’ rational self-interest basis for moral reasoning, 510
Underlying the Declaration of Independence was belief in justifying the right of revolution, 1053

WILMARTH, ARTHUR E.
Discussing support for a bill of rights by Jefferson and others, 986

WINK, WALTER
Noting that St. Paul’s views on homosexual behavior assumed all persons were heterosexual, 524

WOHL, ALEXANDER
Discussion of pragmatism in Court determinations of what is state action, 919-20

WOOD, R. CRAIG
Discussing a fundamental right to education found by state courts, reducing somewhat unequal funding between rich and poor districts, 1213

WOODS, JOSEPH A., Jr.
Discussing what is an impeachable offense, 836

Page 1834
WOLF, JAMES C.
Courts should interpret treaties in a way that will preserve amity among nations, 750

WRIGHT, BENJAMIN F.
Taney Court use of the Contracts Clause to strike down state legislation 18 times, 954
Use of the Contracts Clause from 1873-1900 to strike down state laws in 39 cases, 955

WRIGHT, CHARLES ALLEN
Discussing whether certain officials are local or state officials under 11th Amendment immunity, 604

WRIGHT, JAMES L.
Arguing that the Seventh Amendment should be held incorporated into the 14th Amendment, 995

WRIGHT, NANCY
Standards for appellate review of findings of fact, 83

YANNELLA, PHILIP N.
“Under God” appears to violate a strict neutrality command not to endorse religion, 1600-01

YIN, TUNG
Discussing detention of enemy combatants, 1026

YOO, JOHN
A law clearly violating the Constitution is not made “in pursuance” of the Constitution, 559
Criticism of American courts for following European theories of constitutional democracy, 572
Discussion of the War Powers Resolution and the War on Terrorism, 787
Formalists usually do not consult foreign precedents when interpreting the Constitution, 288-89
Judicial review of legislative action grew in the states after Marbury v. Madison, 557-58, 569
Presidential power to terminate a treaty unilaterally, 784
The limited impact of the Court’s sovereign immunity rulings, 616

YOSIFON, DAVID
Discussion of Llewellyn’s concept of the “situation-sense” of a case, 47
YOUNG, ERNEST
Burke,
    advised founders to lay out broad standards, leaving applications to the future, 362-63
    advised meeting current needs in light of government practice and judicial precedents,
    and placed little reliance on original structure and theory, 364, 367
    favored interpretation consistent with moral concepts of the framers and ratifiers
    elaborated by traditional common-law methodology, 382
    rejected Enlightenment faith in moral theory produced by human reason, 266
Burke’s thinking evolved during his lifetime, 261
Comments on the constitutionality of preemptive federal maritime law as a matter of federal
common law, 902
Description of the natural law model of constitutional interpretation, 356, 379-80
Limits of human rationality require a Constitution adaptable to unforeseen difficulties, 383
Natural law method rejects strong deference to the legislature of the Holmesian approach, 363
Use of natural law in 18th-century and 19th-century decisionmaking, under either Enlightenment
or Burkean theory, 355

Z

ZEBOT, JULIAN CYRIL
Discussing the issue of discriminatory effects versus discriminatory purpose in dormant
commerce clause cases, 875-76

ZEINER, CAROL L.
Discussing standards for review of school speech codes, 1421-22

ZELNIKER, LINDSAY
Discussings possible enforcement mechanisms in international law, 751

ZEPPOS, NICHOLAS S.
Discussing the Legal Process school of interpretation, 51
Noting Chief Justice Rehnquist’s and Justice Kennedy’s occasional support for Justice Scalia’s
    “New Textualism” model of statutory interpretation, 153, 323
Noting Justice Scalia’s use of related provisions to determine plain meaning, 282-83
Many formalists consider purpose only if literal meaning is ambiguous or absurd, 140, 282

ZIEGLER, DONALD H.
Discussing attention state courts pay to lower federal court decisions to determine what the
    Supreme Court might hold, 562
ZIETLOW, REBECCA E.
Noting that the Court has given Congress virtually unreviewable spending power under the *Dole* case, 744
The framers of the 14th Amendment intended Congress, not the courts, to be the primary protector of civil rights, 1327

ZIFF, DAVID J.S.
Discussing the particularity requirement of the Fourth Amendment search and seizure clause applied to search of materials on a computer, 1011

ZIMMERMAN, DIANE LEENHEER
Discussing how the 10-hour work week statute for women only in *Muller v. Oregon* in practice discriminated against women in the workplace, 1163

ZLOTNICK, DAVID M.
Discussing use by Justice Scalia of specific legislative and executive traditions when interpreting the Due Process Clause, 288
ABORTION
Government funding of, 1214, 1271
Informed consent requirements, 1271
Medical emergency exceptions concerning,
   mental health exception, 1277
   physical health exception, 1277-78
Minor’s rights and, 1271, 1276
Morality of abortion prior to viability, 521-22
Parental notification and consent statutes, 1271, 1276
Spousal notification statutes, 1275
Planned Parenthood v. Casey analysis, 1274-77
Roe v. Wade analysis, 1267-72
Undue burdens versus less than undue burdens on, 1275-77
Waiting period statutes, 1276

ABSTENTION DOCTRINE
Burford abstention, 618
Pullman abstention, 617-18
Rooker-Feldman abstention, 618-20
Younger v. Harris abstention, 616-17
ACCESS TO COURTS
As a fundamental right, 1203-04
Substantial burdens versus less than substantial burdens on, 1204

ADEQUATE, INDEPENDENT STATE GROUNDS
Determining if adequate, independent state grounds exist, 589-91
Exception when state law would frustrate vindication of federal constitutional rights, 589
State supreme courts as authoritative interpreters of state constitutions and statutes, 562, 588-89
Supreme Court refusal to hear cases that rest of adequate, independent state grounds, 589-90

ADmiralty power, 746, 902-03

Advisory Opinions
Distinguished from cases which have become moot, 676-77
Distinguished from collusive suits and test cases, 676
Permitted in some state courts under state Constitutions, 675-76
Not permitted in the federal courts, 675

Advocacy of Illegal Conduct
Cases involving true threats, 1438-42
Classic cases of advocacy of illegal conduct,
  development of “clear and present danger” test, 1433-35
  modern Brandenburg test of “imminent incitement likely to occur”, 1433, 1435-37
Hate crimes legislation, 1442-44
Hate speech legislation, 1444-45

Affirmative Action
Gender-based, 1176-78
Race-based,
  as applied Pre-Bakke, 1128-29
  Bakke approach, 1129-31
  post-Bakke approach during the instrumentalist era, 1131-33
  post-Bakke approach during the modern natural law era, 1133-39
  school admissions decisions, 1139-46
Socio-economic-based, 1144-45

Age Classifications
See Equal Protection, Classifications involving rational basis scrutiny

ALIENAGE CLASSIFICATIONS
Federal regulation of aliens triggering minimum rational review, 1160-61
State regulation of illegal aliens,
  regulation of adults triggering minimum rational review, 1158
  regulation of children of illegal aliens triggering intermediate scrutiny, 1158-60
State regulation of resident aliens,
  burdens on resident aliens triggering strict scrutiny, 1155-56
  political functions exception triggering minimum rational review, 1156-58
State regulation preempted by federal law, 1158

AMENDING THE UNITED STATES CONSTITUTION, 821-25

APPLIED VERSUS FACIAL CHALLENGES, 692-93

APPOINTMENT POWER
By Congress,
  appointing legislative officials, 833
  Senate advice and consent power, 799
  vesting appointment for inferior officers in the President, head of department, or courts of law, 799-800
By the courts,
  power to appoint administrative judicial officials and briefing clerks, 235, 800
  power to appoint inferior officers if authorized by Congress, 799-800
By the President,
  power to appoint inferior officers if authorized by Congress, 799-800
  power to nominate executive officers, subject to advice and consent by the Senate, 799
  power to nominate judicial officers, subject to advice and consent by the Senate,
    lower federal court judges, 232-34
    Supreme Court justices, 228-29
Recess appointment power, 234, 803-04
Vacancies Act and appointment power, 804-05

APPORTIONMENT OF VOTING DISTRICTS
See Gerrymandering

ARTICLE IV, § 2 PRIVILEGES AND IMMUNITIES CLAUSE
Applicable to citizens/residents of a state, but not corporations, 891-92
Applicable to “fundamental” activities “sufficiently basic to the livelihood of the nation”, 890-92
Intermediate scrutiny and, 893-95
Not applicable to recreational or other activities not “sufficiently basic to livelihood”, 892-93

ASSEMBLY, RIGHT OF,
See Right to Assemble

ASSERTING RIGHTS OF THIRD PERSONS, 665-66

ASSISTANCE OF COUNSEL
Ineffective assistance of counsel, 1030-32
Right to, 1030

ASSOCIATION, FREEDOM OF,
See Freedom of Association

ATTORNEYS’ FEES
Availability despite the Eleventh Amendment, 602
Availability under § 1983 and other civil rights statutes, 584

B

BALANCING TESTS
Defined, 71-72, 179
Formalists less likely to use, instrumentalists more likely to use, 73-76
Kinds of balancing tests,
   elements to meet, 180-81
   factors to weigh, 179-80
Need for inquiries into ends, burdens, and benefits, 72-73, 181-82
On seven kinds of balancing tests, see Standards of Review

BANKRUPTCY
Eleventh Amendment issues and, 603
Judges and Article III considerations, 596
Power of federal government over, 744
Power of state governments over, 954

BILL OF RIGHTS
History of the original purpose and drafting, 551, 1044-45
Incorporation into the 14th Amendment,
   formalist era, 1237-40
   Holmesian era, 1240-41
   instrumentalist era, 1241-43
   modern natural law era, 1243-44
   original natural law era, 1235-37
Listing of the few Bill of Rights provisions not incorporated into the 14th Amendment, 1243-44
BILL OF ATTAINDER, 1037-39

BORROWING POWER OF FEDERAL GOVERNMENT, 744

BROADCAST MEDIA, REGULATION OF,
Content-based regulations as triggering intermediate review, 1483-84
Distinguished from cable television, 1484-85

BURKEAN CONSTITUTIONAL INTERPRETATION
See Natural Law Constitutional Interpretation, Variations in the natural law approach

CABLE TELEVISION REGULATION
Standard of review somewhere between intermediate review and strict scrutiny, 1484-87, 1496-97
Indecency and, 1460-62

CAMPAIGN FINANCING AND SPEECH REGARDING ELECTIONS,
Disclosure requirements in contributions, expenditures, and election of candidates, 1498, 1510-13
Speech relating to campaign financing,
  limitations on expenditures as triggering strict scrutiny, 1497-1502
  limitations on contributions as triggering intermediate review, 1498, 1502-10
Speech relating to the choice and election of candidates for legislative and executive office, 1513-16
Speech relating to the choice and election of judges, 1516-22

CASE OR CONTROVERSY REQUIREMENT
See Jurisdiction of the Federal Courts, Case or controversy requirement

CATEGORICAL TESTS
Defined, 70-71, 89
Use of elements to meet in categorical tests, 71, 76-77, 189-90
Use of factors to weigh in categorical tests, 77, 190-91

CHANGE IN DOMINANT INTERPRETATION STYLES: FIVE ERAS
Classic account of five eras of constitutional interpretation: original natural law, formalism
  Holmesian, instrumentalism, and modern natural law, 405-15
Critical legal studies perceives the same five eras as identified by traditional analysis, 416-18
Six different kinds of case outcomes reflected during the five eras: original natural law, original
  formalist, Holmesian, instrumentalism, modern formalist, and modern natural law, 418-22
Table of Justices reflecting the different interpretation styles, 423-24
CHECKS AND BALANCES
Federalism checks and balances,
  congressionally granted power to states to enter interstate compacts, 838, 898
dormant commerce clause review, see Dormant Commerce Clause
Eleventh Amendment state sovereign immunity, see Eleventh Amendment
federal common law, see Federal Common Law
privileges and immunities clause of Article IV, § 2, see Article IV, § 2 Privileges and
  Immunities Clause,
supremacy clause and preemption, see Preemption; Supremacy Clause
Tenth Amendment protection for states, see Tenth Amendment
Separation of powers checks and balances,
  constitutional structures in place and operating, 813-17
election issues regarding Congress, 832-34
election issues regarding the President, 825-32, 1207-12
immunities from suit of Congress and the executive, see Immunities from Suit
impeachment power of Congress, 834-36
judicial immunity, 849
sovereign immunity of the United States from suit, 849-51
Structural checks and balances generally,
  federalism, see Federalism
  judicial review, see Judicial Review
  separation of powers, see Separation of Powers
Summary of checks and balances issues, 552

CHILDREN
Abortion rights,
  in general, 1271, 1276
  parental notification or consent statutes, with judicial bypass, 1271, 1276
Curfew statutes, 1287
Equal protection clause analysis,
  illegal alien children, 1158-60
  in general, 1189-90
Indecency,
  children as participants, 1455-57
  children in the audience, 1457-64, 1485-86
Obscenity,
  definition perhaps different if viewed by children, 1456, 1458
  focus of prosecutions on child pornography, 1453-54

CITIZENSHIP CLAUSE OF THE FOURTEENTH AMENDMENT
Ability to waive United States citizenship, 1070
As response to Dred Scott, 1069-70
“Born or naturalized in the United States” language, 1070
Citizen of the state “wherein they reside” language, 1069
Congressional power to grant citizenship to non-14th Amendment citizens, 1070

CIVIL LAW SYSTEMS
Compared to common law systems, 64-65
Continental European countries as adopting, 64-65, 69-70, 173
Deductive reasoning in, 64-65
Law elaborated in detailed codes in, 178, 999
Precedent and, 84-85
Specific examples of,
- German Constitution and organizing principle of human dignity, 571
- Napoleonic Code and deductive judicial decisionmaking, 178
- Swiss Code and instrumentalism, 70

CIVIL WAR AMENDMENTS
See Thirteenth Amendment
See Fourteenth Amendment
See Fifteenth Amendment
Congressional power to enforce, see Congressional Power to Enforce the Civil War Amendments

CLASS ACTIONS
Diversity requirement and, 584
Mootness doctrine and, 677

COINAGE OF MONEY
Federal power over, 744
Legal Tender cases, 560
Limitations on state power, 764

COMMERCE CLAUSE
Federal power regarding commerce “with foreign nations”, 735-36
Federal power regarding commerce “with the Indian tribes”, 736-39
Federal power regarding commerce “among the several States” during,
- formalist era, 718-20
- Holmesian era, 720-23
- instrumentalist era, 723-24
- modern natural law era, 724-35
- original natural law era,
  - Marshall Court, 712-16
  - Taney Court, 716-18
Limitations on state power to regulate, see Dormant Commerce Clause; Preemption
Modern test,
- what is “commerce”, 728-30
- what is commerce “among the several States”, 725-28
Rational review deference to legislative judgment and, 724
Recent cases, 730-35

*Wickard* aggregation principle, 721, 731

**COMMERCIAL SPEECH REGULATIONS**

Defining commercial speech, 1487
Development of First Amendment free speech protection, 1487-89

*Central Hudson* intermediate review with bite test, 1489-90

Examples of *Central Hudson* test applied,

- in general, 1491-96
- lawyer solicitation and advertising cases, 1491
  - *Posadas* and its “greater includes the lesser” reasoning as watered-down review, 1491-93
  - rejection and overruling of *Posadas* in *44 Liquormart*, 1494-95

Traditional refusal to grant First Amendment protection to, 1487

*See* Intermediate Review, Intermediate review with bite

**COMPARATIVE PERSPECTIVES ON CONSTITUTIONAL LAW**

Kinds of,

- geneological comparativism, defined as practices in other countries at time of ratification, such as England, influencing choices made by the framers and ratifiers, 114
- ahistorical comparativism, defined as practices in other countries not directly related to choices made by the framers and ratifiers, 332

Use by judicial decisionmaking styles,

- formalist embrace of geneological comparativism, rejection of ahistorical comparativism, 150, 288
- Holmesian embrace of geneological comparativism, rejection of ahistorical comparativism, 312
- instrumentalist embrace of both geneological and ahistorical comparativism, 164-65, 332
- natural law embrace of geneological comparativism and ahistorical comparative perspectives on universal principles of natural law, 164-65, 365-66

**COMPULSORY ATTENDANCE OF WITNESSES IN CRIMINAL TRIALS**

Limitations on, 1030
Right to, 1030

**CONFRONTATION OF WITNESSES IN CRIMINAL TRIALS**

Limitations on, 1028-30
Right to, 1028

**CONGRESS**

Article I, § 8 enumerated powers,

- admiralty and maritime, 746
- commerce,
  - among the several States, *see* Commerce Clause
  - with foreign nations, 735-36
with the Indian Tribes, 736-39
copyright and trademarks, 745-46
fiscal matters,
    bankruptcy power, 744
    borrowing money, 744
    coining money, 744
    punishing counterfeiting, 744
foreign affairs, 782-85
immigration and naturalization,
    deportation, 745
    immigration, 745
    naturalization, 745
jurisdiction of federal courts, see Jurisdiction of the Federal Courts
military matters, 746-48, 785-89
necessary and proper clause, 708-11, 744-45
post offices and post roads, 745
power over the District of Columbia, 595, 612, 752-53
power over territories, 752
property clause, 752-53
punishing offenses against the law of nations, 746
punishing piracy, 746
spending power, see Spending Clause
taxing power, see Federal Taxing Power
treaty power, 748-52
Bicameralism and Presentment Clause, 793-95
Immunities of, see Immunities from Suit
Impeachment powers of, 834-36
Procedures regarding elections,
    House of Representatives,
        census enumeration and, 834
        general rules concerning, 832-33
    Senate, 833
Power over executive officials,
    legislative oversight in general, 795-96
    power to investigate and issue subpoenas, 795
    role in appointment, see Appointment Power
    role in removal, see Removal Power
Power to delegate law-making function to the president or administrative agencies, 773-77
Power to suspend the writ of habeas corpus, 1041
Statutes passed, see Legislation
Supremacy Clause, 855
Veto power,
    unconstitutionality of a legislative veto, 793-96
    unconstitutionality of giving the president a line-item veto, 796-98
CONGRESSIONAL POWER TO ENFORCE THE CIVIL WAR AMENDMENTS
Introduction, 1324-28
13th Amendment, 1328-30
14th Amendment, 1330-37
15th Amendment, 1337-39

CONSTITUTION OF THE CONFEDERATE STATES OF AMERICA, 431, 601, 1931

CONSTITUTION OF THE UNITED STATES
Ratification of, 819-20
Summary of provisions, 548-51, 1910-14
Text, 1914

CONSTITUTIONAL CONVENTION, 703-05, 821

CONTEMPORANEOUS SOURCES OF INTERPRETATION
Defined, 100
Interpretation of the Constitution by use of contemporaneous sources, 134
context,
  basic elements of context, restrictive versus receptive use, 143-45
  structural elements of context,
    federalism, 147-48
    judicial review, 145-46
    separation of powers and checks and balances, 148-49
history,
  legislative history versus other historical sources, 149-56
  specific versus general historical intent, 156-59
text,
  the debate between literal versus purposive interpretation of text, 140-43
  the debate between subjective versus objective interpretation of text, 134-40
List of contemporaneous sources, 100
Relevance of contemporaneous sources to the meaning of the Constitution,
context,
  basic elements of context,
    in general, 105-06
    policy maxims, 107-08
    related provisions and other contextual considerations, 108-09
    verbal maxims, 106-07
  structural elements of context,
    basic considerations in general, 109
    federalism, 112-13
    judicial review, 110-12
    separation of powers and checks and balances, 113
CONTRACEPTION
Access to as a fundamental right, see Substantive Due Process, Modern unenumerated fundamental rights analysis,
Issues regarding morality of, 516-17, 521

CONTRACTS CLAUSE
Basic doctrine,
initial requirement of substantial impairment of contract rights, 952, 958
minimum rational review for general law substantially impairing contract rights, 951-52
second-order rational review,
   laws targeting a narrow range of contract actors, 958-59
   self-interested legislature impairing rights under its own public contracts, 958
Decisions in various eras,
formalist era, 955-56
Holmesian era, 957
instrumentalist era, 957-59
modern natural law era, 959-60
original natural law era, 952-55
Federal impairment of contracts, 960

COPYRIGHT POWERS
See Congress, Copyright and trademarks

CORPORATIONS
As person protected under the 14th Amendment due process and equal protection clauses, 1085, 1291
Campaign finance and, 1502-04, 1509
Commercial speech of corporations, see Commercial Speech Regulations
Compelled speech of corporations and freedom of speech, 1409-12
Lochner-era liberty of contract protection and, 1248-54
Pro-corporative bias of conservative formalist era Supreme Court, 436-41
COURTS, FEDERAL
Article I courts, 595-97
Article II courts, 597
Article III courts,
  life-tenure and no diminution in salary protections, 228-29
lower federal courts,
  congress ability to create, 592
  current court structure, 592
jurisdiction of,
  Bivens jurisdiction, 585-87
  diversity jurisdiction, 584
  federal question jurisdiction, 583-85
  in general, see Jurisdiction of the Federal Courts
  other statutory grants, 584
  section 1983, 583-84
rules regarding appointment, 228-29
rules regarding recusal, 238-40
United States Supreme Court,
  appellate jurisdiction, 583-85
  original jurisdiction, 575, 580-83
  procedures regarding deciding cases, see Supreme Court Decisionmaking Process
rules regarding appointment, 228-29
rules regarding recusal, 238-40

COURTS, STATE
Advisory opinions permitted in some state courts under state Constitutions, 675-76
Authoritative interpreters of state law matters, 588-89
Commandeering of state court judges to enforce federal law, 760-61
Removal of cases from state courts to federal courts, 591-92
Rules regarding appointment or election to state courts, 229, 1516-17

COURT-MARTIAL PROCEEDINGS
See Military Courts

CRIMINAL DEFENDANTS’ RIGHTS
In general, 1002-03
Prohibition of bills of attainder, 1037-39
Prohibition on ex post facto laws, 1039-41
Right to habeas corpus, 1041-43
See Fourth Amendment; Fifth Amendment; Sixth Amendment; Eighth Amendment

CRITICAL LEGAL STUDIES
Basic definition of, 346-47
The eras of American legal history viewed from the perspective of Critical Legal Studies, 416-18
DEATH
See Procedural Due Process, Life interests; Right to Die

DECISIONMAKING STYLES
As efficient causes of judicial decisionmaking, 17, 35
Four styles of judicial decisionmaking,
  formalism: the analytic/positivist approach, 35-41
  Holmesian: a functional/positivist approach, 41-46
  instrumentalism: a functional/normative approach, 47-54
  natural law: the analytic/normative approach, 54-62
Styles of justices on the Supreme Court: current and recent past, 422-24
Summary of relation to views on individual rights and structural issues, 7-8
See Formalist Approach; Holmesian Approach; Instrumentalist Approach; Natural Law Approach

DECLARATION OF INDEPENDENCE
As part of justifying a right of revolution, 1053
Basic concept of equality in, 156, 434, 477, 497, 528
Behind the bill of rights, 55, 477
Government instituted to protect rights identified in the Declaration of Independence, 385
In general, 407, 479, 817, 1931
Relationship to Kohlberg’s stage 6 of moral reasoning, 487-88
Right to life, liberty, and the pursuit of happiness, 262, 269, 380-81, 428, 1050, 1065, 1084, 1255

DECLARATORY JUDGMENTS, 669-70

DEDUCTIVE VERSUS INDUCTIVE REASONING
Civil-law systems versus common-law systems and, 64-67
Deductive reasoning most often used for terms having specific definitions, 173
Deductive reasoning less likely to be used for terms having only a general meaning, 173
Defined, 64-65
Formalists more likely, instrumentalists less likely, to use deductive reasoning, 68-69
Jefferson’s use of deductive reasoning versus Hamilton’s use of inductive reasoning to determine congressional power to incorporate a national bank, 174-78

DEFAMATION AND RELATED TORTS
Classic defamation cases,
  in general, 1464-65
  consideration of proper test for public official/figure on matter of private concern, 1467-68
_Dun and Bradstreet_ test for private figure on matter of private concern, 1467
_Gertz_ test for private figure on matter of public concern, 1466-67
Sullivan “actual malice” test for public official/figure on matter of public concern, 1465-66
False light cases, 1468-69
Invasion of privacy by publication of true facts, 1469-70
Miscellaneous other tort (and contract) theories, 1471

DELEGATION DOCTRINE
See Congress, Power to delegate

DEPORTATION
See Congress, Article I, § 8 enumerated powers

DISCRIMINATION
Discrimination based on gender, see Gender Discrimination
Discrimination based on illegitimacy, see Illegitimacy Discrimination
Discrimination based on race, ethnicity or national origin, see Race Discrimination
Discrimination based on sexual orientation, see Sexual Orientation

DIVERSITY JURISDICTION
Eleventh Amendment immunity and, 600, 615
Statutory provision concerning, 584

DORMANT COMMERCE CLAUSE
Evolution of standards,
formalist era, 865-67
Holmesian era, 867-70
instrumentalist era, 870-73
original natural law era, 863-65
Modern standards,
Congress’ power to overrule Court decisions, similar to preemption doctrine, 874
Maine v. Taylor test for facial discrimination or discriminatory intent/effect, 870-71, 873-75
market participant exception, 876-78
new areas of dormant commerce clause review, 878-80
Pike v. Bruce Church test for neutral laws with burdens on interstate commerce, 871, 874
Special areas of dormant commerce clause review,
limits on business entry, 888-90
preserving resources for in-state consumption, 886-88
requiring business operations to be done in the home state, 884-86
state taxation, 883-84
Summary of general analysis, 880-82

DOUBLE JEOPARDY CLAUSE, 1015-18
DUAL THEORY OF SOVEREIGNTY, 112-13, 359, 447, 711, 766

DUE PROCESS
In civil cases, see Procedural Due Process; Substantive Due Process
In criminal cases, 1021-24

E

E PLURIBUS UNUM, 1600

ECONOMIC NATURAL LAW
Changes in common law under the influence of economic natural law, 52, 408-09
Emergence in nineteenth century, 408

EDUCATION
As compelling government interest, 1141-42
No fundamental right to equal funding, 1212-14
Religion in, see Establishment Clause, Specific examples
School desegregation cases, see Race Discrimination, Examples of

EFFICIENT CAUSE
Defined, 14-15
Efficient causes of historical development, see Efficient Causes of the Five Eras of American Law
Efficient causes of judicial decisionmaking, see Decisionmaking Styles

EFFICIENT CAUSES OF THE FIVE ERAS OF AMERICAN LAW
Introduction to, 463-64
Parallel development between decisionmaking styles and cognitive and moral development stages,
  kinds of societies in world history, 464-66
    Kohlberg’s theory of six moral reasoning stages, 466-71
    Piaget’s theory of cognitive development in individuals, 471-75
  societal development and decisionmaking styles reflecting cognitive and moral development,
    stages 1-6 and societal development in general, 476-77
    stage 3 and original natural law, 477-80
    stage 4 and formalism, 480-82
    stage 4½ and Holmesian, 482-84
    stage 5 and instrumentalism, 484-85
    stage 6 and modern natural law, 485-88
Societal development, moral reasoning, and cognitive development from an historical perspective,
  in America, 477-88
  in world history,
    Africa and, 491, 493-94
    Asia and, 488-89, 493
EIGHTH AMENDMENT
Protection against cruel and unusual punishment,
constitutioanality of the death penalty generally, 1035-36
proportionality principle and, 1035
use of legislative and executive practice to determine, 1035-36
use of social practice, both in America and elsewhere, to determine, 1032-34
Protection against excessive bail, 1037
Protection against excessive fines, 1036-37

ELECTION ISSUES
Access to ballot cases, 1204-07
Campaign finance issues, see Campaign Financing and Speech Regarding Elections
Freedom of association and, see Freedom of Association
Freedom of speech and, see Freedom of Speech and of the Press
Procedures regarding congressional elections, 832-34
Procedures regarding presidential elections, including the electoral college, 825-32, 1207-12

ELEVENTH AMENDMENT
As bar to suit against states in federal courts for money damages, 605
Exceptions to,
attorneys’ fees, 602
congressional power to override under the 14th Amendment,
in general, 605-09
intent to require state waiver must be clear, 605
intent to require state waiver must be on face of statute, not in legislative history, 605
state waiver of immunity,
as condition of receipt of federal funds, 602
by clear statement, 602, 615
by removal of case to federal court,
clear waiver if state previously waived immunity in state court, 602
not clear if state did not previously waive immunity in state court, 602
suits against municipalities or other local government entities, 603-04, 615
suits against state officials for injunctive relief, 604-05, 616
suits by other states, 600
suits by the federal government, 600, 616
suits in admiralty under in rem jurisdiction, 603
suits in bankruptcy as a form of in rem jurisdiction, 603
suits from state courts appealed to the United States Supreme Court, 602
Expansion of state sovereign immunity in *Alden v. Maine* to include barring suit in state courts, 601, 609-10

*Hans v. Louisiana* understanding barring suits against states by citizens of that state, 601

Historical background of, 599-600, 610-11

Literal text as banning only suits brought under diversity jurisdiction, 600, 615

Original interpretation of, 600-01, 611-14

Proper interpretation as banning only suits brought under diversity jurisdiction, 548, 614-16

**EMINENT DOMAIN**

*See* Takings Clause

**ENTWINEMENT**

*See* State Action, Factors involved in determining

**EQUAL PROTECTION**

As applicable to any person, citizen or alien, and including corporations, 1085

As equally applicable to state or federal action, 1083-84

Burden of proof in equal protection cases, 1101

Classifications involving intermediate review,

- gender discrimination, *see* Gender Discrimination
- illegal alien children, *see* Alienage Classifications
- illegitimacy, *see* Illegitimacy Discrimination

Classifications involving rational basis review

- age: children or the elderly, 1189-90
- disadvantages to non-resident corporations, 1188
- federal regulation of aliens, *see* Alienage Classifications
- state regulation of illegal aliens, except illegal alien children, *see* Alienage Classifications
- state regulation of resident aliens under political functions test, *see* Alienage Classifications
- physical or mental disabilities, 1190-92
- sexual orientation, *see* Sexual Orientation
- social and economic regulatory legislation, 1182-86
- wealth, 1186-87

Classifications involving strict scrutiny,

- race, ethnicity, or national origin, *see* Race Discrimination
- religion, 1161
- state regulations burdening resident aliens, *see* Alienage Classifications

Classifications which involve fundamental rights analysis,

- access to courts as fundamental right, 1203-04
- no fundamental right of equal funding of education, 1212-14
- right to travel within the United States as fundamental right, 1199-1203
- vote and have access to the ballot as fundamental right, 1204-12

Guidelines for determining what level of scrutiny to apply,

- *Carolene Products* footnote 4 in 1938, 1098-1101
- broader set of 9 guidelines today, 1095-98
Levels of review defined, *see* Intermediate Review, Rational Review, Strict Scrutiny
Questions of law versus questions of fact, 1104-05

**EQUITABLE PRINCIPLES OF STANDING, 669**

**ERAS IN AMERICAN LAW**
Evolution in original natural law era from ethical natural law to political natural law to economic
natural law (1789-1873), 406-09, 416, 428-34
Formalist approach (1873-1937), 405-06, 416, 434-43
Holmesian approach (1937-1954), 409-10, 416-17, 443-45
Reemergence of a modern natural law approach (after 1986), 411-15, 418, 447-49

**ESTABLISHMENT CLAUSE**
Development of establishment clause doctrine,
formalist approach, 1542-48
Holmesian approach, 1548-50
instrumentalist approach, 1550-57
natural law approach, 1536-42
General thoughts for the future, 1595-1604
Introduction to, 1535
Specific examples,
  display cases,
    instrumentalist era, 1588-89
    modern natural law era, 1589-95
  school cases
    instrumentalist era, 1557-67
    modern natural law era,
      religious influences within the public schools, 1581-88
      school aid cases, 1568-80

**EUROPE**
Background principle of human dignity in, 547, 571
Civil law systems and, *see* Civil Law Systems
Eras of societal development and, 488-90, 492, 509
European Court of Human Rights, 165, 571
European Union, 571
Intolerance towards moral systems reflecting intolerance toward others, 491, 516
Judicial review,
  Historical rejection of, 557
  Modern embrace of, 570-72
EXCLUSIONARY RULE
Applied to Fourth Amendment, 1111-13
Applied to Fifth Amendment, 1018-19

EXECUTIVE AGREEMENTS, 783-84

EXECUTIVE ORDER, 789-90

EXECUTIVE IMMUNITIES

FALSE LIGHT CASES, 1468-69

FAMILY RIGHTS
Reproductive rights involving procreation, access to contraception, and access to abortion, see Substantive Due Process, Unenumerated fundamental rights analysis
Right to establish a home, 1259-60
Right to raise children, 1260-63
Right to marry, 1258-59

FEDERAL COMMON LAW
Areas of uniquely federal interest,
  admiralty and maritime cases, 902-03
  general federal common law doctrine of Swift v. Tyson, overruled by Erie, 903
  interstate and international disputes, 900-02
  rights and obligations of the United States, 899-900
Congressionally delegated power to courts to develop law,
antitrust laws, 904
incorporation into federal statutes of state common law, 905
issues of procedures and remedies, 905-07
law relating to collective bargaining, 904
Introduction to, 895-99
Preempted by congressional statutes, 899

FEDERAL QUESTION JURISDICTION, 583-85

FEDERAL TAXING POWER
Income tax constitutional under Sixteenth Amendment, 741
Intergovernmental immunities and, 852-53
Limitation on coercive attempts to regulate through use of taxing power, 740-41

FEDERALISM
Background in constitutional structure and history, 700-05
Conservative versus liberal predispositions on, 147-48
Different perspectives on, 112-13
Limits on commerce clause power, see Commerce Clause, Modern test
Natural law approach of *McCulloch v. Maryland*, 705-12
Specific limitations on federal power in the Constitution, see Specific Limitations on Federal Power
Tenth Amendment limits on congressional power, see Tenth Amendment
Eleventh Amendment limits on congressional power, see Eleventh Amendment

FEDERALIST PAPERS, THE,
Specific selections,
   No. 10, 479
   No. 27, 220-21, 761
   No. 37, 367
   No. 43, 821
   No. 46, 329
   No. 51, 243, 771
   No. 55, 68
   No. 67, 803-04
   No. 78, 168, 196, 570
   No. 81, 612
Use in constitutional interpretation generally, 114-15, 150, 152, 360

FIFTEENTH AMENDMENT
Enforcement by Congress in the Voting Rights Act of 1965, 1080-81
Interpretation and applications of the Voting Rights Act of 1965, 1081-82
Race discrimination in voting laws or practice banned by the Amendment, 1077-78
Relatively ineffective until the Voting Rights Act of 1965, 1079-80
FIFTH AMENDMENT
Double jeopardy, 1015-18
Due process, 1021-24
Grand jury indictment, 1014-15
Self-incrimination, 1018-21
Waiver of Fifth Amendment rights, 1013-14

FIGHTING WORDS
Definition of, 1445-47
Limited application of, 1447-48

FINAL CAUSE
Defined, 14-15
Final causes and eras of American law, see Moral Reasoning, Stage 6 moral reasoning as final cause
Final causes of the United States Constitution, see Purposes or Ends of Constitutional Interpretation

FIRST AMENDMENT
See Establishment Clause; Free Exercise Clause; Freedom of Association; Freedom of Speech and of the Press; Right to Assemble

FISCAL POWERS, 744

FLAG DESECRATION STATUTES, 1364, 1369-71

FOREIGN AFFAIRS,
Judicial power concerning,
  interpretation of international law, 572, 785, 900-02
  interpretation of treaties and executive agreements, 750-51, 785
  political questions doctrine and, 682-83, 685-86, 692, 784
Legislative delegation of power to the president, 773-77
Legislative power over,
  commerce with foreign nations, 735-36
  foreign affairs, 782-85
  military matters, 746-48, 785-89
  treaties, 748-52
Presidential power over,
  diplomatic matters, as head of state, and person to whom ambassadors report, 749, 782
  issue of whether executive power includes general power over foreign affairs, 782-83
  making executive agreements, 750, 783-84
  negotiating and withdrawing from treaties, 749-51, 784-85
  recognizing foreign countries, 686
  take care laws be faithfully executed clause as limit on presidential power, 781-82
FORM OR SHAPE OF JUDICIAL DECISIONMAKING
How judicial perspectives combine into four judicial decisionmaking styles, 30-34
Introduction to the form or shape of judicial decisionmaking, 19
Judicial perspectives on,
the nature of the judicial task,
  positivist versus normative approaches in terms of Aristotle’s four causes: material,
      formal, efficient, and final,
          the normative view, 29-30
          the positivist view, 29
  positivist versus normative approaches to the judicial task, 25-26, 28
the nature of the law,
  analytic versus functional approaches in terms of Aristotle’s four causes,
      efficient causes and the nature of law, 23
      final causes and the nature of law, 23-25
      formal causes and the nature of law, 22-23
      material causes and the nature of law, 21-22
  analytic versus functional approaches to the nature of law, 20-21

FORM OR SHAPE OF LEGAL DOCTRINE GENERALLY
Absolute, categorical rights versus balancing tests, 70-76
Elements versus factors, 76-78
Issues of fact versus issues of law, 82-84
Rules versus standards, 79-82

FORM OR SHAPE OF CONSTITUTIONAL LAW DOCTRINE
Balancing tests in constitutional doctrine, 179-89
Categorical tests in constitutional doctrine, 189-91
Law versus fact in constitutional doctrine, 194-96
Rules versus standards, 192-94
See Balancing Tests; Categorical Tests; Law versus Fact; Rule versus Standards; Standards of Review

FORMAL CAUSE
Defined, 15-16
Formal causes and the eras of American law, see Eras of American Law
Formal causes and judicial decisionmaking, see Decisionmaking Styles

FORMALIST APPROACH
Analytical/positivist approach, 35
Concentration on formal aspects of law, 35
Examples of values protected by formalism
  from contract law (the mailbox rule), 36-37
  from tort law (the Hynes case), 38-39
Formal causes and, 17, 277
Literal, plain meaning emphasized,
golden rule, 40, 280-81
in general, 39, 280
literal rule, 40, 280
plain meaning rule, 40, 281-82
Langdell’s support for formalism, 36
Textualism described by Justice Scalia, 39
Use of arguments of logic, 35-36
Views of formalists regarding other interpretation styles, 40-41

FORMALIST CONSTITUTIONAL INTERPRETATION
Formalist approach combined with affinity for another interpretation style, 301-02
Introduction to formalist constitutional interpretation, 277-78
Justices who have used the formalist style, see Table of Names, Justices
Static constitutional model of interpretation and, see Static Constitution Theory
Table 9.3 on formalist use of sources, 293-94
Treatment of
contemporary sources of interpretation,
context, 282-83
history, 285-86
text, 278-82
subsequent developments,
legislative, executive, and social practice, 287-90
precedents, 86, 290-91
prudential considerations, 291-93
Variations in the formalist approach,
conservative versus liberal formalism, 299
extreme versus moderate formalism, 295-99
literal text versus specific historical intent formalism, 300

FORUM, PUBLIC OR NON-PUBLIC
See Freedom of Speech, The public versus non-public forum distinction,

FOUR CAUSES AS USED IN THIS BOOK
Understanding the causes of constitutional interpretation,
application of causal analysis in the four parts of this book, 15
efficient, final, formal, and material causes, 14-15
Use of the four causes in each part of this book, 16
efficient causes and decisionmaking styles, 17
final cause in decisions and opinions, 17-18
formal cause or shape of constitutional law, 17
material causes of constitutional law, 16
FOURTEENTH AMENDMENT
Background to, 1056-57, 1071-73, 1077-78, 1086-87, 1324-26
Citizenship clause, see Citizenship Clause
Due process clause, see Due Process
Equal protection clause, see Equal Protection
Privileges or immunities clause, see Privileges or Immunities Clause of Fourteenth Amendment
Provisions on voting, 1077-78, 1206
Right of Congress to enforce, see Congressional Power to Enforce the Civil War Amendments
State action requirement, see State Action

FOURTH AMENDMENT
Areas of recent concern (modern technology, computers, the Internet, and war on terror), 1010-11
Burden on challenger to establish search or seizure occurred, 1003-04
Burden on government to establish reasonableness of search or seizure, 1004
Exclusionary rule applied to, 1113-14
Holmesians less likely, instrumentalists more likely to find violations of, 1009-10
Protection against unreasonable searches and seizures,
combined subjective/objective approach to, 1004-05
Terry stop and search doctrine, 1010
warrant based upon probable cause requirement, 1006
Special needs exception to, 1006-09
Waiver of, 1005

FREE EXERCISE CLAUSE
As applicable to sincerely held religious beliefs, 1604-07
As incorporated into the 14th Amendment, 1607
Historical development of free exercise doctrine,
formalist era, 1608-09
Holmesian era, 1609
instrumentalist era,
minimum rational review for government conduct affecting religion, 1611-12
strict scrutiny for government laws burdening religion, 1609-11
modern natural law era,
minimum rational review for neutral government laws burdening religion, 1613, 1615
strict scrutiny,
direct discrimination against religion, 1612-13
hybrid claim of fundamental right combined with burden on religion, 1612-13
unemployment compensation claims under Sherbert v. Verner, 1612
original natural law era, 1608
Introduction to, 1604, 1607-08
Validity of Congressional attempts to require strict scrutiny for government laws burdening religion,
as not violating the Establishment Clause, 1556-67
constitutional as applied to federal laws under Article I, § 8 enumerated powers, 1614
unconstitutional as applied to state laws under § 5 of the 14th Amendment, 1613-14

Page 1861
FREE PRESS VERSUS FAIR TRIAL, 1425-28

FREEDOM OF ASSOCIATION
General considerations, 1524
Specific examples of,
  elections and political parties, 1533-34
  eliminating discrimination versus selective membership criteria, 1525-30
  membership in groups alleged to pose a threat of violence or other harm, 1530-33

FREEDOM OF SPEECH AND OF THE PRESS
Content-based versus content-neutral regulations in a public forum or on private property,
  content-based versus content-neutral distinction, 1363-66
  intermediate review for content-neutral regulations of speech,
    content-neutral secondary effects cases, 1371-77
    content-neutral time, place, or manner cases, 1377-79
  recent controversies over how to apply the intermediate scrutiny test in cases
    involving secondary effects or time, place, or manner regulations, 1380-86
  strict scrutiny for content-based regulations of speech
    strict scrutiny for content-based, non-viewpoint discrimination cases, 1369-71
    strict scrutiny for viewpoint discrimination cases, 1369
  viewpoint discrimination versus non-viewpoint or subject-matter only regulation, 1367-68
Content-based versus content-neutral regulations in a non-public forum
  strict scrutiny for viewpoint discrimination, 1355, 1386-87
  minimum rational basis review for subject-matter or content-neutral regulations, 1355,
    1358-59, 1386, 1389-90
Exceptions to standard freedom of speech doctrine,
  See Advocacy of Illegal Conduct

**G**

**GENDER DISCRIMINATION**
Affirmative action and, 1176-78
“Exceedingly persuasive justification” as best understood as a form of intermediate review, 1170-71
Failure to ratify the Equal Rights Amendment, 823, 1164
Justification for intermediate review in terms of immutable characteristics and history of discrimination, 1097, 1165
Level of review,
  as triggering intermediate review since 1976, 1165-74
  standard of review in flux between 1971-75, 1164-65
  triggering minimum rational review before 1970, 1161-64
Problems in identifying gender discrimination, 1174-76
Use of plausible government purposes as well as actual government purposes in, 1171, 1180-81
GENERALIZED GRIEVANCES, 659-60

GENEVA CONVENTIONS, 597, 788-89, 1310, 1317-20, 1624

GERRYMANDERING
Political gerrymandering, 684, 687, 692
Population gerrymandering,
  regarding federal elections to the House of Representatives, 318-19, 1206
  regarding state elections to state houses or state senates, 318-19, 1206
Race-based, 1146-51

GOVERNMENT AS EMPLOYER
Regulating political activities of public employees, 1479-82
Regulating speech of public employees,
  defining whether speech is on matters of public concern, 1475-77, 1478-79
  minimum rational review for speech not on matters of public concern, 1477-78
  Pickering test for speech on matters of public concern, 1473-75
  pre-Pickering approach, 1472-73
Freedom of speech and association and the Hatch Act, 1479-80
Patronage hiring and firing, 1480-83

GRAND JURY INDICTMENT, 1014-15

GUARANTEE CLAUSE
As typically a political question, 682-83, 692, 768
Substantive decisions based on, 768-70

H

HABEAS CORPUS
Basic rules concerning, 1041-43
Limiting court jurisdiction to hear cases involving, 593-95, 1043, 1319-21
Suspension of, 1041

HATE CRIMES, 735, 1442-44

HATE SPEECH, 1444-45
HISTORY
Deliberative use versus forensic use,

deliberative use defined as prudential consideration of likely consequences based on historical experience, 114

forensic use defined as focus on framer and ratifiers’ intent, 114

Formalists more likely to focus on specific historical evidence and specific intent, 115-16

Specific versus general historical evidence, from a forensic perspective,

general historical evidence,

legislative and executive practice, and judicial precedents, at time of ratification, 114

social practice of individuals and organizations at time of ratification,
in general, 114

judicial decisionmaking styles,

formalist rejection of use, 163-64, 285-86

Holmesian,

embraced by some Holmesians, 164, 309

rejected by some Holmesians, 163-64, 309

instrumentalist embrace of, 164-65, 331-32

natural law embrace of, 164-65

specific historical evidence,

contemporaneous statements about, like The Federalist Papers, 114, 150

legislative or constitutional history of provision,
in general, 114

judicial decisionmaking styles,

formalist rejection of use, 152-53, 155-56

Holmesian,

embraced by some Holmesians, 153-54, 307-08

rejected by some Holmesians, 151-52

instrumentalist embrace of, 154

natural law,

rejection by some original natural law judges, 150, 360

embraced by modern natural law, 150, 153-55, 361

Specific intent versus general intent, from a forensic perspective,

general intent,

in general, as focusing on concepts or abstract intent of framers and ratifiers, 115-16

judicial decisionmaking styles,

formalist very limited use of, 159, 286

Holmesian limited use of, 158-59, 308-10, 363-64

instrumentalist embrace of, 156-58, 330-31

natural law embrace of, 156-57, 361-63

specific intent,

in general, as focusing on specific conceptions of framers and ratifiers, 115-16

judicial decisionmaking styles,

formalist predominant focus on, 286

Holmesian use of, 308-10
instrumentalist use of, 330-31

natural law use of, 361-63

**HOLMESIAN APPROACH**

Defined,
- a functional/positivist approach, 41, 45-46
- general purpose of text is more important than any rule of grammar or logic, 41-42, 44-45
- judges should interpret the Constitution, not change it, 41

Disagreement with formalists,
- law should be responsive to felt necessities more than logic or symmetry, 44
- law’s life has not been logic; it has been experience, 41

Factors associated with its emergence, 409-10

Importance of certainty and predictability, 42

Interpretation theory asking objectively what words mean to a normal speaker of English, 42, 304

Material causes and, 17, 277

Preference for external, objective standards, 42

Prudential considerations
- Holmesians reject using a judge’s own prudential policies, 314
- Holmesians use contemporaneous, practice, precedent, and restraint, 313

Skeptical of moral systems, 43

*Stare decisis* will be adhered to as making the law more reliable, certain, and knowable, 42

Use of arguments of logic and purpose, 35

Values defined by will of dominant group in society, 41, 43

**HOLMESIAN CONSTITUTIONAL INTERPRETATION**

Introduction to Holmesian decisionmaking in constitutional law, 303

Justices who have used the Holmesian style, *see* Table of Names, Justices

Table 10.3 on Holmesian use of sources, 315-16

The Holmesian approach, combined with affinity for another interpretation style, 323-24

The Holmesian style of constitutional interpretation,
- treatment of contemporaneous sources of interpretation,
  - treatment of context, 305-07
  - treatment of history, 307-10
  - treatment of text, 304-05
- treatment of subsequent developments,
  - legislative, executive, and social practice, 310-12
  - precedents, 86, 312-13
  - prudential considerations, 128, 313-14

Strict construction approach, leading to deference to government, 43-44, 46, 306-07

Variations in the Holmesian approach,
- conservative versus liberal Holmesians, 319-23
- extreme versus moderate Holmesians, 316-19

**HYDE PARK DECLARATION**, 1144-45
I

ILLEGITIMACY DISCRIMINATION
Intermediate review after 1977, 1179-82
Justification for intermediate review in terms of not burdening someone for something not the product of the individual’s choice, 1097, 1179
Minimum rational review before 1977, 1178-79

IMMIGRATION
See Congress, Article I, § 8 enumerated powers

IMMUNITIES FROM REGULATION AND TAXATION
Federal immunity from state regulation, 854-55
Federal immunity from state taxation, 852-53
State immunity from federal regulation, 855
State immunity from federal taxation, 853

IMMUNITIES FROM SUIT
Congressional immunities,
   privilege from arrest clause, 836-37
   speech or debate clause, 837-39
Executive immunities,
   lower federal officials, 844-48
   presidential immunities,
      criminal cases,
         president as accused, 844
         president as witness, 840
      civil cases,
         president as plaintiff, 840-41
         president as defendant,
            claims of executive privilege, 841-42
            immunity from damage lawsuits for official acts, 842
            no absolute immunity from lawsuits for non-official acts, 843-44
         president as witness, 840
Judicial immunities, 848-49
Sovereign immunity of the United States from suit, 849-51
State sovereign immunity, see Eleventh Amendment

IMPEACHMENT
As political question, 688, 692
Congressional power over, 834-36
Historical examples of, 835
INCORPORATION OF BILL OF RIGHTS INTO THE FOURTEENTH AMENDMENT
See Bill of Rights

INDECENT MATERIAL INVOLVING CHILDREN
Indecent or patently offensive material with children in the audience, 1457-64, 1485-86
Pornography involving use or depictions of children, 1455-57

INSTRUMENTALIST APPROACH
As functional, normative approach, 47
Differences between liberal and conservative instrumentalist judges, 50-51
Efficient causes and, 17, 277
“Grand Style” as characterized by Karl Llewellyn, 47-48
Importance of fairness and just results, 47
Judicial activism, not necessarily the result of instrumentalist approach, 48, 53
Legal Process School of statutory interpretation as an instrumentalist approach, 51-52
Social policies of contemporary society as one source for constitutional interpretation, 52-54
Use of arguments of logic, purpose, principles, and policies, 35, 39
Weaknesses of,
  difficulty in determining what policies are embedded in the law, 49-50
  possible disregard of clear text to achieve a background social policy, 52
  possible use of subjective rather than objective standards, 50
  potential for judicial activism, 48-49, 53

INSTRUMENTALIST CONSTITUTIONAL INTERPRETATION
Emergence and decline of, 410-11
Instrumentalist approach combined with affinity for another interpretation style, 349-53
Introduction to instrumentalist constitutional interpretation, 325-26
Justices who have used the instrumentalist style, see Table of Names, Justices
Liberal instrumentalists as using judicial review to aid the unempowered, 146, 172, 329-30
Living constitutional interpretation and, see Living Constitution Theory
Table 11.3 on instrumentalist use of sources, 336-37
Social policies of contemporary society as one source for constitutional interpretation, 334-35
Treatment of,
contemporary sources of interpretation,
  context, 328-30
  history, 330-31
  text, 326-28
subsequent developments,
  legislative, executive, and social practice, 331-33
  precedents, 86, 333
  prudential considerations, 334-35
Variations in the instrumentalist approach,
  conservative versus liberal instrumentalism, 341-42
  extreme versus moderate instrumentalism, 337-41
other variations
  critical approaches
    critical legal studies, 346-47
    critical race theory, 348
    feminist theory, 348
  non-critical approaches
    Kantian approaches, 345-46
    pragmatism, 342-43
    utilitarianism, 343-45

INTENT
See Purpose/Motive/Intent, Proof of

INTERMEDIATE REVIEW
Basic intermediate review,
  as discussed generally, 1091-92
  burden on government to establish constitutionality of government action, 1101
  doctrine defined,
    important, substantial, or significant government interest requirement, 181, 1092
    not substantially too burdensome requirement, 1093-94
    substantial relationship requirement, 1093-94
  use of actual purposes or plausible purposes as important or substantial interests, 1103-04
  where applied,
    content-based regulations of broadcast media (radio and television), 1483-84
    content-neutral regulations in a public forum or on private property, 1371-79
    gender discrimination, 1165-74
    illegal alien children discrimination, 1158-60
    illegitimacy discrimination, 1179-82
    limitations of campaign contributions to candidates, 1498, 1502-10
Intermediate review with bite,
  adding to substantial relationship the strict scrutiny direct relationship requirement, 183-84
  where applied,
    content-based regulations of commercial speech under Central Hudson, 1491-96
    possibly content-based regulations of cable/satellite broadcast media, 1497

INTERNATIONAL AFFAIRS
See Foreign Affairs

INTERNATIONAL LAW
Judicial power to interpret, 572, 785, 900-02
Hierarchy of treaties versus constitutions at, 750-51
INTERNET
Academic freedom and, 1479
Advocacy of illegal conduct and, 1441-42
Fourth Amendment search and seizure and, 1010-11
Indecency, obscenity, and, 1453-54, 1459-62

INTERPRETATION
Constitutional versus statutory versus common law interpretation, 403-04
In general, see Interpretive Bias; Judicial Precedents; Sources Used in Constitutional Interpretation
See Formalist Approach; Formalist Constitutional Interpretation
See Holmesian Approach; Holmesian Constitutional Interpretation
See Instrumentalist Approach; Instrumentalist Constitutional Interpretation
See Natural Law Approach; Natural Law Constitutional Interpretation

INTERPRETIVE BIAS
Conservative versus centrist versus liberal bias
formalists have most often been associated with a conservative political bias, 97
Holmesian and natural law Justices have been both conservative and liberal, 97
instrumentalist Justices have most often been associated with a liberal bias, 97
Constitutional versus statutory versus common-law interpretation, 403-04
Doctrinal bias can be observed in some areas of constitutional law, 97-98
Judges are likely to presume that the Constitution reflects their style, 94-96
Justices tend not to be at the extremes because of the confirmation process, 96
Party bias is inappropriate and rare, but cf. Bush v. Gore, 98

INTERSTATE COMPACTS, 838, 864, 876, 888

INNOLVUNTARY SERVITUDE
See Thirteenth Amendment

IRREBUTTABLE PRESUMPTION DOCTRINE, 1226-27

J

JUDICIAL BRANCH
Congressional power over the federal judicial branch, 592-97, 746

JUDICIAL DECISIONMAKING
Choices according to Justice Cardozo, 19
Combination of underlying assumptions into four styles of judicial decisionmaking: formalist
(analytic, positivist); Holmesian (functional, positivist); instrumentalism (functional,
normative); natural law (analytic, normative), 30-34
Underlying assumptions,
nature of law,
analytic versus functional, 19-25
functional sees law as a practical tool and focuses on law in action, 20-21
logic and law in books as focus of analytic approach, 20-21
nature of the judicial task,
normative perspective: law must be consistent with social norms, 26
positivist: law as a body of rules and principles, 25-26
positivist versus normative, 25-26, 28-30

JUDICIAL PRECEDENTS
American doctrine of precedent, 84-86
Civil law theory of precedent, 84-85
Effect of being perceived as a response to political pressures, 90, 226-27
Four approaches on the extent to which precedents fix meaning,
greatest weight given precedents by natural law judges, 88-89, 209-10
settled law carries great weight for formalist judges, 86-88, 203-05
substantial reliance carries great weight for Holmesian judges, 88-89, 205-07
whether precedent right or wrong carries great weight for instrumentalist judges, 86, 207-09
General judicial predispositions in the approach to precedent: Table 4.3, 93
Lower courts advised to follow core holdings of Supreme Court precedents, 94
Majority opinions versus each judge writing own opinion, 93-94
Narrow/strict versus broad/loose treatment of precedent, 91
formalists: tend toward narrow reading, 92
Holmesian judges more willing to use a broader reading, 92
instrumentalists most willing to give narrow treatment to precedent, 92
natural law judges are most willing to extend precedents in light of general principles, 92-93
Precedent as gloss on meaning, with enactment force, as well as gravitational force, 367-68
Retroactive application of, 90, 224-26
Statutory interpretations carry greater weight as precedents, 89-90
Unpublished opinions and, 94
See Precedent Issues

JUDICIAL REVIEW
Defined, 553-54
Different perspectives on, 110-12, 145-46
Evaluation of judicial review,
American perspectives on, 566-70
compared with European model of, 570-72
overall value of, 573
right to human dignity as fundamental component of, 330-31, 571-72
Judicial review during the original natural law era (1789-1873),
Marbury v. Madison versus tripartite theory of review, 555-60
Martin v. Hunter’s Lessee and federal court supremacy, 560-62
Later views on judicial review,
  judicial review during the formalist era (1873-1937), 562-63
  judicial review during the Holmesian era (1937-1954), 563-64
  judicial review during the instrumentalist era (1954-1986), 565
  judicial review during the modern natural law era (1986-today), 565-66

JURISDICTION OF THE FEDERAL COURTS
Article III provisions, 573-74
Case or controversy requirement, 574-75
Congress’ power over, 746, 907
Limitations based on justiciability, see Justiciability
Limitations based on non-justiciability considerations,
  abstention doctrine, see Abstention
  congressional control of judicial review by federal courts, 592-97, 907
  constitutional and prudential due process clause restraints on cases heard in federal and state
courts, 597-99
State sovereign immunity limitations against enforcing federal rights against states, see Eleventh
Amendment
Types of cases for which federal jurisdiction exists,
  constitutional litigation initiated in federal courts,
    original jurisdiction in the federal District Courts, 583-85
    original jurisdiction in the Supreme Court,
      basic doctrine, 575, 580-83
      Marbury v. Madison and, 575-80
  federal court review of state court decisions involving federal law issues, 587-88
  jurisdiction acquired by removal of cases from state courts, 591-92
  limited federal review of state court decisions on state law matters in cases also involving
    federal questions, 588-91

JURIES
Right to jury trial in civil cases under the Seventh Amendment, see Seventh Amendment
Role of juries in determining law, 409, 947-49
Role of juries in finding facts, 194-95
Unpredictability of juries and limiting role of juries in determining law, 947-50

JUSTICIABILITY
In general, 245, 574, 587, 620, 624, 626, 630, 632, 683-84, 688, 690-91
See Mootness; Political Questions; Ripeness; Standing
L

LAW VERSUS FACT
In constitutional doctrine,
  procedural consequences of the distinction, 193-94
  subjective or objective approach to factual determinations, 193
  what issues are of law, which of fact, 194-95
In general, 82-84

LEAST RESTRICTIVE MEANS TEST
See Strict Scrutiny, Basic doctrine defined

LEGISLATION, FEDERAL
Administrative Procedure Act, 624, 640, 661-64, 850

  Section 1986, 1325
Section 1988, 584
Section 3610, 640
Vacancies Act, 805
Various Admiralty and Maritime statutes, 902
Violence Against Women Act of 1994 (VAWA), 341, 729, 735
Voting Rights Act of 1965, 1447, 427, 443, 446, 448, 85, 672, 1080, 1092, 1117, 1146-48, 1151, 1330-31, 1339
War Powers Act of 1973 (War Powers Resolution), 749, 785-87
Webb-Kenyon Act of 1913, 911
Wilson Act of 1890, 911

LEGISLATION, STATE
Black Codes, 1086-87
California Fair Employment and Housing Act, 1175
“Jim Crow” legislation, 427, 481, 492
Louisiana Creationism Act, 1554, 1584
Minnesota Human Rights Act, 1526
New York City Landmark Preservation Law, 969-70, 976
New York Milk Control Law, 1183
Northeast Dairy Compact, 876
Oregon Death with Dignity Act, 1287

LEGISLATIVE COURTS
See Courts, Article I

LEGISLATIVE VETO
See Veto Power

LEVELS OF REVIEW
See Standards of Review

LIBEL
See Defamation and Related Torts

LIMITATIONS ON STATE POWER
Article I, §10 limits, 764
Article IV limits on state power
admittance of new states, 765
guarantee clause, 768
state power over property, 767

LINE-ITEM VETO
See Veto Power
LIQUOR, STATE POWERS OVER
See Twenty-First Amendment

LIVING CONSTITUTION THEORY
Defined as evolving constitutional meaning based on legislative and executive practice, judicial precedents, and/or prudential considerations, 67, 118, 159-50
Judicial decisionmaking styles,
formalist rejection of, see Static Constitution Theory
Holmesian limited embrace of, to extent of legislative and executive practice, 46, 160-61, 311-12
instrumentalist full embrace of, 54, 161, 332-33

LOCAL GOVERNMENT
As creatures of the state for Fourteenth Amendment purposes, 1083
As separate from the state in terms of the Eleventh Amendment, 603-05, 615

LOUISIANA PURCHASE, 128, 454, 497, 1059

LOYALTY OATHS
See Oaths

MAGNA CARTA, 130, 223, 1219, 1321

MANDAMUS,
In general, 576, 578-80
Not part of Supreme Court’s original jurisdiction, 576-81

MARKET PARTICIPANT DOCTRINE
See Dormant Commerce Clause, modern doctrine

MARRIAGE
See Substantive Due Process, Unenumerated fundamental rights analysis

MATTERS OF PUBLIC CONCERN
See Government as Employers, Regulation speech of government employees

MASKS WORN AT PUBLIC MEETINGS, 1533
MATERIAL CAUSE
Defined, 14-15
Material causes and the eras of American law, see Eras in American Law
Material causes of decisions, see Decisionmaking Styles, Four styles of judicial decisionmaking

MEDICAL TREATMENT, RIGHT TO REFUSE
See Right to Die

MILITARY COURTS
Applicability to civilians, 750
Applicability to enemy combatants, 1317-21
Court-martial proceedings, 1317-19
Uniform Code of Military Justice, 788-89, 798, 1310, 1317-20, 1624

MODEL CODES
ABA Model Code of Judicial Conduct, 238-39, 1519-20
ALI Model Penal Code, 125
Uniform Commercial Code, 37, 65, 922, 999

MOOTNESS
Basic mootness doctrine and the ban on giving advisory opinions, 677
Exceptions,
   capable of repetition, yet evading review, 677
   class actions, where claims of named representatives of class have become moot, 677
   collateral consequences, 678
   voluntary cessation, but could reoccur, 677
Points of contention in mootness doctrine, 678-81

MORAL REASONING
Defined, 505
Emerging stage 6 moral reasoning: love of neighbor as oneself or equal concern and respect,
   basic approach of stage 6 moral reasoning, 510-12
   enlightenment form of stage 6 natural law reasoning, 513-17
   religious form of stage 6 natural law reasoning, 517-22
   stage 6 moral reasoning and the issue of sexual orientation, 522-31
Kohlberg’s theory of six moral reasoning stages,
   in general, 466-71
   response and critique of commentators, including Carol Gilligan, 497-500
   transitional stage 5½ between Kohlberg’s stages 5 and 6, 494-96
Moral reasoning debates as conservative faith in custom versus progressive faith in reason, 506-09
Stage 6 moral reasoning as an efficient (moving) cause in American constitutional law, 531-39
Stage 6 moral reasoning as final cause (goal) for American constitutional law,
   in general, 539-41, 543-48
   limited by resort to arguments of text, context, history, practice, and precedent, 496-97, 540
NAPOLEONIC CODE, 65, 173, 189, 489

NATURAL LAW APPROACH
Approach as analytic/normative,
   law connected to an external standard of rightness, or normative, 54, 62
   law ultimately a system of logically related rules, or analytic, 54, 62
Compared with
   formalism, 57-58
   Holmesian, 58
   instrumentalism, 59
Embrace of arguments of principle versus rejection of arguments of policy, 32-33, 59-61
Final causes and, 17, 277
Judicial activism (Platonic guardians) model rejected by most versions of, 55-56, 126, 167-68, 370-72
Likely to become the dominant approach in the 21st century, 13, 461-62
Relation to principles of law,
   fidelity to precedent, reasoned elaboration, and deciding cases on narrow grounds, 56, 172 368
   following both “enactment force” and “gravitational force” of precedents, 367-68
   neutral principles and, 58-60, 369
   use of purpose in, 57-58, 356-58
Social contract theory and, 55-56, 370-72
Terms “natural law” and “natural rights” compared, 355
Traditions of natural law,
   classic/Christian,
      Christian: Augustine, Aquinas, and, 55, 261-65, 355, 379-83
      classic: Plato, Aristotle, and the Stoics, including Cicero, 55, 261-64, 355, 379-81
      hybrid: Blackstone, Burke, and, 55, 261-63, 266, 271, 355, 379-83
      modern versions of, including Finnis, 55, 511-12
   civic republican tradition, 55, 267-69, 495, 514, 1540
   enlightenment,
      English, 55, 265-67, 269-71, 355, 379-83
      French, 55, 265-66, 269-70, 355, 379
      Kant and neo-Kantians, including Rawls and Dworkin, 511-12
      Scottish, 55, 265-66, 269-71, 355, 379, 510-11
      modern version committed to logical implications of rational thought, see Moral Reasoning,
      Emerging stage 6 moral reasoning
   Renaissance: Grotius, Burlamanqui, Puffendorf, and Vattel, 55, 267
   self-interest as basic principle of reason: Hobbes, Nietzsche, and Nozick, 510
Use of arguments of logic, purpose, and principles, 35
Versions of,
  economic natural law, 408-09, 412-15, 432-34
  ethical natural law, 408-09, 412-15, 428-29
  political natural law, 408-09, 412-15, 429-32

NATURAL LAW CONSTITUTIONAL INTERPRETATION
Defining the natural law style of constitutional interpretation,
  treatment of contemporaneous sources of interpretation,
    treatment of context, 358-60
    treatment of history, 360-64
    treatment of text, 356-58
  treatment of subsequent developments,
    legislative, executive, and social practice, 364-66
    precedents, 86, 366-69
    prudential considerations, 369-73
Introduction to natural law constitutional interpretation, 354-55
Justices who have used the natural law style, see Table of Names, Justices
Living constitution and, see Living Constitution Theory
Reasoned elaboration of the law, 56, 172, 368
Table 12.3 on natural law use of sources, 373-74
The natural law approach, combined with affinity for another interpretation style,
  natural law combined with formalist interpretation, 393-94
  natural law combined with Holmesian interpretation, 395-400
  natural law combined with instrumentalist interpretation, 400-03
Variations in the natural law approach,
  conservative versus liberal natural law,
    classic/Christian versus enlightenment natural law,
      differences, 265-66, 271, 380-83, 386
      similarities, 270, 379-80, 382-84
    conservatives more likely to adopt classic/Christian natural law, while liberals more
      likely to adopt enlightenment natural law, 379
  specific example of Burkean interpretation versus enlightenment natural law,
    differences, 266-67, 271, 381-83, 386
    similarities, 270, 355, 379-80, 382-84
  subject-matter examples,
    contract and property rights, 391-92
    establishment clause, 389-91
    state sovereign immunity, 386-89
  extreme versus moderate natural law (general reasoning v. core holding of precedent), 375-78
View of a constitution to be “anti-majoritarian” rather than “anti-evolutionary”, 384-86
NATURALIZATION
See Congress, Article I, § 8

NECESSARY AND PROPER CLAUSE
Broad interpretation of,
  basic doctrine, 701, 708-11, 730, 740, 742, 744-45, 747, 755
  Hamilton’s interpretation of, 177
  Justice Scalia’s views on, 731
  Marshall’s interpretation of, in McCulloch v. Maryland, 708-10
Moderate interpretation of,
  Madison’s views on, 710
  Justice Thomas’ views on, 731
  Randy Barnett’s views on, 710
Narrow interpretation of,
  Jefferson’s interpretation of, 175-76, 709-10
  State of Maryland’s views on, in McCulloch v. Maryland, 709-10
Referred to as the Sweeping Clause, 709

NINETEENTH AMENDMENT, 824-25, 833, 1168

NINTH AMENDMENT
Formalist approach, 1052
Holmesian approach, 1053-54
Instrumentalist approach, 1054-55
Natural law approach, 1044-52

NON-DELEGATION DOCTRINE
See Congress, Power to delegate

NON-INSTRUMENTALIST JUSTICES
In general, 11-13
  Advocate of original intent, see Original Intent/Originalism; Natural Law Constitutional Interpretation
  Advocate of strict construction, see Holmesian Constitutional Interpretation
Textualists, see Formalist Constitutional Interpretation

O

OATHS
Freedom of association and, 1532
Freedom of speech and, 1407-08
No religious test for federal office, 551, 1536, 1602
OBSCENE SPEECH
Focus of prosecutions on child pornography and, 1453-54
Historical regulations of, 1448-51
Modern *Miller* test for,
  - community standards and, 1451
  - patently offensive conduct specifically defined and, 1452
  - lack of literary, artistic, political, or scientific value and, 1452
*Miller* test applied to sadomasochistic pornography, 1454-55
Role of jury versus court in determining, 1453
Zoning laws and, 1452-53

ORIGINAL INTENT/ORIGINALISM
Definition of, 12, 259-60
Distinguished from a static theory of constitutional interpretation, 12, 165-66, 260-61, 271-72
As reflected in a natural law style of interpretation, 12, 166, 261, 272

ORIGINALIST VERSUS NON-ORIGINALIST APPROACHES TO INTERPRETATION
Difference defined, 259-60, 272-73
Non-originalism,
  - discussion of individual cases, 274-76
  - issues faced in a non-originalist approach, 272-74
  - varieties of non-originalist approaches,
    - consequentialist theories, 273-74
    - current consensus/current majority/Dworkinian approach, 273-74
    - progressive historicist approach, 273-74

OVERBREADTH DOCTRINE, 1403-06

P

PARTS OF THE BOOK
Part I: The material of constitutional law, 15-16
Part II: The form or shape of constitutional law, 15, 17, 99
Part III: Efficient causes of constitutional law: the four decisionmaking styles, 15, 17, 277
Part IV: The final causes of constitutional law: the products of judicial review, 15, 17-18, 549

PARDON POWER, 791-92

PARENTAL RIGHTS
Parental notification or consent statutes regarding minor’s abortion rights, 1271, 1276
Unenumerated fundamental right to child-rearing, 1260-63
PATENT POWER, 745-46

PLEDGE OF ALLEGIANCE, 239, 469, 481, 669, 1597, 1599-1601

POLICE POWER
Commerce clause and, 431, 705, 864, 1321
Contracts clause and, 250, 951, 955
Education and, 1122
Esthetic values and, 1273
Legitimate ends of health, safety, and welfare, 857, 930, 1086, 1162, 1263, 1283
Takings clause and, 251, 967, 973

POLITICAL ERAS IN AMERICAN HISTORY
Four approaches to political and social issues, 425-27
Political eras of American history and their relationship to Supreme Court decisionmaking,
   formalist era (1873-1937), 434-43
   Holmesian era (1937-1954), 443-45
   instrumentalist era (1954-1986), 445-47
   modern natural law era (1986-present), 447-49
   original natural law era (1789-1873), 428-34
Reflections on the nature of politics and the Supreme Court post-2000, 457-62

POLITICAL PARTIES
Campaign finance issues and, 1505-08
Election issues, freedom of speech, and, 1513-16
Freedom of association and, 1533-34
Patronage dismissals and, 1479-82
Predisposition of political parties toward federalism and separation of powers issues, 147-49
Specific examples of political parties,
   Anti-Federalists, 611-12, 824, 947, 986, 1044, 1048
   Democratic party,
      Jacksonian Democrat-Republicans, 147, 149, 266, 299, 428, 431, 435, 455-56, 458-59, 592
   National Republicans, 479
   Federalist party, 147, 149, 231, 381, 384, 427, 430, 435, 449-50, 452, 454, 460-61, 577, 592, 611, 828, 948, 1048
   Know-Nothings party, 435
   Republican party,
in general, 147-49, 230-31, 233-34, 299, 319-20, 426-27, 434-38, 442-43, 446, 448,
450-55, 457-62, 486-87, 535-37, 580, 593, 647, 705, 801, 823, 829-31, 842,
1063-64, 1071, 1084, 1151, 1324, 1327, 1514-15
Rockefeller Republicans, 462, 535-36
Whig party, 147, 149, 261, 263, 266, 269, 299, 427, 434-35, 450, 765, 1061
See Political Eras in American History

POLITICAL QUESTIONS DOCTRINE
General principles underlying the political questions doctrine, 689-92
Political questions doctrine in various eras,
  formalist era (1873-1937), 682
  Holmesian era (1937-1954), 682-83
  instrumentalist era (1954-1986), 683-86
  modern political questions doctrine (1986-today), 686
original natural law era (1789-1873), 681-82
Substantive areas more likely to be viewed as political questions,
  Guarantee Clause, 682-83, 692
  foreign affairs matters, 682-83, 685-86, 692
  impeachment issues, 688, 692
  military matters, 685, 692
  political gerrymandering, 684, 687, 692
  ratification of constitutional amendments, 682-83, 692

POSITIVISM
H.L.A. Hart and the rule of recognition,
  basic doctrine, 26, 28
  critiqued by Lon Fuller, 26-28
  eras of societies in world history and, 541-42
Judicial decisionmaking styles,
  embrace of positivism by,
    formalism, 31, 35, 62
    Holmesian, 31, 41, 45-46, 62
  rejection by,
    instrumentalism, 31, 47, 62
    natural law, 31, 54, 57-58, 62

POST OFFICE POWER, 745

PREAMBLE
Ends of constitutional interpretation organized in terms of the Preamble, 241
Use in interpretation of the Constitution, 104-05, 241
PRECEDENT ISSUES
Considerations of whether precedent is viewed as having a gloss on meaning or not, 203, 209-10
Following or overruling precedent assuming it has created a gloss on meaning,
changed understanding of facts undermines the precedent, 216-17
precedent creates inconsistency or incoherence in the law, 213-16
precedent substantially wrong or represents a substantial injustice, 217-23
unworkable in practice, 210-13
Following or overruling precedent without regard to whether there is a gloss on meaning,
consideration of whether precedent is settled law, 203-05
consideration of whether there has been substantial reliance on the precedent, 205-09
Precedent as a constitutional norm, rather than congressional command, 196
Strict versus loose use of precedent in constitutional cases,
building on welcome precedents, 198-200
emphasizing an aspect of a precedent with which the judge agrees, 200-01
focus on the core holdings of a precedent, not its general reasoning, 197-98
manipulating a precedent to claim it is merely being followed, 202-03
The precedent raises concerns about the rule of law,
decisions based upon full briefing and argumentation, 227
plurality versus majority opinions, 227-28
response to political pressure concern, 226-27
retroactivity concern, 224-26

PREEMPTION
Historical overview, 855-57
Modern preemption doctrine, 858-63
Preemption of state liquor laws by federal law, 911-14

PREFACE, 2

PRESIDENTIAL POWER
Appointment power, see Appointment Power, By the president
Commander-in-Chief power, 785-89
Delegation of power by Congress to the president, see Congress, Power to delgate
Election of president,
    general rules regarding, 825-28, 832
    history of electoral college disputes, 826-32, 1207-12
Executive agreements, 783-84
Executive orders, 789-90
Executive power vested in the president, 778
Foreign affairs and, 781-85
Immunity from lawsuits, see Immunities from Suit, Executive immunities
Impoundment of funds and, 789-90
Military matters, 785-89
Pardon power, 791-92
Removal power, see Removal Power
Take care that the laws be faithfully executed, 789
Theory of the unitary executive, 773
Treaty powers, 784-85

PRESS
Balancing free speech and fair trial rights, 1424-28
Protecting the press from taxation that threatens to suppress ideas, 1428-30
Reporter’s privileges and, 1427
Standard freedom of speech doctrine as applicable to, 1341
See Freedom of Speech and of the Press

PRIOR RESTRAINT
Content-based prior restraints triggering strict scrutiny, 1393-95, 1453
Content-neutral prior restraints triggering intermediate review, 1400-01, 1453

PRISONERS’ RIGHTS
Jails categorized as non-public forums under freedom of speech doctrine,
  minimum rational review for content-based, subject-matter or content-neutral regulations in
  jails, 1355, 1387
  second-order rational review applied to prisoner’s free speech rights in Beard, 1472
  intermediate scrutiny applied to outgoing mail from prison, as content-neutral regulation for
  mail destined for a public forum or private property, 1472
  strict scrutiny triggered for viewpoint discrimination even in jails, 1355, 1387
Less than substantial burdens on unenumerated rights triggering second-order rational review,
  access to courts, 1203-04
  right to marry, 1258-59
  right to procreate, 1266
  right to vote, 1206-07
Liberty interests under procedural due process, 1294-95
Life interests, see Eighth Amendment
Property interests and the criminal justice system, 1297

PRIVACY
Decisional privacy,
  access to contraception and right not to procreate, 1264-66
  abortion rights, 1267-72, 1273-79
  curfew statutes, 1287
  dying, 1285-87
  matters of sexual activity, 1279-84
  refusal of medical treatment, 1284-85
  right to procreate, 1263
Disclosure privacy, 1272-73
False light privacy, 1468-69
Invasion of privacy by publication of true facts, 1469-70
Theory of privacy as reflected in penumbras of the First, Third, Fourth, Fifth, and Sixth Amendments of the Bill of Rights, 1256, 1265

PRIVATE FIGURES
See Defamation and Related Torts, Classic defamation cases

PRIVILEGE AGAINST SELF-INCrimination, 1018-21

PRIVILEGE FROM ARREST, 836-37

PRIVILEGES AND IMMUNITIES CLAUSE OF ARTICLE IV, § 2
See Article IV, § 2 Privileges and Immunities Clause

PRIVILEGES OR IMMUNITIES CLAUSE OF THE FOURTEENTH AMENDMENT
Historical evidence concerning a broader set of rights intended to be protected by, including incorporation of the Bill of Rights provisions, 1071-72
Limited list of protected rights in the Slaughter-House Cases, 1072-73
Possibility of a broader reading of the Slaughter-House Cases, 1073-74
Right to travel as part of privileges or immunities in Saenz v. Roe, 1074-77

PROCEDURAL DUE PROCESS
Definition of “person” under, 1291-92
Deprivations as involving intentional conduct or deliberate indifference, not negligence, 1288-91
Determining protected interests,
  life, 1292
  liberty, 1292-93
  property, 1295-98
Examples of procedural due process analysis,
  in general, 1302-03
  specific case examples,
    creditor/debtor cases, 1307-09
    delegation of government functions to private parties, 1321-22
    government entitlement cases, 1305-06
    legislative adoption of rules drafted by private parties, 1322-23
    license termination or utility termination cases, 1307
    mental hospital commitment cases, 1303-04
    parental rights termination cases, 1304-05
    rights of detained persons, 1310-21
    school cases, 1309-10
    workplace cases, 1306-07
What process is due,
  Mathews v. Eldridge test,
    as constitutionally required, 1301-02
elements of,
private interest affected, 1299
risk of erroneous deprivation, 1299
government interest involved, 1299
in general, 1299-1302
issues involved in applying,
pre-deprivation or post-deprivation hearing, 1300
oral hearing or submission of written documents, 1300
right to cross-examination or only tell one’s own story, 1300
formal record or informal record, 1300
right to court-appointed counsel if indigent versus no right to counsel, 1300
burden to meet, whether beyond a reasonable doubt, clear and convincing
evidence, or mere preponderance of the evidence, 1300
void for vagueness challenges, 1298-99

PROCREATION
See Substantive Due Process, Unenumerated fundamental rights analysis

PRUDENTIAL CONSIDERATIONS
As sources of constitutional interpretation,
general use of interpretive prudential considerations, 169-70
possible instrumentalist use of non-interpretive prudential considerations, 166-67
possible natural law use of non-interpretive prudential considerations, 167-69
Kinds or varieties,
interpretive prudential considerations, 128-31
interpretive versus non-interpretive review, 125-28
non-interpretive prudential considerations, 131-33

PRUDENTIAL PRINCIPLES OF STANDING
Asserting rights of third persons, 665-66
Equitable discretion, 669
Generalized grievances, 659-60
Representational standing, 666-69
Zone of interests test,
in constitutional cases, 660-61
in statutory interpretation cases, 661-65

PUBLIC EMPLOYEES
See Government as Employer

PUBLIC FIGURES
See Defamation and Related Torts, Classic defamation cases
PUBLIC FORUM
See Freedom of Speech, The public versus non-public forum distinction,

PUBLIC FUNCTIONS
See State Action, Factors involved in determining

PURPOSE/MOTIVE/intent, PROOF OF
Consequences of finding discriminatory purpose/motive/intent,
   race discrimination triggering strict scrutiny, 1114-15
   gender discrimination triggering intermediate review, 1175-76
Difficulty of determining purpose/motive/intent, 135-36, 1115
Factors used to determine purpose/motive/intent,
   background circumstances, 1115
   effect of action, 1114-15
   legislative history, 1115
   other evidence of motives, 1115
Substantive areas,
   difficulty in finding discriminatory purpose in jobs, housing, or death penalty cases, 1116-17
   easier to find discriminatory purpose in school cases, redistricting, or preemptory challenge cases, 1116-17
   state referenda cases, 1117-18

PURPOSE OF THE BOOK, 2

PURPOSES OR ENDS OF CONSTITUTIONAL INTERPRETATION
Discussed generally, 241-43
Purpose or ends relating to reconciling government power and individual rights, 252-53
Purpose or ends relating to securing liberty,
   generally, 254-55
   under the first amendment, 255-58
Purpose or ends relating to structural issues
   checks and balances, 248-49
   federalism, 246-48
   judicial review, 243-46
   separation of powers, 248
Purpose or ends relating to the creation and application of principled doctrine, 249-52

QUALIFIED IMMUNITY
See Immunity from Suit, Executive Immunities
RACE DISCRIMINATION
Basic doctrine,
   facial discrimination cases,
      formalist era, 1106-09
      Holmesian era, 1110-11
      instrumentalist era, 1111-13
      modern natural law era, 1113-14
      original natural law era, 1105-06
   non-facial race discrimination: the intent requirement, see Purpose/Motive/Intent, Proof of
Examples in various contexts,
   affirmative action programs based on race, see Affirmative Action, Race-based
   constitutional law on desegregation of the public schools,
      basic doctrine, 1118-20
   cases from the instrumentalist era,
      step one: school segregation declared unconstitutional, 1121-23
      step two: principles developed to guide lower courts in finding violations and
         developing remedies, 1123-25
      step three: limits placed on remedial orders, 1125
      step four: initial consideration of concluding desegregation litigation, 1125
   the modern natural law era, 1126-28
   racial discrimination in the context of the criminal justice system,
      peremptory challenges based on race, 1151-54
   race discrimination in prison management and control, 1154-55
   racial redistricting cases, see Gerrymandering, Race-based

RACIAL REDISTRICTING CASES
See Gerrymandering, Race-based,

RATIONAL REVIEW
Minimum rational review,
   as discussed generally, 1086, 1185-86
   burden on challenger to establish unconstitutionality, 1086, 1088, 1185
   doctrine defined,
      legitimate or permissible government interest requirement, 181, 1086-88
      not irrational burden requirement, 1089-90
      rational relationship requirement, 1088-89
   substantial deference to legislative judgments, 1988, 1185
   use of any conceivable basis as legitimate government interest, 1101-02, 1185
where applied,
age discrimination, children or the elderly, 1189-90
content-neutral regulations of speech in non-public forum, 1355-56, 1358-59, 1386, 1389-90
disadvantages to non-resident corporations, 1188
federal regulation of aliens, 1160-61
generally applicable laws which burden exercise of religion under Smith test, 1613, 1615
state regulation of illegal aliens, except for illegal alien children, 1158
physical or mental disability discrimination, 1190-92
sexual orientation discrimination, 1192-93
social and economic regulatory legislation, 1182-86
standard economic regulation under contracts clause Energy Reserves test, 951-52
wealth discrimination, 1186-87

Second-order rational review,
as discussed generally, 185-86
burden on challenger to establish unconstitutionality of government action, 179-80, 185
doctrine defined as balancing of benefits and burdens to establish reasonableness of action,
not mere rational relationship as under minimum rational review, 185
no substantial deference to legislative judgments, 185
where applied,
contracts clause under Allied Structural Steel test, 958-59
dormant commerce clause under Pike v. Bruce Church test, 871, 874
less than substantial burdens on unenumerated fundamental rights, 934-36
procedural due process under Mathews v. Eldridge test, 1299-1302
reasonableness of search and seizure under the Fourth Amendment, 1004
takings clause under Penn Central test, 971-74

Third-order rational review
as discussed generally, 185-86
doctrine defined as balancing of benefits and burdens to establish reasonableness of action,
with burden shifting to government to establish constitutionality of action, 180, 185
burden on government to establish constitutionality of government action, 180, 185
no substantial deference to legislative judgments, 185
where applied,
dormant commerce clause under Maine v. Taylor test, 870-71, 973-75
regulation of speech of government employees on matters of public concern under
the Pickering test, 1473-75
takings clause under Dolan v. Tigard test, 975-96
RADIO AND TELEVISION REGULATION
See Broadcast Media, Regulation of

RELIGION
Ceremonial deism, 1581-82
Discrimination based upon religion triggering strict scrutiny, 1161
Employment practices,
  religion and private employers, 1617-18
  religion and religious employers, 1616-17
Equal access claims and, 1586, 1606
Faith-based initiative, 1603-04
Government aid to religion, see Establishment Clause
Government burdens on religion, see Free Exercise Clause
“In God We Trust” on coins, 1408, 1597, 1599-1600
Intelligent design and, 508-09, 518, 1584-85
Members of the framing and ratifying generation who were possibly Deists, 1602
Tax exemptions to religious institutions, 1551, 1556, 1562, 1596
Ten Commandments, 382, 525, 1368, 1540, 1542, 1546, 1553, 1588, 1592-95, 1601-02

REMEDIAL ISSUES
Ability of court to grant, see Justiciability
As applied versus facial challenges, 692-93
Determining whether a punishment is civil or criminal, 1002-03
Redressability by the court aspect of standing doctrine, 651-54
Remedies in traditional lawsuits versus public interest litigation, 696-99
Retroactivity of judicial decisions, 695-96
Role of jury in determining,
  18th-century approach, 947-49
  modern approach, 949-50
  Seventh Amendment right to jury trial, see Seventh Amendment
School desegregation cases, see Race Discrimination, Examples in various contexts
Severability of unconstitutional provisions, 694-95
Unconstitutionality of excessive punitive damage awards, 1231-35

REMOVAL POWER
by Congress,
  by impeachment of executive or judicial officers, see Impeachment
  of legislative branch officials, like the Comptroller General, 806
  of executive officials,
    no direct removal role, 805-07
    limiting the President’s ability to fire at-will,
      civil service protection for lower-level executive employees, 809-10
    limiting to firing for good cause for independent agency heads and other
      similar officials, 807-09
no ability to limit firing of core policy-makers, like Cabinet officials, 807-08 by the President,
  firing at will for core policy-makers, like Cabinet officials, 807-08
  good cause limitations constitutional for Congress to impose for other officials, 807-09

REPORTER’S PRIVILEGE, 1427

REPUBLICAN FORM OF GOVERNMENT
See Guarantee Clause

REPRODUCTIVE RIGHTS
See Privacy, Decisional Privacy

RESIDENCY REQUIREMENTS
As violating Article IV, § 2 privileges and immunities clause, 894-95
As violating the 14th Amendment privilege or immunities clause, 1074-77
As violating the right to travel, 1199-1203

RETROACTIVITY ISSUE, 695-96

RIGHT TO ASSEMBLE AND PETITION GOVERNMENT FOR GRIEVANCES, 1523-24

RIGHT TO DIE
Involving right to unwanted medical treatment,
  by competent person,
    in general, 1284
    pregnant woman, 1287
  by surrogate acting on behalf of incompetent person, 1284-85
Issues of right to pain-killing medication that might hasten death, 1286
No right to physician-assisted suicide, 1285-87

RIGHT TO TRAVEL
As part of Article IV, § 2 Privileges and Immunities Clause, 870, 1075
As part of Fourteenth Amendment Privileges or Immunities Clause, 1074-77, 1202-03
As unenumerated fundamental right, 1199-1204
Fundamental right to travel only within United States, not international travel, 1199
Right to travel within the United States,
  less than substantial burdens triggering second-order rational review, 1200-02
  substantial burdens triggering strict scrutiny, 1199-1200
RIPENESS DOCTRINE
Article III versus prudential aspects of, 669-70, 673-75
Factors used to determine,
  certainty that harm will occur, 670-71
  later facts crystallizing issue for presentation, 670
  substantial hardship if case not decided, 670-71
Holmesians less likely, instrumentalists more likely, to decide cases are ripe, 671
Modern examples of, 672-73

RULES VERSUS STANDARDS
Compared, 79-82, 192
Examples from constitutional doctrine, 192-94
Formalists more likely to prefer rules, instrumentalists more likely to prefer standards, 81, 192-94

S

SCHOOLS
Free speech issues, see Freedom of Speech, Specialized subject-areas
Religion and, see Establishment Clause, Specific examples
School desegregation and, see Race Discrimination, Examples in various contexts

SEARCH AND SEIZURE CLAUSE
See Fourth Amendment

SECOND AMENDMENT
Academic commentary concerning, 992
Approaches to,
  collective rights model, 988
  individual rights model, 988
  sophisticated collective rights model, 988
Arguments from literal text, context, and history concerning the meaning of, 988-91
Arguments from purpose, practice, and precedent concerning the meaning of, 987-88, 991
As not currently incorporated into the 14th Amendment, but likely to be incorporated should the case arise, 987
Less than substantial burden triggering only rational review in Fifth Circuit case, 991-92
No statute has ever ultimately be held to violate the Second Amendment, 992

SECTION FIVE OF THE FOURTEENTH AMENDMENT
Meaning of “enforce”,
  view that Congress can determine for itself violations, 1324-27, 1330-31
  view that the Court determines violations, and Congress’ power is to provide remedies, 1326-28, 1331-34
Meaning of “appropriate”,

Page 1895
view that similar to “proper” under the Necessary and Proper Clause, 1326, 1330-31
view that remedy must be “congruence and proportionate” to the violation, 1328, 1334-36

SEPARATION OF POWERS
Congressional delegation of legislative power, 773-77
Conservative versus liberal predispositions on, 148-49
Different perspectives on, 113
General nature of the separation of powers doctrine, 771-73
General separation of powers concerns, 810-11
Legislative power over national policy,
  general observations, 793-96
  limited legislative control over appointment and removal of officers,
    appointment, see Appointment Power
    removal, see Removal Power
Presidential power over national policy,
  domestic policymaking, 789-90
  general observations, 777-81
  international matters, 781-85
  pardon power, 791-92
  war and national defense, 785-89
Unconstitutional attempts to change the veto power,
  giving the President a line-item veto, 796-98
  legislative veto, 793-96

SEXUAL ORIENTATION
Animus based on sexual orientation as illegitimate government interest, 1193-95
Constitutionality of statutes banning gay marriage or civil unions, 1195-96, 1198
Full faith and credit analysis regarding gay marriage or civil unions, 1197-98
Minimum rational review under equal protection analysis, 1192-93
Right to adopt or other family rights and, 1196-97
Unconstitutionality of statutes criminalizing homosexual sodomy, 1280-82
Views concerning,
  biblical views and, 523-25, 527-28
  customs or traditions supporting discrimination on sexual orientation, 529, 1280
  immorality of sexual orientation discrimination based on reason, 527-31, 1281-82
  left-handedness versus right-handedness and comparison to sexual orientation, 525-27

SEVENTEENTH AMENDMENT, 824, 833

SEVENTH AMENDMENT
Inapplicable to suits against the United States, 995-96
Not incorporated into the 14th Amendment and made applicable against the states, 995
Right to jury trial in actions at common law, 993-95
SEVERABILITY, 694-95

SIXTH AMENDMENT
Harmless error analysis and, 1029-30
Right to compulsory attendance of witnesses and assistance of counsel, 1030-32
Right to confront witnesses, 1028-30
Right to speedy and public trial by an impartial jury, 1025-28
Waiver of Sixth Amendment rights, 1025

SLAVERY
*Dred Scott* decision, 1061-64
Emancipation Proclamation, 1064
Fugitive Slave Clause, *see* Fugitive Slave Provisions, Fugitive slave clause
Historical practices and, 1057-61
Immorality of,
violating biblical command of Golden Rule and love of neighbor as thyself, 264, 506, 1058
violating command of reason to treat persons with equal concern and respect, 264, 508-09
violating United Nations Declaration of Human Rights, 1058
Morality of,
as supported by Aristotle, 263-64
as supported by Aquinas, 263-64
as supported by one version of the Bible, 263-64, 1057-58
Unconstitutionality of, *see* Thirteenth Amendment

SOURCES USED IN CONSTITUTIONAL INTERPRETATION
Contemporary Sources, *see* Contemporaneous Sources of Interpretation
Subsequent Sources, *see* Subsequent Developments as Sources of Meaning

SPECIAL MASTERS, USE OF, 582-83

SPECIFIC LIMITATIONS ON FEDERAL POWER
Appropriation needed, 764
Bill of attainder, 763
Ex post facto law, 763
Gifts from foreigners, 764
Habeas corpus, 763
Preference to one state, 764
Slave trade prior to 1808, 763
Tax on exports from states, 764
Taxes without proportion, 764
Titles of nobility, 764
SPEECH, FREEDOM OF
See Freedom of Speech

SPEECH OR DEBATE CLAUSE
Applicable to legislative proceedings generally, 838
Applicable to staff, in addition to Representative or Senator, 837
Interpreted in light of purpose, not literal text, 837-38
Not applicable statements informing the public made in non-legislative proceedings, 838-39

SPEEDY AND PUBLIC TRIAL BY AN IMPARTIAL JURY, 1025-28

SPENDING POWER
Basic doctrine, 741-42
Indirect regulation of states by conditions in federal spending programs, 742-43

STANDARDS OF REVIEW
Effect of burdens in triggering levels of review, 934-36
Factors relevant to choosing the level of review, 185-88
Making standards of review analysis more analytically coherent,
acknowledging the six standards of heightened review, 942-47
problems of mixing and matching levels of scrutiny, 939-42
problems when adopting additional kinds of inquiries, 937-39
unpredictability of juries in application of legal doctrine, 947-50
Seven levels of balancing tests,
base plus six model of judicial review, 182-88
intermediate review and intermediate review with bite, see Intermediate Review
minimum rational review, second-order rational review, and third-order rational review, see
Rational Review
strict scrutiny and loose strict scrutiny, see Strict Scrutiny
Sliding scale approach toward levels of review, 188-89

STANDING TO SUE
Constitutional principles of standing doctrine,
formalist era (1873-1937), 628-32
Holmesian era (1937-1954), 632-38
instrumentalist era (1954-1986), 638-42
modern natural law era (1986-today),
  injury-in-fact requirement, 642-48
  modern causation analysis, 648-51
  redressability requirement, 651-54
  standing and congressional authority to create, 654-58
  standing under the qui tam statute, 658-59
original natural law era (1789-1873), 626-28
Introduction to the general principles of standing, 620-26
Prudential principles of standing,
equitable discretion, 669
generalized grievances, 659-60
representational standing for organizations, states, and elected representatives, 666-69
standing to assert the rights of third parties, 665-66
zone of interests test,
    constitutional cases, 660-61
    statutory interpretation cases, 661-65
Standing to sue as a constitutional and prudential limit on federal jurisdiction, 620

STATE ACTION
Basic requirement of government action to trigger constitutional protections, 916
Factors involved in determining,
    overt official involvement,
        executive, 917, 922
        judicial, 917, 919-20, 922, 925-26
        legislative, 917, 918
    entwinement,
        joint participation or conspiracy, 917, 920-21
        monetary or other financial connections, 917, 920
        symbolic or symbiotic relationship, 917, 920, 925-26
        public function, 917, 918-19, 925-26
Formalists and conservative Holmesians less likely, instrumentalists more likely, to find state action, 922-23
Historical development of the doctrine,
    formalist era, 917-18
    Holmesian era, 918-20
    instrumentalist era, 920-24
    modern natural law era, 924-27
    original natural law era, 917
State action based on laws that repeal existing laws or restrict future legal change, 927-28

STATE AND LOCAL TAXES
Applied to the press, 1428-30
Dormant commerce clause limitations on, 883-84
Intergovernmental immunity doctrine and, 852-55
Unconstitutionality of poll taxes, 1204-05

STATES
Adequate and independent state grounds, see Adequate, Independent State Grounds
Contracts clause and, see Contracts Clause
Dormant commerce clause and, see Dormant Commerce Clause
Interstate compacts, see Interstate Compacts
Police power, see Police Power
Preemption and, see Preemption
Specific constitutional limitations on state power, 764
State Constitutions having provisions different from United States Constitution,
criminal defendant’s rights involving search and seizures, 1113
open court provisions, 1297-98
right to bear arms, 987
right to equal educational funding, 1213
sexual orientation, 531, 1195-97
state action, 921
takings analysis, 964-65
State militias and the Second Amendment, 988-90
State sovereign immunity, see Eleventh Amendment
Tenth Amendment protections, see Tenth Amendment

STATIC CONSTITUTION THEORY
Defined as fixing constitutional meaning at the time of ratification, 67, 118-19, 159
Embraced by Jefferson, 68, 165-66, 178
Judicial decisionmaking styles,
   formalist embrace of, 41, 165-66, 172, 287
   Holmesian rejection of, see Living Constitution Theory
   instrumentalist rejection of, see Living Constitution Theory
   natural law rejection of, see Living Constitution Theory

STRICT CONSTRUCTION
Distinguished from reasonable construction, 39, 111, 145-46, 284
Distinguished from textualism and original intent, 12
Holmesian strict construction of constitutional provisions involving individual rights, 12, 46, 306-07
Of statutes in derogation of the common law, 107
Of penal statutes, 46, 107-08

STRICT SCRUTINY
Basic strict scrutiny,
as discussed generally, 1091-91
burden on government to establish constitutionality of government action, 1101
doctrine defined,
   Compelling or overriding government interest requirement, 181, 1091-93
   Direct and substantial relationship requirement, 1094-95
   Least restrictive or least burdensome effective alternative requirement, 1094-95
use of only actual purposes as compelling government interests, 1102
where applied,
   content-based regulations of speech in a public forum or on private property, 1369-71
   limitations on campaign expenditures by candidates, 1497-1502
   race, ethnicity, or national origin discrimination, see Race Discrimination
   religious discrimination under the equal protection clause, 1161
religious discrimination under the free exercise clause under the *Smith* test, 1612-13
state regulations burdening resident aliens, 1155-56
substantial burdens on unenumerated fundamental rights, 934-35
viewpoint discrimination regulations of speech, 1369

Lower level of loose strict scrutiny,
replacement of strict scrutiny least restrictive effective alternative requirement with
intermediate scrutiny not substantially too burdensome requirement, 183, 1496
where applied,
racial redistricting cases under the equal protection clause, 183, 1147-48, 1496
possibly content-based regulations of cable and satellite broadcast media, 1496-97

**STRUCTURE OF INDIVIDUAL RIGHTS LAW IF STATE ACTION IS ESTABLISHED**
Categorical approaches versus balancing tests in individual rights doctrine,
in general, 928-29
means/end reasoning in balancing tests that involve:
   elements to meet, 930-31
   factors to weigh 932
means/end reasoning in categorical tests that involve:
   elements to meet, 934
   factors to weigh, 933
Economic rights versus non-economic rights cases, 929

**STRUCTURE OF LAW THAT EMERGES FROM USING MATERIALS OF CONSTITUTIONAL INTERPRETATION**
Common-law versus civil-law countries: inductive versus deductive reasoning, 64-65, 69-70
Judicial predispositions in the reasoning process,
   conservative versus centrist versus liberal bias, 96-97
   doctrinal bias, 97-98
   general interpretive bias, 94-86
   party bias, 98
Use of judicial precedents,
   four different approaches to following or overruling precedents, 86-89
   general observations on the theory of precedent, 84-86
   narrow/strict versus broad/loose treatment of precedent, 91-94
   precedential concerns and the rule of law, 90
Variations
   categorical reasoning versus balancing, 70-76
   induction in common law countries, 63-70
      greater use of induction by instrumentalist and natural law judges, 69
      in common law decisions, 66
      predisposition to deduction by formalist and Holmesian judges, 69
      Thomas Jefferson’s support for a deductive theory on interpretation, 68
   rules containing elements versus factors, 76-79
   rules expressed as issues of law versus matters of fact, 82-84
rules versus standards, 79-82

**STYLES OF SUPREME COURT JUSTICES**
In general, see Name Index, Justices
Justices currently on the Court or in the recent past,
   Justices identified, 422-24
   Table 13.4: Styles of Supreme Court Justices: Current and Recent Past, 423

**SUBPOENA POWER**
Of Congress, 795
Of witness in criminal trials under the Sixth Amendment, 1030

**SUBSEQUENT DEVELOPMENTS AS SOURCES OF CONSTITUTIONAL INTERPRETATION**
General observations on static versus living constitutions, 165-66
Treatment of judicial precedents, 161-63
Treatment of legislative and executive practice, 159-61
Treatment of social practice, 163-65

**SUBSEQUENT DEVELOPMENTS AS SOURCES OF MEANING**
Defined, 5, 100
Introduction to their use in constitutional interpretation, 118-19
Subsequent events of legislative and executive practice,
   levels of generality and arguments of legislative and executive practice, 121
   practice as gloss on meaning versus no gloss on meaning, 119-21
   weight to be given arguments of legislative and executive practice, 121
Subsequent events of judicial precedents,
   levels of generality and precedent, 123
   precedent as gloss on meaning versus no gloss on meaning, 122-23
   weight to be given arguments of precedent, 123-24
Subsequent events of social practice, 124-25
Subsequent source involving prudential considerations
   interpretive prudential considerations, 128-31
   interpretive versus non-interpretive review, 125-28
   non-interpretive prudential considerations, 131-33

**SUBSTANTIAL OVERBREADTH DOCTRINE**
*See* Overbreadth Doctrine

**SUBSTANTIVE DUE PROCESS**
Enumerated fundamental rights analysis, including incorporation of the Bill of Rights,
   incorporation of the Bill of Rights, *see* Bill of Rights, Incorporation into the 14th Amendment
   non-Bill of Rights “enumerated” fundamental rights, 1244-46
Introduction to,
fundamental rights doctrine,
    consequences of concluding a right is fundamental, 1216

ARTICLES AND SECTIONS (see next page)
ARTICLES AND SECTIONS

Preamble

Article I Federal Legislative Power

Section 1: Grant of legislative power to Congress
Section 2: Composition of the House
Section 3: (1-5) Composition of the Senate
(6-7) Trying impeachments and judgment in those cases
Section 4: (1) Election of Senators and Representatives – state power
(2) When Congress assembles
Section 5: Rules on meetings of Congress
Section 6: Salaries and protection from arrest and for speech and debate
Section 7: Procedures for passage of bills
Section 8: Congressional Power
(1) Taxing and Spending power
(2) Borrowing money
(3) Commerce power
(4) Naturalization and bankruptcies
(5) Coin money and fix weights and measures
(6) Punishment for counterfeiting
(7) Post offices and roads
(8) Patent and copyright clause
(9) Inferior tribunals
(10) High seas crimes
(11) Declare war and rules on captures
(12) Raise and support armies
(13) Navy
(14) Rules for land and naval forces
(15) Calling the militia
(16) Provide for militia
(17) Exclusive power over the seat of government and U.S. forts and other needful buildings
(18) Necessary and Proper Clause

Section 9: Limitations on Congressional Power
(1) Prohibition on banning slave importation prior to 1808
(2) Ban on suspending writ of habeas corpus
(3) Ban on bill of attainder or ex post facto law
(4) Ban on direct tax unless in proportion to census
(5) Ban on taxes or duties on exports from states
(6) Ban on preferring ports of one state
(7) Requirement of appropriations and accounting
(8) Ban on titles of nobility and accepting presents
Section 10: Limitations on State Powers
(1) Ban of laws on treaties, certain financial matters, bills of attainder, ex post facto laws, impairing contracts, or granting titles of nobility
(2) Regulation of duties on imports or exports
(3) Ban, without Congress’ consent, on troops or ships of war or a compact with another state or a foreign power, with a few exceptions.

Article II Federal Executive Power
Section 1: The Executive Power
(1) Vested in a President elected for four years
(2-3) Election procedure (amended by Amendment XII)
(4) Congressional power to set elections
(5) Qualifications
(6) Disability
(7) Compensation
(8) Oath

Section 2: Enumerated Presidential Powers
(1) Commander in Chief, requested opinion power, and pardon power
(2) Treaty and appointment powers
(3) Recess appointments

Section 3: Presidential Responsibilities: State of the Union report; adjournment; receive ministers; take care that the laws be faithfully executed; commission officers

Section 4: Removal on impeachment

Article III Federal Judicial Power
Section 1: The Judicial power: vested in Supreme Court and inferior courts established by Congress; judges hold office during good behavior; compensation not diminished in office.

Section 2: Federal jurisdiction
(1) Cases to which federal judicial power extends
(2) Supreme Court’s original and appellate jurisdiction, subject to Congress’ exception and regulation power
(3) Trial by jury and venue for criminal trials

Section 3: (1) Definition of treason and requirements regarding proof of treason
(2) Congressional power to declare punishment for treason and limits thereon

Article IV Provisions Regarding States
Section 1: Full Faith and Credit Clause
Section 2: Rights and duties regarding state law
(1) Privileges and Immunities Clause for state citizens
(2) Extradition between states
(3) Extradition of persons held to service or labor

Section 3: New states and United States territory
(1) Limits on creation of new states
(2) Congress’ power over territory or other property of the U.S.

Section 4: Guarantee to states of a republican form of government

Article V Amendments

Article VI Miscellaneous
(1) Guarantee of debt validity
(2) Supremacy Clause
(3) Oath for members of Congress, but no religious test

Article VII Ratification

AMENDMENTS

I. Congress banned from establishing religion, prohibiting its free exercise, or abridging freedom of speech or the press, or the right peacefully to assemble
II. Right to keep and bear arms
III. Quartering of soldiers
IV. Protection from unreasonable search and seizure
V. Requirement of indictment; bars on double jeopardy, self incrimination, deprivation of life, liberty or property without due process, taking property without just compensation
VI. Right to speedy and public trial, notice of charges, confrontation, compulsory process, and assistance of counsel
VII. Trial by jury in suits for over twenty dollars
VIII. No excessive bail or fines or cruel and unusual punishment.
IX. Enumeration of rights does not deny others retained by the people
X. Powers are reserved to the states, or the people, if not delegated to the United States
XI. Federal judicial power does not extend to suits by citizens of one state or aliens against another state
XII. Procedures for electing the president and vice-president
XIII. Ban on slavery and involuntary servitude by government or individuals
XIV. Range of civil rights protections

Section 1: Citizenship Clause; Privileges or Immunities of United States citizens may not be abridged; no state may deprive any person of life, liberty, or property without due process of law; nor deny to any person equal protection of the laws

Section 2: Apportionment of Representatives, with penalties for denial of right to vote

Section 3: Disqualification of service in Congress of certain persons for having engaged in insurrection or rebellion

Section 4: Validation of public debt of the United States and voiding all debts incurred in aid of rebellion

Section 5: Congress given power to enforce this article by appropriate legislation
XV. No denial of the right to vote on account of race, color, or previous condition of servitude
XVI. Congress given power to levy an income tax without apportionment
XVII. Composition of the Senate; including the filling of vacancies
XVIII. Ban on intoxicating liquor
XIX. Right to vote cannot be denied on ground of sex
XX. Terms of federal officials and time for assembly by Congress; procedures regarding death of the president
XXI. Eighteenth amendment repealed; power of states to bar transportation of import of liquor
XXII. Ban on electing the same person president more than twice
XXIII. Appointment of electors from the District of Columbia
XXIV. Right to vote cannot be denied for failing to pay a poll tax
XXV. Procedures for dealing with removal, death, or disability of a president
XXVI. Right to vote if 18 or older
XXVII. No variation in the compensation of Senators or Representatives until an election for Representatives shall have intervened

THE CONSTITUTION
OF THE UNITED STATES OF AMERICA

We the People of the United States, in Order to form a more perfect Union, establish Justice, insure domestic Tranquility, provide for the common defence, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity, do ordain and establish this Constitution for the United States of America.

ARTICLE I

Section 1. All legislative Powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

Section 2. [1] The House of Representatives shall be composed of Members chosen every second Year by the People of the several States, and the Electors in each State shall have the Qualifications requisite for Electors of the most numerous Branch of the State Legislature.

[2] No Person shall be a Representative who shall not have attained to the Age of twenty five Years, and been seven Years a Citizen of the United States, and who shall not, when elected, be an Inhabitant of that State in which he shall be chosen.

[3] Representatives and direct Taxes shall be apportioned among the several States which may be included within this Union, according to their respective Numbers, which shall be determined by adding to the whole Number of free Persons, including those bound to Service for a Term of Years, and excluding Indians not taxed, three fifths of all other Persons. The actual Enumeration shall be made within three Years after the first Meeting of the Congress of the United
States, and within every subsequent Term of ten Years, in such Manner as they shall by Law direct. The Number of Representatives shall not exceed one for every thirty Thousand, but each State shall have at Least one Representative; and until such enumeration shall be made, the State of New Hampshire shall be entitled to chuse three, Massachusetts eight, Rhode Island and Providence Plantations one, Connecticut five, New York six, New Jersey four, Pennsylvania eight, Delaware one, Maryland six, Virginia ten, North Carolina five, South Carolina five, and Georgia three.

[4] When vacancies happen in the Representation from any State, the Executive Authority thereof shall issue Writs of Election to fill such Vacancies.

[5] The House of Representatives shall chuse their Speaker and other Officers; and shall have the sole Power of Impeachment.

Section 3.  [1] The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof, for six Years; and each Senator shall have one Vote.

[2] Immediately after they shall be assembled in Consequence of the first Election, they shall be divided as equally as may be into three Classes. The Seats of the Senators of the first Class shall be vacated at the Expiration of the Second Year, of the second Class at the Expiration of the fourth Year, and of the third Class at the Expiration of the sixth Year, so that one third may be chosen every second Year; and if Vacancies happen by Resignation, or otherwise, during the Recess of the Legislature of any State, the Executive thereof may make temporary Appointments until the next Meeting of the Legislature, which shall then fill such Vacancies.

[3] No Person shall be a Senator who shall not have attained to the Age of thirty Years, and been nine Years a Citizen of the United States, and who shall not, when elected, be an Inhabitant of that State for which he shall be chosen.

[4] The Vice President of the United States shall be President of the Senate, but shall have no Vote, unless they be equally divided.

[5] The Senate shall chuse their other Officers, and also a President pro tempore, in the Absence of the Vice President, or when he shall exercise the Office of President of the United States.

[6] The Senate shall have the sole Power to try all Impeachments. When sitting for that Purpose, they shall be on Oath or Affirmation. When the President of the United States is tried, the Chief Justice shall preside: And no Person shall be convicted without the Concurrence of two thirds of the Members present.

[7] Judgment in Cases of Impeachment shall not extend further than to removal from Office, and disqualification to hold and enjoy any Office of honor, Trust, or Profit under the United States: but the Party convicted shall nevertheless be liable and subject to Indictment, Trial, Judgment, and Punishment, according to Law.
Section 4. [1] The Times, Places and Manner of holding Elections for Senators and Representatives, shall be prescribed in each State by the Legislature thereof; but the Congress may at any time by Law make or alter such Regulations, except as to the Places of chusing Senators.

[2] The Congress shall assemble at least once in every Year, and such Meeting shall be on the first Monday in December, unless they shall by Law appoint a different Day.

Section 5. [1] Each House shall be the Judge of the Elections, Returns, and Qualifications of its own Members, and a Majority of each shall constitute a Quorum to do Business; but a smaller Number may adjourn from day to day, and may be authorized to compel the Attendance of absent Members, in such Manner, and under such Penalties as each House may provide.

[2] Each House may determine the Rules of its Proceedings, punish its Members for disorderly Behavior, and, with the Concurrence of two thirds, expel a Member.

[3] Each House shall keep a Journal of its Proceedings, and from time to time publish the same, excepting such Parts as may in their Judgment require Secrecy; and the Yeas and Nays of the Members of either House on any question shall, at the Desire of one fifth of those Present, be entered on the Journal.

[4] Neither House, during the Session of Congress, shall, without the Consent of the other, adjourn for more than three days, nor to any other Place than that in which the two Houses shall be sitting.

Section 6. [1] The Senators and Representatives shall receive a Compensation for their Services, to be ascertained by Law, and paid out of the Treasury of the United States. They shall in all Cases, except Treason, Felony and Breach of the Peace, be privileged from Arrest during their Attendance at the Session of their respective Houses, and in going to and returning from the same; and for any Speech or Debate in either House, they shall not be questioned in any other Place.

[2] No Senator or Representative shall, during the Time for which he was elected, be appointed to any civil Office under the Authority of the United States, which shall have been created, or the Emoluments whereof shall have been increased during such time; and no Person holding any Office under the United States, shall be a Member of either House during his Continuance in Office.

Section 7. [1] All Bills for raising Revenue shall originate in the House of Representatives; but the Senate may propose or concur with Amendments as on other Bills.

[2] Every Bill which shall have passed the House of Representatives and the Senate, shall, before it become a Law, be presented to the President of the United States; If he approve he shall sign it, but if not he shall return it, with his Objections to the House in which it shall have originated, who shall enter the Objections at large on their Journal, and proceed to reconsider it. If
after such Reconsideration two thirds of that House shall agree to pass the Bill, it shall be sent together with the Objections, to the other House, by which it shall likewise be reconsidered, and if approved by two thirds of that House, it shall become a Law. But in all such Cases the Votes of both Houses shall be determined by yeas and Nays, and the Names of the Persons voting for and against the Bill shall be entered on the Journal of each House respectively. If any Bill shall not be returned by the President within ten Days (Sundays excepted) after it shall have been presented to him, the Same shall be a Law, in like Manner as if he had signed it, unless the Congress by their Adjournment prevent its Return in which Case it shall not be a Law.

[3] Every Order, Resolution, or Vote, to Which the Concurrence of the Senate and House of Representatives may be necessary (except on a question of Adjournment) shall be presented to the President of the United States; and before the Same shall take Effect, shall be approved by him, or being disapproved by him, shall be repassed by two thirds of the Senate and House of Representatives, according to the Rules and Limitations prescribed in the Case of a Bill.

Section 8. [1] The Congress shall have Power To lay and collect Taxes, Duties, Imposts and Excises, to pay the Debts and provide for the common Defence and general Welfare of the United States; but all Duties, Imposts and Excises shall be uniform throughout the United States;

[2] To borrow money on the credit of the United States;

[3] To regulate Commerce with foreign Nations, and among the several States, and with the Indian Tribes;

[4] To establish an uniform Rule of Naturalization, and uniform Laws on the subject of Bankruptcies throughout the United States;

[5] To coin Money, regulate the Value thereof, and of foreign Coin, and fix the Standard of Weights and Measures;

[6] To provide for the Punishment of counterfeiting the Securities and current Coin of the United States;

[7] To Establish Post Offices and Post Roads;

[8] To promote the Progress of Science and useful Arts, by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries;

[9] To constitute Tribunals inferior to the supreme Court;

[10] To define and punish Piracies and Felonies committed on the high Seas, and Offenses against the Law of Nations;
[11] To declare War, grant Letters of Marque and Reprisal, and make Rules concerning Captures on Land and Water;

[12] To raise and support Armies, but no Appropriation of Money to that Use shall be for a longer Term than two Years;

[13] To provide and maintain a Navy;

[14] To make Rules for the Government and Regulation of the land and naval Forces;

[15] To provide for calling forth the Militia to execute the Laws of the Union, suppress Insurrections and repel Invasions;

[16] To provide for organizing, arming, and disciplining, the Militia, and for governing such Part of them as may be employed in the Service of the United States, reserving to the States respectively, the Appointment of the Officers, and the Authority of training the Militia according to the discipline prescribed by Congress;

[17] To exercise exclusive Legislation in all Cases whatsoever, over such District (not exceeding ten Miles square) as may, by Cession of particular States, and the Acceptance of Congress, become the Seat of the Government of the United States, and to exercise like Authority over all Places purchased by the Consent of the Legislature of the State in which the Same shall be, for the Erection of Forts, Magazines, arsenals, dock-Yards, and other needful Buildings;—And

[18] To make all Laws which shall be necessary and proper for carrying into Execution the foregoing Powers, and all other Powers vested by this Constitution in the Government of the United States, or in any Department or Officer thereof.

Section 9. [1] The Migration or Importation of Such Persons as any of the States now existing shall think proper to admit, shall not be prohibited by the Congress prior to the Year one thousand eight hundred and eight, but a Tax or duty may be imposed on such Importation, not exceeding ten dollars for each Person.

[2] The privilege of the Writ of Habeas Corpus shall not be suspended, unless when in Cases of Rebellion or Invasion the public Safety may require it.

[3] No Bill of Attainder or ex post facto Law shall be passed.

[4] No Capitation, or other direct, Tax shall be laid, unless in Proportion to the Census or Enumeration herein before directed to be taken.

[5] No Tax or Duty shall be laid on Articles exported from any State.
No Preference shall be given by any Regulation of Commerce or Revenue to the Ports of one State over those of another: nor shall Vessels bound to, or from, one State be obliged to enter, clear, or pay Duties in another.

No money shall be drawn from the Treasury, but in Consequence of Appropriations made by Law; and a regular Statement and Account of the Receipts and Expenditures of all public Money shall be published from time to time.

No Title of Nobility shall be granted by the United States: And no Person holding any Office of Profit or Trust under them, shall, without the Consent of the Congress, accept of any present, Emolument, Office or Title, of any kind whatever, from any King, Prince, or foreign State.

Section 10.  [1] No State shall enter into any Treaty, Alliance, or Confederation; grant Letters of Marque and Reprisal; coin Money; emit Bills of Credit; make any Thing but gold and silver Coin a Tender in Payment of Debts; pass any Bill of Attainder, ex post facto Law, or Law impairing the Obligation of Contracts, or grant any Title of Nobility.

[2] No State shall, without the Consent of the Congress, lay any Imposts or Duties on Imports or Exports, except what may be absolutely necessary for executing its inspection Laws: and the net Produce of all Duties and Imposts, laid by any State on Imports or Exports, shall be for the Use of the Treasury of the United States; and all such Laws shall be subject to the Revision and Controul of the Congress.

[3] No State shall, without the Consent of Congress, lay any Duty of Tonnage, keep Troops, or Ships of War in time of Peace, enter into any Agreement or Compact with another State, or with a foreign Power, or engage in War, unless actually invaded, or in such imminent Danger as will not admit of delay.

ARTICLE II

Section 1.  [1] The executive Power shall be vested in a President of the United States of America. He shall hold his Office during the Term of four Years, and, together with the Vice President, chosen for the same Term, be elected, as follows:

[2] Each State shall appoint, in such Manner as the Legislature thereof may direct, a Number of Electors, equal to the whole Number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or Person holding an Office of Trust or Profit under the United States, shall be appointed an Elector.

[3] The Electors shall meet in their respective States, and vote by Ballot for two Persons, of whom one at least shall not be an Inhabitant of the same State with themselves. And they shall make a List of all the Persons voted for, and of the Number of Votes for each; which List they shall sign and certify, and transmit sealed to the Seat of the Government of the United States, directed to the President of the Senate. The President of the Senate shall, in the Presence of the Senate and
House of Representatives, open all the Certificates, and the Votes shall then be counted. The Person having the greatest Number of Votes shall be the President, if such Number be a Majority of the whole Number of Electors appointed; and if there be more than one who have such Majority, and have an equal Number of Votes, then the House of Representatives shall immediately chuse by Ballot one of them for President; and if no Person have a Majority, then from the five highest on the List the said House shall in like Manner chuse the President. But in chusing the President, the Votes shall be taken by States, the Representation from each State having one Vote; A quorum for this Purpose shall consist of a Member or Members from two thirds of the States, and a Majority of all the States shall be necessary to a Choice. In every Case, after the Choice of the President, the Person having the greater Number of Votes of the Electors shall be the Vice President. But if there should remain two or more who have equal Votes, the Senate shall chuse from them by Ballot the Vice President.

[4] The Congress may determine the Time of chusing the Electors, and the Day on which they shall give their Votes; which Day shall be the same throughout the United States.

[5] No person except a natural born Citizen, or a Citizen of the United States, at the time of the Adoption of this Constitution, shall be eligible to the Office of President; neither shall any Person be eligible to that Office who shall not have attained to the Age of thirty five Years, and been fourteen Years a Resident within the United States.

[6] In case of the removal of the President from Office, or of his Death, Resignation or Inability to discharge the Powers and Duties of the said Office, the Same shall devolve on the Vice President, and the Congress may by Law provide for the Case of Removal, Death, Resignation or Inability, both of the President and Vice President, declaring what Officer shall then act as President, and such Officer shall act accordingly, until the Disability be removed, or a President shall be elected.

[7] The President shall, at stated Times, receive for his Services, a Compensation, which shall neither be increased nor diminished during the Period for which he shall have been elected, and he shall not receive within that Period any other Emolument from the United States, or any of them.

[8] Before he enter on the Execution of his Office, he shall take the following Oath or Affirmation: "I do solemnly swear (or affirm) that I will faithfully execute the Office of President of the United States, and will to the best of my Ability, preserve, protect and defend the Constitution of the United States."

Section 2. [1] The President shall be Commander in Chief of the Army and Navy of the United States, and of the Militia of the several States, when called into the actual Service of the United States; he may require the Opinion, in writing, of the principal Officer in each of the executive Departments, upon any Subject relating to the Duties of their respective Offices, and he shall have Power to grant Reprieves and Pardons for Offenses against the United States, except in Cases of Impeachment.
[2] He shall have Power, by and with the Advice and Consent of the Senate, to make Treaties, provided two thirds of the Senators present concur; and he shall nominate, and by and with the Advice and Consent of the Senate, shall appoint Ambassadors, other public Ministers and Consuls, Judges of the supreme Court, and all other Officers of the United States, whose Appointments are not herein otherwise provided for, and which shall be established by Law; but the Congress may by Law vest the Appointment of such inferior Officers, as they think proper, in the President alone, in the Courts of Law, or in the Heads of Departments.

[3] The President shall have Power to fill up all Vacancies that may happen during the Recess of the Senate, by granting Commissions which shall expire at the End of their next Session.

Section 3. He shall from time to time give to the Congress Information of the State of the Union, and recommend to their Consideration such Measures as he shall judge necessary and expedient; he may, on extraordinary Occasions, convene both Houses, or either of them, and in Case of Disagreement between them, with Respect to the Time of Adjournment, he may adjourn them to such Time as he shall think proper; he shall receive Ambassadors and other public Ministers; he shall take Care that the Laws be faithfully executed, and shall Commission all the Officers of the United States.

Section 4. The President, Vice President and all civil Officers of the United States, shall be removed from Office on Impeachment for, and Conviction of, Treason, Bribery, or other high Crimes and Misdemeanors.

ARTICLE III

Section 1. The judicial Power of the United States, shall be vested in one supreme Court, and in such inferior Courts as the Congress may from time to time ordain and establish. The Judges, both of the supreme and inferior Courts, shall hold their Offices during good Behaviour, and shall, at stated Times, receive for their Services a Compensation, which shall not be diminished during their Continuance in Office.

Section 2. [1] The judicial Power shall extend to all Cases, in Law and Equity, arising under this Constitution, the Laws of the United States, and Treaties made, or which shall be made, under their Authority;—to all Cases affecting Ambassadors, other public Ministers and Consuls;—to all Cases of admiralty and maritime Jurisdiction,—to Controversies to which the United States shall be a Party;—to Controversies between two or more States;—between a State and Citizens of another State;—between Citizens of different States;—between Citizens of the same State claiming Lands under the Grants of different States, and between a State, or the Citizens thereof, and foreign States, Citizens or Subjects.

[2] In all Cases affecting Ambassadors, other public Ministers and Consuls, and those in which a State shall be a Party, the supreme Court shall have original Jurisdiction. In all the other Cases before mentioned, the supreme Court shall have appellate Jurisdiction, both as to Law and Fact, with such Exceptions, and under such Regulations as the Congress shall make.
The trial of all Crimes, except in Cases of Impeachment, shall be by Jury; and such Trial shall be held in the State where the said Crimes shall have been committed; but when not committed within any State, the Trial shall be at such Place or Places as the Congress may by Law have directed.

Section 3. [1] Treason against the United States, shall consist only in levying War against them, or, in adhering to their Enemies, giving them Aid and Comfort. No Person shall be convicted of Treason unless on the Testimony of two Witnesses to the same overt Act, or on Confession in open Court.

[2] The Congress shall have Power to declare the Punishment of Treason, but no Attainder of Treason shall work Corruption of Blood, or Forfeiture except during the Life of the Person attainted.

ARTICLE IV

Section 1. Full Faith and Credit shall be given in each State to the public Acts, Records, and judicial Proceedings of every other State. And the Congress may by general Laws prescribe the Manner in which such Acts, Records and Proceedings shall be proved, and the Effect thereof.

Section 2. [1] The Citizens of each State shall be entitled to all Privileges and Immunities of Citizens in the several States.

[2] A Person charged in any State with Treason, Felony, or other Crime, who shall flee from Justice, and be found in another State, shall on demand of the executive Authority of the State from which he fled, be delivered up, to be removed to the State having Jurisdiction of the Crime.

[3] No Person held to Service or Labour in one State, under the Laws thereof, escaping into another, shall, in Consequence of any Law or Regulation therein, be discharged from such Service or Labour, but shall be delivered up on Claim of the Party to whom such Service or Labour may be due.

Section 3. [1] New States may be admitted by the Congress into this Union; but no new State shall be formed or erected within the Jurisdiction of any other State; nor any State be formed by the Junction of two or more States, or Parts of States, without the Consent of the Legislatures of the States concerned as well as of the Congress.

[2] The Congress shall have Power to dispose of and make all needful Rules and Regulations respecting the Territory or other Property belonging to the United States; and nothing in this Constitution shall be so construed as to Prejudice any Claims of the United States, or of any particular State.
Section 4. The United States shall guarantee to every State in this Union a Republican Form of Government, and shall protect each of them against Invasion; and on Application of the Legislature, or of the Executive (when the Legislature cannot be convened) against domestic Violence.

ARTICLE V

The Congress, whenever two thirds of both Houses shall deem it necessary, shall propose Amendments to this Constitution, or, on the Application of the Legislatures of two thirds of the several States, shall call a Convention for proposing Amendments, which, in either Case, shall be valid to all Intents and Purposes, as part of this Constitution, when ratified by the Legislatures of three fourths of the several States, or by Conventions in three fourths thereof, as the one or the other Mode of Ratification may be proposed by the Congress; Provided that no Amendment which may be made prior to the Year One thousand eight hundred and eight shall in any Manner affect the first and fourth Clauses in the Ninth Section of the first Article; and that no State, without its Consent, shall be deprived of its equal Suffrage in the Senate.

ARTICLE VI

[1] All Debts contracted and Engagements entered into, before the Adoption of this Constitution shall be as valid against the United States under this Constitution, as under the Confederation.

[2] This Constitution, and the Laws of the United States which shall be made in Pursuance thereof; and all Treaties made, or which shall be made, under the Authority of the United States, shall be the supreme Law of the Land; and the Judges in every State shall be bound thereby, any Thing in the Constitution or Laws of any State to the Contrary notwithstanding.

[3] The Senators and Representatives before mentioned, and the Members of the several State Legislatures, and all executive and judicial Officers, both of the United States and of the several States, shall be bound by Oath or Affirmation, to support this Constitution; but no religious Test shall ever be required as a Qualification to any Office or public Trust under the United States.

ARTICLE VII

The Ratification of the Conventions of nine States shall be sufficient for the Establishment of this Constitution between the States so ratifying the Same.

Done in Convention by the Unanimous Consent of the States present the Seventeenth Day of September in the Year of our Lord one thousand seven hundred and Eighty seven and of the Independence of the United States of America the Twelfth.
ARTICLES IN ADDITION TO, AND AMENDMENT OF, THE CONSTITUTION OF THE UNITED STATES OF AMERICA, PROPOSED BY CONGRESS, AND RATIFIED BY THE LEGISLATURES OF THE SEVERAL STATES PURSUANT TO THE FIFTH ARTICLE OF THE ORIGINAL CONSTITUTION.

AMENDMENT I [1791]

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

AMENDMENT II [1791]

A well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms, shall not be infringed.

AMENDMENT III [1791]

No Soldier shall, in time of peace be quartered in any house, without the consent of the Owner, nor in time of war, but in a manner to be prescribed by law.

AMENDMENT IV [1791]

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

AMENDMENT V [1791]

No person shall be held to answer for a capital, or otherwise infamous crime, unless on a presentment or indictment of a Grand Jury, except in cases arising in the land or naval forces, or in the Militia, when in actual service in time of War or public danger; nor shall any person be subject for the same offense to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use, without just compensation.

AMENDMENT VI [1791]

In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the Assistance of Counsel for his defence.
AMENDMENT VII [1791]

In Suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by jury, shall be otherwise reexamined in any Court of the United States, than according to the rules of the common law.

AMENDMENT VIII [1791]

Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.

AMENDMENT IX [1791]

The enumeration in the Constitution, of certain rights, shall not be construed to deny or disparage others retained by the people.

AMENDMENT X [1791]

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

AMENDMENT XI [1798]

The Judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States by Citizens of another State, or by Citizens or Subjects of any Foreign State.

AMENDMENT XII [1804]

The Electors shall meet in their respective states and vote by ballot for President and Vice-President, one of whom, at least, shall not be an inhabitant of the same state with themselves; they shall name in their ballots the person voted for as President, and in distinct ballots the person voted for as Vice-President, and they shall make distinct lists of all persons voted for as President, and of all persons voted for as Vice-President, and of the number of votes for each, which lists they shall sign and certify, and transmit sealed to the seat of the government of the United States, directed to the President of the Senate;—The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates and the votes shall then be counted;—The person having the greatest number of votes for President, shall be the President, if such number be a majority of the whole number of Electors appointed; and if no person have such majority, then from the persons having the highest numbers not exceeding three on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot, the President. But in choosing the President, the votes shall be taken by states, the representation from each state having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the states, and a majority of all the states shall be necessary to a choice. And if the House of
Representatives shall not choose a President whenever the right of choice shall devolve upon them before the fourth day of March next following, then the Vice-President shall act as President, as in the case of the death or other constitutional disability of the President.—The person having the greatest number of votes as Vice-President, shall be the Vice-President, if such number be a majority of the whole number of Electors appointed, and if no person have a majority, then from the two highest numbers on the list, the Senate shall choose the Vice-President; a quorum for the purpose shall consist of two-thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice. But no person constitutionally ineligible to the office of President shall be eligible to that of Vice-President of the United States.

**AMENDMENT XIII [1865]**

**Section 1.** Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.

**Section 2.** Congress shall have power to enforce this article by appropriate legislation.

**AMENDMENT XIV [1868]**

**Section 1.** All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.

**Section 2.** Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed. But when the right to vote at any election for the choice of electors for President and Vice President of the United States, Representatives in Congress, the Executive and Judicial officers of a State, or the members of the Legislature thereof, is denied to any of the male inhabitants of such State, being twenty-one years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion, or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State.

**Section 3.** No person shall be a Senator or Representative in Congress, or elector of President and Vice President, or hold any office, civil or military, under the United States, or under any State, who having previously taken an oath, as a member of Congress, or as an officer of the United States, or as a member of any State legislature, or as an executive or judicial officer of any State, to support the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid or comfort to the enemies thereof. But Congress may by a vote of two-thirds of each House, remove such disability.
Section 4. The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection or rebellion, shall not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or emancipation of any slave; but all such debts, obligations and claims shall be held illegal and void.

Section 5. The Congress shall have power to enforce, by appropriate legislation, the provisions of this article.

AMENDMENT XV [1870]

Section 1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.

Section 2. The Congress shall have power to enforce this article by appropriate legislation.

AMENDMENT XVI [1913]

The Congress shall have power to lay and collect taxes on incomes, from whatever source derived, without apportionment among the several States, and without regard to any census or enumeration.

AMENDMENT XVII [1913]

[1] The Senate of the United States shall be composed of two Senators from each State, elected by the people thereof, for six years; and each Senator shall have one vote. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislatures.

[2] When vacancies happen in the representation of any State in the Senate, the executive authority of such State shall issue writs of election to fill such vacancies: Provided, That the legislature of any State may empower the executive thereof to make temporary appointments until the people fill the vacancies by election as the legislature may direct.

[3] This amendment shall not be so construed as to affect the election or term of any Senator chosen before it becomes valid as part of the Constitution.

AMENDMENT XVIII [1919]

Section 1. After one year from the ratification of this article the manufacture, sale, or transportation of intoxicating liquors within, the importation thereof into, or the exportation thereof
from the United States and all territory subject to the jurisdiction thereof for beverage purposes is hereby prohibited.

Section 2. The Congress and the several States shall have concurrent power to enforce this article by appropriate legislation.

Section 3. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of the several States, as provided in the Constitution, within seven years from the date of the submission hereof to the States by the Congress.

AMENDMENT XIX [1920]

[1] The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of sex.

[2] Congress shall have power to enforce this article by appropriate legislation.

AMENDMENT XX [1933]

Section 1. The terms of the President and Vice President shall end at noon on the 20th day of January, and the terms of Senators and Representatives at noon on the 3d day of January, of the years in which such terms would have ended if this article had not been ratified; and the terms of their successors shall then begin.

Section 2. The Congress shall assemble at least once in every year, and such meeting shall begin at noon on the 3d day of January, unless they shall by law appoint a different day.

Section 3. If, at the time fixed for the beginning of the term of the President, the President elect shall have died, the Vice President elect shall become President. If the President shall not have been chosen before the time fixed for the beginning of his term, or if the President elect shall have failed to qualify, then the Vice President elect shall act as President until a President shall have qualified; and the Congress may by law provide for the case wherein neither a President elect nor a Vice President elect shall have qualified, declaring who shall then act as President, or the manner in which one who is to act shall be selected, and such person shall act accordingly until a President or Vice President shall have qualified.

Section 4. The Congress may by law provide for the case of the death of any of the persons from whom the House of Representatives may choose a President whenever the right of choice shall have devolved upon them, and for the case of the death of any of the persons from whom the Senate may choose a Vice President whenever the right of choice shall have devolved upon them.
Section 5. Sections 1 and 2 shall take effect on the 15th day of October following the ratification of this article.

Section 6. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission.

AMENDMENT XXI [1933]

Section 1. The eighteenth article of amendment to the Constitution of the United States is hereby repealed.

Section 2. The transportation or importation into any State, Territory, or possession of the United States for delivery or use therein of intoxicating liquors, in violation of the laws thereof, is hereby prohibited.

Section 3. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by conventions in the several States, as provided in the Constitution, within seven years from the date of the submission hereof to the States by the Congress.

AMENDMENT XXII [1951]

Section 1. No person shall be elected to the office of the President more than twice, and no person who has held the office of President, or acted as President, for more than two years of a term to which some other person was elected President shall be elected to the office of President more than once. But this Article shall not apply to any person holding the office of President when this Article was proposed by the Congress, and shall not prevent any person who may be holding the office of President, or acting as President, during the term within which this Article becomes operative from holding the office of President or acting as President during the remainder of such term.

Section 2. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission to the States by the Congress.

AMENDMENT XXIII [1961]

Section 1. The District constituting the seat of Government of the United States shall appoint in such manner as the Congress may direct:

A number of electors of President and Vice President equal to the whole number of Senators and Representatives in Congress to which the District would be entitled if it were a State, but in no event more than the least populous state; they shall be in addition to those appointed by the states, but they shall be considered, for the purposes of the election of President and Vice President, to be
electors appointed by a state; and they shall meet in the District and perform such duties as provided by the twelfth article of amendment.

Section 2. The Congress shall have power to enforce this article by appropriate legislation.

AMENDMENT XXIV [1964]

Section 1. The right of citizens of the United States to vote in any primary or other election for President or Vice President, for electors for President or Vice President, or for Senator or Representative in Congress, shall not be denied or abridged by the United States or any State by reason of failure to pay any poll tax or other tax.

Section 2. The Congress shall have power to enforce this article by appropriate legislation.

AMENDMENT XXV [1967]

Section 1. In case of the removal of the President from office or of his death or resignation, the Vice President shall become President.

Section 2. Whenever there is a vacancy in the office of the Vice President, the President shall nominate a Vice President who shall take office upon confirmation by a majority vote of both Houses of Congress.

Section 3. Whenever the President transmits to the President pro tempore of the Senate and the Speaker of the House of Representatives his written declaration that he is unable to discharge the powers and duties of his office, and until he transmits to them a written declaration to the contrary, such powers and duties shall be discharged by the Vice President as Acting President.

Section 4. Whenever the Vice President and a majority of either the principal officers of the executive departments or of such other body as Congress may by law provide, transmit to the President pro tempore of the Senate and the Speaker of the House of Representatives their written declaration that the President is unable to discharge the powers and duties of his office, the Vice President shall immediately assume the powers and duties of the office as Acting President.

Thereafter, when the President transmits to the President pro tempore of the Senate and the Speaker of the House of Representatives his written declaration that no inability exists, he shall resume the powers and duties of his office unless the Vice President and a majority of either the principal officers of the executive departments or of such other body as Congress may by law provide, transmit within four days to the President pro tempore of the Senate and the Speaker of the House of Representatives their written declaration that the President is unable to discharge the powers and duties of his office. Thereupon Congress shall decide the issue, assembling within forty-
eight hours for that purpose if not in session. If the Congress, within twenty-one days after receipt of the latter written declaration, or, if Congress is not in session, within twenty-one days after Congress is required to assemble, determines by two-thirds vote of both Houses that the President is unable to discharge the powers and duties of his office, the Vice President shall continue to discharge the same as Acting President; otherwise, the President shall resume the powers and duties of his office.

**AMENDMENT XXVI [1971]**

**Section 1.** The right of citizens of the United States, who are eighteen years of age or older, to vote shall not be denied or abridged by the United States or by any State on account of age.

**Section 2.** The Congress shall have power to enforce this article by appropriate legislation.

**AMENDMENT XXVII [1992]**

No law, varying the compensation for the services of Senators and Representatives, shall take effect, until an election for Representatives shall have intervened.

DEDICATION, AUTHOR INFORMATION, ACKNOWLEDGMENTS & NOTE ON CITATIONS

DEDICATION

We dedicate this book to the late Richard McKeon, a distinguished professor at the University of Chicago. In the 1940s, Professor McKeon taught a course on Jurisprudence in which he argued that it would be useful to study the legal system by making use of Aristotle’s analysis of material, formal, efficient, and final causes. This book is an effort to implement Professor McKeon’s thesis, with particular emphasis on constitutional law. The authors hope that Professor McKeon would have been pleased with our efforts.

AUTHOR INFORMATION

Charles D. Kelso is an Emeritus Professor at University of the Pacific, McGeorge School of Law. He received an A.B., 1946, and J.D., 1950, from the University of Chicago; an LL.M., 1962, and J.S.D., 1968, from Columbia University, and an LL.D., in 1966, from John Marshall. He clerked for Justice Minton on the United States Supreme Court from 1950-51. He was a Professor at Indiana School of Law – Indianapolis from 1951-80, and has been a Professor at McGeorge School of Law since 1980. During 1966-68, he served as a Professor and Associate Dean at the University of Miami School of Law. He was the Director of the AALS Study of Part-Time Legal Education from 1963-72; Chair of the ABA Section of Legal Education & Admissions to the Bar in 1973-74; Editor of Learning and the Law magazine from 1974-78; and President of the Law & Society Association in 1979. He is the author of numerous monographs and over 70 articles. He is also the co-author of CHARLES D. KELSO & R. RANDALL KELSO, AMERICAN CONSTITUTIONAL LAW: AN E-COURSEBOOK (2017 ORIG. ED. 2014), and R. RANDALL KELSO & CHARLES D. KELSO, STUDYING LAW: AN INTRODUCTION (2d ed. 2010). Like CHARLES D. KELSO & R. RANDALL KELSO, THE PATH OF CONSTITUTIONAL LAW (2007) (with 2017 Supplement) (E-Treatise on the Constitution), these books are available online at: http://libguides.stcl.edu/kelsomaterials

R. Randall Kelso is the Spurgeon E. Bell Distinguished Professor of Law at South Texas College of Law Houston. He received a B.A., 1976, Univ. of Chicago; and a J.D., 1979, Univ. of Wisconsin-Madison. He was an Instructor at the Univ. of Miami School of Law from 1979-80; an Associate at Columbia Univ. School of Law from 1980-82; and has taught at South Texas College of Law Houston since 1983. He is the author of many articles on Constitutional Law, Jurisprudence, and other related topics. He is also the co-author of CHARLES D. KELSO & R. RANDALL KELSO, AMERICAN CONSTITUTIONAL LAW: AN E-COURSEBOOK (2017 ORIG. ED. 2014), and R. RANDALL KELSO & CHARLES D. KELSO, STUDYING LAW: AN INTRODUCTION (2d ed. 2010). Like CHARLES D. KELSO & R. RANDALL KELSO, THE PATH OF CONSTITUTIONAL LAW (2007) (with 2017 Supplement) (E-Treatise on the Constitution), these books are available online at: http://libguides.stcl.edu/kelsomaterials
ACKNOWLEDGMENTS

Throughout the preparation of this book, R.K. Van Every provided outstanding secretarial services and advice on using computer programs. We owe her a great debt of thanks. Thanks are also due to the creators of the WordPerfect and Adobe Acrobat programs for making it so readily possible for a computerized book to be created.

The title of this book is a paean to Justice Oliver Wendell Holmes, Jr.’s famous article, The Path of the Law, 10 Harv. L. Rev. 457 (1897). In the opening paragraph of that article, Holmes observed:

When we study law we are not studying a mystery but a well known profession. We are studying what we shall want in order to appear before judges, or to advise people in such a way as to keep them out of court. The reason why it is a profession, why people will pay lawyers to argue for them or to advise them, is that in societies like ours the command of the public force is intrusted to the judges in certain cases, and the whole power of the state will be put forth, if necessary, to carry out their judgments and decrees. People want to know under what circumstances and how far they will run the risk of coming against what is so much stronger than themselves, and hence it becomes a business to find out when this danger is to be feared. The object of our study, then, is prediction, the prediction of the incidence of the public force through the instrumentality of the courts. Id. at 457.

This book is both a description of the past and a prediction of the future. It has been inspired by the following observations with which Holmes concluded his article:

To an imagination of any scope the most far-reaching form of power is not money, it is the command of ideas. If you want great examples read Mr. Leslie Stephen’s “History of English Thought in the Eighteenth Century,” and see how a hundred years after his death the abstract speculations of Descartes had become a practical force controlling the conduct of men. Read the works of the great German jurists, and see how much more the world is governed to-day by Kant than by Bonaparte. We cannot all be Descartes or Kant, but we all want happiness. And happiness, I am sure from having known many successful men, cannot be won simply by being counsel for great corporations and having an income of fifty thousand dollars. An intellect great enough to win the prize needs other food besides success. The remoter and more general aspects of the law are those which give it interest. It is through them that you not only become a great master in your calling, but connect our subject with the universe and catch an echo of the infinite, a glimpse of its unfathomable process, a hint of the universal law. Id. at 478.

A number of the sections in this book are based upon passages from one of 16 articles published between 1992-2003 by one, or both, of the co-authors of this book, or are based on a few passages from a book written by the co-authors, R. RANDALL KELSO & CHARLES D. KELSO, STUDYING LAW: AN INTRODUCTION (West Pub. Co. 1984). These sections are:

§ 2.4: A simplified version and explanation of Table 2.4, presented in this section, first appeared in R. RANDALL KELSO & CHARLES D. KELSO, STUDYING LAW: AN INTRODUCTION 113-19 (1984). A

§ 3.1: This section is based on *R. RANDALL KELSO & CHARLES D. KELSO, STUDYING LAW: AN INTRODUCTION* 109-13, 123-24, 161-70, 278-82 (1984).

§ 4.1: This section is based on *R. RANDALL KELSO & CHARLES D. KELSO, STUDYING LAW: AN INTRODUCTION* 46-52 (1984).

§ 4.4: This section is based on R. Randall Kelso, *Styles of Constitutional Interpretation and the Four Main Approaches to Constitutional Interpretation in American Legal History*, 29 Valparaiso L. Rev. 121, 147-50 (1994).

§§ 5.1-5.4.3: These sections are based on R. Randall Kelso, *Styles of Constitutional Interpretation and the Four Main Approaches to Constitutional Interpretation in American Legal History*, 29 Valparaiso L. Rev. 121, 125-38, 140-47, 153-54 (1994).

§ 6.2.1.2: This section is based on R. Randall Kelso, *Styles of Constitutional Interpretation and the Four Main Approaches to Constitutional Interpretation in American Legal History*, 29 Valparaiso L. Rev. 121, 150-52 (1994).

§§ 6.2.3.2-6.3.2 & 6.4.1-6.4.2: These sections are based on R. Randall Kelso, *Styles of Constitutional Interpretation and the Four Main Approaches to Constitutional Interpretation in American Legal History*, 29 Valparaiso L. Rev. 121, 138-40, 154-65 (1994).

§§ 7.3.1.2-7.3.4.4: These sections are based on R. Randall Kelso & Charles D. Kelso, *How the Supreme Court is Dealing with Precedents in Constitutional Cases*, 62 Brooklyn L. Rev. 973, 990-1036 (1996).

§§ 9.2 & 9.3.4: These sections are based on R. Randall Kelso, *Styles of Constitutional Interpretation and the Four Main Approaches to Constitutional Interpretation in American Legal History*, 29 Valparaiso L. Rev. 121, 184-95 (1994).

§ 10.2: This section is based on R. Randall Kelso, *Styles of Constitutional Interpretation and the Four Main Approaches to Constitutional Interpretation in American Legal History*, 29 Valparaiso L. Rev. 121, 195-213 (1994).

§ 11.2: This section is based on R. Randall Kelso, *Styles of Constitutional Interpretation and the Four Main Approaches to Constitutional Interpretation in American Legal History*, 29 Valparaiso L. Rev. 121, 213-25 (1994).

§ 12.2: This section is based on R. Randall Kelso, *Styles of Constitutional Interpretation and the Four Main Approaches to Constitutional Interpretation in American Legal History*, 29 Valparaiso L. Rev. 121, 150-84 (1994).

§ 15.3: This section is based on R. Randall Kelso, *Speculative Philosophy and Developmental Psychology: A Primer on the Moral and Legal Relevance of Cognitive, Social, and Moral Developmental Psychology* (1980) (unpublished manuscript on file with author).

§ 17.3.1: This section is based on Charles D. Kelso & R. Randall Kelso, *Standing to Sue: Transformations in Supreme Court Methodology, Doctrine, and Results*, 28 U. Toledo L. Rev. 93, 93-146 (1996).

THE PATH OF CONSTITUTIONAL LAW:
EXECUTIVE SUMMARY OF THE BOOK

by

Charles D. Kelso
Professor of Law
Pacific McGeorge School of Law

R. Randall Kelso
Professor of Law
South Texas College of Law

This Executive Summary is the text of the Companion Book to the E-Treatise, “The Path of Constitutional Law,” the first comprehensive work on American constitutional law to be published online. The E-Treatise details the usual doctrinal areas of constitutional law with copious supporting scholarship, but extends beyond doctrine to present the unique theme that American constitutional law can be divided into five eras characterized by distinctively different decisionmaking styles used by the decisive Justices (original natural law, formalist, Holmesian, instrumentalist, and modern natural law). Differences in decisionmaking style affect the choice and weight given to the various sources for interpretation: text; context; history; legislative, executive, and social practices; judicial precedents; and prudential considerations. Further, the Justices have had different style related predispositions regarding structural issues such as states’ rights, perceptions on executive versus legislative powers, and preferences on economic versus civil and political rights. The E-Treatise goes on to describe systematic differences in how different interpretation styles reason in terms of deduction versus induction, use of categorical versus balancing tests, doctrine phrased as elements to meet or factors to weigh, doctrine phrased as rules or standards, and whether any particular decision is a question of law rather than a question of fact. The E-Treatise identifies Justices who use the various styles, but goes beyond composition of the Court to describe political and social events that have influenced the Court’s composition and reasoning of the Justices during each era.

Chapter 12: Natural Law Constitutional Interpretation ............................................ 1964
Chapter 14: Material Causes of the Five Eras of American Law .............................. 1965
Chapter 15: Efficient Causes of the Five Eras of American Law .............................. 1965
Chapter 16: Final Causes and the Five Eras of American Law .................................. 1967
Sub-Part One: Structural Issues in Constitutional Law

Chapter 17: Judicial Review
  Jurisdiction
  Eleventh Amendment Immunity of States
  Standing
  Ripeness and Mootness
  Political Questions

Chapter 18: Federalism
  General Approach to Issues of Federal Power
  The Commerce Clause
  Other Enumerated Powers in Article I, § 8
  Unenumerated Power Over Foreign Affairs
  Tenth Amendment Limits on Federal Power
  Additional Limitations on Federal and State Power

Chapter 19: Separation of Powers

Chapter 20: Checks and Balances
  Rules Regarding Government Structure and Amendment
  Congressional Immunities
  Executive Immunities
  Judicial Immunities
  Sovereign Immunity for the United States Government
  Doctrine of Intergovernmental Immunities
  Preemption of State Law by Federal Law
  Dormant Commerce Clause Review of State Law
  Article IV, § 2 Privileges and Immunities Clause
  Federal Common Law
  Twenty-First Amendment Protection of State Law

Sub-Part Two: Individual Rights Doctrines Generally

Chapter 21: Individual Rights Protection Under the Constitution
  State Action
  Structure of Individual Rights Law

Chapter 22: Economic Rights: The Contracts and the Takings Clauses
  The Contracts Clause
  The Takings Clause

Chapter 23: Non-Economic Individual Rights
  Non-Economic Civil Rights
    Second Amendment
    Third Amendment
    Seventh Amendment
    Full Faith and Credit Clause
### Non-Economic Criminal Defendants’ Rights

- Fourth Amendment .................................. 1992
- Fifth Amendment .................................. 1993
- Sixth Amendment .................................. 1994
- Eighth Amendment .................................. 1995

Note on Citations

All citations to the material discussed in this Executive Summary of The Path of Constitutional Law appear in the ET treatise, under the section where that topic is discussed in greater depth.
This Companion Book to The Path of Constitutional Law serves two main purposes. The first is to summarize the main themes detailed in the E-Treatise (ET), The Path of Constitutional Law, and to highlight doctrines the ET sets forth in greater detail. The second is to introduce features of the ET and how it is used. References below to Chapters or Sections refer to the ET. The text of this Companion Book is also included in the ET under the file heading, “Executive Summary,” where all references to the ET are active electronic links to ET Chapters or Sections. A left click on the link will send users to relevant pages in the ET.

THE MAIN THEMES IN “THE PATH OF CONSTITUTIONAL LAW”

INTRODUCTION

The most important theme of the book is that four styles of interpretation have characterized the approach of Supreme Court Justices to the interpretation and application of the Constitution during five eras of constitutional interpretation. The four styles of interpretation are natural law, formalism, Holmesian, and instrumentalism. The five eras are:

| Table 1 |
| Eras of United States Constitutional Interpretation |
| Styles of Interpretation | Years Adopted by Controlling Votes on the Supreme Court |
| Traditional Natural Law | 1789-1873 |
| Formalism | 1873-1937 |
| Holmesian | 1937-1954 |
| Instrumentalism | 1954-1986 |
| Modern Natural Law | 1986-Today |

Part I of the ET treatise (Chapters 1-4) shows how the foundation of the four styles of interpretation are views on the nature of law (analytic or functional) and the role of courts (positivist or normative). Depending on how these two questions are resolved, the four approaches to decisionmaking are: formalism (analytic positivism); Holmesian (functional positivism); instrumentalism (functional normative); and natural law (analytic normative). Part I also discusses the predispositions of these four styles toward the form of legal doctrine adopted (categorical tests versus balancing tests; whatever test adopted phrased as elements to meet or factors to weigh; elements or factors phrased as rules or standards; and rules or standards phrased as questions of fact or questions of law).

Part II of the ET treatise (Chapters 5-8) shows how the four styles of interpretation influence the weight given by the Justices to contemporaneous and subsequent sources of interpretation of the Constitution. Also considered are relationships between the styles and their treatment of precedents, how the styles relate to a Justice’s preference for one or more of the levels of review found in the cases, and how goals or purposes for constitutional interpretation are identified and weighed.
Part III of the ET treatise (Chapters 9-16) contains an analysis in detail of each of the four styles of interpretation: formalism, Holmesian, instrumentalism, and natural law (Chapters 9-12). Part III also sets forth how and why the predominant style has changed during various eras of American legal history. Also presented is how the judicial styles have been related to the political eras in American history and to the development in individuals, and thus ultimately of nations, of styles of moral reasoning (Chapters 13-16).

Part IV of the ET treatise (Chapters 17-32) considers areas of constitutional law dealing with structural areas of judicial review, federalism, separation of powers, and checks and balances (Chapters 17-20), and individual rights protections (Chapters 21-32). Part IV indicates how the doctrines produced in each of the five eras of constitutional interpretation can be seen as outcomes of the decisionmaking style that predominated in the opinions of a majority of the Justices during each era. Part IV also shows how and why changes have occurred in the styles, doctrines, and case results, and what that may portend for the future. While that is a focus of the discussion of every doctrine in the ET, particularly clear and detailed discussion of transformations between each of the five eras of interpretation is presented in the ET for standing (§ 17.3.1); political questions (§ 17.3.4); federal power to regulate commerce (§ 18.2); the Tenth Amendment (§ 18.4); the dormant Commerce Clause (§ 20.3.2); the Article IV, § 2 Privileges and Immunities Clause (§ 20.3.3); the state action requirement of the 14th Amendment (§ 21.1); the Contracts Clause (§ 22.1); the Takings Clause (§ 22.2); the Ninth Amendment (§§ 24.1-24.4); equal protection review of racial classifications (§ 26.2); incorporation of the Bill of Rights into the 14th Amendment Due Process Clause (§ 27.2); First Amendment free speech doctrine (§ 29.1); Establishment Clause doctrine (§ 32.1); and Free Exercise Clause doctrine (§ 32.2).

PART I OF THE ET

CHAPTER 1: THE MATERIAL OF JUDICIAL DECISIONMAKING

Chapter 1 discusses how the new products today in constitutional law embody a combination unique in United States Supreme Court history. This is the gradual transformation from precedents and law designed by Justices who adhered to one style of constitutional interpretation – the instrumentalist, result-oriented, judicially-activist, situation-sense perspective that flourished on the Warren Court during the 1960s, and predominated generally on the Supreme Court from 1954-86 – to law designed by a contemporary group of non-instrumentalist Justices.

In contrast to the instrumentalist approach, popular usage is that a non-instrumentalist judge rejects judicial activism and will not legislate from the bench. Instead, the judge adheres to a policy of “strict construction” of the “plain meaning of text” consistent with the “original intent” of a doctrine’s framers and ratifiers. A more precise formulation of this usage would note that there are three different concepts used in the preceding sentence – plain meaning of text, strict construction, and original intent – and thus at least three different kinds of non-instrumentalist judges.

One kind of non-instrumentalist judge focuses on a doctrine’s text, whether in terms of the literal text of prior judicial decisions for common-law decisionmaking, the plain meaning of a statute for statutory construction, or the plain meaning of constitutional text for constitutional interpretation. Since the text of the Constitution does not change absent formal constitutional amendment, this
“textualist” approach concludes that the meaning of any provision is fixed at the time of ratification. Because the meaning is “fixed,” or “static,” the term “originalism” has been used to describe this approach. However, since this approach does not likely reflect the “original intent” of the framers and ratifiers, the term “originalism” is not so used in this book, as explained in the ET at § 8.4. This approach has also been called a “formalist” approach, and was most popular on the Supreme Court from 1873-1937. The term “formalism” is used in this book, not “textualism,” since each approach to interpretation discussed in this book starts with the constitutional text, and thus is “textualist” to that extent. The various approaches differ on what sources in addition to “text” are used to complete the process of constitutional interpretation, and how much weight to give those sources.

A second kind of non-instrumentalist judge focuses on “strict construction” of doctrine. With respect to the Constitution, the emphasis of “strict construction” is on a presumption of constitutionality given to legislative and executive actions, and thus deference to such legislative and executive actions, as they reflect society’s “dominant forces.” A judge following this approach will find governmental action unconstitutional only if the action is clearly unconstitutional. In this book, this approach is called a Holmesian approach, after Justice Oliver Wendell Holmes, Jr., who popularized this approach while on the Supreme Court from 1902-32. This approach was most popular among a majority of Supreme Court Justices from 1937-54. As noted in the ET at § 3.2, the Holmesian approach is a “strict construction” approach only for cases involving individual rights challenges to the constitutionality of governmental action. For structural issues of federalism or separation of powers, the Holmesian deference-to-government approach does not call for “strict construction” of governmental powers, but rather for deference to governmental powers.

A third kind of non-instrumentalist judge focuses attention on the “original intent” of a doctrine’s framers and ratifiers, and therefore asks in the context of constitutional law how the framers and ratifiers would have gone about interpreting the provision in question. In this book, this approach will be called a natural law approach, since the Constitution’s framers and ratifiers, at least from the Constitution’s drafting through the Civil War Amendments, were guided by 18th- and 19th-century theories of natural law. Under this approach, which predominated on the Court from 1789-1873, and is reflected in Chief Justice John Marshall’s approach from 1801-35, a judge follows principles associated with reasoned elaboration of the law, giving due weight to constitutional text, purpose, structure, and history contemporaneous with the drafting and ratifying of the Constitution, as well as to the subsequent events of legislative, executive, and social practice and judicial precedents.

CHAPTER 2: THE FORM OR SHAPE OF JUDICIAL DECISIONMAKING

Chapter 2 notes that there are two main questions that lie behind any act of judicial interpretation. The first concerns the nature of law: analytic versus functional. The second concerns the nature of the judicial task: positivist versus normative. Depending on how these two questions are resolved, there are four approaches to decisionmaking: formalism (analytic positivism); Holmesian (functional positivism); instrumentalism (functional normative); and natural law (analytic normative).

Concerning the nature of law, two main approaches have appeared in jurisprudential writings. These two approaches differ over whether law should be judged primarily in terms of its success in developing a set of logically consistent, universal rules. Under one approach, law is seen as a primarily a set of rules and principles whose application is guided by an analytic methodology of
logic and reason. This has been called the analytic, or conceptualist, approach. Alternatively, law can be seen as ultimately to be judged not in terms of logical consistency, but as a means to some social end through a pragmatic or functional treatment of rules and principles. This has been called the functional, or pragmatic, approach.

Concerning the nature of the judicial task, any judge must ask before deciding how to resolve a legal dispute whether judicial decisionmaking should be separable from morals or social values, that is, should judges view law solely as a body of rules and principles from which legal conclusions are derived – the positivist assumption – or should judges view law as a body of rules and principles testable by reference to some external standard of rightness, some social or moral value – law as normative or prescriptive, not descriptive. The positivist view is that judges may only discover, declare, and apply the law as it already exists. For analytic positivists (formalists), only the logic of existing concepts controls; for functional positivists (Holmesians), both the logic and purpose of existing concepts control, as functional jurists are sensitive to the purposes of legal rules as part of their pragmatic means-end reasoning. The final cause or end of the judicial task for positivists is whether the law is traceable to an authoritative source. Any departure from this view represents for positivists a form of illegitimate law-making.

In contrast, the judicial task for judges who adopt the normative view includes background norms that infuse existing common-law, statutory, and constitutional enactments. The normative view is that judges have the power to make law based on these background norms, and regularly do so, covertly as well as overtly. For analytic normative theorists (natural law), these background norms are limited to background moral principles; for functional normative theorists (instrumentalists), these background norms can include moral principles and social policies. The final cause or end of the judicial task for normative theorists is whether the law has a defensible substantive content. Given these considerations, the four styles can be summarized as follows:

Table 2
Styles of Judicial Decisionmaking

Presenting these four decisionmaking styles in the context of this two-dimensional Table based upon the nature of law and the nature of the judicial task can help to clarify the confusion that may result from jurisprudential discussion that attempts analysis along a single, one-dimensional scale.
For example, one kind of confusion results from failing to appreciate the differences among the terms “formalism,” “analytic jurisprudence,” and “positivism.” As Table 2 indicates, there are two basic kinds of “positivist” theories: the analytic positivism of formalism and the functional or pragmatic positivism associated with Holmes. These two kinds of positivism differ, for example, with the emphasis placed upon the logic of existing rules under the analytic formalist approach versus the emphasis placed upon the purpose lying behind existing rules to advance some social policy, which is emphasized under the functional Holmesian approach. Similarly, there are two kinds of “analytic jurisprudential” theories: the analytic positivism of formalism and the analytic normative theories associated with the natural law tradition. Although both adopt analytic approaches to the nature of law, for natural law the idea of morally legitimate power is critical, while for positivism what is critical is the morally neutral concept of socially organized effective power.

This two-dimensional Table can also help clarify the confusion among functional approaches to law. For example, some authors have grouped Holmes, John Chipman Gray, Karl N. Llewellyn, and Felix S. Cohen, among others, as all sharing the same jurisprudential philosophy of pragmatic instrumentalism. Each of these individuals did share a functional or pragmatic approach toward law, and thus rejected the analytic presuppositions of a formalist approach. However, as noted in the ET at §§ 3.2-3.3, Holmes and Gray are best understood as having adopted a positivist approach toward the judicial task, while Llewellyn and Cohen adopted a more normative approach associated with the instrumentalist “Grand Style” of judicial decisionmaking. All these individuals were part of the early 20th century “Realist Movement” in the law, which was a functional assault on the analytic presuppositions of the formalist style of decisionmaking. Nevertheless, despite all being “realists,” there are clear differences between the Holmesian style of interpretation and Llewellyn’s “Grand Style” of interpretation that apply across the fields of common-law, statutory, and constitutional interpretation.

CHAPTER 3: THE FOUR JUDICIAL DECISIONMAKING STYLES

Chapter 3 notes that a short-hand reference for the major differences among the four interpretation styles identified in Chapter 2 is the following: formalist judges emphasize the logical elaboration of existing legal categories; Holmesian judges add to this focus a functional emphasis on the purpose of the existing legal categories; natural law judges add to this positivist focus on the logic and purpose of existing legal categories a normative emphasis on the analytic balancing of background moral principles embedded in the law; instrumentalist judges add to this normative enterprise an emphasis on functional consideration of background social policies embedded in the law, which become particularly relevant when existing legal categories yield indeterminate or ambiguous results, and thus leeways exist in the law. Chapter 3 of the ET considers these various differences in greater depth.

These differences can be summarized in a more detailed version of Table 2:
CHAPTER 4: THE STRUCTURE OF LAW AS DETERMINED BY JUDGES

Chapter 4 discusses the fact that because of their different perspectives on the nature of law and the nature of the judicial task, the four styles of decisionmaking tend to have different predispositions on the nature of legal reasoning and the structure of legal doctrine. One difference that can be observed concerns whether legal reasoning tends to be predominantly deductive or inductive. Because of their focus on logical elaboration of existing legal categories, formalists tend to be deductive. Because of their focus on background social policies and social welfare, instrumentalists tend to be more inductive. Holmesians and natural law Justices fall somewhere in between.

Similar relationships exist for the four most important kinds of decisions that determine the form or shape of any legal doctrine. The first decision is whether doctrine should bephrased in absolute, categorical terms or as a balancing test. Once that decision is made, the next decision is whether the test should be phrased in terms of elements to meet or factors to weigh. The third is whether the elements or factors should be phrased in the language of specific rules or of broader standards. The final decision is whether the rules or standards should be viewed as questions of law to be decided by a judge or questions of fact to be determined by the trier of facts. Table 4 suggests how these decisions tend to be made by the Justices who use various styles of decisionmaking:

With respect to deduction and induction, there is a tendency for all Justices to reason deductively where the Constitution’s terms are relatively detailed and specific. For terms phrased more generally, like equal protection or due process, judicial elaboration has tended to be more inductive. As might be predicted, analytic approaches to law, like formalism and natural law, have a predisposition for as many categorical rules to be adopted as possible. In contrast, balancing developed based on the pragmatic, functional theories of Holmes, Benjamin Cardozo, and Llewellyn, and triumphed on the Supreme Court after 1937. In modern times, however, the natural law judge’s great respect for precedent, discussed in depth in the ET at §§ 7.3.3 & 12.2.2.2, and willingness to consider background moral principles embedded in the law, discussed in the ET at § 12.2.2.3, has pushed natural law judges more in the direction of a willingness to accept balancing tests. The precedents and background moral principles embedded in Court doctrine since 1937 during the Holmesian and instrumentalist eras are filled with more balancing tests than the precedents and doctrine considered by natural law judges between 1789-1873. Thus, despite adopting the same natural law style of interpretation, natural law judges today may reach different conclusions on the proper form or shape of doctrine than natural law judges in the past, based on today’s different substantive landscape of judicial precedents and background moral principles.

Regarding elements versus factors, formalists tend to prefer doctrine to be stated as elements to meet. Doctrines stated as elements are more likely to be capable of mechanical, logical, analytic application. In contrast, any weighing of factors is necessarily going to be an imprecise science. Not surprisingly, instrumentalists tend to be receptive to doctrine stated as factors, because most factor schemes permit judges to take into account through the weighing of factors full consideration of the social policies involved in the case.

As a positivist approach committed to following existing legal categories, most Holmesian judges are predisposed to favor doctrine phrased as more certain and predictable elements, except where the purposes behind the law are sufficiently complex that they can only be adequately reflected in a weighing of factors. The background moral principles of a society are likely to be similarly complex. Thus, although the analytic side of the natural law style would prefer doctrine to be stated more as elements to meet, the normative side of the natural law style, which is sensitive to the law’s purposes and to the background moral principles embedded in the law, counsels for some greater amount of doctrine to be phrased as factors to weigh than the formalist or Holmesian styles of interpretation.
Not surprisingly, given their focus on analytic, logical treatment of positive law, formalists have the greatest predisposition to frame doctrine as rules. Not surprisingly, instrumentalists tend to have a preference for standards. As noted in the ET at § 4.2.3, formalist Justice Scalia has led the charge on the Court for rules, while instrumentalist Justice Stevens has been his most consistent, standard-bearing opponent. Reflecting the connections indicated in Table 4 among balancing tests, factor analysis, and standards, on the one hand, and categorical tests, elements, and rules, on the other hand, Justice Stevens often prefers multi-factored contextual analysis and opposes rule-based or categorical decisionmaking, while Justice Scalia has indicated his reluctance to employ balancing tests, factor analysis, particularly in the form of “totality of the circumstances” tests, and standards of “reasonableness.” He has indicated a preference for categorical rules of general applicability.

Because of their positivist desire for certainty in following existing legal doctrine, Holmesian judges tend to have a preference for doctrine to be phrased more in terms of rules, than standards. On the other hand, the concern that too great an adherence to rules might distort the underlying moral basis of the law pushes the natural law style somewhat in the direction of standards, rather than rules. The language of standards is often better at encapsulating some background moral principle embedded in the law, such as the restitution principle that “no person should be permitted to profit from his own wrong”; or the contract principle that “promises should be kept”; or the tort principle that “persons should behave reasonably under the circumstances.”

The desire for certainty in existing legal categories typically has meant that formalist and Holmesian judges prefer legal doctrines to be phrased as issues of law for court resolution. Indeed, as noted in the ET at § 4.2.4, one of Holmes’ premises was that as standards of reasonable behavior became clear, judges should lay them down once and for all as per se rules of conduct. Justice Scalia has noted that a totality of the circumstances or a balancing test makes judges resemble a finder of fact more than a determiner of law. In contrast, the instrumentalist style, with its emphasis on the social policies underlying a case, often prefers doctrine to be phrased as facts for the social sensibilities of the triers of fact to be determinative. For the natural law style, the analytic side of natural law pushes in the direction of the formalist predisposition, while the normative side pushes more in the instrumentalist direction.

As with the other aspects of the form or shape of law, these observations reflect general judicial predispositions that can be overridden for other reasons with respect to any particular doctrine. For example, a conservative, law-and-order formalist may prefer a multi-factored “reasonableness” analysis instead of a categorical requirement of a “warrant and/or particularized cause”; a liberal instrumentalist may prefer categorical protection of some free speech right, rather than a free speech balancing approach. However, such observations regarding the possibility of judges departing for tactical reasons from their general predisposition with respect to a particular doctrine do not upset the general predisposition of the judicial decisionmaking styles noted here.

**PART II OF THE ET**

**CHAPTER 5: THE MATERIAL SOURCES OF CONSTITUTIONAL INTERPRETATION**

Chapter 5 discusses the sources judges use to interpret the Constitution. These sources of interpretation can be divided into two broad categories: contemporaneous sources and subsequent
sources. Contemporaneous sources are those existing when the Constitution was framed. There are three kinds of such sources: text, context, and history. Regarding these sources, any interpreter must decide, among other things, how much weight to give arguments about the plain, literal meaning of the Constitution's text versus the text's purpose or spirit; the context of that text, including verbal or policy maxims of construction, related provisions in the Constitution or other related documents, like the earlier enacted Articles of Confederation, and structural arguments involving the structure of government contemplated by the framers and ratifiers, including theories of judicial review, federalism, separation of powers, and checks and balances; and historical evidence concerning the intent of the framers and ratifiers, both specific historical evidence (Notes of the Constitutional Convention or inferences from The Federalist Papers), particularly as related to specific historical practices or specific intent, and general historical evidence (general background societal history), particularly as related to general concepts or principles in which the framers and ratifiers believed.

Subsequent sources are those which came into being after the Constitution was framed and ratified. These sources involve legislative, executive, and social practice under the Constitution; judicial precedent interpreting the Constitution, both core holdings of precedent and general reasoning of judicial opinions; and prudential arguments concerning the consequences of a particular judicial decision, both from the perspective of text, context, history, practice, and precedent, and whether that decision would advance a particular background principle of justice or social policy that the judge believes is “embedded” in the Constitution or existing constitutional doctrine, or perhaps a principle of justice or social policy that is “not so embedded” in the Constitution or existing constitutional doctrine.

All of these sources can be organized by resort to whether they involve relatively specific and limited interpretive tasks, or resort to more general kinds of reasoning. Specific interpretive tasks – like those involving the plain meaning of text; verbal maxims of construction; specific historical evidence, particularly involving specific historical practices or specific intent; or the core holdings of precedent – are more capable of being applied through deductive logic. In contrast, more general interpretive tasks – like those involving determining purposes behind text; resort to background structural arguments; resort to general historical evidence; reasoned elaboration of the law based on reasoning in prior judicial opinions; or prudential consideration of background principles or policies embedded in the law – involve greater use of the inferential logic of inductive reasoning. Given that the formalist style of interpretation is the style most comfortable with deductive modes of reasoning, the formalist style is naturally the most comfortable with placing greater reliance on specific interpretive tasks, such as only considering “general” arguments of purpose if the provision’s “specific” literal meaning is ambiguous or absurd. Holmesian judges, with their functional focus on a doctrine’s purposes, are more willing to embrace the general kinds of contemporaneous source reasoning, like arguments of purpose, than are formalist jurists. The main differences between natural law and instrumentalist judges are the natural law great respect for precedent and reasoned elaboration of law, not shared by instrumentalists, versus the instrumentalist greater focus on prudential considerations.

Table 5 summarizes each of these sources of interpretation, divided into the categories of contemporaneous versus subsequent sources, and specific interpretive tasks versus more general kinds of reasoning. Detailed discussion of each of these sources appears in the ET in Chapter 5.

CHAPTER 6: THE FORM OR SHAPE OF CONSTITUTIONAL INTERPRETATION

Chapter 6 addresses each of the sources of interpretation – text, context, history, practice, precedent, and prudential considerations – and discusses the various interpretive choices that judges must make in considering use of each source.

TEXT

For all judges and all styles of interpretation, the text of the Constitution is the starting point in determining the intention of the framers and ratifiers of the Constitution. However, there is a debate within constitutional interpretation, as within statutory interpretation, whether text should be given a subjective or an objective interpretation.

The case for subjective interpretation is that it attempts to reflect accurately the actual subjective intent of the drafters of any instrument to be interpreted. That is, after all, what interpretation attempts to do. However, two major criticisms have been leveled against subjective interpretation. First, there is no “single” person whose subjective intent we are endeavoring to discover when interpreting a statute. Applied to constitutional interpretation, the same objection would be that the framers and ratifiers were a large and heterogeneous group, each member of which may have had a different subjective intent. Further, even if one could surmount this problem, there is the additional problem of how to determine the actual subjective intent of even a single drafter or ratifier. Evidentiary problems with determining internal mental intent pose problems for a subjective theory of interpretation. This is particularly true the farther one moves from the
document’s initial drafting, so that the judge does not necessarily share, or have experienced, the background of the drafting.

In contrast to the subjective intent approach to interpretation, the objective approach states that the search is for an “objectified” intent – the intent that a reasonable person would gather from the text of the law, placed next to the general body of legal doctrine. In support of objective interpretation, it has been noted that it is simply incompatible with fair government to have the meaning of a law determined by what the lawmaker meant, rather than by what the lawgiver promulgated. It is the law that governs, not the intent of the lawgiver. As noted in the ET at § 6.2.1.1, for Chief Justice Marshall, and most judges in the founding era, the “intent” of the Constitution was not the subjective “intent” of the minds of the framers, but rather the “intent” gleaned from applying traditional modes of interpretation and canons of construction to the document’s text.

In response, it has been noted that whichever rubric is adopted – “legislative intent” or “objective meaning” – the role of purpose is preeminent, and that in most cases ascribing purposes to groups and institutions can be done without many practical difficulties. Indeed, in most cases, subjective focus on the intent of the framers and ratifiers, or objective focus on the text interpreted from the perspective of a reasonable person, will yield similar results, particularly to the extent the framers and ratifiers were reasonable people and used words in a reasonable way.

In considering constitutional text, as in considering statutory text, a judge must also decide whether to read the text only literally, and thus risk missing the spirit, or purpose, behind why the text was adopted, or whether to interpret the provision in light of both its letter and spirit. Once the spirit or purposes of a constitutional provision are determined, the judge must also decide to what extent those purposes will be allowed to override the literal meaning of the text when conflicts arise. Factors which might be relevant in making this determination include the clarity of the textual language (the more clear the language, the more weight it is given); how much conflict exists between the letter and spirit of the provision (a clear conflict between letter and spirit suggests either that the language’s text was not well-drafted or the judge has misidentified the provision's purposes); and does the literal meaning trample on fundamental rights otherwise protected (suggesting that the literal meaning is not well-drafted, given the commitment to protect the fundamental right).
Regarding context, any interpreter must decide whether to give arguments of context a restrictive or receptive use. The differences among judges relate to relative weight, particularly with respect to maxims of construction. The most widely-used verbal maxims, such as the expression of one thing implies exclusion of others (*expressio unius est exclusio alterius*), and policy maxims, such as ambiguities in criminal statutes should be resolved in favor of the defendant, are discussed in the ET at § 5.2.2.1. While most judges fully embrace contextual review, some judges, notably formalists, may minimize elements of context, particularly certain maxims of construction, on grounds of promoting certain, predictable, mechanical application of literal text.

Regarding the structural issue of judicial review, judges in the analytic tradition – formalist and natural law – typically take the view that courts should be willing to rule that certain governmental action is unconstitutional if the court concludes that the other sources of meaning support that finding. There is no policy of any special deference to legislative or executive action. As Justice Scalia has noted, this is not “strict construction” but “reasonable construction.” On the other hand, there is no view that the courts have a special role to play in protecting certain kinds of constitutional rights that calls for a special interpretive technique when considering those rights.

Under the Holmesian deference-to-government style of interpretation, courts should defer to governmental action, unless the unconstitutionality of the governmental action is "so clear that it is not open to rational question." Under this “strict construction” approach, only if the sources of interpretation clearly indicate that the government's action is unconstitutional – rather than merely on balance leading to that conclusion – should the Court find the action unconstitutional.

At the other extreme from this posture of judicial deference, a judge might conclude that courts have a special role to play in our democratic system by protecting certain kinds of constitutional rights. For example, some judges may believe that courts have special obligations to provide extra protection for the disadvantaged or unempowered in society. Other judges may believe that courts have special obligations regarding protecting individuals' civil rights or civil liberties. This is the approach adopted by most instrumentalist jurists, who perceive flaws in the Holmesian deference-to-government approach when applied to issues of civil rights and civil liberties.

In addition to this predisposition regarding judicial review, judicial approaches toward the structural issues of judicial review, federalism, separation of powers, and general approach toward individual rights tend to be driven by whether the judge is conservative or liberal. As referenced in the ET at § 6.4, with regard to judicial review, conservative individuals tend to favor tradition and the status quo, which more often suggests the “static” constitution model of formalism, or the Holmesian deference-to-government model, while liberals tend to favor instrumentalism, which authorizes judges prudentially to aid the unempowered in the progressive reform of society. On issues of federalism, conservative judges tend to prefer states’ rights, while liberal judges tend to favor exercises of federal power. On separation of powers issues, conservative judges tend to favor the executive, while liberal judges tend to favor the legislative branch. On individual rights, conservative judges tend to focus on the protection of economic rights, for both individuals and businesses, while liberal judges tend to focus on the protection of non-economic, civil or political rights.

HISTORY

Regarding history, any interpreter must decide which historical sources to use: (1) legislative history of the provision in question, like notes of the Constitutional Convention, records of state ratifying conventions, or House or Senate statements made during consideration of constitutional amendments; (2) thoughtful contemporaneous statements during ratification of the Constitution, like The Federalist Papers; (3) existing legislative and executive practice, and existing judicial precedents, at the time the provision was drafted and ratified, mostly in the United States, but also English practice and precedent, to the extent history suggests that the English experience is relevant to understanding the choices made by the framers and ratifiers; and (4) other typical sources of historical inquiry (evidence of general social practice on a particular issue, newspaper accounts, statements of respected organizations, or other reliable evidence of public opinion generally).

Historical sources (2) and (3) listed above are routinely viewed by judges as appropriate to use. With regard to legislative history, source (1) listed above, most commentators have stated that in the late 18th and early 19th century the prevailing mode of interpretation, in both England and the United States, was that the legislative history of a provision should not be considered in determining its meaning. Thus, notes of the Constitutional Convention, or statements made on the floor of the Congress while considering constitutional amendments, were not proper to consider, while contemporaneous statements about the meaning of the Constitution, like The Federalist Papers, were proper to consider. There is some evidence, however, that traditional common law courts in England and courts in the early post-revolutionary period in the United States did rely, to some extent, on drafting history, as did the First Congress in debating issues of constitutional power. All commentators agree, however, that any limitation on using documents like notes of the Constitutional Convention gradually died out during the 19th century in America. Thus, notes of the Constitutional Convention, or House or Senate statements about amendments, became proper to use as history to determine the framers and ratifiers’ intent during the second half of the 19th century.

Justice Scalia’s appointment to the Supreme Court in 1986 reinvigorated questioning the use of legislative history, in both statutory and constitutional cases. Under Justice Scalia’s literal, textualist, formalist approach focused on objective meaning, the subjective intent of the legislature is not important in interpretation. Thus, legislative history should not be used as an indication of a provision’s meaning. Interpretation should focus instead on the plain meaning of text, augmented by consideration of the text of related provisions, traditional maxims of statutory construction, plus any objective historical evidence of meaning, such as for the Constitution, The Federalist Papers. During the 1980s, Justice Scalia’s “New Textualism” approach gained some support, particularly among Chief Justice Rehnquist and Justices O’Connor and Kennedy, although their support was not consistent. During the 1990s, Justice Thomas also indicated support for the New Textualism model.
of interpretation. During the 1990s, however, support waned on the Court for Justice Scalia's New Textualism model of interpretation. Only Justice Thomas remained a consistently faithful ally. Justices Stevens, Souter, Ginsburg, and Breyer clearly rejected the New Textualism model of interpretation. Although initially sympathetic to Justice Scalia's approach, Chief Justice Rehnquist, and Justices O'Connor and Kennedy, typically rejected it as well. The one limitation on this rejection may be for cases where the statutory or constitutional text is crystal clear, where these Justices were reluctant to let legislative history “cloud” a text that is “clear.”

With regard to source (4) – various kinds of social practice – formalist and most Holmesian judges have rejected its use. As positivists who believe that all law emanates from the sovereign will, formalist and Holmesian jurists have been reluctant ever to permit use of mere social practice as evidence to determine the meaning of constitutional provisions. Despite this view, there is an argument, discussed in the ET at § 10.2.2.1, that a true Holmesian would reject the view that evidence of social practice should never be used. This approach would follow Justice Holmes' view in *Lochner v. New York* that our tradition derives from both "our people and our laws," although not foreign laws. Nevertheless, perhaps because of the Holmesian posture of deference to government, many Holmesian jurists have adopted the limitation of looking only to legislative and executive practices to determine our Nation’s “history and traditions.”

Natural law and instrumentalist jurists, as followers of a normative approach to law, are more willing to consider normative considerations from whatever source, including social practice, particularly in the United States, but also the world community generally. The classic example regarding practice in the United States, as noted in the ET at § 6.3.1, involved James Madison, who while President in 1815-16 relied upon "repeated recognitions under varied circumstances of the validity of such an institution, in acts of the Legislative, Executive, and Judicial branches of the Government, accompanied by indications, in different modes, of a concurrence of the general will of the nation" to support the constitutionality of Congress creating a national bank, although he had opposed the bank’s creation when first proposed in 1791. With regard to social practice in the world community generally, this can be justified for instrumentalist judges as part of prudential consideration of sound social policy, as discussed in the ET at § 11.2.2.1. For natural law judges, this can be justified to the extent the provision being interpreted is viewed as incorporating a natural law principle of universal applicability, whose contours can better be understood by considering social practice from around the world, as discussed in the ET at § 12.2.2.1.

Another issue with respect to history is determining the level of generality within which historical insights should be viewed. For example, a judge engaged in an historical inquiry could remain focused on the specific examples seemingly held by the framers and ratifiers about a particular provision of the Constitution. On the other hand, a judge could focus on the general concept held by the framers and ratifiers about a provision. An intermediate position holds that whether the interpreter should focus on the specific examples held by the framers and ratifiers about a provision, or their general concepts, depends on the provision in question. To the extent a provision is "relatively direct, specific, and focused," this may suggest that the framers and ratifiers intended the provision to reflect only detailed, specific choices. If so, judges should naturally remained focused on those choices. Where history suggests instead that the framers and ratifiers embedded in the Constitution broad concepts, like those dealing with the First Amendment, Equal Protection Clause,
and Due Process Clause, history may suggest that the framers and ratifiers intended to provide no hard-and-fast answers and to let the answers develop over time in common-law fashion.

For example, natural law judges tend to view the Establishment Clause as reflecting an Enlightenment-based general concept of separation of church and state. That general concept would likely counsel a judge to find unconstitutional such practice as officially organized prayer in public schools, despite the fact that such prayer would likely be an example thought constitutional by the framers and ratifiers as determined by specific historical practices and understandings. Given their greater focus on specific historical practices, formalist judges tend to support prayer in schools.

**PRACTICE**

Regarding legislative and executive practice, one approach states that a court should be sensitive to such practice only to the extent it aids understanding of, and is faithful to, the meaning of the constitutional provision at ratification. This approach is adopted by those who believe in the “static” Constitution whose meaning does not change over time, typically formalist judges. From this perspective, the alternative view of a living Constitution is incompatible with the antievolutionary purpose of a constitution. For such judges, events occurring after ratification are relevant only to the extent they illuminate what the Constitution meant at the time of ratification. For example, the views of the First Congress in 1789, filled with persons who played a large role in drafting the Constitution, have been held to have special relevance in determining constitutional meaning.

A second approach toward legislative or executive practice states that later legislative or executive practice under a particular constitutional provision can provide a gloss on meaning. For example, James Madison consistently thought that “*usus,*” the exposition of the Constitution provided by actual governmental practice and judicial precedents, could help settle the meaning and the intention of the authors. Under this approach, the Constitution is a “living” document whose meaning can change pursuant to legislative or executive practice under the Constitution.

**PRECEDENT**

In theory, there are two different approaches to precedent. Under one approach, a court will change its mind, that is, overrule a prior decision, if the court decides that the earlier court "got it wrong." A second approach holds that a sequence of court decisions can provide a gloss on meaning to the Constitution. This can change what the Constitution means in the same fashion as legislative and executive practice can provide a gloss on meaning.

This “gloss on meaning” approach is grounded in the way documents had been interpreted for centuries under the English common law, and was so understood by the framers and ratifiers of the Constitution. Common law had long regarded usage as evidence of the meaning of ancient instruments, and had regarded judicial determinations of that meaning even more highly. Under this approach, which is adopted by natural law judges grounded in traditional common-law ways of adjudication, a sequence of court decisions can provide a gloss on meaning that alters a constitutional provision's interpretation as gleaned from examining the other sources of constitutional meaning. Thus, it would take something more to overrule a prior decision than just a later court deciding that the earlier court "got it wrong." The factors that might be used to provide
this extra impetus to overrule a precedent, discussed in the ET at §§ 7.3.3-7.3.4, include: (1) the prior decision turns out to be unworkable in practice; (2) the decision has been rendered inconsistent or irreconcilable with related doctrines or its conceptual underpinnings have been removed or weakened by later decisions, or later legislative or executive action; (3) a changed understanding of facts has undermined the factual basis of the precedent; (4) the decision is inconsistent with some strongly held principle of justice or social welfare policy; or (5) the decision is inconsistent with the “rule of law.”

For positivist judges, as a theoretical matter, precedents should have no force of law, as the positive law exists independent of the judge. Thus, any prior judicial opinion, if viewed as erroneous by a current judge, should be entitled to no weight. Despite this theoretical model, as a practical matter most positivist judges will give some respect to the core holdings of precedent either as a matter of following “settled law” or following decisions on which there has been “substantial reliance.” Examples in the context of constitutional adjudication of formalist and Holmesian judges following precedents based on “settled law” or “substantial reliance” are discussed in the ET at § 7.3.2.

For instrumentalist judges, the normative nature of the judicial task means that as a theoretical matter the judge should give some “gloss on meaning” respect to judicial precedents because of the normative role of judges in developing legal doctrine. However, as discussed in the ET at § 3.3, as a practical matter, under the instrumentalist “Grand Style” of judicial decisionmaking “precedent' is carefully regarded, but if it does not make sense it is ordinarily re-explored.” This willingness to “re-explore” precedent based on whether the judge concludes the precedent “makes sense” has meant that in practice instrumentalist judges tend to be the least faithful to following existing precedents. Specific examples in the context of constitutional adjudication of this instrumentalist predilection for not following precedents are discussed in the ET at § 7.3.2.

**PRUDENTIAL CONSIDERATIONS**

Issues involving prudential considerations concern the weight to be given to four kinds of prudential arguments: (1) the contemporaneous sources of constitutional text, purpose, context, and history; (2) the subsequent event sources of practice and precedent; (3) the mainstream normative concern with whether the decision would advance a particular background principle of justice or social policy embedded in the law; or (4) the more radical normative concern with whether the decision would advance a principle of justice or social policy that is not so embedded in existing legal doctrine.

Judicial consideration of arguments of justice or social policy that are not embedded in existing legal doctrine, category (4) listed above, involve what is often termed “non-interpretive” review. Such review is non-interpretive because the Court reaches the decision without really interpreting text, context, history, practice, or precedent. As opposed to text, context, history, practice, precedent, or resort to background principles of justice or social policy that the judge believes are embedded in the Constitution, non-interpretive review involves a judgment about the impact of a particular constitutional interpretation in light of value considerations that the judge determines should be part of the Constitution. These non-interpretive sources of value can derive from a supposed community consensus or societal tradition, or values the judge thinks the community eventually will hold, or
the judge's own values. As discussed in the ET at §§ 6.4.1 & 6.4.2, only “radical” instrumentalist or “Platonic Guardian” natural law jurists feel comfortable engaging in non-interpretive review.

With regard to the other three categories of prudential considerations, the formalist style, with its static model of constitutional interpretation, believes that judges should resort only to category (1)’s contemporaneous sources of prudential argumentation. The Holmesian style, with its “deference-to-government” model of interpretation, is willing to add category (2)’s subsequent events of legislative and executive practice. The natural law style is willing to add category (3)’s prudential consideration of background principles of justice. The instrumentalist style is willing also to consider category (3)’s prudential consideration of social policy. Reflecting a positivist theory of decisionmaking, formalist and Holmesian judges reject category (3)’s resort to background principles or policies claimed to be embedded in the law, since they are not clearly part of existing legal doctrine.

CHAPTER 7: EFFICIENT CAUSES OF CONSTITUTIONAL INTERPRETATION

Chapter 7 addresses various issues involved with the Supreme Court’s decisionmaking process. In many cases, the central issue is what level of scrutiny should be used to analyze the constitutionality of the government action before the Court. The most deferential standard of review, used by Chief Justice Marshall in 1819 in *McCulloch v. Maryland*, and today described as minimum rational review, is found most prominently in cases on substantive due process review (§ 27.1.2) or equal protection review (§ 26.4.1) of economic legislation. Under this level of review, a burden is placed on the challenger to show that the challenged government action has no legitimate end, or that the means are not rationally related to that end, or that the means impose an irrational burden on individuals. Substantial deference is given to the government in applying this test. Among other areas, this level is used to review most aspects of congressional power to legislate under Article I, § 8 (§ 18.3).

In addition to this “base” level of minimum rational review, the Court has adopted six higher levels of review. In second-order rational review, no substantial deference is given to the government, and the relationship of means to legitimate ends, considering the benefits and burdens of the government action, must be reasonable and not excessive, in an overall factor-weighing approach. This level of review is used, among other areas, for dormant Commerce Clause review of even-handed state regulations which burden interstate commerce under *Pike v. Bruce Church* (§ 20.3.2); Contract Clause review where the state impairs the value of its own contracts (§ 22.1); Takings Clause review of standard economic regulations (§ 22.2); procedural due process cases under the *Mathews v. Eldridge* test (§ 27.4), and less than undue burdens on unenumerated fundamental rights under a substantive due process analysis (§ 21.2.3).

In a slightly higher level, called third-order rational review, the burden is shifted to the government to justify the constitutionality of its action. This level is used, among other areas, for dormant Commerce Clause review of state action that discriminates against interstate commerce under *Maine v. Taylor* (§ 20.3.2); Takings Clause review of exactions under *Dolan v. Tigard* (§ 22.2); and rights of government workers to speak on matters of public concern under the *Pickering* test (§ 30.2.2).
The next level of review is called intermediate review. Under intermediate review, the government must show that its interests are important or substantial, the means are substantially related to the ends, and the means are not substantially more burdensome than necessary. Among other areas, this level appears in equal protection cases involving discrimination based on gender (§ 26.3.1) or illegitimacy (§ 26.3.2), and for content-neutral regulations of speech in a public forum (§ 29.2). The term “intermediate with bite” is used in this book to describe the next higher standard that is used for reviewing content-based regulations of commercial speech (§ 30.3.2). It is the same as intermediate review, except that the means must be directly related to the governmental end, rather than being merely substantially related.

Finally, the Court has adopted two versions of strict scrutiny. Both require the government to justify its actions in terms of a compelling interest, and the means must be directly related to achieving that interest. For the highest level of strict scrutiny, the law must also be the least restrictive effective alternative. Among other areas, this level is used in cases of race discrimination (§ 26.2.1), content-based regulations of speech in a public forum (§ 29.2), and substantial burdens on unenumerated fundamental rights under a substantive due process analysis (§ 21.2.3). However, in a few cases, such as involving racial redistricting (§ 26.2.1.5), the Court has used a loose form of strict scrutiny, where it is enough if the means are not substantially more burdensome than necessary, rather than having to be the least burdensome effective alternative that the government could have adopted. Chapters 17-32 provide many examples of this “base plus six” model of levels of review:

Table 7
Levels of Review of Government Action: The “Base Plus Six” Model of Levels of Review

Page 1960
In addition to discussing this “base plus six” model of the levels of review, Chapter 7 builds on Chapter 4’s discussion of judicial predispositions with respect to legal reasoning and the form of legal doctrine. Discussed with specific reference to constitutional law, Chapter 7 addresses the approach to judicial reasoning as predominantly deductive or inductive, discussed at § 7.1; the adoption of legal doctrine as categorical rules or balancing tests, as elements to meet or factors to weigh, as rules or standards, and as questions of law versus questions of fact, discussed at § 7.2; the treatment of precedent in a narrow or broad fashion or as having a gloss on meaning or not, discussed at § 7.3; and aspects of the judicial process, including the nomination and confirmation process for Supreme Court Justices; the process by which cases get decided, including the rules regarding Supreme Court adoption of cases through grants of petitions for certiorari, mechanism of Supreme Court consideration of cases in judicial conference, the process of selecting a Justice to write the Court’s opinion, and the possible writing of concurring and dissenting opinions; and rules of judicial recusal, discussed at § 7.4.

**CHAPTER 8: THE PURPOSES OR ENDS OF CONSTITUTIONAL INTERPRETATION**

Chapter 8 discusses the purposes behind various constitutional provisions. It might be supposed that constitutional decisions would contain evaluations of consequences in terms of the goals stated in the preamble to the Constitution. That preamble states: “We the People of the United States, in Order to form a more perfect Union, establish Justice, insure domestic Tranquility, provide for the common defence, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity, do ordain and establish this Constitution for the United States of America.”

Opinions of the Justices, however, have not dealt with this language as if it were operative text. Instead, to find intended ends, they have looked to the specific details of constitutional text, context, history, practice, precedent, and prudential considerations. Among the goals discovered there are: government efficiency, advanced by the twin ends of competent decisionmaking and uniformity of results; the prevention of tyranny; certainty and predictability in law; fundamental fairness in each case; the protection, either directly or indirectly, of individual rights or group rights; the protection, either directly or indirectly, of autonomy rights or rights to substantially equal results; civil peace; material prosperity through economic growth; scientific progress; and rational liberty.

Although the Court has not organized its consideration of ends in this way, they can be organized consistent with the preamble to the Constitution. So organized, these ends can be viewed as falling under one of the following four general categories:
Table 8
Purposes of the Constitution Organized According to the Preamble

(1) Allocate government power (“form a more perfect Union, . . . insure domestic Tranquility, provide for the common defence, [and] promote the general Welfare”)

(2) Produce well-formed doctrine that gives principled treatment to constitutional text and precedent (“establish Justice”)

(3) Reconcile government power and individual rights (“secure the Blessings of Liberty to ourselves and our Posterity”)

(4) Conduct search for original intent (“We the People . . . do ordain and establish”).

Decisions whose primary ends involve the structure of government include relations among government and the people, among the federal government and state governments, and among the branches of the federal government. These cases are dealt with in Chapters 17-20, involving judicial review, federalism, separation of powers, and checks and balances. A summary of the ends involved in these cases, particularly balancing the ends of government efficiency versus the prevention of tyranny, is discussed at § 8.1. These ends primarily reflect those aspects of the preamble that focus on forming “a more perfect Union, . . . insure domestic Tranquility, provide for the common defence, [and] promote the general Welfare.”

References in opinions to ends that relate to producing well-formed doctrine, including the Court’s treatment of constitutional text and precedent, are discussed at § 8.2. These ends, which particularly involve balancing the goals of certainty and predictability in law versus the goal of fundamental fairness in each case, relate to the language in the preamble regarding the goal to “establish Justice.” Chapters 21-24 deal with the development of those constitutional doctrines that are principally connected to “establish Justice.”

The Court must also address the problem of how to accommodate the need for adequate governmental power with the need to protect individual rights, particularly in areas of the law like due process, equal protection, the freedom of speech, and the religion clauses. In a broad sense, all of these issues are related to the language in the preamble regarding the need to “secure the Blessings of Liberty to ourselves and our Posterity.” As discussed at § 8.3, these cases particularly involve the protection, either directly or indirectly, of individual rights or autonomy rights, or less often the protection, either directly or indirectly, of group rights or rights to substantially equal results, such as the Sixth Amendment right each individual has to counsel if indigent. Treatment of these issues in the context of the Civil War Amendments, including the right to due process and equal protection of the laws, is discussed in Chapters 25-28. Treatment of these issues in the context of the First Amendment, including freedom of speech and the religion clauses, is discussed in Chapters 29-32.

The final cause of the ends of constitutional law involves the purpose of constitutional interpretation, that is, whether the judge adopts an originalist or non-originalist decisionmaking approach. An originalist approach aims at arriving at interpretations of the Constitution that comport with what the framers and ratifiers intended. A non-originalist approach believes that constitutional decisionmaking should also reflect concepts of justice and social policy that are not necessarily part
of what the framers and ratifiers intended. A typology of non-originalist approaches includes: (1) what is the judge’s own view as to the best interpretation theory in terms of yielding the best consequences for society in terms of principles of justice and/or social policy, a “consequentialist” approach; (2) what theory of interpretation is best reflected in existing doctrine, a “current consensus” or “tradition” approach, sometimes called a “Dworkian” approach; (3) what theory of interpretation is most likely to be reflected in the future, what the “community eventually will hold,” if that can be determined, a “progressive historicist” approach; or (4) a “pluralist” model of interpretation reflecting some “unspecified combination” of original intent, consequentialist, current consensus, and progressive historicist reasoning.

This issue of originalist versus non-originalist interpretation is related to how one should interpret that part of the preamble which states, “We the People of the United States . . . do ordain and establish this Constitution for the United States of America.” As noted at § 8.4.1, from an originalist perspective, four goals of the framing and ratifying generation were critical: civil peace; material prosperity through economic growth; scientific progress; and rational liberty. These ends are reflected in the specific goals stated in the preamble to “establish Justice, insure domestic Tranquility, provide for the common defence, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity.”

A practical impact of considering all of these arguments of purpose is that it behooves advocates before the Court always to consider the value of identifying what consequences or values may hinge on the decision, and to consider how they relate to the advocate’s formal argumentation on constitutional meaning.

PART III OF THE ET

CHAPTER 9: FORMALIST CONSTITUTIONAL INTERPRETATION

As discussed in Chapter 9, between 1873 and 1937, the predominant approach to constitutional interpretation was formalism. Today, Justices Scalia and Thomas typically make use of that style, and they may be joined by Justice Alito, as discussed in the New Justices Addendum in the ET. Formalists believe that the Constitution has a fixed, static meaning that can be changed only by amendment. Thus, they rely almost exclusively on contemporaneous sources, particularly literal meaning and specific historical intent, although they will follow well-established precedent as “settled law.” They prefer bright-line rules rather than standards, and prefer doctrine to reflect categorical elements rather than a balancing or factor-weighing approach. Table 9.3 in the ET at § 9.3.1 summarizes this approach.

CHAPTER 10: HOLMESSIAN CONSTITUTIONAL INTERPRETATION

As discussed in Chapter 10, from 1937 until 1954, a majority of the Supreme Court Justices adopted the interpretation theories of Justice Oliver Wendell Holmes, Jr. Holmes shared the formalist emphasis on literal meaning and specific historical intent, but was willing to consider purpose or general intent arguments because of his focus on the fact that all law has a purpose. Since Holmes also thought that law should reflect the will of the people, he gave considerable deference to the subsequent sources of legislative, executive, and social practice. Holmes also followed precedents
which were settled law or on which persons had substantially relied. The Constitution thus can be a living document, particularly to the extent its interpretation reflects legislative and executive practice, or judicial precedents. A recent follower of this style was Chief Justice Rehnquist. Chief Justice Roberts appears likely to be a Holmesian, as discussed in the New Justices Addendum in the ET. Table 10.3 in the ET at § 10.3.1 summarizes this approach.

CHAPTER 11: INSTRUMENTALIST CONSTITUTIONAL INTERPRETATION

As discussed in Chapter 11, between 1954 and 1986, the controlling votes on the Supreme Court were typically held by instrumentalists, who viewed the Constitution as a living document that should be interpreted as an instrument to bring about just results. For instrumentalists, all of the sources of constitutional interpretation are relevant in the interpretation process, including consequences considered in terms of policy considerations. Influential instrumentalists on the Court during the 1960s included Chief Justice Warren, and Justices Douglas, Brennan, Fortas, and Marshall. On today’s Court, Justices Stevens, Ginsburg, and Breyer embody a moderate form of instrumentalism in their decisions. Table 11.3 in the ET at § 11.3.1 summarizes this approach.

CHAPTER 12: NATURAL LAW CONSTITUTIONAL INTERPRETATION

As discussed in Chapter 12, from 1789 until 1873, and again in recent key votes since 1986 of Justices Powell, O’Connor, Kennedy, and Souter, the judges followed the 18th-century tradition of reasoned elaboration of the law in light of the law’s purposes and history, with fidelity to precedent and to a considered and consistent legislative, executive, or social practice. Chief Justice John Marshall, and modern natural law Justices, have also considered whether certain consequences of decisions reflect faithful adherence to background principles that are embodied in constitutional text, context, history, practice, or precedent. Table 12.3 in the ET at § 12.3.1 summarizes this approach.

CHAPTER 13: FORMAL CAUSES AND THE FIVE ERAS OF AMERICAN LAW

Chapter 13 discusses the fact that in the more than 200 years since ratification, the Constitution's interpretation and application have been determined by Supreme Court Justices whose members have reflected different combinations of the four interpretation styles discussed in Chapters 9-12. In general, there have been five eras of Supreme Court decisionmaking: (1) the original natural law era of 1789-1873, which corresponds roughly to the Marshall and Taney Courts, with Justice Story as a bridge between the two; (2) the formalist era of 1873-1937, which corresponds to the Court’s treatment of the 1873 Slaughter-House Cases as precedent during the last third of the 19th century and the Lochner v. New York/Hammer v. Dagenhart era of the first third of the 20th century; (3) the Holmesian, New Deal Court era of 1937-54, which involved the rejection of Lochner and Dagenhart against the backdrop of President Roosevelt's “Court-Packing Plan” in 1937; (4) the modern instrumentalist era of 1954-86, which was inaugurated by Brown v. Board of Education and lasted through the Warren and Burger Courts; and (5) the emerging modern natural law era of the Court since 1986. Table 13.4 in the ET at § 13.4 summarizes the interpretation style of all Justices on the Court since 1968; text at § 13.4 summarizes the interpretation style of all Justices on the Court since 1937; the entry “Justices” in the Name Index in the ET refers to the interpretation style for all 110 Justices who have been confirmed as Supreme Court Justices between 1789-2006. The file named “Table of Justices” in the ET indicates when each Justice served on the Supreme Court.
CHAPTER 14: MATERIAL CAUSES OF THE FIVE ERAS OF AMERICAN LAW

Chapter 14 notes that, as its most elementary level, the cause of each of the five eras of American constitutional law were the Presidents who nominated, and the members of the Senate who confirmed, the Justices who sat on the Supreme Court. Identifying the political currents underlying the elections of these Presidents and Senators can help better define the form or shape of these eras of American law. Similar to the four judicial decisionmaking styles, there are four approaches to political issues. At one extreme are traditional conservatives who are conservative on both fiscal and social policy. At the other extreme are modern liberals who are progressive on both fiscal and social policy. Third, there is the traditional liberal approach of the 18th and 19th centuries, which was conservative on fiscal policy, but progressive on social policy. Finally, there is a modern conservative position, progressive on fiscal policy, but conservative on social policy.

During the original natural law era of 1789-1873, the traditional liberal approach of the 18th and 19th centuries predominated as a matter of politics. During the formalist era of 1873-1937, a traditional conservative approach predominated. During the Holmesian era of 1937-54, a modern conservative position was prominent. During the instrumentalist era of 1954-86, a modern liberal approach predominated. The predominant approach of the modern era suggests a modern version of the traditional liberal approach. Details regarding each of the five eras, both in terms of politics and the economic and social issues that defined these eras, are discussed at § 14.2. Fuller discussion of the nature of society and politics in the modern natural law era occurs at § 14.3. A few comments on the possible shape of social, political, and judicial decisionmaking in the future occur at § 14.4.

CHAPTER 15: EFFICIENT CAUSES OF THE FIVE ERAS OF AMERICAN LAW

The basic thesis presented in Chapter 15 is that when a critical mass of social actors in any society attain a particular level of cognitive development, social perspective-taking, and moral reasoning, the legal and political institutions in that society will change to reflect that fact. Part of that change in the United States will be the appointment of Justices to the Supreme Court whose views will more likely reflect the new level of reasoning. These appointments help create and support the progression in American legal history, discussed in Chapters 13 and 14, from the traditional natural law era, through formalism, Holmesian, and instrumentalism, into a period of modern natural law.

The analysis in Chapter 15 begins with Professor Michael Walzer’s views describing five general kinds of societies that have existed in world history: individual nations in international society, multinational empires, consociations, nation states, and immigrant societies. Next, Professor Lawrence Kohlberg’s theory is addressed. Professor Kohlberg’s theory postulates that there is a fixed set of six stages of moral reasoning through which individuals progress from childhood to becoming an adult: self-interest, except to avoid punishment; self-interest, but others have the right to demand the same; follow local customs; follow societal rules and traditions; follow rules of a social contract; follow universal principles of justice based on reason. Each one of Professor Walzer’s societies can be seen to be related to one of Professor Kohlberg’s moral reasoning stages: international society/self-interest, except to avoid punishment; multinational empires/self-interest, but others have a right to the same; consociations/local customs; nation state/societal rules and traditions; immigrant societies/social contract. A sixth kind of society, post-modern society, could
be based on following Kohlberg’s sixth stage of following universal principles of justice based on reason.

These stages of moral reasoning development in turn replicate what happens during the cognitive maturing process of each individual, as described by Professor Jean Piaget, and during the related advances in social perspective-taking ability, as described by Professor Robert Selman. Piaget’s stage of pre-operational thought, which is connected to childish egocentricism and inability to take other’s perspectives, is related to Kohlberg’s stages 1 and 2 of moral reasoning based on self-interest. Piaget’s next level of concrete operational thought is related to Kohlberg’s stages 3 and 4 of moral reasoning based on concrete local customs and concrete societal rules and traditions. Piaget’s highest level of cognitive development is formal operational thought, where individuals can take other individual’s perspectives fully into account and fully apply the hypothetico-deductive reasoning techniques of the scientific method. Applying formal operational thought to the basic question of the justification for moral rules would cause the adoption of the view that moral choice is “personal and subjective” and that whatever values are adopted are merely the product of the dominant forces in society, what Kohlberg defined as a transitional stage 4½ between his moral reasoning stages 4 and 5. Applying formal operational thought to the question of the means by which social ends are advanced would cause a push for fair procedures reflective of other individual’s perspectives in addition to one’s own to implement values that are the product of social contract choice, Kohlberg’s moral reasoning stage 5. Finally, applying formal operational thought to basic ends themselves would cause adoption of Kohlberg’s stage 6 of universal principles of justice based on reason.

When a critical mass of social actors in any society attain a particular level of cognitive, social perspective-taking, and moral reasoning development, then attitudes toward the political and legal institutions of that society should tend to reflect that new stage of moral development. In both American legal and political history in particular, and in the development of societies in world history in general, this is what one tends to see. The relationships among the stages described by Piaget, Selman, and Kohlberg, and legal and political history, are discussed at § 15.4. For American legal history, the relevant connections are Kohlberg’s stage 3 of local customs and traditional natural law based on viewing customs as reflecting reason; Kohlberg’s stage 4 of following society’s rules and traditions and formalist focus on rules, literal text, and specific historical practices in a society reflective of Walzer’s nation state; Kohlberg’s stage 4½ of values the product of the dominant forces in society and Holmesian deference to the dominant forces represented by legislative and executive practice; Kohlberg’s stage 5 social contract and instrumentalist embrace of social policy emerging from participatory democracy respectful of the diversity of Walzer’s immigrant societies; and Kohlberg’s stage 6 of universal principles of moral reasoning based on a modern natural law style of reasoning. Tables 15.1-15.4 in the ET at the end of § 15.4 summarize all of these connections.
CHAPTER 16: FINAL CAUSES AND THE FIVE ERAS OF AMERICAN LAW

As noted in Chapters 13-15, ideas on what is good have differed from one society to another and have changed from time to time within individual societies. The concern in Chapter 16 is what has been, is, and will be considered the good in American society, to the extent that it becomes reflected in constitutional law. Based on the discussion in Chapter 15 suggesting that a modern version of natural law will likely predominate in the future, the central question addressed in Chapter 16 is what universal rational principles of justice based on this modern natural law are likely to emerge for guiding the social, cultural, and legal systems of the United States. The principle that rational thought is non-ego-centric, combined with the assertion that moral thought should be rational, supports as moral the foundational principle of most moral traditions: the principle of love of neighbor as oneself, as reflected in most religious traditions; the similar principle behave according to the logic of the impartial spectator, as phrased by Adam Smith in the 18th century; or the similar principle behave with equal concern and respect for others, as phrased by Professor Ronald Dworkin in the 1970s and 1980s. Moral conclusions directly derivable from this principle are also rational. These include such widely-shared principles such as not taking innocent life, respecting other persons’ bodily integrity and personal property, and not lying to other people for one’s personal gain.

PART IV OF THE ET

Part IV of the ET (Chapters 17-32) considers Supreme Court decisions in the following order: structural issues of judicial review, federalism, separation of powers, and checks and balances (Sub-Part One, Chapters 17-20); general consideration of individual rights (Sub-Part Two, Chapters 21-24); discussion of the Civil War Amendments (Sub-Part Three, Chapters 25-28); and discussion of the First Amendment (Sub-Part Four, Chapters 29-32). Emphasis is placed on the nature and causes of change in the controlling decisionmaking style, and how the changes have influenced the form, substance, and purposes of the governing standards of review and the legal doctrine adopted in decided cases.

SUB-PART ONE: STRUCTURAL ISSUES IN CONSTITUTIONAL LAW

CHAPTER 17: JUDICIAL REVIEW

JURISDICTION

Certain principles of judicial review have not changed much over the past 200 years. It has been accepted since Marbury v. Madison, decided in 1803, that the judiciary has the final word on the meaning of the Constitution and may invalidate governmental action that violates its provisions as interpreted by the Court (§ 17.1). Once it is conceded that the Court can declare what is federal law, the Supremacy Clause makes that declaration the Supreme Law of the Land, and the judges in every state are bound, “any thing in the Constitution or law of any state to the contrary notwithstanding.”

Article III defines the nature of the federal judicial power. Under Article III, § 1, “The judicial power of the United States is granted to the Supreme Court and such inferior courts as Congress, from time to time, may establish.” Article III, § 2, cl. 1 provides that this power extends to all
“Cases,” defined by subject matter or impact: (1) “arising under this Constitution, the Laws of the United States, and Treaties made”; (2) “affecting Ambassadors, other public Ministers and Consuls”; or (3) “admiralty and maritime Jurisdiction.” This clause also extends federal judicial power to all “Controversies,” defined by parties, to which: (1) “the United States shall be a party”; or (2) between (a) “two or more States”; (b) “a State and Citizens of another State”; (c) “Citizens of different States”; (d) “Citizens of the same State claiming Lands under Grants of different States”; or (e) “a State, or the Citizens thereof, and foreign States, Citizens or Subjects.” (§ 17.2.1)

The Supreme Court has original jurisdiction over “all Cases affecting Ambassadors, other public Ministers and Consuls, and those in which a State shall be Party.” (§ 17.2.2.1.A) In all other cases within the federal judicial power (both federal question cases and those involving states or parties from different states, so-called diversity jurisdiction), the Supreme Court has appellate jurisdiction (§ 17.2.2.1.B), unless its jurisdiction has been limited “with such Exceptions, and under such Regulations as the Congress shall make.” (§ 17.2.3.1) The Court has jurisdiction to review decisions by state courts that raise federal issues, but no jurisdiction over appeals from decisions by state courts based on adequate and independent state grounds. The Court will assume, however, that any federal grounds mentioned by a state court were considered decisive unless the state court makes a clear statement to the contrary. (§ 17.2.2.3)

Most constitutional challenges are brought under 42 U.S.C. § 1983. It provides a cause of action for deprivation by state action of any federal rights. A similar action for denials of constitutional rights by federal officials has been held provided for by 28 U.S.C. § 1331. Exhaustion of administrative remedies is not required in § 1983 actions. For reasons of comity, state judicial proceedings that are underway will not be enjoined by a federal court if the state has a substantial interest in the outcome, as it does in criminal cases, civil cases brought by the state, and issues involving its power to enforce judgments (§ 17.2.4.4). When the constitutionality of an ambiguous state law depends on its meaning, federal courts may withhold action pending a state court action to resolve the state issue (§ 17.2.2.3). New rules of constitutional law are typically applied to all pending cases (§ 17.4.3).

ELEVENTH AMENDMENT IMMUNITY OF STATES

States have some sovereign immunity protection from actions brought to enforce federal law against them. Under the Eleventh Amendment and related state sovereign immunity doctrines, states and state agencies have sovereign immunity from damage lawsuits other than those brought by the United States or other states, unless that sovereign immunity has been waived. However, state officials may be sued for injunctive relief to prevent future violations of federal law. States and state officials can also be sued for damages if Congress has expressed that intent in unmistakably clear language and has appropriately exercised its enforcement power under the Civil War Amendments, discussed in Chapter 28, since those later amendments trump the 11th Amendment. However, Congress cannot subject states or state officials to liability by exercise of its power under the Commerce Clause, as the 11th Amendment protection of state sovereignty trumps provisions in the original Constitution. (§ 17.2.4)
STANDING

Federal jurisdiction is granted by Article III in “cases” and “controversies.” During the natural law and formalist eras, it was thought that a plaintiff could bring a case in federal court any time the plaintiff had a common law cause of action. During the Holmesian deference-to-government era, the plaintiff was required to have an “injury” for there to be a case or controversy. During the instrumentalist era, when the Court was expanding individual rights, the Court held it was sufficient that a dispute was presented in adversary form. However, in the modern era, the Court has again required that the plaintiff must have an injury-in-fact that was caused by the challenged conduct and that is redressable by the court. Congress may define injuries and causation beyond what would otherwise be recognized by the Court as adequate, provided Congress identifies the injury it seeks to vindicate and relates the injury to the class of persons entitled to bring suit. (§ 17.3.1)

In addition to satisfying Article III requirements for standing, the Court has adopted certain prudential principles to guide access to courts. These include: parties may not bring suit to vindicate “generalized grievances”; parties must be within the “zone of interests” of the constitutional or statutory provision to bring suit; a “third-party” rule limiting who may argue the rights of third parties not before the court if practical obstacles prevent those parties from bringing the action on their own; limitations on representational standing for organizations, states, and elected representatives to sue on behalf of members or constituents; and a general category of equitable discretion. (§ 17.3.1.4)

RIPENESS AND MOOTNESS

The Supreme Court does not render advisory opinions. A case is not ripe for resolution unless the alleged injury either has occurred or is certain enough to occur. In deciding on whether a case is ripe for resolution, the Court will weigh the factors of the hardship to the party if the Court decides to wait versus whether waiting will help further “crystallize” the issue for judicial review. (§ 17.3.2)

Federal courts will not decide cases that are moot, that is, cases where there is no longer an active controversy between the parties, unless the issue is capable of repetition and yet may evade review (such as a challenge to election procedures, which often are not decided until after the election); the defendant has voluntarily ceased the conduct, but it may reoccur; in a class action suit, other members of the class have on-going claims, even though the named members of the class no longer have a live controversy; or if collateral consequences exist that are not moot (convicted prisoner challenging conviction even after release from prison to get the record of the conviction expunged). (§ 17.3.3)

POLITICAL QUESTIONS

The Court will not decide “political questions,” which are defined as issues for the other branches of government to resolve, not the courts. In determining whether political questions exist, the Court looks to six factors: does there exist a textually demonstrable constitutional commitment of the issue to a coordinate branch of government; do judicially manageable standards exist to resolve the issue; does the issue call for an initial non-judicial policy decision; is there a special concern with expressing lack of respect for a coordinate branch of government; is there a special need for finality;
and the potential embarrassment from multifarious pronouncements if the court second-guessed how the coordinate branch has acted. Under current doctrine, typical issues which are viewed as political questions involve questions of a “Republican” form of government under the Guarantee Clause; the circumstances regarding valid ratification of constitutional amendments or political gerrymandering; military matters of proper training of troops or valid declarations of war; foreign policy issues regarding matters like termination of treaties; issues of legislative discretion, such as what conduct is a high crime or misdemeanor for purposes of impeachment or procedures to try impeachments; and issues of executive discretion, like placing names on a commodity control list. (§ 17.3.4)

CHAPTER 18: FEDERALISM

GENERAL APPROACH TO ISSUES OF FEDERAL POWER

In *McCulloch v. Maryland*, decided in 1819, Chief Justice John Marshall wrote for a unanimous Court that the Constitution has given Congress great powers and ample means for their execution, a result underscored by the Necessary and Proper Clause of Article I, § 8, cl. 18. That clause grants Congress the power “To make all Laws which shall be necessary and proper for carrying into Execution the foregoing Powers [of Article I, § 8, cls. 1-17], and all other Powers vested by this Constitution in the Government of the United States, or in any Department or Officer thereof.” The actions of Congress are valid, said Marshall, if the end is legitimate (within the scope of the Constitution), the means appropriate (plainly adapted to that end), and the means are not prohibited but consistent with the letter and spirit of the Constitution. (§ 18.1)

THE COMMERCE CLAUSE

The power of Congress in Article I, § 8, cl. 3 to regulate “Commerce with foreign Nations, among the several States, and with the Indian Tribes” has expanded and contracted in various eras. During the natural law era, Chief Justice Marshall wrote for a unanimous Court that the power to regulate commerce is a plenary power to enact laws for the purpose of regulating all forms of commercial activity except those “which are completely within a particular state, which do not affect other states, and with which it is not necessary to interfere, for the purpose of executing some of the general powers of the government.” States could also regulate for internal purposes in an area over which Congress has power, if Congress had taken no action preempting state power to regulate. (§ 18.2.1)

During the formalist era, the term “commerce” was limited to buying and selling – the core literal dictionary definition of commerce – and transporting goods to be bought and sold. Activities such as manufacturing, mining, and agriculture were viewed as separate from commerce, as involving producing goods, or mining raw materials, or growing crops, which would later be bought and sold in commerce. This view left regulation of such activities completely up to the states. (§ 18.2.2)

In response to the Great Depression, and federal New Deal regulation in response, the Court shifted its Commerce Clause jurisprudence in 1937 to abandon formalist limitations on what is “commerce.” During the Holmesian era, any activity in the “stream of commerce,” including manufacturing, mining, and agriculture, could be regulated by Congress as long as the activity had a “substantial affect” on interstate commerce, and thus was truly commerce “among the states.” In applying that
test, the Court looked in Wickard v. Filburn to aggregate effects of the regulation on all parties whom the statute regulated. Given the wide applicability of most federal statutes, that aggregation principle has meant that almost every congressional statute passed can satisfy the Wickard test. (§ 18.2.3)

During the instrumentalist era, the Court dropped the requirement that the activity be in the “stream of commerce,” in favor of asking only whether the activity had a “substantial affect” on interstate commerce, or sometimes merely a “significant affect” or “any affect.” The Court’s cases, however, all involved activity with an “economic nexus” to commerce, such as civil rights laws banning discrimination in selling hotel rooms or restaurant food, or criminal laws dealing with extortionate credit transactions, so the activities were in the “stream of commerce” anyway. (§ 18.2.4)

During the modern natural law era, the Court has rejected the reasoning of the instrumentalist era, and returned to the view that for Congress to regulate under the Commerce Clause the activity must be in the “stream of commerce” or have some “economic nexus” to commerce. Thus, a federal statute that declared illegal the possession of a gun around a school was held invalid as a pure criminal law unrelated to any economic activity. Similarly, the Court held invalid a federal civil rights action for victims of gender-motivated violence. Although gender-motivated violence has a “substantial affect” on interstate commerce under a Wickard aggregation analysis – since many victims of violence will miss days at work in recuperation – the violent activity regulated is not economic in any respect. Thus, the regulation was not one regulating “commerce,” and thus could not be justified as an exercise of Commerce Clause power. Under this approach, pure criminal laws, such as federal hate crimes laws, or laws making it an independent crime to do violence to a fetus under the Unborn Victims of Violence Act of 2004, are of questionable constitutionality. (§ 18.2.5)

OTHER ENUMERATED POWERS IN ARTICLE I, § 8

Actions of Congress under the other enumerated powers in Article I, § 8 are given deference consistent with the Court’s approach in McCulloch v. Maryland. Under Article I, § 8, cls.1-2, Congress has broad power to “lay and collect Taxes,” to provide for the “general Welfare of the United States,” and to “borrow Money on the credit of the United States.” The Court has interpreted these powers broadly, granting Congress the power to use the taxing power to create incentives for behavior, and to spend for any purpose that Congress considers to be within the general welfare, including placing conditions on spending to create incentives for behavior, unless the incentives are not rationally related to the spending or are coercive, which is almost never found. Under Article I, § 8, cls. 4-17, the federal government has broad powers to deal with fiscal matters, including coining money and passing laws on bankruptcy; regulate immigration and naturalization; establish post offices; provide for copyright and trademark protection; regulate admiralty and maritime matters, including punishing piracies and offenses against the law of nations; declare war; raise and support armies and navies, and make rules for their regulation, as well as provide for organizing, arming, and disciplining state Militias; and deal with federal land and property thereon. (§ 18.3)
UNENUMERATED POWER OVER FOREIGN AFFAIRS

All domestic powers of Congress and the President must come from express or implied delegations in the Constitution. However, the Court wrote in 1936 in United States v. Curtiss-Wright Export Co. that a congressional delegation of power to impose an embargo on certain foreign commerce was governed by a different principle because matters of external sovereignty vested in the United States government as a necessary concomitant of nationality. Also as a matter of foreign affairs, Congress can implement a treaty with legislation that it might not be able to enact without the treaty, at least where it deals with an important national problem and does not violate a specific prohibition in the Constitution. State policy cannot interfere with the foreign relations power of the United States, whether exercised by Congress or by the President in an executive agreement with another country. (§ 18.3.9)

TENTH AMENDMENT LIMITS ON FEDERAL POWER

The Tenth Amendment provides, “The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.” Consistent with this text, the 10th Amendment was originally understood to mean that states are free to legislate in areas not covered by specific prohibitions in the Constitution, or preempted by federal laws under the Supremacy Clause, but the 10th Amendment did not create any state immunity from federal action or create any areas of exclusively state power (§ 18.4.1). During the formalist era, the Court shifted its focus to the powers of the states, reflecting a conservative predisposition for states’ rights. However, the Court protected states’ rights through limiting federal power directly, such as the formalist limited reading of “commerce” to exclude federal power to regulate manufacturing, mining, and agriculture, rather than by employing a 10th Amendment analysis (§ 18.4.2). During the Holmesian era, based on the liberal predisposition of the New Dealer era Justices in favor of federal power, the Court returned to the view that the 10th Amendment merely states a truism that power is retained by the states that has not been delegated to the federal government (§ 18.4.3).

That approach continued until National League of Cities v. Usery in 1976. In that case, four more conservative Justices (Chief Justice Burger, and Justices Rehnquist, Stewart, and Powell) stated that Congress could not displace a state’s power to structure its “integral” operations in areas of “traditional” government functions. They were joined by moderate instrumentalist Justice Blackmun, who added the requirement in his concurrence, unless “state facility compliance with imposed federal standards would be essential.” Four more liberal Justices dissented (Justices Brennan, White, Marshall, and Stevens). In 1985, in Garcia v. San Antonio Metropolitan Transit Authority, Justice Blackmun abandoned his concurrence in National League and joined with liberal instrumentalists Justices Brennan, Marshall, and Stevens, and liberal Holmesian Justice White, to overrule National League. Justice Blackmun said that it was unworkable for the Court to seek limits on Congress’ power in terms of governmental functions, whether ”traditional” or ”integral.” Such distinctions invite judges to decide on what state policies they favor or dislike. Blackmun noted that any 10th Amendment limits on Congress' delegated power are in the safeguards inherent in the structure and political processes of the federal system, including the lobbying ability of groups like the National Governors' Association, the National Conference of State Legislatures, and the National
League of Cities, not the courts. Four more conservative Justices dissented in *Garcia* (Chief Justice Burger, and Justices Rehnquist, Powell, and O'Connor). (§ 18.4.4)

During the modern natural law era, state governments have been given 10th Amendment protection by the courts against federal efforts to “commandeer” their legislative or executive functions in pursuit of federal policies. In order to preserve a balance in federal/state relations, what is called the “Dual Theory of Sovereignty,” immunities have been recognized with respect to how the two levels of government relate to each other. Under the Dual Theory, each sovereign entity – federal and state – gets to decide how to regulate people under its jurisdiction. Thus, in *New York v. United States*, the federal government could not “commandeer” state legislatures by coercing them to pass state laws regulating their state citizens in accord with a federal standard. In *Printz v. United States*, the federal government could not require local sheriffs to enforce a federal regulatory program, as that would be telling state executive or administrative officials how to regulate their own state citizens. On the other hand, consistent with *Garcia*, the federal government can regulate state officials directly under valid federal programs – such as telling state workers at a Department of Motor Vehicles not to sell driver’s license information to mass marketers in *Reno v. Condon* – as long as the federal government enforces that regulation itself. In addition, based on specific historical practice and constitutional text, which provides in Article VI, § 2 that “the Judges in every State shall be bound thereby,” state courts are required to comply with federal law in cases before them. (§ 18.4.5)

**ADDITIONAL LIMITATIONS ON FEDERAL AND STATE POWER**

Article I, § 9 of the Constitution contains eight clauses providing for specific textual limitations on federal power (§ 18.5). The meaning of these clauses tends to be clear, and they have been litigated rarely. They can be read directly in original constitutional text (see Annotated Constitution).

A range of limitations on state power also appear in the Constitution. These appear principally at Article I, § 10 (§ 18.6.1) and the Article IV provisions dealing with Admittance of New States, State Power over Property, and the Guarantee Clause (§ 18.6.2). These clauses have also not provided the source for many cases, and can be read in original constitutional text (see Annotated Constitution, Art. I, § 10 & Art. IV).

**CHAPTER 19: SEPARATION OF POWERS**

The separation of powers doctrine combines two ideas. The first is that the Constitution identifies three distinct governmental functions: the legislative power, a power to make law; the executive power, a power to apply law or call for its application, subject to judicial review; and the judicial power, a power to declare authoritatively what the law is and to approve its application in specific cases. The second idea is that no one branch of government can exercise the central power of any other branch or substantially disrupt the operations of that branch. As Justice Story noted in his 1833 treatise, *Commentaries on the Constitution of the United States*, the true meaning is that no department should possess an “overruling influence” in the administration of their respective powers. Thus, Congress may not impose core executive or administrative duties, that is, duties of a non-judicial nature, on judges holding office under Article III. Similarly, the doctrine bars
Congress from delegating to executive or judicial officers the legislative power to make rules without also creating “intelligible principles” by which the power is to be used.

Lying behind the separation of powers doctrine is the notion of checks and balances. Checks and balances doctrine has two main principles. First, each branch must be given sufficient power to discharge its operations efficiently. Second, to prevent tyranny by any one branch, no branch should have unlimited power. As James Madison wrote in *The Federalist Papers* No. 51, “In framing a government which is to be administered by men over men, the great difficulty lies in this: you must first enable the government to control the governed; and in the next place oblige it to control itself.”

Designed in part to promote the goal of efficiency, the separation of powers doctrine does not prohibit one branch from ever exercising a power of the other branches. Indeed, the Constitution expressly authorizes certain blends. For example, Congress exercises a kind of judicial power when it engages in impeachment proceedings. The President exercises a kind of legislative power when vetoing a bill, and a kind of judicial power when granting a pardon. Courts exercised executive powers when, pursuant to the Appointments Clause, they appointed independent counsels under the Ethics in Government Act of 1978. The Constitution contemplates that legislative, executive, and judicial practice will integrate the dispersed powers into a workable government.

Separation of powers doctrine reflects the four different styles of interpretation. Formalists, such as Justices Scalia and Thomas, prefer bright-line rules that mark off boundaries between the branches, and they have dissented from using balancing tests to achieve convenient results. In their view, there should be a strict separation of powers based on the literal text of the Constitution, which provides in Article I, § 1, “all legislative Powers herein granted” are vested in Congress; in Article II, § 1, “the executive Power” is vested in the President; and in Article III, § 1, the “judicial Power” is vested in “the Supreme Court and such inferior courts as Congress, from time to time, may establish.”

At the other extreme Holmesians, such as Chief Justice Rehnquist and Justice White, prefer to defer to arrangements agreed upon by the other branches of government. In between are the modern natural law Justices, such as Justices O’Connor, Kennedy, and Souter, who hold the sharing of power, checks-and-balances view of Madison and Story. Instrumentalists, such as Justices Stevens, Ginsburg, and Breyer, have also asked whether the general policies of separation of powers doctrine would be advanced or retarded in practice by the challenged law. (§ 19.1)

When Congress delegates legislative power to the President, administrative agencies, or special commissions, a separation of powers concern arises if Congress has delegated too much policy-making power from the legislative branch. To prevent this, the Court has required Congress to provide the delegated agent with congressionally developed standards or policies to guide application of the delegated power. This helps ensure that the ultimate policy choice is made by the legislature. During the formalist era, this doctrine was applied in a relatively strict manner, with the Court requiring relatively detailed congressional standards or policies. Since 1937, the Court has applied the doctrine regarding delegation of legislative power consistent with the non-formalist view that sharing of powers suggests the Court should find that an “intelligible principle” was given by Congress to guide delegations, rather than to apply the doctrine in a strict manner. Under this approach, delegations as general as regulate “in the public interest” are routinely upheld. (§ 19.2)
Regarding aspects of Presidential power, the foundational case of the modern era is *Youngstown Sheet & Tube Co. v. Sawyer*, decided in 1952. In *Youngstown Sheet*, the Court ruled that the President cannot make policy by seizing steel mills to avert a nationwide strike during wartime. Adopting a formalist strict separation of powers approach, Justice Black said that the President cannot make national policy at all. Justice Black said that the President’s powers are limited to the textually enumerated powers, such as faithfully executing the laws and serving as Commander in Chief. Although acknowledging that the “theater of war” may be “an expanding concept,” Justice Black stated that the Commander-in-Chief power cannot be used to give the President power to take possession of private property to keep “labor disputes from stopping production. This is a job for the Nation’s lawmakers, not for its military authorities.” Further, the requirement that the President “faithfully execute” the laws “refutes the idea that he is to be a lawmaker. . . . The Founders of this Nation entrusted the lawmaking power to the Congress alone in both good times and bad.”

Based upon legislative and executive practice, and Court precedents, no other Justice agreed in *Youngstown Sheet* that the President's power was that limited. Focusing on arguments addressed to legislative and executive practice, Holmesian Justice Frankfurter noted in his concurrence, “A systematic, unbroken, executive practice, long pursued by the knowledge of Congress, and never before questioned, engaged in by Presidents who have also sworn to uphold the Constitution, making as it were such exercise of power part of the structure of our government, may be treated as a gloss on ‘executive Power’ vested in the President.”

Holmesian Justice Jackson's analysis in the case also suggested that Presidential power is dependent upon a functional analysis based upon prior legislative and executive action. Justice Jackson’s three-part analysis in *Youngstown Sheet* was that the President’s power is at its maximum when used in accord with Congress, at a minimum if contrary to the express or implied will of Congress, and subject to a zone of twilight, to be judged by circumstances, when there is no congressional grant or denial of authority. Cases have also discussed presidential power where Congress may not have approved the President’s action in advance, but subsequently ratified the President’s action, or may not have disapproved the President’s action in advance, but subsequently expressed their dissatisfaction with presidential decisionmaking.

The general separation of powers concern with promoting efficiency, while protecting against tyranny, also has shaped court decisions. Specifically, Congress has frequently allowed the President to take the lead in foreign affairs to promote efficiency in foreign policy decisionmaking. Thus, in considering executive versus legislative powers, the Court tends to give the President more leeway in cases involving foreign affairs than in those involving domestic power, where Congress’ policy-making power is more dominant. For domestic policy, the concern with prevention of presidential tyranny has been viewed as the greater concern than governmental efficiency.

Based on these considerations, the following Table 9 summarizes these factors that the Court considers under the post-1937 non-formalist approach to presidential powers, in addition to Justice Black’s formalist focus on literal text, and Justice Frankfurter’s focus on “glosses” on executive power. Where the case involves a category nearer the top of Table 9, the President’s authority to act will be greater than when the case involves a case near the bottom of the Table:
Table 9  
Basic Factors Used to Predict Results in Determining Constitutionality of Exercises of Executive Power  
Based Upon Justice Jackson’s Non-Formalist Approach

</tbody>
</table>

In *Youngstown Sheet*, the President’s authority was near the bottom of this Table, as the case involved primarily a domestic issue, the seizure of steel mills, although it did have a foreign component, the proposed effect of a steel strike on the ability to provide military equipment for the Korean War. The case also involved action taken pursuant to implied congressional disapproval, as Congress had provided for alternative ways to resolve domestic strikes in times of emergency, such as referral of the controversy to the Wage Stabilization Board, which President Truman did, but whose recommendations were viewed as too favorable to the workers by steel management. Further, Congress had specifically rejected giving the President the power to seize plants unilaterally when considering the issue in the Taft-Hartley Act of 1947, as Justice Burton noted in his concurrence.

The dissenters in *Youngstown Sheet*, Chief Justice Vinson and Justices Reed and Minton, also resorted to arguments of legislative and executive practice. They merely balanced them differently than did Justice Jackson. They concluded that the President was attempting to execute defense programs for the Korean War, and thus was acting pursuant to implied congressional authorization. Chief Justice Vinson’s opinion reflects the general predisposition of more conservative judges, such as Chief Justice Vinson and Justices Reed and Minton, to resolve close cases in favor of presidential authority, and downplay concerns with presidential tyranny. As Chief Justice Vinson noted in his opinion, “A review of executive action demonstrates that on many occasions Presidents have exhibited the leadership contemplated by the Framers when they made the President Commander in Chief, and imposed upon him the trust to ‘take Care that the laws be faithfully executed.’”

In contrast, liberal judges tend to resolve close questions more in favor of the legislative branch, and to be suspicious of broad grants of power to the President. As liberal instrumentalist Justice Douglas noted in his concurrence in *Youngstown Sheet*, “Today a kindly President uses the seizure power to effect a wage increase [based on the Wage Stabilization Board’s recommendations] and to keep steel furnaces in production. Yet tomorrow another President might use the same power to prevent a
wage increase, to curb trade unionists, to regiment labor as oppressively as industry thinks it has been regimented by this seizure.” (§ 19.3.1)

In cases involving both legislative and executive decisionmaking, the rule that seems to emerge from the separation of powers cases is that where constitutional text is clear, and supports a finding of unconstitutionality, that text will prevail. This has been the result in cases like INS v. Chadha, which required Congress to comply with the literal text of the Bicameralism and Presentment Clauses for congressional acts to have legal effect (both houses of Congress must pass legislation and the President must sign the bill, or have his veto overridden by a 2/3 vote in both houses of Congress) (§ 19.4.2.1); Clinton v. City of New York, where the President’s veto power, as provided in clear constitutional text, was limited to vetoing entire bills, not a line-item veto, which Congress had tried to grant him (§ 19.4.2.2); and Public Citizen v. United States Department of Justice, where limitations on the President’s power to nominate certain federal officials would be inconsistent with clear text in the Appointment Clause placing no limitations on presidential nomination power (§ 19.4.3.1). In other cases, where the text is clear but supports the constitutionality of the action, the Court has gone beyond text to consider legislative and executive practice and general checks and balances reasoning to determine if there are any constitutional problems with the government action.

That checks and balances reasoning is based upon the twin separation of powers concerns of efficiency of government action versus the prevention of tyranny and no impermissible aggrandizement of power. This was done with respect to judges appointing independent counsels in Morrison v. Olson (§ 19.4.3.1), judges serving on the United States Sentencing Commission in United States v. Mistretta (§ 19.4.3.1), a ruling that Congress has no ability to remove executive officials except by impeachment in Bowsher v. Synar (§ 19.4.3.2), and a ruling that Congress can limit the President’s ability to remove executive officials for “good cause” as long as that would not “impede” presidential authority in Morrison v. Olson (§ 19.4.3.2). On this last doctrine, the general rule is that Congress can limit the President’s power to remove heads of Independent Agencies, such as the Federal Communications Commission, Food and Drug Administration, or Securities and Exchange Commission, but that members of the President’s Cabinet and other core policy-making officials must be able to be fired at-will. Under this general separation of powers approach, unilateral action by the President without express or implied congressional consent outside the core “Commander-in-Chief” power or the power to “take Care that the Laws be faithfully executed” raise serious separation of powers concerns, whether in Youngstown Sheet (§ 19.3.1), international matters (§ 19.3.2), war and national defense (§ 19.3.3), or domestic policymaking (§ 19.3.4).

CHAPTER 20: CHECKS AND BALANCES

RULES REGARDING GOVERNMENT STRUCTURE AND AMENDMENT

Checks and balances operate in part to improve the effectiveness and quality of governmental decisionmaking. This can be done by providing the option of a broader perspective, such as the presidential power to veto legislation, which itself is subject to a 2/3 override by both Houses of Congress, or by requiring broadly-based consideration, such as the President can be impeached, but the House brings impeachment and trial is by the Senate. The second main function of checks and balances is to guard against abuse of power and tyranny. For example, the President is Commander in Chief, but Congress controls the purse and can make rules for the armed forces.
Prior to September 11, 2001, little attention was paid to ensuring the continuity of government in times of war or terrorist attack, other than ensuring a line of Presidential succession in case the President dies of natural causes or is assassinated, becomes incapacitated, resigns, or is removed through the impeachment process. Following 9-11, greater attention has been focused on the fact that ensuring there is an ongoing federal government means ensuring three ongoing branches – legislative, executive, and judicial – each “with a different nature and structure and each with different constitutional, statutory, and administrative rules governing that structure and the continuity of its operations.” Separation of powers means there can be no continuity of the Federal Government “unless there is continuity of all three branches, in particular both political branches to enact new legislation.” (§ 20.1.1.1) Continuity problems were also present as an historical matter at the time the newly-ratified Constitution replaced the Articles of Confederation as the nation’s governing document in 1789. In Owings v. Speed, the Supreme Court held that the Constitution became effective only on March 4, 1789, the date Congress was to convene, not June 21, 1988, the date the ninth state ratified the Constitution (§ 20.1.1.2).

Some checks and balances can be found in the express text of the Constitution, as when it divides federal power into three branches – legislative, executive, and judicial – and then further subdivides legislative power so that both the House and Senate must approve legislation under the Bicameralism Clause. Similar checks and balances are provided for in the process of amending the Constitution, 2/3 vote in both houses of Congress and ratification by 3/4 of the states, or 3/4 of the states call for a Constitutional Convention (§ 20.1.1.3); the process of election of the President through the Electoral College (§ 20.1.2.1); the process of election to, and rules regarding running of, the two houses of Congress (§ 20.1.2.2); and the process of congressional impeachment (majority of the House of Representatives to impeach and 2/3 of the Senate to convict) (§ 20.1.3).

CONGRESSIONAL IMMUNITIES

Article I, § 6, cl.1 of the Constitution provides that “Senators and Representatives . . . shall in all Cases, except Treason, Felony and Breach of the Peace, be privileged from Arrest during their Attendance at the Session of their respective Houses, and in going to and returning from the same; and for any Speech or Debate in either House, they shall not be questioned in any other Place.” The protection from arrest only applies to civil arrest, not criminal offenses. The Court has stated that the terms “Treason, Felony, and Breach of the Peace” excepts from the operation of the privilege all criminal offenses. Regarding the Speech or Debate Clause, the Court has ruled that the privilege applies to all legislative activities, whether on the floor of Congress or in committee meetings, and it applies to the staff of the Representative or Senator, since without staff much legislative work would not get done. This departure from the literal text of the Clause is based on reading the clause in light of its purpose to support checks and balances theory and permit the legislative process to function without the threat of executive-inspired and judicially-supported investigations. (§ 20.1.4.1)
EXECUTIVE IMMUNITIES

Although no text in the Constitution refers to executive immunities, in *Nixon v. Fitzgerald* the Court granted the President absolute immunity from damage actions filed against the President for performance of the President’s official duties. This was based on the conclusion that anything less might subject the President to lawsuits for practically everything done, thus undermining efficient operations of the executive branch. Regarding the concern with tyranny, the Court noted that there remains enough protection against Presidential misconduct because of impeachment, other checks and balances, the power of the press, a desire to earn re-election, the need to maintain prestige, and a President's traditional concern for historical stature. In *Clinton v. Jones*, the Court indicated that the President does not have such an immunity from civil actions based on behavior that occurred before being elected, or non-official conduct in office, such as sexual harassment, and trial in such cases need not be delayed until after the President leaves office, although the trial court should seek to accommodate the President’s needs. Although the issue has never been ripe for resolution, the predominant view is that the President cannot be indicted for a criminal offense while in office, but that any statute of limitations would be tolled until the President left office. 

Regarding requiring the President to be a witness in criminal or civil cases, the Court applies a balancing test to determine whether the claim of the President to be free from interference in order to promote efficient operations within the executive branch outweighs the interests of the judiciary in promoting justice and preventing governmental tyranny. In applying that balancing test, the Court has drawn distinctions between a specific need for confidentiality, as exists for military, diplomatic, or sensitive national security interests, and a general need for confidentiality in other kinds of circumstances. The Court also has drawn distinctions between a court’s specific need for material evidence which could not be adequately obtained from other sources and a general need for background information. In *United States v. Nixon*, the Court held that the President's generalized interest in confidentiality must yield to a demonstrated, specific need for evidence in a criminal trial. Whether the result would have been the same had the balance of needs been different seems questionable. Thus, had the President been able to argue that he had a specific need for confidentiality in the case, or had the case involved a generalized need for confidentiality balanced against a generalized need for information at trial, the result in *Nixon* might have changed. Given less important interests at stake, Presidents have never been required to provide evidence in civil trials, although sometimes Presidents have done so voluntarily. (§ 20.1.4.2.A)

Other federal officials and state officials have a form of qualified immunity. They may be sued as individuals for deprivations of federally-protected rights. However, they have qualified immunity and are liable only if reasonable persons, acting in the circumstances, would have known that they were violating clearly established constitutional or statutory law. (§ 20.1.4.2.B)

JUDICIAL IMMUNITIES

Both federal and state court judges are immune from federal lawsuits, even if bad faith or malice is alleged, except for actions not taken in the judge's official capacity, such as for accepting bribes, or actions taken in the complete absence of all jurisdiction. An additional kind of protection exists for federal judges appointed pursuant to Article III. Under Article III, § 1, “the Judges, both of the supreme and inferior Courts, shall hold their Offices during good Behavior, and shall, at stated
Times, receive for their Services, a Compensation, which shall not be diminished during their Continuance in Office.” (§ 20.1.4.3)

SOVEREIGN IMMUNITY FOR THE UNITED STATES GOVERNMENT

Waivers of the Federal Government's sovereign immunity must be unequivocally expressed in statutory text. They may not be implied or inferred. Thus, because any waiver must appear clearly in the statutory text, legislative history cannot be used to clarify an ambiguity. Many federal statutes waive the United States’ immunity from suit. Among these are the Tucker Act of 1887, which authorizes suits seeking damages against the United States based on the Constitution, statutes, regulations, or contracts; the Federal Tort Claims Act of 1946, which waives the United States' sovereign immunity from certain tort claims arising from the conduct of federal employees; the Quiet Title Act of 1972, which waives the government's immunity from civil actions to adjudicate title disputes involving real property in which the United States claims an interest; and the Administrative Procedure Act, which in 1976 was amended to provide a cause of action and a waiver of sovereign immunity in suits against federal agencies seeking relief other than money damages. (§ 20.1.4.4)

DOCTRINE OF INTERGOVERNMENTAL IMMUNITIES

Under the Dual Theory of Sovereignty (§ 18.4.5), the genius of our founding generation was to split sovereignty in the United States system into two parts: states and federal government. The founding generation established dual systems of government – states and federal government – each deriving its authority independently from the consent of the people. Reflecting that theory, states may not directly tax the federal government or any of its instrumentalities. However, states can tax subjects that fall within the general application of non-discriminatory laws where no direct burden is laid on a federal instrumentality and there is only a remote influence on the exercise of government functions. (§ 20.2.1) Similarly, Congress can tax state activities that earn revenue if it also lays a tax on similar private activities. (§ 20.2.2)

Federal instrumentalities are immune from state control in the performance of their duties. For example, a state cannot require a contractor to secure a state license before bidding on a federal job where the United States had its own specifications as to who was a responsible bidder. For Congress to authorize state regulation of federal activities there must be a clear and unambiguous declaration by Congress. Similarly, states do not possess the power to alter the exclusive qualifications set forth in constitutional text. Thus, state laws fixing term limits for members of Congress, whether done directly or by ballot-access procedures, are unconstitutional. (§ 20.2.3)

States naturally have immunity from federal regulation in areas where the federal government does not have power to act, such as modern limitations on federal power to act under the Commerce Clause (§ 18.2.5), limitations on federal power because of the 21st Amendment, which repealed Prohibition (§ 20.4), or limitations on federal power to act in Article I, § 9 (see Annotated Constitution). Even where the federal government does have power to act, the 10th Amendment provides some state immunity from federal regulations which “commandeer” state legislative, executive, or administrative systems (§ 18.4.5). (§ 20.2.4)
PREEMPTION OF STATE LAW BY FEDERAL LAW

The doctrine of preemption is based on the Supremacy Clause of Article VI, § 2, which expressly declares, “This Constitution, and the Laws of the United States which shall be made in Pursuance thereof; and all Treaties made, or which shall be made, under the Authority of the United States, shall be the supreme Law of the Land.” Thus, whether a state law has been trumped at the federal level by congressional action depends upon whether Congress intended its law to preempt the state law. In early days the Congress was relatively inactive and few preemption cases arose. Thus, there were only a few cases in which preemption was considered outside of situations where the state law was in direct conflict with a valid federal law. During the formalist era, Congress became more active in regulating the economy. Consistent with a formalist approach, the formalist-era Court tended to adopt a bright-line rule that if Congress regulated in an area, Congress should be taken to have occupied the field. Thus, congressional action would preempt all state laws in the area, even though there may have been no federal rule on the specific particular matter in question.

After 1937, the Holmesian Court rejected this bright-line categorical approach, and instead adopted a more functional weighing of factors that respected both state and federal concerns. In 1947, the Holmesian Court held in *Rice v. Santa Fe Elevator Corp.* that if the states had traditionally occupied an area, the Court would assume that state law was not preempted by federal law unless Congress clearly so intended, as where the federal scheme was so pervasive as to leave no room for supplementation, the federal interest was dominant, or state policy produced results inconsistent with federal objectives.

From 1954-86, the instrumentalist-era Court continued this functional analysis, but added a policy component focused on the state’s purposes. If a state’s purpose in regulating had protectionist overtones, the Court would more likely find preemption. On the other hand, where the state’s purpose did not appear to be protectionist in nature, and merely imposed higher standards on business, the liberal predisposition in favor of government regulation more often led to a finding of no federal preemption. As noted in 1978 in *Ray v. Atlantic Richfield Co.*, state laws are not superseded by federal law unless the Court can find a clear and manifest congressional purpose. That purpose may be evidenced by express words. It may also be implied from the pervasiveness of a federal regulatory scheme, the dominance of federal interest in a field, or the object sought and the character of the obligations imposed by federal law. However, even if Congress has not foreclosed state legislation in an area, state law is void if it conflicts with federal law. A conflict exists when compliance with both sets of regulations is impossible or the state law stands as an obstacle to accomplishing the purposes of Congress.

Since 1986, the Court has continued to use the *Ray* test for preemption, combined with the *Rice* presumption of no federal preemption in areas states have traditionally regulated. In applying these tests, however, the Justices do not always agree on: (1) when Congress has expressed an intent to preempt; or (2) whether the Court should find that the state law sufficiently obstructs federal law to be impliedly preempted. Under *Ray*, there are two types of implied preemption: (a) field preemption, which occurs where the scheme of federal regulation is so pervasive as to make reasonable an inference that Congress left no room for state supplementation; and (b) conflict preemption, which occurs either where (i) compliance with both state and federal regulations is
physically impossible, an easy case for preemption, or (ii) where state law stands as an obstacle to accomplishing Congress’ purposes. (§ 20.3.1)

DORMANT COMMERCE CLAUSE REVIEW OF STATE LAW

With respect to the Commerce Clause and its relation to state power, Chief Justice Marshall held in 1829 in *Willson v. Black Bird Creek Marsh Co.* that a state could erect a dam in navigable waters subject to congressional power if Congress had done nothing and, thus, left the Commerce Clause dormant. The formalist-era Court developed a theory that the states had power to regulate intrastate commerce and commerce that only indirectly related to interstate commerce. Under this doctrine, states were able to enact economic regulations indirectly affecting interstate commerce, but states could not directly burden interstate commerce even if Congress had not acted. Despite this attempt to create a bright-line rule, questions of degree were sometimes involved in drawing the line between "directly" or "indirectly" affecting interstate commerce.

That doctrine became discredited during the Holm esian era. Instead, reflecting the Holmesian functional emphasis on purpose and effects, the Holmesian-era Court focused on the supposed purpose of the dormant commerce clause doctrine to protect nationwide free trade from state protectionism. Building on this approach, the instrumentalist-era Court responded to nuances presented by later factual cases. The Court noted that there are four kinds of dormant commerce clause cases: (1) the state legislation burdens interstate commerce on its face; (2) the state legislation is the product of a purpose to discriminate against interstate commerce; (3) the state legislation has a discriminatory effect on interstate commerce; and (4) the state regulates in-state and out-of-state commerce even-handedly and only involves an incidental effect on interstate commerce. In the first three of these cases, the Court has stated that the burden is on the state to justify its regulation. For state regulation that burdens interstate commerce on its face, the Court clearly placed the burden on the state to establish the validity of the enactment in *Maine v. Taylor*. In *Minnesota v. Clover Leaf Creamery Co.*, the Court stated that the same standard applies if the state law has either a discriminatory purpose or effect. With regard to the fourth kind of case, the Court held in *Pike v. Bruce Church, Inc.*, “If a state statute has only indirect effects on interstate commerce and regulates evenhandedly, the dormant Commerce Clause is violated only if plaintiff shows that the burden on interstate commerce is clearly excessive in relation to local interests. When making that determination, the Court considers the nature of the local interest and whether it could be promoted as well by laws having a lesser impact on interstate activities.”

Under the language of the instrumentalist-era cases, the balancing test is the same in all sets of cases, with only the burden shifting. In practice, the instrumentalist Court stated that there is “a virtual *per se* rule of invalidity” for state legislation facially discriminating against interstate commerce or involving a discriminatory purpose or effect. As the “virtual *per se*” language suggests, it can prove very difficult for the state to meet its burden in cases of discriminatory legislation.

Because dormant commerce clause review, like preemption, is based on implied congressional intent – in this case, implied intent to promote free trade – Congress can use its Commerce Clause power to overturn any Court decision under the dormant commerce clause, either ratifying a state law that the Court struck down, or preempting a state law that the Court held valid. In addition, the Court has created an additional exception to dormant commerce clause review under the “market
participant” exception. Beginning in 1976, in *Hughes v. Alexandria Scrap Corp.*, the Court decided that there is no dormant commerce clause review at all if a state acts as a participant in the marketplace, rather than as a regulator or taxing authority. The analytic justification for this development is that a state should be treated equally as a business when the state is running a business. Since private businesses can choose to discriminate against interstate commerce in their choice of customers or choice of business partners, states should not be put to a competitive disadvantage in such an enterprise. Despite this reasoning, the Court has never really considered that while private businesses have strong profit incentives not to engage in discrimination against interstate commerce, except in unusual circumstances, and thus court review of their activities is not particularly necessary, a state-run business entity does not have the same kind of profit incentive. Thus, a doctrine based on the equivalence of state-run and private businesses may be a doctrine not based on adequate empirical premises. (§ 20.3.2)

**ARTICLE IV, § 2 PRIVILEGES AND IMMUNITIES CLAUSE**

Another check-and-balance relating to state power is the Article IV, § 2 Privileges and Immunities Clause. It provides, “The Citizens of each State shall be entitled to all Privileges and Immunities of Citizens in the several States.” Although this language seems comprehensive, it has never been interpreted in that way. In 1823, Justice Washington wrote in *Corfield v. Coryell* that the Privileges and Immunities Clause applies only to privileges and immunities that are "fundamental" to the citizens of all free governments, *e.g.*, rights to pass through, reside in, own property in, engage in common occupations, and be exempt from higher taxes than paid by citizens of the state. *Corfield* was followed by the Court in 1871 in *McCready v. Virginia*, where the Court held that the Privileges and Immunities Clause does not require a state to allow non-residents to share in the common property of the state's citizens, such as the state's wild animals and fishes, and a state may limit to its own citizens the right to plant oysters in public waters. The Court formally adopted the *Corfield* approach in 1873 in the *Slaughter-House Cases*, holding that Justice Washington’s approach was correct in limiting the Privileges and Immunities Clause protection to fundamental rights. Thus, states are not required to refrain from all discrimination between local citizens and citizens of other states, and thus are permitted to have resident and non-resident fees for hunting and fishing licenses, or resident and non-resident tuition to public universities.

The Holmesian Court refined the definition of what was fundamental for this purpose and introduced a balancing test which, as expressed today, bans discrimination against non-resident individuals in matters that are “sufficiently basic to the livelihood of the nation,” unless the state can justify the discrimination by showing that the law is closely related to advancing a substantial government interest and that non-residents are a cause of the problem. As cases like *Supreme Court of New Hampshire v. Piper* make clear, the “substantial interest/close relationship” test is a version of intermediate scrutiny, requiring the state to prove its action: (1) advances important or substantial government interests; (2) is substantially related to advancing those interests; and (3) is not substantially more discriminatory than necessary. In *Piper*, the Court struck down a requirement that an attorney must live in New Hampshire to practice law in New Hampshire. (§ 20.3.3)
FEDERAL COMMON LAW

Federal common law falls into two categories: those in which a federal rule of decision is necessary to protect uniquely federal interests, and those in which Congress has given the courts the power to develop substantive law. With regard to uniquely federal interests, federal common law exists with respect to the rights and obligations of the United States, such as federal government contracts, federal property transactions, or obligations under commercial paper issued by the federal government; interstate and international disputes implicating the conflicting rights of states or federal government relations with foreign nations; and admiralty and maritime cases. Those areas where the Court had held Congress has given the federal courts power to develop substantive law include antitrust issues concerning what constitutes an unreasonable restraint of trade; aspects of labor law dealing with collective bargaining; congressional statutes that incorporate generic state common law in statutory definitions, such as the term “domicile” under the Indian Child Welfare Act of 1978 or the term “burglary” under the Career Criminals Amendment Act of 1986; and certain "inherent powers" that cannot be dispensed with because they are necessary to the exercise of all others, such as managing litigation, imposing sanctions, and supervising the administration of criminal justice.

In addition, during the original natural law era, Chief Justice Marshall noted in *Gibbons v. Ogden* that the right to engage in commerce “derives its source from those laws whose authority is acknowledged by civilized men throughout the world.” This principle was adopted by the Supreme Court most famously in the 1842 case of *Swift v. Tyson*, where the Court held that a "federal general common law" existed to govern diversity cases involving state contract and state commercial law issues. The *Swift* doctrine of a “federal general common law” of contracts was continued during the formalist era based on the literal holdings of cases following *Swift v. Tyson*. It also was supported by the pro-business, conservative policy of the federal courts during this era, as the *Swift* approach permitted the federal courts to ensure contract and commercial law decisions under diversity jurisdiction reflected appropriate pro-business policies elaborated by the federal judiciary.

This understanding of “federal general common law” came to an end in 1938. Reflecting the Holmesian deference-to-government positivist perspective on the law, where law derives from positive acts of the sovereign, the Supreme Court stated in 1938 in *Erie Railroad Co. v. Tompkins* that there is "no federal general common law." The Court noted in *Erie* that the common law of contracts and commercial law derives not from some natural law “brooding omniscience in the sky,” acknowledged by all civilized men throughout the world, but rather from sovereign entities. Since states are the appropriate sovereign entities for purposes of state contract and state commercial law, state law should be applied in such state cases that are in federal court pursuant to diversity jurisdiction. As for which state law would apply when the parties reside in different states, and thus diversity jurisdiction applies, the answer derives, as it would for such cases if heard in state courts, from general choice of law principles. While those principles were more categorical before 1937, and based more exclusively on physical site of performance, a balancing test is typically used today to determine which state has the most significant relationship to the transaction, based on such factors as the locus of the place of contracting, the place of negotiation of the contract, the place of performance, the location of the subject matter of the contract, and the domicile, residence, nationality, place of incorporation, and place of business of the parties. (§ 20.3.4)
TWENTY-FIRST AMENDMENT PROTECTION OF STATE LAW

There is one area of law where state regulations may preempt federal law. That area is created by the 21st Amendment, which provides that the “transportation or importation into any State, Territory, or possession of the United States for delivery or use therein of intoxicating liquors, in violation of the laws thereof, is hereby prohibited.” This provision seems absolute, and the Holmesian Court indicated that states were thereby released from the negative implications of the dormant commerce clause. However, decisions in the instrumentalist era, which have now been continued as precedents, have read together the 21st Amendment and the Commerce Clause, and have balanced the free trade policy implicit in the dormant commerce clause with the central purpose of the 21st Amendment, which provides for state control over alcohol delivery and use as part of the bargain to repeal the 18th Amendment that imposed Prohibition. Thus, state laws designed to protect a local liquor industry have been struck down under a dormant commerce clause analysis as violating free trade and advancing state protectionism, and state laws not substantially contributing to temperance have been preempted by federal law with which they were in conflict. (§ 20.4)

SUB-PART TWO: INDIVIDUAL RIGHTS DOCTRINES GENERALLY

CHAPTER 21: INDIVIDUAL RIGHTS PROTECTION UNDER THE CONSTITUTION

STATE ACTION

Most constitutional protections regarding individual rights apply to government action, with the exception of the 13th Amendment, which protects against both governmental and private acts of slavery or involuntary servitude. This is indicated by the literal text of most provisions. For example, the First Amendment provides, “Congress shall make no law abridging the freedom of speech.” The 14th Amendment provides, “No State shall deprive any person of life, liberty, or property without due process of law, nor deny to any person equal protection of the laws.” Thus, the Court held in 1883 in the *Civil Rights Cases* that the 14th Amendment does not bar the invasion of rights by individuals, but only authorizes courts and Congress to redress the operation of state laws and the actions of state officials that deprive people of federal rights. Even in the absence of literal text, other constitutional protections, like the Fifth Amendment protections against double jeopardy or self-incrimination, only make sense in the context of the government action of arrest and prosecution.

Where an individual is burdened by the operation of a state statute enforced by a state official, such as a district attorney or an administrative agency official, state action is naturally found. Similarly, the passing of a state law or state constitutional amendment, whether by legislative action or referendum, is routinely viewed as state action. Where action is done purely by a private individual, such as an individual determining what speech will go on in the individual’s own home, state action is not found. The difficult cases involve circumstances involving actions that have elements of both state and private action. The Court noted in *Brentwood Academy v. Tennessee Secondary School Athletic Association*, “[S]tate action may be found if, though only if, there is such a ‘close nexus between the State and the challenged action’ that seemingly private behavior ‘may be fairly treated as that of the State itself.’” In deciding whether such a “close nexus” exists, the Court has considered a myriad of considerations, which can be organized around three basic factors:
(1) The extent to which the individual is burdened by “overt official involvement,” whether by operation of a federal, state, or local law; federal, state, or local executive or administrative agency action; or involvement by a federal, state, or local judge in judicial enforcement of a constitutional, statutory, or common-law right;

(2) The extent to which the individual and the government are “entwined,” whether by (a) individual participation in “joint activity” with the government, either “overt or covert,” e.g., a joint venture, partnership, or conspiracy, or in some other way shared “management and control,” including government control through regulation “authorizing” the private activity; or (b) financial connections of support, such as direct grants or subsidies, or tax breaks, between the government and private actor; or (c) some symbiotic relationship between the two, so that the government has placed its “power, property, and prestige” behind the private activity, or in some other fashion has “encouraged” the activity to occur; and

(3) The extent to which the individual is performing an activity considered by the Court to be a “public function,” that is, a function associated with government, like providing police or fire protection, or conducting primary elections for public offices, or running a jail.

As might be expected, a formalist approach to state action looks for examples which clearly, that is, literally, involve “overt official involvement”; or shared control because the private organization is clearly “created, coerced, or encouraged by the government,” or is in a “symbiotic relationship with the government”; or the organization is performing a clear “public function.” Among Holmesian judges, there tends to be a difference between a conservative and a liberal Holmesian judge. The conservative Holmesian position tends to reflect traditional Holmesian deference to government, and thus be less likely to find state action, as was true for Chief Justice Rehnquist. The liberal Holmesian position tends to support enforceable remedies if clear constitutional violations exist, as was true for Justice White. Because of a policy desire to provide greater constitutional protection for individual rights, liberal instrumentalist Justices tend to bring many more private actions within the concept of state action. Natural law Justices tend to reject the extremes of the limited state action doctrine of formalist and conservative Holmesian Justices, and the expansive state action doctrine of liberal instrumentalist Justices.

Given the natural law Justices have the controlling votes on the Court today, and natural law Justices have great respect for precedent, the Court has continued to following the received precedents of earlier state action cases and has continued to judge state action according to the three basic factors of overt official involvement, entwinement, and public function. (§ 21.1)

STRUCTURE OF INDIVIDUAL RIGHTS LAW

Once state action is established, the Court must determine whether the protected rights are absolute, and thus a categorical approach should be used, or whether the Court should balance the protected right against government interests to determine which prevails in the case. Balancing calls for a cost-benefit analysis in terms of the ends of government action, the benefits achieved by the means, and the burdens imposed on individuals by those means (§ 21.2.1). This means/ends consideration can be phrased as separate elements to meet or as part of a weighing of factors. Similarly, categorical approaches can be phrased as elements to meet or a weighing of factors (§ 21.2.2).
Another issue involved in many cases involving individual rights is determining what kind of burden on a protected right triggers what standard of review. For example, the Court has applied strict scrutiny to substantial burdens on the fundamental right to marry or to travel. However, in cases involving less than substantial burdens on these fundamental rights, the Court has applied some version of rational review, typically second-order rational review, as in restrictions on a prisoner’s right to marry in *Turner v. Safley* (held unreasonable) or state imposition of a one-year residency requirement before individuals could obtain a divorce in *Sosna v. Iowa* (held reasonable) (§ 21.2.3).

Under the Court’s current approach, the various balancing tests regarding individuals rights under the Equal Protection Clause, Due Process Clause, First Amendment, Contracts Clause, Takings Clause, and other doctrines involving individual rights typically are phrased as involving different tests. When combined together, the number of tests number more than 40. An approach more focused on analytic rigor, however, would note that there are really just 7 different kinds of balancing tests used in all of these doctrines: the base level of minimum rational review, plus six heightened levels of scrutiny – the “base plus six” model of levels of review discussed in Chapter 7. A Court committed more to the analytic side of reasoned elaboration of the law would note that a danger of increased confusion and unpredictability exists if proliferation of levels continues past these 7 levels of review. This could happen if: (1) the Court adopts additional kinds of inquiries different than the basic inquiries used under rational review, intermediate scrutiny, and strict scrutiny; (2) additional mixings and matchings occur for different kinds of scrutiny for the governmental interests, relationship to benefits, and burden inquiries; or (3) the "base plus six" standards are not clearly acknowledged. Increased confusion and unpredictability can also result if (4) juries are given too much leeway in the application of these tests in individual cases. (§ 21.2.4)

**CHAPTER 22: ECONOMIC RIGHTS: THE CONTRACTS AND THE TAKINGS CLAUSES**

**THE CONTRACTS CLAUSE**

The Contracts Clause provides that no state may pass any “Law impairing the Obligation of Contracts.” During the natural law era, the Court laid the foundation for the clause to become a significant restraint upon state action by holding in 1810 in *Fletcher v. Peck* that the clause not only covers state interference with private contracts, but also various contractual dealings with the states themselves. In applying the doctrine, courts distinguished between direct impairments of contract rights, where any impairment, no matter how small, triggered Contracts Clause problems, and state statutes focused on remedies for breach of contract, where only substantial impairments of rights would trigger an objection. During the first part of the formalist era, from 1873 to 1900, the Contracts Clause continued as a significant limit on state power. Between 1900 and 1937, however, the clause was less frequently applied for two main reasons: (1) the states more carefully defined and protected the extent of their regulatory powers, and (2) the Court began to rely primarily on substantive due process as a restraint of state action affecting contract or property interests under the doctrine associated with *Lochner v. New York*, discussed at § 27.3.2.1. During the Holmesian era, from 1937-1954, *Lochner* review of economic legislation under equal protection or substantive due process theories was replaced with minimum rational review, with the result that those clauses became only slight restraints on state power. Similarly, review under the Contracts Clause took on the deference-to-government aspects of minimum rational review. This situation continued during most of the instrumentalist era, from 1954-1986. Near the end of that era, however, when several
particularly severe retroactive adjustments of contract rights were enacted by states without emergency justification, the Contracts Clause was brought back to life to a limited extent. By the end of the instrumentalist era, the Court had developed a formulaic methodology for Contracts Clause analysis, which in some cases constitutes a level of review more exacting than minimum rational review. The doctrine is still in place today.

The steps in this Contracts Clause analysis follow modern 3-part means/end reasoning (ends, benefits achieved, burdens imposed), with a substantial burden requirement before the Clause is triggered. The relevant questions are:

1. Has a state law, in fact, operated as a substantial impairment of a contractual relationship (preliminary substantial burden requirement).
2. If so, the state must have a legitimate public purpose (the end requirement).
3. If that is shown, the next inquiry is whether the adjustment of rights and responsibilities of contracting parties is of a character appropriate to the public purpose justifying the legislation's adoption (the means requirement). This test mirrors minimum rational review under the Equal Protection and Due Process Clauses, including a focus on both the benefits achieved by the statute and the statute's burdens. In contrast, if the subject-matter of the state law raises special concerns, such as when the state is impairing the contract obligations of the state's own contracts in a manner that favors the state, or if the legislation is not one of general application, but only touches a more narrowly defined group of individuals in society, less deference is given to the state's action and the Court will apply a second-order kind of rational review analysis. As is true of both minimum and second-order rational review, the challenger has the burden to establish that the law is unconstitutional. (§ 22.1)

THE TAKINGS CLAUSE

The Takings Clause provides that "private property" shall not be "taken for public use, without just compensation." The Court looks primarily to state law to determine what is property. Property is taken if the government acquires physical possession or regulates its use "too far." The concept of "public use" is quite broad as it includes public purposes even if they are not entirely served on public property. Just compensation is measured in terms of the reasonable market value loss to the owner at the time of the taking, rather than any gain to the taker. (§ 22.2)

During the natural law era, the Court enforced the Takings Clause when the case involved physical invasions of property. This was clear from Justice Chase's statement in 1798 in Calder v. Bull that it would be unconstitutional to "take property from A and give it to B." The Court would also find a taking where a regulatory act had direct physical consequences (§ 22.2.1). Most opinions from the formalist era similarly allowed just compensation only if state action resulted literally in a physical taking and not merely a diminution in the value of the land based on regulation (§ 22.2.2). For a Holmesian, the focus of Takings Clause doctrine should be on the functional consequences of regulation, rather than whether literally there was a physical taking. In 1922, Justice Holmes was able to express those views when writing for the Court in Pennsylvania Coal Co. v. Mahon, saying that when a regulation goes "too far" in terms of diminishing property values there must be compensation (§ 22.2.3). In 1978, in Penn Central Transportation Co. v. City of New York, the Court indicated that the decision on whether a regulation goes "too far" should be based on
considering the economic impact on the property as a whole in light of three factors: the economic impact of a regulation, its interference with reasonable investment backed expectations, and the character of the government action. This factor-balancing test, focused on the overall “reasonableness” of the government’s action, is best understood as a species of second-order rational review. (§ 22.2.4)

The modern natural law Court has given owners two additional protections. First, in *Lucas v. South Carolina Coastal Council*, the Court held as a *per se* rule that there is a taking for complete deprivations of property value, as a complete deprivation is the equivalent of a physical occupation. Second, in *Dolan v. Tigard*, the Court held that if the government makes an adjudicative decision to condition the approval of a building permit relating to an individual parcel on the owner giving up some property rights, such a condition is a taking unless the city shows that there is a nexus between a legitimate state interest and the permit condition and, also, that the degree of the exaction demanded by the city bears a “rough proportionality” to the projected impact of the proposed development. By placing the burden on the government to show their action is not a taking, this test is best understood as a species of third-order rational review (§ 22.2.5).

Thus, under current law, there is a taking of private property if the government, by its actions:

1. acquires physical possession of all or part of an owner's property, or denies all economically viable use of property, as in *Lucas*;
2. regulates the use of property where it creates a substantial deprivation of property rights, and is so unduly harsh so the owner is forced to bear burdens which, in fairness, should be born by all, under the *Penn Central* test; or
3. requests a dedication of some property from a specific individual in return for consent to develop the rest of the property, as opposed to a generally applicable government statute or zoning ordinance, and the government cannot show a "rough proportionality" between the harm caused to the public by the individual’s proposed development and the burden on the individual of the government-imposed dedication, as in *Dolan*.

The Takings Clause is not triggered, however, if the state’s use restriction is based on nuisance law, limitations placed on land ownership when titled was acquired, or special circumstances, such as the property being destroyed in time of war. In such cases, no just compensation is required.

Five consequences of a taking are: (1) compensation is due, even if the taking is temporary; (2) value is determined at the time the taking occurs; (3) value is measured by the owner's loss, not the taker's gain; (4) fair market value is the normal measure of recovery – what a willing buyer would pay in cash to a willing seller at the time of the taking; and (5) if a temporary taking has occurred, the government must provide just compensation for the period when the taking was effective.

A taking has been found in circumstances where: (1) the government acquired possession of property permanently or temporarily; (2) the government activity made private use of the property impracticable or impossible; (3) the government barred a use, creating a commercial impracticability; (4) government regulation did not sufficiently advance a legitimate interest; or (5) the government imposed retroactive liability on a limited class of parties that could not have anticipated the liability, and liability was substantially disproportionate to the parties' experience.
A taking was not found in which a public purpose was sufficiently furthered or economically viable uses remained where: (1) part of the property was destroyed as a nuisance; (2) particular uses were prohibited; (3) use was regulated to achieve a public benefit; (4) price or rent control was imposed; or (5) entitlement payments were terminated.

As a final aspect of Takings Clause doctrine, under abstention principles the Court has held that a plaintiff asserting a takings claim based on the final decision of a state or local government entity must first seek compensation in state courts. (§ 22.2.6)

CHAPTER 23: NON-ECONOMIC INDIVIDUAL RIGHTS

Chapter 23 describes and follows the path of constitutional law regarding protections given individual non-economic rights, other than those protected by the Civil War Amendments (discussed Chapters 25-28) and the First Amendment (discussed Chapters 29-32). These rights fall into two broad categories: non-economic civil rights and non-economic criminal defendants’ rights.

NON-ECONOMIC CIVIL RIGHTS

Other than the First Amendment and the Civil War Amendments, the Constitution provides non-economic civil rights protections to four main rights: the Second Amendment, the Third Amendment, the Seventh Amendment, and the Full Faith and Credit Clause, Article IV, § 1. None of these provisions have spawned much litigation.

SECOND AMENDMENT

The Second Amendment provides, “A well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear arms, shall not be infringed.” Three possible ways have been identified to interpret the Second Amendment. The first way is that the Second Amendment merely recognizes the right of a state to arm its militia. This has been called a “collective rights” interpretation of the Amendment. A second way is that the Second Amendment recognizes an individual right to bear arms, but only for members of the militia, and then only if the federal and state governments fail to provide the firearms necessary for such military service. This has been referred to as the “sophisticated collective rights” model. The third way recognizes the right of individuals to keep and bear arms regardless of whether they are actually a member of a militia. This is called the “individual rights” model. Even under this approach, the right to keep arms is subject to reasonable regulation (the possession of guns may be denied to minors, incompetent persons, felons, or an individual under a restraining order granted to a wife against her husband in the context of a divorce). As of October, 2006, under any of these models, no statute ultimately has ever been struck down as unconstitutional under the Second Amendment. (§ 23.1.1)

THIRD AMENDMENT

The Third Amendment provides, “No Soldier shall, in time of peace be quartered in any house, without the consent of the Owner, nor in time of war, but in a manner to be prescribed by law.” The Supreme Court has never had the occasion to interpret or apply this Amendment. (§ 23.1.2)
SEVENTH AMENDMENT

The Seventh Amendment provides, “In Suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury, shall be otherwise re-examined in any Court of the United States, than according to the rules of the common law.” By its terms, this Amendment applies only to suits “at common law,” not suits in equity or admiralty or maritime jurisdiction. However, the Seventh Amendment does apply to actions enforcing statutory rights, and requires a jury trial upon demand, if the statute creates legal rights and remedies enforceable in an action for damages in the ordinary courts of law.

By its literal text, the Seventh Amendment only applies to preserve the right of jury trial for issues of “fact.” Thus, even in federal court, questions of law, such as the right to equitable remedies, as for specific performance or an injunction, or some defenses, such as illegality or unconscionability in contract law, are still decided by the court. The Seventh Amendment does not apply to suits against the United States. As the Court noted in *Lehman v. Nakshian*, “When Congress has waived the sovereign immunity of the United States, it has almost always conditioned that waiver upon a plaintiff’s relinquishing any claim to a jury trial. Jury trials, for example, have not been made available in the Court of Claims. . . . In tort actions against the United States, Congress has similarly provided that trials shall be to the court without a jury.” (§ 21.1.3)

FULL FAITH AND CREDIT CLAUSE

Article IV, § 1 of the United States Constitution provides, "Full Faith and Credit shall be given in each State to the public Acts, Records, and judicial Proceedings of every other State. And the Congress may by general Laws prescribe the Manner in which such Acts, Records and Proceedings shall be proved, and the Effect thereof." In 1948, Congress amended its Full Faith and Credit statute, which now provides, at 28 U.S.C. § 1738, that "judicial proceedings . . . shall have the same full faith and credit in every court within the United States and its Territories and Possessions as they have by law or usage in the courts of such State." This statute has been held to encompass the doctrines of *res judicata*, or "claim preclusion," and *collateral estoppel*, or "issue preclusion." Under this doctrine, there is an important difference between a formal judgment and giving “faith and credit” to one state’s laws that may differ from another state. The Court explained in *Franchise Tax Board of California v. Hyatt* that “[o]ur precedent differentiates the credit owed to laws (legislative measures and common law) and to judgments.” The full faith and credit command “is exacting” with respect to a final judgment rendered by a court, but is “less demanding” with respect to choice of laws. The Court noted that the Full Faith and Credit Clause does not compel "a state to substitute the statutes of other states for its own statutes dealing with a subject matter concerning which it is competent to legislate." For example, since a marriage license is not a judgment rendered by a court, but adopted pursuant to state laws, the “exacting” standard would not apply on whether one state had to give full faith and credit to marriages adopted in other states under different eligibility criteria.

With respect to the issue of whether one state would have to give full faith and credit to same-sex marriages in another state, the issue is complicated by the provision in the federal Defense of Marriage Act of 1996, codified as 28 U.S.C. § 1738C, dealing with the obligation to recognize same-sex marriages. It provides: “No State, territory, or possession of the United States, or Indian
tribe, shall be required to give effect to any public act, record, or judicial proceeding of any other State, territory, possession, or tribe respecting a relationship between persons of the same sex that is treated as a marriage under the laws of such other State, territory, possession, or tribe, or a right or claim arising from such relationship.” Given Congress’ ability under the text of the Full Faith and Credit Clause to prescribe the “Effect” of proceedings in another state, this would make it more difficult to justify requiring one state to have to give same-sex marriages in another state preclusive effect. (§ 23.1.4)

NON-ECONOMIC CRIMINAL DEFENDANTS’ RIGHTS

The Bill of Rights provisions involving criminal defendants’ rights are the Fourth Amendment, the Fifth Amendment, the Sixth Amendment, and the Eighth Amendment. Criminal rights provisions in the original Constitution include the Bill of Attainder Clause, Ex Post Facto Clause, Habeas Corpus Clause, and the Extradition Clause.

FOURTH AMENDMENT

The Fourth Amendment provides, “The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.” The first issue under the Fourth Amendment is whether a “search” or “seizure” has in fact occurred. The burden is on the challenger to establish that in fact a search or seizure, which could include an arrest, has taken place to trigger the Amendment. Once the defendant meets the burden of establishing that a search, seizure, or arrest has occurred, the burden shifts to the government to establish the “reasonableness” of the action, both as to the initial stop, and whether later actions were “reasonably related” to the circumstances that justified the stop. In determining whether any particular search, seizure, or arrest is “reasonable,” the Court uses a “third-order” rational review balancing test. The Court weighs the government’s interest and needs in law enforcement against individual privacy rights and the availability to the government of less burdensome means of operation.

For most searches, a warrant and probable cause to search are required, and that warrant must describe with particularity the place to be searched and the person or things to be seized. However, consistent with a natural law focus on purpose and practicality, the Court has permitted exceptions to the warrant and probable cause requirements when “special needs, beyond the normal need for law enforcement” make those requirements impracticable. The Court has used the special needs exception to uphold sobriety traffic checkpoints, certain kinds of drug testing programs at schools, drug testing programs in employment, or for administrative inspections for a variety of administrative reasons, provided those searches are appropriately limited. Like most constitutional rights, the Fourth Amendment protection against search and seizures can be waived by the individual, as long as that waiver is “voluntary.” For searches in violation of the Fourth Amendment, the Court applies an exclusionary rule to deny the fruits of that search in most later criminal proceedings. The Court has indicated, however, that exclusionary rule only applies for “bad faith” violations of the Fourth Amendment. The Court held in United States v. Leon that the exclusionary rule would not apply where officers in “good faith” rely on a search warrant issued by a detached and neutral magistrate, even if that warrant is ultimately found to be unsupported by
probable cause. The Court indicated that the test for “good faith” is one of “objective reasonableness,” based on what a “reasonably well-trained officer would have known.” (§ 23.2.1.1)

FIFTH AMENDMENT

Regarding criminal matters, the Fifth Amendment provides for four separate protections: grand jury indictment for “infamous” crimes, the double jeopardy protection from being tried twice for the same crime, the privilege against self-incrimination, and the right to due process of law. The Supreme Court noted in Schneckloth v. Bustamonte, “Almost without exception, the requirement of a knowing and intelligent waiver has been applied . . . to those rights which the Constitution guarantees to a criminal defendant in order to preserve a fair trial.” This higher standard of a “knowing and intelligent” waiver usually requires the government to advise the person of the right, rather than the “lack of any advice” being merely a factor in the decision regarding “voluntariness,” as is true for waivers of Fourth Amendment rights.

The Fifth Amendment requires a legally constituted and unbiased grand jury for a valid federal felony indictment. A federal district court is authorized to summon "legally qualified" citizens for grand jury service. Once impaneled, the grand jury serves until discharged by the court, generally for a term no longer than 18 months. The grand jury determines whether there is probable cause to believe that a crime has been committed, and is intended to protect citizens against unfounded prosecutions. To preserve secrecy, only jurors, witnesses, and the prosecuting attorney are permitted in the grand jury room. About half the states, through their respective state constitutions or by state statutes, also guarantee the right to grand jury indictment in most state criminal cases. However, in other states, state prosecutors have the flexibility to charge individuals through means other than grand jury indictment, such as filing an “information” with the court and then submitting the case to an “arraignment” hearing conducted by a judge or magistrate.

The Fifth Amendment also provides that no person shall “be subject for the same offense to be twice put in jeopardy of life or limb.” Under a long line of Court precedents, the Double Jeopardy Clause protects against re-prosecution after acquittal, re-prosecution after conviction (which might be attempted to get conviction of a greater offense or imposition of a longer sentence), or multiple punishments for the same crime. Although the text of the Clause mentions only harms to "life or limb," it is well settled that the Double Jeopardy Clause covers imprisonment and monetary penalties. This is based on a purpose of the Clause to protect individuals from unfair prosecutions.

The Fifth Amendment also provides that no person “shall be compelled in any criminal case to be a witness against himself.” Two main consequences flow from this: (1) except in limited circumstances, such as to impeach the testimony of an accused who testifies at trial, no “testimonial” evidence of an accused can be used by the government at trial without the accused’s consent; and (2) the accused failure to testify cannot be used against the accused to raise an inference of guilt. As an aspect of trial procedure, a “knowing and intelligent” waiver is required to waive the privilege against self-incrimination under Miranda v. Arizona. As stated in Miranda, “Prior to any questioning, the person must be warned that he has a right to remain silent, that any statement he does make may be used as evidence against him, and that he has a right to the presence of an attorney, either retained or appointed.” This Miranda right applies to any “custodial interrogation.” The Court stated in Miranda that by “custodial interrogation, we mean questioning initiated by law
enforcement officers after a person has been taken into custody or otherwise deprived of his freedom of action in any significant way.”

The Supreme Court has also held that the Due Process Clause of the Fifth Amendment provides for a number of protections in criminal cases that are not specifically enumerated in the Constitution, as are the protections regarding grand jury indictment, double jeopardy, and the privilege against self-incrimination. For example, the Court held in *In re Winship* that the Due Process Clause protects the accused against conviction except on proof beyond a reasonable doubt. The Court has created some liberty interests for prisoners while they are incarcerated in jail. In *Sandin v. Conner*, the Court asked whether some prison management decision imposed an “atypical and significant hardship” on the inmate. The Court has also stated that government actions which “shock the conscience” can give rise to a deprivation of a life, liberty, or property interest. The classic case of this kind occurred in *Rochin v. California*, in which the Court held that the forced pumping of a suspect’s stomach to obtain evidence “shocked the conscience.” In the modern natural law era, the Court has been reluctant to expand the list of criminal defendants’ due process rights. For example, in *Medina v. California*, the Court held that a state could require a defendant to carry the burden of proving his incompetence by a preponderance of the evidence. More recently, the Court held in *Dixon v. United States* that the government could require the defendant to prove duress to excuse criminal liability for knowing or willful violations of federal firearms laws. (§ 23.2.1.2)

**SIXTH AMENDMENT**

The Sixth Amendment provides for three basic protections: a right to a speedy and public trial by an impartial jury; a right to confront witnesses; and a right to compulsory process for obtaining witnesses, and to assistance of counsel.

Regarding the right to speedy trial, the Court has held that the right attaches at the time of arrest or formal charge, whichever comes first. The remedy for violation of this right is to dismiss the indictment or vacate the sentence. Regarding the right to a public trial, the Court has held that normally all procedures in criminal cases must be done in open court, unless compelling reasons, sufficient to satisfy strict scrutiny, justifying closing the proceedings. Regarding the right to an impartial jury, a defendant must show to establish a violation that: (1) the group alleged to be excluded is a distinctive group in the community; (2) the representation of this group is not fair and reasonable; and (3) the underrepresentation was due to a systematic exclusion of the group in the selection process. In 2000, in *Apprendi v. New Jersey*, a combination of formalist Justices (Justices Scalia and Thomas) and centrist to liberal Justices (Justices Stevens, Souter, and Ginsburg) held that any fact that increases the penalty for a crime beyond the prescribed statutory maximum must be submitted to a jury and proved beyond reasonable doubt – other than the fact of a prior conviction, which would already have been based on a prior jury decision based on a “beyond a reasonable doubt” standard. This conclusion was based on a literal reading of the Sixth Amendment right to a “jury” trial, and the Fifth Amendment requirement of proof in criminal cases of guilt “beyond a reasonable doubt.”

The Sixth Amendment provides for the right “to be confronted with witnesses against him.” The major issue raised by cases dealing with the right to confront witnesses is whether certain departures from face-to-face confrontation of witnesses in court can be permitted. Historically, as a matter of
legislative and executive practice, and a reasoned elaboration of court precedents, the Court permitted departures from a strict, literal requirement of confrontation. This occurred in cases such as *Maryland v. Craig*, which involved a child witness in a child abuse case testifying against the defendant at trial, outside the defendant's physical presence, by a one-way closed circuit television, and in *Ohio v. Roberts*, which conditioned the admissibility of hearsay evidence on whether it falls under a "firmly rooted hearsay exception" or bears "particularized guarantees of trustworthiness." Similar to *Apprendi*, in 2004, in *Crawford v. Washington*, a combination of formalist and instrumentalist Justices formed a majority to overrule *Roberts* and adopt a strict requirement that "testimonial" statements of witnesses absent from trial can be admitted "only where the declarant is unavailable, and only where the defendant has had a prior opportunity to cross-examine." The *Crawford* decision has raised questions about its impact in cases where emotional trauma, physical safety concerns, or other factors historically have suggested some flexibility in terms of face-to-face confrontation in court. Such cases include testimony of children in child abuse cases, cases involving battered spouses, cases involving physical safety of witnesses or compromising natural security secrets, such as in terrorist prosecutions, or cases where ensuring the physical presence of witnesses would be costly, such as for foreign witness testimony. There is also a concern with the impact of the *Crawford* rule regarding dying declarations.

Regarding the appropriate remedy for a violation of the Confrontation Clause, the Court typically applies a “harmless error” analysis, which holds that “an otherwise valid conviction should not be set aside if the reviewing court may confidently say, on the whole record, that the constitutional error was harmless beyond a reasonable doubt.” While some constitutional errors in the criminal justice system are “structural,” in that they are so fundamental that they require reversal without regard to the facts or circumstances of the particular case, such as denying a defendant the assistance of counsel at trial, or the absence of an impartial judge, most errors in the criminal justice system are subject to “harmless error” analysis. (§ 23.2.1.3)

**EIGHTH AMENDMENT**

The Eighth Amendment provides, “Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.”

The Excessive Fines Clause has provoked few cases. In *United States v. Bajakajian*, a 5-4 Court held that forfeiture of the entire $357,144 that respondent failed to declare under a federal law requiring the individual to report that he was transporting more than $10,000 in currency was excessive as grossly disproportional to the gravity of his offense. In other cases, courts routinely approve large fines and forfeitures with little extended discussion. The prohibition of Excessive Bail has provoked even fewer cases. Bail becomes excessive when a court sets it higher than is reasonably necessary either to ensure a defendant's appearance at trial or to promote other compelling governmental interests, such as denying bail to persons “charged with serious felonies who are found after an adversary hearing to pose a threat to the safety of individuals or to the community which no condition of release can dispel.” Only in rare cases has imposition of bail been deemed excessive.

In determining the content of “cruel and unusual punishment,” formalist Justices have argued for a static interpretation fixed at the time of ratification. Natural law and instrumentalist jurists, as
followers of a normative approach to law, are more willing to consider normative considerations from whatever source, including social practice, to determine what is “cruel and unusual” punishment. In 2002, in *Atkins v. Virginia*, a 6-3 Court majority, composed of natural law and instrumentalist Justices, discussed social practice, in addition to evidence of legislative and executive practice, raising concerns about the constitutionality of the death penalty for mentally retarded criminals. A similar pattern of voting occurred in 2005 in *Roper v. Simmons*, a case where the Court ruled that the execution of persons under 18 was cruel and unusual punishment. As in *Atkins*, the majority looked to an evolving standard of decency. The Court noted that among the 50 states, 12 bar executions altogether and 18 bar executions of all persons under 18 years of age. Thus, only 20 states permit executions of juveniles in some circumstances, and even in those states “imposition of the juvenile death penalty has become truly unusual over the last decade.” Further, since 1989, no state had changed their law to impose the death penalty on juveniles, and 5 states had banned it either by legislation or state constitutional law. The Court also noted that no other country on earth permits the death penalty to be imposed on juveniles. Even before *Roper*, the Court had ruled in *Thompson v. Oklahoma* that it was unconstitutional for persons under 16 to be executed.

The greater respect for precedent in the natural law approach than in the formalist approach is reflected in the Court’s doctrine regarding the principle of proportionality in Eighth Amendment law. In *Harmelin v. Michigan*, without regard to whether a natural law approach would apply a principle of proportionality to help determine what is “cruel and unusual punishment,” as it likely would, Justices O’Connor, Kennedy, and Souter concluded that in any event principles of *stare decisis* counseled the Court to follow its precedents and apply a proportionality principle under the Eighth Amendment. In contrast, Justice Scalia’s emphasis on literal text and specific historical intent led him to conclude that the framers and ratifiers rejected any proportionality requirement under the Eighth Amendment, and thus later Supreme Court cases adopting that requirement, like *Solem v. Helm*, should be overruled, since those precedents are not “settled law.” (§ 23.2.1.4)

**PROHIBITION OF BILLS OF ATTAINDER**

Article I, § 9, cl. 3 provides, “No Bill of Attainder or ex post facto Law shall be passed.” As defined by the Court, the categorical rule against Bills of Attainder requires that the act constitute “legislative punishment of an identifiable individual.” Thus, the act must be “legislative”; it must be directed against “an identifiable individual”; it must constitute “punishment.” Each of these elements must be met independently of the others for the act to be unconstitutional. The first element focuses on determining whether the end of the governmental action is “legislative”; the second element focuses on whether the benefit to be achieved by the government regulation is directed against an “identifiable individual”; the third element focuses on whether the burden of the government action involves “punishment” within the constitutional proscription against Bills of Attainder.

In determining whether an act constitutes “punishment” under the Bill of Attainder Clause, the Court has rejected a literal approach, in favor of considering purpose, history, practice, and precedent. Thus, the Court asks whether the law can be said reasonably to further punitive or non-punitive purposes. The Court considers whether any particular punishment is similar to the historical punishments of “imprisonment, banishment, and the punitive confiscation of property by the sovereign, [or] a legislative enactment barring designated individuals or groups from participation
on specified employments or vocations, a mode of punishment commonly employed against those legislatively branded as disloyal.” The Court also looks to legislative motivation and the existence of less burdensome alternatives by which the legislature could have achieved non-punitive goals, to determine whether any particular act is appropriately viewed as punitive in nature. (§ 23.2.2.1)

PROHIBITION ON EX POST FACTO LAWS

Article I, § 9, cl. 3 of the Constitution provides, in its other part, “No . . . ex post facto Law shall be passed.” In 1798, in *Calder v. Bull*, the Supreme Court held that this clause applied only to criminal laws. Justice Chase gave the classic definition of an ex post facto law. He stated, “I will state what laws I consider ex post facto laws, within the words and the intent of the prohibition. 1st. Every law that makes an action, done before the passing of the law, and which was innocent when done, criminal; and punishes such action. 2nd. Every law that aggravates a crime, or makes it greater than it was, when committed. 3rd. Every law that changes the punishment, and inflicts a greater punishment, than the law annexed to the crime, when committed. 4th. Every law that alters the legal rules of evidence, and receives less, or different, testimony, than the law required at the time of the commission of the offence, in order to convict the offender.”

In reaching this conclusion, Justice Chase acknowledged that a literal interpretation of “ex post facto” would hold that any law, civil or criminal, that had any retroactive application would be banned by this clause. However, Chase stated that the clause was not to be given a literal reading, but to be read in light of its purpose, the maxim of construction that technical words are to be interpreted in light of their textual meaning, and use of the phrase in existing state constitutions at the time the Constitution was drafted and ratified. (§ 23.2.2.2)

RIGHT TO HABEAS CORPUS

Article I, § 9, cl. 2 provides, “The privilege of the Writ of Habeas Corpus shall not be suspended, unless when in Cases of Rebellion or Invasion the public Safety may require it.” Since included in Article I, this suggests that Congress can suspend the writ, not the President, unless an emergency situation exists where Congress cannot meet and act in time. While President Lincoln did suspend the writ of habeas corpus at the beginning of the Civil War, a district court held that suspension unlawful in *Ex parte Merryman*, reasoning that suspension is for Congress, not the President.

Under current federal law, 28 U.S.C. § 2254(d), an application for a writ of habeas corpus “on behalf of a person in custody pursuant to the judgment of a State court shall not be granted with respect to any claim that was adjudicated on the merits in State court proceedings unless the adjudication of the claim – (1) resulted in a decision that was contrary to, or involved an unreasonable application of, clearly established Federal law, as determined by the Supreme Court of the United States; or (2) resulted in a decision that was based on an unreasonable determination of the facts in light of the evidence presented in the State court proceeding.” In applying this test, conservative formalist and Holmesian Justices are more likely to defer to state proceedings, while liberal instrumentalist Justices are more likely to conclude some decision was “unreasonable.” Where the issue involves purpose versus literalism, Justices O’Connor, Kennedy, and Souter usually can be found on one side of the case, and Justices Scalia and Thomas on the other side. For example, in *Stewart v. Martinez-Villareal*, the majority held that petitioner’s claim, raised for a second time after the first claim was
dismissed as not ripe for resolution, was not a “second” application barred by the Antiterrorism and Effective Death Penalty Act, because the first application was not heard on the merits. Justice Scalia’s and Thomas’ literal approach would have produced a “perverse” result.

In *Hamdi v. Rumsfeld*, the Court considered the power of Congress or the President to limit habeas corpus rights. A plurality of natural law and Holmesian or Holmesian-leaning Justices concluded that, consistent with legislative and executive practice, Congress had a power to alter the writ, and that Congress can impliedly delegate that authority to the President. Justices Souter and Ginsburg required a clear statement from Congress to alter the writ, which they said did not exist in this case. Justice Scalia read the clause literally to give the Congress no independent power absent suspension of the Writ, a position joined by Justice Stevens. Justice Thomas would have given the President blanket power, reflecting a conservative predisposition to defer to the President. (§ 23.2.2.3)

**THE EXTRADITION CLAUSE**

Article IV, § 2, cl. 2 provides, “A Person charged in any State with Treason, Felony, or other Crime, who shall flee from Justice, and be found in another State, shall on Demand of the executive Authority of the State from which he fled, be delivered up, to be removed to the State having Jurisdiction of the Crime.” The states’ rights Taney Court held in 1861 in *Kentucky v. Dennison* that the federal courts could not require states to comply with the Extradition Clause. In contrast, the Court held in 1987 in *Puerto Rico v. Branstad* that the *Dennison* doctrine, whether rightly or wrongly decided at the time, was inconsistent with Court doctrine after 1868 regarding the ability of federal courts to require states to comply with constitutional obligations, such as complying with the 14th Amendment in *Brown v. Board of Education*. Thus, *Dennison* was overruled. (§ 23.2.2.4)

**CHAPTER 24: CONSTITUTIONAL IMPACT OF THE NINTH AMENDMENT**

The Ninth Amendment provides, “The enumeration in the Constitution, of certain rights, shall not be construed to deny or disparage others retained by the people.” One way to construe the Ninth Amendment is that it means just what it says, that the enumerated of certain rights in the Constitution should not be construed to deny or disparage others retained by the people. From this perspective, the Ninth Amendment is a reminder of the background natural law theory that animated the Constitution’s drafting that individuals have natural rights that the government is created to protect. As has been noted, “The Founding generation disagreed about many things, but the existence of natural rights was not one of them. From James Madison to Roger Sherman, from The Federalist Papers to the Antifederalist papers, both supporters and opponents of the Constitution repeatedly affirmed their shared belief in natural rights. Virtually all commentators agree that the framers and ratifiers of the Bill of Rights believed in natural rights as a general matter.” (§ 24.1)

At the opposite extreme, the formalist position about the Ninth Amendment, stated by Justice Black in *Griswold v. Connecticut*, was that the federal courts, as well as the other branches of the federal government, have limited powers and should not recognize unenumerated rights. As discussed at § 27.3.2, the more moderate formalist majority on the Court between 1873 and 1937 did not agree, and during the 1920s, in cases like *Meyer v. Nebraska*, spoke of unenumerated fundamental rights to contract and engage in the common occupations, acquire knowledge, marry, establish a home, and raise children, as an aspect of substantive due process doctrine. (§ 24.2)
Based upon their inclination to defer to the legislative and executive branches, Holmesian Justices have been reluctant to expand the concept of substantive due process. As Chief Justice Rehnquist said for the Court in *Washington v. Glucksberg*, “We ‘ha[ve] always been reluctant to expand the concept of substantive due process because guideposts for responsible decisionmaking in this uncharted area are scarce and open-ended.’ . . . We must therefore ‘exercise the utmost care whenever we are asked to break new ground in this field,’ . . . lest the liberty protected by the Due Process Clause be subtly transformed into the policy preferences of the members of this Court.” Reflecting an even more extreme deference to the government approach, it could be argued that the Ninth Amendment is not addressed to courts at all, but merely reflects the Lockean idea that people have a reserved right of revolution against tyrannical government. (§ 24.3)

A final way of thinking about the Ninth Amendment would be to consider it an independent source of constitutional rights that judges can appeal to when no other provision of the Constitution seems to grant individuals such a right. Since the text of the Ninth Amendment does not provide any specific limitations on what those rights would be, such an approach would enable a judge more easily than any of the other approaches to read that judge’s policy values into the Constitution under the guise of interpreting the Ninth Amendment. This approach has never been adopted by any Justice on the Supreme Court, not even the liberal instrumentalists of the Warren Court. Instead, liberal instrumentalist, such as Chief Justice Warren, and Justices Goldberg and Brennan, have been willing to refer to the Ninth Amendment merely as an interpretive guidance to justify the Court’s adoption of the unenumerated rights analysis of substantive due process doctrine, discussed at § 27.3. (§ 24.4)

**SUB-PART THREE: CIVIL WAR AMENDMENTS AND DUE PROCESS GENERALLY**

The Civil War Amendments – the 13th, 14th, and 15th Amendments – outlawed slavery and involuntary servitude; granted citizenship to persons born or naturalized in the United States; provided that no state shall deny to any citizen the privileges or immunities of United States citizenship, nor deny to any person life, liberty, or property without due process of law, nor deny any person equal protection of the laws; and provided protections for the right to vote without regard to race. In addition, they grant power in Congress to enforce the Amendments by appropriate legislation.

The two provisions in the Civil War Amendments that have spawned the most litigation are the Equal Protection and Due Process Clauses of the 14th Amendment. For ease of presentation, the other provisions in the Civil War Amendments are discussed first in Chapter 25. Then, the Equal Protection Clause is discussed in Chapter 26. The Due Process Clause of the Fifth and 14th Amendments are discussed in Chapter 27. Chapter 28 discusses congressional power to enforce the Civil War Amendments, a power used to supplement judicial power to enforce the Amendments.

**CHAPTER 25: THE CIVIL WAR AMENDMENTS GENERALLY**

In addition to the Equal Protection and Due Process Clauses of the 14th Amendment, the Civil War Amendments provide four major individual rights protections. These are the 13th Amendment ban on slavery or involuntary servitude; the 14th Amendment Citizenship Clause; the 14th Amendment...
Privileges or Immunities Clause; and the 15th Amendment ban on race discrimination in the right to vote.

THE THIRTEENTH AMENDMENT

Passed in Congress by January 31, 1865, and declared ratified by 3/4 of the states on December 18, 1865, the 13th Amendment provides, “Section 1. Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their protection. Section 2. Congress shall have power to enforce this article by appropriate legislation.” By its text, which provides “[n]either . . . shall exist,” this provision bans public and private conduct that involves slavery or involuntary servitude, and makes this right “inalienable.” Any attempt to waive this right would be unenforceable. (§ 25.1)

THE FOURTEENTH AMENDMENT’S CITIZENSHIP CLAUSE

The Citizenship Clause of § 1 of the 14th Amendment provides, “All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside.” The central purpose of this clause was to overrule that part of the 1857 holding in Dred Scott v. Sandford that blacks were not and could not be citizens. Having citizenship is an important right because, among other things, a citizen may not be deported or excluded from the United States. Nor may Congress take away an American’s citizenship without his assent. Further, a citizen may chose to reside in any state and thus become a citizen of the state, with the same right as every other citizen in that state. (§ 25.2)

THE FOURTEENTH AMENDMENT’S PRIVILEGES OR IMMUNITIES CLAUSE

The Privileges or Immunities Clause of § 1 of the 14th Amendment provides, “No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States.” One way to read this clause would be to say that all the “fundamental” privileges and immunities which had been based upon state citizenship in the Article IV, § 2 Privileges and Immunities Clause, discussed in Chapter 20, were now transferred to all United States citizens as defined by the 14th Amendment’s Citizenship Clause. This would include those rights recognized in Corfield v. Coryell as “fundamental,” e.g., rights to pass through, reside in, own property in, make contracts in, and engage in common occupations in a state on equal terms with citizens of that state. A second way to read the 14th Amendment Privileges or Immunities Clause would be to say that those “fundamental” rights are still protected only under Article IV, § 2, and thus determined by state practice, and that the 14th Amendment clause only protects rights uniquely a product of United States citizenship, not state citizenship.

General historical evidence surrounding the passage of the 14th Amendment suggests that the framers of 14th Amendment intended to adopt the first approach. For example, as has been noted, “[T]he 1866 campaign was a referendum on the congressional plan for Reconstruction, the centerpiece of which was the Fourteenth Amendment. Republicans reminded voters of Southern denials of free speech and other basic liberties and insisted that the Fourteenth Amendment would protect the fundamental rights of American citizens.”
In contrast to viewing the 14th Amendment through the lens of this history of federal concern over state actions denying civil rights, the Supreme Court held in 1873 in the *Slaughter-House Cases* that the Privileges or Immunities Clause protects only a short list of rights relating primarily to relationships between citizens and the federal government. This decision reflects more a formalist emphasis on the literal text in the 14th Amendment Citizenship Clause distinguishing “citizens of the United States” and citizenship “of the State wherein they reside,” and the fact the Privileges or Immunities Clause applies to citizens of the United States, not citizens of a state, rather than the natural law greater focus on general historical evidence like the 1866 congressional campaign.

In determining what are the privileges and immunities of United States citizenship, the Court mentioned in the *Slaughter-House Cases* the rights: (1) to come to the seat of government and there do business with it, (2) to have free access to seaports, through which all operations of foreign commerce are conducted, and to the subtreasuries, land offices, and courts of justice in the several States, (3) to demand protection from the federal government while on the high seas or within the jurisdiction of a foreign government, (4) peacefully to assemble and petition government for redress of grievances, (5) to have the privilege of the writ of habeas corpus, (6) to use the navigable waters of the United States, (7) to become a citizen of any State of the Union by *bona fide* residence therein, with the same rights as other citizens of that State, and (8) to be protected by the 13th, 14th, and 15th Amendments. The Court concluded the list by saying that “a citizen of the United States can, of his own volition, become a citizen of any State of the Union by *bona fide* residence therein, with the same rights as other citizens of that state.” The individual would then also have the privileges and immunities belonging to state citizenship in that state. (§ 25.3)

**THE FIFTEENTH AMENDMENT’S BAN ON RACE DISCRIMINATION IN VOTING**

The 15th Amendment provides, “Section 1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude. Section 2. The Congress shall have power to enforce this article by appropriate legislation.” The 15th Amendment was an improvement over the provisions in the 14th Amendment on voting. The provisions in § 2 of the 14th Amendment merely punished states that denied individuals the right to vote by providing that the denial of the right to vote to any male citizen otherwise qualified to vote (21 years of age and a citizen), except on grounds of “participation in rebellion, or other crime,” would result in reduction of the state’s number of representatives to Congress “in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State.”

In practice, the reconstituted Southern state governments established during Andrew Johnson’s presidency immediately after the Civil War limited suffrage to white males. Indeed, as has been noted, “As late as 1867, blacks were enfranchised in only five New England states and, subject to a discriminatory property requirement, in New York. State after state rejected black suffrage proposals in popular referenda between 1865 and 1867: Minnesota, Wisconsin, Connecticut, Kansas, Ohio, and New York.” Ratified in 1870, the 15th Amendment changed all of those practices as a constitutional imperative. (§ 25.4)
CHAPTER 26: THE EQUAL PROTECTION CLAUSE

THE SCOPE OF THE EQUAL PROTECTION CLAUSE

The Equal Protection Clause of § 1 of the 14th Amendment provides, "No State shall . . . deny to any person within its jurisdiction the equal protection of the laws." By explicit text, this provision applies only to “State” action, i.e., the actions of states and their political subdivisions, cities and counties. The federal government is not limited by the text of the 14th Amendment. However, in 1954, the Court held in *Bolling v. Sharpe* that the Fifth Amendment's Due Process Clause, which does limit the federal government, has an Equal Protection "branch," so that the Equal Protection Clause of the 14th Amendment, which textually applies only to “States,” applies to the federal government through the Fifth Amendment’s Due Process Clause. To reach this result, the Court stated in *Bolling* that “discrimination may be so unjustifiable as to be violative of due process.” In a later case, *Weinberger v. Wiesenfeld*, the Court noted that the "Court's approach to Fifth Amendment equal protection claims has always been precisely the same as to equal protection claims under the Fourteenth Amendment." (§ 26.1)

STANDARDS OF REVIEW UNDER THE EQUAL PROTECTION CLAUSE

As the Court noted in *Nordlinger v. Hahn*, “[U]nless a classification warrants some form of heightened review because it jeopardizes exercise of a fundamental right or categorizes on the basis of an inherently suspect characteristic, the Equal Protection Clause requires only that the classification rationally further a legitimate state interest.” To determine whether a statute “rationally furthers a legitimate state interest,” the Court considers three things.

The first inquiry is what government ends, or interests, support the statute’s constitutionality. Under rational basis review, the government ends supported by the statute must be “legitimate.” Legitimate ends are those within the usual “police power” of the state, that is, they involve the health, safety, or general welfare of the people. In practice, the Court presumes the legislature is motivated by legitimate interests, leaving the burden on the challenger to prove that the legislature was motivated by illegitimate interests. The Court has always held that a bare desire to discriminate on racial grounds constitutes an illegitimate governmental interest. The Court has also held that “if the constitutional conception of ‘equal protection of the laws’ means anything, it must at the very least mean that a bare congressional desire to harm a politically unpopular group cannot constitute a legitimate governmental interest.” In a sequence of cases, the Court has applied this principle to both federal and state action involving discrimination against “hippies” wishing to live in a commune; prejudice against persons who enter into an interracial marriage; prejudice against the mentally impaired; and animus against individuals based upon their sexual orientation.

Once it is determined that the statute is advancing a “legitimate state interest,” the next inquiry turns to whether the statute “rationally furthers” that interest. Under the Court’s doctrine, this “rational relationship” inquiry has two parts. The first aspect focuses on the statute’s “underinclusiveness” – that is, to what extent does the statute fail to regulate all individuals who are part of some problem. A statute may be held to be “irrationally underinclusive”if that statute fails to regulate certain individuals who are an equal part, or perhaps even a greater part, of creating some problem as are those individuals whom the statute does regulate, unless there is some rational explanation for why
the persons who are equally or a greater part of some problem are not being equally regulated. A statute that does not regulate all persons who are part of some problem, but which regulates the greater part of the problem first, will be held to be “rational” because, as the Court has stated, “[e]qual protection doesn't require that all evils of the same genus be eliminated or none at all.” The legislature can adopt a step-by-step approach, as long as each step is rational in terms of which part of the problem is regulated first.

The second part of the “rationally furthers” or “rational relationship” inquiry focuses on the statute’s “overinclusiveness” – that is, the extent to which the statute imposes burdens on individuals who are not the focus of the statute’s regulation. Ideally, of course, a statute should only regulate those persons who are part of creating some problem, and not regulate innocent persons. However, as the Court has noted, “If the classification has some ‘reasonable basis,’ it does not offend the Constitution simply because the classification ‘is not made with mathematical nicety or because in practice it results in some inequality.’” On the other hand, a statute that burdens innocent persons for no rational reason will be held to be irrationally overinclusive. As the Court has noted, “The question is whether Congress achieved its purpose in a patently arbitrary or irrational way.”

In addition to minimum rational review, the Court has also developed two forms of “heightened review.” Under intermediate review, the legislation must (1) advance important or substantial governmental ends, (2) be substantially related to advancing those ends, and (3) not be substantially more burdensome than necessary to advance those ends. Under strict scrutiny, the statute must (1) advance compelling governmental ends, (2) be substantially and directly related to advancing those ends, and (3) be the least restrictive effective means to advance those ends.

As these tests indicate, with respect to government interests, at rational review the government need only advance “legitimate” governmental interests for the government action to be constitutional. At intermediate review, the government must advance “important” or “substantial” governmental interests. At strict scrutiny, the governmental interests must be not only important or substantial, but “compelling.” The Court has noted that certain interests, like administrative cost considerations, while legitimate, are typically not important or substantial, and thus cannot be used to justify a statute at intermediate scrutiny. On the other hand, certain interests, like diversity in broadcast programming, may be important, but are not compelling. Thus, they could be used to justify a statute at intermediate scrutiny, but not at strict scrutiny. Finally, certain interests, like remedying one’s own prior racial discrimination, are compelling, and thus can be used to justify a statute at strict scrutiny. Examples of other interests that have been assumed to be compelling by judges while deciding cases are national security and military defense, compliance with the Voting Rights Act, improving the delivery of health-care services to communities currently underserved, operation of a research-oriented elementary school dedicated to improving the quality of education in urban public schools, and the reduction of racial isolation in a situation that appeared to be de facto segregation.

With regard to the underinclusiveness inquiry, at intermediate review the statute must be “substantially related” to achieving its ends. Thus, the statute must regulate “substantially” all of the individuals who are part of creating some problem. A statute which is so poorly drafted that it does not regulate such a “substantial” number of problem individuals will be too underinclusive to
satisfy intermediate review. With regard to overinclusiveness, the statute at intermediate review must not burden “substantially more individuals than necessary” to achieve its ends.

At strict scrutiny, the government has an even more difficult time justifying its action. With regard to the overinclusiveness inquiry, the government must show that its action is the “least restrictive” or “least burdensome” way to advance effectively the government’s interests. This means that if there is any way the government could burden less those individuals who are not actually part of the problem, and yet still effectively advance its interests, the government must adopt that alternative. Of course, the government need not adopt a less burdensome alternative that would not effectively advance its ends, as the government may burden individuals if “necessary” to achieve its ends. With regard to the underinclusiveness inquiry, the statute must also be “necessary” to achieve its ends. This means that any unnecessary underinclusiveness will render the statute unconstitutional at strict scrutiny. Phrased in the affirmative, this means that the statute must be “directly related,” as well as “substantially” and “rationally” related, to achieving its ends. Only such a direct connection between means and ends, that is, to the extent possible directly linking all those who are the cause of some problem with the regulation, will satisfy the strict scrutiny underinclusiveness test. While this test is possible for the government to meet, in most cases the government fails to prove that its chosen course really is the least restrictive effective alternative to advance directly a compelling government interest. (§ 26.1.1)

CLASSIFICATIONS TRIGGERING STRICT SCRUTINY

Given the backdrop to the 14th Amendment of the Civil War and the 13th Amendment’s ban on slavery, the Court has consistently held that statutes discriminating against racial minorities trigger strict scrutiny. In addition, statutes which are neutral on their face, but passed with an intent to discriminate on grounds of race, trigger strict scrutiny.

During the formalist era, the Court held that statutes which literally applied equally to racial groups, such as banning both whites and non-whites from riding together in railroad cars in 1897 in Plessy v. Ferguson, or entering into an interracial marriage, did not involve racial discrimination. Under this “separate, but equal” doctrine, state statutes requiring segregation of the races therefore triggered only rational basis review. This analysis was overruled at the beginning of the instrumentalist era in 1954 in Brown v. Board of Education. Adopting a functional approach, the Court held in Brown that the practical effect of “separate, but equal” was to discriminate against minority groups, and such statutes constituted race discrimination. Modern-day formalists, such as Justices Scalia and Thomas, have agreed that any use of race in a statute literally involves race discrimination, also rejecting the Plessy “separate, but equal” doctrine. (§26.2.1.1)

Racial classifications intended to favor minorities have been allowed in cases on admission to educational institutions, on obtaining government contracts, and in providing opportunities for electing minority candidates. While instrumentalist Justices have argued that such “benign” use of race for affirmative action purposes should only trigger the lower level of intermediate review, a majority of the Court has said that since such cases also involve race discrimination, strict scrutiny should be used. In such cases, for the affirmative action program to be constitutional, the government must show that its use of race is the least burdensome way to advance a compelling government interest, such as the government remedying its own past history of race discrimination,
or ensuring a diverse student body in educational institutions. With the replacement of Justice O'Connor by Justice Alito in 2006, Justice Kennedy will likely become the critical swing vote on race-based affirmative action cases in the next few years. In 2003, dissenting in *Grutter v. Bollinger*, Justice Kennedy indicated less willingness to defer to government decisions than Justice O'Connor, and a greater willingness to conclude that programs in practice are adopting more burdensome kinds of quota systems, rather than less burdensome, more permissible kinds of factor analysis. (§ 26.2.1.4)

Classifications by the states regarding legal aliens are given strict scrutiny, unless they relate to “political functions,” such as police officers, probation officers, or public school teachers, where minimum rational review is applied. Alienage classifications in federal law trigger only minimum rational review because of the great power that Congress has over matters of immigration and aliens. Classifications regarding children of illegal aliens, similar to classifications regarding illegitimate children (§ 26.3.2), are given intermediate scrutiny. The state of Texas could not meet that test where the state sought to deny free public education to children of illegal immigrants. (§ 26.2.2)

Classifications that discriminate on the basis of religion are also given strict scrutiny. As noted at § 32.2.2.5, these cases also trigger strict scrutiny under the Free Exercise Clause. (§ 26.2.3)

**CLASSIFICATIONS TRIGGERING INTERMEDIATE REVIEW**

Prior to 1971, the Court applied minimum rational review to cases of gender discrimination. In 1971, in *Reed v. Reed*, the Court found that preferring males as estate administrators did not pass rational basis scrutiny. The Court appeared not to defer to legislative judgment in the case, and thus perhaps was actually applying a second-order rational review test. In 1973, in *Frontiero v. Richardson*, Justice Brennan, writing for himself and Justices Douglas, White, and Marshall, said that gender classifications should be given strict scrutiny, because gender, like race, is an immutable characteristic and both share a history of invidious discrimination. Majority support for that view did not develop, and in 1976, in *Craig v. Boren*, Justice Brennan wrote for a majority that gender classifications should be valid only if shown to be substantially related to a substantial government interest, an intermediate standard of review. Since 1976, that standard has remained in place. In practice, most gender discrimination has been ruled unconstitutional under that approach. (§ 26.3.1)

Prior to 1977, classifications discriminating against illegitimate children triggered only minimum rational review. In 1977, *Trimble v. Gordon*, the Court changed the standard of review in these cases to intermediate review. The justification for this was that whether or not a child is illegitimate is not the product of the child’s choice, and that “imposing disabilities” on the “child is contrary to the basic concept of our system that legal burdens should bear some relationship to individual responsibility or wrongdoing.” (§ 26.3.2)

**CLASSIFICATIONS TRIGGERING RATIONAL BASIS REVIEW**

Rational basis review is applied to standard social and economic legislation, classifications that disadvantage non-resident corporations, and classifications involving children, the elderly, physical or mental disabilities, or sexual orientation. As to sexual orientation, the Court found no legitimate
purpose, and only animus, in laws supporting broad-based discrimination against homosexuals or laws criminalizing sodomy merely because of disapproval of the homosexual lifestyle. (§ 26.4)

CLASSIFICATIONS THAT ABRIDGE FUNDAMENTAL RIGHTS

Although no specific text in the Constitution deals with these issues, the Court has stated that as a matter of foundational principles lying behind the representative democracy of the United States, individuals have a fundamental right to travel within the United States, a right of access to courts, and a right to vote and access to the ballot. For substantial burdens on these unenumerated, non-textually specific rights, the Court applies strict scrutiny. For less than substantial burdens on these rights, the Court applies second-order rational review, upholding “reasonable” regulations of these rights. The Court has held there is no fundamental right to equal funding for public school education, although many state courts have found such a right under their state constitutions. (§ 26.5)

CHAPTER 27: THE DUE PROCESS CLAUSES OF THE 5th AND 14th AMENDMENTS

INTRODUCTION

The Due Process Clause of § 1 of the 14th Amendment provides, “No State shall deprive any person of life, liberty, or property, without due process of law.” This language mirrors the Due Process Clause in the Fifth Amendment, which provides “nor shall any person . . . be deprived of life, liberty, or property, without due process of law.” It was commonly understood at the time of the ratification of the original Constitution in 1789 and the Fifth Amendment in 1791, as well as at the time of ratification of the 14th Amendment in 1868, that "due process" referred to the settled usages and modes of proceeding existing in the common law and statute law of England, not shown unsuited to conditions in this country. Due process, thus, usually referred to proper procedures. Only occasionally was due process thought to have a substantive component. This aspect of Due Process Clause analysis is called “procedural due process.”

Despite this fact, subsequent to ratification of the 14th Amendment, the Court has provided individuals with a number of substantive protections against state or federal infringement through use of the Due Process Clause. This doctrine of “substantive due process” has two parts: “enumerated” rights and “unenumerated” rights. “Enumerated” rights include those rights that are “fundamental” based on the text, context, and history of “life, liberty, and property” in the Due Process Clause. In addition, “enumerated rights” include those aspects of the Bill of Rights that are sufficiently “fundamental” to be incorporated into the Due Process Clause of the 14th Amendment, and thus made applicable against the states. The second part of substantive due process doctrine involves “unenumerated” fundamental rights that form part of substantive due process analysis. These rights, which the Court has held are “implicit in the concept of ordered liberty,” are not textually specific in the Constitution. (§ 27.1.1)

Rights based on the text, context, and history of “life, liberty, and property” that are not viewed as “fundamental” trigger only versions of rational review: minimum rational review for standard social or economic legislation, and second-order rational review for excessive punitive damage awards.
The definition of fundamental rights has two separate branches. One branch focuses on “history” and “traditions”; the other branch focuses on “collective conscience” and “the requirements of a free society.” As phrased in 1997 by Chief Justice Rehnquist in *Washington v. Glucksberg*, the rights “implicit in the concept of ordered liberty” are: “[1] those personal activities and decisions that this Court has identified as so deeply rooted in our history and traditions, or [2] so fundamental to our concept of constitutionally ordered liberty, that they are protected by the Fourteenth Amendment.”

In general, formalist and Holmesian judges, as positivists, rely more on history and traditions in their development of fundamental rights. This is particularly true for formalist judges, who, as noted in Chapter 9, tend to supplement their analysis of literal text with specific historical practices. It is also true, however, for Holmesian judges, whose predisposition to defer to the dominant forces in society, noted in Chapter 10, suggests that fundamental rights should emerge from legislative and executive traditions, or perhaps popular referenda, not court action.

Instrumentalist and natural law judges, as normativists, are more willing to embrace the second branch of fundamental rights analysis concerning evolving standards of “conscience” and “requirements of a free society,” as the judges perceive these to have developed over time. For instrumentalist judges, this may involve consideration of contemporary social policy, as noted in Chapter 11. For natural law judges, as noted in Chapter 12, this will more likely involve a “reasoned elaboration” of what is fundamental to “our concept of constitutionally ordered liberty” in light of prior Supreme Court precedents. (§ 27.1.1)
INCORPORATING THE BILL OF RIGHTS INTO THE 14th AMENDMENT

These same predispositions have guided the Court in deciding which of the expressed protections of the Bill of Rights should be considered “incorporated” into the liberty protected by the 14th Amendment’s Due Process Clause as “fundamental” and thus made applicable against the states. During the formalist and Holmesian eras, the definition of such rights was whether "a fair and enlightened system of justice is impossible without them" so that "neither liberty nor justice would exist if they were sacrificed." Under this approach, the Takings Clause of the Fifth Amendment, the First Amendment protections for freedom of speech and religion, and the Sixth Amendment right of an accused to counsel, at least as applied to a capital murder case, were viewed as fundamental. Other aspects of the Bill of Rights, particularly other aspects of a criminal defendant’s rights, such as the privilege against self-incrimination or protection against double jeopardy, were not viewed as fundamental to an “enlightened system of justice,” in part because those rights were not uniformly granted as a matter of specific historical practices in England or Continental Europe. During the instrumentalist era, the test for what rights are fundamental was changed to be what is fundamental to the “American system of justice.” Not surprisingly, under this test, most of the Bill of Rights were viewed as fundamental. Indeed, by the end of the instrumentalist era, the only provisions of the Bill of Rights not explicitly incorporated into the 14th Amendment were the Second Amendment dealing with the right to keep and bear arms, the Third Amendment provision regarding quartering soldiers in homes, the Fifth Amendment's requirement of a grand jury indictment, the Seventh Amendment’s right to a jury trial in civil cases, and the Eighth Amendment’s ban on excessive fines.

If a case ever arose raising the issue, probably the Second Amendment, Third Amendment, and Eighth Amendment ban on excessive fines would be viewed as fundamental and made applicable against the states. As a matter of deference to state procedural practices, probably the only two aspects of the Bill of Rights that are not “fundamental” today are the Fifth Amendment requirement of grand jury indictment, and the Seventh Amendment right to a jury trial. Thus, despite the Fifth Amendment, states are free to arrest an accused in various ways, not just by grand jury indictment. Despite the Seventh Amendment, states can follow a practice of trying some factual issues to a court, rather than a jury, in those rare cases where that might apply. This would not be true for the same issue if the case were heard in federal court under diversity jurisdiction. (§ 27.2)

RECOGNITION OF UNENUMERATED RIGHTS AS FUNDAMENTAL

During the formalist era, the Court stated in 1923 in *Meyer v. Nebraska* that “liberty” denotes “not merely freedom from bodily restraint, but also the right of the individual to contract, to engage in any of the common occupations of life, to acquire useful knowledge, to marry, establish a home and bring up children, to worship God according to the dictates of his own conscience, and, generally, to enjoy those privileges long recognized at common law as essential to the orderly pursuit of happiness by free men.”

The part of this listing focused on the “right of the individual to contract, to engage in any of the common occupations of life” was summarized in *Lochner v. New York* as a “liberty of contract.” Under that doctrine, which reflected the conservative, pro-business formalism of the formalist era, this “liberty of contract” could be interfered with only by laws that reasonably relate to the health and safety, morals, or general welfare of the public. For conservative, pro-business formalists,
“general welfare of the public” meant a business “affected with the public interest,” which typically meant one in which “the public itself might appropriately undertake, or one whose owner relies on a public grant or franchise for the right to conduct the business, or in which he is bound to serve all who apply; in short, such as is commonly called a public utility; or a business in its nature a monopoly.” In such cases, there is no competitive free market to discipline business behavior, and thus government regulation is justified. On the other hand, pure economic regulation of the free market was viewed as an illegitimate government interest, based, in part, on a view that the Due Process Clause reflected a belief in economic Social Darwinism, and reliance on the “unseen hand” of the free market to deal with business regulation.

This part of the “substantive due process” doctrine was rejected by the Court in 1937, against the backdrop of the Great Depression. Following a Holmesian deference-to-government approach, after 1937 the Court has subjected all standard economic regulations to minimum rational review, substantially deferring to the legislative and executive branches to determine what economic regulations advance the “general welfare of the public.” (§ 27.3.2.1)

The remainder of the list in 
Meyer concerning fundamental rights “to acquire useful knowledge, to marry, establish a home and bring up children, to worship God according to the dictates of his own conscience, and, generally, to enjoy those privileges long recognized at common law as essential to the orderly pursuit of happiness by free men” is still followed today as precedent. From a formalist perspective focusing on specific historical practices, these rights can be seen as reflecting long-standing traditional practices in Western societies regarding individual rights, and thus appropriate for even a formalist court to acknowledge as “implicit in the concept of ordered liberty.” Of course, viewed as a matter of specific historical practices traditional at the time the Constitution was ratified, this constellation of rights would only include the right of one man and one woman to marry (not polygamy or same-sex marriage), and then establish a home (not live together before marriage), and then bring up the children conceived in that marriage (not rights regarding illegitimate children).

Since 1937, the list of fundamental personal liberty rights has grown to include not only the right to marry, establish a home, and raise children, as in 
Meyer, but also a right to procreate, a right not to procreate through access to contraception and abortion, and other personal liberty rights identified by the Court. These rights have been elaborated in two kinds of ways.

One kind of analysis involves reasoning from enumerated fundamental rights in the Bill of Rights to other kinds of unenumerated rights viewed as related to those rights by being within the “penumbras” or “emanations” of those rights. For example, the Court’s conclusion in 
Meyer that there exists a right “to acquire useful knowledge” can be understood as a corollary to the First Amendment right to “freedom of speech.” Similarly, the right “to worship God” mentioned in 
Meyer was likely closely related in the Court’s mind, and perhaps even identical, to the First Amendment provision regarding the “free exercise” of religion. Justice Douglas’ 1965 opinion in 
Griswold v. Connecticut provides another example. In 
Griswold, Justice Douglas said that a case involving access to contraception by a married couple for use in their home concerned an unenumerated right of privacy related to several fundamental constitutional guarantees dealing with privacy. He referred to the right of association contained in the “penumbra” of the First Amendment, the Third Amendment's ban on the quartering of soldiers in one’s home, the Fourth

Page 2009
Amendment right to be secure from unreasonable searches and seizures, and the self-incrimination clause of the Fifth Amendment.

A second kind of analysis involves “analogical” reasoning from earlier identified unenumerated fundamental rights to new unenumerated fundamental rights that flow from a process of reasoned elaboration. For example, the Court had held in *Meyer* that there exists fundamental rights to marry, establish a home, and raise children. A right flowing naturally from these rights would be a right of a married person to procreate a child that the individual has a right to raise. Thus, the Court held in *Skinner v. Oklahoma* that both “marriage and procreation” are fundamental rights. So stated, these rights deal with the right of an individual to make decisions regarding marriage, procreation, and raising children. The Court has indicated that these cases involve what is called “decisional privacy,” that is, an “interest in independence in making certain kinds of important decisions.” Following the principle of “reasoned elaboration” of the law, this means the individual should have a right to make a decision either to procreate or not procreate, or marry or not marry.

The Court has elaborated the unenumerated fundamental rights analysis in this way. Thus, a second justification for the decision in *Griswold*, noted above, is that if a married couple has a right to procreate, they also have a right not to procreate, and thus a right of access to contraception. Similarly, based on “analogical” reasoning, an individual has a right not to marry, in addition to a right to marry. Thus, in *Eisenstadt v. Baird*, the Court held that an individual does not have to be married to have equal rights to procreate or not to procreate. The Court said, “If the right of privacy means anything, it is the right of the individual, married or single, to be free from unwarranted governmental intrusion into matters so fundamentally affecting a person as the decision whether to bear or beget a child.” Through such “penumbral” and “analogical” reasoning, fundamental rights can be identified that were not part of societies’ original customs and traditions. Given the role of specific historical practices in their analysis of fundamental rights, formalist Justices naturally reject such “reasoned elaboration” of the law. (§ 27.3.3)

The Court’s decision in *Roe v. Wade* reflects an instrumentalist approach toward such “reasoned elaboration” of the law. In *Roe*, decided in 1973, the Court held that the right of privacy, already extended in the precedents to activities relating to marriage, procreation, and contraception, was broad enough to encompass a woman's decision on whether or not to terminate her pregnancy. The decision in *Roe* was supported by reference to arguments of history, practice, precedent, and prudential considerations. As an historical matter, Justice Blackmun noted that in many ancient civilizations, such as Greece and Rome, abortions were legal, and that at the common law in England and most American colonies, abortions performed before “quickening” – “the first recognizable movement of the fetus *in utero*, appearing usually from the 16th to the 18th week or pregnancy – was not an indictable offense.” This history supported recognizing a right to have an abortion early in the pregnancy. Regarding precedent, Blackmun noted, “[T]he Court has recognized that a right of personal privacy, or a guarantee of certain areas or zones of privacy, does exist under the Constitution. . . . [These decisions] make it clear that the right has some extension to activities relating to marriage, procreation, contraception, family relationships, and child rearing and education. This right of privacy . . . is broad enough to encompass a woman's decision whether or not to terminate her pregnancy.” Justice Blackmun also discussed prudential arguments of social policy. He noted, “Specific and direct harm medically diagnosable even in early pregnancy may be involved. Maternity, or additional offspring, may force upon the woman a distressful life and future.
Psychological harm may be imminent. Mental and physical health may be taxed by child care.” All of these arguments supported the Court’s decision in *Roe*.

Regarding practice, Blackmun observed that subsequent to the 14th Amendment, states regulated abortion more strictly, with many states banning abortion from conception on. He noted, “Gradually, in the middle and late 19th century the quickening distinction disappeared from the statutory law of most States and the degree of the offense and the penalties were increased. By the end of the 1950’s a large majority of the jurisdictions banned abortion, however and whenever performed, unless done to save or preserve the life of the mother. . . . In the past several years, however, a trend toward liberalization of abortion statutes has resulted in adoption, by about one-third of the States, of less stringent laws.” Justice Blackmun also considered arguments of social practice, noting that while the American Medical Association had historically been anti-abortion, a new AMA resolution in 1970 “emphasized 'the best interests of the patient,' 'sound clinical judgment,' and 'informed patient consent.'” Justice Blackmun also cited the position of the American Public Health Association, which advocated, “Rapid and simple abortion referral must be readily available through state and local public health departments, medical societies, or other non-profit organizations.”

The fact that a sizable number of states as a matter of legislative and executive practice banned abortion between 1868 and 1973 formed the basis of Justice White’s and Justice Rehnquist’s Holmesian dissents in *Roe*, given the Holmesian great deference to legislative and executive practice. Justice Rehnquist noted in his dissent, “By the time of the adoption of the Fourteenth Amendment in 1868, there were at least 36 laws enacted by state or territorial legislatures limiting abortion. While many States have amended or updated their laws, 21 of the laws on the books in 1868 remain in effect today. Indeed, the Texas statute struck down today was, as the majority notes, first enacted in 1857 and ‘has remained substantially unchanged to the present time.’” In addition, despite Justice Blackmun’s use of general historical evidence regarding abortions, specific historical practices at the time the 14th Amendment was ratified in 1868 do not support a constitutional right to have an abortion. Thus, formalist Justices, like Justices Scalia and Thomas, have also routinely dissented from the Court’s decision in *Roe.* (§ 27.3.3.3)

When the right was recognized as fundamental in *Roe*, the rule was that strict scrutiny was triggered for any burden on a fundamental right. However, in 1992, in *Planned Parenthood v. Casey*, Justices O’Connor, Kennedy, and Souter, who were the controlling votes in the case, adopted the doctrine which had been applied in other cases, noted at § 21.2.3, that less than substantial or undue burdens on unenumerated fundamental rights typically trigger only second-order rational review, not strict scrutiny. Applied in *Casey*, the question thus became whether a regulation has “the purpose or effect of placing a substantial obstacle in the path of a woman seeking an abortion of a non-viable fetus.” The opinion then applied that test, striking down a requirement of spousal notification, but upholding, under rational review, requirements of written informed consent, providing certain information to the patient, a 24-hour waiting period, required record keeping, and a parental consent provision for women under 18, with a judicial bypass. The basic holding of *Roe* that a fundamental right exists was upheld on the ground that at “the heart of liberty is the right to define one’s own concept of existence, of meaning, of the universe, and of the mystery of human life.”
In general, the importance of the undue burden analysis in the joint opinion in *Casey* was to ensure that not every abortion regulation triggered strict scrutiny, and thus the Court did not act as super-legislature second-guessing every aspect of abortion regulation. Rather, strict scrutiny analysis was restricted in *Casey* to protecting the core principle of personal liberty from undue burdens. This is consistent with a modern natural law approach, which will want to ensure that basic principles of liberty and equality are protected, but recognize that once that protection is assured, there are a number of collateral decisions that any society must make in order to assure persons can live together in peace and harmony with equal concern and respect given to all that are best made in most circumstances by democratically elected officials, rather than courts. Such an approach rejects the instrumentalist willingness to have the courts take a greater lead in policy decisionmaking over non-substantial burdens on unenumerated fundamental rights. As part of the natural law approach to “reasoned elaboration of the law,” this distinction between undue or substantial burdens triggering strict scrutiny versus lesser burdens triggering second-order rational review, noted at § 21.2.3, will likely be extended to each aspect of unenumerated fundamental rights analysis. (§ 27.3.4.1)

The Court has not made a definitive decision on whether the “heart of liberty” right to “to define one’s own concept of existence, of meaning, of the universe, and of the mystery of human life” means that laws discriminating against homosexuals, such as barring same-sex marriage, is a deprivation of a fundamental right. The Court dodged the question in *Lawrence v. Texas* where a law criminalizing sodomy was struck down. Justice Kennedy wrote that the fact that a governing majority has regarded a particular practice as immoral is not a legitimate reason for upholding a law prohibiting the practice, and he found that the Texas law was based on nothing more than animus. Thus, the law failed even minimum rational review. However, he made clear that the case did not involve minors, non-consenting persons, declarations of status, or same-sex marriage. (§ 27.3.4.2)

The Court has also had to apply the “heart of liberty” language in the context of medical decisions regarding life and death. While there probably is a fundamental right of a competent person to refuse medical treatment, even if that would hasten death, the Court held in *Cruzan v. Director, Missouri Department of Health* that a state may permissibly advance its interest in preserving human life by applying a clear and convincing standard of proof to determine the patient’s wishes where the person is unconscious or otherwise unable to express an intention. The Court held in *Washington v. Glucksberg* that states can ban terminally ill people from killing themselves with the help of a doctor because there is no fundamental right to assistance in committing suicide. (§ 27.3.4.3)

Courts have also dealt with privacy cases involving disclosure of private medical records (§ 27.3.3.4), and decisional privacy regarding juvenile curfew statutes (§ 27.3.4.4). A number of privacy-related questions remain open, such as what are the limits on a woman’s right to choose to have a partial-birth abortion; can certain sexual acts traditionally regulated by the criminal law, like fornication or adultery, continue to be made illegal, given the Court’s decision in *Lawrence v. Texas*, and do persons have a right to medical treatment that will relieve pain even though it may accelerate death.
PROCEDURAL DUE PROCESS

The Due Process Clauses of the Fifth and 14th Amendments indicate that no federal or state action may “deprive a person of life, liberty or property, without due process of law.” Based on this text, three main questions arise in procedural due process cases. The first question is whether a “deprivation” has occurred as the result of state or federal action. The second question is who counts as a “person” and what “life,” “liberty,” or “property” rights are protected under “due process.” The third question is what “due process of law” requires before the deprivation can be constitutional.

Although there has been some wavering with respect to what constitutes a “deprivation” under the Due Process Clause, the standard doctrine is that a deprivation is a loss caused by “state action” that is intentional, or the product of deliberate indifference, but not merely negligent. It is the execution of a government’s policy or custom, whether made by its lawmakers or by those whose edicts or acts may fairly be said to represent official policy, that inflicts the injury for which the government can be made responsible. There is no deprivation, and thus no need for due process, if an adverse impact on a liberty or property interest is merely an indirect result of action the government is otherwise entitled to make. (§ 27.4.1)

The Court concluded in Roe v. Wade that the term “person” in the 14th Amendment refers only to postnatal individuals, that is, only after birth. The Court noted that the word “person” appears many places in the Constitution, but “in nearly all these instances, the use of the word is such that it has application only postnatally. None indicates, with any assurance, that it has any possible prenatal application.” Thus, “life” interests under the Due Process Clause do not begin until birth, although the Court has held that states have a legitimate interest in protecting prenatal life from the moment of conception (§ 27.4.2.1). Under this analysis, deprivations of “life” occur in capital murder cases when the government imposes the death penalty on convicted felons. The Court has developed a specialized body of law dealing with what procedures are required in death penalty cases, often as a matter of the Eighth Amendment’s ban on “cruel and unusual punishment.” (§ 27.4.2.2)

Constitutionally protected liberty interests are created by the Constitution and by state and federal law. They include not only the fundamental liberty rights under substantive due process analysis, but also a liberty interest in one’s reputation not being stigmatized by the government. In terms of liberty interests enjoyed by prisoners, inmates have a liberty interest in being free from restraints which extend the sentence in an unexpected manner, as by transfer to a mental hospital, or the involuntary administration of psychotropic drugs, and a liberty interest in not having imposed on them atypical and significant hardships in relation to the ordinary incidents of prison life. (§ 27.4.2.3)

Property interests are not created by the Constitution or individual expectations but, rather, by rules or understandings stemming from state or federal law. Thus, such interests can arise from federal or state statutory or constitutional provisions, or as a matter of state common-law property rights. In Goldberg v. Kelly, decided in 1970, the Court held that before a state may terminate welfare payments under the Aid to Families with Dependent Children program it must provide a pre-termination hearing. Justice Brennan explained that welfare recipients have a property interest in continuing to receive payments (an “entitlement” in popular usage) and a hearing would help
prevent unfair or mistaken deprivations of the property interest that welfare recipients had in continuing to receive payments. In 1971, the Court decided in *Bell v. Burson* that a state could not suspend the license of an uninsured motorist who failed to post security after an accident unless the motorist was first provided with notice and a hearing. Justice Brennan said the suspension involved state action which adjudicated an "important interest" of the licensee. He said that constitutional results no longer depend on a distinction between "rights" and "privileges." During the formalist and Holmesian eras, the Court had allowed states and the federal government to deprive persons of occupational licenses upon conditions imposed by the government, if the interests were classified as a “privilege” rather than a “right.” (§ 27.4.2.4)

The first requirement of procedural due process is that the governing law must give persons of ordinary intelligence a reasonable opportunity to know what is prohibited. The formalist-era Court struck down some economic regulations as unconstitutionally vague, and the instrumentalist-era Court struck down a few criminal statutes as unconstitutionally vague. The Holmesian-era and modern natural law-era Courts have been relatively tolerant of the difficulties of legislative drafting, and only rarely have held a statute unconstitutionally vague, outside the First Amendment context, discussed at § 29.6.1.4. (§ 27.4.3.1)

The general test applied today in procedural due process cases was announced by the Court in *Mathews v. Eldridge* in 1976. It calls for balancing “the private interest that will be affected; the risk of an erroneous deprivation through present procedures and the probable value, if any, of additional or substitute procedures; and the government’s interest, including the function involved and the fiscal or administrative burdens that the additional or substitute procedures would entail.” In applying this test, the Court has indicated that due process usually requires an opportunity for notice and some kind of hearing before a deprivation. However, the government can act without advance procedures if it is not practicable to provide a pre-deprivation hearing. (§ 27.4.3.2)

Numerous examples are provided in the ET of procedural due process analysis applied to cases on mental hospital commitment, parental rights termination, government entitlements, workplace matters, license or utility termination, creditor/debtor situations, actions by schools, and detained persons. Also considered is the delegation of government functions to private parties and legislative adoption of rules drafted by private parties. (§ 27.4.4)

**CHAPTER 28: CONGRESSIONAL POWER TO ENFORCE CIVIL WAR AMENDMENTS**

Each provision in the Civil War Amendments – the 13th, 14th, and 15th Amendments – has a section providing that “Congress shall have power to enforce” the amendment “by appropriate legislation.” The two main points of contention in interpreting this language have been what the word “enforce” means, and what the word “appropriate” means. Regarding “enforce,” the question is whether Congress has the power to define for itself what action violates the Civil War Amendments and then provide remedies for that action, or is Congress limited to providing remedial schemes for violations found by the Court. Regarding “appropriate,” the question is what should be the test to determine appropriate congressional action.

During the instrumentalist era, in cases such as *Katzenbach v. Morgan*, the Court embraced the view, consistent with the practices of the Radical Republican Congresses in passing various civil rights
law between 1866-1875, that Congress had independent power to determine for itself violations of the Civil War Amendments. The Court also held in Katzenbach that “appropriate” legislation would be tested only by the minimal “plainly adapted” standard of review of McCulloch v. Maryland.

Both of these conclusions have been limited by decisions during the modern natural law era. While still being faithful to the core holdings of the instrumentalist-era cases, the modern Court has moved in cases such as City of Boerne v. Flores to reinstate the traditional view that congressional power under the Civil War Amendments is remedial only. This is consistent with the view in Marbury v. Madison that it is “emphatically the province and duty of the judicial department to say what the law is.” The Court has also created a test for determining “appropriate” legislation that focuses on the “congruence and proportionality” of the congressional action given the mischief to be remedied. This “congruence and proportionality” test appears to be a version of “third-order” rational review, similar to the “rough proportionality” test of Dolan under the Takings Clause (§ 22.2.5), with the burden on Congress to justify its action, rather than the minimum rational review of McCulloch v. Maryland. The Court has left substantially unexplained the justification for applying this higher standard of review to the term “appropriate” in the Civil War Amendments, although it is consistent with the background natural law principle of proportionality used in the Eighth Amendment “cruel and unusual punishment” analysis, discussed at § 23.2.1.4. Specific examples of Congress’ use of its enforcement power appear in the remainder of Chapter 28 in the context of the 13th Amendment (§ 28.2), the 14th Amendment (§ 28.3), and the 15th Amendment (§ 28.4).

SUB-PART FOUR: THE FIRST AMENDMENT

The First Amendment to the Constitution provides, “Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press, or the right of the people peacefully to assemble, and to petition the Government for a redress of grievances.” The basic doctrine regarding free speech is discussed in Chapter 29. A number of special categories of speech get their own kind of First Amendment review that is less than standard First Amendment protection. These categories are discussed in Chapter 30. A second protection of the First Amendment involves the right “to assemble” and “petition the Government for a redress of grievances,” which has been held include a “freedom of association.” These cases are discussed in Chapter 31. The third protection of the First Amendment involves two clauses dealing with religion: the Establishment Clause and the Free Exercise Clause. These two clauses are discussed in Chapter 32. As discussed at § 27.2, the Court has held that the liberty protected by the 14th Amendment includes the freedoms protected by the First Amendment, so these provisions apply equally to federal or state governmental regulations.

CHAPTER 29: FREEDOM OF SPEECH AND OF THE PRESS

EVOLUTION IN THE PROTECTION OF SPEECH

In the original natural law era there were no major Supreme Court decisions granting protection to the freedom of speech. The issue regarding freedom of speech was raised, however, with the passage in 1798 of the Alien and Sedition Acts. Among other things, the Sedition Act criminalized certain forms of politically partisan speech, which the Act termed “sedition.” During the campaign of 1800, a number of Jefferson partisans were arrested under the Act, and Jefferson and his allies
used the passage and enforcement of the Act to brand President Adams and his administration as hostile to the rights of free speech. After Jefferson’s election in 1800, the Alien and Sedition Acts were repealed, in part because of the understanding of Jefferson and his supporters that the Sedition Act constituted an infringement on the rights of free speech, even though truth was a defense under the Act. As the Supreme Court noted many years later in *New York Times Co. v. Sullivan*, “Although the Sedition Act was never tested in this Court, the attack upon its validity has carried the day in the court of history. Fines levied in its prosecution were repaid by Act of Congress on the ground that it was unconstitutional. . . . Calhoun, reporting to the Senate on February 4, 1836, assumed that its invalidity was a matter ‘which no one now doubts.’ . . . Jefferson, as President, pardoned those who had been convicted and sentenced under the Act. . . . The invalidity of the Act has also been assumed by Justices of this Court. . . . These views reflect a broad consensus that the Act, because of the restraint it imposed upon criticism of government and public officials, was inconsistent with the First Amendment.” (§ 29.1.1)

Despite this general understanding of the First Amendment during the original natural law era, the first “freedom of speech” cases of the formalist era downplayed this legislative and executive practice surrounding the Alien and Sedition Acts. Instead, following the formalist predisposition toward literal interpretation, the cases concluded that the First Amendment was directed primarily at the literal meaning of “free” speech, that is, the right to speak freely and not be limited by prior restraints. For example, in 1907, in *Patterson v. Colorado*, the Court focused on literal text, as well as 18th-century historical sources specifically addressing the freedom of speech, such as Blackstone, to conclude that protection against prior restraints was the full extent of the Free Speech Clause of the First Amendment. (§ 29.1.2)

The later views of Justice Holmes reflected a more functional approach toward free speech doctrine. Writing in *Schneck v. United States*, Holmes stated, “The question in every case is whether the words used are used in such circumstances and are of such a nature as to create a clear and present danger that they will bring about the substantive evils that Congress has a right to prevent.” Turning to considering the purpose behind the free speech clause, Holmes observed in *Abrams v. United States*, “When men have realized that time has upset many fighting faiths, they may come to believe even more than they believe the very foundations of their own conduct that the ultimate good desired is better reached by free trade in ideas – that the best test of truth is the power of the thought to get itself accepted in the competition of the market, and that truth is the only ground upon which their wishes safely can be carried out.” The impact on the Court of Justice Holmes’ views was apparent in cases like *Bridges v. California*, decided in 1941, where the Court stated, “What finally emerges from the ‘clear and present’ danger cases is a working principle that the substantive evil must be extremely serious and the degree of imminence extremely high before utterances can be punished.” Reflecting the Holmesian deference-to-government approach, however, in 1951, in *Dennis v. United States*, the Court upheld an application of the Smith Act which made it unlawful knowingly or wilfully to advocate destroying any government in the United States by force or violence. (§ 29.1.3)

The liberal instrumentalist-era Court provided greater protection for speech than the clear and present danger test. For example, in 1972, the Court stated in *Police Department of Chicago v. Mosley*, “[A]bove all else, the First Amendment means that government has no power to restrict expression because of its message, its ideas, its subject matter, or its content.” Regarding advocacy of illegal conduct, the Court held in 1969 in *Brandenburg v. Ohio* that speech is protected unless the
speech is “directed to inciting or producing imminent lawless action and is likely to incite or produce such action.” (§ 29.1.4)

CONTEMPORARY LEVELS OF REVIEW FOR FULLY PROTECTED SPEECH

Reflecting the modern natural law predisposition to follow precedent, very few instrumentalist-era precedents regarding the First Amendment have been overturned or limited. The doctrine of the modern natural law era reflects the relatively robust protection of the instrumentalist era, embracing a number of reasons mentioned in prior cases in favor of robust protection of free speech. These include: Holmes’ views on free speech and the marketplace of ideas; free speech supports a robust democratic process; radical action may best be restrained by granting free speech, subject to criminal punishment for criminal acts; free speech advances the human spirit that demands self-expression and self-realization; free speech promotes the ideal of libertarian dignity protected through law; and freedom of speech promotes tolerance of others.

Reflecting the analytic predisposition of the natural law approach, modern free speech doctrine has become more systemic in terms of levels of review. Under modern free speech doctrine, the Court applies a different level of scrutiny depending upon whether the speech being regulated: (1) occurs in (a) a public forum or (b) a non-public forum; and (2) whether the regulation is (a) a content-based regulation of speech, focusing on (i) the viewpoint of the speech or (ii) the subject-matter or topic of the speech, or (b) a content-neutral regulation of speech based upon the (i) the secondary effects of the speech or (ii) a concern with only the time, place, or manner of the speech. In a public forum, content-based regulations of speech trigger strict scrutiny, while content-neutral regulations trigger intermediate review. In a non-public forum, viewpoint regulations of speech trigger strict scrutiny, while content-based regulations of subject-matter and content-neutral regulations typically trigger rational review. In tabular format, the levels of review that apply to fully protected speech are:

<table>
<thead>
<tr>
<th>Content-Based Regulation of Speech</th>
<th>Public Forum or Private Property</th>
<th>Non-Public Forum Owned by the Government</th>
</tr>
</thead>
<tbody>
<tr>
<td>Viewpoint Discrimination</td>
<td>Strict Scrutiny</td>
<td>Strict Scrutiny</td>
</tr>
<tr>
<td>Subject-Matter Discrimination</td>
<td>Strict Scrutiny</td>
<td>Basic Rational Review</td>
</tr>
<tr>
<td>Content-Neutral Regulation of Speech</td>
<td>Intermediate Review</td>
<td>Basic Rational Review</td>
</tr>
</tbody>
</table>

To trigger First Amendment protection, the government must be regulating speech, and not conduct. Regulations of conduct merely trigger other clauses of the Constitution, like Equal Protection or Due
Process. Further, government action involving funding of speech, rather than regulating speech, raise its own kind of First Amendment analysis. (§ 29.2)

REGULATING SPEECH VERSUS CONDUCT

By its terms, the First Amendment proscribes only governmental regulations “abridging the freedom of speech,” not conduct. Governmental regulations of conduct, therefore, are outside of the ambit of the First Amendment. In determining whether the regulation is one of speech or conduct, the Court has noted that “symbolic speech” is protected by the First Amendment. “Symbolic speech” exists where conduct is not “pure speech,” such as talking, writing, or wearing informative clothing, but is nevertheless intended to be expressive and conveys a message reasonably likely to be understood. Classic case examples of symbolic conduct include burning a cross on someone’s lawn, burning a flag, or performers dancing in the nude at an adult entertainment establishment.

Sometimes, whether the regulation is one of speech or conduct may not be so clear. For example, the Court held in *Dallas v. Stanglin* that “recreational dancing” by patrons of a dance hall was not expressive activity. In contrast, in *Barnes v. Glen Theatre, Inc*, the Court held that a statute barring public nudity when applied to nude dancing by “performers” at an adult entertainment establishment involved expressive activity because part of the purpose of the performance was erotic expression. From a formalist perspective, focused more on literal meaning than purpose, Justice Scalia said that the First Amendment did not apply in *Barnes*, since the nude dancing by performers literally was not symbolic speech, but mere conduct. (§ 29.3.1)

GOVERNMENT SPENDING ON SPEECH

The federal and state governments fund a wide variety of activities. For the federal government, this fits comfortably within the General Welfare Clause as supplemented by the Necessary and Proper Clause. As the Court held in *Helvering v. Davis*, “When money is spent to promote the general welfare, the concept of welfare or the opposite is shaped by Congress, not the states. So the concept be not arbitrary, the locality must yield.” When the government has subsidized a particular activity, the Court has typically not reviewed its effects from a heightened level of scrutiny.

The situation is somewhat different if the government subsidizes some speech, but not other speech. There is always the possibility that it is engaged in viewpoint discrimination. The major cases have all been dealt with during the modern natural law era. These decisions generally permit the government to subsidize a viewpoint if it is the government that is speaking. The government may also call for speech-related considerations to be included when making a many-factored judgment in a competitive funding process. However, due to Justice Kennedy’s critical fifth vote in a number of cases, the government cannot engage in viewpoint discrimination within a program designed to encourage a diversity of views from private speakers. And it cannot restrict lawyers in a government-funded legal services program from questioning the legality of existing law. (§ 29.3.2)
CONTENT-BASED VERSUS CONTENT-NEUTRAL REGULATIONS OF SPEECH

The distinction between content-based and content-neutral regulations of speech is well illustrated by the famous and leading case of United States v. O’Brien. In this 1968 case, the Court upheld the conviction of a protester who had violated federal law by burning his draft card on the steps of a courthouse as part of a demonstration against the Vietnam war. The crime defined by statute was destroying a draft certificate. Chief Justice Warren stated, “[A] regulation is sufficiently justified if it is within the constitutional power of the Government; if it furthers an important or substantial governmental interest; if the governmental interest is unrelated to the suppression of free expression; and if the incidental restriction on alleged First Amendment freedoms is no greater than is essential to the furtherance of that interest.” The government interest in O’Brien that was unrelated to the suppression of free expression was the harm that burning the draft card would have to the effective functioning of the Selective Service System. The Court concluded in O’Brien that the secondary effect of burning the draft card was what concerned the government, not the protest activity itself.

The O’Brien principle, although framed in the context of a regulation of symbolic speech that had a problematic secondary effect, was extended in Members of the City Council of Los Angeles v. Taxpayers for Vincent to all time, place, or manner regulations applied in a public forum. This was done with little detailed consideration, but was based on the common-sense observation that a time, place, or manner regulation also involves a case where the government is not concerned about the content of the speech, but only the time, place, or manner of the speech’s delivery. Thus, under current doctrine, either a regulation is content-based or it is content-neutral, with no distinction made between whether the regulation is content-neutral because it is based upon secondary effects or is a time, place, or manner regulation.

Another example of the distinction between content-based and content-neutral regulations appeared in Texas v. Johnson. In this case, the majority held that a state flag desecration statute was invalid as applied to defendant, who had burned a flag as part of a political protest. The majority noted that the state’s interest in banning flag burning to prevent breaches of the peace was a content-neutral reason for the regulation. It thus triggered intermediate review. That justification failed intermediate review, however, because the statute was not substantially related to advancing the interest in preventing a breach of the peace, since no one at the demonstration was injured or threatened with injury and only several witnesses testified that they had been seriously offended by the flag-burning.

The state’s second interest was an interest in preserving the flag as a symbol of nationhood and national unity. The majority said that this interest was related to the suppression of expression and, thus, was content-based. Therefore, strict scrutiny was applied to the consideration of that interest, rather than the intermediate review standard of O’Brien. This reason failed the strict scrutiny approach, the Court said, because it is a bedrock general principle that the government may not prohibit the expression of an idea simply because society finds the idea itself offensive or disagreeable. The Court said that the government may pursue its legitimate interest in preserving the symbolic value of flag by making suggestions concerning the proper treatment of the flag. It might attempt to persuade those who feel differently about the flag that they are wrong. But it cannot justify a criminal conviction for engaging in political expression by use of the flag. (§ 29.4.1)
The Court distinguishes between two kinds of content-based regulations: (1) those that discriminate on grounds of viewpoint; and (2) those that discriminate on grounds of subject-matter. Viewpoint discrimination occurs where the government regulation takes sides in a dispute, and only regulates the disfavored side. In subject-matter regulation, the government prevents an entire topic from being discussed. Most of the time this distinction is clear, but occasionally categorizing a regulation can be problematic. (§ 29.4.2)

**EFFECT OF FORUM BEING PUBLIC OR NON-PUBLIC**

The Court applies a different standard of scrutiny to government regulations of speech in non-public forums owned by the government, rather than regulations of speech in a public forum or on private property. With regard to non-public forum property owned by the government, the state can impose content-neutral laws, or regulate the subject-matter of the speech to ensure the forum is being used for its intended purposes, as long as the regulation is reasonable and not an effort to suppress expression merely because public officials oppose the speaker’s view, that is, viewpoint discrimination. Viewpoint discrimination continues to trigger strict scrutiny review even in a non-public forum. All other regulations in a non-public forum trigger only minimum rational review.

Public streets and public parks are naturally regarded as examples of public forums. Jails and military bases are classic examples of non-public forums. In determining whether a forum is public or non-public, formalist Justices tend to focus more on the government’s intent, and whether the government has expressly, or literally, opened the forum for public use. Holmesian Justices also tend to focus on governmental intent, deferring to the government’s contention in litigation that the forum is a non-public forum unless the opposite conclusion is clear. In contrast, instrumentalist and natural law Justices focus more on whether the objective nature of the forum is compatible with free speech uses. Based on their predisposition to protect free speech rights, particularly of the poor and dissenters, liberal instrumentalist Justices tend to resolve close questions more in the direction of finding that the forum is a public forum than do natural law Justices.

A third kind of forum is a designated public forum, opened by the state as a place for expressive activity for some purposes. Although the state is not required indefinitely to retain the open character of the facility, as long as it does so it is bound by the same standards that apply in a traditional public forum when that forum is used for designated purposes. (§ 29.5)

A good example of the different standards that apply depending on the nature and location of the activity being regulated concerns public schools. Where the regulation involves an aspect of school life viewed as occurring in a non-public forum, such as government control over material presented in school classrooms or school auditoriums, as in *Bethel School District No. 403 v. Fraser*, then basic rational review is applied. Where the regulation involves an aspect of school life on playgrounds or in a school lunchroom, which are viewed more as places designated for free speech, and thus public forums, content-neutral regulations have been subjected to intermediate scrutiny, as in *Tinker v. Des Moines Independent Community School District*, and content-based regulations have triggered strict scrutiny. (§ 29.6.2.2)
SPECIALIZED FIRST AMENDMENT TOPICS

There are some specialized First Amendment topics that are best considered on their own. Some relate to procedural aspects of the restrictions: prior restraints, content-neutral injunctions on speech, government fees for permits to speak, vagueness challenges, and substantial overbreadth. Others relate to circumstances in which the restraint applies: coerced speech, the government as educator, invasion of privacy, free speech versus fair trial rights, and taxation of the press.

PRIOR RESTRAINTS

A prior restraint is a legal sanction that has the effect of suppressing future speech before there is a judicial finding, after appropriate proceedings, that such speech is not constitutionally protected from restraint. The Court has often emphasized that any prior restraint has a "‘heavy’ presumption against its constitutional validity.” This is particularly true because of the collateral bar rule. While a person accused of violating a law can defend on the grounds that the law is unconstitutional, in the case of a prior restraint “a court order must be obeyed until it is set aside” and “persons subject to the order who disobey it may not defend against the ensuing charge of criminal contempt on the ground that the order was erroneous or even unconstitutional.”

Reflecting the rigor of the strict scrutiny “least restrictive alternative” test, the Court indicated in Freedman v. Maryland that for even a temporary prior restraint to be valid the restraint must: (1) put the burden on the government to go to court and bear the burden of proving the speech unprotected; (2) merely preserve the status quo for the shortest fixed period compatible with sound judicial resolution; and (3) provide for a prompt, final judicial disposition of the case. However, a trial court judge may impose a “gag order” on parties not to reveal certain information about the on-going proceedings if such an order can satisfy strict scrutiny by being necessary to advance the compelling government interest of ensuring a fair trial. (§ 29.6.1.1)

CONTENT-NEUTRAL INJUNCTIONS ON SPEECH

A refinement in the standard of review for content-neutral injunctions on speech, rather than content-neutral regulations of speech, was announced by the Supreme Court in Madsen v. Women's Health Center. There the Court dealt with a challenge to an injunction regarding what actions could be taken by protesters at an abortion clinic. Chief Justice Rehnquist stated that the differences between an injunction and a generally applicable ordinance required somewhat more stringent application of First Amendment principles regarding content-neutral injunctions than the usual time, place, or manner rule, which requires that the law must be "narrowly tailored to serve a significant public interest." The reason closer attention should be paid flows from the general rule that injunctive relief should be no more burdensome than necessary. Thus, the Court said the relevant inquiry is whether a challenged provision "burdens no more speech than necessary to serve a significant government interest," which was substituted for the “not burdening substantially more speech than necessary” prong of intermediate scrutiny. The majority made clear that the “no more speech than necessary” was not the strict scrutiny “least restrictive alternative” analysis. Thus, Madsen represented a third kind of narrow tailoring analysis between intermediate review and strict scrutiny.
This additional level of narrow tailoring analysis adds confusion to the law. From the perspective of the “base, plus six” model of levels of review (Chapter 7), the majority could have achieved the same result in Madsen by adopting the intermediate review with bite standard applicable to commercial speech, discussed at § 30.3.2. As the majority’s analysis reveals, where the injunction at issue in Madsen was constitutional, it was because it was “directly related” to the perceived harms and was a close enough fit to satisfy the intermediate “not substantially more burdensome than necessary” test. Where the injunction was unconstitutional, it was because it was not directly related to perceived harms, or not a close enough fit, and thus substantially overbroad. (§ 29.6.1.2)

**FEES FOR SPEECH ON GOVERNMENT PROPERTY**

Where the government has a content-neutral justification for imposing a fee prior to permitting speech, such as ensuring that two groups are not trying to speak at the same time in the same place, or ensuring that the costs are covered of cleaning up any littering that might occur following an event, the court applies an intermediate standard of review. As typically phrased, such laws are only allowed if the government has: (1) an important, content-neutral reason for the regulation (the prong one requirement of an intermediate standard of review requiring an important or substantial interest); (2) there are clear criteria leaving no overly broad discretion to the licensing authority (the prong two requirement of ensuring that the regulation is substantially related to advancing the important content-neutral interest and is not a cover for content-based discrimination); and (3) procedural safeguards, such as requiring prompt determinations as to license requests and judicial review of license standards (the prong three requirement of the regulation not being substantially more burdensome than necessary and not imposing substantial burdens on free speech). Where the fee provision is drafted in a way that involves content-based discrimination, the Court applies a strict scrutiny approach. (§ 29.6.1.3)

**VAGUENESS DOCTRINE**

A law is unconstitutionally vague under the Due Process Clauses of the Fifth and 14th Amendments if the law does not define with “sufficient definiteness” what conduct is permitted and what conduct is prohibited (§ 27.4.3.1). While any law can be unconstitutionally vague, the Court has expressed the greatest concern regarding vagueness in the context of criminal statutes and in the context of the First Amendment. Courts are particularly troubled about vague laws restricting speech out of concern that they will chill constitutionally protected speech. In NAACP v. Button, the Court noted that the freedom of speech is “delicate and vulnerable, as well as supremely precious in our society [and] the threat of sanctions may deter their exercise almost as potently as the actual application of sanctions.”

Based on concerns such as these, the Court has declared unconstitutional a state statute preventing any “subversive person” from being employed by the state and requiring persons to swear they are not members of a “subversive organization.” The Court concluded that the term “subversive” was “unduly vague” and “uncertain.” The Court has also struck down on vagueness grounds a statute that prohibited treating the flag of the United States “contemptuously.” The Court also ruled unconstitutional a statute making it unlawful to “interrupt” police officers in the performance of their duties. The Court noted that the law was not clearly limited to “disorderly conduct or fighting words” and the law effectively grants police “the discretion to make arrests selectively on the basis
of the content of the speech.” The Court has noted that the concern with vagueness is less in cases involving government funding of speech than in government regulation of speech. (§ 29.6.1.4)

THE SUBSTANTIAL OVERBREADTH DOCTRINE

Another process-based rule is an exception to the normal rule that parties cannot bring cases to vindicate the rights of third parties. In free speech cases the plaintiff can call for application of the substantial overbreadth doctrine. Thus, even if the plaintiff is engaged in unprotected speech, the plaintiff can secure a determination of invalidity if the law is substantially overbroad and as a result affects the rights of third persons. As explained by the Court in Members of the City Council of Los Angeles v. Taxpayers for Vincent, “[T]he transcendent value to all society of constitutionally protected expression is deemed to justify allowing 'attacks on overly broad statutes with no requirement that the person making the attack demonstrate that his own conduct could not be regulated by a statute drawn with the requisite narrow specificity.' This is deemed necessary because persons whose expression is constitutionally protected may well refrain from exercising their rights for fear of criminal sanctions provided by a statute susceptible of application to protected expression.” The Court also noted in Vincent, “‘The requirement of substantial overbreadth is directly derived from the purpose and nature of the doctrine. While a sweeping statute, or one incapable of limitation, has the potential to repeatedly chill the exercise of expressive activity by many individuals, the extent of deterrence of protected speech can be expected to decrease with the declining reach of the regulation.’ In short, there must be a realistic danger that the statute itself will significantly compromise recognized First Amendment protections of parties not before the Court for it to be facially challenged on overbreadth grounds.” (§ 29.6.1.5)

COERCED SPEECH

The foundation for modern cases on coerced speech is West Virginia Board of Education v. Barnette. There the Court held invalid a public school program requiring teachers and pupils to participate in a salute to the flag of the United States. In an oft-quoted paragraph, Justice Jackson, said, “If there is any fixed star in our constitutional constellation, it is that no official, high or petty, can prescribe what shall be orthodox in politics, nationalism, religion, or other matters of opinion or force citizens to confess by word or act their faith therein.” Applying that concept, the Court has held that a state cannot require passenger vehicles to carry a license plate that contains an ideological message. Similarly, a person cannot be required to contribute money to a union or a professional organization if the money will not be spent for collective-bargaining activity or to improve the profession, and will be spent on speech not approved by the contributor. However, the Court has allowed the government to mandate assessments on producers as part of a scheme of economic regulation, even though part of the money would be used to finance generic advertising. The Court noted that citizens have no First Amendment right not to fund government speech through general taxes or targeted assessments. (§ 29.6.2.1)
THE GOVERNMENT AS EDUCATOR

When the government acts as educator, and the regulation involves an aspect of school life regarded as occurring in a non-public forum, such as a classroom or auditorium, minimum rational review has been applied. When the regulation involves non-curricular aspects of school life on playgrounds or in a school lunchroom, places viewed more as designated for free speech and, thus, public forums, content-neutral regulations have been subjected to intermediate scrutiny, and content-based regulations have triggered strict scrutiny. Thus, a school could discipline a high school student for inappropriate speech at a high school assembly, but could not punish students for wearing black arm bands where the Court found no material disruption of classwork or invasion of the rights of others, and the school authorities could not reasonably forecast such consequences. However, the principal could censor a student newspaper developed within the school curriculum so long as his judgment was reasonably related to legitimate pedagogical concerns. (§ 29.6.2.2)

SPEECH AND PRIVACY RIGHTS

The government has power to protect persons from speech which creates an intolerable invasion of privacy. Conservative formalist and Holmesian Justices tend to be more deferential to privacy rights, while liberal instrumentalist Justices tend to be more deferential to rights of free speech. Natural law Justices tend to strike a middle ground, balancing privacy concerns of the audience against the free speech rights of demonstrators or the press. For example, a majority of the Court, with Justices Brennan and Marshall dissenting, upheld an ordinance interpreted to bar focused picketing aimed at a particular house. An injunction against protestors in front of an abortion clinic was upheld with respect to noise, but not as to images that could be observed within the clinic, as to which the curtains could be pulled. (§ 29.6.2.3)

FREE SPEECH AND FAIR TRIALS

Cases involving complete bans on persons, including the media, from criminal courtrooms have been struck down by the application of strict scrutiny. That approach extends to excluding the public or the press from voir dire proceedings. On the other hand, court do have a compelling interest in insuring a fair trial, and thus limitations on the press are permissible if necessary to advance that interest. For example, in Sheppard v. Maxwell, prejudicial publicity about the defendant had saturated the community in which he was tried. The Court said that the press must have a free hand if there is no threat to the integrity of a trial. However, where the accused might be prejudiced, the court can and should take appropriate steps. The court can limit the presence of the press at judicial proceedings. The judge can also continue the case until publicity subsides, transfer it to another county, or sequester the jury. Failure to protect the defendant from inherently prejudicial publicity will result in reversal of the conviction.

Protective orders that would enhance the litigation process have also been approved. For example, in Seattle Times Co. v. Rhinehart, the Court allowed a protective order restraining the parties to civil litigation from publishing material obtained through the discovery process. The Court said this furthered a substantial interest unrelated to the suppression of expression, that is, a purpose to assist in the preparation of trial or settlement. By using this language, the Court adopted an intermediate standard of review for a protective order justified by a content-neutral reason. (§ 29.6.2.4)
TAXATION OF THE PRESS

Taxation of the press can be used to threatened its freedom of speech. The Court has held that the government can subject newspapers to generally applicable economic regulations without creating a constitutional problem, but the government may not single out the press for special treatment without satisfying strict scrutiny. In the modern natural law era, the protection from being singled out has been extended by requiring strict scrutiny whenever the incidence of a tax is content-based. (§ 29.6.2.5)

CHAPTER 30: EXCEPTIONS TO STANDARD FREE SPEECH DOCTRINE

INTRODUCTION

A number of special categories of speech are reviewed at less than the standard First Amendment protection of strict scrutiny. In some of these cases, such as certain advocacy of illegal conduct, fighting words, obscenity, or indecency involving children, the speech receives no First Amendment protection, except for the prescription against viewpoint discrimination that triggers strict scrutiny. For other kinds of speech, like defamatory speech or government regulation of the speech of government employees on matters of public concern, a version of heightened rational review is applied. For regulations of broadcast television or radio, or regulations of commercial speech, a version of intermediate scrutiny is applied. In campaign finance cases or speech regulating the choice and election of candidates, a version of strict scrutiny typically is applied.

ADVOCACY OF ILLEGAL CONDUCT OR HATE SPEECH

Four kinds of cases fall generally under the category of speech involving the advocacy of illegal conduct. The classic case involves advocacy by a speaker to a group at a demonstration, or the distribution of leaflets or other literature, advocating lawless action. The Court’s doctrine from Schenck, through Abrams, Bridges, and Dennis, to Brandenburg is discussed at § 29.1. Under Brandenburg v. Ohio, the test for whether the speech is unprotected as advocacy of illegal conduct is whether the speech is “directed to inciting or producing imminent lawless action and is likely to incite or produce such action.” If the speech meets this test, the speech is “unprotected” and there is no further First Amendment review, unless viewpoint discrimination is involved, which always triggers strict scrutiny. (§ 30.1.1.1)

A second kind of case involves advocacy where the speaker indicates a possible intent for the speaker to commit violence. The Court has defined these cases as involving whether the speaker’s statement indicates a “true threat” to commit an act of unlawful violence to a particular individual or group of individuals. Burning a cross on a person’s yard has been regarded as a true threat. True threats are distinguished from the classic cases of advocacy of illegal conduct in that to constitute a true threat the speaker must threaten that the speaker will cause the harm, or that it will be caused by someone the speaker controls, directs, or is involved with in a conspiracy. (§ 30.1.1.2)

A third kind of case involves speech concerning violence done in the context of on-going illegal actions. These cases involve application of special “hate crimes” statutes that make the related
speech a crime independent of the on-going illegal action. The Court has never upheld any “hate crimes” statute as constitutional unless it was narrowly defined to reach only other categories of “unprotected speech,” such as advocacy of illegal conduct, true threats, or fighting words. The best chance for such a statute would probably be to relate the “hate speech” to certain “secondary effects” to trigger intermediate review under standard First Amendment doctrine, rather than being a clear content-based regulation of speech triggering strict scrutiny. Despite this doctrine, hostile work environment cases based on speech have been allowed, the courts viewing the hostile work environment as produced by discriminatory conduct, not speech. (§ 30.1.1.3)

Finally, sometimes statutes or government regulations have attempted to regulate or ban certain kinds of “hate speech” where no other illegal or violent conduct was taking place. Again, the best chance for such a statute would probably be to relate the “hate speech” to certain “secondary effects” to trigger intermediate review. A number of these cases have involved attempt to regulate “hate speech” on university campuses, but in these cases, courts have typically viewed such “hate speech” statutes as unconstitutionally vague. For example, in Doe v. University of Michigan, a district court concluded that words in a university policy requiring that the language must "stigmatize" or "victimize" are “general and elude precise definition.” Further, the "secondary effects" clause of the law required that the language in order to be sanctionable had to "involve an express or implied threat” affecting “an individual’s academic efforts, employment, participation in University sponsored extra-curricular activities or personal safety.” The court noted, “It is not clear what kind of conduct would constitute a ‘threat’ to an individual’s academic efforts.” (§ 30.1.1.4)

FIGHTING WORDS

During the Holmesian deference-to-government era, the Court sustained a conviction in Chaplinsky v. New Hampshire for calling a police officer a "damned Fascist," where a statute banning annoying words was construed to ban only such words as ordinary men know are likely to cause a fight – a breach of the peace. Since Chaplinsky, the Court has not sustained a conviction on the basis of fighting words alone. For example, in 1987, in City of Houston v. Hill, the Court noted that an ordinance that made it unlawful to "oppose, molest, abuse or interrupt any policeman in the execution of his duty" was not limited to fighting words or obscene language, and held that the law was substantially overbroad.

Despite this limited use of Chaplinsky, a few lower federal courts and state courts have upheld convictions, or otherwise failed to protect speech by denying actions for wrongful arrest for speech or imposing civil fines, based upon a “fighting words” rationale, particularly for derogatory comments addressed to police officers, with many of those reported cases involving comments by racial minorities. Even when the defendant prevailed, time, money, and energy had to be expended on the defense. For these reasons, some commentators have argued that Chaplinsky continues to represent a threat to free speech values and should be overruled. (§ 30.1.2)
OBSCENITY

Another area lacking First Amendment protection is obscenity. During the formalist and Holmesian eras, the Court did not define "obscenity" precisely. For example, in 1942 in Chaplinsky, the Court merely stated that the "lewd and obscene" are among "certain well-defined and narrowly limited classes of speech, the prevention and punishment of which have never been thought to raise any Constitutional problem." During the instrumentalist era, in 1973, a majority of the Court agreed in Miller v. California on a test for constitutionally obscene speech. The Miller definition of obscenity requires the trier of fact to decide: (a) whether the average person, applying contemporary community standards would find that the work, taken as a whole, appeals to prurient interest, (b) whether the work depicts or describes, in a patently offensive way, sexual conduct specifically defined by the applicable state law, and (c) whether the work, taken as a whole, lacks serious literary, artistic, political, or scientific value. Under Miller, the "contemporary community standards" need not be national; a jury can be instructed to apply standards of their state – but the impact of the materials will be judged by their effect on an average person, rather than one particularly susceptible or sensitive.

The Court in the modern natural law era has clarified Miller by holding that the community standard applies only to the first branch of the test, which relates to prurient interest. Whether the work is "patently offensive" under the second branch is determined by a jury under a reasonable person standard, and not by community standards. Whether the work "lacks serious value" is determined by the court as a matter of law, also under a reasonable person test. As a practical matter, whether through VHS, DVD, or Internet access, the adult pornography industry is a multi-billion dollar industry, and even “hard-core” pornography, although officially banned, is available to most who wish to acquire it, in the same manner as many illegal drugs as a practical matter are available to those who wish to purchase them. Despite an occasional prosecution for obscenity involving the sale of adult pornography to a consenting adult, the focus of constitutional law in this area has turned principally to the issue of child pornography and keeping obscene, indecent, or patently offensive images away from children. (§ 30.1.3)

INDECENCY AND CHILDREN

If children are used in the production of pornographic material, the First Amendment does not apply. Given that the purpose of the ban on distribution of materials depicting sexual acts or displays of children is to protect the sexual exploitation of children, the Court held in 1982 in New York v. Ferber that the Miller test is modified so as not to require that the sexual depiction appeal to the prurient interest, or that the conduct be portrayed in a patently offensive manner, or that the material need be considered as a whole. Thus, isolated depictions of children engaging in sexual acts or displays can constitute child pornography under Ferber. Further, while under Miller material that “does no more than arouse, ‘good, old fashioned, healthy’ interest in sex” cannot be obscene, the Court has never indicated that any form of child pornography could meet that test. The state may bar the advertising or sale of child pornography or the possession and viewing of child pornography even in the home.

Indecent or patently offensive material that is considered harmful for children to hear or view is analyzed under standard First Amendment doctrine with the understanding that the state has a
compelling interest in preventing such material from being viewed by children. With respect to libraries and the Internet, the Court has been concerned that attempts to keep non-obscene pornography from children not also bar adults, if there are alternatives that can achieve that result. (§ 30.1.4)

DEFAMATION AND RELATED TORTS

Cases of defamation and related torts involve laws that regulate on the basis of the content of the individual’s speech. Nonetheless, these cases do not involve application of the strict scrutiny approach normally applicable to content-based regulations of speech. Instead, in cases involving defamation and related torts, the Court developed during the instrumentalist and modern natural law eras a number of tests that balance the state’s interest in an effective tort law against the individual’s constitutional interest in the freedom of speech. Although the Court does not make reference to this fact, the balancing done in these cases tracks in rigor a second-order rational review approach, so that where the defamatory act concerns speech about a public official and the constitutional interest in freedom of speech is at its highest, there is a very difficult “actual malice” test to meet, as in New York Times Co. v. Sullivan. Where the plaintiff is a private person and the substance of a defamatory statement makes substantial danger to reputation apparent, the Court held in Gertz v. Robert Welch that the state need not require more than proof of fault, that is, negligence, to find liability, even though the case involves a matter of public concern. However, in recognition of danger from excessive damage awards, a state could permit recovery of presumed or punitive damages only on proof of actual malice. Where the governmental interest in protecting individuals is even stronger and the constitutional interest in free speech is less strong, as in cases that do not involve public officials or matters of public concern, the Court held in Dun & Bradstreet that states can impose liability if fault is shown, and there can be recovery of presumed or punitive damages without showing actual malice. It remains uncertain what rule should be applied in the rare care where the plaintiff is a public official or public figure, but the defamation does not relate to a matter of public concern. (§ 30.2.1.1.A)

In an action to redress an invasion of privacy based on allegedly false reports regarding matters of public interest involving a public official or figure, the Court held in Time, Inc. v. Hill that truth is a complete defense and the plaintiff must prove actual malice, following New York Times Co. v. Sullivan. The Court has not addressed the appropriate standard where the plaintiff is not a public figure or official, but lower courts have split on whether the Sullivan or Gertz test should apply in these “false light” cases. (§ 30.2.1.1.B)

Regarding the tort of invasion of privacy, the Court held in Cox Broadcasting Corp. v. Cohn that civil liability for invasion of privacy by a true publication may not be imposed on a broadcaster for accurately publishing information released to the public in official court records. If private information is illegally intercepted and then delivered to a broadcaster who publishes it, the Court held in Bartnicki v. Vopper that the privacy interests protected by the federal statute were not sufficient to justify its application to a broadcaster of an illegally intercepted communication containing information of public concern where the broadcaster did not illegally intercept the private communication or arrange for its interception. (§ 30.2.1.1.C)
As to other torts, the Court allowed a defendant to be liable for videotaping 15 seconds of the plaintiff’s human cannonball act and playing it on the nightly news. The Court said this was an appropriation of plaintiff’s property. Decisions have also allowed liability for speech under the doctrine of promissory estoppel, as where a newspaper breached a promise of confidentiality to a source who relied on the promise in providing information to the paper. (§ 30.2.1.1.D)

SPEECH RIGHTS OF PRISONERS

Regarding the speech rights of prisoners, standard First Amendment doctrine would suggest that regulations of speech in the non-public forum of a jail should trigger minimum rational review, unless they involve viewpoint discrimination. However, in Beard v. Banks, the Court used second-order rational review, rather than minimum rational review, using a means/end test balancing: (1) the government’s legitimate interest in prison management, (2) the manner in which a regulation achieves benefits, considering less burdensome alternatives, and (3) the burdens imposed on the prisoner, including alternative means of exercising First Amendment rights. For content-neutral regulations affecting prisoners’ out-going mail, the Court adopted in Procunier v. Martinez an intermediate standard of review, which is appropriate, since those regulations affect mail being sent to a public forum or private property. (§ 30.2.1.2)

SPEECH OR POLITICAL ACTIVITY OF GOVERNMENT EMPLOYEES

As developed in Pickering v. Board of Education of Will County, Illinois, and cases following Pickering, a public employee must show that he or she suffered an adverse employment action that was causally connected to participation in a protected activity, such as speaking out on an issue of public concern, in order to establish a claim of unlawful First Amendment retaliation. Once the employee satisfies this initial burden, the burden shifts to the government employer to show a legitimate nondiscriminatory reason for the action, e.g., that the interest of the government in the efficient delivery of its services outweighs the interest of the employee in speaking out, or that the adverse action would have been taken even without the employee’s speech having been made. If the government meets this burden, the burden shifts back to the employee to show that the employer’s actions were in fact a pretext for illegal retaliation.

Because the government has the primary burden under Pickering of defending its decision once the plaintiff has established a prima facie case, this kind of balance reflects what the “base plus six” model of levels of review (Chapter 7) describes as third-order rational review. If the speech is not on a matter of public concern, the government has wide latitude in managing its offices without intrusive oversight. Whether the speech addresses a matter of public concern is determined by its content, form, and context. There have been many cases in which these general principles were applied to particular fact situations. (§ 30.2.2.1)

Prior to the 1960s, the government was given wide latitude to regulate the political activities of government employees under minimum rational review. However, in 1976, in Elrod v. Burns, the Court held that public employees may not be discharged or threatened with discharge solely because of their partisan political affiliation or nonaffiliation. That principle has been extended to hirings, promotions, and transfers of government employees, subject to exceptions where political affiliation is appropriate for the job’s functions, such as being a confidential advisor. (§ 30.2.2.2)
REGULATION OF RADIO AND TELEVISION

In the beginning of broadcast regulation, the Court distinguished between the freedom guaranteed to newspapers and the need for government regulation of the airwaves, based on the rationales of scarcity of broadcast stations and public ownership of the airwaves. Given the greater justification for government regulation, content-based regulations of broadcast radio and television trigger only intermediate scrutiny, not strict scrutiny, as in Red Lion Broadcasting Company v. FCC and FCC v. League of Women Voters. As time has gone by, scarcity has become a less significant issue, and thus the rationale for this different treatment has diminished. The existing precedents, however, have not been overruled. (§ 30.3.1)

Regulation of cable or satellite radio or television stations do not follow the Red Lion approach. Arguments regarding scarcity or public ownership of the airwaves are much less relevant in those contexts. However, the Court has not clarified what should be the standard of review for content-based regulations of cable or satellite broadcasting: intermediate scrutiny with bite, loose strict scrutiny, or regular strict scrutiny. (§ 30.3.1) A loose version of strict scrutiny, calling only for regulations not to be substantially more burdensome than necessary, rather than being the least restrictive alternative, has been used in racial redistricting cases and may become applicable to regulations of cable/satellite broadcasting. (§ 30.4.1)

COMMERCIAL SPEECH

Commercial speech relates to economic transactions, including promotional ads as well as offers. It is not converted into noncommercial speech by occurring in educational, political, or religious contexts, such as an ad for a church, but truly educational, political, or religious speech is analyzed under standard First Amendment doctrine. Until 1975, commercial speech received no First Amendment protection, and under the Equal Protection and Due Process Clauses was given only minimum rational review as an economic regulation. In 1975 in Bigelow v. Virginia, and in 1976 in Virginia State Board of Pharmacy v. Virginia Citizens Consumer Council, the Court held that if information is not in itself harmful, the best means for persons to perceive their own best interests is to open the channels of communication. The Court decided, however, that less than strict scrutiny review should be applied to content-based regulations of commercial speech, because truth may be more easily verified by the disseminator and there is little likelihood of chilling free speech because ads lead to commercial profits.

The current approach to commercial speech doctrine was summarized in 1980 in Central Hudson Gas & Electric Corp. v. Public Service Comm’n. In that case, the Court wrote, “For commercial speech to come within the [protection of the First Amendment], it at least must concern lawful activity and not be misleading. Next, we ask whether the asserted governmental interest is substantial. If both inquiries yield positive answers, we must determine whether the regulation directly advances the governmental interest asserted, and whether it is not more extensive than is necessary to serve that interest.” Under this approach, minimum rational review is given to regulations of unlawful, false, or misleading ads, since, without any special First Amendment protection, they would be viewed as standard economic regulations subject to minimum rational review under the Equal Protection and Due Process Clauses. This remainder of the Central Hudson Gas & Electric Corp. v. Public Service Comm’n...
test is more stringent than regular intermediate scrutiny, since the test requires that the regulation
directly advance the government’s interest, rather than merely substantially advance the
government’s interest. This increase in review is what makes the Central Hudson test an example
of intermediate review with bite as described in the “base plus six” model of review (Chapter 7).
The Central Hudson test applies only to content-based regulations of commercial speech. Content-
neutral time, place, or manner restrictions of commercial speech, like content-neutral regulations
of fully protected speech, are tested under basic intermediate scrutiny. Because commercial speech
is “hardy,” the substantive overbreadth doctrine does not apply so that a statute whose overbreadth
consists of unlawful restriction of commercial speech will not be invalidated on that ground. Several
Justices have insisted that commercial speech deserves the same protection as non-commercial
speech, and the Court has been increasingly vigilant in applying the Central Hudson test. (§ 30.3.2)

SPEECH RELATING TO CAMPAIGN FINANCING AND ELECTIONS

In the realm of speech regarding elections, the Court has focused on three situations: regulations of
contributions and expenditures, disclosure requirements, and regulating the process of nominating
and electing candidates. Where strict scrutiny applies, more liberal Justices have been more willing
to find that regulations are narrowly tailored to advance compelling interests, such as preventing
fraud and corruption. Further, more liberal Justices have been more willing to apply intermediate
review to certain regulations in this area. More conservative Justices have typically ruled in favor
of free speech interests held by the people, candidates, political parties, and other political groups.
Usually they have identified less speech-infringing ways for dealing with the concerns that have led
to the government restrictions. (§ 30.4.2)

Regarding regulation of contributions and expenditures, a version of strict scrutiny has been applied
for limitations on campaign expenditures, while a lower level of scrutiny has been used for
limitations on campaign contributions, since the 1976 foundational case of Buckley v. Valeo.
Because statutory limits on contributions had not been shown to prevent candidates and political
committees from amassing the resources needed for effective advocacy, limitations on contributions
could be regarded as a less severe restriction on freedom of expression than limits on expenditures.
While the exact nature of this lower level was unclear for many years, a 5-Justice majority, including
Justice O’Connor, held in 2003 in McConnell v. Federal Election Commission that a version of
intermediate scrutiny should be used for limitations on contributions. It is unclear whether this
doctrine will survive Justice O’Connor’s retirement from the Court in 2006, or whether Justice
Kennedy’s view that campaign contribution regulations should receive higher than intermediate
review will become the majority approach. (§ 30.4.2.1)

Cases on disclosure requirements have been dealt with under the strict scrutiny, direct relationship,
least restrictive alternative test. Even under this standard, however, disclosure requirements have
usually been upheld as directly related to advancing a compelling interest in preventing corruption
of the political process by secret campaign financing or other kinds of secret behavior. (§ 30.4.2.2)

For speech regarding elections to the legislative and executive branches, the Court applies strict
scrutiny to substantial burdens, and second-order rational review to less than substantial burdens.
Most cases involving the choice and election of candidates have involved some aspect of primary
elections. (§ 30.4.2.3) Speech made during the course of election campaigns by judges raise special
First Amendment problems because, unlike their counterparts in the political branches, judges are expected to refrain from catering to particular constituencies or committing themselves on controversial issues in advance of adversarial presentation. Nevertheless, in Republican Party of Minnesota v. White, a 5-Judge conservative majority applied the same strict scrutiny standard to regulations of elections to the judiciary as is applied to regulations of the legislative and executive branches. (§ 30.4.2.4)

CHAPTER 31: FREEDOM OF ASSEMBLY AND ASSOCIATION

The First Amendment provides, in part, “Congress shall make no law . . . abridging . . . the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.” From this text, the Court has inferred a related First Amendment right of freedom of association. As stated in NAACP v. Alabama ex rel. Patterson, “Effective advocacy of both public and private points of view, particularly controversial ones, is undeniably enhanced by group association.” (§ 31.1) Severe or substantial burdens on associational rights trigger strict scrutiny. However, not being specifically mentioned in the First Amendment, the freedom of association has been regarded as an unenumerated fundamental right related to the textually specific freedom of assembly, so that less severe burdens on associational rights trigger only second-order rational review. (§ 31.2.1)

Cases involving government limitations on individuals’ freedom of association can arise in a number of different contexts. In several cases governments have implemented anti-discrimination policies by imposing membership requirements on private groups. Thus, for example, requiring membership of women in local rotary clubs was held not to interfere with “intimate association” rights because of the organization’s size, purpose, limited selectivity in choosing members, and the fact that many of their activities, including service activities, took place in the presence of strangers. However, the Boy Scouts were allowed to revoke the membership of an avowed homosexual and gay activist on the ground that the presence of that person would affect in a significant way the group’s ability to advocate its negative viewpoint with respect to homosexuality. (§ 31.2.2)

The government has been allowed to sanction knowing membership in groups alleged to pose a threat of imminent violent action under the advocacy of illegal conduct exception to the First Amendment, discussed at § 30.1.1.1. When a threat of lawless activity is not imminent, the First Amendment applies. Recently, lower federal courts have upheld federal statutes making it a crime to provide material support or resources to a foreign terrorist organization. The theory has been that these statutes do not directly ban expressive association, but rather the conduct of providing material support. Thus, they are analyzed as content-neutral regulations of the harmful secondary effects of such conduct under O’Brien’s intermediate scrutiny approach, discussed at § 29.4.1. Under such intermediate scrutiny, the statutes have been upheld as substantially related to curbing the spread of international terrorism, and not substantially more onerous than necessary. (§ 31.2.3)

Cases involving burdens on associational rights also take place in the context of regulations of political parties and elections. Where the burden is substantial, strict scrutiny applies, as was true where a referendum converted the state’s primary election from a closed primary to a blanket primary in which voters could vote for any candidate regardless of the voter’s or the candidate’s party affiliation. Lesser burdens on associational rights trigger less exacting review, as where the
Court upheld Hawaii’s absolute ban on write-in voting. The Court said it imposed only a limited burden on voters’ rights to make free choices and to associate politically through the vote. (§ 31.2.4)

CHAPTER 32: THE RELIGION CLAUSES OF THE FIRST AMENDMENT

The religion clauses of the First Amendment – the Establishment and Free Exercise Clauses – provide that “Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof.” Although these clauses literally apply only to Congress, just as the First Amendment freedom of speech became incorporated into the 14th Amendment Due Process Clause during the 1920s, the First Amendment freedom of religion also became applicable to the states during that time.

THE ESTABLISHMENT CLAUSE

Under the Establishment Clause, four different tests have been used to find an “establishment of religion.” They are: (1) whether the government action has a sole purpose to advance religion, or a principal or primary effect to advance religion, or creates an excessive entanglement between church and state, the so-called Lemon test; (2) whether an objective observer would think the government action was an endorsement of religion; (3) whether the government action is coercing or proselytizing religion; and (4) whether the government action is an unreasonable accommodation of religion given our Nation’s history and traditions. While not a perfect match for the Justices’ views, in general the Lemon test reflects a liberal instrumentalist approach, the “endorsement” test reflects a natural law approach, the “coercion or proselytizing” test reflects a Holmesian approach, and the “history and traditions” test reflects a formalist approach. Thus, the Lemon test is still supported by the liberal instrumentalist Justices currently on the Court, Justices Stevens, Ginsburg, and Breyer, as the precedents decided under Lemon predominantly reflect the liberal policy of a strong separation of church and state. Justice O’Connor advocated replacing the Lemon test with an “endorsement” test, which Justice Souter is willing to follow. Justice Kennedy has focused more on the “coercion” or “proselytizing” of religion. Chief Justice Rehnquist, and Justices Scalia and Thomas, have wanted the analysis to focus more on specific historical examples of accommodation between church and state at the time the Constitution was ratified, as well as specific legislative and executive traditions since ratification. That will likely be the approach of Chief Justice Roberts and Justice Alito. (§ 32.1)
CASES ON AID TO RELIGIOUS SCHOOLS

During the Holmesian deference-to-government era, in 1947, a 5-4 Court upheld in *Everson v. Board of Education* an ordinance that reimbursed parents for the cost of transportation to school, including parochial schools. The majority discussed the history of how law had related to religion in Europe and the American colonies, and noted that the Establishment Clause means that neither the federal government nor a state could set up a church, aid one religion or all, or prefer one over another, influence or punish a person with respect to attending church or professing belief or disbelief in any religion, levy a tax to support religious activities or institutions, or participate in the affairs of religious organizations or groups and vice versa. On the other hand, the majority noted that the Establishment Clause only requires neutrality, not hostility, toward religion. A state may extend its general state law benefits, including fire and police protection, to all its citizens and to all its businesses and charitable organizations, including churches, without regard to religious faith. The majority then classified aid for getting children to school as a general state law benefit. Dissenters spoke of the need for a stronger wall of separation between church and state.

During the instrumentalist era, the Court adopted a more vigorous approach to separation of church and state issues generally. For example, in 1962, in *Engel v. Vitale*, the Court struck down a policy of having teachers, at the beginning of each school day, say a non-denominational prayer. In 1963, in *School District of Abington Township v. Schempp*, the Court struck down a Pennsylvania law that required that at least 10 verses from the Holy Bible shall be read, without comment, at the opening of public school on each school day, with children to be excused upon the written request of their parents or guardian. Regarding aid to religious schools, a number of instrumentalist-era cases struck down statutes that had the effect of providing some benefit to schools run by religious organizations, such as loans of instructional materials or money for field trips, since that aid could be used for religious as well as secular education. The Court permitted statutes that provided secular books to religious schools, since those books could not be used to teach religious material. (§ 32.1.3.1.A)

Since 1986, in the modern natural law era, there has been a decline in the percentage of cases where government action regarding aid to religious schools has been struck down under the Establishment Clause. In a representative, and important, school aid case, Justice O’Connor’s opinion for the Court in 1997 in *Agostini v. Felton* upheld a federal program that channeled money to local agencies to provide remedial education, guidance, and job counseling to students who reside in low income areas and who were failing or at risk of failing, regardless of whether the children attended public or private schools, including religious schools. The teachers were public employees. They were instructed not to introduce any religious matter into their teaching or become involved in the religious activities of the schools. Justice O’Connor observed that certain disqualifying fact characterizations, such as that teachers in this kind of program will inevitably teach religion, have been rendered obsolete by experience, and she overruled earlier cases, such as *School District of Grand Rapids v. Ball*, that had held such a program violated the Establishment Clause. She said that this kind of program does not provide incentives for persons to attend parochial schools where the aid is allocated on the basis of neutral, secular criteria that neither favor nor disfavor religion, and where it is made available to religious and secular beneficiaries on a nondiscriminatory basis. (§ 32.1.3.1.B.1)
RELIGIOUS INFLUENCE IN PUBLIC SCHOOLS

Another kind of Establishment Clause case involves religious influence within the public schools. In 1962, in *Engel v. Vitale*, the Court struck down a policy of having teachers, at the beginning of each school day, say a non-denominational prayer. Students were not compelled to join in the prayer over their parents’ objection. Carrying forward that holding was the decision in *Lee v. Weisman* in 1992 that prayers could not be offered at a high school graduation. Even further, in 2000 in *Santa Fe Independent School District v. Doe*, the Court did not allow a high school to select a student speaker before a football game who was invited and encouraged to give a religious message. The Court said this was impermissible endorsement of religion under the “endorsement” test and also coercive under the “coercion or proselytizing” test. A current controversy is whether teaching “Intelligent Design” in public schools is banned by the First Amendment under these tests.

During the instrumentalist era, concern about possible violation of the Establishment Clause was used by some public schools as a justification for refusing to allow groups with a religious perspective to use school facilities. However, since 1986, that justification has not been successfully invoked where the Court has concluded that denial of equal access to school facilities violated the free speech rights of such groups. For example, in 1993, in *Lamb’s Chapel v. Center Moriches Union Free School District*, the Court held that a school district violated the First Amendment freedom of speech when it excluded a bible club from presenting films in a public forum opened by the school. In 1995, in *Rosenberger v. Rector and Visitors of the University of Virginia*, the Court held that a state university would not violate the Establishment Clause if it funded the publication of a wide variety of student newspapers, including one that expressed religious viewpoints. Justice Kennedy wrote that such a program would be neutral with respect to religion. (§ 32.1.3.1.B.2)

DISPLAY CASES

Not surprisingly, during the instrumentalist era, the pattern of results in the display cases mirrored those in the school aid cases. Liberal instrumentalist Justices found most displays unconstitutional if they contained a religious element. Justice O’Connor focused on whether the displays constituted a government “endorsement” of religion. The formalist perspective focused on whether the displays were consistent with our Nation’s history and traditions.

Reflecting these perspectives, in 1980, in *Stone v. Graham*, a 5-4 Court held that the display of a copy of the Ten Commandments on the walls of public classrooms violated the Establishment Clause as its sole purpose was to advance religion. The decision was *per curiam*, and summarily reached without full briefing and argument. Chief Justice Burger, and Justices Stewart and Blackmun, indicated they would grant certiorari and give the case full consideration. Justice Rehnquist filed a full dissenting opinion, stating that the statute did have a secular purpose of acknowledging the role that our religious heritage, and in particular the Ten Commandments, has played in the social, cultural, and historical development of our Nation. In 1984, in *Lynch v. Donnelly*, a 5-4 Court allowed a creche to be included in a large Christmas display sponsored by a city and held in a private park. Reciting numerous historical examples of “official acknowledgment by all three branches of government of the role of religion in American life,” Chief Justice Burger spoke of the display as giving benefit to religion only in a way that was “indirect, remote, and incidental.” Justice O’Connor did not find an endorsement in *Lynch* because a creche is a traditional
symbol of Christmas, and was accompanied here by many secular elements, such as a banner proclaiming “Season’s Greetings” and, as the dissent acknowledged, a miniature village, including a “Santa Claus' house, a talking wishing well, and cut-out clowns and bears.” (§ 32.1.3.2.A)

Since 1986, the endorsement theory of Justice O’Connor has gained adherents and has been the key factor in several display cases. For example, in 1995 in Capitol Square Review and Advisory Board v. Pinette, the Court allowed a private party (the Ku Klux Klan) to display an unattended religious symbol (a cross) in a traditional public forum (Capital Square, next to the statehouse). Reflecting the controlling votes in the case, Justice O’Connor, concurring, joined by Justices Souter and Breyer, noted that under her endorsement test the presence of a sign disclaiming government sponsorship or endorsement of the Klan cross helped make clear to the community the state’s role. In 2005, in McCreary County, Kentucky v. American Civil Liberties Union of Kentucky, a 5-4 majority composed of Justices Stevens, O’Connor, Souter, Ginsburg, and Breyer held that posting a version of the Ten Commandments in a courthouse was unconstitutional as its “primary purpose” was to advance religion. Again, reflecting the controlling vote in the case, Justice O’Connor, concurring, noted that the “primary purpose” behind the county's display was relevant because, under her endorsement test, it conveyed “an unmistakable message of endorsement to the reasonable observer.” Justice Scalia, joined by Chief Justice Rehnquist and Justice Thomas, would have upheld the display of the Ten Commandments based on a “history and traditions” formalist approach. Justice Kennedy concluded that the posting did not amount to “coercion or proselytizing” of religion. Departing from his usual natural law approach to constitutional interpretation, Justice Kennedy has routinely rejected the “endorsement” test in favor of adopting the Holmesian view of asking whether any display amounts to “coercion or proselytizing” of religion.

In Van Orden v. Perry, decided the same day as McCreary, the Court allowed a plaque of the Ten Commandments to be included among 16 other plaques on the grounds in front of the Texas Capitol building. Although Justice O’Connor concluded the plaque constituted endorsement of religion, Justice Breyer switched his vote from McCreary on the ground that the circumstances surrounding the display’s placement on the capitol grounds and its physical setting suggested that the state was conveying a message about the historic relation between the standards of the Ten Commandments and the law. It seems likely that a similar result would follow because of the nation’s history in relation to use on coinage and currency of “In God We Trust,” and perhaps the phrase “Under God” in the Pledge of Allegiance. With Justice O’Connor’s retirement from the Court, and given the predicted voting pattern as a Holmesian for Chief Justice Roberts and formalist for Justice Alito, the controlling votes on the Court in Establishment Clause cases may now be, at least for a while, Justice Kennedy’s “coercion or proselytizing” test, rather than Justice O’Connor’s “endorsement” test. (§ 32.1.3.2.B)

FREE EXERCISE CLAUSE

WHAT IS RELIGION

The Court has stated many times that the Free Exercise Clause of the First Amendment applies to protect individuals’ “sincerely held religious beliefs” from regulation by the government. In deciding cases, the Court has been quite willing to assume for purposes of the litigation that the person’s statement that something is a religious belief is “sincerely held.” Indeed, the belief can be
“sincere” even if it is not held by most believers of that person’s religious faith, as long the individual before the court sincerely holds the view. Further, the relevant question is whether the individual “sincerely holds” the belief, not whether a jury, or anyone else, would conclude that belief is true or false. As the Court stated in United States v. Ballard, “Heresy trials are foreign to our Constitution. Men may believe what they cannot prove. They may not be put to the proof of their religious doctrines or beliefs. Religious experiences which are as real as life to some may be incomprehensible to others. Yet the fact that they may be beyond the ken of mortals does not mean that they can be made suspect before the law.”

In terms of what counts as a “religious belief,” a formalist-era Court stated in 1890 in Davis v. Beason that "the term 'religion' has reference to one's views of his relations to his Creator, and to the obligations they impose of reverence for his being and character, and of obedience to his will." This definition suggested a monotheistic view of religion. During the instrumentalist era, the Court defined the term more broadly to include a range of monotheistic and non-monotheistic beliefs. For example, in 1965, in United States v. Seeger, the Court interpreted the term “religious belief” in the Universal Military Training and Service Act to include any “given belief that is sincere and meaningful [and] occupies a place in the life of its possessor parallel to that filled by the orthodox belief in God.” Inferences from Justice Scalia’s dissent in 2005 in McCreary, joined by Chief Justice Rehnquist and Justice Thomas, suggests disagreement with these instrumentalist-era views, and would grant Free Exercise Clause protection only to those who believe in monotheistic religions, treating agnostics, atheists, non-monotheistic believers, or believers in “unconcerned deities [e.g., Deists]” as outside the protection of the Free Exercise Clause.

Any attempt to limit the free exercise of religion to only monotheistic views is reminiscent of the free speech views of John Milton in the 17th century, who was prepared to grant free speech to individuals, but not for speech he disagreed with – in his case, “popery, open superstition, impiety, or evil.” Similarly, in John Locke’s A Letter on Toleration in 1689, he justified “placing restrictions on Catholics because of their mixed allegiance, and justified not extending tolerance to atheists because atheists do not have the moral scruples to be trusted in civil society where rights are viewed as having derived from God, and because the atheist has no fear of a future state of punishment.” In any event, any limited view on what beliefs are protected by the Free Exercise Clause would likely be relatively futile in practice. Many Free Exercise Clause claims can be reformulated as “equal treatment” or “equal access” claims under the First Amendment freedom of speech or the Equal Protection Clause. For example, the access of religious groups to public school facilities and support in Lamb’s Chapel, Rosenberger, and other such cases, noted at § 32.1.3.1.B.2, technically involved the First Amendment freedom of speech, not the Free Exercise Clause. Furthermore, as a matter of Court precedents, as phrased by Justice Stevens in Wallace v. Jaffree, “[T]he Court has unambiguously concluded that the individual freedom of conscience protected by the First Amendment embraces the right to select any religious faith or none at all.” (§ 32.2.1)
STRICT SCRUTINY OR RATIONAL BASIS REVIEW

During the formalist and Holmesian eras, the protection given free exercise of religion mirrored a minimum rational review level of scrutiny. In 1963, in *Sherbert v. Verner*, the instrumentalist-era Court increased the level of protection to strict scrutiny. In *Sherbert*, a state had refused unemployment compensation to an individual, a member of the Seventh-Day Adventist Church, on the ground that she had failed, without good cause, to accept available suitable work when offered, that is, she would not work on Saturday, the sabbath day of her faith. Justice Brennan said that the effect of the law was to put pressure on appellant to forgo the practice of her religion.

Despite this application of strict scrutiny, during the instrumentalist era courts upheld a number of cases of government actions burdening religious beliefs as satisfying a compelling government interest, least restrictive alternative analysis. For example, in *United States v. Lee*, the Court held that Congress could require all employers, including Amish employers, to pay social security taxes, even if such payments would violate the Amish’s religious beliefs. Congress had granted self-employed Amish an exception from participation in the Social Security program, but the choice not to extend that exception to Amish employers was for Congress to make. Similarly, the Supreme Court, and lower federal courts, upheld against free exercise challenges other aspects of economic regulations, such as application of the Fair Labor Standards Act requirements on minimum wages and record keeping requirements to religious organizations conducting “ordinary commercial activities,” or application of other aspects of the tax code.

During the modern natural law era, in 1990, in *Employment Division v. Smith*, the Court reverted to minimum rational review for a law of general applicability that only incidentally burdened the free exercise of religion. The Court concluded strict scrutiny should be used only for: (1) unemployment compensation cases involving denial for refusing to work for religious reasons, such as working on one’s sabbath, as in *Sherbert v. Verner*, based on that precedent being “settled law”; (2) cases involving “hybrid” claims, that is, claims based on a conjunction of free exercise claims combined with other constitutional protections, such as freedom of speech, or, as in *Wisconsin v. Yoder*, the right of parents to direct the education of their children, where the related right would trigger strict scrutiny on its own; or (3) cases involving direct discrimination against religion.

Reacting to the *Smith* case, Congress passed the Religious Freedom Restoration Act of 1993. It called for courts to use strict scrutiny whenever any government substantially burdens a person’s exercise of religion, even if the burden results from a law of general applicability. In *City of Boerne v. Flores*, the Court declared the law invalid as applied to state laws. Congress had sought justify the law as an exercise of power under § 5 of the 14th Amendment (Chapter 28). The Court said that for Congress to exercise its § 5 enforcement power there must be congruence and proportionality between the injury to be prevented and the means adopted to that end. Here, there was no sufficient record of modern instances of laws passed because of religious bigotry. Justice O’Connor said that *Smith* was wrong and should be re-examined, as did Justices Breyer and Souter. (§ 32.2.2.5)

Congress did not surrender. Within three years, Congress passed the Religious Land Use and Institutionalized Persons Act of 2000 (RLUIPA). That Act requires strict scrutiny of all laws regarding any land use regulation or prison regulation that imposes a substantial burden on religion if: (1) that burden affects, or removal of that burden would itself affect, interstate commerce; or (2)
the burden is imposed in a program or activity receiving federal financial aid; or (3) the burden is imposed in implementation of any regulation that permits individual assessments of the proposed property use. The Act also requires strict scrutiny in any case involving a substantial burden on the religious exercise of a person residing in or confined to an institution that received federal financial assistance or affects commerce with foreign Nations, among the several states, or with the Indian tribes. The new statute does not purport to be an exercise of § 5 power.

The validity of this legislation from the perspective of the Establishment Clause was considered in the context of a prison regulation in Cutter v. Wilkinson. In Cutter, the Court ruled unanimously that the statute was merely an attempt to respect the free exercise rights of prisoners, and did not create an Establishment Clause problem as long as the statute did not “elevate accommodation of religious observances over the institution’s need to maintain order and safety.” Although the Court did not address the issue in Cutter, it seems likely the other aspects of the statute, in addition to the provisions regarding prison regulations, are valid under Congress’ Commerce Clause and Spending Clause powers. The Act as applied to prisons receiving federal financial assistance is almost certainly valid under a Spending Clause analysis (§ 18.3), as is activity affecting interstate commerce under the Commerce Clause (§ 18.2.5). The Commerce Clause also probably makes valid the Act as applied to real estate interests that form part of the housing market. (§ 32.2.2.5)

The Court has been clear that while the government can sometimes grant a religious exemption, or provide for a compelling government interest analysis in statutes otherwise constitutional, the government is under no necessary obligation to do so. For example, as held in Locke v. Davey, the government may deny a public scholarship to an otherwise eligible applicant solely because the applicant planned to use the monies to study for the ministry at a church-related school. (§ 32.2.2.5)

PART II: HOW TO USE THE ET AND ITS CONTENTS

USE OF THE ET

INTRODUCTION

The entire E-Treatise is on a single PDF file that will appear in the middle or on the right hand side of the screen. The Adobe Acrobat program, in which the PDF file is recorded, allows movement in the text through movement icons and links. Also, you may use the search function to look through the book for any page, topic, name, section, or Chapter.

When you open the ET you will be on the title page. The title page identifies various portions of the book to which you can move by putting your cursor under the page number of the relevant topic and making a left click. The operational section looks like this:
CONTENTS
[Left click on a number to go to that page]

PREFACE 2 TABLE OF CONTENTS 1631

2018 SUPPLEMENT FOR THE PATH OF CONSTITUTIONAL LAW 2041

After you have reached a page of text that you wish to examine, you may move up or down on that page by using the arrows at the top or bottom of the right hand column or by dragging the box that appears between the arrows. You may move to any Section or Chapter referred to in the text by making a left click when the cursor points upward to that reference. You may return to the home page by clicking on the vertical bar on the left hand side of the tool bar which appears at the top of the page. You may move to a previous page by clicking on the left-arrow circle that appears in the tool bar at the top of the page.

HELP IN USING THE MANY FEATURES OF THE ET

[The Help materials in the Companion Book to The Path of Constitutional Law appear in the ET under the file heading “Help,” which can be accessed by clicking on this link: Help]

CONTENTS OF THE ET

The ET contains the usual aids to users, including a preface, help materials for using the ET on Adobe Reader, and summary of themes. The ET then contains the full text of the book, along with a New Justices Addendum on Justices who joined the Court after the 2005 Term – Chief Justice Roberts, and Justices Alito, Sotomayor, Kagan & Gorsuch. The ET also contains a Table of Justices listing all 113 Justices who have served on the United States Supreme Court from 1789-2018.

The ET also contains a detailed Table of Contents, Table of Cases, Name Index, Subject Matter Index, Annotated Constitution, Dedication, Author Information, Acknowledgments, Note on Citation, and an Executive Summary, which is the text of the Companion Book to the E-Treatise. All of these sources may be accessed from the Title Page, Page 1 by clicking on links on that page.

PART III: ANNOTATED CONSTITUTION

[The Annotated Constitution materials in the Companion Book to The Path of Constitutional Law appear in the ET under the file heading, “Annotated Constitution,” which can be accessed by clicking on this link: Annotated Constitution]
This 2018 Supplement updates *The Path of Constitutional Law: An E-Treatise* by discussing significant constitutional cases decided by the United States Supreme Court, and other developments in constitutional law, since the cut-off date of the E-Treatise – October, 2006. This involves cases during the 2006-2017 Terms of the Court (from October 2006 - June 2018), along with noteworthy cases decided by lower federal courts or state courts, government action, or academic commentary through June 2018. The Supplement is organized by reference to the section number, page number, and footnote cites in the E-Treatise where earlier cases/articles on the same topic are discussed. A Table of Cases & Name Index for the Supplement appear at the Supplement’s end, along with Current Events on some specially noted political developments or judicial opinions (additions noted in Supplement by numbered links A1, A2, etc.).

Reference is made throughout the Supplement to aspects of the predispositions of the four judicial decisionmaking styles: formalism, Holmesian, natural law, and instrumentalism. Those predispositions are discussed throughout the E-Treatise, with particular focus in Chapter 9 (formalism); Chapter 10 (Holmesian); Chapter 11 (instrumentalism); and Chapter 12 (natural law). A good summary of these predispositions appears at § 6.4.4, including Tables 6.4.1 & 6.4.2.

**Lower Courts’ Obligation to Follow Supreme Court Precedent**

§ 4.3.4, page 94, n.100: In *Bosse v. Oklahoma*, 137 S. Ct. 1 (2016) (*per curiam*), the Supreme Court affirmed the *Rodriguez* principle that a lower court should follow existing Supreme Court precedent, even if it appears to conflict with later decisions, since it is “this Court’s prerogative alone to overrule one of its precedents.”

**Application of the Rule of Lenity for Criminal Statutes**

§ 5.2.2.1.C, page 108, end of section: In *Shaw v. United States*, 137 S. Ct. 462 (2016), the Supreme Court held a defendant can still be guilty of bank fraud even if the defendant’s intent was only the cheat the bank’s customer, not the bank itself, since the bank has a property interest in the customer’s deposits. The statute was clear that “knowingly . . . to defraud” was all that was required, not “purpose” to defraud the bank; hence, there was not sufficient ambiguity in the statute to trigger the “rule of lenity” in interpreting criminal statutes.

**Deference to an Agency’s Interpretation of Regulations**

§ 6.2.3.1, page 154, text following n.84: In *Federal Express Corp. v. Holowecki*, 128 S. Ct. 1147 (2008), an employee had filed an information questionnaire and an attached affidavit asking the Equal Employment Opportunity Commission (EEOC) to “please force Federal Express to end their age discrimination.” Giving deference to the practices of the agency, Justice Kennedy held for a 7-2 Court that what plaintiff filed was properly construed as a request for the agency “to take remedial action to protect the employee’s rights or otherwise settle [the] dispute.” *Id.* at 1157-61. Adopting a formalist focus on literal text, and a concern with clear, bright-line rules, discussed in the E-Treatise at § 9.2.1.1 nn.4-6, Justice Thomas concluded that plaintiff had not filed a “charge” since “the filing at issue in this case did not state that it was a charge and did not include a charge form; to the contrary, it included a form that expressly stated it was for the purpose of ‘pre-charge’ counseling.” *Id.* at 1161 (Thomas, J., joined by Scalia, J. dissenting). Thomas expressed concern that no one can tell precisely whether a filing is a charge. *Id.* at 1168. Justice Alito joined the majority opinion, which reflected more Holmesian deference to legislative/executive practice, for which he has a slight affinity, as discussed in “New Justices Addendum,” page 1627, nn.31-33.

In *Christopher v. SmithKline Beecham Corp. d/b/a Glaxo-SmithKline*, 132 S. Ct. 2156, 2165-69 (2012), a 5-4 Court held that pharmaceutical sales representatives qualify as outside salespersons to which the Fair Labor Standards Act (FLSA) provisions on overtime compensation do not apply, despite a contrary Department of Labor (DOL) regulation. The DOL’s view was not entitled to *Auer* deference because of inconsistencies with the language of the FLSA, lack of public participation in development of the regulation, and unfair surprise to pharmaceutical companies given traditional practice. Without regard to *Auer* deference, the 4-Justice dissent concluded the language of the FLSA treats these salespersons as covered. *Id.* at 2174-79 (Breyer, J.,
joined by Ginsburg, Sotomayor & Kagan, JJ., dissenting). See also Encino Motorcars, LLC v. Navarro, 136 S. Ct. 2117 (2016) (while agencies are free to change policies, longstanding policies may have “engendered serious reliance interests,” and “[u]nexplained inconsistency” in a policy change is a “reason for holding an interpretation to be an arbitrary and capricious change” which receives no Chevron deference); Decker v. Northwest Environmental Defense Center, 133 S. Ct. 1326 (2013) (Auer deference applied to the EPA’s interpretation of its own Clean Water Act rules); City of Arlington v. FCC, 133 S. Ct. 1863 (2013) (Chevron deference applies to an agency’s interpretation of its own jurisdiction); id. at 1877 (Roberts, C.J., joined by Kennedy & Alito, JJ., dissenting) (no deference until court decides agency has jurisdiction). The majority’s view mirrors arbitration law, where deference applies to an arbitrator’s decision the arbitrator has jurisdiction. See Rent-A-Center West, Inc. v. Jackson, 130 S. Ct. 2772, 2777 (2010). Perhaps because Chevron and Auer favor interpretations of the current Administration, conservative Justices increasingly raised concerns about the doctrines from 2008-2016. See United Student Aid Funds, Inc. v. Bible, 136 S. Ct. 1607 (2016) (Thomas, J., dissenting from denial of certiorari) (citing his, Roberts, C.J., and Scalia, J., concerns); Gutierrez-Brizuela v. Lynch, 834 F.3d 1142, 1149-58 (10th Cir. 2016) (Gorsuch, J., concurring); United States Telecom Ass’n v. FCC, 855 F.3d 381, 417-26 (D.C. Cir. 2017) (Kavanaugh, J., dissenting from denial of rehearing en banc).

For more cases on agency authority to regulate, see EPA v. Homer City Generation, 134 S. Ct. 1584 (2014) (Chevron deference given to EPA interpretation regulating pollution emitted in one state causing harm in other states) (Scalia, J., joined by Thomas, J., dissenting) (Alito, J., took no part in the consideration or decision of the case); Utility Air Regulatory Group v. EPA, 134 S. Ct. 2427 (2014) (Chevron deference given to EPA regulations of greenhouse gases for sources already regulated for conventional pollutants, which covers over 95% of regulated sources, but unreasonable to assert statutory authority to apply regulations to new sources solely on basis of greenhouse gas emissions); id. at 2449-50 (Breyer, J., joined by Ginsburg, Sotomayor & Kagan, J., concurring in part and dissenting in part) (Chevron deference should be given to regulations of both sources); id. at 2455 (Alito, J., joined by Thomas, J., concurring in part and dissenting in part) (unreasonable to apply regulations to both sources); Perez v. Mortgage Bankers Ass’n, 135 S. Ct. 1199 (2015) (agencies need not follow notice-and-comment rulemaking for new interpretation of regulations, just as they do not for initial interpretation, abrogating Paralyzed Veterans of America v. D.C. Arena L.P., 117 F.3d 579 (D.C. Cir. 1997)); Michigan v. EPA, 135 S. Ct. 2699 (2015) (unreasonable for EPA not to consider “costs” before deciding “whether” regulation is “appropriate and necessary” under the Clean Air Act); id. at 2714-15 (Kagan, J., joined by Ginsburg, Breyer & Sotomayor, JJ., dissenting) (taking “costs” into account in deciding “how much to regulate” adequate); Texas v. United States, 809 F.3d 134 (5th Cir.2015) (preliminary injunction granted preventing implementation of policy directive providing legal presence for illegal immigrants who are parents of citizens or lawfully permanent residents which was adopted without notice-and-comment rulemaking), aff’d by equally divided court, 136 S. Ct. 2271 (2016); Clean Air Council v. Pruitt, 862 F.3d 1 (D.C. Cir. 2017) (2-1 panel decision) (EPA’s decision to stay implementation of portions of a final rule concerning methane and other greenhouse gas emissions without notice-and-comment rulemaking invalid as “arbitrary, capricious, [and] in excess of . . . statutory . . . authority.”).

Use of Legislative History to Help Interpret a Statute

§ 6.2.3.1, page 155, text following n.87: Consistent with the observations in the E-Treatise, in Samantar v. Yousuf, 130 S. Ct. 2278, 2291-92 (2010), a majority of the Court used legislative history to help confirm the text and purpose of a statute, even where the text and purpose, considered alone, were not ambiguous or vague. The three formalist Justices on the Court – Justices Scalia, Thomas, and Alito – all wrote separate concurrences criticizing the use of legislative history. Id. at 2293 (Alito, J., concurring); id. at 2293 (Thomas, J., concurring in part and concurring in the judgment); id. at 2293 (Scalia, J., concurring in the judgment).

Natural Law Interpretation as the “True Originalist” Approach to Constitutional Interpretation

§ 6.3.4, page 166, end of section; § 7.1 n.4, page 175; § 8.4.2.2, page 276, end of section: For further discussion of Madison’s natural law style of interpretation reflecting a “true originalist” form of interpretation, and its difference from Thomas Jefferson’s more formalist approach, see R. Randall Kelso, Contra Scalia, Thomas, and Gorsuch: Originalists Should Adopt A Living Constitution, 72 U. Miami L. Rev. 112 (2017) (available at: http://libguides.stet.edu/kelsomaterials).
Substantially Flawed Reasoning Part of Whether Decision Was Substantially Wrong

Supreme Court’s Teague Doctrine Does Not Limit Collateral Relief in State Courts

§ 7.3.4.1, page 226, text following n.222: In Danforth v. Minnesota, 128 S. Ct. 1029, 1032-33 (2008), a 7-2 Court held that the Teague doctrine is based on the Court’s statutory and prudential authority to regulate remedies provided in federal courts, not constitutional authority over state courts. Thus, state courts are free to adopt their own standards for retroactive application of Court decisions, consistent with a conservative predisposition for states’ rights and instrumentalist support for new rights to be applied retroactively to existing cases. The dissent viewed the Teague doctrine as a matter of substantive federal law, thus binding on states under the Supremacy Clause. Id. at 1047-48 (Roberts, C.J., joined by Kennedy, J., dissenting).

Demographics of Supreme Court Justices

§ 7.4.2, page 231, text preceding n.233: Given confirmation in 2009 of Justice Sonia Sotomayor, who is Catholic, and in 2010 of Justice Elena Kagan, who is Jewish, from 2010-16 there were 6 Catholics and 3 Jews on the Court, meaning for the first time there were no Protestants. With Justice Scalia’s death on February 13, 2016, and his replacement by Justice Neil Gorsuch on April 10, 2017, the Court had 5 Catholics, 3 Jews, and 1 Episcopalian. This is still true, as Justice Kennedy’s replacement, Justice Brett Kavanaugh, sworn in October 6, 2018, is also Catholic. Overall, 4 women and 110 men have served on the Court. For discussion of all of the post-2006 additions to the Supreme Court, see “New Justices Addendum” at pages 1627-1628.

Appointment of Federal Court Judges

§ 7.4.2, page 234, end of section: Given increased use of filibusters to block judicial and executive appointments, the Senate Democratic majority voted 52-48 on November 21, 2013 to change filibuster rules to prevent filibusters on all nominations of lower federal court judges and executive branch officials. Filibusters were preserved for nominations to the Supreme Court. To overcome a Democratic filibuster, the Republican-controlled Senate voted on April 6, 2017 to prevent filibusters on Supreme Court nominations as well, paving the way for Justice Neil Gorsuch to be confirmed on a 54-45 vote. While the privilege of a Senator from a state to block a vote on a nomination of a judge from their state to a district court or Court of Appeals position was preserved, in 2018 Republicans removed that privilege in some Court of Appeals nominations, while preserving it for district court judges, whose jurisdiction would be all within that Senator’s state. The President’s power to make “recess” appointments was limited, to an extent, in NLRB v. Noel Canning, 134 S. Ct. 2550 (2014), discussed in this Supplement at § 19.4.3.1, n.112.

Discretionary Appeal by Certiorari and Direct Appeal to the Supreme Court

“Caustic” Language Used in Supreme Court Opinions

Deciding Cases in the Lower Federal Courts

§ 7.4.3, page 238, n.251: On randomness of judicial assignment, see Adam S. Chilton & Marin K. Levy, Challenging the Randomness of Panel Assignment in the Federal Courts of Appeals, 101 CORNELL L. REV. 1 (2015); Tod C. Peppers, Katherine Vigilante & Christopher Zorn, Random Chance or Loaded Dice: The Politics of Judicial Designation, 10 U. N.H. L. Rev. 69 (2012) (analyzing cases from 1925-1988). Unlike Supreme Court practice, where a Justice must be alive when the opinion is announced for the vote to count, for lower federal courts the judge’s vote may count if the judge has completed work on a case, even if the judge dies before the opinion is announced and the judge’s vote is critical for a majority. See Rizo v. Yovino, 887 F.3d 453, 455 n.* (9th Cir. 2018); Montiero v. City of Elizabeth, 436 F.3d 397, 399 n.* (3rd Cir. 2006).

Given the increased workload of federal courts, but few judicial positions added, the practice has increased of asking “senior” judges – judges who have retired from full-time service – to aid deciding cases, particularly sitting on three-judge appellate panels. Although unlikely to be adopted by the Court, given practice and precedent, one article has argued such use is unconstitutional. David R. Stras & Ryan W. Scott, Are Senior Judges Unconstitutional?, 92 CORNELL L. REV. 453 (2007) (problem of “bureaucratic senior judge,” who performs administrative duties, and “itinerant senior judge,” who sits on courts outside home district or circuit). But see Hon. Betty Binns Fletcher, A Response to Stras & Scott’s Are Senior Judges Unconstitutional?, 92 CORNELL L. REV. 523 (2007) (concerns are much ado about nothing). See also Radar v. ING Groep, N.V., 497 F. App’x 171 (3rd Cir. 2012), cited at 82 U.S.L.W. 3465 (Feb. 11, 2104) (designating district court judge residing in 5th Circuit to 3rd Circuit panel did not violate Constitution or 28 U.S.C. §§ 44, 46, 292). Consistent with practice, retired Justices O’Connor and Souter have continued to sit on Court of Appeals panels (more than 175 cases for O’Connor and more than 400 for Souter).

Judicial Recusal

§ 7.4.4, page 240, text following n.258: In Caperton v. A.T. Massey Coal Co., Inc., 129 S. Ct. 2252 (2009), a 5-4 Supreme Court held that Justice Benjamin of the West Virginia Supreme Court violated the Due Process Clause when he denied a motion to recuse himself where he was the key vote to reverse a trial court judgment of $50 million against a company whose president had contributed $3 million to his campaign for election. Justice Kennedy noted the importance of objective standards that do not require proof of actual bias, and there was a serious risk of bias because a person with a personal stake in a case had a significant influence in the judge’s election by contributing a large proportion of campaign funds. Id. at 2259-67. Reflecting Holmesian and formalist preference for certainty and predictability, the dissent refused to extend Due Process beyond two “well established” rules: a judge may not preside over a case in which he or she has a direct, personal, substantial pecuniary interest, and a judge may not preside over a criminal contempt case that resulted from the defendant’s hostility toward the judge. Id. at 2267-72 (Roberts, C.J., joined by Scalia, Thomas & Alito, J.J., dissenting). See also Williams v. Pennsylvania, 136 S. Ct. 1899 (2016) (recusal required when judge had significant, personal involvement as a prosecutor in defendant’s case) (Roberts, C.J., and Thomas & Alito, J., dissenting); Rippo v. Baker, 137 S. Ct. 905 (2017) (per curiam) (proper question to ask is whether “the probability of actual bias on the part of the judge is too high,” not whether the judge is actually biased); In re Chinniah, 670 Fed. App’x 59 (3rd Cir. 2016) (party’s dissatisfaction with prior ruling no basis for recusal); L.G. v. S. L., 88 N.E.3d 1069 (Ind. 2018) (one party’s attorney providing recommendation letter for judge for appointment to state Supreme Court not grounds for recusal).

Formalist/Holmesian Views on International Sources Use in Constitutional Interpretation

§ 9.2.2.1, page 288, n.45 & § 10.2.2.1, page 312, text following n.37: See also Mark C. Rahdert, Comparative Constitutional Advocacy, 56 AM. U.L. REV. 553, 554-60 (2007) (under formalist and Holmesian
positivism, “foreign materials are at best irrelevant to American constitutional law,” which involves “the language, structure, drafting and ratification of the U.S. Constitution . . . .”).

“Originalism” of Justices Scalia and Thomas

Instrumentalist Views on Using International Sources in Constitutional Interpretation

Natural Law Views on Using International Sources in Constitutional Interpretation

Political Considerations Post-2006

§ 14.4, page 462, end of section: The unpopularity of President Bush’s economic and military policies permitted the Democrats to seize majorities in Congress in the 2006 mid-term elections, and for those majorities to increase in the 2008 election, along with the election of Democratic candidate Barack Obama for President. In the short term, the prediction in the E-Treatise of equal competitive balance between Republicans and Democrats is likely to remain, as shown by Republicans taking a majority in the House of Representatives in 2010, a majority in the Senate in 2014, and the close Presidential election in 2016. See A1. In the long term, a society committed to modern natural law values, combined with current demographic trends, is likely to favor more current Democratic policy initiatives, rather than current Republican party traditionalism, as suggested by the discussion in the E-Treatise at § 15.4 & §§ 16.1, 16.2 & 16.3.

Notes on the 2011 “Arab Spring”

§ 15.4.2, page 491, n.87: Consistent with the analysis in the E-Treatise, during the Spring of 2011, a number of countries in the Islamic World had “democratic revolutions,” trying to move their countries either from Stage 2 monarchies into Stage 3 fledgling democracies, or State 4 crony-capitalist states into State 5 pluralistic democracies with general respect for human rights. The success of such efforts, at least through 2018, has been decidedly mixed.

Same-Sex Marriage Around the World

§ 16.1, page 509, end of second full paragraph: Consistent with the analysis in the E-Treatise, between 2006-2010, South Africa, Norway, Sweden, and Argentina joined Belgium, Canada, the Netherlands, and Spain as countries permitting same-sex marriage, and the Mexico Supreme Court said same-sex marriages performed in the state of Mexico City must be given effect across Mexico. By August 2013, Brazil, Denmark, France, Iceland, New Zealand, Portugal, and Uruguay also recognized same-sex marriage, as did Scotland in 2014; England, Wales, Ireland, and Luxembourg in 2015; and Colombia in 2016. Australia, Finland, Germany, and Malta approved same-sex marriage in 2017. A number of other countries recognize some form of civil union or registered partnerships, including Andorra, Austria, Chile, Croatia, Czech Republic, Cyprus, Czech Republic, Ecuador, Estonia, Greece, Hungary, Italy, Japan, Ireland, Israel, Liechtenstein, Northern Ireland, Slovenia, Switzerland, and Taiwan. See generally Same-Sex Marriage Around the World, Encyclopedia Britannica (www.britannica.com). Same-sex marriage became lawful in the entire United States by Obergefell v. Hodges, 135 S. Ct. 2584 (2015), discussed in this Supplement at § 27.3.3.1.A n.181.
Origins of Judicial Review

Alternatives to Judicial Review

§ 17.1.4, page 571, n.67: For an article acknowledging the general triumph around the world of judicial review, but discussing alternatives to complement that power, see Christopher S. Elmendorf, Advisory Counterparts to Constitutional Courts, 56 DUKE L.J. 953 (2007).

International Standards of Judicial Review

§ 17.1.4, page 572, n.68: Rights review in Constitutional Courts around the world use one basic approach: proportionality. See Alec Stone Sweet & Jud Mathews, Proportionality Balancing and Global Constitutionalism, 47 COLUM. J. TRANSNATIONAL LAW 72, 75 (2008). Proportionality analysis has three basic steps: (1) suitability, which examines whether the government action is rationally related to a legitimate government interest; (2) necessity, which asks whether the government has used the least restrictive means to advance its goals, in order to ensure that the government does not burden the right more than is necessary for the government to achieve its goals; and (3) balancing “stricto sensu,” which asks whether the marginal benefit of the government regulation to advance the legitimate public interest is greater than the marginal burden on the individual. Id. at 75-76. A preliminary “fourth step” – entitled “legitimacy” – is used by some courts. Under this step, the “judge confirms that the government is constitutionally-authorized to take such a measure” before continuing to apply the suitability, necessity, and balancing steps of the analysis. Id. at 75. This inquiry into “legitimacy” is best understood as part of the “suitability” inquiry into whether the government is rationally advancing a “legitimate” government interest.

Despite surface differences between American judicial review, summarized in the E-Treatise at § 7.2.1, versus international proportionality review, each approach uses the same building blocks in developing the relevant standard of review. Each is based on a means/end analysis, focusing on the ends the government is seeking to advance and the means by which those ends are advanced. Each focuses on whether the government action is narrowly tailored to not burden individual rights more than is viewed as appropriate. Each is concerned with whether the government’s interests are strong enough to justify the burden on individual rights.

Under the first building block, one has to decide how strong the government end has to be to justify the regulation, and how well do the means have to be drafted to advance that end. Under American constitutional review, there are three answers to these questions. Under minimum rationality review, the government action only has to be rationally related to advancing a legitimate government end, and the challenger bears the burden of proving it is not. Under intermediate review, the government has the burden to justify its action, and the government action must be substantially related to advancing an important or substantial government interest. At strict scrutiny, the government also has the burden to justify its action, and that action must be directly related to advancing a compelling or overriding governmental interest. The international inquiry into suitability – the first stage of proportionality review – tracks a rational review approach by asking whether “the means chosen and the ends pursued is rational and appropriate, given a stated policy purpose.” Id. at 75.

As with means/end reasoning, there are three different approaches in American constitutional law to the second building block issue of whether the government action is narrowly tailored to not burden individual rights more than is appropriate. Under strict scrutiny, the government action must be the least restrictive effective alternative to advance the government’s interest. Under intermediate review, the government only must be not substantially more burdensome than necessary, not the least burdensome alternative. Under minimum rationality review, the government must only not impose an irrational burden. The international inquiry into “necessity” tracks the strict scrutiny version of the narrow tailoring inquiry. It asks specifically whether the government has used the least restrictive means to advance its goals, in order to ensure that the government does not burden the right more than is necessary for the government to achieve its stated goals.
Jud Mathews & Alec Stone Sweet, *All Things in Proportion? American Rights Review and the Problem of Balancing*, 60 EMORY L.J. 797, 803 (2011). In practice, however, it has been noted that typically “judges do not invalidate a measure simply because they [the judges] can find one less restrictive alternative. Instead, most courts, explicitly or implicitly, insist that policymakers have a duty to consider reasonably available alternatives and to refrain from selecting the most restrictive among them.” *Id.* In practice, this might be similar to requiring the government not to adopt an alternative substantially more burdensome than other effective alternatives, and thus track the American intermediate review standard of narrow tailoring.

With regard to the third building block of justifying the burden on individual rights, under proportionality analysis “the court weighs, in light of the facts, the benefits of the act (already found to have been narrowly tailored) against the costs incurred by infringement of the right, in order to decide which side shall prevail.” *Id.* at 803. If done with rigor, the analysis focuses on whether the marginal benefit of the regulation to advance the legitimate public interest is greater than the marginal burden on the individual. In practice, many courts are not that rigorous, and approach the question more from the perspective of ensuring that “no factor of significance to either side has been overlooked” *Id.* With regard to the burden of proof on the validity of the law, under international law, the burden always is on the government to justify its action. *Id.* For further discussion of the standard of proportionality, see R. Randall Kelso, *United States Standards of Review versus the International Standard of Proportionality: Convergence and Symmetry*, 39 OHIO NORTHERN U.L. REV. 455 (2013); R. Randall Kelso, *Modern Moral Reasoning and Emerging Trends in Constitutional and Other Rights Decision-Making Around the World*, 29 QUINNIPIAC L. REV. 433 (2011).

Nature of Judicial Review

§ 17.1.4, page 573, end of section: The Supreme Court has often noted, “[W]e are a court of review, not of first view.” *Nautilus, Inc. v. Biosig Instruments, Inc.*, 134 S. Ct. 2120, 2131 (2014), citing *Cutter v. Wilkinson*, 544 U.S. 709, 718 n.7 (2005). Thus, when adopting or clarifying some aspect of the law, the Court’s usual practice is to remand to give lower courts first chance to apply that standard to the facts. *Id.*

Remedial Issues

§ 17.2.2.1.B, page 584, text preceding n.108: In addition to § 1988, a number of federal statutes grant attorneys’ fees in appropriate cases. See, e.g., *Hardt v. Reliance Standard Life Insur. Co.*, 130 S. Ct. 2149, 2152 (2010), quoting *Ruckelshaus v. Sierra Club*, 463 U.S. 680, 694 (1983) (statutory language that “the court in its discretion may allow a reasonable attorney’s fee and costs of action to either party” permits court to award attorney’s fees as long as the party had achieved “some degree of success on the merits” even if the party could not claim to be a “prevailing party”); *Octane Fitness, LLC v. ICON Health & Fitness, Inc.*, 134 S. Ct. 1749 (2014) (determining what cases are “exceptional” for award of attorneys’ fees under Patent Act must be done on a “case-by-case” basis); CRST Van Expedited, Inc. v. EEOC, 136 S. Ct. 1642 (2016) (in a case involving employment discrimination under Title VII of the Civil Rights Act of 1964, defendant may be entitled to attorney’s fees based on plaintiff’s “frivolous, unreasonable, or groundless” litigation, even where the case was dismissed on procedural grounds, rather than the court concluding the litigation was “frivolous” on the merits).

*See also Astrue v. Ratliff*, 130 S. Ct. 2521, 2524 (2010) (absent clear statutory language, fees are payable to the litigant, not the attorney, and thus are subject to an administrative offset by the government under 31 U.S.C. §§ 3711(a), 3716(a) to satisfy a pre-existing debt owed the government); *Lefemine v. Wideman*, 133 S. Ct. 9 (2012) (plaintiff who obtained injunction was a “prevailing party” entitled to attorneys’ fees, even if no monetary damages were obtained); *Goodyear Tire & Rubber Co. v. Haeger*, 137 S. Ct. 1178 (2017) (under court’s inherent authority sanctions to pay other sides’ legal fees for bad-faith conduct limited to legal fees the innocent party inured solely because of the misconduct); *Deutsch v. Henry*, 2016 WL 7165993 (W.D. Tex. 2016) ($175,673 sanction against lawyer for “myriad [over 100] court filings” that falsely accused opposing attorney of “racism, cowardice, and anti-Semitism”; lawyer also fabricated an e-mail purportedly sent by opposing attorney in order to gain advantage in a discovery dispute).
Original Jurisdiction in Lower Federal Courts: Bivens Rule and Statutes of Limitations

§ 17.2.2.1, page 587, n.120: The recent trend of the Court limiting Bivens actions continued in Wilkie v. Robbins, 127 S. Ct. 2588, 2600-05 (2007) (because plaintiff had an administrative process, and ultimately a judicial process, for vindicating complaints, no Bivens action was necessary). Reflecting formalist reluctance to imply private rights of action, discussed at § 17.2.2.1 nn.119-20, formalist Justices Scalia and Thomas indicated that they would restrict Bivens to its precise facts and not consider any new Bivens actions. Id. at 2608 (Thomas, J., joined by Scalia, J., concurring). Reflecting the instrumentalist greater embrace of implying private rights of action to help ensure effective redress of grievances, discussed at § 17.2.2.1 n.118, Justices Stevens and Ginsburg concluded that Robbins’ alternative remedies were not adequate, and would have granted him a Bivens action. Id. at 2613-17 (Ginsburg, J., joined by Stevens, J., concurring in part and dissenting in part). See also Mirmehdi v. United States, 662 F.3d 1073 (9th Cir. 2011) (no Bivens action for aliens not lawfully in the United States to sue for damages for wrongful detention pending deportation).

In Ziglar v. Abbasi, 137 S. Ct. 1843, 1857-58 (2017) (Sotomayor, Kagan & Gorsuch, JJ, not participating), citing cases from 1983-2012 where no Bivens action was implied, the Court reemphasized again a reluctance to imply new Bivens actions, particularly if “special factors counseling hesitation” exist, such as whether “the Judiciary is well suited, absent congressional action or instruction, to consider and weight the costs and benefits of allowing a damage action to proceed.” The Court refused to grant a Bivens action for detainees suspected of terrorism to challenge detention policy, and remanded to consider whether a Bivens action should exist on prisoner abuse claims; officials were granted qualified immunity. Id. at 1873 (Breyer, J., joined by Ginsburg, J., dissenting) (Bivens actions should exist on both claims; qualified immunity should be decided on remand). See also Hernandez v. Mesa, 137 S. Ct. 2003 (2017) (case remanded for lower court to apply “special factors” test to determine if Bivens action should exist for cross-border shooting of Mexican national).

For courts to have jurisdiction, the case must be brought within any applicable statute of limitations. Traditionally, courts have permitted tort plaintiffs to avoid statutes of limitations if they did not know, nor with the exercise of reasonable diligence could have known, that they had a claim against the defendant – the so-called “discovery rule.” See, e.g., Horn v. A.O. Smith Corp., 50 F.3d 1365 (7th Cir. 1995). Some courts have extended this rule to permit government agencies to bring civil enforcement actions if the government agency could not have “discovered” the violation earlier. See James R. MacAyeal, The Discovery Rule and the Continuing Violation Doctrine as Exceptions to the Statute of Limitations for Civil Environmental Penalty Claims, 15 VA. ENVTL. L.J. 589, 601-10 (1996). This exception has been scaled back by Gabelli v. SEC, 133 S. Ct. 1216 (2013), which held that while use of the discovery rule may be justified when a victim seeks damages, it is not justified when penalties are sought by a government agency, unless the statute clearly provides for such jurisdiction. See also CTS Corp. v. Waldburger, 134 S. Ct. 2175 (2014) (discovery rule in CERCLA (Comprehensive Environmental Response, Compensation, and Liability Act) only preempts state statute of limitations, not statutes of repose) (Ginsburg, J., joined by Breyer, J., dissenting).

Discretionary Appeal by Certiorari and Direct Appeal to the Supreme Court

§ 17.2.2.2, page 587 n.122: See Supplement at page 2043 (§ 7.4.3, page 235, text following n.241).

Bivens Actions versus Habeas Corpus Review

§ 17.2.2.2, page 588, n.128: For state and federal prisoners, whether an action can be brought as a civil rights action, as in Wilkinson, or only under a deferential habeas corpus standard, discussed at § 23.2.2.3, as in Preiser, can make a difference. Relying on Skinner v. Switzer, 131 S. Ct. 1289 (2010) (prisoner may seek DNA testing of crime-scene evidence in § 1983 action, since testing might not reduce prisoner’s sentence), a court held in Davis v. U.S. Sentencing Commission, 716 F.3d 660 (D.C. Cir. 2013), that a federal prisoner could challenge disparities in prison sentences for crack versus powder cocaine in a civil rights Bivens action, since victory would not necessarily reduce prisoner’s sentence, as sentencing discretion would remain).
Limited Review of State Court Decisions

§ 17.2.2.3, page 589, n.133: In *Hawaii v. Office of Hawaiian Affairs*, 129 S. Ct. 1436 (2009), the Court held, applying *Michigan v. Long*, 463 U.S. 1032 (1983), that federal jurisdiction exists over state court decisions where there is an interweaving with federal law and the adequacy and independence of any state law ground is not clear from the opinion. The Supreme Court of Hawaii had enjoined the sale of certain Hawaiian trust lands, based in part on its reading of a 1993 Apology Resolution, passed by Congress, in which “Congress has clearly recognized that the native Hawaiian people have unrelinquished claims over the ceded lands.” 129 S. Ct. at 1442-43. *See also Walker v. Martin*, 131 S. Ct. 1120 (2011) (in a habeas corpus case a federal court will not review a claim rejected by a state court if its decision rests on independent state law grounds).

Limitations on the Jurisdiction-Stripping Power of Congress

§ 17.2.3.1, page 595, text following n.158: *See also McKenzie v. U.S. Citizenship and Immigration Serv., District Director*, 761 F.3d 1149 (10th Cir. 2014) (Immigration Act of 1990 transfers authority over naturalization from judiciary to Attorney General; thus incorrect birth date on naturalization certificate cannot be corrected by federal courts). For limitations imposed on Congress’ jurisdiction-stripping power by the 5th Amendment Due Process Clause and Article I, § 9, cl. 2 Habeas Corpus Clause for enemy combatants, *see Boumediene v. Bush*, 128 S. Ct. 2229 (2008), discussed in this Supplement at § 27.4.4.8 text preceding n.418; Janet Cooper Alexander, *Jurisdiction-Stripping in a Time of Terror*, 95 Cal. L. Rev. 1193 (2007). For additional cases on jurisdiction-stripping issues, *see* Supplement § 20.1.4.3, page 849, text following n.96.

Jurisdiction of the Bankruptcy Courts

§ 17.2.3.1, page 596, n.162: *See also Stern v. Marshall*, 131 S. Ct. 2594, 2600-01, 2620 (2011) (not being Article III judges, bankruptcy judges lack constitutional power to decide state common law claims arising in bankruptcy); *id.* at 2621-22 (Breyer, J., joined by Ginsburg, Sotomayor & Kagan, JJ., dissenting). *Cf.* *Executive Benefits Ins. Agency v. Arkison*, 134 S. Ct. 2165 (2014) (fraudulent conveyance claims cannot be decided by non-Article III judges under *Stern*, but bankruptcy judge may issue findings of fact and conclusions of law to be adopted by an Article III district court).

Appeal from Article I Courts to Supreme Court

§ 17.2.3.1, page 597, end of section: *See generally Ortiz v. United States*, 138 S. Ct. 2165 (2018) (Congress may grant direct appeal from Court of Appeals for the Armed Forces (CAAF), the top court in the military system, to the Supreme Court); *id.* at 2189 (Alito, J., joined by Gorsuch, J., dissenting) (since CAAF is not Article III court, direct appeal to Supreme Court not permissible; CAAF judges must be made Article III judges or appeal from CAAF should start in lower federal courts and then appealed to the Supreme Court).

Personal Jurisdiction and the Due Process Clause

§ 17.2.3.2, page 598, n.169: Since 2010, the Court has limited “general jurisdiction” by recasting the (a) “fair play and substantial justice” and (b) “continuous and systematic” and “substantial” language from *International Shoe*, 326 U.S. 310, 316-18 (1945), with one factor being “[a]n ‘estimate of the inconveniences’ which would result to the corporation from a trial away from its ‘home’ or principal place of business,” *id.* at 317, to state general jurisdiction now applies only when the “affiliations with the State are so ‘continuous and systematic’ as to render them essentially at home in the forum state.” *Goodyear Dunlop Tires Operations, S.A. v. Brown*, 131 S. Ct. 2846, 2851 (2011) (mere fact the tires made by Goodyear’s foreign subsidiaries may have reached North Carolina through stream of commerce insufficient to create general jurisdiction); *Daimler AG v. Bauman*, 134 S. Ct. 746, 761 (2014) (no general jurisdiction over Daimler-Chrysler AG, despite Mercedes-Benz USA having substantial contacts in California and being Daimler’s agent for distributing Daimler-manufactured vehicles); *Williams v. Yamaha Motor Co. Ltd.*, 851 F.3d 1015 (9th Cir. 2017) (no general jurisdiction over Yamaha Motor Co. Ltd. over premature corrosion in outboard motors, despite activities of Yamaha Motor Corp., USA importing motors and marketing them in California); *Livnut v. Palestinian Authority*, 851 F.3d 45 (D.C. Cir. 2017) (no general jurisdiction in U.S. courts for Jewish
worshipers shot by Palestinian Authority guards while praying at Joseph’s Tomb in the West Bank since Authority’s home – headquarters, officials and primary activities – are in the West Bank). Absent place of incorporation or principal place of business, it is now unclear what “exceptional circumstances” exist to find a business is “essentially at home” in the forum state. See BNSF R. Co. v. Tyrrell, 137 S. Ct. 1549 (2017) (no general jurisdiction to sue BNSF Railway Co. in Montana for injuries to railroad workers outside of Montana, despite BNSF having over 2,000 employees in Montana and 2,000 miles of track in Montana, as BSNF was not incorporated in Montana, nor did it have its principal place of business in Montana, nor was it like Perkins v. Benguet Consol. Mining Co., 342 U.S. 437 (1952), where defendant temporarily located its principal place of business from the Philippines to Ohio during World War II); 137 S. Ct. at 1560 (Sotomayor, J., concurring in part and dissenting in part) (Court should follow International Shoe and find contacts are sufficient.

See generally Bristol-Myers Squibb Co. v. Superior Court of California, San Francisco County, 137 S. Ct. 1773 (2017) (no general jurisdiction in California since Bristol-Myers Squibb (BMS) is incorporated in Delaware and is headquartered in New York (with more than 50% of its workforce in New York or New Jersey), despite 5 research labs in California employing 160 people, 250 sales representatives in California, and state-government advocacy office in Sacramento; no specific jurisdiction for 592 residents from other states, who joined with 86 California residents suing in products liability, negligent misrepresentation, and misleading advertising relating to BMS’s drug Plavix, since their claims did not “arise from” activities in California, but from advertising and use in their own states); id. at 1786 (Sotomayor, J., dissenting) (since the non-residents’ claims resulted from same conduct in their states that occurred in California, their lawsuit did “relate to” those activities, and under International Shoe and its progeny, the claim only needs to “arise out of, or relate to” forum activities for specific jurisdiction; it does not have to be caused by forum activities).

For recent cases on “specific jurisdiction,” see J. McIntyre Machinery, Ltd. v. Nicastro, 131 S. Ct. 2780 (2011) (single sale to New Jersey customer by an American distributor of a British corporation’s products, unaccompanied by regular course of sales, or advertising or marketing in the state, insufficient for specific jurisdiction); id. at 2791 (Breyer, J., joined by Alito, J., concurring in the judgment); id. at 2794 (Ginsburg, J., joined by Sotomayor & Kagan, JJ., dissenting); Walden v. Fiore, 134 S. Ct. 1115 (2014) (specific jurisdiction does not exist in Nevada against federal Drug Enforcement Agency when they seized funds while plaintiffs were at the Atlanta airport on a stopover to Nevada, because due process does not permit a court to exercise personal jurisdiction over the defendant (DEA) whose sole contact with the forum is knowledge that plaintiff has connections to that state); Williams v. Romarm, S.A., 756 F.3d 777 (D.C. Cir. 2014) (shooting victim in D.C. cannot pursue claims in U.S. courts against Romanian manufacturer of gun sold in U.S. through U.S. distributor which made its way into D.C.); ITL International Inc. v. Constelna SA, 669 F.3d 493 (5th Cir. 2012) (use of Gulfport, Mississippi seaport to ship candy to Costa Rica insufficient to grant specific jurisdiction in Mississippi in contract dispute between manufacturer and distributor); Fulbright & Jaworski LLP v. Eighth Judicial District Court, 342 P.3d 997 (Nev. 2015) (out-of-state firm cannot be sued in Nevada merely by representing Nevada client in out-of-state real estate transaction, where no solicitation of client took place in Nevada). But see MacDermid, Inc. v. Deiter, 702 F.3d 725 (2nd Cir. 2012) (Toronto-based employee’s e-mail to her personal e-mail account in Canada triggered minimum contacts supporting specific jurisdiction in Connecticut when e-mail routed through employer’s computer server in Connecticut); Metzger v. Temple of Ancient Dragon, Inc., 2016 WL 7242102 (S.D. Cal. 2016) (Michigan based company that displayed images of California-based competitor’s custom designs on its website created minimum contacts for specific jurisdiction, despite less than 1% of its sales occurred in California). Cf. Lightfoot v. Cendant Mortgage Corp., 137 S. Ct. 553 (2017) (corporate charter of Fannie Mae which authorizes Fannie Mae “to sue and be sued, and to complain and to defend, in any court of competent jurisdiction, State or Federal” does not grant federal courts subject-matter jurisdiction over all cases involving Fannie Mae, but merely allows suit in any court, state or federal, that already possesses subject-matter jurisdiction, i.e., a “court of competent jurisdiction”); TC Heartland LLC v. Kraft Foods Group Brands LLC, 137 S. Ct. 1514 (2017) (domestic corporation resides only in state of incorporation under patent venue statute).

Forum Non Conveniens Doctrine

§ 17.2.3.2, page 599, n.172: See also Figueiredo Ferraz e Engenharia de Projeto Ltda. v. Republic of Peru, 665 F.3d 384 (2nd Cir. 2011) (Peruvian statute limiting to 3 percent the portion of an agency’s budget that can
go toward paying a judgment was a strong factor counseling an American court is not the proper forum to resolve $21 million dispute between American engineering company and Peruvian government; *Atlantic Marine Constr. Co. v. United States Dist. Court for Western Dist. of Texas*, 134 S. Ct. 568 (2014) (appropriate way to enforce forum-selection clause in contract is through forum non conveniens, and valid forum-selection clause should be given controlling weight in all but the most exceptional circumstances unrelated to parties’ convenience (since they have waived those arguments in entering into the clause), such as when public-interest factors are involved, such as administrative difficulties from court congestion, local interest in having localized controversies decided at home, or having trial of a diversity case in a forum at home with the law).

**Eleventh Amendment Immunity Waiver Cases**

**§ 17.2.4.2, page 602, n.191:** See *Sossamon v. Texas*, 131 S. Ct. 1651 (2011) (state’s acceptance of federal funds did not waive state immunity when the federal statute only authorized “appropriate relief” against the states and this did not constitute unequivocal consent to be sued for money damages); *Vas-Cath, Inc. v. Curators of the University of Missouri*, 473 F.3d 1376 (Fed. Cir. 2007) (state university waived immunity by voluntarily participating in federal administrative forum).

**Eleventh Amendment State University & Local Entity Immunity Cases**

**§ 17.2.4.2, page 604, n.204:** See also *Ali v. Carnegie Institute of Washington*, 2017 WL 1349280 (Fed. Cir. 2017) (plaintiff suit to be added to patent regarding controlling flow of genetic information dismissed, as one of two existing patent holders a professor at public University of Massachusetts, and thus an indispensable party in the case who has state sovereign immunity, even though other professor at private Carnegie Institute); *Pennsylvania Higher Educ. Assistance Agency v. Pele*, 628 Fed. App’x 870 (4th Cir. 2017) (higher education student loan association is not an arm of the state for purposes of state immunity doctrine); *United States v. University of Massachusetts, Worcester*, 812 F.3d 35 (1st Cir. 2016) (student loan association is an arm of the state); *Kriepke v. Wayne State Univ.*, 807 F.3d 768 (6th Cir. 2015) (same); *United States ex rel. Lesinski v. South Florida Water Management Dist.*, 739 F.3d 598 (11th Cir. 2014) (local water district is arm of the state); *Lake v. Skelton*, 840 F.3d 1334 (11th Cir. 2016) (2-1 panel held county sheriff is arm of the state in lawsuit over religious rights and dietary matters, since duty to feed inmates is “directly assigned by the state.”).

**Eleventh Amendment Ex Parte Young & Related Immunity Cases**

**§ 17.2.4.2, page 605, text following n.208:** The Court held in *Virginia Office for Protection and Advocacy v. Stewart*, 131 S. Ct. 1632, 1638 (2011), that the Ex parte Young exception applies not only when the state official is sued by a private citizen, but is sued by an independent state agency official. *Id.* at 1650-51 (Roberts, C.J., joined by Alito, J., dissenting) (“This is a matter for the State to sort out, not a federal judge.”). See also *Nichols v. Alabama State Bar*, 815 F.3d 726 (11th Cir. 2016) (Alabama State Bar is an arm of the state and thus entitled to immunity; since plaintiff did not sue any state official, no need to address Ex Parte Young exception); *Hirsh v. Justices of the Supreme Court*, 67 F.3d 708 (9th Cir. 2014) (State Bar of California arm of the state and thus entitled to immunity when sued by disappointed Bar test-taker); *Clark v. Virginia Dep’t of State Police*, 793 S.E.2d 1 (Va. 2016) (state police department immune from suit alleging discrimination against veterans under Uniformed Services Employment and Reemployment Rights Act).

**Limitations on Younger Abstention Doctrine**

**§ 17.2.4.4, page 617, text following n.262:** In *Sprint Communications, Inc. v. Jacobs*, 134 S. Ct. 584 (2014), an unanimous Court held that Younger abstention is limited to: (1) parallel, pending state criminal proceedings; (2) state civil proceedings that are akin to criminal proceedings; and (3) cases that implicate a state’s interest in enforcing the orders and judgments of its courts. Younger does not apply merely if there is a parallel state-court civil proceeding on same subject matter. *Cf. ReadyLink Healthcare, Ic. v. State Comp. Ins. Fund*, 754 F.3d 754 (9th Cir. 2014) (applying Sprint).
§ 17.4.4, page 618, n.271: See also Bell v. City of Boise, 709 F.3d 890 (9th Cir. 2013) (Rooker-Feldman does not bar federal court damage action not challenging legality of state court judgments).

Standing: The Injury-in-Fact Requirement

§ 17.3.1.1, page 621, n.280 & § 17.3.1.3.A, page 646, n.396: In Summers v. Earth Island Institute, 129 S. Ct. 1142 (2009), a 5-4 Court held that certain environmental organizations lacked standing to challenge the United States Forest Service concerning its decision to conduct a salvage sale of timber without providing notice, comment, and appeal. Justice Scalia said plaintiffs had not identified any application of the challenged regulation that threatened imminent and concrete harm. Id. at 1149-51. In dissent, Justice Breyer said that the test should be whether there is a realistic likelihood that the challenged future conduct will, in fact, recur and harm the plaintiff. Id. at 1155-56 (Breyer, J., joined by Stevens, Souter & Ginsburg, JJ., dissenting). Consistent with his concurrence in Lujan, discussed in the E-Treatise at § 17.3.1.3.D n.432, Justice Kennedy said the case would be different if Congress had sought to provide redress for a concrete injury, rather than merely a procedural right to sue not related to a concrete injury. Id. at 1153 (Kennedy, J., concurring).

In Town of Chester v. Laroe Estates, Inc., 137 S. Ct. 1645 (2017), the Court clarified that intervenors who wishes to pursue relief not requested by a plaintiff must have their own injury-in-fact. On other recent injury-in-fact cases, see Clapper v. Amnesty International USA, 133 S. Ct. 1138 (2013) (plaintiff failed to show sufficiently “concrete” injury, based on alleged likelihood that their communications with foreign individuals, whom they believe to be likely targets of FISA wiretapping, will be wiretapped); id. at 1155 (Breyer, J., joined by Ginsburg, Sotomayor & Kagan, J.J., dissenting) (likelihood of government surveillance “sufficiently certain”); Drake v. Obama, 664 F.3d 774 (9th Cir. 2012) (“birthers” – voters, taxpayers, state representatives, and active military personnel – all lack “concrete” injury to sue President Obama); Hedges v. Obama, 724 F.3d 170 (2nd Cir. 2013) (foreign activists do not face “sufficient threat” of indefinite detention to have standing to challenge provision of National Defense Authorization Act purporting to authorize indefinite detention of al-Qaeda, Taliban, or associated enemy combatants); Wagner v. Cruz, 179 F. Supp. 3d 743 (D. Utah 2016), aff’d, 662 Fed. App’x 554 (10th Cir. 2016) (no standing for “birther” complaint against Ted Cruz; plaintiff has only “generalized grievance” and harm is “hypothetical”); American Freedom Law Center v. Obama, 821 F.3d 44 (D.C. Cir. 2016) (complaint by holders of compliant plans under Affordable Care Act that program for persons holding non-compliant plans would cause increases in their insurance “speculative”); West Virginia ex rel. Morrissey v. United States Dep’t of Health and Human Services, 827 F.3d 81 (D.C. Cir. 2016) (State lacks concrete injury to challenge decision to leave enforceability of the Affordable Care Act’s minimum coverage requirement to States during a three-year transitional period). But see Susan B. Anthony List v. Driehaus, 134 S. Ct. 2334 (2014) (organizations alleged sufficient threat of future enforcement of Ohio statute criminalizing false statements about candidates); Oklevueha Native American Church of Hawaii, Inc. v. Holder, 676 F.3d 829 (9th Cir. 2012) (Church has standing alleging right to religious use of marijuana infringed by federal drug laws); Libertarian Party of Los Angeles County v. Bowen, 709 F.3d 867 (9th Cir. 2013) (lack of past prosecution not dispositive when Secretary of State issued specific warning on enforcement); Safari Club Int’l v. Jewell, 842 F.3d 1280 (D.C. Cir. 2016) (Safari club can sue on behalf of its members to challenge Department of Interior decision, without notice-and-hearing rulemaking, prohibiting importation of elephant trophies, despite not seeking a permit; applying for a permit would have been futile); Real v. City of Long Beach, 852 F.3d 929 (9th Cir. 2017) (standing despite not applying for tattoo permit).

In Hollingsworth v. Perry, 133 S. Ct. 2652 (2013), a 5-4 Court held that proponents of California referendum Proposition 8 lacked standing to appeal a district court’s order declaring Proposition 8 unconstitutional, as they had only a “generalized grievance” shared by other citizens, based on Allen v. Wright, 468 U.S. 737, 754 (1984); Lujan v. Defenders of Wildlife, 504 U.S. 555, 573-74 (1992); and Arizonans for Official English v. Arizona, 520 U.S. 43, 65 (1997). 133 S. Ct. at 2662-63. If the supporters had been appointed “agents” of the state they might have standing to represent the state’s interest, but none of the traditional indicia of agency existed. Id. at 2666-67. The dissent admitted that standing in federal court is a matter of federal law, and thus it was not binding on federal courts that the California Supreme Court had concluded under California law these supporters would have standing in state courts. Nevertheless, the dissent concluded that because the
supporters would have had a “state-defined status,” that should be sufficient to give them a concrete injury under federal law. 133 S. Ct. at 2668 (Kennedy, J., joined by Thomas, Alito & Sotomayor, JJ., dissenting). Under the majority’s decision, state citizens cannot ensure a referendum will be enforced if a district court finds it unconstitutional and the requisite state official, Governor or Attorney General, refuses to appeal. Id. Cf. Arizona State Legislature v. Arizona Indep. Redistr. Comm’n, 135 S. Ct. 2652 (2015) (legislature has standing to sue referendum-imposed redistricting commission) (Scalia, J., joined by Thomas, J., dissenting).

In Spokeo, Inc. v. Robins, 136 S. Ct. 1540 (2016), the Court muddied the waters a bit in defining “injury-in-fact.” In Lujan v. Defenders of Wildlife, 504 U.S. 555, 560 (1992), cited in the E-Treatise at § 17.3.1.1 n.280, the Court noted an “injury-in-fact” is “(a) concrete and particularized, and (b) actual or imminent, not conjectural or hypothetical.” In Spokeo, the Court said an “injury-in-fact” must be (a) “particularized”—that is, not “undifferentiated” or a “generalized grievance”; and (b) “concrete,” with “concrete” defined as “real” and “not abstract” – which seemingly means not “conjectural or hypothetical.” If so, then the shift in terminology from Lujan does not change standing doctrine; it merely moves “concrete” to define part (b) of Lujan analysis. On the other hand, if in Spokeo the Court means there are now three requirements for standing: (a)(1) “concrete,” as defined in Spokeo; (a)(2) “particularized,” as defined in Spokeo; and (b) “actual or imminent, not conjectural or hypothetical,” it is unclear how (a)(1) differs from (b).

Standing: Injury-in-Fact Requirement in Redistricting Cases

§ 17.3.1.3.A, page 647, n.400: In Gill v. Whitford, 138 S. Ct. 1916 (2018), the Court reaffirmed United States v. Hays’ holding that plaintiffs in one district do not have standing to remedy problems in other districts.

Congressional Authority to Create Standing

§ 17.3.1.3.D, page 657, n.439: The breadth of Congress’ ability to create standing, as suggested by Justices Kennedy and Souter’s concurrence in Lujan v. Defenders of Wildlife, discussed in the E-Treatise at § 17.3.1.3.D n.432, was confirmed in Massachusetts v. EPA, 127 S. Ct. 1438 (2007). The case involved a challenge to the failure of the EPA to consider whether it should regulate greenhouse gas emissions from new motor vehicles. Justice Stevens’ opinion held that (1) where Congress had “authorized this type of challenge to EPA action,” citing Justice Kennedy and Souter’s concurrence in Lujan, and (2) the plaintiff is a state seeking to protect sovereign interests, and thus on federalism grounds is entitled to “special solicitude” in standing analysis, the state had standing to protect its coast line that might be harmed by rising sea levels caused by global warming. Id. at 1453-55. The decision reflected natural law respect for precedent, citing Georgia v. Tennessee Copper Co., 206 U.S. 230 (1907) (Georgia has standing to protect its citizens from air pollution originating in Tennessee). 127 S. Ct. at 1454. Four Justices concluded the claimed injury was too speculative (which, as a matter of formalist logic, without “special solicitude” for the state, may be true), and global warming was best addressed by the legislature and executive, not litigation (Holmesian focus on deference to government). Id. at 1463-64 (Roberts, C.J., joined by Scalia, Thomas & Alito, JJ., dissenting).

Qui Tam Actions and Standing

§ 17.3.1.3.E, page 659, end of section: See also Brooks v. Dunlop Manufacturing Inc., 702 F.3d 624 (Fed. Cir. 2012) (Congress’ elimination of qui tam filings of false patent marketing complaints, and retroactive application to cases in progress, does not violate due process).

The “Zone of Interests” Test for Standing: The Flast Case

§ 17.3.1.4.B, page 661, n.450: The trend of limiting Flast to its precise facts continued in Hein v. Freedom From Religion Foundation, Inc., 127 S. Ct. 2553 (2007). In Hein taxpayers lacked standing to challenge executive action possibly violating the Establishment Clause, since it was not a congressional appropriation under the Spending Clause. Id. at 2559 (Alito, J., joined by Roberts, C.J., and Kennedy, J., announced judgment of the Court) (Flast not overruled). Formalist Justices Scalia and Thomas would have overruled Flast, as Flast’s reasoning is inconsistent with modern standing doctrine, as discussed at § 17.3.1.4.A n.447. Id. at 2573-74 (Scalia, J., joined by Thomas, J., concurring in the judgment). Consistent with an
instrumentalist view supporting *Flast*, as noted at § 17.3.1.2.D nn.364-68, four Justices dissented, including Justice Souter, who often followed the reasoning of instrumentalist-era precedents, as discussed at § 12.3.2, pages 377-38. *Id.* at 2584 (Souter, J., joined by Stevens, Ginsburg & Breyer, J., dissenting). See also *Arizona Christian School Tuition Organization v. Winn*, 131 S. Ct. 1436 (2011) (tax credits to religious organizations are not appropriations under the Spending Clause; *Flast* does not apply); *Id.* at 1450 (Kagan, J., joined by Ginsburg, Breyer & Sotomayor, J., dissenting); *Sherman v. Illinois*, 682 F.3d 643, 645-47 (7th Cir. 2012) (taxpayer lacks standing to challenge $20,000 grant to non-profit group for restoration of 11-foot tall Latin cross because money was part of “lump-sum appropriation,” not specific legislative appropriation).

The “Zone of Interests” Test for Standing in Statutory Interpretation Cases

§ 17.3.1.4.B, page 665, end of section: The suggestion in the E-Treatise of limited applicability of the statutory “zone of interest” test was confirmed in *Lexmark International, Inc. v. Static Control Components, Inc.*, 134 S. Ct. 1377 (2014) (clarifying that the “zone of interest” test is statutory, and not a prudential principle of equitable discretion; injuries easily fell within “zone of interests” protected by false advertising provision of Lanham Act). See also *Bank of America Corp. v. Miami*, 137 S. Ct. 1296, 1301 (2017) (Miami is an “aggrieved person” under Fair Housing Act (FHA) because city’s economic injuries from banks’ alleged discriminatory lending practices within “zone of interests” of FHA); *Id.* at 1307 (Thomas, J., joined by Kennedy & Alito, J.J., concurring in part and dissenting in part) (Miami not within FHA “zone of interests”).

Equitable Discretion and the Newdow Case

Result of a Case Becoming Moot

§ 17.3.3.1, page 677, n.523: Normally when a case becomes moot, the Court vacates any judgment rendered below. However, the Court noted in *Alvarez v. Smith*, 130 S. Ct. 576, 581 (2009), quoting *U.S. Bancorp Mortgage Co. v. Bonner Mall Partnership*, 513 U.S. 18, 25 (1994), if the mootness arises from the party’s “‘settlement’” of the case, rather than “‘happenstance,’” the “‘losing party has voluntarily forfeited his legal remedy ... [and] thereby surrender[ed] his claim ... of vacatur.’”

Application of Mootness Exceptions

§ 17.3.3.1, page 678, text following n.531: Regarding “capable of repetition, yet evading review” exception, see *Azar v. Garza*, 138 S. Ct. 1790 (2018) (while standard abortion rights challenges, such as *Roe v. Wade*, 410 U.S. 113, 125 (1973), implicates this exception, unusual case of pregnant minor who entered the country illegally and challenged policy of Office of Refugee Resettlement not to facilitate abortion rendered moot when, after prevailing in a lower federal court, she got early morning abortion before government could seek stay and appeal). Regarding “voluntary cessation” exception, see *Brown v. Buhman*, 822 F.3d 1151 (10th Cir. 2016) (case challenging Utah’s bigamy law mooted when prosecution announced policy of only prosecuting for bigamy based on allegations of misrepresentation, fraud, or abuse). Regarding collateral consequences exception, while most courts will hold that right to “nominal damages” will save any otherwise moot case, the 11th Circuit Court of Appeals recently held differently. See *Flanigan’s Enterprises, Inc. of Ga. v. City of Sandy Springs*, 868 F.3d 1248 (11th Cir. 2018) (7-5 en banc) (given repeal of statute regulating sale of sex toys, case mooted despite claim for nominal damages), and cases from other Circuits cited therein.
The Political Questions Doctrine

§ 17.3.4.5, page 688, n.574: In *Zivotofsky ex rel. Zivotofsky v. Clinton*, 132 S. Ct. 1421 (2012) (Breyer, J., dissenting), an 8-1 Court held that the political questions doctrine does not bar a court from considering whether a congressional statute which provides that Americans born in Jerusalem may elect to have “Israel” listed as their place of birth on their passports is constitutional. A conflict existed because the State Department had declined to follow the law, citing its long-standing policy of not taking a position on the political status of Jerusalem. On remand, the law was held unconstitutional, as discussed in this Supplement at § 19.3.2, text following n.42. See also *Committee on Oversight and Government Reform v. Holder*, 979 F. Supp. 2d 1 (D.D.C. 2013), citing, inter alia, *Committee on the Judiciary v. Miers*, 558 F. Supp. 2d 53 (D.D.C. 2008) (political questions doctrine does not preclude court from enforcing subpoena by congressional committee against Attorney General, and committee, backed by the House, has standing under *Raines v. Byrd*, 521 U.S. 811 (1997), discussed in the E-Treatise at § 17.3.1.4.D, page 668, nn.482-84).

Severability Analysis

Remedial Powers of Courts

§ 17.4.4, page 699, n.613: In *Brown v. Plata*, 131 S. Ct. 1910 (2011), a 5-4 Court upheld the power of courts to direct California officials to act within 2 years to implement a systemwide cap reducing California prison population by 37,000 to address overcrowding which denied prisoners with medical disorders and mental conditions right to be free from cruel and unusual punishment. Formalist and Holmesian Justices concluded order exceeded court’s institutional capacity. *Id.* at 1951 (Scalia, J., joined by Thomas, J., dissenting); *id.* at 1959 (Alito, J., joined by Roberts, C.J., dissenting). Application for a stay was denied in *Brown v. Plata*, 134 S. Ct. 1 (2013) (Alito, J., grant stay) (Scalia, J., joined by Thomas, J.) (grant stay; dissolve injunction). See also *Braggs v. Dunn*, 2017 WL 27773833 (M.D. Ala. 2017) (court order regarding Alabama prison system).

While the Supreme Court has not taken up the issue, in a recent concurring opinion Justice Thomas indicated his belief district courts lack power to impose “nationwide injunctions” when they find existing government action unconstitutional. *Trump v. Hawaii*, 138 S. Ct. 2392, 2425-29 (2018) (Thomas, J., concurring).

Breadth of the Necessary and Proper Clause

§ 18.1.2, page 711, text following n.44: Consistent with the observations made in the E-Treatise text regarding “appropriate” legislation under the Necessary and Proper Clause being equivalent to the “rationally related to legitimate government interest” review under the Equal Protection Clause, the Court adopted such a flexible approach in *United States v. Comstock*, 130 S. Ct. 1949 (2010), where the Court upheld 18 U.S.C. § 4248, which authorizes the Department of Justice to detain a mentally ill, sexually dangerous federal prisoner beyond the date the prisoner would otherwise be released, as long as the original confinement was within Congress’ power. The Court also indicated that whether Congress could think some activity has a substantial effect on interstate commerce under the Commerce Clause is governed by the same minimum rationality review. *Id.* at 1956-57. Justices Kennedy and Alito indicated their belief the Necessary and Proper Clause analysis, and the Commerce Clause analysis, may well require more justification than a mere Equal Protection rational relationship test. *Id.* at 1966-68 (Kennedy, J., concurring in the judgment); *id.* at 1968-69 (Alito, J., concurring in the judgment). Justice Thomas, joined by Justice Scalia, was more forceful in rejecting the majority’s Necessary and Proper Clause analysis. *Id.* at 1975-77 (Thomas, joined by Scalia, J., in all but Part III-A-1-b, dissenting). However, the 5-Justice majority of four liberal instrumentalists (Justices Stevens, Ginsburg, Breyer, and Sotomayor), and deference-to-government Holmesian (Chief Justice Roberts), adopted this view. See also *United States v. Kebodeaux*, 133 S. Ct. 2496 (2013) (Necessary and Proper Clause authorizes Congress to enact Sex Offender Registration and Notification Act (SORNA)); *id.* at 2510 (Thomas, J., joined by Scalia, J., as to Parts I, II & III-B, dissenting) (SORNA usurps police power of states).
§ 18.2.5, page 735, end of section: In National Federation of Independent Business v. Sebelius, 132 S. Ct. 2566 (2012), the same 5-Judge majority that decided Comstock, discussed in this Supplement at § 18.1.2 text following n.44, upheld the individual mandate provision of the Patient Protection and Affordable Care Act of 2010, so-called Obamacare. The four liberal instrumentalists would have upheld the mandate provision, which required individuals to purchase health insurance by 2014 or pay a penalty, under the Commerce Clause. In their view, the mandate was regulating commerce, since at some point every individual will need health care, and thus individuals by being alive should be viewed as participating in the health care market. Id. at 2609 (Ginsburg, J., joined by Sotomayor, J., and joined as to Parts I, II, III, and IV by Breyer & Kagan, JJ., concurring in part, concurring in the judgment in part, and dissenting in part). In contrast, Chief Justice Roberts, in a viewed shared by the other four Justices, concluded the mandate was not a “regulation” of commerce, but rather “mandating” commerce. Since the Commerce Clause only gives Congress the power “to Regulate Commerce,” these five Justices concluded the mandate could not be authorized by the Commerce Clause. Id. at 2586-93 (Roberts, C.J., announced the judgment of the Court, and delivered the opinion of the Court with respect to Part I, II, and III-C); id. at 2642-43 (joint opinion of Scalia, Kennedy, Thomas & Alito, JJ., dissenting). Reflecting his Holmesian deference-to-government predisposition, however, Chief Justice Roberts noted a judicial restraint maxim cited in Ashwander v. Tennessee Valley Authority, 297 U.S. 288 (1936), discussed in the E-Treatise at § 17.1.3.2, that “[w]hen the validity of an act of Congress is drawn in question, [the Court] will first ascertain whether a construction of the statute is fairly possible by which the question may be avoided.” Applying that maxim, Roberts concluded the mandate could be viewed as a tax, and constitutional under Congress’ power to tax. 132 S. Ct. at 2593-96. This aspect of the case is discussed in this Supplement at § 18.3.1 end of section. The Court’s striking down the Act’s attempt to deny states all Medicaid funding if states did not choose Medicaid expansion, is discussed in this Supplement at § 18.3.2.2 text following n.166. Statutory interpretation considerations are discussed in this Supplement at § 32.2.2.5, text following n.263, including A4. On this case, see generally R. Randall Kelso, A Review of UNPRECEDENTED: THE CONSTITUTIONAL CHALLENGE TO OBAMACARE BY JOSH BLACKMAN (2015) (available at: http://libraryguides.stcl.edu/kelsomaterials).

It is not clear how important the distinction between “regulating” versus “mandating” commerce will be in later cases. Earlier congressional acts mandating individual action, such as requirements to file a tax return, to register for selective service, or to report for jury duty, see 132 S. Ct. at 2627 n.10 (Ginsburg, J., opinion), did not involve the Commerce Clause, but other clauses in Article I, § 8, where congressional power is phrased more broadly (power to tax, raise armies, and right to a jury trial). The real future risk is that some states or cities might impose commercial mandates on citizens, and the federal Commerce Clause is no barrier to that. The better argument, applicable to federal, state, and local regulation, involves asking if a mandate violates due process. Requiring every person to “buy and consume broccoli at regular intervals,” see Florida ex rel. Bondi v. United States Dept. of Health and Human Serv., 780 F. Supp. 2d 1256, 1289 (N.D. Fla. 2011), might violate due process, as not being rationally related to any legitimate government interest. So, too, might be a ban on soda drinks larger than 16 ounces at New York City eateries, street carts, and stadiums. Cf. New York Statewide Coalition of Hispanic Chambers of Commerce v. New York City Dep’t of Health and Mental Hygiene, 16 N.E.3d 538 (N.Y. Court of Appeals 2014) (Board of Health exceeded its bounds of its lawfully delegated authority when it promulgated such a rule). However, requiring everyone to buy health insurance to avoid a problem of free-riders is more clearly rational. See Florida ex rel. Atty. Gen. v. United States Dept. of Health and Human Serv., 648 F.3d 1235, 1363 (11th Cir. 2011) (Marcus, J., concurring in part and dissenting in part) (“Congress rationally found that the individual mandate would address the powerful economic problems associated with cost shifting from the uninsured to the insured and to health care providers . . . .”). While some individuals might never need emergency care, and thus are not part of the cost-shifting problem, there is no way in advance to tell who those individuals would be, and thus it is rational to regulate the entire class. See, e.g., New York City Transit Authority v. Beazer, 440 U.S. 568, 590-94 (1979) (since no way to tell who would be heroin drug recidivists, rational to ban everyone in methadone treatment program from Transit Authority jobs), discussed in the E-Treatise at § 26.1.1.1 nn.30-31.

For additional recent commerce clause cases, see Taylor v. United States, 136 S. Ct. 2074 (2016) (because Congress has authority to regulate the national market for marijuana, as in Gonzales v. Raich, 545 U.S. 1
(2005), Hobbs Act’s commerce element, 18 U.S.C. § 1951, is satisfied when defendant robs or attempts to rob a drug dealer’s drugs or drug proceeds, even if the drugs were homegrown (Thomas, J., dissenting) (government should have to prove robbery itself significantly affected interstate commerce). On other marijuana cases, see Wilson v. Lynch, 2016 WL 4537376 (9th Cir. 2016) (federal law banning any person who is “an unlawful user of or addicted to any controlled substance” from owning a gun validly applied to Nevada citizen who had medical marijuana card under Nevada law, as possession unlawful under federal law; law does not violate Second Amendment as being reasonably related to significant government interest, a hybrid form of intermediate review); Vasquez v. Lewis, 2016 WL 4436144 (10th Cir. 2016) (Kansas patrol officers did not have reasonable suspicion to detain and search out-of-state motorist just because he resided in Colorado, a state permitting medical marijuana use).

Power of the Federal Government Over Foreign Commerce

§ 18.2.6.1, page 736, text following n.135: A Circuit split over whether the power over “foreign commerce” is broader than “domestic commerce,” or whether 3 Commerce Clause categories in United States v. Lopez applies to “foreign commerce,” continued in United States v. Bollinger, 798 F.3d 201, 215-16 (4th Cir. 2015) (United States can convict U.S. citizen who molested young girls while living in Haiti as acts “demonstrably effect” the foreign commercial sex industry, without regard to whether effect was “substantial” as required by Lopez; broader viewed adopted by Fourth and Ninth Circuits; Lopez seems to apply in the Third, Sixth, and D.C. Circuits). See also United States v. Baston, 818 F.3d 651 (11th Cir. 2016) (under either approach international sex trafficker living in U.S. can be ordered to pay restitution for victim’s prostitution in Australia), cert. denied, 137 S. Ct. 850 (2017) (Thomas, J. dissenting) (Court should consider the issue).

Power of the Federal Government Over Indian Tribes

Tribes generally have power to try in tribal courts non-tribal members who commit torts on tribal property. See Dolgencorp, Inc. v. Miss. Band of Choctaw Indians, 746 F.3d 167 (5th Cir. 2015), affirmed by equally divided court sub nom. Dollar Gen. Corp. v. Miss. Band of Choctaw Indians, 136 S. Ct. 2159 (2016). See also United States v. Bryant, 136 S. Ct. 1954 (2016) (since Sixth Amendment right to counsel provision does not apply to tribal court proceedings, and the Indian Civil Rights Act of 1968 only requires appointed counsel when a sentence of more than one year’s imprisonment is imposed, defendant’s prior domestic violence convictions without appointed counsel are valid, and can count toward finding “two prior final convictions for domestic violence,” making the third such act of domestic violence “within . . . Indian country” a federal crime under the Violence Against Women and Department of Justice Reauthorization Act of 2005).

The Taxing Power and the Affordable Care Act (Obamacare)

§ 18.3.1, page 741, end of section: In National Federation of Independent Business v. Sebelius, 132 S. Ct. 2566 (2012), Chief Justice Roberts, joined by Justices Ginsburg, Breyer, Sotomayor and Kagan, concluded that the individual mandate requirement on individuals to purchase insurance or pay a penalty in the Patient Protection and Affordable Care Act of 2010 (Obamacare) could be viewed as a tax on individuals who do not have health insurance. Chief Justice Roberts pointed out that “functionally” the provision operates as a tax, is collected by the Internal Revenue Service, and the amount of the payment varies depending on a
person’s income, just like a tax. Id. at 2593-96. The Court has always held that Congress has the power to tax generally, and is not limited to taxing to advance other congressional powers in Article I, § 8. See United States v. Butler, 297 U.S. 1, 65-67 (1936). A four-Justice dissent rejected the mandate as a tax, because, from an “analytical” perspective, it was imposed as a “penalty” for not procuring insurance, and was called that by Congress in passing the Act. 132 S. Ct. at 2651-52 (joint opinion of Scalia, Kennedy, Thomas & Alito, JJ., dissenting). For Justices who are more analytically minded, as are formalist (Scalia, Thomas & Alito) and natural law (Kennedy) Justices, such analytic considerations are more important, as discussed in the E-Treatise at § 2.4, pages 30-34. For functionalists, like Holmesian (Roberts) and instrumentalist (Ginsburg, Breyer, Sotomayor, and Kagan) Justices, the functional aspect of a law are more critical, as discussed in the E-Treatise at § 2.4, pages 30-34. Chief Justice Roberts also noted the Court is not bound by what Congress calls a piece of legislation, but rather by its actual effect. 132 S. Ct. at 2594-95 (Roberts, C.J., opinion). Justice Scalia had acknowledged that principle in Clinton v. City of New York, 524 U.S. 417, 464-69 (1998) (Scalia, J., joined by O’Connor, J., and joined in part by Breyer, J., concurring in part and dissenting in part), discussed in the E-Treatise at § 19.4.2.2 n.93, noting the Line-Item Veto Act was not a line-item veto, but an impoundment, because it operated as an impoundment, despite the Congress’ terminology.

Conditions on Spending and Severability in the Affordable Care Act (Obamacare)

§ 18.3.2.2, page 744, text following n.166: An additional aspect of National Federation of Independent Business v. Sebelius, 132 S. Ct. 2566 (2012) (Affordable Care Act of 2010, so-called Obamacare), involved whether the federal government could deny all Medicaid funding if a state chose not to join in Medicaid expansion. Although no spending condition had been held coercive in the post-1937, New Deal era, seven Justices held the threat to remove all Medicaid funding, which might involve 10-40% of a state’s budget, was coercive. Id. at 2575, 2607 (Roberts, C.J., joined by Breyer & Kagan, JJ., as to Part IV); id. at 2662-66 (joint opinion of Scalia, Kennedy, Thomas & Alito, JJ., dissenting). Justices Ginsburg and Sotomayor disagreed with this conclusion. Id. at 2641-42 (Ginsburg, J., joined by Sotomayor, J., as to Part V).

A different 5-Justice majority concluded that the threat to remove all funding could be severed from the Act. Id. at 2607-08 (Roberts, C.J., joined by Breyer & Kagan, J., as to Part IV); id. at 2642 (Ginsburg, J., joined by Sotomayor, J., as to Part V). The 4-Justice joint dissent would have held this threat rendered the entire Medicaid expansion unconstitutional. Id. at 2668-71 (joint opinion of Scalia, Kennedy, Thomas & Alito, JJ., dissenting). Combined with the view that the individual mandate was also unconstitutional, the joint dissent would have ruled the entire Act unconstitutional. Id. at 2671-77. Once the mandate provision is constitutional under the Taxing power, discussed in this Supplement at § 18.3.1 end of section, the majority’s analysis is consistent with the Court’s usual practice to sever out provisions if possible. 132 S. Ct. at 2607-08 (Roberts, C.J., joined by Breyer & Kagan, J., as to Part IV); id. at 2642 (Ginsburg, J., joined by Sotomayor, J., as to Part V). See generally E-Treatise § 17.4.2, page 695, nn.600-602; INS v. Chadha, 462 U.S. 919, 931-34 (1983) (unconstitutional legislative veto in Chadha, and by analogy 200-plus other statutes, severable), discussed at § 17.4.2, page 694 & § 19.4.2.1, page 796. Under the Act, the federal government will pick up all costs of expanding Medicaid until 2016, 95% in 2017, 94% in 2018, 93% in 2019, and 90% thereafter. While the threat to remove all funding is gone, there is still pressure on states to expand since their citizens must pay federal taxes to support expansion in states which do participate. The decision will also likely increase the number of cases where spending conditions will be challenged. As discussed in the E-Treatise § 18.3.2, page 744, n.166, no court ever held the threat in the No Child Left Behind Act to remove federal support for education unless states adopted national testing standards was unconstitutional. The federal government routinely waived requirements under the Act to ensure states would not be denied funding.

Validity of Treaties versus Statutes

§ 18.3.9, page 750, n.189: For an article adopting the novel view that treaty provisions should trump even later-passed statutes, departing from the normal, well-established rule that whichever one is passed last controls, see Scott A. Penner, Note, Changing the Balance of Power: Why a Treaty-Trump Presumption Should Replace the Later-in-Time Rule When Interpreting Conflicting Treaties and Statutes, 34 HASTINGS CONST. L.Q. 355 (2007). While not likely to be adopted in practice, the article is useful in challenging the premises of the current well-established rule on the topic.
Self-Executing versus Non-Self-Executing Treaties

§ 18.3.9, page 752, n.198: In Medellin v. Texas, 128 S. Ct. 1346 (2008), the Court held 6-3 that a treaty is not domestic law enforceable by the domestic courts unless Congress has either (1) enacted implementing statutes or (2) the treaty itself conveys an intention that it is “self-executing” and is ratified on those terms. Here, the International Court of Justice (ICJ) had held that Texas had violated international law by not informing a criminal defendant of his right to have his consulate notified of his detention in a case tried in Texas state courts. Chief Justice Roberts noted that none of the sources of international law created binding federal law in the absence of implementing legislation. Since ICJ judgments may interfere with state procedural rules, “one would expect the ratifying parties to the relevant treaties to have clearly stated their intent to give those judgments domestic effect, if they had so intended.” Id. at 1363-64. Consistent with Holmesian and natural law resort to legislative and executive practice, the Chief Justice stressed that the executive branch had adhered to its view that the relevant treaties did not create domestically enforceable law. Id. at 1361. Justice Stevens did not join the majority opinion because he viewed the opinion as potentially creating a presumption of treaties being non-self-executing, a view he did not share. Id. at 1372-73 (Stevens, J., concurring in the judgment). A three-Justice dissent noted the Court had many times found treaty provisions self-executing although they contained no text on point. Applying a factor balancing test – the instrumentalist predisposition for such tests discussed in the E-Treatise at § 4.2.2 text following n.48 – Justice Breyer found seven reasons which, taken together, gave the ICJ judgment domestic effect. These included: the objective of the ICJ Protocol was to provide a forum for compulsory settlement; this case concerns matter which judges are familiar; the Court will not need to create a new cause of action; and neither the President nor Congress had expressed concern about judicial enforcement. Id. at 1383-89 (Breyer, J., joined by Souter & Ginsburg, JJ., dissenting).

Ability to Increase Congressional Regulatory Power by the Treaty Power

§ 18.3.9, page 752, n.199: In Bond v. United States, 134 S. Ct. 2077 (2014), the Court dodged the issue of whether a treaty could augment Congress’ power by ruling the Chemical Weapons Convention Implementation Act of 1998 did not reach an attempt by a wife to injure minimally her husband’s lover with a chemical compound. A three-Justice concurrence concluded the statute literally applied, but was unconstitutional as outside Congress’ domestic power, and not justified by treaty power, which is limited to international matters. Id. at 2102 (Thomas, J., joined by Scalia, J., & Alito, J., as to Parts I, II and III, concurring in the judgment).

Property Clause and Status of Puerto Rico

§ 18.3.10, page 752, text following n.200: See Puerto Rico v. Sanchez, 136 S. Ct. 1863 (2016) (Puerto Rico is not a State, but derives authority from being a United States Territory, and thus is not a separate sovereign for the Double Jeopardy Clause of the Fifth Amendment) (Breyer, J., joined by Sotomayor, J., dissenting). But see Puerto Rico v. Franklin California Tax-Free Trust, 136 S. Ct. 1938 (2016) (Puerto Rico has long been treated by Congress as a State for purposes of the Bankruptcy Code; 1984 Amendment excluding Puerto Rico as a State for the purpose of defining who may be debtor under Chapter 9, thus preventing Puerto Rico from authorizing its municipalities to seek Chapter 9 relief, does not alter treating Puerto Rico as a State for other purposes, including Chapter 9's preemption provision) (Sotomayor, J., joined by Ginsburg, J., dissenting) (Alito, J., took no part in the consideration or decision).

Recent 10th Amendment Cases

§ 18.4.5, page 763, end of section: In Murphy v. NCAA, 138 S. Ct. 1461 (2018), the Supreme Court struck down the entire Professional and Amateur Sports Protection Act (PASPA) as “commandeering” in violation of the 10th Amendment because part of the statute dictated what a state legislature may or may not do by prohibiting states from repealing their bans on sports gambling. Had Congress merely said that States or private parties must refrain from operating sports gambling schemes that would have been constitutional under the Commerce Clause. However, such a statute might have imposed budgetary costs on the federal government to enforce such a ban, and PASPA was passed in part based on assurances it would impose “no
costs.” That may explain why Congress passed the statute they did. Three Justices argued that part of PASPA did directly regulate private individuals, and that part of PASPA should have been allowed to stand. Id. at 1489 (Ginsburg, J., joined by Sotomayor, J., and in part by Breyer, J., dissenting). Although not technically a 10th Amendment issue given Garcia, in Bond v. United States, 131 S. Ct. 2355 (2011), a unanimous Court said litigants can enforce what they might consider 10th Amendment limits on the federal government by requiring regulatory authority to be justified under other Clauses of the Constitution. Justice Kennedy noted, “Fidelity to principles of federalism is not for the States alone to vindicate.” Id. at 2364.

“Unitary” versus “Unilateral” Executive Power

§ 19.1, page 773, text following n.12: For an article comparing a “Unitary Executive” model with “Unilateral” executive action, see Thomas J. Cleary, A Wolf in Sheep’s Clothing: The Unilateral Executive and the Separation of Powers, 6 PIECE L. REV. 265 (2007) (while the Constitution vests all executive powers in a President, the “unitary executive” theory, some believe the President is vested with broad power to act “unilaterally”). This issue lies behind criticism by Democrats of unilateral action by President Bush, such as on terrorism, and criticism by Republicans of unilateral action by President Obama, such as aiding the overthrow of Khadafi in Libya without congressional approval, waiving deportation for some aliens illegally in the United States, and waiving the employer mandate in the Affordable Care Act. Presidents can respond to criticism by citing presidential authority as Commander-in-Chief, right to prosecutorial discretion, or delegated authority in statutes to draft certain kinds of executive orders. See Michael A. Olivas, Dreams Deferred: Deferred Action, Prosecutorial Discretion, and the Vexing Case(s) of Dream Act Students, 21 WM. & MARY BILL RTS. J. 463 (2012) (prosecutorial discretion common in such cases); Texas v. United States, 787 F.3d 733 (5th Cir. 2015) (2-1 Panel decision) (normal administrative “notice and comment” rulemaking cannot be waived when the President not only “waives” deportation, but makes illegal aliens eligible for “work permits”), affirmed by an equally divided court, United States v. Texas, 136 S. Ct. 2271 (2016).

Presidential Compensation and Emoluments Clause

§ 19.3.1, page 778, text preceding n.28: Under Art. II, § 1, cl. 7, the President receives a fixed compensation for his services, currently $400,000 a year, and shall not receive “any other Emolument” from the United States or from any individual State. Under Art. I, § 9, cl. 8, “no Person holding any Office of Profit or Trust under them, shall, without the Consent of Congress, accept any present, Emolument, Office or Title, of any kind whatever, from any King, Prince, or foreign State.” The Foreign Emoluments Clause has recently been the subject of litigation given President Trump’s refusal fully to divest himself while President of his extensive property holdings. The President’s motion to dismiss a lawsuit brought by the District of Columbia and State of Maryland, focused on payments to the Trump International Hotel in Washington, D.C., was denied on July 25, 2018 in a comprehensive and well-reasoned opinion on the issue. District of Columbia v. Trump, 315 F Supp. 3d 875 (D. Maryland 2018). Proceedings are continuing in the case.

Presidential Power Over National Policy: International Matters

§ 19.3.2, page 783, text following n.42: An approach similar to Dames & Moore v. Regan was manifested by the Chief Justice’s opinion for the Court in Medellín v. Texas, 128 S. Ct. 1346 (2008). The Court had first ruled that a judgment by the International Court of Justice was not self-executing, discussed in this Supplement at § 18.3.9 n.198. The Court then rejected a contention that an ICJ judgment had become domestic law binding on state and federal courts as the result of a Presidential Memorandum. Chief Justice Roberts wrote that the executive cannot unilaterally execute a non-self-enforcing treaty by giving it domestic effect. The Court distinguished cases based on Justice Frankfurter’s famous passage, discussed in the E-Treatise at § 19.3.1 n.29, that “a systematic, unbroken, executive practice, long pursued to the knowledge of Congress and never before questioned” may create a “gloss” on executive power under Article II. Here, there was not a single prior instance of acquiescence in a Presidential directive issued to state courts. 128 S. Ct. at 1370. Justice Stevens agreed that unilateral Presidential action could not make a non-self-executing treaty binding law in American courts. Id. at 1374 (Stevens, J., concurring in the judgment). Three Justices did not address the issue because they concluded that the treaty was self-executing, discussed in this Supplement at § 18.3.9 n.198. 128 S. Ct. at 1391 (Breyer, J., joined by Souter & Ginsburg, JJ., dissenting). Following
Medellin, Texas applied the death penalty to Mexican nationals, despite the Mexican consulate not having been informed of their detention initially, as the ICJ judgment said was required under international law. Jose Medellin was executed on August 5, 2008. Another similar Mexican national was executed on July 7, 2011. *Garcia v. Texas*, 131 S. Ct. 2866 (2011) (Breyer, J., joined by Ginsburg, Sotomayor & Kagan, JJ., dissenting).

In *Zivotofsky ex rel. Zivotofsky v. Secretary of State*, 135 S. Ct. 2076, 2083-96 (2015), the Court considered the constitutionality of a congressional statute which provides that Americans born in Jerusalem may elect to have “Israel” listed as their place of birth on their passports, which the State Department declined to follow, citing its long-standing policy of not taking a position on the political status of Jerusalem. The Court held that the President’s power to decide whether and on what terms to recognize foreign governments was “exclusive” and “conclusive” on the matter, based on text, long-standing practice of congressional acquiescence, Court precedents, and functional considerations of the need for nation to “speak with one voice.” Three Justices dissented from this conclusion. *Id.* at 2116-17 (Scalia, J., joined by Roberts, C.J., and Alito, J., dissenting) (Act proper exercise of Congress’ power over Naturalization, which “enables Congress to furnish the people it makes citizens with papers verifying their citizenship”); *id.* at 2113 (Roberts, C.J., joined by Alito, J., dissenting) (“Today’s decision is a first: Never before has this Court accepted a President’s direct defiance of an Act of Congress in the field of foreign affairs.”). *See also id.* at 2096-97 (Thomas, J., concurring in part and dissenting in part) (President has exclusive power over passports, part of President’s power to recognize foreign governments, but not over consular reports used for naturalization, which is Congress’ power over Naturalization). The constitutionality of President Trump’s so-called “Muslim travel ban” is discussed at A2.

**War Powers: Presidential Authority to Authorize Warrantless Wiretapping**

§ 19.3.3, page 789, n.58: On appeal, the Sixth Circuit reversed the lower court on grounds the plaintiffs could not prove they had been the victims of warrantless wiretapping, and thus lacked standing. *ACLU v. National Security Agency*, 493 F.3d 644 (6th Cir. 2007). In *In re National Security Agency Telecommunications Records Litigation*, 700 F. Supp. 2d 1182 (N.D. Cal. 2010), the government had inadvertently disclosed a classified document that indicated the individual had been wiretapped, and thus standing was not a problem. The district court judge held that warrantless wiretapping, unauthorized by Congress, was unlawful, rejecting the argument that the case should have been dismissed under the “state secrets” doctrine to protect the confidential nature of the program. Prior to this decision, on September 23, 2009, Attorney General Holder issued a new Department of Justice guideline that the government will assert the privilege only for information that could cause “significant harm” to national security interests and only if personally approved by the Attorney General. A new Department of Justice State Secrets Review Committee was created.

**War Powers: Congressional Authority to Authorize Warrantless Wiretapping**

§ 19.3.3, page 789, text following n.58: As predicted in the E-Treatise, Congress did authorize in 2007 warrantless wiretapping for national security along the lines of existing executive practice, amending the Foreign Intelligence Surveillance Act (FISA). A further wiretapping law, giving telecommunications companies immunity for following presidential directives before Congress acted, and thus acted possibly unlawfully, was signed into law in 2008. This law was upheld in *In re National Security Agency Telecommunications Records Litigation*, 671 F.3d 881 (9th Cir. 2011). Arguments about Fourth Amendment search and seizure problems with FISA are addressed in an article cited in the E-Treatise at § 23.2.1.1 n.92. *See also Emily Berman, The Paradox of Counterterrorism Sunset Provisions, 81 FORDHAM L. REV. 1777 (2013); Klayman v. Obama*, 957 F. Supp. 2d 1 (D.D.C. 2013) (NSA surveillance program likely violates Fourth Amendment); *Smith v. Obama*, 24 F. Supp. 3d 1005 (D. Idaho 2014) (NSA program likely constitutional). Following revelation by Edward Snowden that the NSA was engaged in the “bulk data” collection of all individuals’ telephone numbers, the Second Circuit ruled on May 7, 2015 that such collection was not authorized by Congress in the Patriot Act of 2001. *ACLU v. Clapper*, 785 F.3d 787 (2d Cir. 2015). In the Freedom Act of 2015, passed on June 2, 2015, Congress terminated authority for such “bulk collection” after an 180-day window (through November 29, 2015). Following this action, a FISA court decision disagreed with the Second Circuit, concluding that Congress had authorized collection prior to the Freedom Act of 2015, and such collection was consistent with the Fourth Amendment. *In re Application of the FBI for an Order Requiring Production of Tangible Things*, Docket No. BR 15-75 (June 9, 2015), *citing Smith*
Line-Item Veto versus Impoundment/Expedited Rescission Acts

§ 19.4.2.2, page 797, n.94: For an article discussing differences among short-term Presidential impoundment, requirements of expedited votes to rescind expenditures, and a Presidential line-item veto power, see Seema Mittal, Note, The Constitutionality of an Expedited Rescission Act: The New Line Item Veto or a New Constitutional Method of Achieving Debt Reduction, 76 GEO. WASH. L. REV. 125 (2007) (proposed legislation, not enacted, involved giving the President power to propose rescissions of spending provisions enacted into law, which then must receive an up-or-down vote).

Separation of Powers: Who are “Officers” Under President’s Appointment Power

§ 19.4.3.1, page 799, text following n.97: In Lucia v. SEC, 138 S. Ct. 2044 (2018), the Court held that the SEC’s Administrative Law Judges (ALJs) are “Officers” who exercise “significant authority” and thus must be appointed consistent with the Appointments Clause, not by merit-selection process administered by the Office of Personnel Management), citing, Freytag v. Commissioner of Internal Revenue, 501 U.S. 868 (1991) (Tax Court judges are “Officers” and Bandimere v. SEC, 844 F.3d 1168 (10th Cir. 2016) (SEC’s ALJs are “Officers”). Under this approach, well over 90% of those who render service to the Federal Government are not “Officers.” See Free Enterprise Fund v. Public Company Accounting Oversight Board, 561 U.S. 477, 506 n.9 (2010). Instead of the current Lucia/Freytag case-by-case approach, Justices Thomas and Gorsuch proposed in Lucia a broad view that any individual “with responsibility for an ongoing statutory duty” should be viewed as an “Officer.” Lucia, 138 S. Ct. at 2056 (Thomas, J., joined by Gorsuch, J., concurring). In contrast, Justices Ginsburg and Sotomayor proposed that one component of “significant authority” should be a requirement that the individual makes “final, binding decisions.” Thus any person who “merely advises and provides recommendations,” as do the ALJs in Lucia, should not be an “Officer.” Id. at 2065 (Ginsburg, J., joined by Sotomayor, J., dissenting).

Separation of Powers: President’s Recess Appointment Power

§ 19.4.3.1, page 804, n.112: Two recent Court of Appeals challenged the accepted view of the Recess Power. See NLRB v. New Vista Nursing & Rehabilitation, 719 F.3d 203 (3rd Cir. 2013); Noel Canning Division of Noel Corp. v. NLRB, 705 F.3d 490 (D.C. Cir. 2013). The Supreme Court considered the issue in NLRB v. Noel Canning, 134 S. Ct. 2550 (2014). The majority followed executive and legislative practice allowing the President to make “recess” appointments for any vacancy as long as the Senate is in “recess” when the appointment occurs, but noted that virtually all such appointments have come when the “recess” was longer than 10 days. In this case, the President made the “recess” appointment when Congress was meeting in pro forma sessions every three days, because under Art. I, § 5, cl. 4, “Neither House, during the Session of Congress, shall, without the Consent of the other, adjourn for more than three days,” and the House of Representatives did not agree to a longer recess, in part to prevent the President from making “recess” appointments. The Court concluded that this short three-day period was not a “recess” triggering the Clause, except perhaps for “emergency” circumstances where a “recess” appointment even during that short period might be permitted. Four Justices adopted the Court of Appeals’ “literal” interpretation that the President can only use the recess power for positions becoming available during a Senate recess and recess appointments must be made during that recess period. Id. at 2592 (Scalia, J., joined by Roberts, C.J., and Thomas & Alito, JJ., concurring in the judgment). Courts have held that decisions made by the NLRB which involved these “unconstitutional” recess appointees are valid, having been ratified by post-Noel Canning properly constituted NLRB action. See, e.g., Advanced Disposal Services. E., Inc. v. NLRB, 820 F.3d 592 (3rd Cir. 2016).

Separation of Powers: The Vacancies Act

§ 19.4.3.1, page 805, n.115: In NLRB v. SW General, Inc., 137 S. Ct. 929 (2017), the Court held that the limitations in the Federal Vacancies Reform Act that a person cannot serve as an “acting” agency officer if the President has nominated that person to fill the position and is awaiting Senate confirmation applies not
only to “first assistants” who automatically assumed the position when their boss left, but also applies to anyone designated as an acting agency officer. *Id.* at 949 (Sotomayor, J., joined by Ginsburg, J., dissenting).

**Separation of Powers: Removal of Executive Officials**

§ 19.4.3.2, page 808, n.128: In *Free Enterprise Fund v. Public Accounting Oversight Board*, 130 S. Ct. 3138 (2010), the President could only remove Securities and Exchange Commissioners for good cause, and those Commissioners could only remove members of the Public Accounting Oversight Board for good cause. A 5-4 Court majority held that such “double” good-cause removal protection – a unique arrangement not used in any other federal statute – did “impede” the President’s ability to perform his constitutional duties. The Court struck down the limitation Commissioners’ removal authority, leaving them free to remove the Oversight Board members at will. *Id.* at 3153-55, 3161-62. A four-Justice dissent noted that the “double” good-cause removal did not significantly interfere with the President’s executive power. *Id.* at 3164 (Breyer, J., joined by Stevens, Ginsburg & Sotomayor, JJ., dissenting). As discussed in the E-Treatise at § 6.2.2.4 text preceding n.62, conservative judges tend to be more protective of executive power, as they were here, while liberal judges tend to be more protective of the legislature. *Cf. PHH Corp. v. Consumer Financial Protection Bureau*, 839 F.3d 1 (D.C. Cir. 2016) (rehearing *en banc* granted, panel decision holding for cause removal provision for Director of CFPB intruded too greatly into presidential powers vacated).

**Separation of Powers: Presidential Signing Statements**

§ 19.4.4, page 811, add at bottom of the page: Probably the best explanation for President George W. Bush’s increased use of presidential signing statements is that his advisers were driven predominantly by a formalist, strict separation of powers approach and belief in strong executive power, while Congress and the courts have consistently adopted a non-formalist, sharing of powers approach, with greater limits on inherent executive power. These differences are summarized in the E-Treatise at § 19.1, pages 771-73 & § 19.3.2, pages 783-84 & nn.43-44. *See generally* Curtis A. Bradley & Eric A. Posner, *Presidential Signing Statements and Executive Power*, 23 CONST. COM. 307 (2006). On March 9, 2009, President Obama released a memorandum on “Presidential Signing Statements.” President Obama stated, “I will ensure that signing statements identify my constitutional concerns about a statutory provision with sufficient specificity to make clear the nature and basis of the constitutional objection.” The memorandum further stated, “To ensure that all signing statements previously issued are followed only when consistent with these principles, executive branch departments and agencies are directed to seek the advice of the Attorney General before relying on signing statements issued prior to the date of this memorandum."

**Separation of Powers: Political Considerations**

**Legislative Immunities under the Speech or Debate Clause**

§ 20.1.4.1, page 839, n.57: *See also United States v. Renzi*, 769 F.3d 731 (9th Cir. 2014) (if a member of Congress offers evidence of his or her own legislative acts, government narrowly confined rebuttal evidence does not constitute “questioning” under Speech or Debate Clause); *Reeder v. Madigan*, 780 F.3d 799 (7th Cir. 2015) (legislators and their aides are immune from suit for denying a reporter press credentials as the decision to confer media credentials is legislative in nature); *Menendez v. United States*, 831 F.3d 155, 166-69 (3rd Cir. 2016) (alleged illegal lobbying activities by Senator Menendez not protected, because considering “content, purpose, and motive” the district court found as a factual matter that Senator Menendez had not met his burden to show by a preponderance of the evidence that his lobbying activities were legitimate legislative “oversight” of the executive branch, rather than a non-legislative attempt to influence executive branch action; that factual decision is not “clearly erroneous” – and thus affirmed on appeal – and consideration of “‘motive’ is appropriate where the act is not clearly legislative or non-legislative, but “ambiguously legislative.”).
Absolute Immunity

§ 20.1.4.2.B, page 846, n.88: In *Van De Kamp v. Goldstein*, 129 S. Ct. 855, 863-64 (2009), citing *Imbler v. Pachtman*, 424 U.S. 409 (1976), the Court considered whether the *Imbler* principle of prosecutorial immunity for official actions applied to a charge that plaintiff was handicapped at trial by a failure of the prosecutor to carry out his constitutional duty to disclose that a key witness had received reduced sentences for providing prosecutors with favorable testimony in other cases. Plaintiff claimed his rights were violated by the chief supervisory prosecutor’s failure to train adequately those who conducted the trial. A unanimous Court said the administrative obligations noted by the plaintiff were directly connected with the conduct of trials, involved legal knowledge and exercise of discretion, and thus the concerns about protecting the functioning of the prosecutor’s officer supported granting defendant absolute immunity. See also *Rehberg v. Paulk*, 132 S. Ct. 1497 (2012) (witness who testified at grand jury proceedings entitled to absolute immunity from 42 U.S.C. § 1983 claims just as witnesses who testify at trial); *Burton v. Infinity Cap. Mgmt.*, 753 F.3d 954 (9th Cir. 2014) (lawyer who wrote show cause order for judge in violation of statutory automatic stay does not have immunity for contempt under quasi-judicial immunity doctrine).

Qualified Immunity

§ 20.1.4.2.B, page 848, text following n.91: The criticism of *Brosseau v. Haugen*, 543 U.S. 194, 198-99 (2005), was accepted by the Court in *Pearson v. Callahan*, 129 S. Ct. 808 (2009). The Court first adopted the *Brosseau* approach – courts must always consider was a constitutional right violated before addressing whether the law was clearly established at the time – in *Saucier v. Katz*, 533 U.S. 194 (2001). In an unanimous opinion in *Pearson*, the Court overruled *Saucier* and held that district courts should exercise their sound discretion in deciding which of the two inquiries of qualified immunity analysis – was a right violated and was the law clearly established at the time – needed to be addressed to resolve the case. Justice Alito noted the *Saucier* rule had been criticized by scholars and judges as often wasteful of party resources and judicial time, and overruling would not upset anyone’s settled expectations. *Id.* at 818-22. The Court held police officers were entitled to qualified immunity as their warrantless entry did not violate clearly established law because plaintiff had invited a police informant into his home and the officers could be considered invited to enter by a “consent-once removed” theory accepted by several lower courts. *Id.* at 822-23.

Where a lower court considers both issues of immunity, the Supreme Court has the authority to correct errors in either analysis. *Ashcroft v. Al-Kidd*, 131 S. Ct. 2074, 2080, 2083 (2011). The usual rule that a defendant may not appeal an order denying summary judgment once a full trial is held applies to issues of qualified immunity. *Ortiz v. Jordan*, 131 S. Ct. 884 (2011). The usual rule that in summary judgment motions all reasonable inferences are to be drawn in favor of the non-moving party also applies in qualified immunity cases. *Tolan v. Cotton*, 134 S. Ct. 1861 (2014).

For recent qualified immunity cases, see *White v. Pauly*, 137 S. Ct. 548 (2017) (officer who arrived late at an ongoing police action and witnessed shots being fired by one of several individuals in a house entitled to qualified immunity when he shot and killed an armed occupant of the house without first giving a warning); *Wood v. Moss*, 134 S. Ct. 2056 (2014) (Secret Service agents have qualified immunity when moving anti-Bush protestors farther away from President than pro-Bush supporters because no clearly established law requires protestors with different viewpoints to be kept at comparable distances given compelling interest in Presidential safety); *Werner v. Wall*, 836 F.3d 751 (7th Cir. 2016) (state prison officials entitled to qualified immunity for incarcerating sex offender for roughly 100 days beyond mandatory release date where no approved residence was found as required by applicable rules of supervised release); *Occupy Nashville v. Haslam*, 769 F.3d 434 (6th Cir. 2014) (officers entitled to qualified immunity for arresting protestors who attempted to state in park overnight, since no clearly established right to 24-hour access to the public space); *Reichle v. Howards*, 132 S. Ct. 2088 (2012) (Secret Service agent who had probable cause to arrest individual entitled to qualified immunity on retaliatory arrest claim; the Court had held in *Hartman v. Moore*, 547 U.S. 250 (2006), that a retaliatory prosecution claim had to be based on lack of probable cause, but reserved the question whether that doctrine applies to retaliatory arrest); *Plumhoff v. Rickard*, 134 S. Ct. 2012 (2014) (police officer who fired 15 times into car in the course of high-speed pursuit, killing the driver, had qualified immunity against allegation he used excessive force); *Messerschmidt v. Millender*, 132 S. Ct. 1235 (2012)
(police officers entitled to qualified immunity when not reasonably obvious that search warrant issued by a neutral magistrate for any guns and gang-related items was overbroad); Ryburn v. Huff, 132 S. Ct. 987 (2012)

(officials entitled to qualified immunity when entering home without a warrant while investigating rumored gun threats based on concern for their own and others’ safety after the homeowner acted oddly and fled the residence during questioning); Filarsky v. Delia, 132 S. Ct. 1657 (2012) (private individual temporarily retained by the government for work is entitled to seek qualified immunity for that work).

But see Sims v. Labowitz, 885 F.3d 254 (4th Cir. 2018) (no qualified immunity for detective who required 17-year-old boy to masturbate to comply with warrant to obtain picture of his erect penis as evidence he sent sexually explicit photograph to 15-year-old girlfriend); Alfano v. Lynch, 847 F.3d 71 (1st Cir. 2017) (no qualified immunity as clearly established police must have probable cause to believe individual incapacitated, not merely inebriated, to take into protective custody); Davidson v. City of Stafford, Texas, 848 F.3d 384 (5th Cir. 2017) (no qualified immunity for arresting anti-abortion protestor for not giving first and last name, where Texas Penal Code § 38.02 only requires giving such identification after an arrest, not as a reason to arrest); Genusia v. Canova, 748 F.3d 1103 (11th Cir. 2014) (police officers who eavesdropped on conversation in a police station interview room between suspect and his lawyer not entitled to qualified immunity); Russell ex rel. J.N. v. Virg-In, 258 P.3d 795 (Alaska 2011) (no qualified immunity when officer Tasered 11-year-old girl who had been running away from him after being stopped for reckless driving of an ATV (all terrain vehicle), when she was never aggressive or threatening to the officer once he caught her).

Judicial Immunity from Congressional Statutes Intruding on the Judicial Role

§ 20.1.4.3, page 849, text following n.96: In Bank Markazi v. Peterson, 136 S. Ct. 1310 (2016), a 6-2 Court held that Congress could make “as available for execution by holders of terrorism judgments against Iran ‘the financial assets that are identified in and subject to the proceedings’” in a specific identified case. The Court concluded that consistent with Plaut v. Spendthrift Farm, Inc., 514 U.S. 211, 218-19 (1995), Congress could make this legal change while the case was pending, prior to a final decision in the case. The two-Justice dissent concluded that this congressional action was an attempt to usurp the judicial role by directing a result in a pending case, and thus violated general separation of powers principles discussed in Plaut and in United States v. Klein, 80 U.S. (13 Wall.) 128 (1872), discussed in the E-Treatise at § 17.2.3.1 n.153. Bank Markazi, 136 S. Ct. at 1332-35 (Roberts, C.J., joined by Sotomayor, J., dissenting). See also Patchak v. Zinke, 138 S. Ct. 897 (2018) (Congressional statute directing courts to promptly dismiss suits relating to specific property held in trust by the federal government for a Native American tribe constitutional); id. at 912 (Ginsburg, J., joined by Kennedy & Gorsuch, JJ., dissenting) (by focusing on a specific piece of property, impermissible attempt to direct result in a particular case).

Judicial Compensation

§ 20.1.4.3, page 849, n.97: In Beer v. United States, 696 F.3d 1174 (Fed. Cir. 2012) (10-2 en banc decision), cert. denied, 133 S. Ct. 1997 (2013), an en banc panel distinguished United States v. Will, 449 U.S. 200 (1980), and held that because cost of living adjustments in the Ethics Reform Act of 1989 were stated as automatic, not discretionary, they “vested”; thus Congress could not deny them.

Sovereign Immunity of the United States or Foreign States from Suit

§ 20.1.4.4, page 851, n.104: In Ali v. Federal Bureau of Prisons, 128 S. Ct. 831 (2008), the Court interpreted 28 U.S.C. § 2680 (the Federal Tort Claims Act). That Act withdrew from the United States’ waiver of sovereign immunity all claims arising from the detention of property by “any officer of customs or excise or any other law enforcement officer.” A 5-4 Court held the phrase “any other law enforcement officer” was not limited to officers engaged in custom or excise activity; thus, it included a prison officer. Justice Thomas relied in a formalist manner on the breadth of the word “any.” If Congress had intended a limited meaning it could have said “any other law enforcement officer acting in a customs or excise capacity.” Id. at 840. In dissent, Justice Kennedy said that the last phrase (“any other law enforcement officer”), properly read, shares
the characteristics of the preceding phrases (“officer(s) of customs or excise” and “assessment or collection of any tax or customs duty”). He said that there was little concern about possible frivolous claims because there are in place administrative procedures that must be exhausted before a suit is allowed. Kennedy noted, “The seizure of property by an officer raises serious concerns for the liberty of our people and the Act should not be read to permit appropriation of property without a remedy in tort by language so obscure and indirect.” Id. at 849 (Kennedy, J., joined by Stevens, Souter & Breyer, JJ., dissenting).

Regarding application of the Foreign Sovereign Immunities Act, the Court held in Bolivarian Republic of Venezuela v. Helmerich & Payne Int’l Drilling Co., 137 S. Ct. 1312, 1316 (2017), that to defeat foreign sovereign immunity and confer jurisdiction on a court under the Act’s “expropriation exception”, a party’s “nonfrivolous, but ultimately incorrect, argument that property was taken in violation of international law is insufficient to confer jurisdiction. Rather, [the party must present factual allegations that] make out a legally valid claim that a certain kind of right is at issue (property rights) and that the relevant property was taken in a certain way (in violation of international law). A good argument to that effect is not sufficient.”

Preemption under the Supremacy Clause

§ 20.3.1.1, page 855, n.126: In Haywood v. Drown, 129 S. Ct. 2108, 2117-18 (2009), a 5-4 Court held that the Supremacy Clause was violated by a New York statute that withdrew from state trial courts the power to hear actions for money damages brought against state correctional officers – a withdrawal that included § 1983 actions. That was contrary to Congress’ judgment when enacting § 1983 that all persons who violate federal rights while acting under color of state law shall be held liable for damages. A four-Justice dissent argued that under the Court’s precedents states remain free to alter the structure of their judicial system even if it means that certain federal actions will no longer be heard in state courts, so long as it is done by nondiscriminatory means. Id. at 2137-38 (Thomas, J., joined by Roberts, C.J., and Scalia, J., and Alito, J., as to Part III, dissenting). Justice Stevens responded that since the law was based on the view that damage suits against correctional officers are vexatious, the state law was effectively an immunity statute cloaked in jurisdictional garb. He said the Court’s holding merely confirmed the Supremacy Clause cannot be evaded by formalism. Id. at 2118. Cf. United States v. Klein, 80 U.S. 128, 145-48 (1872) (Congress cannot overturn a Court decision by denying jurisdiction to hear a case if the decision is relied upon in court; the statute’s purpose is critical, not literalism), discussed in the E-Treatise at § 17.2.3.1 n.153.

Recent Express and Implied Preemption Cases

§ 20.3.1.2, page 863, n.153: In Preston v. Ferrer, 128 S. Ct. 978, 986-87 (2008), an 8-1 Court held that the Federal Arbitration Act established a national policy favoring arbitration, and thus when parties agree to arbitrate all disputes arising under their contract, state laws lodging primary jurisdiction in another forum, whether judicial or administrative, are preempted. This support for arbitration is consistent with many Court cases. See Allied-Bruce Terminix Co. v. Dobson, 513 U.S. 265, 280 (1995); Gilmer v. Interstate/Johnson Lane Corp., 500 U.S. 20, 31 (1991) (“The advantages of arbitration are many . . . .”); Teresa L. Elliott, Responsibility of the Courts in Motions to Compel Arbitration, 32 OHIO N.U.L. REV. 89, 105 n.168 & passim (2006). Justice Thomas continued his states rights’ view that issues of arbitration should be viewed as matters of procedure, not substantive law, and thus FAA does not apply. 128 S. Ct. at 989 (Thomas, J., dissenting).

In Riegel v. Medtrone, Inc., 128 S. Ct. 999, 1006-11 (2008), an 8-1 Court held that the Medical Device Amendments of 1976 preempted state common-law claims of negligence, strict liability, and implied warranty against the manufacturer of a premarket approved device intended for human use. Justice Scalia noted state tort law remedies would disrupt the federal scheme. However, the states could continue to provide remedies for claims premised on a violation of FDA regulations because the state duties in such a case would parallel rather than add to federal requirements. Justice Ginsburg stated in dissent, “Congress, in my view, did not intend to effect a radical curtailment of state common-law suits seeking compensation for injuries caused by defectively designed or labeled medical devices.” Id. at 1013 (Ginsburg, J., dissenting). The clear language of the statute persuaded the rest of the Court, including Justice Stevens, id. at 1011-13 (Stevens, J., concurring in part and concurring in the judgment), that express preemption had taken place. However, Justice Stevens did indicate his agreement with Justice Ginsburg’s analysis of the purpose of the statute. Id. at 1011.
In *Rowe v. New Hampshire Motor Transport Ass’n*, 128 S. Ct. 989, 993-98 (2008), a unanimous Court held that a federal statute which prohibits states from enacting any law “related to” a motor carrier “price, route, or service” preempted two provisions of a Maine law that regulated the delivery of tobacco to customers within the state. The Court rested its decision on the fact that the federal prohibition relating to motor carriers was expressed in language similar to that relating to air carriers in the Airline Deregulation Act of 1978 (ADA). The Court had held in *Morales v. Trans World Airlines, Inc.*, 504 U.S. 374 (1992), that language in the ADA preempting state laws having a connection with or reference to “price, route, or service” included consumer-fraud statutes against deceptive airline-fare ads. The analogy was strengthened because both sets of state laws interfered with federal deregulation policy designed to insure that services reflect maximum reliance on competitive market forces. See also *Northwest, Inc. v. Ginsberg*, 134 S. Ct. 1422 (2014) (claim by passenger airline breached Minnesota’s implied covenant of good faith and fair dealing in terminating his membership in preferred flyer program for his alleged abuse of the program preempted by ADA); *Gilstrap v. United Air Lines*, 709 F.3d 995 (9th Cir. 2013) (federal standards of care requiring airlines to provide assistance to disabled travellers preempt state law standards, but state law remedies for breaching those standards are not preempted).

During the 2008 Term, a 5-4 Court held in *Altria Group, Inc. v. Good*, 129 S. Ct. 538 (2008), that the federal Labeling Act neither expressly nor impliedly preempted a state statutory claim against a cigarette manufacturer based on the ground that its ads fraudulently conveyed the message that its “light” cigarettes delivered less tar and nicotine than regular brands. Noting the *Rice* presumption against preemption in areas of traditional state control, discussed in the E-Treatise at § 20.3.1.1 n.129, and building on Justice Stevens’ opinion in *Cipollone v. Liggett Group, Inc.*, 505 U.S. 504 (1992), discussed in the E-Treatise at § 20.3.1.2 n.136, the Court held the state law against fraudulent messages was not based on “smoking” or “health,” areas preempted by the Labeling Act, but instead invoked a general rule that creates a duty not to deceive. 129 S. Ct. at 545-51. Four Justices dissented, arguing that the *Cipollone* claim-by-claim approach had proved unworkable in the lower courts, and the Court should ask instead whether the state law in a practical sense compels manufacturers to engage in labeling behavior that Congress has barred states from prescribing directly. *Id.* at 554-63 (Thomas, J., joined by Roberts, C.J., and Scalia & Alito, JJ., dissenting).

In *Wyeth v. Levine*, 129 S. Ct. 1187 (2009), a 6-3 Court again applied the *Rice* presumption against preemption in holding that FDA approval of a label for the drug Phenergan did not preempt the application of state law on negligence and strict liability. *Id.* at 1201-04. Justice Breyer, concurring, said the FDA can make specific regulations describing when a labeling requirement serves as a ceiling as well as a floor, but no such regulation was at issue in this case. *Id.* at 1204 (Breyer, J., concurring). Justice Thomas continued his attack on implied preemption doctrines which allow the Court to invalidate state laws whenever the Court thinks they are an obstacle to the purposes of federal law. *Id.* at 1204-05 (Thomas, J., concurring in the judgment). In dissent, Justice Alito recounted the conversations between the FDA and the drug manufacturer. What the FDA had determined to be safe, Justice Alito said, was not intended by Congress to be set aside by a jury using state tort law. *Id.* at 1217-18 (Alito, J., joined by Roberts, C.J., and Scalia, J., dissenting).

In addition to these Supreme Court decisions, on May 20, 2009, President Obama ordered all federal agencies to review their preemption regulations in order to ensure they were consistent with President Clinton’s Executive Order 13,132 of August 4, 1999 on preemption. Under that order, preemption should emanate from statutes, federal grants of authority should be interpreted modestly, no more preemption should be found than necessary, and alternatives to preemption should be considered. While President Clinton’s Executive Order was never repealed during the Bush Administration, concern had been expressed that administrative agencies under the Bush Administration were not following the cautious approach toward preemption reflected in President Clinton’s Executive Order, and were concluding in too many cases that federal law was intended to preempt state laws, particularly state tort law or state statutes regulating businesses.

During the 2010 Term, a 5-4 Court held in *AT&T Mobility LLC v. Concepcion*, 131 S. Ct. 1740, 1753 (2011), that the Federal Arbitration Act preempted California’s judicial rule regarding unconscionability of class arbitration waivers in consumer contracts. *Id.* at 1756 (Breyer, J., joined by Ginsburg, Sotomayor & Kagan, JJ., dissenting). In *Bruesewitz v. Wyeth*, 131 S. Ct. 1068, 1082 (2011), a 6-2 Court held that the National Childhood Vaccine Injury Act preempted all design-defect claims against vaccine manufacturers brought by
plaintiffs who seek compensation for injury or death caused by vaccine side effects. *Id.* at 1086 (Sotomayor, J., joined by Ginsburg, J., dissenting); *id.* at 1082 (Justice Kagan took no part in the consideration or decision of the case). In *PLIVA, Inc. v. Mensing*, 131 S. Ct. 2567, 2572 (2011), a 5-4 Court held that a generic drug manufacturer’s duty of “sameness” under federal law, mandating the use of warning labels that are identical to its name-brand counterparts, made it impossible for drug manufacturers to enhance warnings; thus, state tort law inadequate warning label claims preempted. *Id.* at 2582 (Sotomayor, J., joined by Ginsburg, Breyer & Kagan, J., dissenting). In 2013, in *Mutual Pharmaceutical Co. v. Bartlett*, 133 S. Ct. 2466 (2013), the Court extended the failure-to-warn preemption doctrine in *PLIVA* to hold that a design defect claim, based on generic drug manufacturer’s failure to strengthen warnings on drug label, was also preempted. As in *PLIVA*, four Justices would have held the state law merely “supplements” or “complements” the federal scheme, and does not conflict with it. *Id.* at 2480-82 (Breyer, J., joined by Kagan, J., dissenting); *id.* at 2482-84 (Sotomayor, J., joined by Ginsburg, J., dissenting). But see *Wyeth, Inc. v. Weeks*, 159 So. 3d 649 (Ala. 2014) (brand-name manufacturer can be held liable for misrepresentation based on statements it made about the drug – as opposed to labels – by consumer injured by generic version, although drug manufacturer’s duty to warn is limited to an obligation to advise the prescribing physician under “learned-intermediary” doctrine).

Regarding state laws on immigration, a 5-3 Court held in *Chamber of Commerce of the United States v. Whiting*, 131 S. Ct. 1968, 1972-73 (2011), that Arizona’s requirement that every employer verify the employment eligibility of hired employees through a specific Internet-based system fell within a “savings clause” in federal immigration law, which expressly preempts “any State or local law imposing civil or criminal sanctions (other than through licensing or similar laws) upon those who employ . . . unauthorized aliens.” Thus, the Arizona law was not preempted. Three Justices dissented. *Id.* at 1987 (Breyer, J., joined by Ginsburg, J., dissenting); *id.* at 1998 (Sotomayor, J., dissenting). Justice Kagan took no part in the consideration or decision of the case. *Id.* at 1972.

In *Arizona v. United States*, 132 S. Ct. 2492 (2012) (Scalia, Thomas & Alito, JJ., concurring in part and dissenting in part) (Justices Scalia and Thomas concluded all provisions not preempted; Justice Alito concluded all provisions not preempted, except state misdemeanor for failure to comply with federal alien-registration requirements) (Kagan, J., took no part in the consideration or decision of the case), a 5-3 Court held that Arizona was preempted by federal immigration law from enacting provisions making the failure to comply with federal alien-registration requirements a state misdemeanor, making it a misdemeanor for an unauthorized alien to seek or engage in work in Arizona, and a provision authorizing state arrests for any individual if the officer has probable cause to believe the individual has committed some other offense that would make the individual removable from the United States. *Id.* at 2501-07. This decision is consistent with Court precedents underscoring the preeminent role given to the federal government in immigration policy. See generally *Toll v. Moreno*, 458 U.S. 1, 10 (1982), and cases cited therein. A provision requiring officers conducting stops, detentions, or arrests to verify a person’s immigration status with the federal government if the officer has a reasonable suspicion that the person was unlawfully in the United States was not facially preempted. 132 S. Ct. at 2507-09. However, the Court warned the provision could be challenged on an as-applied basis if the stops resulted in a detention of prolonged duration or otherwise were done inconsistent with federal policy, as if done on a racially discriminatory basis. *Id.* at 2509-10. See *Melendres v. Arpaio*, 784 F.3d 1254, 1266 (9th Cir. 2015) (district court did not abuse discretion to order data collection, and video-recording, of all traffic stops in Maricopa County, Arizona). See also *United States v. Alabama*, 691 F.3d 1269 (11th Cir. 2012) (Alabama provisions decided consistent with *Arizona v. United States*); *Georgia Latino Alliance for Human Rights v. Deal*, 691 F.3d 1250 (11th Cir. 2012) (same for Georgia).

In *Arizona v. Inter Tribal Council of Arizona, Inc.*, 133 S. Ct. 2247 (2013) (Thomas & Alito, JJ., dissenting), a 7-2 Court held that an Arizona requirement that applicants registering to vote provide independent proof of their citizenship was preempted by the National Voter Registration Act’s mandate that states “accept and use” the federal form and its requirement that applicants only need to aver, under penalty of perjury, that they are citizens. See also *Buquer v. City of Indianapolis*, 797 F. Supp. 2d 905 (S.D. Ind. 2011) (Indiana law allowing warrantless arrest of aliens for non-criminal conduct and for offering or accepting consular identification card as a valid form of identification preempted); *Villas at Parkside Partners v. Farmers Branch, Texas*, 675 F.3d 802 (5th Cir. 2012), aff’d, 726 F.3d 524 (5th Cir. 2013) (9-6 en banc opinion), (local occupancy restriction on rental properties that requires tenants to be in the country lawfully is an immigration law).
law posing as a housing regulation, and is preempted); Keller v. City of Fremont, 719 F.3d 931 (8th Cir. 2013) (same); State v. Sarrabea, 126 So. 3d 453 (La. 2013) (Louisiana law making it a felony for an alien to drive without documentation of lawful presence in the United States preempted); State v. Garcia, 401 P.3d 588 (Kan. 2017) (federal Immigration Reform and Control Act expressly preempts states from using I-9 employment verification form itself, or any information contained in form, in enforcing state laws).

On recent non-immigration matters where preemption was found, see National Meat Ass’n v. Harris, 132 S. Ct. 965 (2012) (Federal Meat Inspection Act preempts California provision prohibiting sale of meat or meat product of nonambulatory animals for human consumption and requiring euthanization of such animals, as applied to federally inspected swine slaughterhouses); American Trucking Ass’ns Inc. v. City of Los Angeles, 133 S. Ct. 2096 (2013) (mandatory concession agreement with truckers required by the Port of Los Angeles a regulation, not City acting as a market participant, and thus is preempted by federal law); Coventry Health Care of Mo., Inc. v. Nevils, 137 S. Ct. 1190 (2017) (Missouri law barring contractual subrogation and reimbursement prescriptions preempted by Federal Employees Health Benefits Act; state law plainly relates to benefits payments); Chaudhry v. City of Los Angeles, 573 Fed. App’x 628 (9th Cir. 2014) (Ninth Circuit, following Second, Seventh, and Tenth Circuits, held that a state law prohibition against pre-death pain and suffering in survival actions did not apply to § 1983 claims where death was caused by violation of federal law); Sherfel v. Newson, 768 F.3d 561 (6th Cir. 2014) (Wisconsin law requiring employers that offer paid disability leave to extend those benefits to new mothers preempted by Employee Retirement Income Security Act (ERISA)); New Hampshire Attorney General v. Bass Victory Committee, 104 A.3d 181 (N.H. 2014) (state law requiring disclosure of sponsors of “push-polling” preempted by Federal Election Campaign Act).

On recent non-immigration matters where preemption was not found, see Williamson v. Mazda Motor of America, Inc., 131 S. Ct. 1131, 1134 (2011) (Kagan, J., took no part in the consideration or decision of the case) (Federal Motor Vehicle Safety Standard giving auto manufacturers choice of installing either simple lap belts or lap-and-shoulder belts on rear inner seats did not preempt state law claims for products liability that could impose tort liability upon manufacturers who chose only to install a simple lap belt, distinguishing Geier v. American Honda Motor Co., 529 U.S. 861 (2000) (federal Safety Standard regarding installation of air bags preempts state tort lawsuits)); Dan’s City Used Cars Inc. v. Pelkey, 133 S. Ct. 1769 (2013) (state laws regulating storage and disposal of towed vehicles not preempted by Federal Aviation Administration rule preempting laws “related to a price, route, or service of any motor carrier . . . with respect to transportation of property”); Pharmaceutical Care Mgmt. Assoc. v. Gerhart, 853 F.3d 722 (8th Cir. 2017) (Iowa law forcing pharmacy benefit managers to disclose who they price generic drugs preempted by Employment Retirement Income Security Act (ERISA), because it interferes with uniform administration of ERISA plans nationwide).

See generally Kurns v. Railroad Friction Products Corp., 132 S. Ct. 1261 (2012) (Locomotive Inspection Act (LIA) preempts state products liability lawsuit alleging design defect and failure to warn related to asbestos where the locomotives had been approved under federal law); Delaware & Hudson Ry. Co., Inc. v. Knoedlerr Mfrs., Inc., 781 F.3d 656 (3rd Cir. 2015) (LIA does not preempt state law claims based on standards of care that stem from LIA itself); 23-34 94th St. Grocery Corp. v. New York City Board of Health, 685 F.3d 174 (2nd Cir. 2012) (New York City health code requiring all tobacco retailers to display signs bearing graphic anti-smoking images preempted by Federal Cigarette Labeling and Advertising Act); U.S. Smokeless Tobacco Manufacturing Co. v. New York City, 708 F.3d 428 (2nd Cir. 2013) (New York City ordinance effectively banning all sales of flavored smokeless tobacco not preempted by Federal Smoking Prevention and Tobacco Control Act); R.J. Reynolds Tobacco Co. v. Marotta, 214 So. 2d 590 (Fla. 2017) (state-law claims related to injuries from smoking not preempted by federal requirements regarding uniform labeling and advertising requirements); Graham v. R.J. Reynolds Tobacco Co., 2017 WL 2176488 (11th Cir. 2017) (same; 8-1 en banc decision, with one judge deciding the case on other grounds).

Market Participant Exception to the Dormant Commerce Clause

§ 20.2.2.3.B, page 878, n.225: The market participant exception was held to apply where a state contracted with a private bridge company to build new ramps and roads to access a bridge in the state. See Mason and Dixon Lines v. Steudle, 683 F.3d 289 (6th Cir. 2012). The market participant exception was also held to apply to a case involving dormant commerce clause doctrine applied to foreign commerce. See Antilles Cement
Commerce Clause Review of State Taxation

§ 20.3.2.4.A, page 883, text at n.250: In Department of Revenue of Kentucky v. Davis, 128 S. Ct. 1801 (2008), the Court rejected a dormant commerce clause challenge directed at Kentucky tax provisions that exempted from state income tax the interest on bonds issued by Kentucky, but did not exempt the interest on bonds of other states. For the Court, Justice Souter noted that most states have similar laws, and the Court was reluctant to upset a market in bonds that had been in place for almost a century. Reasoning from precedent, he said this holding followed logically from United Haulers, 127 S. Ct. 1786 (2007), discussed in this Supplement at § 20.3.2.4.B text following n.262. Justice Souter interpreted the case as holding that there was no discrimination against interstate commerce where the government was pursuing goals unrelated to protectionism, and its law was directed instead to what was typically and traditionally a local government function. Justice Souter’s opinion also included a Part III(B), where Justice Souter said that dormant commerce clause analysis did not apply because under the market-participant doctrine Kentucky had entered the market for debt securities, just as Maryland had entered the market for automobile hulks in Hughes v. Alexandria Scrap Co., and South Dakota had entered the cement market in Reeves, Inc. v. Stake. 128 S. Ct. at 1811-14 (Souter, J., joined by Stevens & Breyer, JJ., as to Part III(B)). Hughes and Reeves are discussed in the E-Treatise at § 20.3.2.2.B nn.218-20. Justices Roberts and Scalia said that there was no need to engage in this analysis since the statute survived dormant commerce clause analysis anyway. 128 S. Ct. at 1821 (Roberts, C.J., concurring in part); id. at 1821 (Scalia, J., concurring in part). Justice Ginsburg also did not join in Part III(B), but gave no reason. Id. at 1804. In Part IV, Justice Souter concluded the challenger could not meet its burden of proving the burden on interstate commerce was “clearly excessive” under the Pike v. Bruce Church test, discussed in the E-Treatise at § 20.3.2.2.A n.196, because the Court was in no position to engage in a cost-benefit analysis of the long settled habits of the current state bond system to determine whether the burden was excessive. 128 S. Ct. at 1817-19 (opinion for the Court). Justice Scalia, concurring, reiterated his view that he would abandon Pike balancing altogether. Id. at 1821 (Scalia, J., concurring in part). Justice Thomas reiterated his stronger view that the Court should abandon dormant commerce clause analysis altogether. Id. at 1821-22 (Thomas, J. concurring in the judgment). In dissent, Justice Kennedy said precedents had established that laws with either the purpose or effect of discriminating against interstate commerce to protect local trade trigger the Maine v. Taylor test, discussed in the E-Treatise at § 20.3.2.2.A nn.209-16. United Haulers is not controlling because in that case the law applied equally to in-state and out-of-state commerce. Id. at 1824-29 (Kennedy, J., joined by Alito, J., dissenting). Kennedy also said a tax exemption is not the sort state involvement that falls within the market-participant exemption. Id. at 1829-30 (Kennedy, J., joined by Alito, J., dissenting). See also Matkovich v. CSX Transp., Inc., 793 S.E.2d 888 (W. Va. 2016) (taxpayer who is required to pay a motor fuel tax imposed by state law is entitled to a sales tax credit, under state law, not only for sales taxes paid to other states, but also sales taxes paid to subdivisions and municipalities of other states).

In Quill v. North Dakota, 504 U.S. 298 (1992), the Court reaffirmed the rule from National Bellas Hess, Inc. v. Department of Revenue of Illinois, 386 U.S. 753 (1967), that under dormant commerce clause analysis a state cannot require a retailer having no physical presence in that state to collect and remit sales taxes on the sales it makes. Quill thus gave a real competitive advantage to Internet sellers, who were in their infancy at the time. For example, Amazon just started selling books in 1995. In Quill, Justices Scalia, Kennedy, and Thomas indicated they ruled in Quill based on precedent, while noting, as discussed below at § 13.4.1, that Congress could overturn the National Bellas Hess ruling by statute at any time. 504 U.S. 319-20. Justice White dissented from the holding. Id. at 321. After Quill, states and lower federal courts struggled with the competitive advantage given by Quill. Cf. Brohl v. Direct Marketing Ass’n, 814 F.3d 1129 (10th Cir. 2016) (law requiring out-of-state retailers to report such sales to the state and notify their customers of their obligation to pay state sales tax, including an “annual purchase summary” if the customer bought more than $500 during the year, constitutional as not excessive burden under Pike v. Bruce Church). More recently,
Justices called for the Court to reexamine Quill. See District Marketing Ass’n v. Brohl, 135 S. Ct. 1124, 1135 (2015) (Kennedy, J., concurring) (“The legal system should find an appropriate case for this Court to reexamine Quill . . .”). In 2018, the Supreme Court overruled Quill in South Dakota v. Wayfair, Inc., 138 S. Ct. 2080 (2018) (Roberts, C.J., joined by Breyer, Sotomayor & Kagan, JJ., dissenting based on following Quill as precedent without regard to the fairness of the doctrine). This decision now permits states to implement sales tax regimes for both in-state and out-of-state sales.

Dormant Commerce Clause: Requiring Business Operations in the Home State

§ 20.3.2.4.B, page 885, text following n.262: In United Haulers Ass’n, Inc. v. Oneida-Herkimer Solid Waste Mgmt. Auth., 127 S. Ct. 1786 (2007), the Court was faced with a “flow control” ordinance which required trash haulers to deliver solid waste to a particular waste processing facility. In C & A Carbone, Inc. v. Town of Clarkstown, discussed at § 20.3.2.4.B n.262, the Court had struck down a flow control ordinance that forced haulers to deliver waste to a particular private processing facility. In United Haulers, the Court faced a flow control ordinance requiring haulers to bring waste to facilities owned and operated by a state-created public benefit corporation. The Court found this difference significant, noting that disposing of trash has been a traditional government activity for years, and laws that favor the government in such areas – but treat every private business, whether in-state or out-of-state, exactly the same – do not discriminate against interstate commerce. Id. at 1795-98. Justices Scalia and Thomas reaffirmed their view that the Court should abandon existing dormant commerce clause review as unjustified judicial activism without authorization in explicit constitutional text. Id. at 1798-99 (Scalia, J., concurring in the judgment); id. at 1799 (Thomas, J., concurring in the judgment). Three Justices dissented, viewing the flow control ordinances here as essentially identical to the ones ruled unconstitutional in Carbone. Id. at 1803-04 (Alito, J., joined by Stevens & Kennedy, JJ., dissenting). See also Rocky Mountain Farmers Union v. Corey, 730 F.3d 1070 (9th Cir. 2013) (California’s low carbon fuel standard is not facially discriminatory, even though formed with reference to state boundaries, since it treats ethanol from all sources evenhandedly); Pharmaceutical Res. & Mfrs. of America v. County of Alameda, 768 F.3d 1037 (9th Cir. 2014) (requiring prescription drug manufacturers to pay cost of collecting and disposing unused medicines from local residents constitutional under Pike v. Bruce Church).

Scope of Article IV, § 2 Privileges and Immunities Clause

§ 20.3.3.2, page 893, text following n.300: In 2013, the Supreme Court held that access to public information under a state’s Freedom of Information Act is not a “fundamental” right, and thus Virginia could restrict application of its Freedom of Information Act to Virginia residents. McBurney v. Young, 133 S. Ct. 1709 (2013) (unanimous opinion).

Article IV, § 2 Privileges and Immunities Clause and Attorney Regulation

Recent State Action Cases

§ 22.1.2.3, page 920, n.14 & § 22.1.2.5, page 927, end of section: Mark D. Rosen’s draft article, cited in the E-Treatise, was published at Mark D. Rosen, Was Shelley v. Kraemer Incorrectly Decided? – Some New Answers, 95 Calif. L. Rev. 451, 458-70 (2007). For a recent state action case, see Borrell v. Bloomsburg University, 870 F.3d 154 (3rd Cir. 2017) (private hospital that operated a joint Nurse Anesthetist clinical program with a public university not a state actor when student terminated for refusing to take drug test required by the hospital).
Modern Contract Clause Doctrine

§ 22.1.5, page 960, end of section: See Borman, LLC v. 18718 Borman, LLC, 777 F.3d 816 (2015) (Michigan Nonrecourse Mortgage Loan Act which applied retroactively to render solvency covenant in nonrecourse commercial mortgage-backed securities not a substantial impairment of loan to trigger further Contract Clause analysis); Cherry v. Mayor and City Council of Baltimore, 762 F.3d 366 (4th Cir. 2014) (city’s substitution of “cost-of-living” adjustment for “variable benefit” in calculating pension benefits not substantial impairment as pensioners have breach of contract claim). But see Michigan State AFL-CIO v. Schuette, 847 F.3d 800 (6th Cir. 2017) (amendments to Michigan Campaign Finance Act which prohibit payroll deductions for union PACs, which conflict with payroll deduction provision in existing union contracts, violate Contract Clause as being neither “necessary” nor “reasonable”; amendment valid as to contracts in the future). In Sveen v. Melin, 138 S. Ct. 1815 (2018), the Supreme Court concluded that a Minnesota statute which provided the dissolution or annulment of a marriage automatically revokes any revocable beneficiary designation made by the individual to the individual’s now ex-spouse, even for designations made before the statute was enacted, was not a “substantial impairment” of a contract right since the individual could choose to re-designate the ex-spouse if the individual so wished. Id. at 1826 (Gorsuch, J., dissenting) (impairment of contract rights based on original meaning of the Contract Clause).

Property Interests and Takings Clause Doctrine

§ 22.2, page 962, n.42: See also National Association of Retired Federal Employees v. Horner, 633 F. Supp. 511 (D.D.C. 1986) (cost of living adjustments under Civil Service Retirement Act did not establish a property right in the scheduled adjustment), summarily aff’d, 479 U.S. 878 (1986). In determining what property parcel to consider, the Court indicated in Murr v. Wisconsin, 137 S. Ct. 1933, 1943-48 (2017) (Gorsuch, J., not participating), that the test is a “functional” one, so that if two adjacent parcels of land are interrelated they can be considered together in terms of whether any economic viable use is left after government regulation, rather than following literal state law which would indicate that each separate parcel should be considered independently to determine viable use under Penn Central and Lucas analysis. Id. at 1950 (Roberts, C.J., joined by Thomas & Alito, JJ., dissenting) (state law should be followed).

Standard Takings Clause Doctrine

§ 22.2.5.1, page 976, n.103: Consistent with the analysis in the E-Treatise, the Court held, in Koontz v. St. Johns River Water Management, 133 S. Ct. 2586 (2013), that monetary exactions as a condition of a land use permit, just as regulatory conditions, such as requiring a party to grant easements in Dolan v. Tigard, must be tested under the more rigorous Dolan standard. Similar to Dolan itself, the four more liberal members of the Court dissented, and would have just applied Penn Central to the case. Id. at 2603-06 (Kagan, J., joined by Ginsburg, Breyer & Sotomayor, JJ., dissenting). See also Horne v. Department of Agriculture, 135 S. Ct. 2419 (2015) (per se takings rule for physical possession applies not only to real property, as in Loretto, but to personal property, in this case, raisins); Laurel Park Community, LLC v. City of Turnwater, 698 F.3d 1180 (9th Cir. 2012) (under Penn Central, city ordinance aimed at preserving availability of mobile home parks by limiting permitted alternative land uses, causing possible loss of up to 15% of property value, not a taking).

Exceptions to Standard Takings Clause Doctrine

§ 22.2.5.3, page 977, text following n.110: For an example of a limitation on property rights when title was acquired, see Nies v. Town of Emerald Isle, 780 S.E.2d 187 (Ct. App. N.C. 2015) (dry sand portion of beach is encumbered by “public trust” doctrine, and thus regulation of driving across property does not implicate any property rights owner ever had in the beach-front property).

Temporary Takings Clause Doctrine

§ 22.2.5.4, page 982, end of section: Consistent with the analysis in the E-Treatise, see Arkansas Game and Fish Commission v. United States, 133 S. Ct. 511 (2012) (temporary government-induced flooding must be tested under standard Penn Central doctrine, just as permanent flooding).
§ 23.1.1, page 987, n.6: Following District of Columbia v. Heller, discussed in this Supplement at §23.1.1 text following n.19, Courts of Appeals considered whether the Second Amendment should be incorporated into the 14th Amendment Due Process Clause and made applicable against the states. See, e.g., Maloney v. Cuomo, 554 F.3d 56 (2nd Cir. 2009) (Second Amendment not incorporated); NRA of America, Inc. v. City of Chicago, 567 F.3d 856 (7th Cir. 2009) (same), rev’d sub. nom. McDonald v. City of Chicago, 130 S. Ct. 3020 (2010); Nordyke v. King, 563 F.3d 439 (9th Cir. 2009) (Second Amendment is incorporated), opinion vacated in light of McDonald, 611 F.3d 1015 (9th Cir. 2010) (en banc). The Supreme Court resolved the issue in McDonald v. City of Chicago, 130 S. Ct. 3020 (2010), holding, as suggested in the E-Treatise at § 27.2.5.1 text following n.128, the Second Amendment is incorporated. As they did in Heller, four Justices dissented. Id. at 3088 (Stevens, J., dissenting); id. at 3120 (Breyer, J., joined by Ginsburg & Sotomayor, JJ., dissenting).

The Second Amendment: Right to Bear Arms

§ 23.1.1, page 992, text following n.19: In District of Columbia v. Heller, 128 S. Ct. 2783 (2008), the Court held 5-4 that the Second Amendment protects an individual right to keep and bear arms, and that right was violated by the District of Columbia’s prohibition on the possession of handguns in the home. In an opinion joined by Chief Justice Roberts, and Justices Kennedy, Thomas, and Alito, Justice Scalia went beyond mere formalist reliance on literal text and specific historical intent to include analysis of purpose, general historical materials, and legislative and executive practice — sources important to the Holmesian and natural law Justices in the majority (Chief Justice Roberts, Holmesian, and Justice Kennedy, natural law). Justice Scalia acknowledged that the principal purpose of the Second Amendment may have been to ensure individuals had a right to own guns to bring them when participating in organized state militias. However, Justice Scalia’s noted that the framers chose to protect state militias by granting to individuals the right to keep and bear arms; that at the time of the Second Amendment individuals would use those guns not only for militia service, but also for self-protection; and thus that right to own guns for self-protection still applied today. Scalia’s opinion made clear the right is not unlimited, and existing precedents and legislative and executive practice should be respected. Providing a non-exhaustive list of examples, he said that nothing in the opinion should be taken “to cast doubt on longstanding prohibitions on possession of firearms by felons or the mentally ill, or laws forbidding the carrying of firearms in sensitive places such as schools and government buildings, or laws imposing conditions and qualifications on the commercial sale of arms.” Id. at 2816-17. The Court also noted that the right only extends to the “sorts of weapons” that were “in common use” at the time the Second Amendment was adopted. Thus, the right does not protect “dangerous and unusual weapons.” Id. at 2817. Justice Stevens, dissenting with Justices Souter, Ginsburg, and Breyer, said that the text of the Second Amendment, the history of its adoption, and the decision in United States v. Miller, 307 U.S. 174 (1939), all indicate that the Amendment protects the right to keep and bear arms for military purposes, but does not limit the legislature’s power to regulate nonmilitary use and ownership of weapons. Id. at 2822-24 (Stevens, J., joined by Souter, Ginsburg & Breyer, JJ., dissenting). Miller is discussed in the E-Treatise at § 23.1.1 nn.7-8.

Justice Scalia said that the District of Columbia law would violate any standard of scrutiny higher than minimum rationality review, which he rejected since that standard applies to any typical social or economic regulation under equal protection or due process review, and here a fundamental right was involved. Id. at 2817-18 & n.27. In dissent, Justice Breyer called for something less than strict scrutiny, but greater than minimum rationality review, making reference to a balancing test of some sort. See id. at 2851-53 (Breyer, J., joined by Stevens, Souter & Ginsburg, JJ., dissenting). The Court is most likely to adopt one of two approaches. First, the Court could adopt the doctrine used in unenumerated fundamental rights cases, as discussed in the E-Treatise at § 21.2.3, that substantial burdens on the right trigger strict scrutiny, but less than substantial burdens trigger a reasonable analysis under second-order reasonableness review. This would be consistent with how many states read their protection for gun ownership under their state Constitutions, as Justice Breyer noted in his dissent. 128 S. Ct. at 2853 (Breyer, J., joined by Stevens, Souter & Ginsburg, JJ., dissenting), citing, inter alia, Adam Winkler, Scrutinizing the Second Amendment, 105 MICH. L. REV. 683 (2007). Alternatively, the Court could look to the First Amendment and hold that while bans on gun use trigger strict scrutiny, reasonable time, place, and manner regulations trigger only intermediate review. This alternative is discussed in the E-Treatise at § 23.1.1 n.19, citing, inter alia, David G. Browne, Treating the

Courts seem to be adopting strict scrutiny for “core” burdens on Second Amendment rights, but what they call “intermediate scrutiny” for less severe burdens. Cf. Nordyke v. King, 644 F.3d 776, 782-85 (9th Cir. 2011) (citing cases holding only substantial burdens trigger strict scrutiny); Andrew R. Gould, The Hidden Second Amendment Framework Within District of Columbia v. Heller, 62 VANDERBILT L. REV. 1535 (2009). Sometimes, the court defines “intermediate review” as requiring the regulation be “reasonably adapted to a substantial government interest.” See, e.g., NRA of America, Inc. v. Bureau of Alcohol, Tobacco, Firearms, and Explosives, 700 F.3d 185, 194-98 (5th Cir. 2012), and cases cited therein. This approach is a hybrid level of review between standard intermediate scrutiny, which requires a regulation to be “substantially” (not merely “reasonably”) related to “a substantial government interest” and reasonableness balancing, which requires the regulation be reasonable and not an “excessive” or “undue” burden given the state’s “legitimate” (not “substantial”) interest in regulating. Time will tell whether the courts eventually move in the direction of standard intermediate review, regular reasonableness balancing, or maintain this hybrid between the two. Based on loose language in some Supreme Court opinions, some courts use the terms “reasonable fit” and “substantially related” interchangeably. See, e.g., Jackson v. City and County of San Francisco, 746 F.3d 953, 965-66 (9th Cir. 2014) (San Francisco ordinance banning sale of hollow-point ammunition and requiring citizens to disable or lock-up handguns when not physically carrying them constitutional). See also Silvester v. Becerra, 138 S. Ct. 945 (2018) (Thomas, J., dissenting from a denial of certiorari) (Thomas’ view that although the 9th Circuit claimed to apply intermediate review, the opinion actually applied minimum rationality review); Wrenn v. District of Columbia, 864 F.3d 650 (D.C. Cir. 2017) (2-1 panel decision) (right to carry a concealed weapon a “core” right which under Heller is “categorically” unconstitutional to limit to “good reason” to carry; acknowledging Second, Third, Fourth, and Ninth Circuits have held regulations regarding concealed weapons trigger only intermediate review and are typically upheld).

Regardless of which standard is adopted, the decision in Heller may have limited impact. Only a few cities had ordinances similar to the absolute ban in Heller, and it is unclear how much such statutes were enforced in practice. While Heller is an invitation to much litigation, its result may be similar to Lopez and Morrison, which have had little impact on Congress’ power to regulate under the Commerce Clause, discussed in the E-Treatise at § 18.2.5 text following n.118. For cases upholding government regulations under less than “intermediate review”—often because the regulation concerns matters historically not protected by the Second Amendment (what courts call the “first step” in a two-part analysis) and thus Heller does not apply at all—see United States v. Fincher, 538 F.3d 868 (8th Cir. 2008) (machine gun, as well as sawed-off shotgun, not covered by Heller because they are “dangerous and unusual weapons”); United States v. Portillo-Munoz, 643 F.3d 437 (5th Cir. 2011) (illegal aliens have no Second Amendment right to firearms); Nordyke v. King, 681 F.3d 1041 (9th Cir. 2012) (11-0 en banc) (county ordinance banning guns on county property survives challenge by gun show organizers seeking to set up a booth at a local fairgrounds; 4 Judges concurred in the judgment indicating law would be valid even under intermediate scrutiny); NRA of America, Inc. v. Bureau of Alcohol, Tobacco, Firearms, and Explosives, 700 F.3d 185 (5th Cir. 2012) (federal law which prohibits federally licensed firearms dealers from selling to anyone under 21 constitutional; would be valid even under intermediate scrutiny); United States v. Huet, 665 F.3d 588 (3rd Cir. 2012) (right to own firearms no bar to prosecuting an individual for aiding and abetting her live-in boyfriend’s unlawful possession of a gun based on being convicted felon); United States v. Decastro, 682 F.3d 160 (2nd Cir. 2012) (federal statute prohibiting transportation into one’s state of residence firearms acquired out of state, without meeting in-state licensing requirements, not a substantial burden, and thus no form of heightened review appropriate); United States v. One (1) Palmetto State Armory PA-15 Machinegun Receiver/Frame, 822 F.3d 136 (3rd Cir. 2016) (federal law prohibiting person from possessing a machine gun extends to trusts); Friedman v. City of Highland Park, 784 F.3d 406 (7th Cir. 2015) (ban on large-capacity magazines, defined as more than 10 rounds, and semi-automatic guns that use such magazines, constitutional); Kolbe v. Hogan, 849 F.3d 114 (4th Cir. 2017) (10-4 en banc) (9 judges: assault weapons and large-capacity magazines not protected by Second Amendment; 10 judges: law would survive intermediate review anyway); Bezet v. United States, 714 Fed. App’x 336 (5th Cir. 2017) (no right to convert semi-automatic pistol into fully automatic rifle); Teixeira v. County of Alameda, 873 F.3d 670 (9th Cir. 2017) (8 of 11 judges en banc hold gun sellers, as opposed to gun owners, have no Second Amendment rights). See also Hoven v. Walgreen Co., 751 F.3d 778 (6th Cir. 2014) (Walgreen has right to fire pharmacist after he tried to ward off robbers with concealed handgun he was legally carrying).
If the Second Amendment fully applies (what courts call the “second step” in the two-part analysis), but the case does not involve a severe burden, some courts will apply the hybrid kind of “intermediate scrutiny.” See United States v. Masiandaro, 638 F.3d 458 (4th Cir. 2011) (constitutional to ban carrying guns into national parks); United States v. Staten, 666 F.3d 154 (4th Cir. 2011) (federal law banning someone previously convicted of domestic violence from possessing firearm valid); Silvester v. Harris, 843 F.3d 816 (9th Cir. 2016) (10-day waiting period before purchasers can obtain firearms valid); Norman v. Florida, 2017 WL 823613 (Fla. Sup. Ct. 2017) (complete state ban on openly carrying guns valid); Bauer v. Becerra, 858 F.3d 1216 (9th Cir. 2017) (allocating $5 of $19 firearms transfer fee to combat illegal firearms purchases valid).

Other courts will apply standard “intermediate scrutiny.” See United States v. Skoien, 614 F.3d 638 (7th Cir. 2010) (10-1 en banc) (federal law prohibiting persons convicted of domestic violence from owning firearms constitutional); Heller v. District of Columbia, 670 F.3d 1244 (D.C. Cir. 2011) (registration requirement presumptively valid; bans on assault weapons and large-capacity guns valid as content-neutral regulation to protect police officers and control crime); United States v. Chovan, 735 F.3d 1127 (9th Cir 2013) (federal law life-time ban on possessing firearm for individual convicted of domestic violence valid); New York State Rifle & Pistol Ass’n v. Cuomo, 804 F.3d 242 (2nd Cir. 2015) (ban on semi-automatic weapons and large-capacity magazines constitutional; ban on 7-round load limit and non-semiautomatic shotgun unconstitutional); Fortson v. L.A. City Attorney’s Office, 852 F.3d 1190 (9th Cir. 2017) (10-year possession ban for misdemeanor domestic violence conviction constitutional, even though conviction later vacated after probation completed); See also Mance v. Sessions, 896 F.3d 699 (5th Cir. 2018) (federal law preventing federally licensed gun dealers from selling handguns to out-of-state residents to out-of-state constitutional even assuming strict scrutiny, not intermediate review, applies), en banc review denied, 896 F.3d 390 (5th Cir. 2018) (8-7 decision).

Under Takings Clause doctrine, the Court eventually rejected a “reasonableness/intermediate review” hybrid approach in favor of normal reasonableness balancing in Lingle v. Chevron, Inc., 544 U.S. 528, 540-48 (2005), discussed in the E-Treatise at § 22.2.5.1 n.94. It would be useful if the courts would also clarify who has the burden of proof: the government, as at standard intermediate review or third-order reasonableness review, as noted in the E-Treatise at § 7.2.1 & Table 7.2 (page 186), or the challenger, as at second-order reasonableness review. See, e.g., United States v. Skoien, 614 F.3d 638, 653-54 (7th Cir. 2010) (10-1 en banc) (Sykes, J., dissenting) (not clear the majority required “the government to shoulder its burden” under standard intermediate scrutiny); Hamilton v. Pallozzi, 848 F.3d 614, 623-24, 629 (4th Cir. 2017) (since prohibitions on felons possessing firearms are presumptively valid, felon has the burden to show he is now a “law-abiding, responsible citizen”; to make that showing he would have to show he “has received a pardon or the law forming the basis of conviction has been declared unconstitutional or otherwise unlawful”); Binderup v. Attorney General of the United States, 836 F.3d 338, 350-53 (3rd Cir. 2016) (splintered en banc opinion) (controlling opinion held defendants met their burden to show misdemeanor convictions were not sufficiently serious; intermediate review applied and government did not meet its burden to ban defendants owning guns).

In some cases, the Second Amendment challenge has prevailed. For example, after holding that bans on all firing ranges within Chicago likely is unconstitutional, Ezell v. City of Chicago, 651 F.3d 684 (7th Cir. 2011), the Seventh Circuit held unconstitutional a later ordinance which effectively foreclosed gun ranges by not permitting a gun range within 100 feet of another range or 500 feet of a residential district, school, place or worship, or multiple other uses, leaving only 2.2% of the city’s total acreage available. Ezell v. City of Chicago, 846 F.3d 888 (7th Cir. 2017) (law’s ban on any person under 18 from entering gun range also failed intermediate review). A 2-1 panel of the Seventh Circuit held an Illinois law prohibiting most people from carrying a gun in public unconstitutional, Moore v. Madigan, 702 F.3d 933 (7th Cir. 2012) (case mooted by passage of Illinois Firearm Concealed Carry Act in Shepard v. Madigan, 958 F. Supp. 2d 996 (S.D. Ill. 2013)). See generally Rachal v. Westchester County, N.Y., 701 F.3d 81 (2nd Cir. 2012) (“proper cause” to obtain permit to carry gun constitutional); Drake v. Filko, 724 F.3d 426 (3rd Cir. 2013) (“justifiable need” to carry gun constitutional); Peruta v. County of San Diego, 824 F.3d 919 (9th Cir. 2014) (7-4 en banc) (no right to concealed carry of gun outside home; any right to open carry not considered); Palmer v. District of Columbia, 59 F. Supp. 3d 173 (D.D.C. 2014) (total ban on carrying gun outside home unconstitutional); Walters v. Wolf, 660 F.3d 307 (8th Cir. 2011) (city violated due process for not having procedures for return of a handgun following dismissal of charges); Gadomski v. Tavares, 113 A.3d 387 (R.I. 2015) (individual entitled to more than “mere recital” denying permit to carry a gun). The attorneys who litigated Heller were awarded $1,132,182 in attorneys’ fees. Heller v. District of Columbia, 832 F. Supp. 2d 32 (D.D.C. 2011).
Protection of Lawful Commerce in Arms Act

§ 23.1.1.1, page 993, text following n.21: The proposed Protection of Lawful Commerce in Arms Act is now law, and has been used to preempt state laws. For example, in Illeto v. Glock, Inc., 565 F.3d 1126 (9th Cir. 2009), the Ninth Circuit held the Act preempts shooting victims' tort claims under California statutes against federally licensed gun manufacturers and distributors; Act does not violate the Due Process Clause, Equal Protection Clause, Takings Clause, or general separation of powers concerns. See generally Allen Rostron, A New State Ice Age for Gun Policy, HARV. L. & POL. REV. 327 (2016). On other laws regulating guns, see Abramski v. United States, 134 S. Ct. 2259 (2014) (defendant’s misstatement that he, and not another, was actual buyer on required form is a “material misrepresentation” making him liable for false statement); id. at 2275 (Scalia, J., joined by Roberts, C.J., and Thomas & Alito, JJ., dissenting) (since other person could have bought gun legally, not a material misrepresentation); Wollslaeber v. Governor of Florida, 848 F.3d 1293 (11th Cir. 2017) (10-1 en banc) (Florida Firearm Owners’ Privacy Act, which prevents physicians from routinely asking patients if they own guns, unconstitutional under either Central Hudson Gas’ intermediate review as regulation of commercial speech or under strict scrutiny); Daniel v. Armslist, LLC, 913 N.W.2d 211 (Ct. App. Wis. 2018) (federal Communications Decency Act of 1996 does not preempt state tort law claim that Armslist used website to facilitate illegal firearms purchases which were used in mass casualty shooting).

Constitutionality of Federal Defense of Marriage Act

§ 23.1.3, page 1001, text following n.49: In 2010, the Defense of Marriage Act was ruled unconstitutional under the Fifth Amendment in Massachusetts v. United States Department of Health and Human Services, 682 F.3d 1 (1st Cir. 2012). In 2013, the Supreme Court agreed in United States v. Windsor, 133 S. Ct. 2675 (2013), discussed in this Supplement at § 26.4.6 n.488.

Recent Decisions Under the Full Faith and Credit Clause

§ 23.1.3, page 1001, text following n.51: As predicted in the E-Treatise, a number of states since 2006 moved to recognize gay marriage or civil unions. These developments are discussed in this Supplement at § 26.4.6 n.480. In consequence, an increased number of same-sex marriages required states to decide what “full faith and credit” to give such marriages, both in light of the federal Defense of Marriage Act, discussed in this Supplement at § 26.4.6 n.488, and under state laws, see Andrew Koppelman, The Difference the MinidOMAs Make, 38 LOY. U. CHI. L.J. 265 (2007) (discussing a range of issues, including persons migrating to a state or temporarily passing through a state; marriages of persons who never set foot in a state as a married couple, but whose status is relevant to litigation in the state; children of same-sex couples who enter a state, temporarily or permanently, and whose status needs to be determined; individual same-sex spouses entering a state who seek to avoid obligations of marital property, child support or money judgments rendered in another state). These issues all became moot when in Obergefell v. Hodges, 135 S. Ct. 2584 (2015), discussed in this Supplement at § 26.4.6 n.480, the Court struck down bans on same-sex marriage nationwide, requiring all states to recognize same-sex marriages. On full faith and credit generally, see V.L. v. E.L., 136 S. Ct. 1017 (2016) (Alabama Supreme Court required to give full faith and credit to adoption order issued by Georgia superior court to female partner of children’s biological mother); Franchise Tax Bd. of California v. Hyatt, 136 S. Ct. 1277 (2016) (law allowing a citizen to win greater damages against another state’s agency than against own state agency represents hostility to the public acts of the other state, and is unconstitutional).

The Fourth Amendment: Protection Against Unreasonable Searches and Seizures

§ 23.2.1.1, page 1004, text following n.59: In Arizona v. Gant, 129 S. Ct. 1710 (2009), a 5-4 Court held it is unreasonable to search a vehicle incident to an arrest unless the arrestee is (a) within reaching distance of the passenger compartment (here arrestee was handcuffed and in police car) or (b) it is reasonable to believe the vehicle contains evidence of the offense leading to arrest. Id. at 1723-24. The dissent said the ruling was an unjustified limitation on the rule of New York v. Belton, 453 U.S. 454 (1981), which allowed a search of the passenger compartment whenever incident to a valid arrest. Id. at 1726 (Alito, J., joined by Roberts, C.J., and Kennedy, J., and Breyer, J., except as to Part II-E, dissenting). Justice Scalia provided the fifth vote for the majority, but no other Justice shared his view that a vehicle search incident to an arrest is reasonable only
when the object of the search is evidence of the crime for which the arrest was made, or another crime that the officer has probable cause to believe occurred. *Id.* at 1724-25 (Scalia, J., concurring). See also *Michigan v. Summers*, 133 S. Ct. 1031 (2013) (rule authorizing police officers executing a search warrant to detain occupants to ensure officer safety, prevent flight, and promote orderly search does not allow officers to detain and search former occupants who are no longer in the immediate vicinity); *Navarette v. California*, 134 S. Ct. 1683 (2014) (highway patrol officer had reasonable suspicion to stop motorist for suspected drunk driving based on anonymous 911 caller’s report, despite the officer not observing any suspicious driving conduct) (Scalia, joined by Ginsburg, Sotomayor & Kagan, J.J., dissenting); *Rodriguez v. United States*, 135 S. Ct. 1609 (2015) (police may not extend an otherwisecompleted traffic stop, absent reasonable suspicion, in order to conduct a dog sniff) (Kennedy, Thomas & Alito, J.J., dissenting); *City of Los Angeles v. Patel*, 135 S. Ct. 2443 (2015) (city ordinance requiring hotel operators to disclose contents of guest registries to police without pre-compliance review violates Fourth Amendment) (Roberts, C.J., and Scalia, Thomas & Alito, J.J., dissenting); *County of Los Angeles v. Mendez*, 137 S. Ct. 1539 (2017) (“excessive force” claim under the Fourth Amendment must be analyzed in light of then-existing circumstances; fact that need for force was “provoked” by prior Fourth Amendment “warrantless entry” or “failure to knock-and-announce” violations irrelevant).

In *Florida v. Jardines*, 133 S. Ct. 1409 (2013), the Court held that police officers who took a drug-sniffing dog onto a homeowner’s porch to investigate the contents of the house conducted a “search” under the Fourth Amendment. *Cf. United States v. Whitaker*, 820 F.3d 849 (7th Cir. 2016) (*Jardines* applies to drug-dog sniff in common hallway of apartment complex); *State v. Nguyen*, 841 N.W.2d 676 (N. Dak. 2013) (*Jardines* does not apply to such drug-dog sniff); *Florida v. Harris*, 133 S. Ct. 1050 (2013) (whether alert by drug-detection dog satisfies probable cause depends on totality of the circumstances, including whether dog had been certified by a bona fide organization that had tested dog’s reliability). See also *United States v. Jones*, 132 S. Ct. 945 (2012) (physical attachment of Global Positioning System device to individual’s vehicle constitutes a “search”); *United States v. Davis*, 750 F.3d 1186 (10th Cir. 2014) (car passenger has no standing to rely on *Jones*); *People v. Sotelo*, 336 P.3d 188 (Colo. 2014) (passenger can challenge search of his or her possessions in car); *United States v. Gilliam*, 842 F.3d 801 (2d Cir. 2016) (no warrant required for request to mobile phone operator for GPS coordinates under Stored Communications Act, and Fourth Amendment not violated when exigent circumstances exist – here to capture suspect before he took underage girl to be a prostitute).

Regarding searches incident to car stops, see *Missouri v. McNeely*, 133 S. Ct. 1552 (2013) (natural dissipation of alcohol in bloodstream of does not always constitute exigency to justify nonconsensual blood test without search warrant; exigency must be determined based on totality of circumstances); *id.* at 1569 (Roberts, C.J., joined by Breyer & Alito, J.J., concurring in part and dissenting in part) (exigent circumstances exist unless officer could reasonably conclude there is time to secure warrant before blood can be drawn); *id.* at 1574 (Thomas, J., dissenting) (given natural dissipation of alcohol, exigent circumstances always exist); *Birchfield v. North Dakota*, 136 S. Ct. 2160 (2016) (warrantless search of defendant’s breath for alcohol permissible as search incident to arrest, and state may arrest for failure to submit to a breath test under “implied consent” law; *McNeely* still applies to drawing blood); *id.* at 2187 (Sotomayor, J., joined by Ginsburg, J., concurring in part and dissenting in part) (*McNeely* should apply to breath and blood tests); *id.* at 2196-97 (Thomas, J., concurring in part and dissenting in part) (breath and blood tests should be valid as search incident to arrest); *People v. Hyde*, 393 P.3d 962 (Colo. 2017) (“implied consent” permits drawing blood to determine intoxication where driver is unconscious); *Fitzgerald v. People*, 394 P.3d 671 (Colo. 2017) (prosecution’s use at trial of refusal to consent to breath or blood test as evidence of guilt does not violate Fourth or Fifth Amendment privilege against self-incrimination, since not testimonial); *Tarabochia v. Adkins*, 766 F.3d 1115 (9th Cir. 2014) (warrantless roving auto stop of fishers to check catch and fishing records unconstitutional).

Resolving a circuit split, in *Riley v. California*, 134 S. Ct. 2473 (2014), a unanimous Court held that in a normal arrest situation neither an interest in preventing destruction of evidence, or protecting officers’ safety, justified dispensing with warrant requirement given a mobile phone’s capacity to store large amounts of data, similar to data stored at home. Although numerous federal Courts of Appeal had held otherwise, a 5-4 Court ruled in *Carpenter v. United States*, 138 S. Ct. 2206 (2018), that a warrant is usually required to get cell phone tower location records absent exigent circumstances under “reasonable expectation of privacy” test from *Katz v. United States*, 389 U.S. 347, 360 (1967) (Harlan, J., concurring). *Id.* at 2223, 2226 (Kennedy, J., joined by Thomas & Alito, J.J., dissenting) (citing Courts of Appeal opinions); *id.* at 2235 (Thomas, J.,
dissenting) (cell towel records are not “property” of individual, so no search of individual’s property; Court should reconsider Katz reasonable expectation of privacy test); id. at 2261-64, 2272 (Gorsuch, J., dissenting) (while under Katz the dissenting opinions are correct, Court should reconsider Katz, and sympathetic to notion individual does have property interest in his own cell phone records, triggering Fourth Amendment protection). See generally United States v. Stanley, 753 F.3d 114 (3rd Cir. 2014) (accused tapping into neighbor’s unsecured wireless router had no expectation of privacy even in his own home); Huff v. Spaw, 794 F.3d 543 (6th Cir. 2015) (no expectation of privacy in 90-minute inadvertent “poocket dial” call); United States v. De L’Isle, 825 F.3d 426 (8th Cir. 2016) (no warrant needed to scan magnetic strips on credit, debt, and gift cards). But see United States v. Otero, 563 F.3d 1127 (10th Cir. 2009) (search warrant for defendant’s computer files failed 4th Amendment’s particularity requirement); United States v. Cotterman, 709 F.3d 952 (9th Cir. 2013) (reasonable suspicion of criminal activity required for forensic search of computers, smart phones, or other digital media brought across the border, as opposed to warrantless physical search permitted under “border exception” doctrine); United States v. Lopez-Cruz, 730 F.3d 803 (9th Cir. 2013) (federal agent who obtained consent to search suspect’s mobile phone violated Fourth Amendment by answering incoming call without consent); United States v. Garias, 755 F.3d 125 (2nd Cir. 2014) (officers executing search warrant to copy hard drives from suspect’s computer, but holding them for 2½ years before rummaging through data for evidence of different crime, violated 4th Amendment); United States v. Lara, 815 F.3d 605 (9th Cir. 2016) (government agents may not comb through digital data on probationer’s mobile phone just because he signed a condition of probation saying government could search his property any time); In the Matter of Warrant to Search a Certain E-Mail Account Controlled and Maintained by Microsoft v. United States, 829 F.3d 197 (2d Cir. 2016) (Stored Communications Act’s (SCA) authorization to search e-mail account does not apply extraterritorially to server located in Ireland) (SCA amended by CLOUD Act of 2018 to provide for such searches); State v. Earls, 70 A.3d 630 (N.J. 2013) (New Jersey Constitution requires search warrants before tracking location of cellular phone); Commonwealth v. Augustine, 4 N.E.3d 846 (Mass. 2014) (same under Massachusetts Constitution); Zanders v. State, 73 N.E.3d 178 (Ind. 2017) (no search warrant required for tracking location under Indiana Constitution). Courts have split on expectation of privacy in text messages. See, e.g., State v. Patino, 93 A.2d 40 (R.I. 2014), and cases cited therein. Courts have also split over whether “dragnet” warrants, which permit the government to hack into any computer accessing a government-operated “sting” website, such as to combat child pornography, satisfy the 4th Amendment “particularity” requirement. See, e.g., United States v. Graver, 2017 WL 1134814 (S.D. Ohio 2017), and cases cited therein.

Prior to 2013, courts divided on whether routine collection of DNA samples of persons arrested, but not yet convicted, was constitutional. In Maryland v. King, 133 S. Ct. 1958 (2013), a 5-4 Supreme Court held that it is constitutional for officers to take swabs from all people subjected to custodial arrest for serious crimes and to catalog their DNA profiles in a database for identification purposes. Four Justices dissented. Id. at 1980 (Scalia, J., joined by Ginsburg, Sotomayor & Kagan, JJ., dissenting) (DNA samples are not comparable to fingerprinting, and real purpose of DNA swabs is to help solve crimes, and thus the search needs to satisfy probable cause). Cf. Raynor v. State, 99 A.3d 753 (Md. 2014) (DNA testing of material individual not in custody left on chair at police station not a “search”); Commonwealth v. Arzola, 26 N.E.3d 185 (Mass. 2015) (DNA testing of bloodstain found on shirt worn by defendant at time of arrest not a “search,” but for purposes of identifying to whom the blood belonged). But see State v. Medina, 102 A.3d 661 (Vt. 2015) (routine collection of DNA samples from persons under custodial arrest violates Vermont State Constitution).

In Florence v. Board of Chosen Freeholders of Burlington County, N.J., 132 S. Ct. 1510, 1518-20 (2012), a 5-4 Court held that a person arrested even for a minor traffic offense can be subjected to an invasive strip search before being admitted into the general jail population, both to ensure the safety of prison personnel and safety of other prisoners. Id. at 1525 (Breyer, J., joined by Ginsburg, Sotomayor & Kagan, JJ., dissenting) (reasonable suspicion should be required to authorize strip search). In Manuel v. City of Joliet, Illinois, 137 S. Ct. 911 (2017), the Court adopted the view of 10 of 11 Circuits who had considered the issue to hold the Fourth Amendment right extends through the pre-trial period – in this case after the judge’s determination of probable cause. Id. at 923 (Alito, J., joined by Thomas, J., dissenting) (right extends only through “first”/“initial” appearance, but not entire pretrial detention). See also United States v. Stokes, 725 F.3d 880 (7th Cir. 2013) (Fourth Amendment does not apply to search of overseas homes of U.S. citizens); United States v. Robinson, 846 F.3d 694 (4th Cir. 2017) (12-4 en banc) (police may frisk lawfully stopped individuals they believe to be carrying a gun even in states which permit concealed-carry permits).
The Fourth Amendment: Consent to Search

§ 23.2.1.1, page 1005, n.63: The Texas Court of Criminal Appeals held in State v. Copeland, 399 S.W.3d 159 (Tex. Crim. App. 2013), that the Georgia v. Randolph rule that one resident’s objection to a police search of a home will override another resident’s consent does not apply to vehicle searches, where expectations regarding privacy are different. In Fernandez v. California, 134 S. Ct. 1126, 1130-31 (2014), the Court held a defendant’s previously stated objected, while physically present, can be overridden by a co-tenant when the defendant is no longer present, in this case because he had been arrested. Id. at 1138 (Ginsburg, J., joined by Sotomayor & Kagan, JJ., dissenting). See also United States v. Wahchumwah, 710 F.3d 862 (9th Cir. 2012) (undercover agent’s secret videotaping when invited into suspect’s home no violation of Fourth Amendment); United States v. Hill, 776 F.3d 243 (4th Cir. 2015) (standard condition of supervised release that authorizes home visits by Probation Officer does not indicate consent to “warrantless searches”); Dinh v. California, 2016 WL 4256896 (6th Dist. Ct. App. Cal. 2016) (consent by third party to search valid even if consent is obtained, in part, by use of information obtained in prior illegal search); United States v. Escamilla, 852 F.3d 474 (5th Cir. 2017) (consent to cell phone search ends when phone returned).

The Fourth Amendment and Searches of the Workplace

§ 23.2.1.1, page 1008, n.76: In City of Ontario, California v. Quon, 130 S. Ct. 2619, 2631-33 (2010), citing O’Connor v. Ortega, 480 U.S. 709 (1987), the Court held, without dissent, that it was reasonable for the City to conduct a warrantless search of text messages on a police officer’s pager, which the City had provided, to determine if number of text messages bought by City each month was sufficient for work-related purposes. The officer was disciplined for non-work-related texts.

The Fourth Amendment and Searches of Student Property and Persons

The Fourth Amendment: The Exclusionary Rule

§ 23.2.1.1, page 1012, text following n.94: In Herring v. United States, 129 S. Ct. 695, 698 (2009), a 5-4 Court held that the exclusionary rule does not require suppression of evidence when the police mistakenly believed that an individual had an outstanding arrest warrant, but that belief turned out to be wrong because of negligent bookkeeping by another police officer, rather than systemic errors or recklessness in police behavior. Id. at 710 (Ginsburg, J., joined by Stevens, Souter & Breyer, JJ., dissenting) ( “Negligent recordkeeping errors by law enforcement threaten individual liberty, are susceptible to deterrence by the exclusionary rule, and cannot be remedied effectively by other means.”). Earlier, in Hudson v. Michigan, 126 S. Ct. 2159, 2165 (2006), a 5-4 Court held that the exclusionary rule does not apply when the police have a valid search warrant, but fail to “knock and announce” their presence, as they are required to do. Again, the more liberal Justices on the Court dissented. Id. at 2171 (Breyer, J., joined by Stevens, Souter & Ginsburg, JJ., dissenting). See also Davis v. United States, 131 S. Ct. 2419, 2423-24 (2011) (good faith exception to exclusionary rule allows admission of evidence seized during an unconstitutional search conducted in objectively reasonable reliance on then-binding appellate precedent subsequently overruled); id. at 2436 (Breyer, J., joined by Ginsburg, J., dissenting); Heien v. North Carolina, 135 S. Ct. 530 (2014) (reasonable mistake of law – here thinking motorist needed two functional brake lights, not merely one – can give rise to reasonable suspicion necessary to uphold “seizure”); Utah v. Strieff, 136 S. Ct. 2056 (2016) (evidence of drug possession obtained from search incident to arrest for outstanding arrest warrant for traffic violation can be admitted under “attenuation” doctrine of Brown v. Illinois, 422 U.S. 590 (1975) (consideration of 3 factors: “temporal proximity”, “presence of intervening circumstances”; and “particularity,” that is “purpose or
flagrancy of the official misconduct”), even though initial stop which led to learning about arrest warrant was unlawful) (Ginsburg, Kagan, Sotomayor, JJ., dissenting); United States v. Warshak, 631 F.3d 266 (6th Cir. 2010) (Fourth Amendment applies to “e-mail communications,” but good faith reliance on Stored Communications Act (SCA) means exclusionary rule does not apply); United States v. Guerrero, 768 F.3d 351 (5th Cir. 2014) (failure to follow SCA procedures to obtain cell phone use records from service provider does not bar use of evidence, as exclusionary rule inapplicable to SCA violations); United States v. Massi, 761 F.3d 512 (5th Cir. 2014) (good-faith exception applies even if affidavit supporting search warrant based in part on earlier-in-time detention violating Fourth Amendment); United States v. Ganias, 824 F.3d 199 (2nd Cir. 2016) (12-1 en banc) (good faith exception applies to computer data found after second warrant in 2006, even though initial 2003 warrant did not cover data).

The Fifth Amendment: Double Jeopardy

§ 23.2.1.2B, page 1016, n.114: See also Evans v. Michigan, 133 S. Ct. 1069 (2013) (8-1 Court held that midtrial directed verdict and dismissal by judge, based on judge’s erroneous requirement of extra element for charged offense, was acquittal for double jeopardy purposes, preventing defendant from being retried) (Alito, J., dissenting) (retrial would give prosecution fair opportunity to prove case); Martinez v. Illinois, 134 S. Ct. 2070 (2014) (Double Jeopardy attaches when jury is sworn, even if prosecutors refuse to participate after jury swearing because motion for continuance denied).

The Fifth Amendment: Determining Existence of Miranda Rights

§ 23.2.1.2C, page 1018, n.123: In Berghuis v. Thompkins, 130 S. Ct. 2250, 2262 (2010), a 5-4 Court held that a suspect’s invocation of the Miranda right to remain silent must be unambiguous. A suspect who has received the Miranda warning, and who remains silent during the first two hours and 45 minutes of a three-hour interrogation, but who then responds to questions, has not invoked his Miranda right. Police are not required to obtain an express waiver. The dissent held that a clear-statement rule was inconsistent with Miranda’s concern with protecting accused parties from self-incrimination. Id. at 2266 (Sotomayor, J., joined by Stevens, Ginsburg & Breyer, JJ., dissenting). In J.D.B. v. North Carolina, 131 S. Ct. 2394, 2398-99 (2011), a 5-4 Court held that the age of a juvenile if known to the officer at the time of interrogation, or would have been objectively apparent to a reasonable officer, is relevant to whether the child was “in custody” for purposes of Miranda. Four Justices dissented. Id. at 2408 (Alito, J., joined by Roberts, C.J., and Scalia & Thomas, JJ., dissenting). See also Moore v. State, 30 A.3d 945 (Md. 2011) (police officers’ intentional foot-dragging in bringing a 16-year-old murder suspect before a judge, coupled with refusal to comply with his 13 requests to speak with his mother, rendered the youth’s confession involuntary). See also Howes v. Fields, 132 S. Ct. 1181 (2012) (determining whether prisoner is in custody made upon totality of the circumstances, and prisoner was not in custody when he was isolated in a prison conference room and told he could terminate the interview when he wanted; concurrence concluded that in this habeas case it was not “clearly established” that petitioner was in custody, but if the case were on direct review they would hold that petitioner was in custody for Miranda purposes, id. at 1194 (Ginsburg, J., joined by Breyer & Sotomayor, JJ., concurring in part and dissenting in part)); People v. Dunbar, 23 N.E.3d 946 (N.Y. 2014) (preamble to Miranda warning urging suspects to take advantage of their “only opportunity” to tell their side of the story and tell us if “there is something you need us to investigate” rendered subsequent Miranda waiver ineffective); State v. McAdams, 193 So. 3d 824 (Fla. 2016) (under Florida Constitution, must tell suspect his lawyer had arrived at police station, even though the individual was not technically in custody at the time).

The Fifth Amendment: Break in Custody Under Miranda

§ 23.2.1.2C, page 1018, n.124: In Maryland v. Shatzer, 130 S. Ct. 1213 (2010), the Court held that the rule of Edwards v. Arizona, 451 U.S. 477, 484-85 (1981), which provides that a suspect who has invoked his Miranda right to remain silent cannot be further questioned until either counsel has been made available or the suspect initiates further exchanges with the police, does not apply when there has been a break in custody of sufficient duration to dissipate the coercive effects of the previous interrogation, as long as new Miranda warning given. The Court majority set a bright-line rule of 14 days for the break-in-custody rule to apply. Id. at 1122-23. Justice Thomas would have allowed for the break-in-custody rule to apply for less than 14
The Fifth Amendment: Voluntary Confessions During Unreasonable Delay in Presentment

§ 23.2.1.2C, page 1019, text following n.128: In 18 U.S.C. § 3501(c), passed in 1968, Congress provided that a confession made while under arrest shall not be inadmissible solely because of delay in bringing such person before a magistrate judge if the confession is found voluntary and made within six hours of arrest. In Corley v. United States, 129 S. Ct. 1558 (2009), the government argued that despite this section a confession is admissible if a district court finds the confession voluntary, regardless of whether the delay in presentment was within or longer than six hours. Rejecting this argument, a 5-4 Court agreed with a convicted defendant that § 3501(c) did not do away with the McNabb-Mallory rule, established by the Court under its supervisory power, see McNabb v. United States, 318 U.S. 332 (1943); Mallory v. United States, 354 U.S. 449 (1957), that a confession is inadmissible if given during a delay that is unreasonable. Thus, § 3501(c) merely created a limit on the McNabb-Mallory rule for confessions given within six hours. After that, normal McCabb-Mallory delay analysis applies. Id. at 1571. Four Justices in dissent said that § 3501(a) clearly provided that a confession is admissible if voluntarily given, and § 3501(c) was directed to confessions that were otherwise voluntary, that is, where there was no basis other than prepresentment delay for concluding that the confession was coerced. Under this view, the statute would have done away with the McNabb-Mallory analysis for all voluntary confessions, even those after six hours, as the government argued in the case. Id. at 1574-76 (Alito, J., joined by Roberts, C.J., and Scalia & Thomas, JJ., dissenting).

The Fifth Amendment: Privilege Against Self-Incrimination

§ 23.2.1.2C, page 1021, n.137: In Salinas v. Texas, 133 S. Ct. 2174 (2013), the Court held that a prosecutor’s comments at trial about defendant’s silence in response to a question during a non-custodial police interview did not violate the defendant’s privilege against self-incrimination, since the individual did not expressly invoke the privilege during the course of the interview. Id. at 2178 (Alito, J., joined by Roberts, C.J., and Kennedy, J., announcing the judgment of the Court). Two other Justices would have held the prosecutor’s comments could be admitted because the defendant was not in custody and subject to the Miranda warning requirement when silence occurred. Even had the defendant been in custody, these two Justices questioned the long-established doctrine of Griffin v. California, 380 U.S. 609 (1965), that the privilege against self-incrimination includes not only the right not to testify or answer questions, but prevents a prosecutor from commenting on that silence. 133 S. Ct. at 2184 (Thomas, J., joined by Scalia, J., dissenting). Consistent with their dissent in Berghuis, discussed in this Supplement at § 23.2.1.2C n.123, a four-Justice dissent said the prosecutor’s comments undermined the purpose of the privilege against self-incrimination. In this case, the police “made clear he [Salinas] was a suspect. The interrogation took place at the police station. The relevant question – about whether the shotgun from Salinas’ home would incriminate him – amounted to a switch in subject matter. And it was obvious that the new question sought to ferret out whether Salinas was guilty of murder.” 133 S. Ct. at 2185, 2188-89 (Breyer, J., joined by Ginsburg, Sotomayor & Kagan, JJ., dissenting).

In Vogt v. City of Hays, Kansas, 844 F.3d 1235 (10th Cir. 2017), the Tenth Circuit held the right against self-incrimination applies to pre-trial proceedings, joining the Second, Seventh, and Ninth Circuit which “have held certain pretrial uses of compelled statements violate the Fifth Amendment”; the Third, Fourth, and Fifth Circuits have held the right against self-incrimination “is only a trial right.” See also Kansas v. Cheever, 134 S. Ct. 596 (2013) (privilege not violated when state rebutted defendant’s expert in support of voluntary intoxication defense, which he alleged rendered him incapable of premeditation, with testimony of psychiatrist from defendant’s court-ordered mental evaluation); In re Grand Jury Investigation, 22 N.E.3d 927 (Mass. 2015) (“attorney-client privilege” permits law firm to resist grand jury subpoena to turn over client’s mobile phone, where request to individual would involve “self-incrimination”); United States v. Apple MacPro Computer, 851 F.3d 238 (3rd Cir. 2017) (man who refused to decrypt two external hard drives believed to obtain child pornography properly held in civil contempt; under the “foregone conclusion” exception to privilege against self-incrimination, it was a “foregone conclusion” the files were on the drives).
Due Process of Law: The Brady Rule

§ 23.2.1.2D, page 1021, text following n.138: In Brady v. Maryland, 373 U.S. 83, 86-87 (1963), the Court held it violated due process for the prosecution to fail to disclose to the defense material evidence of the accused’s innocence, such as a confession by another person. In Smith v. Cain, 132 S. Ct. 627 (2012), the Court held where eyewitness testimony was the sole evidence linking defendant to the crime, prosecutor’s failure to disclose police files containing statements eyewitness made that directly contradicted trial testimony violated Brady requiring reversal. Cf. Turner v. United States, 137 S. Ct. 1885 (2017) (Gorsuch, J., not participating) (evidence questioning reliability of some eyewitness testimony that suggested victim was murdered not by gang, but by smaller group of individuals, not sufficient to create “reasonable probability” that “withheld evidence would have changed the outcome of petitioners’ trial” when defense did not question “gang” murder scenario at trial); id. at 1896-99 (Kagan, J., joined by Ginsburg, J., dissenting) (“reasonable probability” established, since defense denied evidence from which challenge to “gang” murder scenario could have been constructed); Saunders-El v. Rohde, 778 F.3d 556 (7th Cir. 2015) (Brady not violated when police officers failed to tell prosecutors they planted accused’s blood at crime scene, since Brady only requires disclosure of “evidence,” not “creating evidence” by fabrication; accused acquitted at trial).

Due Process of Law in Criminal Proceedings

§ 23.2.1.2D, page 1022, text following n.146: In District Attorney’s Office v. Osborne, 129 S. Ct. 2308 (2009), a 5-4 Court held that although a convicted felon could bring an action under 42 U.S.C. § 1983, rather than being limited to a habeas corpus action, to challenge Alaska’s refusal to turn over DNA evidence for testing, there was nothing fundamentally unfair in the Alaska requirement that a prisoner show the evidence was diligently pursued and was sufficiently material. The Court expressed reluctance to extend due process and short circuit what looked to be a prompt and considered legislative response among states post-conviction use of DNA. Id. at 2312, 2320-21. Justice Alito said when a criminal defendant, for tactical purposes, passes up DNA testing at trial, defendant has no right to demand DNA testing after conviction. Id. at 2323-24 (Alito, J., joined by Kennedy, J., and Thomas, J., as to Part II, concurring). The dissent said a plaintiff has a liberty interest in presenting evidence that might establish innocence, and a procedural and substantive right to present evidence available for testing free of arbitrary government action. Id. at 2331 (Stevens, J., joined by Ginsburg & Breyer, JJ., and joined by Souter, J., as to Part I, dissenting). Justice Souter added that the state had violated procedural due process by making such untenable arguments as the plaintiff had not claimed factual innocence or excluding plaintiff as the source of semen in a condom found near bloody snow would not undermine confidence in the verdict. Id. at 2340-43 (Souter, J., dissenting).

See also Perry v. New Hampshire, 132 S. Ct. 716 (2012) (due process does not require preliminary judicial inquiry into reliability of eyewitness identification unless that identification was procured under suggestive circumstances arranged by law enforcement; dissent argued that if suggestive circumstances exist, even if not arranged by law enforcement, the rule regarding preliminary judicial review for reliability stated in Simmons v. United States, 390 U.S. 377 (1968), should apply. 132 S. Ct. at 730-31 (Sotomayor, J., dissenting)); Taylor v. Nevada, 371 P.3d 1036 (Nev. 2016) (although earlier eyewitness identification was unreliable, positive identification during trial cured the error of the admission of the out-of-court identification, and clear beyond a reasonable doubt the error did not contribute to the verdict); Dietz v. Bouldin, 136 S. Ct. 1885 (2016) (federal courts have limited inherent power to recall discharged jury in civil cases after returning legally impossible/ erroneous verdict – here, jury verdict of $0 in damages despite stipulated medical damages of $10,136) (Thomas, J., joined by Kennedy, J., dissenting) (proper remedy would be remand for new trial); United States v. DeCoster, 828 F.3d 626 (8th Cir. 2016) (corporate officers may be criminally liable and imprisoned for negligence or reckless disregard without proof of intent to cause harm, here a large-scale salmonella outbreak from tainted eggs); United States v. Blodgett, 872 F.3d 66 (1st Cir. 2017) (10-year mandatory minimum sentence for child pornography defendants with prior state child sex abuse convictions does not violate due process as rationally related to legitimate government interests). But see Nelson v. Colorado, 137 S. Ct. 1249, 1252 (2017) (defendants whose criminal convictions are overturned are entitled to presumption of innocence, and thus law requiring defendants to prove innocence by clear and convincing evidence to recover fines paid to the state based on the criminal conviction violates due process; states may only impose “minimal procedures” on refund); id. at 1263 (Thomas, J., dissenting) (defendant had not shown

2082
a continuing property interest in funds once they were paid to the state); United States v. Gillenwater, 717 F.3d 1070, 1077-80 (9th Cir. 2013) (individual has due process right not only to be present at a pre-trial competency hearing, see Sturges v. Goldsmith, 796 F.2d 1103, 1108-09 (9th Cir. 1986), but also right to testify, even over objection of his attorney); United States v. Harden, 758 F.3d 886 (7th Cir. 2014) (under Federal Magistrates Act, magistrates cannot accept guilty pleas in felony cases, even with accused’s consent, acknowledging Circuit split); Reid v. Donelan, 819 F.3d 486 (1st Cir. 2016) (due process limitation of “reasonableness” of detention of aliens pending removal proceedings involves “individualized determination,” joining 3rd and 6th Circuits; 2nd and 9th Circuits hold detention longer than 6 months presumptively unreasonable); Ingram v. Cole County, 846 F.3d 282 (8th Cir. 2017) (inmates forced to sleep naked because of jail’s laundry schedule state colorable claim of deprivation of due process, aff’d en banc by equally divided court, 732 Fed. App’x 496 (8th Cir. 2018); Mulvania v. Sheriff of Rock Island City, 850 F.3d 849 (7th Cir. 2017) (jail policy requiring female detainees to wear white underwear, or go without underwear, based on speculative fear that detainees would make tattoo ink from colored underwear, state colorable claim detainee’s dignity interest outweighs fear under due process reasonableness balancing test, citing, inter alia, Kingsley v. Hendrickson, 135 S. Ct. 2466, 2471-75 (2015) (reasonableness balancing test for pre-trial detainee excessive force claim under due process clause)); United States v. Sanchez-Gomez, 2017 WL 2346995 (9th Cir. 2017) (automatically shackling defendants in courtrooms violates presumption of innocence; individualized potential dangerousness decision required).

The Sixth Amendment: Right to a Public Trial

§ 23.2.1.3.A, page 1026, text following n.163: In Presley v. Georgia, 130 S. Ct. 721, 725 (2010), a 7-2 Court held that the accused’s right to a public trial obligates a trial judge to consider all reasonable alternatives to closing jury selection to the public, including ones not requested by the accused. Two Justices objected to the Court’s summary extension of the right of a public trial to (1) voir dire of the jury, and (2) the requirement to consider alternatives not proffered by the accused. Id. at 726-27 (Thomas, J., joined by Scalia, J., dissenting). Cf. Weaver v. Massachusetts, 137 S. Ct. 1899 (2017) (while violation of right to public trial is a structural error requiring reversal if raised at trial, if raise on post-conviction appeal as part of ineffective assistance of counsel claim petitioner must show prejudice) (Breyer, J., joined by Kagan, J., dissenting).

The Sixth Amendment: Right to Speedy, Fair and Impartial Jury Trial

§ 23.2.1.3.A, page 1027, n.172: In Southern Union Co. v. United States, 132 S. Ct. 2344 (2012), a 6-3 Court extended Apprendi to hold that the Sixth Amendment guarantee of a jury trial on any fact (other than a prior conviction) that increases a criminal defendant’s maximum potential sentence applies to imposition of criminal fines. Three Justices dissented, indicating support for the dissent in Apprendi. Id. at 2357-58 (Breyer, J., joined by Kennedy & Alito, J.J., dissenting). See also Pena-Rodriguez v. Colorado, 137 S. Ct. 855, 868-69 (2017) (where juror makes a clear statement indicating reliance on racial stereotypes or animus, Sixth Amendment requires usual “no-impeachment” rule to give way to permit trial court to consider evidence whether defendant received a fair and impartial trial); id. at 874-75 (Alito, J., joined by Roberts, C.J., and Thomas, J., dissenting) (Holmesian deference-to-government opinion); id. at 872-74 (Thomas, J., dissenting) (formalist “original intent” opinion); People v. Hensley, 330 P.3d 296 (Cal. 2014) (juror’s act of calling pastor for advice on penalty phase in death penalty case misconduct, requiring reversal, even though pastor told him the Bible required him to follow secular law and make own conclusions); State v. Betterman, 342 P.3d 971 (Montana 2015) (no Sixth Amendment right to speedy sentencing, noting federal Circuit and state court split; delay of 14 months between guilty plea and sentencing did not violate due process), aff’d Betterman v. Montana, 136 S. Ct. 1609 (2016) (no Sixth Amendment right; due process not addressed); United States v. Tigano, 880 F.3d 602 (2nd Cir. 2018) (speedy trial rights violated when man held in custody for almost 7 years on drug-related charges, including manufacture of 1,400 marijuana plants).

The Sixth Amendment: Sentencing

§ 23.2.1.3.A, page 1028, n.173: In Dorsey v. United States, 132 S. Ct. 2321 (2012), a 5-4 Court held that the new, more lenient mandatory minimum sentencing provisions of the Fair Sentencing Act of 2010 established for crack cocaine offenses apply to sentencing of defendants who committed crimes before the Act took effect
but were sentenced after it became law, even if sentencing took place before the Sentencing Guidelines amendments took effect; id. at 2339 (Scalia, J., joined by Roberts, C.J., and Thomas & Alito, JJ., dissenting).

In *Alleyne v. United States*, 133 S. Ct. 2151 (2013), a 5-4 Court held that any fact which increases the mandatory minimum sentence for a crime is an “element” of the crime, not a “sentencing factor,” that therefore must be submitted to a jury, overruling *Harris v. United States*, 536 U.S. 545 (2002). Despite his disagreement with *Appendi*, Justice Breyer joined the majority on the grounds that *Appendi* is now the law of the land, and the distinction drawn in *Harris* between minimum and maximum sentences was an anomaly he could no longer follow. 133 S. Ct. at 2166 (Breyer, J., concurring in part and concurring in the judgment).

Four Justices dissented in *Alleyne*. *Id.* at 2167-68 (Roberts, C.J., joined by Scalia & Kennedy, JJ., dissenting) (increasing mandatory minimum sentences limits discretion of a judge in sentencing, but does not affect the jury’s role); *id.* at 2172 (Alito, J., dissenting) (*Appendi* should be overruled, not *Harris*). *See also Descamps v. United States*, 133 S. Ct. 2276 (2013) (courts may not use “modified categorical approach” to decide whether a prior conviction qualifies as a predicate for recidivist enhancement statute when the crime has a single, indivisible set of elements; courts must follow “elements-based,” not “fact-based,” inquiry) (Alito, J., dissenting); *Mathis v. United States*, 136 S. Ct. 2243 (2016) (“elements-based” approach prevents enhancement where statute permits alternative means broader than generic offense to meet elements) (Breyer, J., joined by Ginsburg, J., dissenting; Alito, J., dissenting); *United States v. Johnson*, 583 Fed. App’x 503 (6th Cir. 2014) (no Sixth Amendment right to jury determination of restitution under Mandatory Victim Restitution Act); *Medina v. United States*, 642 Fed. App’x 59 (2d Cir. 2016) (district court may consider facts relevant to sentencing proved by preponderance of the evidence, even if defendant acquitted by jury of crimes based on those facts under the beyond a reasonable doubt standard, as long as facts do not increase punishment beyond maximum allowed for crimes on which defendant was convicted); *United States v. Wireman*, 849 F.3d 956 (10th Cir. 2017) (judges do not have to respond specifically to a defendant’s sentencing arguments as long as they follow sentencing guidelines); *United States v. Velasco*, 855 F.3d 691 (5th Cir. 2017) (shoes can be a dangerous weapon, subjecting a defendant to an increased sentence).

**The Sixth Amendment: Right to Confront Witnesses**

§ 23.2.1.3.B, page 1029, n.182: In *Giles v. California*, 128 S. Ct. 2678 (2008), the Supreme Court noted that in addition to the “dying declaration” exception to the right to confront witnesses, a second exception applies when the witness is “detained” or “kept away” by the defendant – the so-called “forfeiture by wrongdoing” exception. In *Giles*, a 6-3 Court held this exception did not apply when the defendant murdered the witness 3 weeks after she filed a domestic violence complaint, because he did not intend to prevent her from testifying by killing her, but killed her for other reasons. The prosecution had used statements in her compliant about their relationship to rebut the accused’s defense that he killed her in self-defense. *Id.* at 2693, 2683-84. The dissent would have applied the “forfeiture by wrongdoing” doctrine because the natural consequence of the defendant’s act in committing the murder would prevent the witness from testifying about her statement. *Id.* at 2696-98 (Breyer, J., joined by Stevens & Kennedy, JJ., dissenting). The doctrine for the future is unclear, because both Justices Thomas and Alito noted in concurrences that they viewed the statements made to the police in the domestic violence complaint as not covered by the Confrontation Clause, since the statements were not the equivalent of witness testimony in court. Thus, had that issue been before the Court, they would have permitted the evidence to be used at trial on that ground. *Id.* at 2693-94 (Thomas, J., concurring); *id.* at 2694 (Alito, J., concurring). *See also Michigan v. Bryant*, 131 S. Ct. 1143, 1150 (2011) (where statements by mortally wounded victim about shooter’s description and location of shooting objectively indicate that the “primary purpose of the interrogation” was “to enable police assistance to meet an ongoing emergency” rather than to preserve his testimony about his killer, statements are not testimonial and Confrontation Clause does not apply). *Id.* at 1168 (Scalia, J., dissenting); *id.* at 1176 (Ginsburg, J., dissenting).

In *Melendez-Diaz v. Massachusetts*, 129 S. Ct. 2527 (2009), a 5-4 Court held that affidavits reporting the results of forensic analysis which showed material seized by the police was cocaine were “testimonial” in nature, rendering the affiants “witnesses” subject to the defendant’s right of confrontation. The affidavits do not qualify as traditional official or business records. The argument that the statements result from neutral scientific testing is an invitation to return to the overruled decision in *Ohio v. Roberts*, 448 U.S. 56, 66 (1980), which held that evidence with “particularized guarantees of trustworthiness” was admissible without confrontation. Petitioner’s power to subpoena the analysts is no substitute for confrontation. Many states’
practice accords with today’s decision; serious disruption predicted by respondent and dissent is not likely. As in 
Crawford v. Washington, 541 U.S. 36 (2004), discussed in the E-Treatise at § 23.2.1.3.B n.176, which overruled Roberts, the majority in Melendez-Diaz was formalist Justices Scalia and Thomas; liberal instrumentalist Justices Stevens and Ginsburg, and instrumentalist-leaning Justice Souter. 129 S. Ct. at 2530. Four Justices dissented. They noted, “Until today, scientific analysis could be introduced into evidence without testimony from the ‘analyst’ who produced it. This rule has been established for at least 90 years. It extends across at least 35 States and six Federal Courts of Appeals. Yet the Court undoes it based on two recent opinions that say nothing about forensic analysts: Crawford v. Washington, 541 U.S. 36 (2004), and Davis v. Washington, 547 U.S. 813 (2006). . . . The immediate systemic concern is that the Court makes no attempt to acknowledge the real differences between laboratory analysts who perform scientific tests and other, more conventional witnesses – ‘witnesses’ being the word the Framers used in the Confrontation Clause [not analysts].” 129 S. Ct. at 2543 (Kennedy, J., joined by Roberts, C.J., and Breyer & Alito, JJ., dissenting). See also Bullcoming v. New Mexico, 131 S. Ct. 2705, 2709 (2011) (Sixth Amendment not satisfied by presentation of a different analyst who is knowledgeable about the testing procedures, but who neither performed the testing, observed the testing, nor signed a certification in the report regarding handling the sample) (Kennedy, J., joined by Roberts, C.J., and Breyer & Alito, JJ., dissenting); Russell v. Texas, 2016 WL 1402943 (Tex. Ct. App. (14th Dist.) 2016) (Sixth Amendment satisfied by testimony of analyst who performed blood test for intoxication; testimony by nurse who drew the blood not required).

In Williams v. Illinois, 132 S. Ct. 2221, 2227-28 (2012), the 4 dissenting Justices in Melendez-Diaz and Bullcoming formed a 4-Judge plurality that concluded testimony by an expert from a state’s crime laboratory that a defendant’s DNA profile matched the DNA profile produced by another lab, Cellmark, was not admitted for the purpose of establishing the accuracy of the profile that Cellmark produced, but rather merely expressing “an opinion that is based on facts that the expert assumes, but does not know, to be true.” Thus, the Confrontation Clause did not apply. Justice Thomas held that the statement was admitted for purposes of truth, but the Cellmark report was not a sufficient “formalized” document to which the Confrontation Clause should apply. Id. at 2255-56 (Thomas, J., concurring in the judgment). The other Justices in the majority in Melendez-Diaz and Bullcoming dissented, concluding the testimony was introduced for establishing truth, and was testimonial to which the Confrontation Clause should apply. Id. at 2264-65 (Kagan, J., joined by Scalia, Ginsburg & Sotomayor, JJ., dissenting). See generally People v. Lopez, 286 P.3d 469 (Cal. 2012) (laboratory report that linked the results of a blood-alcohol test to defendant admissible without the testimony of the analyst who prepared the report, because the report lacked the level of formality required to be considered “testimonial” under Williams); People v. Dungo, 286 P.3d 442 (Cal. 2012) (statements in autopsy report describing the condition of the murder victim not “testimonial” under Williams); State v. Maxwell, 9 N.E.3d 930 (Ohio 2014) (autopsy report “business record,” not “testimonial”); State v. Michaels, 95 A.3d 648 (N.J. 2014) (substitute analyst who conducts “independent review” of laboratory testing and “verifies” machine-generated testing processes can testify, noting split among states following Bullcoming/Williams). See also State v. McLeod, 66 A.3d 1221 (N.H. 2013) (expert can testify about cause of a fire even if that testimony was based, in part, on statements of the resident that could not be admitted under Crawford because individual had died of unrelated causes prior to trial; court admitted the evidence under a hearsay exception that allows a witness to testify to an opinion that is based on inadmissible evidence when it is evidence that experts in the field reasonably rely upon in forming an opinion); People v. Duncan, 835 N.W.2d 399 (Mich. 2013) (hearsay statements of child too frightened to testify at trial can be admitted under exception for statements of declarants who are “unavailable” by reason of “mental infirmity”); Ohio v. Clark, 135 S. Ct. 2173 (2015) (three-year-old’s statements to preschool teachers identifying defendant as person who caused injuries not “testimonial”; primary purpose to deal with child abuse emergency).

The Harmless Error and Plain Error Rules

§ 23.2.1.3.B, page 1030, n.185: For applications of the “harmless error” rule, see United States v. Davila, 133 S. Ct. 2139 (2013) (improper judicial participation in plea negotiations does not require vacatur of guilty plea unless error prejudiced the defendant’s decision to plead guilty); People v. Aranda, 283 P.3d 632 (Cal. 2012) (trial judge’s failure to give standard jury instruction on the prosecution’s burden of proving an offense beyond a reasonable doubt deprives defendant of due process, but is subject to review for harmless error; in this case, the error was harmless); State v. Schwartz, 327 P.3d 108 (N. Mex. 2014) (admitting video testimony
of forensic scientists, without making necessary finding video testimony necessary, violates Confrontation Clause; not harmless on these facts); United States v. Lee, 760 F.3d 692 (7th Cir. 2014) (denial of defendant’s right to self-representation – here at a pretrial suppression hearing – can never be harmless). For application of the “plain error” rule, see Henderson v. United States, 133 S. Ct. 1121 (2013) (federal plain error rule, Fed. R. Crim. P. 52(b), which authorizes an appellate court to correct an error to which the defendant did not object at trial if the error affects “substantial” rights, applies even when the error did not become plain until the time of the defendant’s appeal); id. at 1131 (Scalia, J., joined by Thomas & Alito, JJ., dissenting).

The Sixth Amendment: Ineffective Assistance of Counsel

§ 23.2.1.3.C, page 1032, end of section: The Court reaffirmed in Buck v. Davis, 137 S. Ct. 759 (2017), the Strickland rule that in addition to showing (1) “that counsel performed deficiently” because his “performance fell outside the bounds of competent representation” a litigant (2) “must also demonstrate prejudice – ‘a reasonable probability that, but for counsel’s unprofessional errors, the result of the proceeding would have been different.’” Strickland v. Washington, 466 U.S. 686, 694 [1984].” The Court held in Buck that ineffective assistance of counsel prejudiced defendant who received the death penalty when defense counsel entered into evidence a report containing expert testimony that the defendant was more inclined toward future dangerousness because he was black. Id. at 767. Two Justices concluded that given the heinousness of the crime, the defendant was not prejudiced by report. Id. at 780-81 (Thomas, J., joined by Alito, J., dissenting) In phrasing the proper test, Justice Thomas substituted for Strickland’s “reasonable probability” the phrase “a ‘substantial’ likelihood of a different result,” citing Harrington v. Richter, 562, 86, 111-12 (2011). While Harrington did characterize the Strickland holding in that matter, that characterization is inaccurate. The term “substantial” does not appear in Strickland’s phrasing of the test, and is inconsistent with Strickland’s statement that its test does not require a changed result to be “more likely than not.” 466 U.S. at 693-94. See generally Lafler v. Cooper, 132 S. Ct. 1376 (2012) (when petitioner prejudiced by counsel’s deficient performance in advising rejection of plea offer; proper remedy is to order state to reoffer plea agreement) (Scalia, J., joined by Roberts, C.J., and Thomas, J., dissenting; Alito, J., dissenting); Missouri v. Frye, 132 S. Ct. 1399 (2012) (right to effective assistance extends to the negotiation and consideration of plea offers that lapse or are rejected) (Scalia, J., joined by Roberts, C.J., and Thomas & Alito, JJ., dissenting); Trevino v. Thaler, 133 S. Ct. 1911 (2013) (ignorance or inadvertence on part of state post-conviction counsel can establish basis for excusing federal habeas corpus procedural default of an ineffective assistance claim); United States v. Luis, 564 Fed. App’x 493 (11th Cir. 2014) (forfeiture of “property of equivalent value” to that traceable to alleged fraud does not impair right to counsel); United States v. Ragan, 820 F.3d 609 (4th Cir. 2016) (lawyer who fell asleep several times during trial constitutes ineffective assistance; no need to show individualized prejudice); Bahtuoh v. Smith, 855 F.3d 868 (8th Cir. 2017) (not ineffective assistance to tell jury client will testify, but then doesn’t; contra Ouber v. Guarino, 293 F.3d 19 (1st Cir. 2002)). Cf. Molen v. Christian, 388 P.3d 591 (Ida. 2017) (plaintiff must prove some kind of “exoneration” to bring malpractice claim against criminal defense attorney, but not actual innocence, as that runs counter to presumption of innocence; citing Rantz v. Kaufman, 109 P.3d 132 (Colo. 2005) (discussion of various states’ approaches)).

In Padilla v. Kentucky, 130 S. Ct. 1473, 1482-83 (2010), the Court held it is ineffective assistance of counsel if counsel fails to advise a noncitizen that a guilty plea carries a risk of deportation; where the law is “succinct and straightforward” the attorney must provide competent advice. Two Justices agreed the attorney should advise the client that a criminal conviction may have adverse consequences, but attorney only must suggest client consult an immigration attorney and refrain from unreasonably providing incorrect advice. Id. at 1487 (Alito, J., joined by Roberts, C.J., concurring in the judgment). Two Justices would have limited the Sixth Amendment analysis to effective assistance on the criminal prosecution, not collateral consequences, such as deportation. Collateral consequences should be handled by legislation which could specify “what collateral consequences counsel must bring to a defendant’s attention” and “legislation could provide consequences . . . other than nullification of a criminal conviction.” Id. at 1495-97 (Scalia, J., joined by Thomas, J., dissenting). See also Chaidez v. United States, 133 S. Ct. 1103 (2013) (because Padilla announced a new rule, it does not apply retroactively to already-final convictions) (Sotomayor, J., joined by Ginsburg, J, dissenting); Jae Lee v. United States, 137 S. Ct. 1958 (2017) (even when case against accused is strong, prejudice established where plea bargain led to deportation, even if going to trial might have resulted in substantially longer sentence) (Gorsuch, J., not participating) (Thomas, J., joined by Alito, J., dissenting).
§ 23.2.1.4, page 1033, n.201: In Hall v. Florida, 134 S. Ct. 1986 (2014), a 5-4 Court extended Atkins v. Virginia to hold ban on death penalty for intellectual disabled defendants does not allow states to require defense to present evidence of IQ below 70 before being presenting other evidence of intellectual disability. Id. at 2001-02 (Alito, J., joined by Roberts, C.J., and Scalia & Thomas, JJ., dissenting) (national restriction on IQ use unsound). See also Brumfield v. Cain, 135 S. Ct. 2269, 2273 (2015) (death row inmate sentenced before Atkins entitled to Atkins hearing on these facts; state court contrary determination an “unreasonable determination of the facts”); id. at 2289 (Thomas, J., joined in all but Part I-C by Roberts, C.J., and Scalia & Alito J., dissenting) (state court decision not “unreasonable”); Moore v. Texas, 137 S. Ct. 1039, 1044 (2017) (states may not rely on superseded medical standards in determining who is intellectual disabled for purposes of execution); id. at 1053–54 (Roberts, C.J., and Thomas & Alito, JJ., dissenting) (state had independent grounds to determine lack of intellectual disability; majority did not give sufficient deference).

The Eighth Amendment: Cruel and Unusual Punishment & The Mentally Impaired

§ 23.2.1.4, page 1034, n.206: In Kennedy v. Louisiana, 128 S. Ct. 2641 (2008), a 5-4 Court held that the Eighth Amendment bars imposition of the death penalty for the rape of a child where the crime did not result, and was not intended to result, in the victim’s death. Justice Kennedy, joined by Justices Stevens, Souter, Ginsburg, and Breyer, reasoned that punishment for a crime must be proportional to the offense as determined by evolving standards of decency that mark the progress of a maturing society. Those standards are determined by national consensus (the history of the Amendment, judicial precedents, legislative enactments, and state practice), and by the Court’s independent judgment. Justice Kennedy found consensus in evidence such as only six of the 36 states which have the death penalty authorize it for the rape of a child; no federal law imposes the death penalty for rape; in Coker v. Georgia, 433 U.S. 584 (1977), the rape of a 16-year-old woman, characterized as an adult, was held not to authorize the death penalty; and only one state since 1964 has sentenced to death an individual for the crime of child rape. Justice Kennedy also noted that the goal of retribution needed to be considered in light of the risks of wrongful execution because of the unreliability of testimony by children, and, as a matter of deterrence, the death penalty adds to the risk of non-reporting and it removes an incentive for the rapist not to kill. Justice Kennedy said that the Court’s holding was limited to crimes against individuals, and did not extend to such crimes as treason, espionage, terrorism, and drug kingpin activity. However, he added, “As it relates to individuals, though, the death penalty should not be expanded to instances where the victim’s life was not taken.” 128 S. Ct. at 2659. Following the decision, it emerged that under the Military Code of Justice the death penalty is authorized for rape of a child when done by military personnel. This additional provision, not used in recent history, would likely not have made any difference in the case outcome. See Kennedy v. Louisiana, 129 S. Ct. 1 (2008) (motion for rehearing denied).

Justice Alito’s dissent, joined by Chief Justice Roberts and Justices Scalia and Thomas, assailed the majority opinion, stating: “[T]he Court holds that the Eighth Amendment categorically rules out the death penalty in even the most extreme cases of child rape even though: (1) this holding is not supported by the original meaning of the Eighth Amendment; (2) neither Coker nor any other prior precedent commands this result; (3) there are no reliable objective indicia of a “national consensus” in support of the Court’s position; (4) sustaining the constitutionality of the state law before us would not ‘extend’ or ‘expand’ the death penalty; (5) this Court has previously rejected the proposition that the Eighth Amendment is a one-way ratchet that prohibits legislatures from adopting new capital punishments statutes to meet new problems; (6) the worst child rapists exhibit the epitome of moral depravity; and (7) child rape inflicts grievous injury on victims and on society in general.” Id. at 2677 (Alito, J., joined by Roberts, C.J., and Scalia & Thomas, JJ., dissenting).

In Graham v. Florida, 130 S. Ct. 2011, 2023-25 (2010), Justice Kennedy joined with Justices Stevens, Ginsburg, Breyer, and Sotomayor to hold unconstitutional life imprisonment without parole for juveniles for non-homicide offenses. Justice Kennedy had observed in Roper v. Simmons, 543 U.S. 551 (2005), discussed in the E-Treatise at § 23.2.1.4 nn.203-06, that juveniles “cannot with reliability be classified among the worst offenders” because of “a lack of maturity and an underdeveloped sense of responsibility”; “juveniles are more vulnerable or susceptible to negative influences and outside pressures, including peer pressure”; and the “personality traits of juveniles are more transitory, less fixed.” Roper, 543 U.S. at 569-70. Further, only 12
states had 129 juveniles in total sentenced to such imprisonment for non-homicide offenses in 2010, while such imprisonment was authorized in 37 states and the District of Columbia. Thus, legislative authorization supported constitutionality, but executive practice suggested the case was similar to Roper. Being more deferential to legislative practice, Chief Justice Roberts agreed that a life sentence without parole for armed burglary was unconstitutional, but was unwilling to adopt that rule for any non-homicide offense. Id. at 2039-40 (Roberts, C.J., concurring in the judgment). In a formalist dissent, focused on text and specific historical intent, Justice Thomas, joined by Justices Scalia and Alito, noted that “the text of the Constitution is silent regarding the permissibility of this sentencing practice, [and] it would not have offended the standards that prevailed at the founding.” Id. at 2043 (Thomas, J., joined by Scalia, J., and Alito, J., as to Parts I and III).

In Miller v. Alabama, 132 S. Ct. 2455 (2012), a 5-4 Court extended Roper and Graham to hold that the Eighth Amendment forbids imposition of life imprisonment without parole upon a homicide offender younger than 18 at the time of the offense. The dissent noted that, unlike Graham, both legislative and executive practice supports states having discretion to sentence juvenile homicide offenders to life imprisonment without parole, and that nearly 2,500 such prisoners were currently serving such sentences at the time Miller was decided. Id. at 2477-79 (Roberts, C.J., joined by Scalia, Thomas & Alito, JJ., dissenting). See also Virginia v. LeBlanc, 137 S. Ct. 1726 (2017) (per curiam) (Virginia’s program providing possibility of parole for juvenile only after 60 years of age not unconstitutional under habeas standard of being unreasonable application of clearly established law); People v. Caballero, 282 P.3d 291 (Cal. 2012) (sentence providing equivalent of life without parole – juvenile left with possibility of parole after 110 years – unconstitutional); State v. Null, 836 N.W.2d 41 (Iowa 2013) (parole for juvenile only after 52 years unconstitutional under Iowa Constitution, which provides greater protection than Miller); Aiken v. Byars, 765 S.E.2d 572 (S. Car. 2014) (3-2 decision: Miller applies retroactively, 2 judges rest decision on U.S. Constitution, 1 on South Carolina Constitution); People v. Carp, 852 N.W.2d 801 (Mich. 2014) (4-3 decision: Miller does not apply retroactively).

The Eighth Amendment: Cruel and Unusual Punishment Generally

§ 23.2.1.4, page 1036, n.214: In Baze v. Rees, 128 S. Ct. 1520, 1533-34 (2008), a 7-2 Court upheld Kentucky’s three-drug lethal injection method of capital punishment. Chief Justice Roberts held that the Eighth Amendment prohibits wanton exposure to objectively intolerable risk, which was not present here. Justices Scalia and Thomas said the Eighth Amendment is violated only by methods deliberately designed to inflict pain. Id. at 1156 (Thomas, J., joined by Scalia, J., concurring in the judgment). Justice Stevens reiterated his view to invalidate the death penalty, but agreed under existing precedents Kentucky’s procedure was constitutional. Id. at 1552 (Stevens, J., concurring in the judgment). Justice Breyer agreed with Justice Ginsburg’s statement of the law, however he was not persuaded that Kentucky’s method created such a risk. Id. at 1563-64 (Breyer, J., concurring in the judgment). Justice Ginsburg said the test should be whether the method creates an untoward, readily avoidable risk of inflicting severe and unnecessary suffering. She said the case should be remanded to consider whether omission of safeguards used by many other states to confirm that the inmate is unconscious before injection of the second and third drugs (e.g., shaking and brushing the eyelids) poses an untoward, readily avoidable risk. Id. at 1567 (Ginsburg, J., joined by Souter, J., dissenting). See also Glossip v. Gross, 135 S. Ct. 2728 (2015) (Oklahoma’s three-drug injection method, including use of midazolam to render inmate unable to feel pain, rather than earlier court-approved sodium thiopental or pentobarbital, no longer available, due in part to anti-death penalty activism, constitutional) (Breyer, J., joined by Ginsburg, J., dissenting) (Court should consider if the death penalty is unconstitutional) (Sotomayor, J., with Ginsburg, Breyer & Kagan, JJ., dissenting) (use of midazolam poses substantial, intolerable risks). On death penalty procedures, see generally Owens v. Hill, 758 S.E.2d 794 (Ga. 2014) (no constitutional right to make state reveal the source of lethal injection drugs used); Staley v. State, 420 S.W.3d 785 (Tex. Crim. App. 2013) (death-row inmate cannot be forcibly drugged to make him sane enough to be executed); State v. Medina, 306 P.3d 48 (Ariz. 2013) (Arizona law that allows second capital sentencing proceeding with new jurors after original jury deadlocked does not violate the Eighth Amendment); Bosse v. Oklahoma, 137 S. Ct. 1 (2016) (per curiam) (while Payne v. Tennessee, 501 U.S. 808 (1991), overruled Booth v. Maryland, 482 U.S. 496 (1987), to permit victim impact evidence to be admitted at the sentencing phase relating to personal characteristics of the victim and the emotional impact of the crime on the victim’s family, it did not overrule Booth v. Maryland on the admission of a victim’s family members’ characterizations and opinions about the
crime, the defendant, and the appropriate sentence; such evidence is still barred by the Eighth Amendment, citing, inter alia United States v. Hatter, 532 U.S. 557, 567 (2001) (“[I]t is the Court’s prerogative alone to overrule one of its precedents.”).

On substantive rights, see Fields v. Smith, 653 F.3d 550 (7th Cir. 2011) (Wisconsin law that bars Wisconsin Department of Corrections from providing hormone therapy or sexual reassignment surgery to inmates violates Eighth Amendment ban on cruel and unusual punishments); Hinds v. Lynch, 790 F.3d 239 (1st Cir. 2015) (deportation of non-citizen not “punishment” to which Eighth Amendment applies; individual received process that was due aliens, which does not include “proportionality” review); Marin-Marin v. Sessions, 852 F.3d 192 (2d Cir. 2017) (same); Boyer v. Davis, 136 S. Ct. 1446 (2016) (Breyer, J., dissenting from denial of certiorari) (Court should consider if 32 years on death row constitutes “cruel and unusual” punishment).

The Eighth Amendment: Excessive Fines Clause

§ 23.2.1.4, page 1037, text following n.216: Courts have split over whether to consider if criminal forfeiture will deprive accused of future ability to earn a living. United States v. Viloski, 814 F.3d 104 (2nd Cir. 2016) (future ability relevant in determining excessiveness; acknowledging 9th and 11th Circuits have held excessiveness only determined by looking at characteristics of the offense).

Ex Post Facto Clause

§ 23.2.2.2, page 1041, text following n.231: In Peugh v. United States, 133 S. Ct. 2072 (2013), a 5-4 Court held that the Ex Post Facto Clause is violated when the defendant is sentenced under current Sentencing Guidelines providing higher sentencing range than Guidelines in effect at the time of the offense; id. at 2088 (Thomas, J., joined by Roberts, C.J., and Scalia & Alito, JJ., dissenting) (retroactive application of the Guidelines did not alter the statutory punishment range). See also Hinojosa v. Davey, 803 F.3d 412 (9th Cir. 2015) (statutory amendment that did away with gang member’s ability to earn “good-time” credits violates Ex Post Facto Clause as retroactively increasing punishment), rev’d, Kernan v. Hinojosa, 136 S. Ct. 1603 (2016) (habeas case should have been dismissed on state procedural grounds); Doe v. State, 111 A.3d 1077 (N.H. 2015) (amendments to sex offender registration scheme requiring offenders to register for life without any possibility of judicial review makes scheme punitive and violates New Hampshire’s Ex Post Facto Clause); Does #1-5 v. Snyder, 2016 WL 4473231 (6th Cir. 2016) (retroactive application of Michigan Sex Offenders Registration Act (SORA) is punishment and violates Ex Post Facto Clause, distinguishing Smith v. Doe, 538 U.S. 84 (2002) (Alaska SORA nonpunitive and no violation of Ex Post Facto Clause)).

Recent Cases Involving Habeas Corpus

§ 23.2.2.3, page 1043, n.236: Substantial deference is given to state proceedings in federal habeas cases. See Jenkins v. Hutton, 137 S. Ct. 1769 (2017) (per curiam) (question is not whether alleged error might have affected jury’s verdict, but whether “clear and convincing evidence” shows “no reasonable juror” would have reached the same decision); Davis v. Ayala, 135 S. Ct. 2187 (2015) (any constitutional error in defense counsel’s absence from ex parte hearing regarding Batson challenge was harmless) (Sotomayor, joined by Ginsburg, Breyer & Kagan, JJ., dissenting); Lopez v. Smith, 135 S. Ct. 1 (2014) (9th Circuit failed to apply deferential habeas review when it relied on own precedent, not “clearly established law,” to hold murder defendant had constitutional right to advance notice prosecutors would seek aiding-and-abetting instruction); White v. Woodall, 134 S. Ct. 1697 (2014) (not clearly established that defendant always entitled to privilege against self-incrimination jury instruction not to draw negative inferences from silence at penalty phase of trial) (Breyer, J., joined by Ginsburg & Sotomayor, dissenting); Stanton v. Sims, 134 S. Ct. 3 (2013) (not clearly established that warrantless entry into a home, in hot pursuit of suspect whom officer had probable cause to arrest only for a misdemeanor, violated Fourth Amendment); Nevada v. Jackson, 133 S. Ct. 1900 (2013) (state supreme court reasonably applied federal law when it determined that petitioner was not denied a right to present a complete defense when he was barred from presenting extrinsic evidence of victim’s prior accusations of sexual assault); Metrish v. Lancaster, 133 S. Ct. 1781 (2013) (not violation of clearly established law to reject state prisoner’s claim that retroactive application to him of a state supreme court decision abolishing diminished capacity as a defense to first-degree murder violated his due process rights);
Marshall v. Rodgers, 133 S. Ct. 1446 (2013) (when criminal defendant waives Sixth Amendment right to counsel at trial, not violation of clearly established law for judge to possess broad discretion to deny post-trial request for counsel); Johnson v. Williams, 133 S. Ct. 1088 (2013) (when defendant raised federal claim in state court, and the state court ruled against him that addressed some issues but did not expressly address the federal claim, federal courts on habeas review should presume, subject to rebuttal, that the federal claim was addressed); Ryan v. Gonzales, 133 S. Ct. 696 (2013) (lack of competence of state criminal defendant does not require suspension of federal habeas proceeding); Parker v. Mathews, 132 S. Ct. 2148 (2012) (challenging sufficiency of the evidence, deference must be given both to jury and state court’s consideration of whether jury’s verdict based on adequate evidence); Coleman v. Johnson, 132 S. Ct. 2060 (2012) (same); Hardy v. Cross, 132 S. Ct. 490 (2011) (state court did not unreasonably apply Confrontation Clause in determining complainant was unavailable to testify at retrial); Greene v. Fisher, 132 S. Ct. 38 (2011) (habeas court should focus on whether federal law was clearly established at time of last adjudication on the merits in state court, not when conviction became final); Bobby v. Dixon, 132 S. Ct. 26 (2011) (not unreasonable for state court to hold intentional violation of Miranda that did not produce a confession did not render inadmissible a later, properly warned confession); Cavazos v. Smith, 132 S. Ct. 2 (2011) (state court decision that disputed expert testimony regarding shaken baby syndrome was sufficient to sustain assault conviction not unreasonable determination of facts or unreasonable application of law). But see Wetzel v. Lambert, 132 S. Ct. 1195 (2012) (federal habeas court must consider each ground state court relied upon to reject inmate’s claim an allegedly exculpatory police report undermined his capital murder conviction); McWilliams v. Dunn, 137 S. Ct. 1790 (2017) (unreasonable application of clearly established law to deny accused access to competent psychiatrist when his sanity is an issue) (Alito, J., joined by Roberts, C.J., and Thomas & Gorsuch, JJ., dissenting).

Where the habeas action involves ineffectiveness of counsel, fuller review seems to be given. See Christeson v. Roper, 135 S. Ct. 891 (2015) (attorney’s failure to meet deadline for federal habeas application entitles defendant to substituted counsel); Hinton v. Alabama, 134 S. Ct. 1081 (2014) (appointed capital defense attorney’s failure to request additional funding to replace expert he knew was inadequate constitutes ineffective assistance); Martinez v. Ryan, 132 S. Ct. 1309 (2012) (federal habeas court is not barred from hearing claim of ineffective assistance of counsel at trial if, in the state court’s initial review of ineffective assistance, there was no counsel or counsel was ineffective); Maples v. Thomas, 132 S. Ct. 912 (2012) (state prisoner whose pro bono attorneys abandoned him without notice which resulted in missing a deadline for filing demonstrated cause to excuse procedural default); McQuiggin v. Perkins, 133 S. Ct. 1924 (2013) (actual innocence, if proved, permits federal habeas action despite procedural bar or expiration of a statute of limitations) (Roberts, C.J., and Scalia, Thomas & Alito, JJ., dissenting); Wood v. Milyard, 132 S. Ct. 1826 (2012) (federal court of appeals has the authority, but not the obligation, to address timeliness of a federal habeas petition on the court’s own initiative); Gonzalez v. Thaler, 132 S. Ct. 641 (2012) (failure of certificate of appealability to comply with statutory requirements does not deprive court of appeals of jurisdiction to review district court’s denial of relief). But see Burt v. Titlow, 134 S. Ct. 10 (2013) (when a state prisoner asks a federal court to set aside a sentence due to ineffective assistance of counsel during plea bargaining, federal court must use doubly deferential standard that gives both the state court and defense attorney benefit of the doubt); Woods v. Etherton, 136 S. Ct. 1149 (2016) (Sixth Circuit incorrectly denied deference to findings of the state court on whether defendant received ineffective assistance of counsel under the Sixth Amendment); Davila v. Davis, 137 S. Ct. 2058 (2017) (Martinez and Trevino exceptions do not apply to procedural defaults caused by ineffective assistance of appellate counsel, since no constitutional right to appellate counsel) (Breyer, J., joined by Ginsburg, Sotomayor & Kagan, JJ., dissenting).

Right to Habeas Corpus in the Context of the War of Terrorism

§ 23.2.2.3, page 1043, end of the section: In Boumediene v. Bush, 128 S. Ct. 2229 (2008), discussed in this Supplement at § 27.4.4.8 text preceding n.418, a 5-4 Court held that aliens designated as enemy combatants and detained at Guantanamo Bay have the right of habeas corpus since the United States has practical control over Guantanamo Bay. Id. at 2253-62. In contrast, in Al Maqaleh v. Gates, 605 F.3d 84 (D.C. Cir. 2010), the court held that alien enemy combatants held at Bagram Airfield Military Base in Afghanistan may not invoke the writ of habeas corpus to challenge their detention. The Court noted the United States does not exercise de facto sovereignty over the base, in contrast to de facto sovereignty over Guantanamo Bay. Further, “practical obstacles” of adjudicating detainees’ entitlement to habeas corpus in a theater of war.
counseled against application of the writ. Cf. Dan Bilefsky, *Court Censures Poland Over C.I.A. Renditions*, N.Y. Times (July 24, 2014) (European Court of Human Rights ruled Poland violated rights of two terrorism suspects by allowing transfer of suspects to CIA detention facility in Poland where they were tortured); *United States v. Brehm*, 691 F.3d 547 (4th Cir. 2012) (prosecution of foreign employee of U.S. defense contractor in U.S. court for crime committed on military base in Afghanistan does not violate due process).

In *Munaf v. Geren*, 128 S. Ct. 2207 (2008), a unanimous Supreme Court held that the federal courts have jurisdiction to consider petitions for habeas corpus filed on behalf of American citizens held in custody by the United States, even if held overseas. Simply because such jurisdiction exists, however, is not a sufficient basis, without considering the merits of the case, to grant a preliminary injunction against transferring individuals detained within another sovereign’s territory to that sovereign’s government for criminal prosecution. On the merits, habeas corpus should not be granted on the basis that the other country’s criminal procedures do not provide all of the protections afforded by the Constitution. Further, a claim that the other country engages in torture is for the political branches, not the judiciary, to consider. Finally, there is no rule forbidding the United States from transferring a citizen to another sovereign for criminal prosecution without a specific legal authority to do so given by act of Congress or the terms of a treaty where, as here, the detained persons voluntarily traveled to that country, and it is the very sovereign — Iraq — on whose behalf they are being detained. *Id.* at 2220-28. Justice Souter, joined by Justices Ginsburg and Breyer, wrote a concurring opinion which he sought to limit the holding to the precise facts of the case. He said here there was no habeas corpus relief only because of circumstances which included the following: (1) the petitioners voluntarily traveled to Iraq; (2) they are held in the territory of Iraq; (3) Iraq is an ally of the United States; (4) the petitioners are held by our troops; (5) hostilities are ongoing; (6) our troops are involved in those hostilities; (7) the government of Iraq decided to prosecute them for crimes committed in Iraq; and (8) the State Department has determined that the Iraq department that would have authority over them has generally met internationally accepted standards for basic prisoner needs. *Id.* at 2228 (Souter, J., joined by Ginsburg & Breyer, JJ., concurring). Chief Justice Roberts’ majority opinion gave no indication that it was so limited.

**Citizenship Clause**

§ 25.2, page 1071, end of the section: While the purpose of this provision was to make sure newly-freed slaves would be treated as citizens, its literal text extends citizenship to anyone born in the United States, even of non-citizen parents. *United States v. Wong Kim Ark*, 169 U.S. 649 (1898) (6-2 decision, one Justice not participating). See also *Tuaua v. United States*, 788 F.3d 300 (D.C. Cir. 2015) (14th Amendment Citizenship Clause does not apply to persons born in American Samoa; their status determined by section 308(1) of the Immigration and Nationality Act of 1952 which designates persons born in American Samoa as non-citizen nationals), *cert. denied*, 136 S. Ct. 2461 (2016); *Maslenjak v. United States*, 137 S. Ct. 1918 (2017) (citizenship cannot be revoked for lying on naturalization form unless lie is material).
§ 25.4, page 1079, n.83: See also Davis v. Commonwealth Election Commission, 844 F.3d 1087 (9th Cir. 2016) (provision in territory’s constitution that restricted voting in certain elections to individuals of Northern Marianas descent a form of ethnic/racial discrimination, and violates 15th Amendment).

“Class-of-One” Equal Protection Claims Do Not Apply in Government Employment Cases

§ 26.1, page 1085, text following n.8: In Engquist v. Oregon Dep’t of Agriculture, 128 S. Ct. 2146 (2008), a 6-3 Court held that the “class-of-one” theory does not apply in the context of public employment. Per Chief Justice Roberts, the Court noted, “Public employees typically have a variety of protection from just the sort of personnel actions about which Engquist complains [such as Civil Service statutory protection], but the Equal Protection Clause is not one of them.” Id. The dissent noted that “a discretionary decision with any ‘reasonably conceivable’ rational justification will not support an equal protection claim; only a truly arbitrary one will.” Id. at 2159 (Stevens, J., joined by Souter & Ginsburg, JJ., dissenting). The majority opinion agreed there would be few such cases, but noted there would still be a cost, since the “courts will be obliged to sort through [each claim] in a search for the proverbial needle in a haystack.” Id. After Engquist, “class of one” Equal Protection cases can still be brought outside the public employment context. For example, in SBT Holdings, LLC v. Westminster, Massachusetts, 547 F.3d 28 (1st Cir. 2008), the First Circuit allowed a developer to proceed on a “class of one” claim that a local conservation commission singled it out for wetlands protection enforcement. See also Del Marcelle v. Brown County Corp., 680 F.3d 887 (7th Cir. 2012) (Posner, J., joined by Kanne, Sykes & Tinder, lead opinion) (need to show “intent to disfavor” plaintiff based on “animus” or other “improper personal motivations”); id. at 900 (Easterbrook, J., concurring in the judgment) (plaintiff must show “no reasonably conceivable state of facts” provide a “rational basis” for state action); id. at 905 (Wood, J., joined by Flaum, Rovner, Williams & Hamilton, dissenting) (plaintiff victim of “intentional discrimination” and no “rational basis” for the treatment).

Examples of Minimum Rationality Review

§ 26.1.1.1, page 1089, text following n.27: See also Johnson v. Department of Justice, 341 P.3d 1075 (Cal. 2015) (5-2 decision that mandatory lifetime registration requirement for certain defendants convicted of nonforcible oral copulation or sodomy with a minor, but not for sexual intercourse with a minor, rational, based in part on granting discretion where support of children conceived as a result of unlawful intercourse could be involved); Goodpaster v. City of Indianapolis, 736 F.3d 1060 (7th Cir. 2013) (ordinance banning smoking in traditional bars, but not tobacco specialty bars, rational); Sensational Smiles, LLC v. Mullen, 793 F.2d 281 (2nd Cir. 2015) (regulation that only licensed dentists may shine light emitting diode (LED) lamp at mouth of consumer to whiten teeth rational); Ohio ex rel. Walgate v. Kasich, 93 N.E.3d 417 (Ohio Ct. App. 2017) (state decision to limit casino gambling to properties owned or operated by two gaming companies constitutional under rational basis review); Niang v. Carroll, 879 F.3d 870 (8th Cir 2018) (requirement that African-style hair braiders be licensed as cosmetologists or barbers constitutional under rational basis review based, in part, on ensuring braiders are trained in health risks associated inflammation and scalp infection and recognize scalp conditions unsuitable for braiding). But see Arizona Dream Act Coalition v. Brewer, 757 F.3d 1053 (9th Cir. 2014) (Arizona provision denying driver’s licenses to “Deferred Action for Childhood Arrivals” noncitizens who have federal Employment Authorization Documents (EAD), while allowing licenses for other noncitizens with federal EADs, irrational); Paul Stieler Enterp., Inc. v. City of Evansville, 2 N.E.3d 1269 (Ind. 2014) (smoking ban exempting riverboat casinos unreasonable under Indiana Constitution’s Equal Privileges and Immunities Clause, which is given “independent interpretation” from federal Equal Protection).

The Intent Requirement under the 14th Amendment

§ 26.2.1.2, page 1115, n.148: In Ashcroft v. Iqbal, 129 S. Ct. 1937 (2009), the Court held 5-4 that a complaint by a former federal prisoner alleging invidious discrimination by the Attorney General and the Director of the Federal Bureau of Investigation was subject to a motion to dismiss for not stating a claim against them. Justice Kennedy wrote for the Court that a claim for invidious discrimination in contravention of the First and
Fifth Amendments requires pleading and proving that the defendant acted with a discriminatory purpose, that is, the defendant undertook a course of action “because of” and not merely “in spite of” the action’s adverse effect upon an identifiable group. Plaintiff had alleged that his rights were violated because the defendants were responsible for policies of detaining him as a person of high interest in the search for terrorists because of his race, religion, or national origin. Justice Kennedy said these were conclusory statements that did not allege sufficient facts to create the plausibility of entitlement to relief based upon the defendant’s state of mind. \textit{Id}. at 1949-54. Justice Souter, dissenting with Justices Stevens, Ginsburg, and Breyer, said that knowledge and deliberate indifference are adequate proof of purpose, and he pointed to allegations that defendants helped create the particular, discriminatory policy detailed in the complaint. \textit{Id}. at 1958-61 (Souter, J., joined by Stevens, Ginsburg & Breyer, JJ., dissenting).

On proving discriminatory intent, see \textit{Rothe Development, Inc. v. Department of Defense}, 836 F.3d 57 (D.C. Cir. 2016) (Small Business Administration program for “small business concerns owned and controlled by socially and economically disadvantaged individuals” not an example of facial racial discrimination, nor passed with racially discriminatory intent, despite definition of such individuals as “those who have been subjected to racial or ethnic prejudice or cultural bias because of their identity as a member of a group without regard to their individual qualities” and statement in statute that “such groups include, but are not limited to, Black Americans, Hispanic Americans, Native Americans, Indian tribes, Asian Pacific Americans, Native Hawaiian Organizations, and other minorities”; focus of statute is on any individual who has experienced discrimination, not on individual’s race or ethnicity); \textit{Lewis v. Bentley}, 2017 WL 432464 (N.D. Ala. 2017) (mere speculation that state law banning local cities and municipalities from adopting any minimum wage law higher than that required by federal or state law was passed with racially discriminatory intent).

The Intent Requirement under Title VII

§ 26.2.1.2, page 1117, n.160: In \textit{Ricci v. Destefano}, 129 S. Ct. 2658 (2009), the Court held 5-4 that a city violated the disparate treatment provisions of Title VII, which require finding only of discriminatory impact, not discriminatory intent, when it refused to certify test results for promotions in its fire department because only a few minorities passed the test, and the city feared certification would violate the disparate impact provisions of Title VII. Justice Kennedy wrote that before an employer could engage in the intentional race discrimination involved in refusing to certify test results, it must have a strong basis in evidence, lacking here, to believe it will be subjected to disparate-impact liability if it fails to take the race-conscious discriminatory action of refusing certification. \textit{Id}. at 2675-81. Justice Scalia, concurring, suggested Title VII might violate the Equal Protection Clause if it required an employer to take race-based actions when a disparate-impact violation would otherwise ensue. \textit{Id}. at 2681-82 (Scalia, J., concurring). Justice Alito, concurring, argued the dissenting opinion left out important facts which tended to show the city’s real reason for scrapping the test was a desire to placate a politically important racial constituency. \textit{Id}. at 2683 (Alito, J., joined by Scalia & Thomas, JJ., concurring). The dissent emphasized the city was trying to overcome a past system in which racial minorities were denied positions in the fire department. \textit{Id}. at 2689-94 (Ginsburg, J., joined by Stevens, Souter & Breyer, JJ., dissenting). The dissent would allow an employer to use racial classifications in refusing to certify results if the employer acted in good faith and reasonably in an effort to avoid disparate impact liability. \textit{Id}. at 2703-07. On the intent requirement generally, see \textit{Texas Dept. of Housing and Community Affairs v. Inclusive Communities Projects, Inc.}, 135 S. Ct. 2507 (2015) (similarity of Fair Housing Act to Title VII of Civil Rights Act and Age Discrimination in Employment Act means disparate impact claims authorized under Fair Housing Act) (Alito, J., joined by Roberts, C.J., and Scalia & Thomas, JJ., dissenting); \textit{Blunt v. Lower Merion School Dist.}, 767 F.3d 247 (3rd Cir. 2014) (higher ratio of African-American students in remedial classes insufficient to show discriminatory intent required under Title VI of Civil Rights Act of 1964).

Anti-Affirmative Action State Referenda and Discriminatory Intent

Desegregation Plans in the Public Schools

§ 26.2.1.3.B.4, page 1128, end of section: On continuing desegregation efforts, see Cowan v. Cleveland Sch. Dist., 748 F.3d 233 (5th Cir. 2014) (district court must justify decision to remedy discrimination by allowing students to choose which school to attend, given long-standing doctrine questioning whether a “free choice” plan will work to end segregation, citing, inter alia, Green v. County Sch. Bd. of New Kent County, Va., 391 U.S. 430 (1968); Thomas v. School Bd. of St. Martin Parish, 756 F.3d 380 (5th Cir. 2014) (oversight by district court should be terminated only upon finding that all “vestiges of past discrimination” have been eliminated, citing Board of Educ. of Oklahoma City Public Schools v. Dowell, 498 U.S. 237, 245-46 (1991)).

Affirmative Action in the Context of School Admissions Policies

§ 26.2.1.4.D, page 1146, n.272: As predicted in the E-Treatise text, Justice Kennedy did apply a hard look to the race-based affirmative action programs in Parents Involved in Community Schools v. Seattle School District No. 1, 127 S. Ct. 2738 (2007), a case consolidating the appeals in Parents Involved in Comm. Schools v. Seattle Sch. Dist. No. 1, 426 F.3d 1162 (9th Cir. 2005) and Meredith v. Jefferson County Bd. of Educ., 416 F.3d 513 (6th Cir. 2005). While acknowledging diversity in a student body is a compelling interest, Justice Kennedy concluded the affirmative action programs in these cases either did not clearly indicate whether they were using race as a factor, which would be permissible under Grutter v. Bollinger, as discussed in the E-Treatise at § 26.2.1.4.D n.250, or race as an absolute point preference or quota or set-aside, which would be impermissible under Gratz v. Bollinger, as discussed at § 26.2.1.4.D n.251 (the Jefferson County case), or clearly were using race in an impermissible manner, with a blunt “white/non-white” classification system (the Seattle School District No. 1 case). 127 S. Ct. at 2789-91 (Kennedy, J., concurring in part and concurring in the judgment).

In their opinions, formalist Justices Scalia, Thomas, and Alito, along with Holmesian Chief Justice Roberts, did not conclude, as did Justice Kennedy, that racial diversity in educational settings was a compelling interest. Id. at 2755-59 (Roberts, C.J., joined by Scalia, Thomas & Alito, JJ., as to Part III(B)); id. at 2789 (Kennedy, J., concurring in part and dissenting in part). They avoided that issue by agreeing with Kennedy that the programs were not the least restrictive effective alternatives under strict scrutiny review. Id. at 2759-61 (Roberts, C.J., opinion for the Court, joined by Scalia, Kennedy, Thomas & Alito, JJ.).

The liberal instrumentalists on the Court – Justices Stevens, Ginsburg, and Breyer – were willing to permit the school districts to use race as more than just a factor, just as they had been so willing in Gratz. As in Gratz, they were joined by Justice Souter. While no longer arguing for intermediate review for race-based affirmation action, as had Justice Brennan’s four-Justice plurality in Bakke, discussed in the E-Treatise at § 26.2.1.4.A n.219, or seemingly Justice Stevens, Souter, Ginsburg, and Breyer’s dissents in Adarand, discussed at § 26.2.1.4.C. nn.246-48, they did suggest they would apply a less vigorous strict scrutiny – in terms of the “base plus six” model of review summarized in the E-Treatise in Table 7.2, at § 7.2.1, page 186, something like “loose strict scrutiny.” While requiring compelling interests, “loose strict scrutiny” only requires narrowly drawn regulations not substantially more burdensome than necessary, not the least restrictive effective alternative analysis of strict scrutiny. This difference is justified based on use of race to keep the races apart (regular strict scrutiny), versus use of race to bring the races together (loose strict scrutiny should apply). 127 S. Ct. at 2816-20 (Breyer, J., joined by Stevens, Souter & Ginsburg, JJ., dissenting).

Per Justice Kennedy, the Court underscored in Fisher v. University of Texas at Austin, 133 S. Ct. 2411 (2013), that strict scrutiny must be strict. A court cannot rely on “good faith” assurances by the state that the program “uses race in a permissible way,” but must instead give “close analysis to the evidence of how the program works in practice.” Id. at 2419-22. Justices Scalia and Thomas said they would overrule Grutter and hold all race-based affirmative action programs in higher education invalid. Id. at 2422 (Scalia, J., concurring); id. (Thomas, J., concurring). Justice Kagan took no part in the consideration or decision of the case. Id. On remand, a 2-1 panel of the Fifth Circuit upheld the program in Fisher. Fisher v. University of Texas at Austin, 758 F.3d 633 (5th Cir. 2014), aff’d, 136 S. Ct. 2198 (2016) (constitutional based on how program operated when case brought in 2008; school must continue to police its operation to ensure validity); id. at 2215-16 (Alito, J., joined by Roberts, C.J., and Thomas, J., dissenting) (university has not identified what they mean
by “critical mass” for diversity, and thus have not shown program directly advanced that end); \textit{id} at 2215 (Thomas, J., dissenting) (use of race in higher education \textit{per se} unconstitutional; \textit{Grutter} should be overruled).

The ultimate holdings in \textit{Seattle School District No. 1} and \textit{Fisher} underscore the wisdom, as suggested in the E-Treatise at pages 1144-45, of moving to “Hyde Park Declaration” socio-economic affirmative action, which would be tested only by minimum rationality review, as discussed in the E-Treatise at § 26.2.1.4.D n.269 & § 26.4.1. Even Chief Justice Robert’s four-Justice plurality in \textit{Seattle School District No. 1} indicated it was legitimate to advance socio-economic diversity based on “many possible bases [such as] admits [that] have lived or traveled widely abroad, are fluent in several languages, have overcome personal adversity and family hardship, have exceptional records of extensive community service, and have had successful careers in other fields.” 127 S. Ct. at 2753, \textit{citing} \textit{Grutter v. Bollinger}, 539 U.S. 306, 338 (2003). \textit{Cf. Rothe Development, Inc. v. United States Dep’t of Defense}, 836 F.3d 57 (D.C. Cir. 2016) (Small Business Administration program that extended special consideration to business owned by “socially and economically disadvantaged” individuals, defined in terms of “racial or ethnic prejudice or cultural bias” does not employ racial classification triggering strict scrutiny, but is constitutional under rational basis review).

Following \textit{Grutter}, Michigan voters passed a constitutional amendment to the Michigan Constitution preventing the state from adopting race-based affirmative action programs in public education, employment, and contracting. The Court upheld the amendment in \textit{Schuette v. Coalition to Defend Affirmative Action}, 134 S. Ct. 1623 (2014). The Court’s plurality distinguished \textit{Hunter v. Erickson} and \textit{Washington v. Seattle School District No. 1}, discussed at § 26.2.1.2 nn.165-66, by noting those cases involved actions designed “to encourage infliction of injury by reason of race,” while in \textit{Schuette} there was no such indication, just a desire for equal treatment. \textit{Id} at 1637-38 (Kennedy, J., joined by Roberts, C.J., and Alito, J., plurality opinion). Justice Breyer distinguished \textit{Hunter} and \textit{Seattle School District No. 1} on grounds that those cases involved “reordering of the political process,” while here unelected officials made the original decision to adopt the affirmative action program. \textit{Id} at 1650 (Breyer, J., concurring in the judgment). Justices Scalia and Thomas would have overruled \textit{Hunter} and \textit{Seattle School District No. 1}. \textit{Id} at 1640 (Scalia, J., joined by Thomas, J., concurring in the judgment). The dissent said the Michigan action was invalid, since the referendum made it harder for minorities to overturn than if the change just statutory. \textit{Id} at 1651-54 (Sotomayor, J., joined by Ginsburg, J., dissenting); \textit{id} at 1638 (Kagan, J., took no part in the consideration or decision in the case).

\textbf{Racial Redistricting Cases}

\textbf{§ 26.2.1.5, page 1151, n.294:} See \textit{Bethune-Hill v. Virginia State Bd. of Elections}, 137 S. Ct. 788 (2017) (challengers do not have to show actual conflict with traditional redistricting principles to trigger heightened scrutiny, as long as they can show race was a “predominant” factor in how district was drawn); \textit{Cooper v. Harris}, 137 S. Ct. 1455, 1468-70 (2017) (district court did not “clearly err” in finding District 1 & 12 in North Carolina were drawn with “predominate intent” to discriminate on race; redistricting cannot survive “strict scrutiny” applied in such cases, since even if complying with § 2 of the Voting Rights Act (VRA) is a compelling interest, to be “narrowly drawn” the state much show “good reasons” for thinking Act requires that redrawing – following the three preconditions of \textit{Thornburgh v. Gingles}, 478 U.S. 30, 50-51 (1986) that (1) the minority group is “sufficiently large and geographically compact to be a majority” in some reasonably configured district; (2) the minority group must be “political cohesive”; and (3) the white majority must vote “sufficiently as a bloc” to usually “defeat the minority’s preferred candidate” – and such “good reasons” did not exist here); \textit{id} at 1485-86 (Thomas, J., concurring) (§ 2 of the VRA does not apply to redistricting; thus could never justify a racial gerrymander); \textit{id} at 1486-87 (Alito, J., joined by Roberts, C.J., and Kennedy, J., concurring in the judgment in part and dissenting in part) (predominate discriminatory intent finding in District 12 clear err); \textit{Abbott v. Perez}, 138 S. Ct. 2305, 2324-25 (2018) (burden of proof always on plaintiff and presumption of legislative good faith not changed by prior discriminatory intent); \textit{id} at 2335 (Thomas, J., joined by Gorsuch, J., concurring) (VRA does not apply to redistricting); \textit{id} at 2346 (Sotomayor, J., joined by Ginsburg, Breyer & Kagan, J., dissenting) (district court followed proper standards; did not commit clear err); \textit{Alabama Legislative Black Caucus v. Alabama}, 231 F. Supp. 3d 1026 (M.D. Ala. 2017) (3-0 decision of 3-judge district court) (race predominated in design of some state Senate districts). \textit{Cf. North Carolina v. Covington}, 137 S. Ct. 1624 (2017) (\textit{per curiam}) (district court must do more than cursory evaluation of costs and benefits before imposing special election as remedy for election based on racially gerrymanded district).
Peremptory Challenges

§ 26.2.1.6, page 1154, n.308: On whether *Batson* applies to sexual orientation, compare *SmithKline Beecham Corp. v. Abbott Labs.*, 740 F.3d 471 (9th Cir. 2013) (*Batson* applies, in part because heightened scrutiny applies to sexual orientation after *Windsor*, 133 S. Ct. 2675 (2013), discussed in this Supplement at § 26.4.6, n.488) with *United States v. Blaylock*, 421 F.3d 758 (8th Cir. 2005) (expressing doubt *Batson* applies to sexual orientation). Cf. *Berthiaume v. Smith*, 875 F.3d 1354 (11th Cir. 2017) (jurors should have been asked about any bias based on sexual orientation in case involving allegations of excessive force, false arrest, and malicious prosecution against gay man).

In *Rivera v. Illinois*, 129 S. Ct. 1446, 1450 (2009), the Court reaffirmed its rule that peremptory challenges are not constitutionally required, and held that wrongfully denying a peremptory challenge does not require automatic reversal, which is required if the error is “structural.” In *Rivera*, despite alleged gender discrimination, the juror who was seated was not shown to be biased. See also *Davis v. Ayala*, 135 S. Ct. 2187 (2015) (any constitutional error in defense counsel’s absence from ex parte hearing regarding *Batson* challenge involving race discrimination was harmless) (Sotomayor, joined by Ginsburg, Breyer & Kagan, JJ., dissenting); *Foster v. Chatman*, 136 S. Ct. 1737 (2016) (compelling evidence indicates strikes in this case were motivated in substantial part by discriminatory intent, overruling state court decisions); id. at 1761-65 (Thomas, J., dissenting) (review of this 30-year old trial improper on numerous procedural grounds).

Classifications Involving Non-Permanent Resident Aliens

§ 26.2.1.8, page 1158, n.336: See also *LeClerc v. Webb*, 419 F.3d 405 (5th Cir. 2005) (5th Circuit holding rational review also applies to state laws regulating non-permanent lawful resident aliens; strict scrutiny applies only to state laws discriminating against permanent resident aliens, the specific facts in *Graham*; *Van Staden v. St. Martin*, 664 F.3d 56 (5th Cir. 2011) (constitutional under rational review to require practical nursing licensees to be permanent residents or citizens of the United States). But see *Dandamudi v. Tisch*, 686 F.3d 66 (2nd Cir. 2012) (similar law unconstitutional under strict scrutiny). Cf. *Korah v. Fink*, 748 F.3d 875 (9th Cir. 2014) (constitutional under rational review for state to deny Medicaid benefits to “nonimmigrant aliens” residing in Hawaii under Compact of Free Association with the United States where federal law gave states freedom to decide whether to cover them); *Din v. Kerry*, 718 F.3d 856 (9th Cir. 2013) (generic citation to Immigration and Naturalization Act containing numerous categories not adequate to deny visa application).

Use of Intermediate Scrutiny for Gender Discrimination

Classifications Involving Illegitimacy

§ 26.3.2, page 1182, end of section: See also *Flores-Villar v. United States*, 536 F.3d 990 (9th Cir. 2008), aff’d 131 S. Ct. 2312 (2011) (4-4 decision; Kagan, J., took no part in the consideration or decision) (affirming a section of the Immigration and Nationality Act imposing a 5-year residency requirement after age of 14 on U.S. citizen fathers, but only 1 year for citizen mothers, before they can transmit citizenship to child born out-of-wedlock abroad to non-U.S. citizen), abrogated by *Sessions v. Morales-Santana*, 137 S. Ct. 1678 (2017) (differential treatment violates intermediate review; not justified by stereotypical view that unwed citizen fathers care less about, or have less contract with, their children than unwed citizen mothers; harsher 5-year requirement applied to both unwed father and mother until Congress passes gender neutral provision).
Classifications Involving Sexual Orientation Under Heightened Scrutiny

§ 26.4.6, page 1192, n.466: By vote of 4-3, in “In re Marriage Cases” (six consolidated cases), 183 P.3d 384 (Cal. 2008), the California Supreme Court held on May 15, 2008 that a California statute barring same-sex marriage violated the Equal Protection Clause of the California Constitution. The Court said that sexual orientation was a suspect classification. It explained that immutability was not invariably required; rather, the most important factors were historically invidious and prejudicial treatment and a current recognition by society that the characteristic in question generally had no relationship to the ability to perform or contribute to society. Under strict scrutiny, the state interest in limiting marriage to opposite-sex couples was not compelling. Events subsequent to this case in California are discussed in this Supplement at § 26.4.6 n.480.

In another variation on the level of scrutiny to be applied in cases involving same-sex marriage, in Kerrigan v. Commissioner of Public Health, 957 A.2d 407 (Conn. 2008) and Varnum v. Brien, 763 N.W.2d 862 (Iowa 2009), both courts applied intermediate scrutiny in concluding that a ban on gay marriage was unconstitutional under their respective state Constitutions.

Recent Court Decisions and Legislative Action Regarding Same-Sex Marriage

§ 26.4.6, page 1196, n.480: By a vote of 7-0, in Lewis v. Harris, 188 N.J. 415, 908 A.2d 196 (2006), the New Jersey Supreme Court struck down New Jersey’s denial of equal benefits to same-sex couples, but left it to the legislature to provide equal rights either by civil unions or marriage. The Court based its decision on the irrationality of the ban under minimum rationality review. Three of the seven Justices would have required the legislature to grant same-sex couples full marriage rights.

In “In re Marriage Cases” (six consolidated cases), 183 P.3d 384 (Cal. 2008), a 4-3 California Supreme Court held on May 15, 2008 that a California statute barring same-sex marriage violated the Equal Protection Clause of the California Constitution. Dissenting Justices complained that the majority was engaged in judicial legislation, since California voters in 2000 had approved by 61% a legislative proposition that the state could only recognized marriage between a man and a woman. They wanted a stay of the decision until the voters in November 2008 could vote on a Referendum proposition, which would amend the California Constitution to restrict marriage to a man and a woman. Such a ballot proposition – Proposition 8 – was placed on the ballot, and on November 4, 2008, the voters in California approved such a restriction by a 52-48% vote. Proposition 8 was upheld as valid by the California Supreme Court in Strauss v. Horton, 46 Cal. 4th 364, 207 P.3d 48 (Cal. 2009). That decision, however, provided that any same-sex marriages held between May 15, 2008 and November 4, 2008 were nonetheless valid. Even after Strauss, California still permitted same-sex couples to enter into domestic partnerships, as it did before In re Marriage Cases and Strauss.

On August 4, 2010, a federal district judge in California held in Perry v. Schwarzenegger, 704 F. Supp. 2d 921 (N.D. Cal. 2010), that Proposition 8 was unconstitutional as a denial of Equal Protection and Due Process under the 14th Amendment of the United States Constitution. In so ruling, the district court judge held Proposition 8 was not rationally related to any legitimate interest, including the best interest of children, finding there was no rational support for the proposition that permitting same-sex marriage would harm children. Thus, the judge found Proposition 8 was based on nothing other than animus toward gays and lesbians, and thus unconstitutional under Romer v. Evans, discussed in the E-Treatise at § 26.4.6 nn.469-71. The Governor and Attorney General of California acquiesced in this ruling. As discussed in this Supplement at § 17.3.1.3A n.396, in Hollingsworth v. Perry, 133 S. Ct. 2652 (2013); id. at 2668 (Kennedy, J., joined by Thomas, Alito & Sotomayor, JJ., dissenting), a 5-4 Court held that proponents of California Proposition 8 did not have standing to appeal the district court’s order declaring Proposition 8 unconstitutional.

In 2009, Vermont, New Hampshire, and Maine all passed statutes approving of same-sex marriage in their states. Vermont had previously recognized civil unions. A referendum in Maine overturned that state’s recognition of same-sex marriage. On March 3, 2010, the District of Columbia’s statute recognizing same-sex marriage took effect. On July 24, 2011, same-sex marriage became legal in New York, at that time doubling the number of individuals living in states recognizing same-sex marriage. On February 13, 2012, the Governor of Washington state signed a same-sex marriage bill, but that law was subject of a referendum.
in November 2012. On March 1, 2012, the Governor of Maryland signed a same-sex marriage bill, but that law was also the subject of a November 2012 referendum. Maine conducted a new referendum to seek approval of same-sex marriage in November 2012. All three of these states supported same-sex marriage in the November 2012 referenda. During 2013, Delaware, Minnesota, and Rhode Island passed statutes permitting same-sex marriage. In 2014, Hawaii, Illinois, New Jersey, and Oregon, which all had recognized civil unions, legalized same-sex marriage, either by legislative action or court decree, as did New Mexico by state Supreme Court decree, and Pennsylvania by federal court action. After Windsor, discussed in this Supplement at § 26.4.6, n.488, same-sex marriage bans were challenged in every state, and a number of lower federal courts and state courts ruled bans unconstitutional, but most decisions were stayed pending appeal.

The Court extended the fundamental right to marry to same-sex couples in Obergefell v. Hodges, 135 S. Ct. 2584 (2015). Consistent with the analysis at § 27.1.1 n.9-11, the formalist and Holmesian Justices in dissent focused on the “history and traditions” language in Washington v. Glucksberg’s definition of fundamental rights, 521 U.S. at 721, to hold no fundamental right was implicated in Obergefell. Id. at 2611-12 (Roberts, C.J., joined by Scalia & Thomas, JJ., dissenting) (courts should not create constitutional rights, but leave “decisionmaking to the people”); id. at 2640 (Alito, J., joined by Scalia & Thomas, JJ., dissenting) (if right is not part of “history and tradition” courts should not create such rights). In contrast, the majority’s view was that the “generations that wrote and ratified the Bill of Rights and the Fourteenth Amendment did not presume to know the extent of liberty in all of its dimensions, and so they entrusted to future generations a charter protecting the right of all persons to enjoy liberty as we learn its meaning.” Id. at 2598. In this case, a “better informed understanding of how constitutional imperatives define liberty” sees the reasons behind the fundamental right to marry – “individual autonomy”; supporting a stable “two-person union”; “safeguard[ing] children and families”; and participating in a “keystone of our social order” – apply equally to same-sex couples as opposite-sex couples. Id. at 2599-2602. The Court restricted the “history and traditions” language of Glucksberg to its facts, id. at 2602, but could have noted Glucksberg also speaks of rights “fundamental to our concept of constitutionally ordered liberty,” 521 U.S. at 727, that “concept” definable by the majority’s “better informed understanding.”

The Full Faith and Credit issue regarding states recognizing these marriages is discussed in this Supplement at § 23.1.3, text following n.51. Laws around the world regarding gay marriage and civil unions are discussed in this Supplement at § 16.1, end of second full paragraph. See also Luttrell v. Cucco, 784 S.E.2d 707 (Va. 2016) (same-sex couples may be deemed to be cohabiting “in a relationship analogous to marriage” as that term is used in state alimony termination statutes); Summers v. Whittis, 2016 WL 7242483 (S.D. Ind. 2016) (county did not violate Title VII of the Civil Rights Act of 1964 which prevents, among other things, religious discrimination in employment, when it fired a Christian clerk who refused to process a same-sex couple’s marriage license; firing was based on refusal to perform assigned work; no religious accommodation required since duties were purely ministerial and no objective conflict with religious beliefs, which might exist if she were required perform ceremonies, attend ceremonies, or offer a blessing); State v. Arlene’s Flowers, Inc., 389 P.3d 543 (Wash. 2017) (flower shop owner violated Washington Law Against Discrimination (WLAD) by refusing to provide flowers for same-sex wedding; law is generally applicable neutral law triggering only rational basis review under Free Exercise Clause), vacated on other grounds, 2018 WL 3096308 (U.S. Sup. Ct. 2018) (consider whether law was applied with discriminatory intent, as in Masterpiece Cakeshop, discussed next); Craig v. Masterpiece Cakeshop, Inc., 370 P.3d 272 (Colo. App. 2015) (anti-discrimination law neutral and rational; cake maker has no Free Exercise right to refuse to make wedding cake for same-sex couple), cert. denied, 2016 WL 1645027 (Colo. Sup. Ct. 2016), rev’d, 138 S. Ct. 1719 (2018) (application of anti-discrimination law in this case was tainted by religious intolerance triggering strict scrutiny; issue dodged whether law constitutional in other cases); Smith v. Pavin, 505 S.W.3d 169 (Ark. 2016) (4-3 Arkansas Supreme Court holds state may refuse to list both names of same-sex married couple on a child’s birth certificate, despite the fact the state would list both names of opposite-sex married couple without inquiry into biological parentage, and only remove non-biological parent’s name if challenged), rev’d, 137 S. Ct. 2075 (2017) (per curiam opinion) (Thomas, J., joined by Alito & Gorsuch, JJ., dissenting); In re Neely, 390 P.3d 728 (Wyo. 2018) (judge who refuses to perform same-sex marriages violated Judicial Code of Conduct and may be removed from office), cert. denied, 138 S. Ct. 639 (2018). But see Ansley v. Warren, 2017 WL 2782622 (4th Cir. 2017) (absent specific injury plaintiffs have no standing to challenge North Carolina law allowing state magistrates to recuse themselves from performing same-sex marriages on religious grounds).
Bans on Adoption by Gays and Lesbians

§ 26.4.6, page 1197, n.486: But see In re Adoption of Doe, 2008 WL 5006172 (Fla. Cir. Ct. 2008) (not reported in So.2d) (district court struck down Florida’s ban on adoption by homosexuals, concluding that while evidence existing in 2004 was not enough to conclude the ban was irrational in Lofton, 358 F.3d 804 (11th Cir. 2004), evidence by 2008 did show ban irrational; unconstitutional under Florida Constitution); Campaign for Southern Equality v. Mississippi Dep’t of Human Servs., 2016 WL 1306202 (S.D. Miss. 2016) (Mississippi ban unconstitutional after Obergefell v. Hodges, 135 S. Ct. 2584 (2015), which required states to recognize same-sex marriages, discussed in this Supplement at § 26.4.6 n.480); Stewart v. Heineman, 892 N.W.2d 542 (Neb. 2017) (ban on gays or lesbian individuals or couples adopting children or becoming foster parents unconstitutional). Today, no state bans adoption purely on grounds of sexual orientation. Bans on adoption by unmarried couples, in states where they exist, are also likely to be held unconstitutional, when challenged. See, e.g., Arkansas Dept. of Human Services v. Cole, 380 S.W.3d 429 (Ark. 2011) (ban unconstitutional under Arkansas Constitution). To continue discrimination, some states (Alabama, Michigan, Mississippi, North Dakota, South Dakota, Texas, and Virginia, as of July 2017) have recently responded by passing statutes permitting private adoption agencies to refuse to place children into adoptive or foster homes on religious grounds, seemingly motivated by fundamentalist religious disapproval of same-sex individuals and couples. See Movement Advancement Project, Foster and Adoption Laws, www.lgbtmap.org/equality-maps/foster_and_adoption_laws. These laws will likely be challenged in court. Cf. Barber v. Bryant, 2017 860 F.3d 345 (5th Cir. 2017) (absent specific, concrete harm, plaintiff’s generalized grievance about possible applications of religious exemption statute not sufficient to grant standing).

Constitutionality of the Federal Defense of Marriage Act (DOMA)

§ 26.4.6, page 1198, n.488: In contrast to Wilson v. Ake, 354 F. Supp. 2d 1298 (M.D. Fla. 2005), see Gill v. Office of Personal Mgmt., 699 F. Supp. 2d. 374 (D. Mass. 2010), aff’d, Massachusetts v. United States Dep’t of Health and Human Serv., 682 F.3d 1 (1st. Cir. 2012) (DOMA invalid under Equal Protection component of 5th Amendment Due Process). On February 23, 2011, the Obama Administration announced that it would no longer oppose court challenges to DOMA, but would continue to enforce the statute. In United States v. Windsor, 133 S. Ct. 2675 (2013), a 5-4 Court held DOMA unconstitutional under due process. Because federal law usually adopts state rules on marriage, the Court ruled that DOMA’s refusal to recognize same-sex marriages in states where it is legal could only be the product of animus toward same-sex marriage, and, as in Romer v. Evans, discussed in the E-Treatise at § 26.4.6 nn.469-71, and Lawrence v. Texas, discussed at § 27.3.4.2 nn.259-60, such animus was an illegitimate interest. 133 S. Ct. at 2691-96. The United States had standing to appeal because the United States refused to pay plaintiffs the money to which they were entitled if their marriage were treated as valid. Regarding equitable discretion concerns that there exist sufficient adversariness, the majority noted attorneys for the Bipartisan Legal Advisory Group (BLAG) presented “a substantial argument for the constitutionality” of DOMA. Id. at 2685-88. The formalist and Holmesian Justices on the Court dissented, concluding it was legitimate for the government to adopt a preference for one man/one woman marriage to promote stability and uniformity in what marriages count as legally valid. Three of four dissenters also thought that because plaintiffs had won in the lower federal courts, and the Obama Administration had indicated it would no longer oppose such rulings, there was no standing. Id. at 2696 (Roberts, J., dissenting) (no standing; DOMA constitutional on the merits); id. at 2696-97 (Scalia, J., joined by Thomas, J., dissenting) (no standing; DOMA constitutional on the merits); id. at 2711-12 (Alito, J., dissenting) (BLAG has standing to support constitutionality of DOMA; DOMA constitutional).

After Windsor, but before Obergefell, there was an issue whether individuals legally married in one state, who moved to a state which did not recognize same-sex marriage, should be treated by the federal government as validly married (i.e., follow the state law where marriage “celebration” took place) or as unmarried (i.e., following the law where the parties are “domiciled”). In February 2014, Attorney General Eric Holder said same-sex marriages would be viewed as valid if the parties were married in a state lawfully (place of “celebration”). The issue became moot when the Court struck down all state bans on same-sex marriage in Obergefell v. Hodges, 135 S. Ct. 2584 (2015), discussed in this Supplement at § 26.4.6 n.480.
§ 26.4.6, page 1198, end of section: In addition to Obergefell v. Hodges, 135 S. Ct. 2584 (2015), discussed in this Supplement at § 26.4.6 n.480, the Obama Administration improved the legal landscape for gay and lesbian individuals. “Gay partners of federal workers will now receive long-term health insurance, access to day care and other benefits. Federal Housing Authority loans can no longer consider the sexual orientation of applicants. . . . Hospitals must allow gays to visit their ill partners. And federal child-care subsidies can be used by the children of same-sex domestic partners.” Michael D. Shear, Washington Post Staff Writer, Obama Uses Powers to Expand Federal Rights, Benefits for Gays and Lesbians (Tuesday, June 22, 2010) (available at www.washingtonpost.com). In addition, a congressional bill to repeal the military’s “don’t ask, don’t tell” policy was passed by Congress in December, 2010. That Act specified the policy would remain in place until the President, Secretary of Defense, and Chairman of the Joint Chiefs of Staff certified that repeal would not harm military readiness, followed by a 60-day waiting period. Certifications were sent on July 22, 2011; the policy ended on September 20, 2011. The military ended its service ban on transgendered persons on June 30, 2016, but the Trump Administration delayed implementation, and may be ultimately reversed. See also Hively v. Ivy Tech Community College of Indiana, 853 F.3d 339 (7th Cir. 2017) (8-3 en banc) (Title VII of the 1964 Civil Rights Act prohibits sexual orientation discrimination in employment as a form of sex discrimination); Zarda v. Altitude Express, Inc., 883 F.3d 100 (2d Cir. 2018) (10-3 en banc) (same); EEOC v. R.G. & G.R. Harris Funeral Homes, 884 F.3d 560 (6th Cir. 2018) (discrimination against transgendered individual violates Title VII as sex discrimination). But see Evans v. Georgia Regional Hospital, 850 F.3d 1248 (11th Cir. 2017) (sexual orientation discrimination not covered by Title VII).

The Trump Administration has moved to roll back some of the protections of the Obama Administration, such as revoking federal guidelines instructing public schools to allow transgender students to use the bathroom consistent with their gender identity. Some states have passed statutes permitting business to refuse to deal with individuals based on “sincerely held religious beliefs,” which typically would involve disapproval of same-sex individuals and couples, but also could involve discrimination against single mothers who had a child out-of-wedlock. See also Protect Fayetteville f/k/a Repeal 119 v. City of Fayetteville, Arkansas, 510 S.W.3d 258 (Ark. 2017) (striking down local law banning discrimination based on a person’s sexual orientation or gender identity as conflicting with 2015 state law which prohibits local communities from passing any measure “that prohibits discrimination on a basis not contained in state law.”). California has passed a statute banning most state-funded travel to states with negative gay-rights provisions (as of June 2017 – Alabama, Kansas, Kentucky, Mississippi, North Carolina, South Dakota, Tennessee, and Texas). On LGBTQ rights generally, see www.lambdalegal.org (website of Lambda Legal Defense and Education Fund).

Right to Travel Considerations

§ 26.5.1, page 1203, end of section: Consistent with the E-Treatise view that less than substantial burdens on right to travel trigger 2nd-order “reasonableness,” the Second Circuit uphold a discounted tolls program for Staten Island residents, using dormant commerce clause “reasonableness” balancing in Janes v. Triborough Bridge & Tunnel Auth., 774 F.3d 1052 (2d Cir. 2014), citing Northwest Airlines, Inc. v. County of Kent, 510 U.S. 355 (1994). But see Connelly v. Steel Valley Sch. Dist., 706 F.3d 209 (3rd Cir. 2013) (public school teacher paid more for in-state teaching experience “incidental” burden; minimum rationality review applied).

Population Variance and Other Forms of Gerrymandering and the Right to Vote

§ 26.5.3, page 1206, n.520: In Tennant v. Jefferson County Commission, 133 S. Ct. 3 (2013), the Court held, per curiam, that West Virginia had legitimate reasons for adopting its congressional redistricting plan, which included not splitting counties, not redistricting incumbents into the same districts, and not requiring dramatic shifts in which sets of voters are in which districts; given this, a population variation of less than 1% (.79%) was constitutional under Reynolds v. Sims. Regarding state redistricting plans, the Court held in Harris v. Arizona Indep. Redist. Comm’n, 136 S. Ct. 1301 (2016), that since population deviations between the largest and smallest districts was less than 10%, and thus redistricting was not presumptively invalid, challengers failed to show existing deviations were result of illegitimate considerations. But see Raleigh Wake Citizens Ass’n v. Wake County Bd. of Elections, 827 F.3d 333 (4th Cir. 2016) (even though population deviations were
under 10%, preponderance of the evidence showed improper considerations of partisan political advantage motivated state redistricting plan, rather than legitimate concerns with population equality, keeping municipalities intact, keeping precincts whole, and geographic compactness, using second-order reasonableness balancing, not minimum rational basis review deference). Cf. Evenwel v. Abbott, 136 S. Ct. 1120 (2016) (“based on constitutional history, this Court’s decisions, and longstanding practice,” states and localities can draw legislative districts based on total population, and are not required to use voter population); id. at 1142-49 (Alito, J., joined by Thomas, J. except as to Part III-B, concurring in the judgment) (the majority hints, but does not decide, that a state must use total population; thus, although no state currently does it, a state might use voter population in drawing districts).

In most states, state legislatures draft redistricting plans, typically subject to Governor’s veto power. In some states the state legislature has delegated the redistricting power to “independent state commissions” in order to minimize political gerrymandering. See generally Justin Levitt, All About Redistricting (http://redistricting.ils.edu/who.php). In Arizona, the voters imposed an “independent commission” through the state referendum process. In Arizona State Legislature v. Arizona Indep. Redistr. Comm’n, 135 S. Ct. 2652 (2015), a 5-4 Court upheld the commission, reasoning that the Elections Clause requirement such decisions be “prescribed in each State by the Legislature” meant general legislative processes, of which state referenda are a part. That reading was supported by practice, precedents, and policy arguments about not undermining many referendum-inspired laws. The dissent focused on the literal text of the Elections Clause which provides that the “Legislature” must make the required decision, and an imposed referendum process is not legislatively approved. Id. (Roberts, C.J., joined by Scalia, Thomas & Alito, J.J., dissenting). Cf. Hawke v. Smith, 253 U.S. 221, 229 (1920) (“ratification” different than “legislation”; thus, state legislature has exclusively authority to decide whether to ratify Constitutional amendments, not referenda or Governor veto).

As discussed at § 17.3.4.5 n.568, a 5-4 Court held in Vieth v. Jubelirer, 541 U.S. 267 (2004), that based on a lack of judicially manageable standards cases involving political gerrymandering are political questions. The Court was poised to revisit this issue in Whitford v. Gill, 218 F. Supp. 3d 837 (2016) (2-1 decision by 3-judge district court) (political gerrymandering by Republicans in Wisconsin unconstitutional under test focusing on extent of “cracking,” dividing one party’s supporters so they fall short of being the majority in multiple districts, and “packing,” concentrating one party’s backers in a few districts they win by overwhelming majorities), cert. granted, 137 S. Ct. 2289 (2017) (judgment stayed pending review), but dismissed the case on grounds that the parties lacked standing. Gill v. Whitford, 138 S. Ct. 1916 (2018).

Right to Vote and Access to the Ballot

§ 26.5.3, page 1206, text following n.521: In Crawford v. Marion County Election Bd., 128 S. Ct. 1610 (2008), the Court upheld an Indiana voter identification law that required citizens voting in person on election day, or casting a ballot in person with the clerk prior to election day, to present photo identification issued by the government. Voters who do not have proper identification could cast a provisional ballot, and then meet the statute’s requirement within 10 days following the election. Justice Stevens said that however slight the burden may appear, it must be justified by legitimate state interests sufficiently weighty to justify the limitations. This is consistent with Burdick v. Takashi, discussed in the E-Treatise at § 26.5.3 n.518, whereby substantial burdens on voting rights trigger strict scrutiny, but less burdens trigger second-order rational review, where the test is whether the regulation is “unreasonable” or “excessively burdensome.” Justice Stevens concluded the state’s interest in deterring and detecting voter fraud, modernizing voting procedures, and safeguarding voter confidence justified the photo requirement, and given the evidence presented by the challengers, it was not “excessively burdensome” on any class of voters. The opinion did imply, however, that new facts might call for a different balancing of benefits and burdens of voter ID laws in the future. 128 S. Ct. at 1617-23 (Stevens, J., joined by Roberts, C.J., and Kennedy, J. plurality opinion). See also ACLU of New Mexico v. Santillanes, 546 F.3d 1313 (10th Cir. 2008) (upholding Albuquerque, New Mexico photo ID law); Common Cause/Georgia v. Billups, 554 F.3d 1340 (11th Cir. 2009) (upholding Georgia photo ID law). In his concurrence in the case, Justice Scalia phrased the Burdick test as a “deferential ‘important regulatory interests’ standard.” 128 S. Ct. at 1624 (Scalia, J., joined by Thomas & Alito, JJ., concurring in the judgment). As with Timmons v. Twin Cities Area New Party, discussed in the E-Treatise at § 21.2.4.2 nn.81, 88-93, instead of phrasing the test as intermediate “important” interests, but then using the word
“deferential,” it would be better to phrase the test as second-order rational review determining whether the government’s “legitimate” interests are “excessively burdensome.” In dissent, Justice Souter, joined by Justice Ginsburg, concluded that the state interests failed to justify the limitations placed on the right to vote by travel costs and fees needed for acquiring a photo, particularly for those the poor or old. 128 S. Ct. at 1628-31, 1643 (Souter, J., joined by Ginsburg, J., dissenting). In a separate dissent, Justice Breyer similarly concluded that the statute was unconstitutional for imposing a disproportionate burden on eligible voters who lack a driver’s license or other statutorily valid forms of photo ID. Id. at 1643 (Breyer, J., dissenting).

Since 2010, a number of states have passed various versions of photo ID laws. Substantial empirical support now exists to conclude that there is virtually no problem of voter fraud caused by persons faking identification in voting, and real burdens exist for tens of thousands of individuals—many poor, some elderly, some college students—who don’t have a driver’s license or other regularized government issued photo ID. Even if the photo ID itself is provided by the state free, getting the required documentation, such as a birth certificate, will require some expenditure of money—certainly an amount more than $1.50 poll tax (in today’s money roughly $10) which was ruled unconstitutional in Harper v. Virginia State Bd. of Elections, 383 U.S. 663, 666-700 (1966). This issue is likely to come before the Court soon, as jurisdictions never covered by the preclearance requirement of the Voting Rights Act, such as Wisconsin, and jurisdictions whose voter ID laws are no longer blocked by a preclearance requirement after Shelby County, discussed in this Supplement at § 28.4 n.65, such as North Carolina and Texas, will have their voter ID laws tested in court. Such voter restrictions will be tested both under the Crawford analysis discussed here, and under § 2 of the Voting Rights Act, discussed in this Supplement at § 28.4 n.65, as creating an unlawful disparate impact on voting based on race. See generally Claire Foster Martin, Comment, Block the Vote: How a New Wave of State Election Laws is Rolling Unevenly Over Voters & The Dilemma of How to Prevent It, 43 CUMB. L. REV. 95 (2012-13); National Conference of State Legislatures, Voter Identification Requirements by State (2015) (www.ncsl.org/research/elections-and-campaigns/voter-id.aspx). See also Frank v. Walker, 768 F.3d 744 (7th Cir. 2014) (upholding Wisconsin voter ID law based on Crawford), rehearing en banc denied by an equally divided 5-3 vote, 773 F.3d 783 (2014) (Wood, C.J., joined by Posner, Rovner, Williams & Hamilton, JJ., dissenting) (Wisconsin voter ID law unconstitutional, applying Crawford’s “reasonableness balancing” approach given facts developed since Crawford), cert. denied, 135 S. Ct. 1551 (2015); Frank v. Walker, 819 F.3d 384 (7th Cir. 2016) (as-applied challenge by individual voter to Wisconsin voter ID law may proceed); Veasey v. Abbott, 830 F.3d 216 (5th Cir. 2016) (9-6 en banc decision) (Texas voter ID law discriminatory under § 2 of Voting Rights Act); North Carolina State Conference of the NAACP v. McCrory, 831 F.3d 204 (4th Cir. 2016) (preliminary injunction granted on North Carolina photo ID law under §2 of Voting Rights Act), cert. denied, 137 S. Ct. 1399 (2017) (Roberts, C.J., filed statement respecting denial of certiorari, emphasizing given the complex procedural posture of the case “it is important to recall our frequent admonition” that “denial of a writ of certiorari imports no expression of opinion on the merits of the case”); Lee v. Virginia State Board of Elections, 843 F.3d 592 (4th Cir. 2017) (Virginia photo ID law, which permits ID to be granted without birth certificate or other documentation, valid as less burdensome than ID requirement in Crawford); Greater Birmingham Ministries v. Merrill, 284 F. Supp. 3d 1253 (N.D. Ala. 2017) (Alabama voter ID law does not involve discrimination based on race, and thus does not violate § 2 of Voting Rights Act constitutional, in part based on ease of acquiring valid photo ID); Martin v. Kohls, 444 S.W.3d 844 (Ark. 2014) (Arkansas voter ID law invalid under Arkansas Constitution).

See generally Libertarian Party of New Hampshire v. Gardner, 843 F.3d 20 (1st Cir. 2016) (reducing time period to collect signatures to appear on statewide ballot from at least 3% of total voters in last general election from that election to August of next election (21 months) to January-August of election year (7 months) reasonable as related to measuring current interest and not excessively burdensome; requirement does not apply to any party which received at least 4% of the vote in last statewide election); Libertarian Party of Illinois v. Scholz, 872 F.3d 518 (2017) (Illinois law requiring political parties deemed not “established” to enter candidates for all offices to appear on ballot for any office (“full slate” requirement), a substantial burden on rights of political association and violates strict scrutiny); Valenti v. Lawson, 889 F.3d 427 (7th Cir. 2018) (as felons have limited constitutional voting rights, restriction on released sex offender from being able to vote at neighborhood school, but have to use other polling place or absentee ballot, rationally related to legitimate purpose of keeping convicted sex offenders away from schools); United States v. Alabama, 778 F.3d 926 (11th Cir. 2015) (Alabama statute requiring runoff election be held within 42 days
of primary violates Uniformed and Overseas Citizens Absentee Voting Act which requires ballot transmission 45 days before election); *Husted v. A. Philip Randolph Institute*, 138 S. Ct. 1833 (2018) (Ohio law which removes voter from voting rolls if they do not vote for four years after being sent return-card notice after failing to vote for two years does not violate National Voter Registration Act, since failure to vote not sole criteria for being removed) (Breyer, J., joined by Ginsburg, Sotomayor & Kagan, JJ., dissenting).

**Minimum Rationality Review Economic Due Process**

§ 27.1.2.1, page 1225, n.49: See also *St. Joseph Abbey v. Castille*, 712 F.3d 215 (5th Cir. 2013) (state law restricting the sale of intrastate caskets to state-licensed funeral directors and funeral parlors bears no rational relationship to any legitimate state interest; casket-making Benedictine abbey is allowed to compete in the sale of caskets market); *Heffner v. Murphy*, 745 F.3d 56 (3rd Cir. 2014) (prohibiting serving food and alcohol in “funeral establishments” rational as “health” measure); *Sensational Smiles, LLC v. Mullen*, 793 F.3d 281, 286-88 (2nd Cir. 2015) (split among some federal courts and state courts on whether “economic protectionism” can ever be a legitimate interest, outside dormant commerce clause review where it is clearly illegitimate).

**Recent Supreme Court Cases on Excessive Punitive Damages Awards**

§ 27.1.2.4, page 1235, end of section: Similar to the analysis suggested in the E-Treatise at § 27.1.2.4 text following n.90, the Court held in *Philip Morris USA, Inc. v. Williams*, 127 S. Ct. 1057, 1065 (2007), that states may only impose punitive damages for wrongful conduct against the party involved in the litigation, but that conduct against other parties can affect how reprehensible the defendant’s conduct is viewed. Justice Stevens dissented from the conclusion that only conduct against the plaintiff can form the basis for a punitive damage award. *Id.* at 1066 (Stevens, J., dissenting). Justice Ginsburg dissented, stating the Oregon Supreme Court had applied the proper standard. *Id.* at 1068 (Ginsburg, J., joined by Scalia & Thomas, JJ., dissenting). On remand, the Oregon Supreme Court adhered to its previous result and upheld the $79.5 million punitive damage award (ratio 97:1 of compensatory award). The Supreme Court granted certiorari, but dismissed writ as improvidently granted in *Philip Morris USA, Inc. v. Williams*, 129 S. Ct. 1436 (2009). See also *Robinson v. R.J. Reynolds Tobacco Co.*, Fla. Cir. Ct. No. 2008 CA 000098 (Jan. 27, 2015) ($23 billion punitive damage verdict ruled excessive; trial judge reduced punitive damage award to $16.9 million, matching compensatory award, but R.J. Reynolds opted for a new trial); *In re Actos (Pioglitazone) Products Liability Litigation*, 2014 WL 5461859 (Oct. 27, 2014) ($9 billion punitive damage award excessive; reduction to $36.8 million, ratio of 25:1 of compensatory award, rejected by Takeda Pharmaceutical Co. and Eli Lilly & Co.).

In *Exxon Shipping Co. v. Baker*, 128 S. Ct. 2605 (2008), the Court considered limits on punitive damages in a maritime case (the Exxon Valdez oil spill). In a 5-3 decision, Justice Alito not participating because of his ownership of Exxon stock, Justice Souter that a 1:1 ratio between compensatory and punitive damages is a fair upper limit in a maritime case where the tort action was worse than negligence but less than malicious. Thus, the Court ordered the $2.5 billion punitive damages award reduced to $507.5 million. *Id.* at 2611, 2626-34. In dissent, Justice Stevens said that Congress was better equipped than the Court to determine rules on punitive damages in maritime cases. *Id.* at 2634-35 (Stevens, J., concurring in part and dissenting in part). Justice Ginsburg agreed. *Id.* at 2639 (Ginsburg, J., concurring in part and dissenting in part). Justice Breyer indicated saw no reason to depart from the Ninth Circuit’s judgment, given their extensive review of the egregious nature of Exxon’s actions and reduction of the punitive damage award of $5 billion to $2.5 billion, *Id.* at 2640-41 (Breyer, J., concurring in part and dissenting in part). Because it involved statutory damages under maritime law, the majority opinion was joined by Justices Scalia and Thomas. Those Justices reiterated their view that they do not believe the 14th Amendment imposes any due process limit on punitive damages awards. *Id.* at 2634 (Scalia, J., joined by Thomas, J., concurring). Thus, applied to constitutional doctrine, Justice Souter’s reasoning commanded only the votes of Chief Justice Roberts and Justice Kennedy.

**Content of Bill of Rights Provisions When Applied to States Under the Due Process Clause**

§ 27.2.5.1, page 1244, end of section: The Court has stated that the Bill of Rights provisions apply equally against the states as they do against the federal government. Thus, in *Malloy v. Hogan*, 378 U.S. 1, 10-11 (1964) (citations omitted), the Court said it has “rejected the notion that the Fourteenth Amendment applies
to the states only a ‘watered-down, subjective version of the individual guarantees of the Bill of Rights.’”

On the other hand, two aspects of criminal defendants’ rights are applied differently against the states. First, in *Williams v. Florida*, 399 U.S. 78 (1970), the Court held that states need not use 12-person juries in criminal cases, even though they are required in federal criminal cases. Thus, for misdemeanors, like traffic violations in municipal courts, many states use 6-person juries. A few states provide for 6-person or 8-person juries in some or all noncapital felonies. See Alisa Smith & Michael J. Saks, *The Case for Overturning Williams v. Florida and the Six-Person Jury: History, Law, and Empirical Evidence*, 60 Fla. L. Rev. 441, 442-44 (2008) (Connecticut & Florida: 6-person jury in all noncapital felonies; Indiana: 6-person jury in felony cases below class A, B, and C; Massachusetts: 6-person jury in some district court cases; Utah: 8-person jury in felony cases; Arizona: 8-person jury in felony cases where sentence cannot be more than 30 years). Juries smaller than 6 persons not permitted in criminal cases. *Ballew v. Georgia*, 435 U.S. 223 (1978). Second, in *Johnson v. Louisiana*, 406 U.S. 356 (1972), and *Apodaca v. Oregon*, 406 U.S. 404 (1972), the Court held a unanimous jury verdict is not required in state courts, even though unanimity is required in federal courts; state court juries can convict on an 11-1, 10-2, or 9-3 vote. See Kate Riordan, *Ten Angry Men: Unanimous Jury Verdicts in Criminal Trials and Incorporation after McDonald*, 101 J. Crim. L. & Criminology 1403, 1404-06 (2011) (only Louisiana and Oregon had such general non-unanimous verdict provisions as of 2011). In Oklahoma, under Okla. Const. Art. 2, § 19, if imprisonment cannot be for more than 6 months, a 9-3 vote can convict. In Florida, until 2016, after unanimous conviction for a death penalty crime, the death penalty could be imposed by simple majority vote. See Chenyu Wang, *Rearguing Jury Unanimity: An Alternative*, 16 Lewis & Clark L. Rev. 389, 404-08 (2012). That changed in 2016, when a 5-2 Florida Supreme Court held in *Hurst v. State*, 202 So. 3d 40 (Fla. 2016), that unanimity is required before the death penalty can be imposed. Unanimity is constitutionally required for 6-person juries. *Burch v. Louisiana*, 441 U.S. 130 (1979).

**Fundamental Freedom from Bodily Restraint**

§ 27.2.5.2, page 1244, text following n.130: See also *Lopez-Valenzuela v. Arpaio*, 770 F.3d 772 (9th Cir. 2014) (strict scrutiny used to strike down Arizona provision prohibiting state courts from setting bail for detainees who are in the United States illegally).

**Lochner as Reflecting Both Due Process and Equal Protection Concerns**

**Right to Marry, Establish a Home, and Raise Children During the Modern Era**

§ 27.3.3.1.A, page 1258, n.181: In addition Equal Protection, discussed in this Supplement at § 26.4.6 n.466, the California Supreme Court held in “*In Re Marriage Cases,*” 183 P.3d 384 (Cal. 2008), by the same 4-3 vote, that the right to marry in California’s Constitution, Art I., §§ 1, 7, guarantees same-sex couples a constitutional right to marry. Under the United States Constitution, the Supreme Court extended the fundamental right to marry to same-sex couples in *Obergefell v. Hodges*, 135 S. Ct. 2584 (2015), discussed in this Supplement at § 26.4.6 n.480, holding invalid all state bans on same-sex marriage.

**Disclosure Privacy Cases**

§ 27.3.3.4, page 1273, text following n.236: As in *Whalen v. Roe*, the Court applied reasonableness review in *National Aeronautics and Space Administration v. Nelson*, 131 S. Ct. 746, 751 (2011). The Court held that NASA questions about an employee’s prior drug use and open-ended questions to references about whether they had a reason to question the employee’s honesty or trustworthiness did not violate such a right. *Id.* at 764 (Scalia, J., joined by Thomas, J., concurring in the judgment) (no informational privacy right exists). See also *Wyatt v. Fletcher*, 718 F.3d 496, 505-10 (5th Cir. 2013) (coach has qualified immunity as no clearly established constitutional right for a minor not to have her coach “out” her as possibly being a lesbian to the minor’s parents). But see *Sterling v. Borough of Minersville*, 232 F.3d 190, 196 (3rd Cir. 2000) (“sexual orientation [is] an intimate aspect of his personality entitled to privacy protection under *Whalen*”); *Powell v.
v. Schriner, 175 F.3d 107, 111 (2d Cir. 1999) (Constitution does “protect the right to maintain the confidentiality of one’s transsexualism.”). Cf. ACLU v. United States Dep’t of Justice, 750 F.3d 927 (D.C. Cir. 2014) (to protect privacy of persons acquitted or had charges dismissed, docket information on warrantless mobile telephone tracking exempted from disclosure under Freedom of Information Act).

Decisional Privacy Regarding Abortion Rights

§ 27.3.4.1, page 1278, text following n.253: As suggested in the E-Treatise, the Court clarified in 2016 that the Casey “undue burden” doctrine involves two steps: (1) whether the regulation is a “substantial obstacle” on abortion choice, rendering it an “undue burden,” and (2) even if not, is the regulation “reasonably related” to a “legitimate” interest, balancing both benefits and burdens, a second-order “reasonableness balancing” review higher than minimum rationality review. See Whole Woman’s Health v. Hellerstedt, 136 S. Ct. 2292, 2308-10 (2016); R. Randall Kelso, The Structure of Planned Parenthood v. Casey Abortion Rights Law: “Strict Scrutiny” for “Substantial Obstacles” on Abortion Choice and Otherwise “Reasonableness Balancing,” 34 QUINNIPIAC L. REV. 75 (2015).

Following the 2010 elections, a spate of new abortion restricting laws has increased abortion litigation. Many have been held unconstitutional. See, e.g., Planned Parenthood Arizona, Inc. v. Humble, 753 F.3d 905 (9th Cir. 2014) (preliminary injunction against Arizona statute requiring medications used to induce abortions be administered in compliance with FDA’s on-label regimen, when no evidence of medical justification provided, focusing on “independent review of evidence” language in Gonzales v. Carhart, discussed in this Supplement at § 27.3.4.1, n.254); Isaacson v. Horne, 716 F.3d 1213 (9th Cir. 2013) (Arizona law prohibiting abortions where the probable gestational age is at least 20 weeks unconstitutional, as viability is usually thought to occur between the 23rd and 24th weeks of pregnancy); MKB Management Corp. v. Stenehjem, 795 F.3d 768 (8th Cir. 2015) (North Dakota law prohibiting abortions following detection of a heartbeat, which would usually occur around 6-8 weeks, long before viability, unconstitutional); McCormack v. Hiedeman, 694 F.3d 1004 (9th Cir. 2012) (Idaho law prohibiting abortion in any place other than a hospital, doctor’s office, or clinic invalid as applied to woman who terminated pregnancy by taking abortion-inducing drug prescribed by physician lawfully purchased over Internet); Whole Woman’s Health v. Hellerstedt, 231 F. Supp. 3d 218 (W.D. Tex. 2017) (preliminary injunction granted against Texas law regulating disposal of fetal tissue applying before viability), proceedings stayed pending appeal, 2017 WL 5649477 (W.D. Tex. 2017).

A number of cases have involved requiring abortion clinics to have admitting privileges at nearby hospitals. See, e.g., Planned Parenthood of Wisconsin, Inc. v. Van Holten, 738 F.3d 786 (7th Cir. 2013) (preliminary injunction granted against Wisconsin law requiring clinic to have admitting privileges at a hospital within 30 miles of clinic); Planned Parenthood Southeast, Inc. v. Bentley, 951 F. Supp. 2d 1280 (M.D. Ala. 2013) (same, with respect to Alabama law); Jackson Women’s Health Organization v. Currier, 760 F.3d 448 (5th Cir. 2014) (same, with respect to Mississippi law which would close only abortion facility in state). But see Planned Parenthood of Greater Texas Surgical Health Services v. Abbott, 748 F.3d 583 (5th Cir. 2014) (Texas admitting privileges law not “undue burden”), result overturned in Whole Woman’s Health v. Hellerstedt, 136 S. Ct. 2292, 2310-14 (2016) (admitting privileges law and requiring clinics meet “surgical center” standards were “undue burdens”) (Alito, J., joined by Roberts, C.J., and Thomas, J., dissenting). Cases since Hellerstedt have applied its analysis to similar abortion restrictions. See Burns v. Cline, 387 P.3d 348 (Okla. 2016) (Oklahoma admitting privileges requirement unconstitutional). But see Planned Parenthood of Arkansas & Eastern Oklahoma v. Jegley, 864 F.3d 953 (8th Cir. 2017) (district court did not make adequate finding admitting privileges law would be undue burden for large fraction of women seeking abortions).

On other abortion regulations, see Stuart v. Camnitz, 774 F.3d 238 (4th Cir. 2014) (North Carolina law that abortion providers perform ultrasound and describe images to women violate providers’ free speech rights); The Evergreen Ass’n, Inc. v. City of New York, 740 F.3d 233 (2nd Cir. 2014) (required disclosure if pregnancy center provides no emergency contraceptive, abortion services, or pre-natal care violates free speech of center, required disclosure if center has no licensed medical provider on staff constitutional); National Institute of Family & Life Advocates v. Harris, 839 F.3d 823 (9th Cir. 2016) (law requiring pregnancy centers to post a notice if they do not provide or make referrals for abortion or birth control services, and law requiring clinics to post notice if they are not licensed, both constitutional); Hodes v. Nauser, Mds, P.A. v. Moser, 2012 WL 2105.
merits, a district court held the law unconstitutional.

requiring strict scrutiny review). While 24-hour waiting periods have typically be viewed as constitutional,
can obtain an abortion unconstitutional under Alaska Constitution's equal protection and privacy guarantees
on the Florida Constitution.

the Florida Supreme Court granted a stay of a Florida law which adopted a 24-hour waiting period, relying
and commerce clause problems, the court read the statute to not include conduct outside Missouri.

without following Missouri’s “parental consent or a judicial bypass” law. To minimize free speech problems,
Supreme Court upheld a Missouri law that prohibits aid and assistance to minors in obtaining an abortion

In

can obtain an abortion unconstitutional under Alaska Constitution’s equal protection and privacy guarantees
requiring strict scrutiny review). While 24-hour waiting periods have typically be viewed as constitutional,
the Florida Supreme Court granted a stay of a Florida law which adopted a 24-hour waiting period, relying
merits, a district court held the law unconstitutional. Gainesville Woman Care, LLC v. State of Florida, 2018

In Planned Parenthood of Kansas and Mid-Missouri, Inc. v. Nixon, 220 S.W.3d 372 (Mo. 2007), the Missouri
Supreme Court upheld a Missouri law that prohibits aid and assistance to minors in obtaining an abortion
without following Missouri’s “parental consent or a judicial bypass” law. To minimize free speech problems,
the Court read the statute to not prohibit provision of information or counseling to pregnant minors, but only
to regulate conduct, such as driving a minor across state lines to obtain an abortion. To deal with due process
and commerce clause problems, the court read the statute to not include conduct outside Missouri.
Ban on Partial-Birth Abortions

§ 27.3.4.1, page 1278, n.254: As predicted in the E-Treatise text, in Gonzales v. Carhart, 127 S. Ct. 1610 (2007), Justice Kennedy followed his dissent in Stenberg v. Carhart, discussed in the E-Treatise at § 27.3.4.1 nn.250-54, and concluded that a congressional ban on partial-birth abortions, at issue in Gonzales, like the Nebraska ban, at issue in Stenberg, was a less than undue burden on abortion rights, since it only limited one occasionally used means of abortion (so-called partial-birth abortions where part of the fetus is pulled intact through the cervix before being dismembered, rather than the standard abortion where the fetal embryo is vacuumed out or the fetus is dismembered into pieces in the uterus behind the cervix before being removed). 127 S. Ct. at 1629-35. Justice Kennedy did note that Gonzales involved a facial challenge to the statute, and thus his conclusion was based on the fact that for a “large fraction of relevant cases” of women seeking an abortion the statute was not a “substantial obstacle.” As indicated in the text of the E-Treatise at § 27.3.4.1 n.254, and stated in Justice Kennedy’s opinion in Gonzales, this leaves open the possibility of an as-applied challenge by a women to whom the ban would be a significant obstacle given her medical condition. 127 S. Ct. at 1638-39. Justice Kennedy also indicated that the Court should not “place dispositive weight on [legislative] findings [but] retains an independent constitutional duty to review factual findings.” Id. at 1610. As they had in Stenberg, discussed at § 27.3.4.1 n.250, Justices Stevens, Souter, Ginsburg, and Breyer viewed the partial-birth abortion ban as an undue burden on abortion rights, and thus unconstitutional, and the option of an as-applied challenge often unrealistic in practice. 127 S. Ct. at 1640-41 (Ginsburg, J., joined by Stevens, Souter & Breyer, JJ., dissenting). See also Richmond Medical Center for Women v. Herring, 527 F.3d 128 (4th Cir. 2008), rev’d 570 F.3d 165 (4th Cir. 2009) (6-5 en banc opinion) (Virginia ban did not require that doctor intend to perform a partial-birth abortion, and thus could apply if doctor intended to perform standard, lawful dilation and extraction abortion, but accidently pushed some part of the fetus’ body intact through the cervix; the panel concluded that the statute was unconstitutional as an unreasonable burden on abortion procedures, but the 6-5 en banc decision concluded the cases in which doctors face criminal liability are so limited it should not invalidate the law in every other circumstance.).

Right of Sexual Privacy

§ 27.3.4.2, page 1281, n.264: In Paschal v. State, 388 S.W.3d 429 (Ark. 2012), the Arkansas Supreme Court ruled that a state statute making it a crime for a teacher to have sex with a student under the age of 21 was unconstitutional as infringing on individual’s right under the Arkansas Constitution to private, consensual, noncommercial acts of sexual intimacy between adults. Other courts have held there is no such fundamental right under the United States Constitution; under rational basis review bans on teacher/student sex have been upheld. See State v. McKenzie-Adams, 915 A.2d 822 (Conn. 2007) (student 17 when the sexual relationship began); Flaskamp v. Dearborn Pub. Sch., 385 F.3d 935 (6th Cir. 2004) (student 18 when the sexual relationship began). See also Perez v. City of Roseville, 882 F.3d 843, 855-56 (9th Cir. 2018) (noting split with Fifth and Tenth Circuits, holding that termination of probationary police officer in part based on her extramarital affair with fellow officer violated her constitutional rights to privacy and intimate association).

The Regulation of Sale of Sex Toys

§ 27.3.4.2, page 1284, n.269: Reflecting the post-Lawrence trend that regulations in a few states which ban sale of “sex toys” are unconstitutional, the Fifth Circuit so concluded in Reliable Consultants, Inc v. Earle, 517 F.3d 738 (5th Cir. 2008), relying Lawrence v. Texas, 539 U.S. 558 (2003), discussed in the E-Treatise at § 27.3.4.2 nn.259-64. This ruling conflicts with a pre-Lawrence decision by a Texas state court of appeals, Webber v. Texas, 21 S.W.3d 726 (2000), cited in the E-Treatise text at § 27.3.4.2 n.269. Texas state officials are likely to follow the more recent Fifth Circuit opinion, although it cannot, strictly speaking, overrule the Texas state court opinion, as discussed in the E-Treatise at § 17.1.2.2 n.29. The Georgia obscene-device statute was struck down in This, That, and the Other Gift and Tobacco, Inc. v. Cobb County, 439 F.3d 1275 (11th Cir. 2006) (ban on广告izing of sexual devices in Act violates Central Hudson Gas, discussed in the E-Treatise at § 30.3.2 nn.228-30). Regarding such laws in Alabama, Mississippi, and Virginia, since Mississippi is within the Fifth Circuit, it is likely any attempt to enforce that law would be held unconstitutional. Given the Virginia Supreme Court’s opinion in Martin v. Zihrel, 607 S.E.2d 367 (Va. 2005), discussed in the E-Treatise at § 27.3.4.1 n.264, striking down Virginia’s fornication statute, it is likely
the Virginia Supreme Court would strike down its state’s law were it enforced. *But see Williams v. Morgan*, 478 F.3d 1316, 1322 (11th Cir. 2007) (regarding Alabama law, while *Lawrence* did ban public morality as legitimate basis to regulate private, non-commercial conduct, it did not ban public morality as legitimate to regulate public, commercial conduct); *Flanigan’s Enterprises Inc. of Georgia v. City of Sandy Springs, Georgia*, 831 F.3d 1342 (11th Cir. 2016) (local ordinance banning sale of sex toys constitutional based on earlier 11th Circuit precedent; panel “encourages” plaintiffs to petition the 11th Circuit for *en banc* review, which could overrule earlier Circuit precedent), *en banc* granted, 864 F.3d 1258 (11th Cir. 2017), *case dismissed as moot*, 868 F.3d 1248 (11th Cir. 2017) (7-5 *en banc*) (case mooted when legislation repealed; dissent would hold, citing cases, that plaintiff’s claim for nominal damages saves case from mootness).

**State Regulation of Assisted Suicide**

**What Counts as Intentional Deprivation Under Due Process Clause**

§ 27.4.1, page 1288, text following n.291: See *Kingsley v. Hendrickson*, 135 S. Ct. 2466 (2015) (intentional excessive force shown if force used was objectively unreasonable; do not have to show officers subjectively were aware they crossed the line). *Id.* at 2477 (Scalia, J., joined by Roberts, C.J., and Thomas, J., dissenting) (objective unreasonableness does not equal intent). *Id.* at 2479 (Alito, J., dissenting) (case should be dismissed as improvidently granted).

**Constitutional Right to Damages in Tort Litigation**

**Void for Vagueness Challenges Under the Due Process Clause**

§ 27.4.3.1, page 1299, n.342: For recent cases finding vagueness, see *Johnson v. United States*, 135 S. Ct. 2551 (2015) (increased sentence in Armed Career Criminal Act for acts presenting “serious potential risk of physical injury” vague) (Justices Kennedy, Thomas, & Alito dissented from this conclusion); *Welch v. United States*, 136 S. Ct. 1257 (2016) (*Johnson* is substantive, and thus has retroactive effect in cases on collateral review); *Sessions v. Dimaya*, 138 S. Ct. 1204 (2018) (term “crime of violence” defined as “substantial risk that physical force against the person or property of another may be used” in Immigration and Naturalization Act vague; under the Act a person convicted is virtually guaranteed to be deported) (Roberts, C.J., and Kennedy, Thomas & Alito, J.J., dissenting); *Abdullah v. County of St. Louis, Missouri*, 52 F. Supp. 3d 936 (E.D. Mo. 2014) (police policy requiring protestors to “keep moving” and not loiter vague). For recent cases finding provisions not vague, see *United States v. Gonzalez-Longoria*, 813 F.3d 225 (5th Cir. 2016) (definition of “crime of violence” in 18 U.S.C. § 16 vague), rev’d, 831 F.3d 670 (5th Cir. 2016) (11-4 *en banc*) (definition not vague); *Munn v. City of Ocean Springs, Mississippi*, 763 F.3d 437 (5th Cir. 2014) (ordinance making
unlawful “unreasonable noise” that “annoys” or “disturbs” a “reasonable person of normal sensitivities” not vague); Keating v. University of South Dakota, 569 Fed. App’x 469 (8th Cir. 2014) (“civility clause” in university employment policy not vague). Compare United States v. J.D.T., 762 F.3d 984 (9th Cir. 2014) (statute that criminalizes “sexual act with another person who has not attained the age of 12 years” not vague applied to perpetrator also under 12 years) with In re D.B., 950 N.E.2d 528 (Ohio 2011) (statute making sexual conduct unlawful with person under the age of 13 vague as applied to two parties both under 13, as both are offenders and victims under Act, encouraging arbitrary and discriminatory enforcement). See also Beckles v. United States, 137 S. Ct. 886 (2017) (because advisory only and do not “fix” permissible sentences, advisory U.S. Sentencing Guidelines are not subject to vagueness challenges under the Due Process Clause).

**Procedural Due Process in School Cases**

**Procedural Due Process for Jose Padilla**

§ 27.4.4.8, page 1315, text following n.401: As of October, 2006, Jose Padilla was awaiting trial on terrorist conspiracy charges. On August 16, 2007, Jose Padilla was convicted for aiding and assisting Al Qaeda in terrorist operations overseas, although no allegations about plotting a “dirty bomb” for detonation in the United States, for which Padilla was originally detained, was included in the indictment. Notwithstanding the reduced charges, on January 22, 2008, Mr. Padilla was sentenced to 17 years, 4 months in prison, which he is serving in a federal high-security facility. His suit against John C. Yoo, a former high-level Department of Justice official, was barred under qualified immunity because it was not well-settled in 2001-03 that his treatment while in Charleston, South Carolina brig was torture. Padilla v. Yoo, 678 F.3d 748 (9th Cir. 2012).

**Procedural Due Process for Detained Persons**

§ 27.4.4.8, page 1320, text preceding n.418: Consistent with the concern expressed in the E-Treatise regarding Congress removing habeas corpus for foreign nationals accused of being enemy combatants, a 5-4 Court held in Boumediene v. Bush, 128 S. Ct. 2229 (2008), that aliens designated as enemy combatants and detained at Guantanamo Bay have the right of habeas corpus. Congress had passed the Detainee Treatment Act of 2005 (DTA). Section 1005(e) of that Act provided that “no court, justice, or judge shall have jurisdiction to . . . consider . . . an application for . . . habeas corpus filed by or on behalf of an alien detained at Guantanamo.” The Act gave the D.C. Circuit Court of Appeals “exclusive” jurisdiction to review decisions of the Combatant Status Review Tribunals (CSRT). Those Tribunals had been established by Congress to determine if individuals detained at Guantanamo were “enemy combatants.” Under the Military Commissions Act of 2006 (MCA), the DTA removal of habeas jurisdiction was stated to apply to existing enemy combatants held at Guantanamo Bay, not merely those captured subsequent to the Act.

In Boumediene, the Court held that the congressional action taken in CSRT, DTA, and MCA was an inadequate substitute for habeas corpus. Justice Kennedy, writing for himself and Justices Stevens, Souter, Ginsburg, and Breyer, said the DTA was inadequate because it does not allow the detainee to present exculpatory evidence discovered after CSRT proceedings have concluded. Id. at 2272-74. Justice Kennedy left for future decision a number of questions, such as when and how other cases might be channeled to
district courts (almost inevitably the District Court for the District of Columbia) that will hear habeas petitions from detainees, the evidentiary and right-to-counsel issues that may arise, and the law that governs petitioners’ detention. Id. at 2275-77. Justice Kennedy emphasized the background purposes of the habeas corpus right, which is grounded in separation of powers principles and adherence to the rule of law. Id. at 2247, 2259, 2277. Reflecting his Holmesian deference-to-government decisionmaking style, Roberts criticized Justice Kennedy’s opinion for not being sufficiently deferential to decisions by Congress and military authorities. As for use of later discovered exculpatory evidence, Roberts noted that the D.C. Circuit had power to remand a case to the tribunal below to allow that body to consider such evidence in the first instance. Id. at 2279-80, 2289-90 (Roberts, C.J., joined by Scalia, Thomas & Alito, JJ., dissenting). Justice Scalia also dissented. He noted, “[H]ow to handle enemy prisoners in this war will ultimately lie with the branch that knows least about the national security concerns that the subject entails.” Id. at 2296 (Scalia, J., joined by Roberts, C.J., and Thomas & Alito, JJ., dissenting). Justice Scalia also noted that the writ of habeas corpus does not, and never has, run in favor of aliens who have never been within the “territorial jurisdiction” of the United States, see, e.g., Johnson v. Eisentrager, 339 U.S. 763 (1950), and Guantanamo Bay is not literally United States territory. Id. at 2296-2302. In reply, Justice Kennedy said the reference in Eisentrager to “territorial jurisdiction” was a reference to one of several factors used in a “functional” test to determine whether habeas corpus is available. The Court should consider the objective degree of control over the location, the practicability of having a trial there, and availability of alternatives. Under this test, de jure sovereignty is a factor that bears on applicability of constitutional guarantees, but questions of extraterritoriality turn on objective factors and practical concerns, not formalism – and the United States has practical control over Guantanamo Bay. Id. at 2253-62. Concurring, Justice Souter said the holding was no surprise as a 5-4 Court wrote in Rasul v. Bush, 542 U.S. 466, 481 (2004), that “[a]pplication of the habeas statute to persons detained at [Guantanamo] is consistent with the historical reach of the writ of habeas corpus.” Souter added, “After six years of sustained executive detentions in Guantanamo, subject to habeas jurisdiction but without any actual habeas scrutiny, today’s decision is no judicial victory, but an act of perseverance in trying to make habeas review, and the obligation of the courts to provide it, mean something.” Id. at 2277-79 (Souter, J., joined by Ginsburg & Breyer, JJ., concurring).

Since Boumedienne, cases involving enemy combatants have been tried. Most detainees have been ordered released – officially designated No Longer Enemy Combatant (NLEC) – due to lack of evidence even under flexible evidentiary standards adopted in Hamdan, discussed in the E-Treatise at § 27.4.4.8 nn.409-16, and Boumediene, discussed above. See, e.g., Al Ginco v. Obama, 634 F. Supp. 2d 109 (D.D.C. 2009). A few have been convicted under standards held adequate to satisfy due process, including the burden on the detainee to “rebut” the government’s prima facie evidence of guilt by a “preponderance” of the evidence; use of “reliable” hearsay testimony; and “reasonable” discovery procedures. See, e.g., Al-Bihani v. Obama, 590 F.3d 866 (D.C. Cir. 2010). Of the more than 700 prisoners detained at Guantanamo Bay, 242 remained in January 2009 when President Obama took office; 116 remained as of June 2015; 81 remained as of June 2016; and only 41 remained by January 2017. Many of these had been cleared for release, but remained due to difficulties repatriating them, including a Congressional requirement, eased in 2013, that the United States certify the prisoner will not engage in conduct against the United States if released. Estimates vary, but the Office of Director of National Intelligence estimated in July 2016 that of prisoners then released from Guantanamo Bay (693: 532 under Bush and 161 under Obama) 122 have returned to terrorist activities (113 of 532 released under Bush (21.2%) and 9 of 161 released under Obama (5.6%)) and 86 more are suspected of so returning (75 of 532 released under Bush (14.1%) and 11 of 161 released under Obama (6.8%)).

Of the 41 prisoners at Guantanamo Bay when President Trump took office, 40 remain. One prisoner was transferred to Saudi Arabia in May 2018 for continued incarceration there. Of the remaining 40 prisoners, while accounts by human rights groups and the New York Times slightly differ, a good approximation is that 4 are recommended for transfer; 10 are either in pre-trial or trial proceedings; 3 have been convicted; and 23 are “high-value detainees” (this concept also part of Bush and Obama Administration policy) who may be subjected to indefinite detainment without trial, a dubious practice the Court may eventually have to confront in terms of habeas and due process concerns. During 2013-14, more than 100 prisoners engaged in a hunger strike to protest their continued captivity. More than 40 of these prisoners had to be force-fed to keep them alive. See Aamer v. Obama, 742 F.3d 1023 (D.C. Cir. 2013) (force-feeding likely does not violate prisoner’s due process rights).
Delegation of Public Policymaking Authority to a Private Entity

§ 27.4.4.9, page 1322, text following n.423: Association of Am. Railroads v. United States Dep’t of Transp., 721 F.3d 666 (D.C. Cir. 2013) (unconstitutional to delegate to Amtrak development of standards with Federal Railroad Administration on Amtrak’s intercity passenger train performance), rev’d, 135 S. Ct. 1225 (2015) (Amtrak, while nominally private corporation, is a public entity when developing standards, as political branches control most of its stock and board of directors).

Congressional Power to Enforce the 14th Amendment

§ 28.3, page 1335, n.54: Despite Hibbs, a 5-4 Court held in Coleman v. Court of Appeals of Maryland, 132 S. Ct. 1327 (2012), that there was not a sufficient pattern of state discrimination under the self-care provision of the Family and Medical Leave Act, as opposed to the family leave provision in Hibbs, and thus Congress could not use its enforcement power to authorize money damage lawsuits against the states under the Act’s self-care provisions. Id. at 1339 (Ginsburg, J., joined by Breyer, J., and joined by Sotomayor & Kagan, JJ., except as to footnote 1, dissenting).

Congressional Power to Enforce the 15th Amendment

§ 28.4, page 1339, n.65: In Northwest Austin Mun. Util. Dist. No. One v. Holder, 129 S. Ct. 2504, 2513-17 (2009), a unanimous Court held that a utility district was a “political subdivision” eligible to file suit for bailing out of the preclearance requirements of § 5 of the Voting Rights Act of 1965. Justice Thomas said that since the Court could not simply order bailout, because the district had yet to prove its compliance with statutory criteria, the Court should consider if § 5 is unconstitutional. Id. at 2518 (Thomas, J., concurring in the judgment in part and dissenting in part).

In Shelby County, Alabama v. Holder, 133 S. Ct. 2612 (2013), the Court decided the question reserved in Northwest Austin and held that the preclearance requirement of § 5 was unconstitutional, because the formula used to determine which jurisdictions are covered was based on data 40 years old. Since the Act “imposes current burdens” it “must be justified by current needs,” not needs based on outdated figures. Id. at 2618-19. The ability of parties, or the federal government, to bring suit under § 2 of the Voting Rights Act against any state for voting regulations having a disparate impact on race was left unimpaired. Four Justices dissented. 133 S. Ct. at 2632-36 (Ginsburg, J., joined by Breyer, Sotomayor & Kagan, J., dissenting) (the success of § 5 in reducing voting discrimination based on race over the last 40-plus years supports finding the Act is still constitutional today). On continuing litigation under §2 of the Voting Rights Act, see Supplement, § 26.5.3, text following n.521, at page 2102.

Reasonableness Review in Non-Public Forums

Regulations of Conduct versus Regulations of Speech

§ 29.3.1, page 1360, end of section: See generally United States v. Hobgood, 868 F.3d 744 (8th Cir. 2017) (speech used to support conviction of the conduct of interstate stalking and extortion not entitled to free speech protection); Tagami v. City of Chicago, 875 F.3d 375 (7th Cir. 2017) (public nudity law which banned women, but not men, from walking around topless in public a regulation of conduct, not expression; in any case, constitutional under intermediate review of United States v. O’Brien or gender discrimination); Left Field Media LLC v City of Chicago, 822 F.3d 988 (7th Cir. 2016) (law banning all peddling on sidewalks immediately adjacent to Wrigley Field regulation of conduct, triggering only rational basis review); Pickup v. Brown, 740 F.3d 1208 (9th Cir. 2014) (California law banning state-licensed mental health providers from treating patients under 18 with “sexual orientation change efforts” regulation of conduct, not speech). But see King v. Governor of New Jersey, 767 F.3d 216 (3rd Cir. 2014) (ban valid as content-based regulation of licensed professional speech, although the King court’s view that licensed professional speech is entitled to only Central Hudson commercial speech intermediate review, not strict scrutiny, was rejected by the Supreme Court in National Institute of Family and Life Advocates v. Becerra, 138 S. Ct. 2361, 2371-76 (2018)).

The Fourth Circuit held in United States v. Hassen, 742 F.3d 104 (4th Cir. 2014), that an agreement to provide material support to terrorism was not protected speech, but “action”; making “evidentiary use” of speech to prove “conspiracy” permissible. In Holder v. Humanitarian Law Project, 130 S. Ct. 2705 (2010) (Breyer, J., joined by Ginsburg & Sotomayor, JJ., dissenting) (Kagan, J., not participating), the Supreme Court held that in any event by not criminalizing “pure political speech” the material support statute met strict scrutiny applicable to content-based regulations of speech. In Expressions Hair Design v. Schneiderman, 808 F.3d 118 (2nd Cir. 2015), rev’d 137 S Ct. 1144 (2017), and Rowell v. Pettijohn, 816 F.3d 73 (5th Cir. 2016), judgment vacated, 137 S. Ct. 1431 (2017), the Second and Fifth Circuit Courts of Appeals ruled that a ban on sellers imposing surcharges on credit-card transactions regulates conduct, not speech on prices. In Dana’s R. Supply v. Attorney General of Florida, 807 F.3d 1235 (11th Cir. 2015), the Eleventh Circuit held the anti-surcharge law regulates speech and was invalid under the Central Hudson test for commercial speech. The Supreme Court resolved this Circuit split in Expressions Hair Design v. Schneiderman, 137 S. Ct. 1144 (2017), holding that New York’s “no-surcharge” law, which permits retailers to give discounts for cash, but prevents surcharges for credit card purchases, regulate how merchants may communicate their prices, and thus triggers Central Hudson’s heightened review, not rational review applicable to economic regulations.

See also Brush & Nib Studio, LC v. City of Phoenix, 418 P.3d 426, 436-40 (Ariz. Ct. App. 2018) (anti-discrimination law applied to wedding invitation and other wedding design business is a regulation of conduct, not speech), and cases cited therein; Department of Fair Employment & Housing v. Cathy’s Creations, Inc., 2018 WL 747835 (Cal. Super. Ct., Bakerfield Dep’t, Feb. 5, 2018) (baking a wedding cake is artistic expression, and regulation unconstitutional under strict scrutiny). The Supreme Court dodged this issue in Craig v. Masterpiece Cakeshop, Inc., 138 S. Ct. 1719 (2018), by holding that application of the anti-discrimination law in this case was tainted by religious intolerance, and thus violated the Free Exercise Clause, rendering unnecessary consideration of the free speech issues possibly at issue in the case.

Supreme Court Resolves Circuit Court Split on Issue of License Plate Regulations

§ 29.3.2, page 1362, n.79 & § 30.1.1.4, page 1445, n.50: While the Sixth Circuit held in ACLU of Tennessee v. Bredesen, 441 F.3d 370 (6th Cir. 2006), that license plates are government speech, other circuit courts ruled differently. See, e.g., Arizona Life Coalition, Inc. v. Stanton, 515 F.3d 956 (9th Cir. 2008) (rejection of “Choose Life” plates viewpoint discrimination); ACLU of North Carolina v. Tata, 742 F.3d 563 (4th Cir. 2014) (if state permits pro-life plate, failure to create pro-choice plate viewpoint discrimination); Choose Life Illinois, Inc. v. White, 547 F.3d 853 (7th Cir. 2008) (rejection of “Choose Life” plate subject-matter regulation, since it excluded the “entire subject of abortion” from its program, triggering reasonableness review in non-public forum). In Walker v. Texas Div. Sons of Confederate Veterans, Inc., 135 S. Ct. 2239, 2245-46 (2015), a 5-4 Court adopted the Bredesen view that license plates are government speech, and so denying a plate featuring the Confederate battle flag was not subject to free speech review. This approach permits viewpoint discrimination in license plate regulation. See, e.g., ACLU of North Carolina v. Tennyson, 815 F.3d 183 (4th Cir. 2016) (state can allow motorists to promote anti-abortion agenda on license plates, while denying plates
to pro-choice views); *Vawter v. Abernathy*, 45 N.E.3d 1200 (Ind. 2016) (Indiana law granting Bureau of Motor Vehicles broad discretion to accept or reject vanity license plates cannot be challenged for vagueness given plates are government speech). A better approach in *Walker* would have been either to find the state had a compelling interest not to promote the Confederate battle flag (as a symbol of rebellion or racism), or to hold the ban was a subject-matter regulation related to decency, as in *Finley*, discussed in the E-Treatise at § 29.4.2 n.101-03, and uphold it under reasonableness review. The dissent in *Walker* properly observed that individual-chosen specialty plates are not “government speech,” but then applied viewpoint discrimination, strict scrutiny to hold the Texas ban invalid. 135 S. Ct. at 2254-55 (Alito, J., joined by Roberts, C.J., and Scalia & Kennedy, JJ., dissenting). *Cf. Mitchell v. Maryland Motor Vehicle Admin.*, 148 A.3d 319 (Md. 2016) (vanity license plates, where individual tailors numbers and letters to form a personalized message, still subject to nonpublic forum analysis after *Walker*). Regarding “compelled speech” by government messages on license plates, discussed in the E-Treatise at § 29.6.2.1 n.266, *see Cressman v. Thompson*, 719 F.3d 1139 (10th Cir. 2013) (motorist alleging Oklahoma statute prohibiting him from covering image on license plate of Native American shooting arrow toward the sky states a First Amendment claim).

**Government Funding and Speech**

§ 29.3.2, page 1363, n.84: In *Alliance for Open Society Intern., Inc. v. United States Agency for Intern. Develop.*, 651 F.3d 218 (2nd Cir. 2011), a 2-1 panel ruled that a federal requirement that a group receiving federal funds in the fight against AIDS have a policy “explicitly opposing prostitution” compels speech, and is not permissible under *Rust*, because here the speaker had to take a position, not just remain silent. In *Agency for Intern. Develop. v. Alliance for Open Society Intern., Inc.*, 133 S. Ct. 2321, 2328-32 (2013), the Court affirmed on the ground that since the speech restriction regarding prostitution was not related to the government program, which was about fighting HIV/AIDS, the *Rust* doctrine on strings in funding programs, did not apply. As viewpoint discrimination, the restriction was invalid. A dissent concluded the restriction was part of the government program involving choosing suitable agents to eradicate HIV/AIDS; *Rust* should apply. *Id.* at 2332 (Scalia, J., joined by Thomas, J., dissenting).

The Content-Based versus Content-Neutral Distinction

§ 29.4.1, page 1365, text following n.89: The Court muddied the waters a bit in 2015 in *Reed v. Town of Gilbert, Arizona*, 135 S. Ct. 2218 (2015). *Reed* involved an sign code regulation that provided different sizes and lengths of posting times for signs based upon whether the sign was an “Ideological Sign,” “Political Sign,” or “Temporary Directional Sign Relating to a Qualifying Event.” Under traditional doctrine, use of intermediate review would depend on the town proving they had “actual” or “plausible” content-neutral substantial government interests (e.g., visual clutter, aesthetics, etc.). Three concurring Justices noted the town provided “no reason at all” for the distinctions they drew among signs, and thus the regulation “does not pass strict scrutiny, intermediate scrutiny, or even the laugh test.” *Id.* at 2239 (Kagan, J., joined by Ginsburg & Breyer, JJ., concurring in the judgment). The majority adopted a rigid rule that if a regulation is content-based “on its face,” strict scrutiny is automatically triggered. *Id.* at 2228. This is inconsistent with traditional doctrine, such as in *Renton v. Playtime Theatres, Inc.*, discussed in the E-Treatise at § 29.4.1 n.135, where zoning regulations employing “on their face” content-based regulation of “adult motion picture theaters” trigger only intermediate review because the regulation is justified by “actual” or “plausible” secondary effects concern with increased crime around such theaters, particularly prostitution and drug trafficking, and the impact such theaters have on retail trade and maintaining property values. The breath of *Reed* was mitigated by a concurrence listing ways sign ordinances could avoid strict scrutiny. *Id.* at 2233 (Alito, J., joined by Kennedy & Sotomayor, JJ., concurring) (regulating size for all signs, lighted versus unlighted signs, signs on public versus private property, commercial versus residential property, total number of signs, signs advertising a one-time event). *See also Muslim American Society Freedom Foundation v. District of Columbia*, 846 F.3d 391 (D.C. Cir. 2017) (rule requiring event-related signs on city lampposts to be removed within 30 days after the event content neutral and constitutional under intermediate review). *See generally Norton v. City of Springfield*, 806 F.3d 411 (7th Cir. 2015) (ordinance against “spoken” requests for donations, while allowing “signs,” was content-neutral given greater coercive effect of spoken request, but after *Reed* is content-based and invalid under strict scrutiny); *Herson v. City of Richmond*, 631 F. App’x 472 (9th Cir. 2016) (Richmond’s sign height and size restrictions meet strict scrutiny).
Hopefully, Reed’s approach will not be extended widely. See, e.g., BBL, Inc. v. City of Angola, 809 F.3d 317, 326 n.1 (7th Cir. 2015) (applying Renton, not Reed, to regulation of “sexually explicit entertainment”); State v. Packingham, 777 S.E.2d 738 (N. Car. 2015) (Reed does not apply to ban on registered sex offender accessing commercial social network sites that permit minors to be members, like Facebook or Twitter; incidental burden on speech for content-neutral reasons triggers O’Brien intermediate review; not overbroad, since it permits e-mail and instant messaging when communicating with adults), rev’d, Packingham v. North Carolina, 137 S. Ct. 1730 (2017) (law substantially overbroad assuming intermediate review applied, as discussed at Supplement § 30.1.4.2 n.121; the Court failed to consider if the law’s facial content-based member criteria should trigger strict scrutiny under Reed, or was it content-neutral time, place, or manner regulation to protect minors, as might be found under O’Brien/Renton). See also March v. Mills, 2016 WL 2993168 (D. Me. 2016) (law prohibiting noise with intent to disrupt medical care, such as abortion, content-based under Reed; invalid); Free Speech Coalition, Inc. v. Attorney Gen. United States, 825 F.3d 149 (3rd Cir. 2016) (requiring adult film producers to keep identity & age of every performer to stop child pornography triggers strict scrutiny after Reed; invalid); Champion v. Kentucky, 2017 WL 636420 (Kentucky Sup. Ct. 2017) (law prohibiting solicitation from public streets/intersections content-based after Reed; invalid).

### Viewpoint Neutrality versus Viewpoint Discrimination

§ 29.4.2, page 1368, n.106: In Brooklyn Institute of Arts and Sciences v. City of New York, 64 F. Supp. 184 (E.D.N.Y. 1999), the court held that New York City’s withholding appropriated funds for a museum that displayed “The Holy Virgin Mary” by Chris Ofili, which was made in part by using elephant dung and deemed offensive to Catholics, was unconstitutional viewpoint discrimination, distinguishing Feeley. In Buxton v. Kurtinitis, 862 F.3d 423 (4th Cir. 2017), the court held that plaintiff had no Free Speech claim of retaliation that he was denied admission to a public college (Radiation Therapy Program at Community College of Baltimore County) because of his religious speech in a competitive interview for admission where religion is not supposed to be “brought up in the clinic.” Perhaps a better approach would have been to apply a Finley reasonableness standard and uphold the denial of admission on the ground.

In Christian Legal Society Chapter of the Univ. of California, Hastings College of Law v. Martinez, 130 S. Ct. 2971 (2010), the Court considered a state law school policy that student organizations must open membership to all students to obtain school recognition and financial assistance, as applied to Christian Legal Society (CLS) that wanted to exclude those engaging in “unrepentant homosexual conduct.” Since under the stipulated facts the policy was applied equally to all student organizations, the Court held it was viewpoint neutral. As discussed in the E-Treatise at § 29.6.2.2 nn.303-16, such school regulations trigger non-public-forum analysis; thus, the policy would be valid if “reasonable.” The Court held it was reasonable for many reasons, including ensuring that leadership, educational, and social opportunities are available to all students; the all-policy brings together persons of different backgrounds encouraging tolation, cooperation, and learning among students; and ensuring no student is forced to fund a group that would reject student as a member. 130 S. Ct. at 2987-95. The dissent noted when the school originally refused to register CLS it claimed CLS discriminated on basis of religion and sexual orientation, thus viewpoint discriminatory. Id. at 3010 (Alito, J., joined by Roberts, C.J., and Scalia & Thomas, JJ., dissenting). In response, the majority noted that factual stipulations are “formal concessions . . . withdrawing a fact from issue.” Id. at 2983.

In Matal v. Tam, 137 S. Ct. 1744, 1751 (2017) (Gorsuch, J., not participating), the Court held a provision of federal law prohibiting registration of trademarks that may “disparage . . . or bring . . . into contempt[i] or disrepute” any “persons, living or dead” was unconstitutional as applied to an Asian-American band, “The Slants.” Four Justices held provision failed even Central Hudson Gas’ intermediate review. Id. at 1757-64 (Alito, J., joined by Roberts, C.J., and Thomas & Breyer, JJ.) (“preventing speech expressing ideas that offend . . . strikes at the heart of the First Amendment” and is viewpoint discrimination, not a “substantial interest”; provision not “narrowly drawn” to drive out trademarks supporting invidious discrimination conduct). Four Justices held that because the regulation was an viewpoint discrimination it triggered strict scrutiny even if a regulation of commercial speech. Id. at 1767 (Kennedy, J., joined by Ginsburg, Sotomayor & Kagan, JJ.) (“speech burden based on audience reactions is simply government hostility . . . long prohibited [to justify] a First Amendment burden”). Cf. In re Brunetti, 877 F.3d 1330 (Fed. Cir. 2017) (federal trademark ban on “immoral” or “scandalous” matter unconstitutional based on Tam; mark in this case was “FUCT”).
Content-Based Regulations Triggering Strict Scrutiny

§ 29.4.3.2, page 1371, text following n.118: In United States v. Alvarez, 132 S. Ct. 2537 (2012), a 6-3 Court held that the Stolen Valor Act, which made it a misdemeanor for a person to “falsely represent” the person has “been awarded any decoration or medal authorized by Congress for the Armed Forces of the United States” violated the First Amendment. Four Justices viewed the Act as a content-based regulation, triggering strict scrutiny. Since the government could not show that the public’s perception of military awards was diluted by false claims, criminalizing the conduct was not directly related to advancing that interest. The Act was also not the least burdensome effective alternative, since it was not shown that counterspeech could not overcome the lie. Id. at 2249-50 (Kennedy, J., joined by Roberts, C.J., and Ginsburg & Sotomayor, JJ, announcing the judgment of the Court). Two Justices viewed the regulation as a content-neutral secondary effects concern with the public’s perception of military honors, and applied intermediate review. Even so, the regulation was substantially more burdensome than necessary, as it criminalized all lies, even in “family, social, or other private contexts, where lies will often cause little harm” to public perceptions. Id. at 2551-52, 2555 (Breyer, J., joined by Kagan, J., concurring in the judgment). The dissent seemed willing to create an exception to the First Amendment, like advocacy of illegal conduct or fighting words, and uphold the statute was also not the least burdensome effective alternative, since it was not shown that counterspeech could not

Content-Neutral Regulations Triggering Intermediate Review

§ 29.4.4.1, page 1373, text following n.126: In cases involving regulation of adult entertainment, some courts have adopted the flexible evidentiary approach used by Justice O’Connor in the Pap’s A.M. case. See, e.g., Entertainment Prod. Inc. v. Shelby County, Tennessee, 721 F.3d 729 (6th Cir. 2013) (rejecting argument that governments may only rely on evidence satisfying scientific validity standards of Daubert v. Merrell Dow Pharm., 509 U.S. 579 (1993); instead governments may rely on “land-use studies, prior judicial opinions, surveys of real-estate professionals (such as real-estate appraisers), anecdotal testimony, police reports, and other direct and circumstantial evidence”). But see Annex Books, Inc. v. City of Indianapolis, 740 F.3d 1136 (7th Cir. 2014) (city cannot force adult bookstores to close overnight, if other businesses can remain open, because justification of “fewer armed robberies” was not statistically significant); Foxxy Ladyz Adult World, Inc. v. Village of Dix, Illinois, 779 F.3d 706 (7th Cir. 2015) (village must present evidence that nude dancing has adverse secondary effects on “health, welfare, and safety of its citizens”); Reynolds v. Middleton, 779 F.3d 222 (4th Cir. 2015) (city must present evidence that ban on soliciting funds at intersections is not substantially too burdensome response to traffic safety and traffic flow concerns). The issue of how vigorous intermediate review is for content-neutral regulations is discussed in E-Treatise at § 29.4.4.3, pages 1384-85.

Content-Neutral Regulations: Proof Requirement

§ 29.4.4.2, page 1379, end of section: For cases involving Occupy Wall Street, see, e.g., Occupy Minneapolis v. County of Hennepin, 866 F. Supp. 2d 1062 (D. Minn. 2011) (valid to cut off electricity to protestors in public plazas and ban tents; city had content-neutral interest in controlling the aesthetic appearance of plazas); Occupy Fort Myers v. City of Fort Myers, 882 F. Supp. 2d 1320 (M.D. Fla. 2011) (ban on erection of temporary shelters at park by protestors constitutional; broad permit system to regulate protests and parades at park likely unconstitutional; preliminary injunction granted); Occupy Columbia v. Haley, 866 F. Supp. 2d 545 (D.S.C. 2011) (banning protestors after 6 p.m. from occupying park likely unconstitutional; preliminary injunction granted). Other noteworthy content-neutral regulation of speech cases include: McCullen v.
Coakley, 134 S. Ct. 2518 (2014) (Massachusetts law granting 35 foot buffer zone around abortion clinic substantially burdens more speech than necessary to prevent harassment or obstruction of entry; in response Massachusetts passed a law empowering police to issue dispersal orders, enforceable for 8 hours, against anyone blocking access to clinic, and prohibiting demonstrators from using “force, physical act, or threat of force” against anyone entering or leaving clinic); id. at 2541 (Scalia, J., joined by Kennedy & Thomas, JJ., concurring in the judgment) (law is content-based regulation of pro-life speech triggering strict scrutiny); Pine v. City of West Palm Beach, Florida, 762 F.3d 1262 (11th Cir. 2014) (banning amplified noise within 100 feet of health care clinics more narrowly tailored than McCullen, and constitutional); Johnson v. Minneapolis Park and Recreation Board, 729 F.3d 1094 (8th Cir. 2013) (attempt to restrict to festival booth Christian from distributing Bibles at Twin Cities Pride Festival substantially burdens more speech than necessary to prevent harassment/congestion); The Contributor v. City of Brentwood, Tennessee, 726 F.3d 861 (6th Cir. 2013) (homeless people can be prohibited from selling newspapers they produce to motorists at street corners to deal with traffic safety and flow; ample alternatives to sell the paper, including to pedestrians); Left Field Media LLC v. City of Chicago, 822 F.3d 988 (7th Cir. 2016) (Chicago ordinance that bans peddling outside Wrigley Field to curtail crowding content-neutral and valid under intermediate review). In 2017, the Fifth Circuit joined other Circuits in holding that a “First Amendment right to record the police does exist, subject only to reasonable time, place, and manner restrictions.” Turner v. Driver, 848 F.3d 678, 688 (5th Cir. 2017) (qualified immunity granted because such a right was not clearly established before this case; 1st, 7th, and 11th had already held such a right exists; 3rd, 4th, and 10th had held right not clearly established for purposes of qualified immunity analysis; no Circuit had refused to recognize such a right).

Public versus Nonpublic Forum Analysis

§ 29.5.2, page 1393, n.204: In United States v. Apel, 134 S. Ct. 1144 (2014), the Court held that a portion of a military base that contained a protest area and easement for a public road was still a military non-public forum. In American Freedom Defense Initiative v. Suburban Mobility Auth. for Regional Transp. (SMART), 698 F.3d 885 (6th Cir. 2012), the Sixth Circuit held a state transportation agency’s refusal to display an anti-jihad advertisement on city buses was reasonable and viewpoint-neutral based on its policy against political advertisements, applying nonpublic forum analysis as in Lehman v. City of Shaker Heights, 418 U.S. 298, 299-302 (1974); American Freedom Defense Initiative v. King County, 796 F.3d 1165 (9th Cir. 2015) (refusal to display “Faces of Global Terrorism” ad valid as “reasonable” under non-public forum analysis). But see New York Magazine v. Metropolitan Transit Auth., 136 F.3d 123, 129-30 (2nd Cir. 1998) (exterior of bus public forum because city accepted commercial and political ads). See also Minnesota Majority v. Mansky, 708 F.3d 1051 (8th Cir. 2013) (banning solicitation and display of political material within 100 feet of polling place “reasonable” and not facially unconstitutional; polling place is non-public forum); NAACP v. City of Philadelphia, 2016 WL 4435626 (3rd Cir. 2016) (access to advertising space at Philadelphia International Airport examined under nonpublic forum analysis, as the city had not opened up advertising for all kind of messages; Philadelphia’s justifications for the ban – maximize revenue and avoid controversy – were not reasonable given political and other controversial messages aired on public TVs throughout the terminal; in applying its analysis, the 3rd Circuit placed the burden on the city to show “reasonableness” – a third-order reasonableness balancing test – rather than placing the burden on the challenger, the typical second-order reasonableness balancing usually applied in such cases). See also American Freedom Defense Initiative v. Metropolitan Transit Authority, 109 F. Supp. 3d 626, 631-33 (S.D.N.Y. 2015), aff’d 815 F.3d 105 (2d Cir. 2016) (by deciding to reject all political ads, government changed forum from public to nonpublic forum, making it a content-based subject-matter regulation subject to reasonableness review, not strict scrutiny); Powell v. Noble, 36 F. Supp. 3d 818, 833-36 (S.D. Iowa 2014) (state fair grounds a non-public forum).

Recent Fee/Permit Approval Cases

§ 29.6.1.3, page 1401, n.241: See Epona, LLC v. County of Ventura, 876 F.3d 1214 (9th Cir. 2017) (county permit system for outdoor weddings gives “unbridled discretion” to officials by using factors like is wedding “obnoxious or harmful”; unconstitutional under Freeman); Moore v. Brown, 868 F.3d 398 (5th Cir. 2017) (rule requiring permit approval for structures larger than 4 feet square in a public park satisfies intermediate review of Thomas as applied to minister using a 4 foot wide and 6.5 feet high sketch board, based on concerns with safety and coordination of uses of park, including preserving line-of-sight views for all park patrons).
Vagueness Doctrine

§ 29.6.1.4, page 1402, n.246: But see Holder v. Humanitarian Law Project, 130 S. Ct. 2705 (2010) (statute not unconstitutionally vague). In FCC v. Fox Television Stations, Inc., 132 S. Ct. 2307 (2012), the Court held the FCC did not give television networks fair notice of a change in policy whereby a fleeting expletive or brief shot of nudity could be held indecent; thus new policy was unconstitutionally vague applied to charges filed. See also Kenny v. Wilson, 885 F.3d 280 (4th Cir. 2018) (students have standing to challenge as vague South Carolina Disturbing Schools Law which makes it, among other things, a criminal misdemeanor to “act in an obnoxious manner” in school or “disturb in any way” teachers or students).

Substantial Overbreadth Doctrine

§ 29.6.1.5, page 1405, n.257: In United States v. Stevens, 130 S. Ct. 1577 (2010), an 8-1 Court held that a federal statute was substantially overbroad that criminalized commercial creation, sale, or possession of any visual or auditory depiction of “conduct in which a living animal is intentionally maimed, mutilated, tortured, wounded, or killed, if such conduct is illegal under Federal law or the law of the State in which the creation, sale, or possession takes place,” except for depictions that have “serious religious, political, scientific, educational, journalistic, historical, or artistic value.” As written the statute would make illegal videos of hunting activities or livestock slaughtering practices banned by one state, although legal in other states. Id. at 1588-92. In dissent, Justice Alito concluded fears of overbroad application were unwarranted, and would remand on whether the statute was unconstitutional applied to activity involved in the case – commercialized dog fighting. Id. at 1592-97 (Alito, J., dissenting). See also United States v. Simpson, 741 F.3d 539 (5th Cir. 2014) (CAN-SPAM Act which makes it a federal crime to send bulk commercial e-mail messages with intent to deceive recipients about origin of messages neither unconstitutionally vague or overbroad); Scott v. Georgia, 788 S.E.2d 468 (Ga. 2016) (statute criminalizing internet contact with a person, with the knowledge or belief the person is a child younger than 16 and with specific intent to arouse or satisfy one’s own or other person’s sexual desire, not overbroad, particularly given “specific intent” requirement). But see State v. Hensel, 901 N.W.2d 166 (Minn. 2017) (disorderly conduct statute prohibiting “disturb[ing] an assembly or meeting, not unlawful in character” overbroad and not susceptible of being limited to fighting words, obscene speech, or true threats); Ex Parte Jones, 2018 WL 228888 (Tex. Ct. App. - Tyler 2018) (Texas revenge pornography statute overbroad as it applies not only to initial sender but anyone sharing picture even if they did not know picture was sent in violation of photographed individual’s reasonable expectation of privacy).

Coerced Membership in a Group

§ 29.6.2.1, page 1409, text following n.270: In Locke v. Karass, 129 S. Ct. 798 (2009), following Abood, 431 U.S. 209 (1977), Justice Breyer wrote that a local union can charge nonmembers a part of the affiliation fee that it pays to its national union or organization, including an appropriate share of litigation expenses that do not directly involve the local union, if: (1) the subject matter of the national litigation must bear an appropriate relation to collective bargaining, and (2) the arrangement must be reciprocal in that the litigation may ultimately inure to the benefit of the members of the local union. Id. at 801-02. A concurring opinion noted the Court had not decided whether the union or members had the burden to prove arrangement was reciprocal. Id. at 808 (Alito, J., joined by Roberts, C.J., and Scalia, J., concurring). Cf. Harris v. Quinn, 134 S. Ct. 2618 (2014) (personal assistants providing in-home health care paid by state, but otherwise not considered state employees, cannot be required to pay Abood/Karass-style fees); id. at 2644-45 (Kagan, J., joined by Ginsburg, Breyer & Sotomayor, JJ., dissenting) (these workers are public employees). In Knox v. Service Employees Int’l Union, Local 1000, 132 S. Ct. 2277 (2012), the Court held the First Amendment requires a union planning to collect a special assessment to fund political speech to give nonmembers proper notice, and assessment may not be exacted from nonmembers without their affirmative consent. Concurring in the judgment, two Justices noted that union must give members an opportunity to opt out, but did not require affirmative consent. Id. at 2296 (Sotomayor, J., joined by Ginsburg, J., concurring in the judgment). Two Justices dissented, concluding under Teachers v. Hudson, 475 U.S. 292, 310 (1986), a union can collect a fee from nonmembers as long as they provide “an adequate explanation of the basis for the fee, a reasonably prompt opportunity to challenge the amount of the fee before an impartial decisionmaker, and an escrow for the amount reasonably in dispute while such challenges are pending.” Id. at 2999-3000 (Breyer, J., joined
by Kagan, J., dissenting). *Cf. Ysura v. Pocatello Educ. Ass’n*, 555 U.S. 353 (2009) (use of a state’s payroll system to collect dues is subsidy of speech, and reasonable; strict scrutiny would be applied if viewpoint discriminatory); *Wisconsin Educ. Ass’n Council v. Walker*, 705 F.3d 640 (7th Cir. 2013) (state law prohibiting employers from deducting union dues from paychecks reasonable, not viewpoint discriminatory); *Fleck v. Wetch*, 868 F.3d 652 (8th Cir. 2017) (North Dakota integrated bar dues valid when attorneys can choose to deduct roughly 2.5% if they do not want to pay for non-germane activities). In *Friedrichs v. California Teachers Ass’n*, 2014 WL 10076847 (9th Cir. Nov. 18, 2014), aff’d by equally divided court, 136 S. Ct. 1083 (2016), the Court was poised to extend the “opt-in” requirement of *Knox*, applicable to special assessments, to regular union dues, thus overruling the “opt-out” aspect of *Abood*. With Justice Scalia’s death on February 13, 2016, the Court affirmed on a 4-4 tie vote. After Justice Gorsuch joined the Court, the Court did overrule *Abood in Janus v. American Federation of State, County, and Municipal Employees, Council 31*, 138 S. Ct. 2448 (2018) (Kagan, J., joined by Ginsburg, Breyer & Sotomayor, JJ., dissenting).

### The Government Speech Doctrine

§ 29.6.2.1, page 1411, n.279: See also *Delano Farms Co. v. California Table Grape Comm’n*, 19 P.3d 699 (Cal. 2018) (under *Johanss* California grape growers can be compelled to pay for state’s generic table grape ads). In *Pleasant Grove City, Utah v. Summum*, 129 S. Ct. 1125 (2009), a religious organization filed an action against various local officials, asserting that they had violated the Free Speech Clause by rejecting a proposed Seven Aphorisms monument for a local park that already contained a donated Ten Commandments monument. The Court held permanent monuments on public properly typically represent government speech and, although the Free Speech Clause restricts government regulation of private speech, it does not regulate government speech. Government speakers are still bound by other constitutional provisions, such as the Equal Protection Clause, which may limit partisan messages, *id*. at 1139 (Stevens, J., joined by Ginsburg, J., concurring), or on political grounds, *id*. at 1140 (Breyer, J., concurring). Establishment Clause aspects of this case are discussed in this Supplement at § 32.1.3.2.B, page 1594, n.202. See generally *Dawson v. City of Grand Haven*, 901 N.W.2d 904 (Mich. 2017) (city fixture displays on “Dewey Hill Monument” are government speech, not subject to free speech complaint by religious group wanting equal access for cross to be displayed during their nearby worship services, as had been done for many years).

### First Amendment Rights Where the Government is an Educator

§ 29.6.2.2, page 1420, n.316: Consistent with the analysis of *Bethel School District No. 403 v. Fraser, Hazelwood School District v. Kuhlmeier*, and other cases suggested in the E-Treatise text at pages 1419-20, in *Morse v. Frederick*, 127 S. Ct. 2618 (2007) (the “Bong Hits for Jesus” case), the Supreme Court indicated that reasonableness review would be applied to student speech made in the context of the non-public forum of a “school-sanctioned and school-supervised” event — here, students being led out of the classroom to watch the Olympic Torch Relay pass by their school — even though the speech could not be said to bear the “imprimatur” of the school, as in *Hazelwood*, or was “vulgar,” as in *Fraser*. In all three cases — *Morse, Hazelwood*, and *Fraser* — the speech occurred in a non-public forum — the school curriculum. In *Morse*, the school had a legitimate interest in regulating speech they could “reasonably regard” as promoting illegal drug use. 127 S. Ct. at 2625-29. A concurrence by Justices Kennedy and Alito, whose votes were critical to make up the majority, indicated that where the speech is not so connected to the school curriculum, and the speech is student generated, even if in conflict with the “educational mission” of the school, then the *Tinker* test would still apply. *Id*. at 2636-38 (Alito, J., joined by Kennedy, J., concurring). As discussed in the E-Treatise at § 29.6.2.2 n.286, *Tinker* reflects an intermediate standard of review.

A dissent by Justices Stevens, Souter, and Ginsburg viewed the schools’ reaction in this case as viewpoint discrimination. 127 S. Ct. at 2651 (Stevens, J., joined by Souter & Ginsburg, JJ., dissenting). In any event, the dissent believed the student speech should be analyzed under *Tinker*, presumably viewing the speech as student generated outside of the school-sponsored activity. *Id*. at 2647. Justice Breyer would have avoided all these issues by holding that, in any event, under *Harlow v. Fitzgerald*, discussed in the E-Treatise at § 20.1.4.2.B nn.84-87, the principal had qualified immunity for the disciplinary action taken. 127 S. Ct. at 2638 (Breyer, J., concurring in the judgment in part and dissenting in part). Justice Stevens agreed the principal had qualified immunity under *Harlow*. *Id*. at 2643 (Stevens, J., joined by Souter & Ginsburg, JJ., dissenting).
For other cases applying a Hazelwood standard of review, see Keefe v. Adams, 840 F.3d 523, 531 (8th Cir. 2016) (“college administrators and educators in a professional school [here, a nursing school] have discretion to require compliance with recognized standards of the profession, both on and off campus, ‘so long as their actions are reasonably related to legitimate pedagogical concerns [here, sexually offensive and threatening Facebook posts about other class members].’”); Pompeo v. Board of Regents of New Mexico, 852 F.3d 973, 984-86 (10th Cir. 2017) (professor cannot be sued for allegedly pressuring student to revise anti-gay language in a class assignment, as educators can restrict school-sponsored speech having inflammatory or offensive views if “reasonably related to a legitimate pedagogical concern” and not “sham pretext for an impermissible ulterior motive”; qualified immunity applies as any greater right the student had was not clearly established).

For regulation of student behavior off-campus, but which can have impacts on-campus, courts tend to use the Tinker test under one or two theories: (1) a sufficient “nexus” exists so the student’s off-campus speech is “tied closely enough to the school” or (2) it is “reasonably foreseeable” that off-campus speech would reach the school. See C.R. v. Eugene School District 4J, 835 F.3d 1142, 1149 (9th Cir. 2016) (under either approach the school can discipline student for close-to-the-school, but off-campus sexually harassing speech), citing Kowalski v. Berkeley County Schools, 652 F.3d 565 (4th Cir. 2011) (“nexus” test); S.J.W. v. Lee’s Summit R-7 School District, 696 F.3d 771 (8th Cir. 2012) (“reasonably foreseeable” test). A number of lower courts have applied this doctrine to the issue of schools disciplining students for inappropriate material posted outside of school on the Internet. In some cases, the postings involved statements made against the school administration. In other cases, the postings involved so-called “bullying” of other students. In most cases the school prevailed, satisfying the intermediate Tinker standard of advancing substantial content-neutral concerns with teaching students appropriate communication, preventing vulgar speech, or dealing with “bullying” of other students. See Doninger v. Niehoff, 642 F.3d 334 (2nd Cir. 2011) (school could properly discipline student who, after a concert at the high school was cancelled, posted on her blog a statement that the concert was cancelled “due to douchebags in the central office” and “if you want to write something to call her to piss her off more”); J.S. ex rel. Snyder v. Blue Mountain School Dist., 650 F.3d 915 (3rd Cir. 2011) (school could properly discipline student for creating fake internet profile of principal alleging he was a sex addict and pedophile); Layshock ex rel. Layshock v. Hermitage School Dist., 650 F.3d 205 (3rd Cir. 2011) (school could properly discipline student for creating fake internet profile of principal alleging drug and alcohol use and shoplifting); Kowalski v. Berkeley County Schools, 652 F.3d 565 (4th Cir. 2011) (school could properly discipline student for creating a false internet page called “S.A.S.H.”; student claimed the acronym was for “Students Against Sluts Herpes,” but the school concluded, based on posts by other students in response, that it really stood for “Students Against Shay’s Herpes,” which referred to another student at the school, and was an example of internet “bullying”); Bell v. Itawamba County Sch. Bd., 799 F.3d 379 (5th Cir. 2015) (12-4 en banc) (school could discipline student for posting threatening rap lyrics against two male teachers accused of sexually harassing minor students under Tinker). But see State v. Bishop, 787 S.E.2d 814 (N. Car. 2016) (law making it a crime to post on the Internet “private, personal, or sexual information pertaining to a minor” with the intent to “intimidate or torment” overbroad; invalid under strict scrutiny). See also Morrow v. Balaski, 719 F.3d 160 (3rd Cir. 2013) (absent creating or enhancing danger, schools have no constitutional duty under Deshaney v. Winnebago Cnty. Dep’t of Social Servs., 489 U.S. 189, 197 (1989), discussed in the E-Treatise at § 27.4.1 nn.295-96, to protect bullied students from the bully, and could tell two bullied students they could not ensure their safety and they should find another school). A number of states or local school districts do have statutes or regulations requiring schools to respond to bullying, including preemptive anti-bullying programs.

School districts have also continued to win a number of other student regulation cases under Tinker. See, e.g., Dariano v. Morgan Hill Unified Sch. Dist., 745 F.3d 354 (9th Cir. 2014) (California high school may require students not to wear shirts showing the American Flag during school-sanctioned Cinco de Mayo celebration), en banc rehearing denied, 767 F.3d 764 (9th Cir. 2014); Hardwick ex rel. Hardwick v. Heyward, 711 F.3d 426 (4th Cir. 2013) (South Carolina school district may prohibit students from wearing shirts displaying the Confederate Flag when wearing them would “materially and substantially disrupt the work and discipline of the school”); Taylor v. Roswell Indep. Sch. Dist., 713 F.3d 25 (10th Cir. 2013) (New Mexico school district’s decision to halt a group of religious students from distributing thousands of rubber fetus dolls at high schools constitutional under Tinker, and not a violation of student’s Free Exercise rights under the rational basis review standard of Employment Division v. Smith, 494 U.S. 872, 878-81 (1990)). But see Easton Area Sch.
Dist. v. B.H., 725 F.3d 293 (3rd Cir. 2013) (categorical ban on middle school students wearing bracelets saying “I [heart] boobies” as part of breast awareness campaign unconstitutional as not lewd under Fraser or disruptive under Tinker); K.A. ex rel. Ayers v. Pocono Mountain Sch. Dist., 710 F.3d 99 (3rd Cir. 2013) (Pennsylvania school district cannot ban a fifth grader from handing out invitations to a church Christmas party because the distribution would not “materially and substantially disrupt” activities at the school; the school routinely allowed students to hand out invitations during non-instructional time). See also Frudden v. Pilling, 742 F.3d 1199 (9th Cir. 2014) (school uniform policy mandating “Tomorrow’s Leaders” be displayed on shirt, but making exemption for uniforms of nationally recognized youth organization such as Boy Scouts or Girl Scouts on regular meeting days, content-based triggering strict scrutiny); Gerlich v. Leath, 2017 WL 2543363 (8th Cir. 2017) (Iowa State University’s restrictions on student group selling t-shirts with marijuana logo on back viewpoint discrimination; invalid under strict scrutiny).

First Amendment Rights versus Privacy at Funerals

§ 29.6.2.3, page 1423, n.326: For a good article on the issue of limitations on picketing to protect privacy at funerals, which suggests narrowly tailored regulations based on the content-neutral reason of protecting privacy of funeral mourners should survive the intermediate review applicable to content-neutral regulations in a public forum, see Njeri Mathis Rutledge, A Time to Mourn: Balancing the Right of Free Speech Against the Right of Privacy in Funeral Picketing, 67 MARYLAND L. REV. 295 (2008). See generally Phelps-Roper v. Koster, 713 F.3d 942 (8th Cir. 2013) (Missouri law prohibiting protests “within 300 feet of or about” a funeral from one hour before until one hour after constitutional under intermediate review); Phelps-Roper v. Ricketts, 867 F.3d 883 (8th Cir. 2017) (same for Nebraska law prohibiting picketing within 500 feet of funeral from one hour prior to two hours after). An 8-1 Court held in Snyder v. Phelps, 131 S. Ct. 1207, 1212 (2011) (Alito, J., dissenting), that where speech involved a matter of public concern (here Westboro Baptist Church protesting at military funerals against homosexuality), the First Amendment shielded protestors from state tort law for intentional infliction of emotional distress, intrusion upon seclusion, and civil conspiracy.

Regulation of Access to Polling Places and Ability to Gather News

§ 29.6.2.4, page 1426, text following n.343: In P.G. Publishing Co. v. Aichele, 705 F.3d 91 (3rd Cir. 2013), the Third Circuit upheld a Pennsylvania law requiring all persons, including journalists, to stay at least 10 feet from a polling place, reaffirming that the press have no special constitutional right of access to gather news. Cf. Beacon Journal Publishing Co., Inc. v. Blackwell, 389 F.3d 683 (6th Cir. 2004) (similar law likely unconstitutional citing free speech cases, not right of access cases).

Cases Involving True Threats

§ 30.1.1.2, page 1442, end of section: In United States v. Dillard, 835 F. Supp. 2d 1120 (D. Kan. 2011), a Kansas woman’s letter meant to dissuade a doctor from providing abortion services, which used threatening language such as “[w]e will not let this abomination continue,” raised a triable issue of fact of whether the statements constituted a true threat. The court noted that the doctor was receiving training to provide abortion services after her friend, Dr. George Tiller, a prominent provider of abortion services, had been killed by an anti-abortion activist. Id. at 1121. Another “true threat” case occurred in United States v. Turner, 720 F.3d 411 (2nd Cir. 2013). In this case, a blogger who was unhappy with the Seventh Circuit’s decision in NRA of America v. City of Chicago, 567 F.3d 856 (7th Cir. 2009) (Second Amendment not incorporated into the 14th Amendment), rev’d sub nom. McDonald v. Chicago, 130 S. Ct. 3020 (2010) (Second Amendment is incorporated and applicable against states), wrote the Seventh Circuit judges on the panel “deserve to be killed,” were “traitors” to the United States, and judges should “Obey the Constitution or die.” The court held that the individual could be convicted under 18 U.S.C. § 115(a)(1)(B), which makes it unlawful to threaten to “assault, kidnap, or murder, a United States official, a United States judge, a Federal law enforcement officer, or [other covered federal] official.” See also Brewington v. Indiana, 7 N.E.3d 946 (Ind. 2104) (“true threats” to district court judge, judge’s wife, and psychologist who was an expert witness in divorce case); Elonis v. United States, 730 F.3d 321 (3rd Cir. 2013) (defendant’s Facebook page about murdering estranged wife, massacring class of kindergartners, and slitting FBI agent’s throat would be viewed by “reasonable observer” as true threat, regardless of whether defendant’s “subject intent” was to cause fear), rev’d, 135 S.
Cases Involving Hate Speech

§ 30.1.1.4, page 1445, text following n.48: But see O’Brien v. Welty, 818 F.3d 920 (9th Cir. 2016), the Ninth Circuit upheld a California regulation allowing state universities to discipline students for action that “threatens or endangers the health or safety of any person . . . including . . . intimidation [or] harassment”; the law was neither vague nor overbroad and upheld under intermediate review; Yeasin v. Durham, 719 Fed. App’x 844 (10th Cir. 2018) (qualified immunity applies because no case clearly establishes a university student has a right to make disparaging/threatening tweets about an ex-girlfriend when a university official could reasonably believe his continuing presence at the school would interfere with her right to an education free from sexual harassment). See also United States v. Metcalf, 881 F.3d 641 (8th Cir. 2018) (Congressional hate crimes statute providing for up to 10 years in prison for willfully causing bodily injury based on “race, color, religion, or national origin” valid under Congress’ power to enforce 13th Amendment as “badge or incident” of slavery).

Indecent Material Involving Children

§ 30.1.4.1, page 1457, text following n.116: In Ashcroft v. The Free Speech Coalition, discussed in the E-Treatise at § 30.1.4.1 n.116, the Supreme Court distinguished child pornography actually involving the use of children from computer-generated images made to look like children. In 18 U.S.C. § 2252A (2003), Congress focused on prohibiting the expression of an intent to distribute or to acquire what was believed to be child pornography. In United States v. Williams, 128 S. Ct. 1830 (2008), the Court upheld the Act against an overbreadth and vagueness challenge. In an opinion by Justice Scalia, the Court held 7-2 that the law did not ban a substantial amount of protected expressive activity as it was limited to regulating the recommendation of a particular piece of purported child pornography with the intent of initiating a transfer. Nor was the Act vague since it requires a jury make findings on clear questions of fact, i.e., that the defendant hold the belief and make a statement that reflects a belief that the material is child pornography, or that he communicate in a manner intended to cause another so to believe. Id. at 1841-47. Justice Stevens concurred with Justice Breyer, saying that when the Act is interpreted to save constitutionality, it is limited to materials which are advertised, promoted, presented, distributed, or solicited with a lascivious purpose – that is, the intention of inciting sexual arousal. Id. at 1847-48 (Stevens, J., joined by Breyer, J., concurring). Justice Souter dissented with Justice Ginsburg. They found overbreadth because the Act could apply to criminalize a proposal with regard to an existing representation not involving an actual child, and that representation could not itself be made criminal under Free Speech Coalition. Id. at 1854-55 (Souter, J., joined by Ginsburg, J., dissenting). Cf. United States v. Anderson, 759 F.3d 891 (2014) (strict scrutiny satisfied in distributing child pornography case for digitally morphing actual face of minor onto body of adult having sex).

On the issue of regulating child pornography, see also People v. Kent, 970 N.E.2d 833 (N.Y. 2012) (accessing Web images of child pornography, which the user does not intentionally store, but which are automatically stored in the computer, does not constitute procurement of child pornography); People v. Gumila, 981 N.E.2d 507 (Ill. App. – 2nd Dist., 2012) (images automatically stored not enough to prove possession, but can be used as evidence that the defendant viewed the original images and intended that they be stored in the cache, from which he could view them at a later time); United States v. Fugit, 703 F.3d 248 (4th Cir. 2102) (defendant who induced preteen girls into sexually inappropriate telephone and online conversations violated federal law making it a crime to entice a minor to engage in “sexual activity” even though no proof he intended physical conduct); United States v. D’Amelio, 565 Fed. App’x 61 (2nd Cir. 2014) (conviction for attempted enticement of a minor upheld when defendant showed up to meet what he thought was 12-year-old girl); United States v. Howard, 766 F.3d 414 (5th Cir. 2014) (elaborate discussion of what “grooming” conduct, in absence of firm plans to meet, is sufficient to establish “substantial step” to prove enticement; sending sexually explicit photo to minor girl may be enough, but not to intermediary to give to girl).
On recovering damages in child pornography cases, see *Paroline v. United States*, 134 S. Ct. 1710 (2014) (restitution for child pornography possession under 18 U.S.C. § 2259 should be awarded in amount comporting with defendant’s role in “causal process” underlying victim’s losses, those losses possibly including $3 million in lost income and $500,000 in future treatment and counseling in dealing with knowledge filmed sexual assault has been, and continues to be, viewed by thousands of persons online; imposing all these losses on single or a few defendants actually convicted would likely be “excessive”; on the other hand, defendants should be “made aware, through the concrete mechanism of restitution, of the impact of child-pornography possession on victims,” and thus award should not be “trivial”); *id*. at 1730 (Roberts, C.J., joined by Scalia and Thomas, JJ., dissenting) (by being one of thousands who viewed the post, defendant did not literally “cause” the harm, so no damages should be awarded; Congress should redraft statute); *id*. at 1735 (Sotomayor, J., dissenting) (by viewing the post the defendant did “cause” the harm, and single or few convicted defendants should be jointly and severally liable for all of the victim’s losses); *United States v. Dunn*, 777 F.3d 1171, 1180-81 (10th Cir. 2015) (district court must use multifactored approach to determine defendant’s share of responsibility for posting child pornography picture to shared file). In some cases, a court may impose certain aspects of a defendant’s sentence, such as a term of imprisonment, while deferring a determination of the amount of restitution until entry of a later, amended judgment. In such a case, the Court made clear in *Manrique v. United States*, 137 S. Ct. 1266, 1270 (2017), that a defendant who wishes to appeal the restitution order must file a notice of appeal from that order. Notice of appeal from the original sentence is not adequate. *Id*. at 1274-75 (Ginsburg, J., joined by Sotomayor, J., dissenting).

### Indecent Material Involving Children in the Audience

§ 30.1.4.2, page 1458, n.121: In *FCC v. Fox Television Stations, Inc.*, 129 S. Ct. 1800 (2009), a 5-4 Court held that the FCC had appropriately exercised its power to change its interpretation of its authorizing statute to find that it had been authorized by Congress to punish the broadcasting of indecent expletives even when the offensive words were not repeated, as they had been in *FCC v. Pacifica Foundation*, 438 U.S. 726 (1978). Justice Scalia said that agency’s change in interpretation would not be given more searching review than an initial interpretation, and all that was required, procedurally, was that the new policy be permissible under the statute, that there are good reasons for it, and that the agency believes it to be better. It is not necessary that the reasons for the new policy be better than the reasons for the old one. *Id*. at 1810-12. Justice Thomas, concurring, suggested that the Court should reexamine the lesser standard of review given to content-based regulation of the broadcast media, as occurs in *Pacifica* and other similar cases, such as *Red Lion Broadcasting Co. v. FCC*, 395 U.S. 367 (1969). *Id*. at 1819-22 (Thomas, J., concurring). That *Red Lion/Pacifica* standard is discussed in the E-Treatise at § 30.3.1. In a 4-Justice dissent, Justice Breyer stated that the FCC’s reasons for changing its interpretation were not adequately explained and should be regarded as arbitrary and abuse of discretion. 129 S. Ct. at 1829 (Breyer, J., joined by Stevens, Souter & Ginsburg, JJ., dissenting). Justice Kennedy said he agreed an agency “must explain why ‘it now reject[s] the considerations that led it to adopt that initial policy.’” *Id*. at 1822 (Kennedy, J., concurring in part and concurring in the judgment) (quoting Justice Breyer’s dissent). He concluded the agency met this test. *Id*. at 1824.

In *Brown v. Entertainment Merchants Ass’n*, 131 S. Ct. 2729, 2732-33 (2011), the Court used a content-based, strict scrutiny analysis to hold unconstitutional a California law that banned the sale of “violent video games” to children. Two Justices concurred on narrower grounds, suggesting the Court should perhaps in some cases be more deferential to legislatures in regulating material directed at children. *Id*. at 2742-42 (Alito, J., joined by Roberts, C.J., concurring in the judgment). Two Justices dissented. *Id*. at 2751 (Thomas, J., dissenting) (“original understanding” of free speech does not include a right to speak to minors, or a right of minors to access speech, without going through the minor’s parents or guardians); *id*. at 2761 (Breyer, J., dissenting) (California has compelling government interests which can satisfy strict scrutiny).

In *Packingham v. North Carolina*, 137 S. Ct. 1730 (2017) (Gorsuch, J., not participating), the Supreme Court held that a ban on registered sex offenders accessing commercial social network sites that permit minors to be members, like Facebook or Twitter, failed even intermediate review, as it was substantially overbroad and did not leave party with “ample alternative channels of communication” given reality of social media use today; issue of whether it should have been viewed as content-based triggering strict scrutiny not considered; *id*. at 1738 (Alito, J., joined by Roberts, C.J., and Thomas, J., concurring in the judgment) (this regulation
is overbroad, but courts should be careful not to render states “largely powerless” to restrict dangerous sexual predator access to Internet). See also Doe v. Prosecutor, Marion County, Indiana, 705 F.3d 694 (7th Cir. 2013) (similar Indiana law unconstitutional under intermediate review, given other methods to combat unwarranted and inappropriate communication between minors and sex offenders); Ex Parte Lo, 424 S.W.2d 10 (Tex. Crim. App. 2013) (Texas Penal Code § 33.021(b)(1) which makes it illegal for adults to engage minor in sexually explicit online communications, as opposed to solicitation, content-based regulation, triggering strict scrutiny; not narrowly drawn to protect children from sexual abuse). But see United States v. Gnirke, 775 F.3d 1155 (9th Cir. 2015) (supervised release condition for child molester from possessing any sexual explicit material overbroad; limited to any material involving children or material deemed inappropriate by probation officer constitutional); People v. Minnis, 67 N.E.3d 272 (Ill. 2016) (requirement that convicted sex offenders disclose their internet identities, such as e-mail, instant messaging, and chat room identities, as well any blog or other website, like Facebook or Twitter, to which they have posted content during the previous registration period (no more than 4 times a year, in this case once a year), constitutional under intermediate review); United States v. Browne, 2016 WL 4473226 (3rd Cir. 2016) (Facebook chats can be used to convict child pornographer defendant if properly authenticated, the court holding “it is no less proper to consider a wide range of evidence for the authentication of social media records than it is for more traditional documentary evidence.”).

Community versus National Standards for Indecency or Obscenity on the Internet

§ 30.1.4.2, page 1461, n.136: Similar to Justice O’Connor’s concerns, the Ninth Circuit held in United States v. Kilbride, 584 F.3d 1240 (2009), that national, rather than local, community standards should be applied to whether images transmitted over the Internet were obscene.

Defamation and Other Such Actions Over the Internet

§ 30.2.1.1.A, page 1468, n.158: See also Obsidian Finance Group, LLC v. Cox, 740 F.3d 1284 (9th Cir. 2014) (liability for defamatory post blog involving matter of public concern must meet same New York Times v. Sullivan standard applied to institutionalized press). Cf. Klayman v. Zuckerberg, 753 F.3d 1354 (D.C. Cir. 2014) (lawsuit against Facebook for failing promptly to take down page calling for violence against Jews blocked by Communications Decency Act, which provides “interactive computer service” is not a “publisher” of information); Weigand v. NLRB, 783 F.3d 889 (D.C. Cir. 2015) (union not liable for members’ remarks on union’s Facebook page); Fields v. Twitter, Inc., 200 F. Supp. 3d 964 (N.D. Cal. 2016) (Communications Decency Act blocks suit by family members of deceased United States government contractors shot by Jordanian police officer, responsibility for which was claimed by a terrorist organization (ISIS), against Twitter for allowing ISIS to use its social network to spread propaganda, raise funds, and recruit fighters); Fields v. Twitter, Inc., 881 F.3d 739 (9th Cir. 2018) (Anti-Terrorism Act requires individuals show direct relationship, not mere foreseeability, between injuries by terrorists and Twitter’s conduct to establish “proximate causation” to prove element of “material support”; use by ISIS of Twitter does not establish such a direct relationship).

Recent Decisions Regarding First Amendment Rights of Prisoners

§ 30.2.1.2, page 1472, text following n.174: For these cases, see A3.

Recent Decisions Related to Garcetti and Pickering

§ 30.2.2.1, page 1479, text following n.195: Lower courts have split over whether determining if a government’s employee’s speech is made as a citizen on a matter of public concern is a question of law, or a mixed question of law and fact for the trier of fact, which would sometimes be a jury. The Fifth, Sixth, Tenth, and D.C. Circuits have held the determination is a question of law; the Third, Seventh, Eighth, and Ninth Circuits have held the determination is a mixed question of law and fact. See, e.g., Posey v. Lake Pend Oreille Sch. Dist. No. 84, 546 F.3d 1121 (9th Cir. 2008); Mayhew v. Town of Smyrna, 856 F.3d 456 (6th Cir. 2017).
After *Garcetti*, there are two separate issues to consider to trigger *Pickering* balancing – (1) is the speech as an employee under *Garcetti*, and thus unprotected, and (2) if instead, as a citizen, is it on a matter of public concern. See e.g., *Lane v. Franks*, 134 S. Ct. 2369 (2014) (director’s sworn testimony at former program employee’s corruption trial on a matter of public concern, even though information learned in the course of employment); *Garcia v. Hartford Police Dep’t*, 706 F.3d 120 (2nd Cir. 2013) (police sergeant speaking on matter of public concern when he complained of other officers’ bias against Hispanics); *Jackler v. Byrne*, 658 F.3d 225 (2nd Cir. 2011) (probationary police officer’s refusal to follow the alleged orders of his supervisors to withdraw his report confirming that another officer used excessive force was on a matter of public concern); *Westmoreland v. Sutherland*, 662 F.3d 714 (6th Cir. 2011) (city firefighter and former dive rescue team leader was speaking on a matter of public concern when he said a drowned 7-year-old boy could have been saved if the city had not disbanded the dive team for budgetary reasons); *Matthews v. City of New York*, 779 F.3d 167 (2nd Cir. 2015) (police officer complaint about arrest quota policy a matter of public concern); *Town of Ball, Louisiana v. Howell*, 827 F.3d 515 (5th Cir. 2016) (officer’s speech while assisting FBI in fraud allegation against his department not within scope of his duties). But see *Quint v. University of Oregon*, 2013 WL 363782 (D. Oregon 2013) (instructor who asked students if they wanted him to shoot them for violating no-talking rule did not show speech related to matter of public concern about tolerance of other’s rules); *Nubiak v. City of Chicago*, 810 F.3d 476 (7th Cir. 2016) (female officer complaint about sexual harassment against her employee related under *Garcetti* and not a matter of public concern); *Kennedy v. Bremerton School District*, 869 F.3d 813 (9th Cir. 2017) (high school coach who prayed at midfield following football game could be fired as his speech was in the course of employment as defined in *Garcetti*); *Crouch v. Town of Moncks Corner*, 848 F.3d 576 (4th Cir. 2017) (qualified immunity applies since not clearly established that speech was on a matter of public concern, and not work-related, when officers encouraged a citizen to file a complaint of excessive force against their lieutenant); *Lincoln v. Maketa*, 880 F.3d 533 (10th Cir. 2018) (qualified immunity applies since not clearly established that speech was as a citizen on a matter of public concern, and not work-related, when lieutenant did not follow Sheriff’s orders to give a false account to the media stating that an Internal Affairs document had been stolen by political opponents). See also *Montero v. City of Yonkers*, 890 F.3d 386 (2nd Cir. 2018) (whether union official who criticizes employer is acting within the scope of employment should be considered case-by-case, rejecting the Sixth, Seventh, and Ninth’s Circuits which have held union official always speaks as a private citizen, not part of job responsibilities).

For cases applying *Pickering*, see *Grazier v. City of Greenville, Mississippi*, 775 F.3d 731 (5th Cir. 2015) (police officer’s interest in not showing up to mayor’s public Facebook page comments critical of police chief for not allowing police officers to use police cars to attend slain police officer’s funeral outweighed by city’s interest in good working relationships, justifying firing); *Lalowski v. City of Des Plaines*, 789 F.3d 784 (2015) (police officer’s off-duty verbal altercation with anti-abortion protestor, as well as history of using profane language against citizens, justified firing); *Rock v. Levinski*, 2015 WL 3939020 (June 29, 2015) (school district interest in good working relationships justified firing principal who spoke at public meeting in opposition to plan to close her school); *Grutzmacher v. Howard County*, 851 F.3d 332 (4th Cir. 2017) (workplace disruption caused by inflammatory Facebook posts, such as suggesting “beating a liberal to death with another liberal” to get liberals outlawed like guns justified firing of fire department battalion chief). But see *Liverman v. City of Petersburg*, 844 F.3d 400 (4th Cir. 2016) (department policy that prohibits essentially all speech critical of the department overbroad under *Pickering*); *Moonin v. Tice*, 868 F.3d 853 (9th Cir. 2017) (policy against officers discussing canine program with “anyone” outside the department unreasonably overbroad). *Cf. Oyama v. University of Hawai‘i*, 813 F.3d 850 (9th Cir. 2015) (student teacher candidate who was denied application to become a student teacher in part because of his views that online child predation should be legal, and real life child predation should be legal after puberty begins, involves aspects of *Tinker*, *Pickering*, and professional “certification”; court adopts hybrid test of whether government action was “related directly to defined and established professional standards, was narrowly tailored to serve the [school’s] mission of evaluating [candidate’s] suitability for teaching, and reflected reasonable professional judgment”).

In *Borough of Duryea, Pa. v. Guarnieri*, 131 S. Ct. 2488 (2011), the Court held that *Garcetti* applies when the complaint is brought for retaliation against a government employee in violation of a First Amendment right to petition for a redress of grievances, as well as a free speech case. Concurring, Justices Scalia and Thomas expressed doubt that filing a lawsuit was a “petition” within the original meaning of the Petition
F.3d 300, 307-08 (2nd Cir. 2018) (public access television stations are public forums, as electronic equivalent
judgment in part and dissenting in part). In 

Cases Involving Regulation of Political Speech of Government Employees

§ 30.2.2.2, page 1483, n.205: See also Heffernan v. City of Paterson, 136 S. Ct. 1412 (2016) (employee protected under Elrod when demoted because government official mistakenly believed that he had supported particular candidate for mayor, even though he actually did not) (Thomas, J., joined by Alito, J., dissenting). Regarding First Amendment rights of legislators, in Nevada Comm’n on Ethics v. Carrigan, 131 S. Ct. 2343 (2011), the Court considered Nevada’s Ethics in Government Law, which requires public officials to recuse themselves from voting on, or advocating the passage or failure of, a matter in which in the judgment of a reasonable person the individual would have a personal conflict of interest. Based on long-standing congressional and state practice adopting such general applicable conflict-of-interest recusal rules, the Court held that a legislator has no First Amendment interest because “the legislative power thus committed is not personal to the legislator but belongs to the people; the legislator has no personal right to it.” Id. at 2350. See also Loftus v. Bobzien, 848 F.3d 278 (4th Cir. 2017) (since no constitutional right to elective office, county attorney who lost her job based on conflict of interest with new position on city council has no claim).

Regulations of Public Broadcasting Stations

§ 30.3.1, page 1487, text following n.216: See generally Minority Television Project, Inc. v. FCC, 736 F.3d 1192 (9th Cir. 2013) (9-2 en banc decision) (prohibition against for-profit and political advertisements on public broadcasting stations constitutional under intermediate standard of review of Red Lion and League of Women Voters; regulation was narrowly tailored to further government’s substantial interest in maintaining educational mission and nature of public broadcasting); Halleck v. Manhattan Community Access Corp., 882 F.3d 300, 307-08 (2nd Cir. 2018) (public access television stations are public forums, as electronic equivalent of public squares, recognizing disagreement with D.C. Circuit, and split among federal district courts).

Commercial Speech Regulations

§ 30.3.2, page 1496, text following n.250: Consistent with the recent trend of courts being vigorous in applying the Central Hudson test, in IMS Health, Inc. v. Ayotte, 490 F. Supp. 2d 163 (D.N.H. 2007), a district court in New Hampshire struck down New Hampshire’s first-in-the-nation law banning the sale of data on individual doctors’ drug prescribing habits. The court indicated that the law was not narrowly tailored, in that the state could deal with its concern that distributing such information might be improperly used by pharmaceutical companies in their marketing plans to individual doctors, by regulating improper inducements to influence prescribing practices, issuing best practice guidelines, or requiring continuing education about prescriptions. The Supreme Court similarly ruled in Sorrell v. IMS Health, Inc., 131 S. Ct. 2653, 2658-59 (2011), that a Vermont law that restricted the sale, disclosure, and use of pharmacy records that reveal the prescribing practices of doctors was unconstitutional. Id. at 2673 (Breyer, J., joined by Ginsburg & Kagan, JJ., dissenting). See generally Heffner v. Murphy, 745 F.3d 56 (3rd Cir. 2014) (ban on use of trade names by funeral parlors unconstitutional); R.J. Reynolds Tobacco Co. v. Food & Drug Administration, 696 F.3d 1205 (D.C. Cir. 2012) (FDA rule requiring tobacco companies to place graphic images on all packages of cigarettes sold in the United States unconstitutional, since FDA did not provide substantial evidence that graphic warnings would directly advance interest in reducing smoking rates to a material degree); Dwyer v. Cappell, 762 F.3d 275 (3rd Cir. 2014) (requiring attorneys to post entire opinion to use judicial compliment on website overbroad); Missouri Broadcasters Ass’n. v. Lacy, 846 F.3d 295 (8th Cir. 2017) (complaint that alcohol ad restrictions violate Central Hudson survive motion to dismiss, particularly banning alcohol manufactures from advertizing rebate coupons, but exempting those who make products other than beer or wine).
In *Expressions Hair Design v. Schneiderman*, 137 S. Ct. 1144 (2017), the Court held that New York’s “no-surcharge” law, which permits retailers to give discounts for cash purchases, but prevents surcharges for credit card purchases, regulate how merchants may communicate their prices, and thus triggers *Central Hudson*’s heightened review, rather than minimum rational review applicable to economic regulations. In *Italian Colors Restaurant v. Becerra*, 878 F.3d 1165 (9th Cir. 2018), the 9th Circuit held that such a law did violate the *Central Hudson* standard of review. See also *IMDb.com, Inc. v. Becerra*, 2018 WL 979031 (N.D. Cal. 2018) (California law forbidding IMDb from publishing truthful age-related information upon request by a subscriber, which was passed in part to make age discrimination more difficult, regulates non-commercial speech and is unconstitutional under strict scrutiny, particularly as state explored no less-speech-restrictive alternatives); *King v. Governor of New Jersey*, 767 F.3d 216, 222-35 (3rd Cir. 2014) (“commercial speech” analysis applies to “professional speech” regulations of persons subject to licensing, acknowledging a lower court split on the issue). In *National Institute of Family and Life Advocates v. Becerra*, 138 S. Ct. 2361, 2371-76 (2018), the Supreme Court rejected this exception for “professional speech” and strongly indicated such content-based regulations should trigger strict scrutiny. Even under the trend of more vigorous review, in *Coyote Pub. Co. v. Miller*, 598 F.3d 592 (9th Cir. 2010), the Ninth Circuit upheld a Nevada statute that prohibited brothels from advertising in “any public theater, on the public streets, or on any public highway” in the 11 rural counties in Nevada where licensed prostitution is legal. The laws were narrowly drawn and left open ample alternative channels of communication; they only banned advertising in public places where “it would reach residents who do not seek it out,” but permitted “other forms of advertising likely to reach those already interested in patronizing the brothels.” In *Educational Media Co. at Virginia Tech, Inc. v. Swecker*, 602 F.3d 583 (4th Cir. 2014), the Fourth Circuit upheld restricting ads for alcohol in college newspapers as being directly related to the interest in restricting alcohol use by persons under 21.

In 1985, the Court decided in *Zauderer v. Office of Disciplinary Counsel of the Supreme Court of Ohio*, 471 U.S. 626, 651 (1985), that where the government could show the “possibility of consumer confusion or deception,” even though the commercial speech could not be proven to be unlawful, false, or misleading, then the government could require “uncontroversial, factual disclosures” as long as they were “reasonably related to the state’s interest in preventing deception of consumers” because “disclosure requirements trench much more narrowly on an advertiser’s interest than do flat prohibitions on speech.” As phrased in *Zauderer*, this was an example of a 2nd-order reasonableness balancing test, as the Court phrased the issue as whether the challenger could show the government regulation was unreasonable. Id. at 651 n.15. In contrast, in *National Institute of Family and Life Advocates v. Becerra*, 138 S. Ct. 2361, 2377 (2018) (California law requiring unlicensed “pregnancy-related clinics” to post notices they are not state-licensed, at clinics and on ads, including billboards, in English, Spanish, or any other language spoken by a named percentage of residents in the county (for Los Angeles County, 13 languages), unreasonably overbroad), the Court placed the burden on the government not only to show the “possibility of consumer confusion” to trigger the *Zauderer* test, but also to prove the disclosure requirement was “reasonable.” Cf. *CTIA-The Wireless Association v. City of Berkeley, Cal.*, 854 F.3d 1105, 1117-19 (9th Cir. 2017) (also placing burden on the government). In *Becerra*, the Court did not acknowledge this shift in burden from *Zauderer*, and cited *Ibanez v. Florida Dep’t of Business and Professional Regulation, Bd. of Accountancy*, 512 U.S. 136, 146 (1994), which cited *Edenfield v. Fane*, 507 U.S. 761, 770 (1993), to support placing the burden on the government, despite both *Ibanez* and *Edenfield* being cases of regular *Central Hudson* review where the burden is properly on the government, as is usual under intermediate review. However, this *Becerra* 3rd-order reasonableness balancing test may well reflect the Court’s current view, and is consistent with the Court’s increased commercial speech scrutiny. But see *POM Wonderful, LLC v. FTC*, 777 F.3d 478 (D.C. Cir. 2015) (adopting deferential “substantial evidence” standard, not de novo, review to review FTC’s finding statements are “deceptive and misleading”).

On when to apply *Zauderer*, see *American Meat Institute v. United States Dept. of Agriculture*, 760 F.3d 18 (D.C. Cir. 2104) (required disclosure of purely factual information, like regulations to prevent consumer deception, trigger rational review test of *Zauderer*); *CTIA-The Wireless Association v. City of Berkeley, Cal.*, 854 F.3d 1105, 1116-17 (9th Cir. 2017) (joining First, Second, Sixth Circuits in holding that *Zauderer* applies to any factual disclosure requirement, including information or health, safety, and welfare concerns, and is not limited to preventing consumer deception, as held in *R.J. Reynolds*, cited on page 2125). The Court did not address this issue directly in *National Institute of Family and Life Advocates v. Becerra*, 138 S. Ct. 2361, 2372 (2018), but did phrase the *Zauderer* test in terms of any “factual, noncontroversial information.”
§ 30.4.2.1, page 1500, n.269: The principle that the government may not enhance the relative voice of one candidate was reinforced in Davis v. Federal Election Commission, 128 S. Ct. 2759 (2008). In Davis, a 5-4 Court invalidated the “Millionaire’s Amendment” to campaign financing laws. That amendment allowed a candidate to receive treble the normal limit on individual contributions and unlimited party expenditures if the other candidate is regarded as self-financing because of spending more than $350,000 of personal funds. The Court noted preventing corruption or the appearance of corruption have been viewed as compelling interests; however, those interests are not advanced by the Amendment. A government goal to reduce the advantage that wealthy individuals possess in campaigns for government office is not a compelling interest; indeed, it may not even be legitimate. Id. at 2773-75. The dissent said the Amendment does not deprive the millionaire of any speech. The state has an interest in combating the appearance of corruption stemming from public awareness of the opportunities for abuse inherent in a regime of large individual financial contributions. Id. at 2777-82 (Stevens, J., joined by Souter, Ginsburg & Breyer, JJ., dissenting). The Court similarly ruled in Arizona Free Enterprise Club’s Freedom Club PAC v. Bennett, 131 S. Ct. 2806, 2812-13 (2011), that an Arizona law was unconstitutional which provided that candidates for state office who accept public financing can receive additional money – roughly one dollar for every dollar spent by privately financed candidate – once a set spending limit is reached. The Court held there was no compelling interest to equalize electoral funding. Four Justices dissented. Id. at 2829 (Kagan, J., joined by Ginsburg, Breyer & Sotomayor, JJ., dissenting) (compelling interest to counteract corruption of large campaign contributions).

Corporate Speech and Expenditures on Political Campaigns

§ 30.4.2.1, page 1509, n.302: In Citizens United v. Federal Election Commission, 130 S. Ct. 876 (2010), the Court considered 2 U.S.C. § 441b, which barred corporations from making independent expenditures that referred to a clearly identified candidate within 30 days of a primary election or within 60 days of a general election for public office. The Government advanced three interests which it said were compelling: distorting effects of large aggregations of wealth, an anti-corruption interest, and a shareholder protection interest. For a 5-4 Court, Justice Kennedy rejected each one. He said that First Amendment protection does not depend on the speaker’s financial ability to engage in public discourse; independent expenditures do not give rise to corruption or the appearance of corruption; and if the shareholder protection theory were adopted it would give the Government power to restrict the political speech of media corporations, and there is little evidence of abuse that cannot be protected by shareholders through the processes of corporation democracy. The Court noted it was not reaching the question of whether the Government has a compelling interest in preventing foreign corporations from influencing our Nation’s political process. Id. at 903-11. In striking down 2 U.S.C. §441(b), Justice Kennedy overruled Austin v. Michigan Chamber of Commerce, 494 U.S. 652 (1990), and part of McConnell v. FEC, 540 U.S. 93 (2003). Those cases had upheld limits on electioneering because of the speaker’s corporate identity. Stare decisis did not require continued acceptance as the cases were not well reasoned in abandoning free speech principles, had been undermined by various circumventions, and no serious reliance interests were at stake. 130 S. Ct. at 911-13. On precedent, see E-Treatise at Supplement at § 7.3.3.4, end of section (not well-reasoned); § 7.3.3.3 (changed facts); § 7.3.2 (reliance). See generally American Tradition Partnership Inc. v. Bullock, 132 S. Ct. 2490 (2012) (Citizens United applies even if state Supreme Court, here Montana, holds corrupting influence of corporate contributions is compelling interest in their state); id. at 2491-92 (Breyer, J., joined by Ginsburg, Sotomayor & Kagan,JJ., dissenting) (Citizens United should not bar a state Supreme Court from making its own finding on in-state corruption); Texans for Free Enterprise v. Texas Ethics Commission, 732 F.3d 535 (5th Cir. 2013) (contributions to independent-expense action political committees cannot be limited under Citizens United; Republican Party of New Mexico v. King, 741 F.3d 1089 (10th Cir. 2013) (same); Wisconsin Right to Life, Inc. v. Barland, 751 F.3d 804 (7th Cir. 2014) (registration/reporting requirements for independent-expense committee spending more than $300 invalid); Missourians for Fiscal Accountability v. Klahr, 2018 WL 29249973 (8th Cir. 2018) (law requiring groups to support or oppose ballot measure to form at least 30 days before election invalid under strict scrutiny as law bans expenditures). But see Minnesota Citizens Concerned for Life, Inc. v. Swanson, 640 F.3d 304 (8th Cir. 2011) (requiring corporations to funnel campaign contributions through “political funds” permissible disclosure requirement); United States v. Danieleczyk, 683 F.3d 611 (4th Cir. 2012) (century-old federal ban on direct corporate contributions to federal candidates intact despite Citizens United).
The statute also included in 2 U.S.C. § 441(d) a disclaimer requirement indicating who is responsible for the content of any advertisement, and in 2 U.S.C. § 444(f) a disclosure requirement for any person spending more than $10,000 on electioneering communications within a calendar year. Justice Kennedy found application to a movie broadcast via video-on-demand was constitutional; there had been no showing these requirements would impose a chill on speech or expression. 130 S. Ct. at 913-14, 917. Dissenting on this conclusion, Justice Thomas pointed to a number of examples wherein persons whose names and addresses were disclosed, as required by law, were subjected to attacks and were left subject to retaliation from elected officials. He said that persons should have a right to anonymous speech. Id. at 980-82 (Thomas, J., concurring in part and dissenting in part). While Court majorities have been willing to consider those risks to freedom of association as grounds for not requiring disclosure in some cases, as in NAACP v. Alabama, 357 U.S. 449 (1958), discussed in the E-Treatise at § 30.4.2.1 n.270, for Justice Thomas the possibility of bringing such an applied action would require substantial litigation over an extended time during which there would be a risk of chilling speech. 130 S. Ct. at 982 (Thomas, J., concurring in part and dissenting in part).

Four Justices dissented in Citizens United. Id. at 929 (Stevens, J., joined by Ginsburg, Breyer & Sotomayor, JJ., dissenting). Justice Stevens claimed that stare decisis had been inappropriately departed from because Austin has long been relied upon by state legislatures, and the case had not been proved unworkable. Id. at 938-40. Stevens said there was plenty of evidence supporting Congress’s concern to deal with corruption, distortion, and shareholder protection. The fact that corporations have no consciences, no beliefs, no feelings, and no thoughts or desires is a reminder they are not “We the People” by whom and for whom our Constitution was established. Id. at 960-79. Stevens concluded the majority view is contrary to long recognition by the people of a need to prevent corporations from undermining self-government. Id. at 948-60. These four Justices did agree with Kennedy the disclaimer and disclosure requirements were valid. Id. at 979.

Speech Relating to Campaign Financing and the Election of Candidates

§ 30.4.2.1, page 1510, n.305: Reflecting increased skepticism toward campaign finance laws present since the 2006 case of Randall v. Sorrell, discussed in the E-Treatise at § 30.4.2.1 nn.304-05, in Federal Election Commission v. Wisconsin Right to Life, Inc., 127 S. Ct. 2652 (2007), Chief Justice Roberts and Justice Alito applied the strict scrutiny standard of review adopted in McConnell v. FEC for campaign expenditures, discussed at § 30.4.2.1 n.302, but held that while McConnell had upheld a ban on “express advocacy” by corporations within 60 days of a general election, or 30 days of a primary election, based on a compelling interest of regulating “express advocacy” by corporations whose economic power could otherwise distort the election process, the ads at issue here were more properly viewed as “issue ads,” not “express advocacy” for a candidate, and thus were not controlled by McConnell. In adopting a test to distinguish “express advocacy” from “issue advocacy,” Chief Justice Roberts adopted a test by which most ads would be “issue ads,” since “our test affords protection unless an ad is susceptible of no reasonable interpretation other than as an appeal to vote for or against a specific candidate” and any “tie is resolved in favor of protecting speech.” For such “issue ads,” Chief Justice Roberts noted that the Court had never recognized a compelling interest in regulating such ads. 127 S. Ct. at 2672-74 (Roberts, C.J., announcing judgment of the Court, and joined by Alito, J., with respect to Parts III and IV). In this case, Justices Scalia, Kennedy, and Thomas continued their view that McConnell was wrongly decided and even “express advocacy” should be permitted by corporations throughout the election. Id. at 2674-75 (Scalia, J., joined by Kennedy & Thomas, JJ., concurring in part and concurring in the judgment). Given Chief Justice Roberts’ test, where most ads will be viewed as “issue ads,” the result will be the same under either approach. Justices Stevens, Souter, Ginsburg, and Breyer continued their more accommodating approach toward campaign finance laws, and would have upheld the regulations on the compelling interest concerned with distortion of the election process by corporations, which applies to both “express advocacy” ads and most “issue ads,” which should be viewed as the “functional equivalent” of express advocacy. Id. at 2687-89 (Souter, J., joined by Stevens, Ginsburg & Breyer, JJ., dissenting).

In McCutcheon v. Federal Elections Commission, 134 S. Ct. 1434 (2014), a 5-4 Court held that aggregate contribution limits that are placed on an individual donor’s political contributions during an election cycle fail even Buckley’s less than strict scrutiny review, because they limit the number of separate candidates an individual can support, although a similar overall limit had been upheld in Buckley; id. at 1465 (Breyer, J., joined by Ginsburg, Sotomayor & Kagan, J., dissenting) (court should follow Buckley).
Disclosure Requirements on Freedom of Speech and Association

§ 30.4.2.2, page 1513, end of section: In John Doe No. 1 v. Reed, 130 S. Ct. 2811 (2010), an 8-1 Supreme Court upheld a Washington state law requiring public disclosure of names and addresses of signers of referendum petitions, applying “exacting scrutiny,” defined as requiring a “substantial relation” between the law and an “important” government interest, that is, an intermediate scrutiny approach. Justice Thomas dissented, arguing that the disclosure requirement was unconstitutional, and that strict scrutiny should apply. Id. at 2837 (Thomas, J., dissenting); Chula Vista Citizens for Jobs and Fair Competition v. Norris, 782 F.3d 520 (9th Cir. 2014) (en banc) (requirement that names of official proponents appear on text of proposition used by circulators to solicit voter signatures constitutional under Doe’s less than strict scrutiny, “exacting” scrutiny approach); Delaware Strong Families v. Denn, 793 F.3d 304 (3rd Cir. 2015) (requirement groups spending more than $500 annually report contributors of $100 or more constitutional); Americans for Prosperity Foundation v. Becerra, 2018 WL 4320193 (9th Cir. 2018) (requiring nonprofit to report names and addresses of anyone contributing more than 2% of annual contributions constitutional under Reed). But see Coalition for Secular Government v. Williams, 815 F.3d 1267 (10th Cir. 2016) (application of disclosure requirement to group spending only $3,500 to advocate against a state referendum unconstitutional).

Speech Regulating the Election of Candidates to Office

§ 30.4.2.3, page 1513, text following n.321: A separate problem involves regulating false or deceptive speech made about candidates for office. See, e.g., Susan B. Anthony List v. Driehaus, 814 F.3d 466 (6th Cir. 2016) (Ohio’s political false statement law not narrowly tailored to promote compelling interest in preserving integrity of the political process); Commonwealth v. Lucas, 34 N.E.3d 1242 (Mass. 2015) (similar law invalid under Massachusetts Constitution; counterspeech appropriate remedy); Attorney Grievance Comm’n of Maryland v. Stanalonis, 126 A.3d 6 (Md. 2015) (judicial candidate who sent fliers saying incumbent judge “[o]pposes registration of convicted sexual predators” did not violate state ethics rules, even though more accurate to say the judge “opposed placing his clients” in the registry when representing them).

Another problem which has emerged are laws regulating voters’ speech concerning “ballot selfies” which indicate the party has voted, and for which candidate. See generally Rideout v. Gardner, 838 F.3d 65 (1st Cir. 2016) (ban on ballot selfies, argued by state to prevent vote buying or voter coercion, not narrowly tailored under strict scrutiny; states did not show more narrowly tailored statute banning use of selfie to buy or coerce votes would not be effective); Silverberg v. Board of Elections of New York, 216 F. Supp. 3d 411 (S.D.N.Y. 2016) (preliminary injunction against ban on ballot selfies, brought 13 days before election, denied).
§ 30.4.2.4, page 1517, n.331: With regard to choosing judges in elections, New York is one of nine states that use a “hybrid” system. In *New York State Bd. of Elections v. Lopez Torres*, 128 S. Ct. 791 (2008), the Court considered whether the First Amendment was violated by a New York requirement which created two avenues to be on the final election ballot: (1) selection at a convention of delegates chosen by party members in a primary election or (2) by a petition signed by the lesser of 5 percent of the number of votes last cast for Governor in the judicial district or either 3,500 or 4,000 voters, depending on the size of the district. Justice Scalia wrote for the Court that a state may require party use of primaries or conventions to select nominees who appear on the general-election ballot, and there is no precedent establishing an individual’s constitutional right to have a fair shot at a party’s nomination. *Id.* at 799. See generally *Sanders County Republican Cen. Comm. v. Bullock*, 698 F.3d 741 (2012) (applying strict scrutiny, Montana law banning political party endorsements of judicial candidates unconstitutional burden on speech and association rights, as not advancing a compelling interest and not being narrowly tailored); *Ohio Council 8 American Federation of State, Cty. & Mun. Emps., AFL-CIO v. Husted*, 814 F.3d 329 (6th Cir. 2016) (Ohio law precluding candidates for judicial office from listing political affiliation on ballot constitutional).

**Regulation of Judicial Speech in the Context of Campaigns**

§ 30.4.2.4, page 1520, n.341: In *Siefert v. Alexander*, 608 F.3d 974 (7th Cir. 2010), the Seventh Circuit held that a Wisconsin judicial ethics rule barring judges or judicial candidates from being members of a political party was unconstitutional under strict scrutiny, but that a rule preventing judges or judicial candidates from personal solicitation of campaign contributions was constitutional as advancing a compelling interest in preventing corruption and the appearance of corruption. The Court also held that a ban on judges or judicial candidates endorsing others in partisan elections was constitutional, viewing it merely as a regulation of government workers, and thus subject only to the 3rd-order rational review *Pickering* balancing test, discussed in the E-Treatise at § 30.2.2.1 nn.178-83. In *Wersel v. Sexton*, 674 F.3d 1010 (8th Cir. 2012) (7-5 *en banc*), applying strict scrutiny, the Eighth Circuit upheld constitutional provisions prohibiting judicial candidates from publicly endorsing or opposing candidates for a different public office, soliciting funds for political candidates or organizations, and personally soliciting campaign funds, viewing provisions as narrowly tailored to serve compelling interests in judicial impartiality and appearance of impartiality. But see *Wolfson v. Concannon*, 750 F.3d 1145 (9th Cir. 2014) (Arizona provisions banning judicial candidates from giving speeches on behalf of other candidates invalid under strict scrutiny, disagreeing with *Wersel v. Sexton*). See also *Williams-Yulee v. Florida Bar*, 135 S. Ct. 1656 (2015) (rule banning judicial candidates from personally soliciting campaign funds satisfies strict scrutiny)(Scalia, Kennedy, Thomas & Alito, JJ., dissenting); *French v. Jones*, 876 F.3d 1228 (9th Cir. 2017) (Montana law prohibiting judicial candidates from seeking or accepting political endorsements constitutional after *Williams-Yulee*); In re *Judicial Campaign Complaint Against O’Toole*, 24 N.E.3d 1114 (Ohio 2014) (constitutional to prohibit judicial candidate from making “knowingly false” statements; overbroad to regulate “misleading or deceptive” statements).

**Freedom of Association and Anti-Discrimination Laws**

§ 31.2.2, page 1530, text following n.28: Faced with public pressure, the Boy Scouts voted in 2013 to change their national membership policy to allow youths to join without regard to sexual orientation; in 2015 to allow adult homosexuals to participate in leadership positions; and in 2017 lifted the ban on transgendered youths being Scouts. Local scout troops affiliated with churches may still restrict membership at the local level on religious grounds. On applicability of anti-discrimination laws, see also *Elane Photography, LLC v. Wilcock*, 309 P.3d 53 (N. Mex. 2012) (commercial photography business that offers its services to the public constitutes a “public accommodation” under New Mexico Human Rights Act, and thus cannot discriminate in service based on sexual orientation), cert. denied, 134 S. Ct. 1787 (2014).

**Freedom of Association and Rights of Groups**

§ 31.2.3, page 1533, text following n.42: On applicability of law burdening freedom of association of groups generally, see *Laborers Local 236, AFL-CIO v. Walker*, 749 F.3d 628 (7th Cir. 2014) (Wisconsin statute
restricting collective bargaining ability of unions by providing state/local government employers can bargain with most public unions (those not defined as “public safety employees”) only over base wages, and eliminating payroll deductions for union dues, does not violate union’s freedom of association or the right to petition government for grievances, since provisions act directly only on state/local employers, not unions).

Freedom of Association: Policies Concerning Elections

§ 31.2.4, page 1534, text following n.46: In Washington State Grange v. Washington State Republican Party, 128 S. Ct. 1184 (2008), a 7-2 Court refused to find that a “party preference” primary election ballot requirement was a severe burden on political parties’ associational rights. Because it did not impose a severe burden, the Court applied second-order reasonableness analysis. Id. at 1195-96. The law required candidates to identify themselves on the ballot by a self-designated party preference. Justice Thomas wrote for the Court, “There is simply no basis to presume that a well-informed electorate will interpret a candidate’s party-preference designation to mean that the candidate is that party’s chosen nominee or representative or that the party associates with or approves of the candidate.” Id. at 1193. The dissent said there was a severe burden on parties’ associational rights, as voters will rely on designation to determine what the party and candidate stand for; thus strict scrutiny was required. Id. at 1197-98 (Scalia, J., joined by Kennedy, J., dissenting). See also Pisano v. Strach, 743 F.3d 927 (4th Cir. 2014) (requirement for “new” political parties to have petition signed by 2% of the total number of voters who voted in the most recent election for Governor by June 1 in advance of November election not a severe burden, imposing only reasonableness review); Marcellus v. Virginia State Board of Elections, 849 F.3d 169 (4th Cir. 2017) (Virginia can prohibit political party identification for local offices, while permitting political party designations for federal, statewide, and General Assembly offices, under reasonableness balancing based on desire to minimize partisanship for local government, promote impartial governance, and maximize number of citizens eligible to hold local office). But see Libertarian Party of Virginia v. Judd, 718 F.3d 308 (4th Cir. 2013) (Virginia law requiring witnesses to verify each signature gathered for a petition to nominate a candidate for the ballot in statewide elections is not narrowly tailored and fails strict scrutiny review applicable to severe burdens on access to the ballot).

Prayers Opening Legislative Sessions

§ 32.1.2.3, page 1550, n.49: In Marsh, the prayer opening the legislative session was non-denominational. Where the prayer is not non-denominational, but favors a particular religious tenet, such as referencing “Jesus Christ, our Lord,” the prayers typically had been declared unconstitutional. See, e.g., Joyner v. Forsyth County, 653 F.3d 341 (4th Cir. 2011). But see Pelphrey v. Cobb County, Georgia, 547 F.3d 1263 (11th Cir. 2008) (denominational prayers permissible as long as legislature offers prayer opportunities by volunteer clergy or other members of the community on a non-discriminatory basis, even where more than 95% of volunteers are Christian, and 70% of prayers contained Christian references, such as “in Jesus’ name we pray.”). The Supreme Court considered this issue in Town of Greece, New York v. Galloway, 134 S. Ct.1811 (2014). Similar to Pelphrey, a 5-4 Court held that such a scheme was consistent with historical traditions of invocations opening government meetings, id. at 1820-24 (Kennedy, J., opinion for the Court), and did not involve coercion or proselytizing of religion, id. at 1824-28 (Kennedy, J., joined by Roberts, C.J., and Alito, J.). The practice did not discriminate based on religion, since all groups, including atheists, had an opportunity to offer the opening invocation. Id. at 1816-17. Indeed, following the Court’s decision in Galloway, an atheist has delivered the opening invocation in the town of Greece. Justice Kennedy noted that the Town of Greece’s practice would support, like non-denominational statements, the “ceremonial purpose” of recognizing the importance of religion in many people’s lives. Id. at 1827-28. A four-Justice dissent indicated that a range of denominational, sectarian invocations is likely to undermine the norm lying behind the Establishment Clause that “when each person performs the duties or seeks the benefits of citizenship, she does so not as an adherent to one or another religions, but simply as an American.” In this case, the dissent noted, until the litigation was commenced, the town did not recognize “religious diversity” or “in any way reach out to adherents of non-Christian religions.” Id. at 1841-42 (Kagan, J., joined by Ginsburg, Breyer & Sotomayor, JJ., dissenting). In considering this issue, probably the dissent has the better of the factual argument, and Galloway may eventually be overruled or limited to its facts. In any event, most cities of any size, as well as the federal government, are likely to stick more with non-denominational statements as a matter of political sensitivity to the diverse communities they serve. That Justice Kennedy joined the conservative
wing of the Court is no surprise. See generally R. Randall Kelso, Justice Kennedy’s Jurisprudence on the First Amendment Religion Clauses, 44 McGEORGE L. REV. 103, 139-150 (2013) (noting that Kennedy rejects the “no endorsement” test in favor of the “no coercion/proseletizing” test for Establishment Clause doctrine, and outside the school context rarely finds religious statements constitute coercion or proseletizing of religion). After Galloway, courts have struggled with whether denominational prayers opening government meetings may be given by legislators or council members themselves. See, e.g., Lund v. Rowan County, 837 F.3d 407 (4th Cir. 2016) (2-1 panel: practice constitutional), rev’d, 863 F.3d 268 (4th Cir. 2017) (10-5 en banc) (council members giving prayers and inviting public to join unconstitutional; only Christianity mentioned and 97% of prayers mentioned “Jesus”, “Christ”, or “Savior”); Bormuth v. County of Jackson, 849 F.3d 266 (6th Cir. 2017) (2-1 panel: practice unconstitutional), rev’d, 870 F.3d 494 (6th Cir. 2017) (9-6 en banc opinion; practice constitutional under history and traditions approach of Marsh and Galloway).

The Modern Natural Law Era of Establishment Clause Analysis: Aid to Schools

§ 32.1.3.1.B(1), page 1577, n.137: In Moss v. Spartanburg County School Dist. Seven, 683 F.3d 599 (4th Cir. 2012), the Fourth Circuit upheld a school district’s policy of granting credits for off-campus religious courses offered through an accredited private institution, relying on Zelman v. Harris.

The Modern Natural Law Era of Establishment Clause Analysis: Ceremonial Deism

§ 32.1.3.1.B(2), page 1581, n.151: Consistent with Justice O’Connor’s concurrence in Newdow, in Newdow v. Rio Linda Union School Dist., 597 F.3d 1007 (9th Cir. 2010), the Ninth Circuit held that voluntary recitation of the Pledge of Allegiance even with the phrase “Under God” advanced the secular purposes of (1) underscoring the political philosophy of the Founding Fathers that God granted certain inalienable rights to the people which government cannot take away, and (2) adding a note of importance to the Pledge as a matter of ceremonial deism. This decision departed from the Ninth Circuit’s earlier ruling in Newdow v. U.S. Congress, 328 F.3d 466 (9th Cir. 2003) (“Under God” in Pledge unconstitutional), vacated on standing grounds sub. nom. Elk Grove Unified School Dist. v. Newdow, 542 U.S. 1 (2004), discussed in the E-Treatise at § 17.3.1.4.E n.488. See also Newdow v. Peterson, 753 F.3d 105 (2nd Cir. 2014) (motto “In God We Trust” on United States currency does not violate the Establishment Clause), and cases cited therein.

The Modern Natural Law Era of Establishment Clause Analysis: Religion In School Cases

§ 32.1.3.1.B(2), page 1583, n.158: In Doe v. Indian River School Dist., 653 F.3d 256 (3rd Cir. 2011), the Third Circuit held that a local school board’s practice of opening meetings regularly attended by students with a prayer violates the Establishment Clause. In contrast, in American Humanist Association v. McCarty, 851 F.3d 521 (5th Cir. 2017), the Fifth Circuit held that an opening invocation or prayer at school board meetings was more like the legislative prayer upheld in Marsh and Galloway, discussed in this Supplement at § 32.1.2.3 n.49, rather than school-prayer in Weisman, even where students were permitted to lead the prayer). On other cases involving religion in schools, see Borden v. School Dist. of the Township of East Brunswick, 523 F.3d 153 (3rd Cir. 2008) (public school district did not violate the First Amendment rights of a football coach in barring him from kneeling on one knee and bowing his head – avowedly out of respect for his players – while they engaged in pregame prayer, where the coach had a 23-year-history of “orchestrating” player prayers; court held that a reasonable observer would have concluded that his proposed silent kneeling, when viewed from history and context, endorsed religion); Doe ex rel. Doe v. Elmbrook Sch. Dist., 687 F.3d 840 (7th Cir. 2012) (public school district’s use of evangelical church for high school graduation unconstitutional as endorsement of religion and is religiously coercive); Morgan v. Swanson, 755 F.3d 757 (5th Cir. 2014) (principal has qualified immunity when he refused to permit parent attending an in-class winter party with his son to distribute candy canes bearing a religious message); Freedom From Religious Foundation, Inc. v. Concord Community Schools, 885 F.3d 1038 (7th Cir. 2018) (second half of high school “Christmas Spectacular”, which was altered after litigation began from exclusive focus on “The Story of Christmas” through the lens of the nativity scene to “The Spirit of the Season” and now includes celebration of many cultures with songs representing Hanukkah and Kwanzaa, as well as traditional Christmas carols like “O Holy Night,” with only a 2-minute portrayal of the nativity scene, constitutional under coercion test, endorsement test, or Lemon test).
§ 32.1.3.1.B(2), page 1585, n.168: Although schools may include sacred choral music as part of overall music curriculum, a school is not required to do so. In Stratechuk v. Board of Education, South Orange-Maplewood School Dist., 587 F.3d 597 (3rd Cir. 2009), the Third Circuit held a school district policy to bar performance of religious holiday music at seasonal shows, while continuing to allow it to be taught in class, had a legitimate secular purpose of avoiding potential Establishment Clause problems, particularly given a history at school of parental complaints about which religious holiday music had been included in the past.

§ 32.1.3.1.B(2), page 1587, text following n.175: While public schools may permit religious organization to use their facilities on a non-discriminatory basis during after school hours, they are not required to open their schools for worship services. See Bronx Household of Faith v. Board of Education of the City of New York, 750 F.3d 184 (2nd Cir. 2014). Cf. Barnes-Wallace v. San Diego, 704 F.3d 1067 (9th Cir. 2012) (San Diego’s rent-free leases of property to Boy Scouts – an organization that at the time prohibited atheists, agnostics, or “open or avowed” homosexuals from being members – does not violate the Establishment Clause because the city provides similar leases to both secular and religious nonprofit organizations) (In January 2014, the Boy Scouts changed their national membership policy to ban only “open or avowed” homosexual adults from membership, and by July 2015 had dropped that nationwide ban); Jewish People for the Betterment of Westhampton Beach v. Village of Westhampton Beach, 778 F.2d 390 (2nd Cir. 2015) (neutral accommodation permitting “nearly invisible” plastic strips known as “lechis” on utility poles to create “eruv” – aiding certain activities on Jewish Sabbath and Yom Kippur – constitutional).

§ 32.1.3.2.B, page 1594, n.202: In Pleasant Grove City, Utah v. Summum, 129 S. Ct. 1125, 1129 (2009), a unanimous Court held that placing in a city’s public park a passive monument containing the Seven Aphorisms of Summum would not violate the Free Speech Clause because it would be government speech. Justice Souter warned that the Establishment Clause would be violated if such a monument appeared to a reasonable observer as an endorsement of religion. Id. at 1141-42 (Souter, J., concurring in the judgment). Justice Scalia, concurring with Justice Thomas, said there was little danger of that result because the case was so similar to Van Orden v. Perry, 545 U.S. 677 (2005), where the Court had upheld against an Establishment Clause challenge a virtually identical Ten Commandments monument donated by a private group. 129 S. Ct. at 1139-40 (Scalia, J., joined by Thomas, J., concurring). See also Freedom from Religion Foundation, Inc. v. City of Warren, Michigan, 707 F.3d 686 (6th Cir. 2013) (city’s annual holiday display constitutional under Lynch v. Donnelly and County of Allegheny; display is government speech, and thus city’s refusal to add secular message, including phrase “religion is but myth and superstition,” not free speech issue).

In Salazar v. Buono, 130 S. Ct. 1803 (2010), in 1934 private citizens had placed a Latin cross on a rock outcropping in a remote section of the Mojave Desert, owned by the federal government, in order to honor American soldiers who died in World War I. In 2004, the federal government passed a statute to transfer the cross and land on which it stands to a private party, the Veterans of Foreign Wars, to avoid a violation of the Establishment Clause. A 5-4 Court remanded the case to the district court to determine whether a “reasonable observer” would view the transfer as an endorsement. Id. at 1821 (Kennedy, J., announcing the judgment of the Court). Suggesting it did not, Justice Kennedy noted, “Here, one Latin cross in the desert evokes far more than religion.” Id. at 1820 (Kennedy, J., joined by Roberts, C.J., and by Alito, J., in part). Chief Justice Roberts also indicated transferring the land was likely constitutional, because it would be permissible “for the Government to tear down the cross, sell the land to the Veterans of Foreign War, and return the cross to them, with the VFW immediately raising the cross again.” Id. at 1821 (Roberts, C.J., concurring). Justice Alito would have ruled the transfer was permissible. Id. at 1821 (Alito, J., concurring in part and concurring in the judgment). Justices Scalia and Thomas would have permitted the transfer because the plaintiffs did not have standing, raising only a generalized grievance. Id. at 1824 (Scalia, J., joined by Thomas, J., concurring in the judgment). Three Justices dissented on grounds that the proposed transfer itself was an endorsement of the Latin cross. Id. at 1828, 1839 (Stevens, J., joined by Ginsburg & Sotomayor, JJ., dissenting). Justice

2133
Breyer dissented on grounds that the district court’s ban on transfer of the property was covered by an original injunction, which had earlier been affirmed. *Id.* at 1843 (Breyer, J., dissenting). In contrast, Justice Kennedy noted that since the government’s right to transfer was not litigated in earlier cases, the original injunction did not cover that contingency. *Id.* at 1817 (Kennedy, J., joined by Roberts, C.J., and by Alito, J., in part).

The accommodation permitted in *Buono*, of course, has its limits. For example, in *American Atheists, Inc. v. Duncan*, 616 F.3d 1145 (10th Cir. 2010), the Tenth Circuit held that a sequence of crosses erected on Utah highways to memorialize fallen Utah Highway Patrol state troopers would convey to a reasonable observer that the state endorses a certain religion. *See also Trunk v. City of San Diego*, 629 F.3d 1099 (9th Cir. 2011) (symbolism, history, and prominence of a 43-foot cross, which had been incorporated into a war memorial, sends a message that sacrifices of Christian soldiers are valued more highly), *on remand*, 2013 WL 6528884 (S.D. Cal. 2013) (cross ordered removed); *Tearpock-Martini v. Borough of Shickshinney*, 756 F.3d 232 (3rd Cir. 2014) (Establishment Clause claim against directional sign (“Bible Baptist Church Welcomes You!” with directional arrow “1 Block”) sponsored by Baptist church and erected on public land may proceed, since each day’s display constitutes new potential violation, and thus claim not barred by statute of limitations).

### Display Cases Involving the Ten Commandments

**§ 32.1.3.2.B, page 1595, n.204: See also Green v. Haskell County Board of Commissioners, 568 F.3d 784 (10th Cir. 2009)** (placement of monument on a county courthouse lawn impermissible endorsement, particularly given statements by Commissioners underscoring the religious significance of the message; the county was also ordered to pay over 10 years $199,000 in attorneys’ fees to the prevailing party. CNN Wire Staff, *Oklahoma county must pay up in Ten Commandments case* (July 28, 2010) (Internet cite); *ACLU of Kentucky v. McCreary County, Kentucky*, 607 F.3d 439 (6th Cir. 2010) (preliminary injunction against Ten Commandments display affirmed in *McCreary County* made permanent).* Red River Freethinkers v. City of Fargo*, 764 F.3d 948 (8th Cir. 2014) (monument standing for years on city-owned land constitutional as similar to monument in *Van Orden*); *Prescott v. Oklahoma Capitol Preservation Commission*, 373 P.3d 1032 (Okla. 2015) (Ten Commandments display on Oklahoma capitol grounds invalid under Oklahoma Constitution); *Felix v. Bloomfield*, 841 F.3d 848 (10th Cir. 2016) (5-foot tall, 3,400-pound monument displaying the Ten Commandments on city hall lawn unconstitutional as endorsement of religion); *American Humanist Ass’n v. Maryland-National Capital Park & Planning Comm’n*, 874 F3d 195 (4th Cir. 2017) (40-foot tall Latin Cross, established in memory of soldiers who died in World War I, unconstitutional as primary effect of endorsing religion and excessive entangles government in religion).

### Establishment Clause Challenges Generally

**§ 32.1.4, page 1604, end of section: On the specific issue of faith-based initiatives, see Phillip C. Aka, *Assessing the Constitutionality of President George W. Bush’s Faith-Based Initiatives*, 9 J.L. Soc. No. 1 (2008). Standing to sue on this issue or other similar issues might be a problem. As held in *Hein v. Freedom From Religion Foundation, Inc.*, 127 S. Ct. 2553 (2007), discussed in this Supplement at § 17.3.1.4.B n.450, taxpayers lack standing to challenge such executive action. Even challenges to congressional action would have to involve congressional appropriations under the Spending Clause, as reflected in *Valley Forge*, discussed in the E-Treatise at § 17.3.1.2.C nn.350-52. For any non-Spending Clause challenge, individuals would have to establish a distinct injury-in-fact, caused by the challenged conduct, and redressable by the court. That may be difficult to establish. See, e.g., *Freedom from Religious Foundation, Inc. v. Obama*, 641 F.3d 803 (7th Cir. 2011) (plaintiffs did not have concrete injury to challenge federal statute, 36 U.S.C. § 119, originally passed in 1952, and amended in 1988, creating a National Day of Prayer); *Ansley v. Warren*, 2017 WL 2782622 (4th Cir. 2017) (absent specific injury plaintiffs have no standing to challenge North Carolina law allowing state magistrates to recuse themselves from performing same-sex marriages on religious grounds); *Barber v. Bryant*, 193 F. Supp. 3d 677 (S.D. Miss. 2016) (Mississippi law which grants rights to discriminate only to those holding religious beliefs against LGBT or unmarried persons violates religious neutrality under Establishment Clause; irrational under Equal Protection Clause), *rev’d*, 860 F.3d 345 (5th Cir. 2017) (absent specific harm, plaintiff’s generalized grievance about possible applications of statute not enough for standing).
Cases Under Employment Division v. Smith

§ 32.2.2.5, page 1612, text following note 253: See Phillips v. City of New York, 775 F.3d 538 (2d Cir. 2015) (state law that public school students be vaccinated is neutral law of general applicability; rationally related to legitimate state interests under Free Exercise and Due Process clauses, citing Jacobson v. Commonwealth of Massachusetts, 197 U.S. 11 (1905)); Nikolao v. Lyon, 875 F.3d 310 (6th Cir. 2017) (no Free Exercise burden by requiring parent to explain religious reasons for not wanting child to be vaccinated prior to attending public school when waiver granted); Craig v. Masterpiece Cakeshop, Inc., 370 P.3d 272 (Colo. App. 2015) (anti-discrimination law neutral and rational; cake maker has no Free Exercise right to refuse to make wedding cake for same-sex couple), rev’d, 138 S. Ct. 1719 (2018) (while on its face the law is neutral, statute applied in this case with religious discriminatory intent, triggering strict scrutiny under Lukumi); State v. Arlene’s Flowers, Inc., 389 P.3d 543 (Wash. 2017) (flower shop owner violated Washington Law Against Discrimination (WLAD) by refusing to provide flowers for same-sex wedding; law is generally applicable neutral law triggering only rational basis review under the Free Exercise Clause), vacated, 2018 WL 3096308 (U.S. Sup. Ct. 2018) (reconsider in light of Masterpiece Cakeshop).

Cases Under Church of the Lukumi Babalu Aye, Inc. v. City of Hialeah

§ 32.2.2.5, page 1612, n.254: In Trinity Lutheran Church of Columbia, Inc. v. Comer, 137 S. Ct. 2012 (2017), the Court held that a state program which excluded churches from a program providing grants to non-profit organizations to purchase rubber playground surfaces made from recycled tires was discrimination against religion, triggering strict scrutiny under Lukumi. The Court distinguished Locke v. Davey, discussed in the E-Treatise at § 32.2.2.5, page 1615, n.265, by noting the program there went “a long way toward including religion in its benefits” and permitted the individual to use government funds to take religious courses and only prevented using the funds to get a religious degree, a case raising greater Establishment Clause concerns than use of recycled tires to resurface playgrounds. Four Justices noted in footnote 3, “This case involves express discrimination based on religious identity with respect to playground funding. We do not address religious uses of funding or other forms of discrimination.” Id. at 2024 n.3 (Roberts, C.J., joined by Kennedy, Alito & Kagan, JJ.); id. at 2026 (Gorsuch, J., joined by Thomas, J., concurring in part) (refusing to join footnote 3 and indicating strict scrutiny should be applied more broadly); id. at 2027 (Breyer, J., concurring in the judgment) (case should be viewed, like police and fire protection, as neutral provision of “public benefit”); id. at 2028 (Sotomayor, J., joined by Ginsburg, J., dissenting) (requiring the state to provide public funds directly to the church, even if for a playground, violates the Establishment Clause). Cf. Moses v. Skandera, 367 P.3d 838 (N. Mex. 2015) (provision of schoolbooks to religious schools violates New Mexico Constitution), judgment vacated and remanded in light of Trinity, 2017 WL 2742852 (U.S. Sup. Ct. 2017); Taxpayers for Public Education v. Douglas Cty. Sch. Dist., 351 P.3d 461 (Colo. 2015) (state scholarship program providing grants to both public and private schools violates Colorado Constitution), judgment vacated and remanded in light of Trinity, 2017 WL 2742829 (U.S. Sup. Ct. 2017). See also Central Rabbinical Congress of the United States and Canada v. New York City Dept. of Health and Mental Hygiene, 763 F.3d 183 (2nd Cir. 2014) (city ordinance prohibiting any person from performing direct oral suction as part of circumcision without written signed consent triggers strict scrutiny as singling out religious practice, but remanded for trial on whether ordinance is constitutional given interest in preventing spread of herpes simplex virus, which can be fatal to infants due to undeveloped immune systems).

RLUIPA and Religious Rights for Prisoners and Under Land Use Regulations

§ 32.2.2.5, page 1614, text following note 259: See Garner v. Kennedy, 713 F.3d 237, 240-48 (5th Cir. 2013) (ban on prisoners wearing head covering while in transit in prison valid on safety grounds, since weapons, like knife, could be hidden in covering; ban on prisoners wearing quarter-inch beard invalid, since no compelling interest given policy allowing inmates with “skin conditions” to wear short beards); Holt v. Hobbs, 135 S. Ct. 853, 859-60 (2015) (prison regulation banning one-half inch beard invalid under RLUIPA); Ali v. Stephens, 822 F.3d 776 (5th Cir. 2016) (ban on growing a 4-inch beard invalid). But see Knight v. Thompson, 796 F.3d 1289 (11th Cir. 2015) (short hair policy for prisoners applied to Native American valid), cert. denied, 136 S. Ct. 1824 (2016). See also Haight v. Thompson, 763 F.3d 554 (6th Cir. 2014) (Native Americans raise colorable claim of right to purchase buffalo meat for once-a-year “powwow” religious
ceremony); Jehovah v. Clarke, 798 F.3d 169 (4th Cir. 2015) (inmate can continue to press claims he should be allowed to drink wine during communion and being harassed by non-Christian cellmate chilled religious practice); Cavanaugh v. Bartelt, 2016 WL 1446447 (D. Neb. 2016) (prisoner worship of Flying Spaghetti Monster parody, not religion). In Garner v. Kennedy, the Fifth Circuit quoted language from the Court’s opinion in Cutter v. Wilkinson, 544 U.S. 709, 723 (2005), which noted in passing RLUIPA Congress intended the courts to give “due deference” to prison regulations “to maintain good order, security and discipline, consistent with consideration of costs and limited resources.” 713 F.3d at 745 n.26. While usually cost considerations are not important or compelling interests to justify regulation under intermediate review or strict scrutiny, as discussed in the E-Treatise at § 26.1.1.2 n.44, since the issue here is interpreting a statute, it is appropriate to take into account Congress’ intent in the RLUIPA statutory “strict scrutiny” analysis.

On land use regulations, see Marci A. Hamilton, RLUIPA is a Bridge Too Far: Inconvenience is Not Discrimination, 39 Fordham Urb. L.J. 959 (2012) (discussing cases on both sides), citing, inter alia, Vision Church v. Village of Long Grove, 468 F.3d 975 (7th Cir. 2006) (denial of special use permit to build a church, which would have violated zoning law on size of buildings, not substantial burden); Wesleyan Methodist Church of Canisteo v. Village of Canisteeo, 792 F. Supp. 2d 667, 673-74 (W.D.N.Y. 2011) (no substantial burden when zoning law prevented building church in “light industrial zone”); Helen Greek Orthodox Church v. City of New Berlin, 396 F.3d 895, 901 (7th Cir. 2005) (zoning ordinance preventing building of church in residential area with insufficient provisions for exemptions a substantial burden); Douglas Laycock & Luke W. Goodrich, RLUIPA: Necessary, Modest, and Under-Enforced, 39 Fordham Urb. L.J. 1021 (2012). See also Tree of Life Christian Schs. v. City of Upper Arlington, 823 F.3d 365 (6th Cir. 2016) (whether city’s refusal to rezone office building for use as religious school treated religion differently fact question; court left open whether comparison should be only to schools, as city argued, or any non-religious use, such as day-care center, as church argued); Andon, LLC v. City of Newport News, 813 F.3d 510 (4th Cir. 2016) (congregation knew it could not meet zoning law, but signed lease anyway, cannot claim substantial burden).

**Obamacare Contraceptive Coverage Mandate and Subsidies for Individual Mandate**

§ 32.2.2.5, page 1615, text following n.263: One aspect of the Affordable Care Act (ACA) (Obamacare) was a mandate that employers’ health insurance plans provide contraceptive coverage free of cost. Catholic-based institutions, such as universities and hospitals, and secular corporations, whose CEOs have religious objections to contraception, particularly those that work after fertilization, such as morning-after pills, which they view as abortifacients, sued claiming the mandate is unlawful. In Burwell v. Hobby Lobby Stores, Inc., 134 S. Ct. 2751 (2014), a 5-4 Court ruled that closely-held for-profit corporations do have religious rights under RFRA, id. at 2767-75; that the requirement to include contraception in their company-provided insurance plan was a substantial burden on their religious beliefs, id. at 2775-79; and under RFRA’s strict scrutiny standard there were less restrictive effective alternatives to advance the government’s compelling interest in making contraceptive coverage available to women, id. at 2779-80. The Court noted the government could “assume the cost” of providing coverage, or extend the current exemption for “non-profit organizations with religious objections” where the non-profit can certify it opposes providing coverage, and the insurance company must arrange independently with the plan participants to provide coverage without imposing “any cost-sharing requirements.” Id. at 2780-82. Justice Kennedy noted the opinion’s narrow holding. Id. at 2785 (Kennedy, J., concurring). Four Justices dissented. They noted, as discussed in the E-Treatise at § 32.2.2.5 mn.257-62, the legislative intent behind RFRA in 1993 was to restore statutorily the Court’s Free Exercise Clause doctrine prior to Employment Division v. Smith in 1990. Id. at 2791-93 (Ginsburg, J., joined by Sotomayor, J., and joined by Breyer & Kagan, JJ., except as to Part III-C-1, dissenting). Two dissenting Justices concluded in Part III-C-1 that there was no pre-1990 case law supporting the notion for-profit corporations had free exercise clause rights. Id. at 2793-97 (Ginsburg, J., joined by Sotomayor, J., dissenting). All four Justices in dissent agreed that even if for-profit corporations had religious rights, having to include such coverage was not a “substantial burden,” since contraceptives would be used by the “autonomous choice” of the plan participants. Id. at 2797-99 (Ginsburg, J., joined by Sotomayor, J., and joined by Breyer & Kagan, JJ., dissenting). The dissent concluded the majority’s “let the government pay” option was not as effective an alternative as direct coverage from the employer, id. at 2802-03, and it was not clear the alternative of certifying objections, triggering an insurance company obligation to provide coverage independently, with added paperwork costs, would be as effective either, id. at 2803.
Another issue under the ACA turned out to be whether the provision for federal subsidies to low-income individuals buying insurance on an insurance exchange “established by the State” included subsidies for individuals buying insurance on the “federal exchange” available in states where the State did not establish their own exchanges. Consistent with the purpose of the ACA to provide affordable health care, a 6-3 Court held the Act did provide for subsidies to all individuals in every state. *King v. Burwell*, 135 S. Ct. 2480 (2015) (Scalia, J., joined by Thomas & Alito, JJ., dissenting) (“State” literally means state).

On the issue of how to determine whether something is a “substantial burden” on the exercise of religion, courts have tended to split between two tests: (1) does the burden have to involve a religious exercise which is “compelled” by the religion or otherwise forces the individual to a “stark choice”; or (2) is it enough if the objection to following the government regulations is “religiously motivated” or otherwise “important” to religious practice. *See generally United States v. Sterling*, 75 M.J. 407, 417-19 (U.S. Ct. App. for Armed Forces 2016) (under either approach no substantial burden when lance corporal required to remove from desk sign stating, “no weapon formed against me shall prosper”; option (1) above adopted by Third, Fourth, Ninth, and District of Columbia Circuits; option (2) adopted by First, Second, Fifth, Sixth, Seventh, Eighth, Tenth, and Eleventh Circuits), *cert. denied*, 2017 WL 2407485 (2017).

**Post-Locke v. Davey Decisions**

§ 32.2.2.5, page 1615, text following n.265: In *Colorado Christian University v. Weaver*, 534 F.3d 1245 (10th Cir. 2008), the Tenth Circuit distinguished *Locke v. Davey* and held that a Colorado statute excluding students at “pervasively sectarian” colleges from generally available state scholarships was unconstitutional. In *Locke*, the state of Washington excluded all theology majors from its funding program. In *Weaver*, Colorado only excluded “pervasively sectarian” colleges, not all “sectarian” colleges. Thus, students attending some religious institutions would be eligible; some would not. The court noted the statute entangled the state in “trolling through a person’s or institution’s religious beliefs,” which supported finding statute discriminated against religion, triggering a strict scrutiny approach under *Smith* and *Lukumi*, not rational review. In *Trinity Lutheran Church of Columbia, Inc. v. Comer*, 137 S. Ct. 2012 (2017), discussed in this Supplement at § 3.2.2.5, page 2135, n.245, the Court held a state program which excluded churches from a program providing grants to non-profit organizations to purchase rubber playground surfaces made from recycled tires constituted discrimination against religion, triggering strict scrutiny under *Lukumi*, distinguishing *Locke v. Davey*. *See generally Caplan v. Town of Acton*, 92 N.E.3d 691 (Mass. 2018) (state can deny grant to church to fix stained glass window with religious imagery given greater Establishment Clause concern here as opposed to that in *Trinity*); *Illinois Bible Colleges Ass’n v. Anderson*, 870 F.3d 631 (7th Cir. 2017) (state law requiring all higher education institutions to get approval before offering degrees applies equally to secular and religious institutions, and thus triggers rational review under *Smith*, not strict scrutiny under *Trinity*; the law does not necessarily create excessive entanglement under Establishment Clause).

**Clergy and Ministerial Exception**

§ 32.2.2.5, page 1617, n.270: *See also State v. Wenthe*, 839 N.W.2d 83 (Minn. 2013) (criminalizing sexual activity between clergy and parishioners does not violate Establishment Clause); *Pfeil v. St. Matthews Evangelical Lutheran Church of the Unaltered Augsburg Confession of Worthington*, 877 N.W.2d 528 (Minn. 2016) (3-2 decision, with two Justices not participating: pastors and church cannot be held liable for alleged defamatory statements made during course of formal church discipline proceedings).

**Religious Accommodation of Employees**

§ 32.2.2.5, page 1618, text following n.275: *See also Fields v. City of Tulsa*, 753 F.3d 1000 (10th Cir. 2014) (police department did not violate officer’s freedom of religion by requiring him either to attend Islamic Society of Tulsa’s “Law Enforcement Appreciation Day” or order subordinate to do so; he made no claim ordering another to do so would violate his religious beliefs); *Stormans, Inc. v. Wiesman*, 794 F.3d 1064 (9th Cir. 2015) (Washington law requiring pharmacist with objections to filling a prescription to find another pharmacist in same store to so fill, valid), *cert. denied*, 136 S. Ct. 2433 (2016) (Alito, J., joined by Roberts, C.J., and Thomas, J., dissenting).

Zarda v. Altitude Express, Inc., 883 F.3d 100 (2d Cir. 2018) (en banc), 2100
The need for such a message is particularly true since “‘capital’ is always more mobile than ‘labor.’ This means that investors can shift their capital more quickly into profitable new fields of endeavor or countries providing more advantageous investment options than laborers can be retrained . . . . This means that in a market system, the rich will get richer over time, and income inequalities will increase [if] left uncorrected by some mechanism of progressive redistributive taxation.” R. Randall Kelso, Narcissism, Generation X, The Corporate Elite, and the Religious Right Within the Modern Republican Party: A Set of “Friendly” Observations for President Bush, 24 Cardozo L. Rev. 1971, 2019-20 (2003). Protectionism from trade is not sound economics, but, as noted in the E-Treatise at § 14.2.2, pages 441-42, “Adam Smith’s support for competitive markets [in The Wealth of Nations] assumes a number of things. . . . Fourth, when a competitive market is not functioning properly, governmental regulation is warranted to correct that imbalance. . . . Adam Smith’s doctrine favors free, but fair, trade, with fairness defined not by reducing American workers to third-world status, but by trade agreements which help workers in those countries get equal rights, so that comparative productivity advantages will determine trade outcomes, not exploitation [based on] less adequate labor, environmental, and safety regulations abroad.” These observations reflect the popularity of Senator Bernie Sanders during his presidential campaign in 2016 among Democratic-leaning white working class voters and college students worried about future jobs, a message that never became a focus of the Clinton campaign. In any event, Clinton would have been a flawed candidate for such a message given her and her husband’s wealth from millions of dollars in speaking fees from elites made wealthy by global trade. Donald Trump made trade policy and declining living standards of working class Americans a centerpiece of his campaign, a focus that paid off among his white working class supporters.

It is also worth a reminder from 2003 that the trends in the Republican party on economic and other matters has been, since 2000, increasing self-centered, self-absorbed narcissism. See Kelso, supra, at 1979-85 (discussing such trends on economic policy matters, issues involving civil rights, and the appropriate balance between church and state, among others). In such a climate, the popularity of Donald Trump as a candidate for Republican voters should come as no surprise. As a counterweight to this observation, as noted in the E-Treatise Supplement, at page 2045, “In the long term, a society committed to modern natural law values, combined with current demographic trends, is likely to favor more current Democratic policy initiatives, rather than current Republican party traditionalism, as suggested by the discussion in E-Treatise at § 15.4 & §§ 16.1, 16.2 & 16.3.”

A2: § 19.3.2, text following n.42: Page 2061: Trump Travel Ban: During the 2017 Term, the Court was set to hear Trump v. International Refugee Assistance Project, 137 S. Ct. 2080 (2017) (per curiam) (denial of entry into the United States for 90 days from the effective date of the order of nationals from six predominantly Muslim countries (Iran, Libya, Somalia, Sudan, Syria, and Yemen) and suspension of decisions for 120 days on applications for refugee status from the same countries; lower courts had granted preliminary injunctions, some as violations of the Establishment Clause’s ban on religious discrimination, and others on grounds orders violated Immigration and Naturalization Act’s ban on religious and ethnic discrimination) (citations appear in per curiam opinion). The Court stayed enforcement of preliminary injunctions except for individuals with “bona fide” family or other connections to United States citizens. Id. (Thomas, Alito & Gorsuch, JJ., would have stayed the preliminary injunctions in their entirety). Following a narrow definition by the Trump Administration of “bona fide,” a lower court expanded the definition of “bona fide” for entry to include grandparents and other members typically viewed as extended family, and expanded the definition for refugees to include those sponsored by government-contracted refugee agencies. Trump v. State of Hawaii, 263 F.Supp.3d 1049 (D. Hawai‘i 2017). At the Supreme Court, the lower court’s expanded definition for entry was upheld; the Trump Administration’s narrow interpretation for refugees was reinstated. Trump v. Hawai‘i, 138 S. Ct. 34 (2017) (Thomas, Alito & Gorsuch, JJ., would have upheld the narrow definitions of the Trump Administration in their entirety).
Prior to the start of the October 2017 Term, the Trump Administration replaced the 90-day entry policy with a new policy to continue indefinitely into the future – removing Sudan from the policy, but adding Chad; adding some enhanced screening for individuals from Iraq; and adding to the policy North Korea and some government officials from Venezuela. Given this action, the Court dismissed the existing cases as moot. *Trump v. International Refugee Assistance Project*, 138 S. Ct. 353 (2017) (entry policy); *Trump v. Hawaii*, 138 S. Ct. 377 (2017) (refugee policy). The new entry policy was ruled invalid as inconsistent with the Immigration and Naturalization Act (INA) by a district court in *State of Hawaii v. Trump*, 265 F.Supp.3d 1140 (D. Hawai‘i 2017), aff’d, 878 F.3d 662 (9th Cir. 2017), and invalid as violating both the INA and unconstitutional under the Establishment Clause in *International Refugee Assistance Project v. Trump*, 265 F.Supp.3d 570 (D. Maryland 2017), aff’d, 883 F.3d 233 (4th Cir. 2018) (9-4 en banc) (focusing on Establishment Clause grounds). The Trump Administration appealed both rulings. The Supreme Court lifted all injunctions against the entry policy while considering the case. *Trump v. Hawaii*, 138 S. Ct. 542 (2017).

In *Trump v. Hawaii*, 138 S. Ct. 2392, 2423 (2018), a 5-4 Court majority decided the new entry policy was consistent with delegated authority to the President under the INA to craft exceptions to existing policy for national security reasons. On the constitutional issue, the majority eschewed the normal factor analysis to determine discriminatory intent, discussed in the E-Treatise at § 26.2.1.2, and said that because the case involved areas of traditional deference to government (foreign policy/national security, see § 19.3.2 n.43, and immigration, see § 18.3.4 nn.170-73), the Court would apply only minimum rationality review. Under that standard, the Court said that, even considering President Trump’s anti-Muslim tweets, the ban could not be said to be based only on invidious “animus,” as the Court had found in *Romer v. Evans*, discussed at § 26.4.6. The case was remanded to consider discriminatory administration in practice. Concurring, Justice Kennedy noted that even though it was proper for the Court to rule the travel ban constitutional, all government actors, including the President, have a constitutional obligation not to behave with racial, ethnic, religious, or other improper discriminatory intent. *Id.* at 2424 (Kennedy, J., concurring). Two Justices would have reinstated the lower court’s preliminary injunction while further evidence was developed about whether the travel ban, as applied during the preceding six months, indicated discriminatory administration. *Id.* at 2433 (Breyer, J., joined by Kagan, J., dissenting). Two Justices indicated that under traditional discriminatory intent analysis, including President Trump’s anti-Muslim tweets, discriminatory intent should have been found. *Id.* at 2433 (Ginsburg, J., joined by Sotomayor, J., dissenting). The first two broader versions of the travel ban, held unconstitutional by lower courts, are noted *id.* at 2418-22.

With regard to refugees, no new formal policy has been announced, but an on-going review for 11 unnamed countries has been instituted. While it is not clear which countries this covers, at the end of 2016, higher-security screening was required for most adult male nationals from 11 countries – Egypt, Iran, Iraq, Libya, Mali, North Korea, Somalia, South Sudan, Sudan, Syria, and Yemen – as well as Palestinians who lived in those countries. The Trump Administration announced a cap of 45,000 refugees being admitted for 2108. This is the lowest cap in decades, with caps of 19,000 from Africa; 17,500 from the Near East and South Asia; 5,000 for East Asia; 2,000 for Europe and Central Asia; and 1,500 for Latin America and Caribbean. See Laura Koran, CNN, *Trump administration dramatically scales back refugee admissions* (Sept. 27, 2017) (http://www.cnn.com/2017/09/27/politics/us-trump-refugee-admissions/index.html). For 2019, the cap is even lower at 30,000.

One other aspect of the case deserves mentioned. The Supreme Court repudiated the holding in *Korematsu*, discussed in the E-Treatise at § 26.2.1.1.C, indicating the case was “gravely wrong the day it was decided.” *Id.* at 2423; *id.* at 2448 (Ginsburg, J., joined by Sotomayor, J., dissenting). On the precise issue before the Court, the majority noted the so-called “Trump travel ban” – denial of entry into the United States, subject to a waiver procedure, of nationals from six predominantly Muslim countries (Chad, Iran, Libya, Somalia, Syria, and Yemen) and also citizens of North Korea and certain government officials from Venezuela, subsequently slightly modified (Chad removed from the list) – was distinguishable from *Korematsu* as there was no racial, ethnic, or religious discrimination on the face of the ban. Thus strict scrutiny would only be applied if the challengers could prove the ban was adopted with discriminatory intent or involved discriminatory administration in practice, which the Court majority did not find when deciding the case, as discussed above.

**A3:** § 30.2.4.2, text following n.174: Page 2123: Prisoner’s Rights: See generally Booker v. South Carolina Dep’t of Corrections, 885 F.3d 535 (4th Cir. 2017) (while prisoner has no due process right to a grievance procedure, a prisoner has a First Amendment right to be free from retaliation for filing a grievance once a grievance procedure is in place); Burns v. Martuscello, 890 F.3d 77 (2nd Cir. 2018) (prisoner has a First
Amendment right not to be punished for refusing to act as an informant for prison officials or for refusing to lie when pressured to do so by prison officials; *Sisney v. Kaemingk*, 886 F.3d 692 (8th Cir. 2018) (district court should consider prisoner’s as-applied challenge to ban on prisoners possessing pornographic materials, including two erotic novels, four Japanese *manga* comics, and nine images of Renaissance artwork, before considering overbreadth of regulation in a facial challenge applying *Turner*). See also *Levitan v. Ashcroft*, 281 F. 3d 1313 (D.C. Cir. 2002) (discussing how to apply *Employment Division v. Smith* in context of prisons: some courts say no free exercise review for neutral laws; some apply minimum rationality review; many courts, as in *Levitan*, hold *Smith* is not relevant and apply *Turner v. Safley*’s second-order reasonableness balancing approach, which is used for prisoners’ rights even if for non-prisoners a higher standard of review would be applied. Under any approach, the prison rule allowing only chaplain to consume wine during communion was constitutional); *Kemp v. Liebel*, 877 F.3d 346 (7th Cir. 2017) (qualified immunity applies because no clearly established right to have prison immediately provide Jewish volunteers to lead worship services when there was reasonable delay after prisoners were transferred to new facility to maintain a kosher diet).

**A4: § 32.2.2.5, text following n.263: Page 2136: Hobby Lobby:** Whether certification must be made by the company to the insurance company, to avoid any implication of complicity in contraceptive use the certification can go to the federal government who would then notify insurance company, remained undecided. See *Wheaton College v. Burwell*, 134 S. Ct. 2806 (2014) (religious college not required to give notice to insurance company to obtain injunction against the policy pending appeal); id. at 2806 (Sotomayor, J., joined by Ginsburg & Kagan, JJ., dissenting). The government has since changed the regulation to permit certification to the government. That option has been upheld by eight of nine Courts of Appeals as not being a substantial burden on religious freedom. See *Eternal Word Tel. Network v. HHS*, 818 F.3d 1122, 1141-42 (11th Cir. 2016). Cf. *Sharpe Holdings, Inc. v. HHS*, 801 F.3d 927 (8th Cir. 2015) (still substantial burden and not narrowly tailored), decision vacated, *Zubik v. Burwell*, 136 S. Ct. 1557 (2016) (following oral argument, at Court’s request, both parties confirmed that it is “feasible” to provide contraceptive coverage though regular insurance company without any formal notice). On this issue, see generally *Conestoga Wood Specialties Corp. v. Secretary of U.S. Dep’t of Health and Human Services*, 724 F.3d 377 (3rd Cir. 2013) (2-1 panel decision) (secular for-profit corporations cannot engage in religious exercise and thus have no viable claim); id. at 389 (Jordan, J., dissenting) (corporations can engage in religious exercise, and mandate likely violates RFRA and Free Exercise Clause); Caroline Mala Corbin, *The Contraceptive Mandate*, 107 NW. U.L. REV. 1469 (2013) (mandate lawful); Katherine Lepard, *Standing Their Ground: Corporations’ Fight for Religious Rights in Light of the Enactment of the Patient Protection and Affordable Care Act Contraceptive Coverage Mandate*, 45 TEX. TECH L. REV. 1041 (2013) (mandate unlawful).

Not litigated before the Court was the preliminary question of whether RFRA applied at all to the contraceptive coverage under the Affordable Care Act (ACA). RFRA provided that its terms apply not only existing legislation in 1993, but to all future legislation unless the later Congress “explicitly excludes such application by reference to this Act.” 42 U.S.C. § 2000bb-3. Such an attempt by a past Congress to limit what a later Congress can do violates norms of constitutional democracy and the Article I, § 7 bicameralism and presentment clauses, which provide the constitutional means by which legislation is enacted, free from any additional requirements imposed by earlier Congresses, and is thus, by its literal terms, unconstitutional. See generally Michael J. Klareman, *Majoritarian Judicial Review: The Entrenchment Problem*, 85 GEO. L.J. 491, 505-07 (1997). Thus, the real question in *Burwell v. Hobby Lobby* is whether the Congress that passed the ACA in 2010 intended to incorporate by reference RFRA protections for religious exercise enacted in 1993. The 2010 Congress provided in the ACA their own set of religious opt-out provisions, limiting them to non-profit institutions. Typically, when a legislature addresses something specifically in a statute, the rule of statutory interpretation is that Congress did not intend other, unstated, broader exceptions to be implicitly incorporated by reference. See, e.g., *Silvers v. Sony Pictures Entertainment, Inc.*, 402 F.3d 881, 885 (9th Cir. 2004) (*en banc*) (“The doctrine of *expresio unius est exclusio alterius* ‘as applied to statutory interpretation creates a presumption that when a statute designates certain person, things, or manners of operation, all omissions should be understood as exclusions.’ *Boudette v Barnette*, 823 F.3d 754, 756-57 (9th Cir. 1991).”). The oft-cited Dictionary Act, 1 U.S.C. § 1, is different, since it can reasonably be assumed that an existing Congress in passing legislation enacted provisions consistent with standard definitions listed in the Dictionary Act. However, where the ACA was passed with no Republican votes, for the majority in *Burwell v. Hobby Lobby* to conclude that the Nancy Pelosi-led House of Representatives, and Harry Reed-led Senate, intended in passing the Act to give for-profit corporations a means to make it harder for women to get the contraceptive coverage mandated by the ACA strains credulity as a matter of unbiased statutory interpretation.
**Fifth Amendment Double Jeopardy:** In *Puerto Rico v. Sanchez Valle*, 136 S. Ct. 1863, 1871 (2016), the Court ruled that the “separate sovereign” doctrine did not apply between the United States and Puerto Rico, since Puerto Rico derives its legislative and prosecutorial authority from the United States. Thus, under the Double Jeopardy Clause, the United States and Puerto Rico could not prosecute the same person for the same conduct under equivalent laws. During the 2018 Term, the Court will consider whether to abandon the “separate sovereign” doctrine in *United States v. Gamble*, 674 Fed. App’x 750 (11th Cir. 2017), cert. granted, 138 S. Ct. 2707 (2018), a case involving an former convicted felon convicted of improperly possessing a gun under Alabama law (and sentenced to one year imprisonment), who was subsequently convicted of violating the federal statute against former felons possessing a gun (and sentenced to four years imprisonment).

**Sixth Amendment Right to Counsel:** In *McCoy v. Louisiana*, 138 S. Ct. 1500 (2018), the Court confirmed that while certain trial management decisions are for the attorney, and thus subject to ineffective assistance of counsel analysis, some decisions are “reserved for the client – notably, whether to plead guilty, waive the right to jury trial, testify in one’ own behalf, and forgo an appeal.” *Id. at* 1508. This right is absolute, and thus is “structural” and not subject to “harmless error” analysis, discussed at § 23.2.1.3 n.185. In this case, a new trial had to be ordered when defendant’s counsel argued to the jury, over defendant’s objection, that the defendant was guilty of the alleged murder, based on counsel’s view that admitting guilt might save the defendant from imposition of the death penalty. The death penalty was nonetheless imposed. In their dissent, three Justices noted the counsel did not admit that the defendant committed first-degree murder, only that he killed the victims, not that he had the intent required for first-degree murder. In their view, this was a permissible trial strategy decision of the attorney. *Id. at* 1512-14 (Alito, J., joined by Thomas & Gorsuch, JJ., dissenting).

For discussion of how the requirement in *Gideon v. Wainwright*, 372 U.S. 335 (1963), for defendants to have counsel in all felony criminal cases and in misdemeanor cases where the accused is sentenced to any term of imprisonment, discussed in the E-Treatise at § 23.1.3.C nn.189-90, has worked out in practice, see generally George C. Thomas III, *How Gideon v. Wainwright Became Goldilocks*, 12 Ohio St. J. Crim. L. 307 (2015), and sources cited therein, in SYMPOSIUM ISSUE: THE FAILURES OF GIDEON AND NEW PATHS FOREWARD.
